VII. Purchases by U. S. Government -- Applicability of Robinson-Patman Antidiscrimination Act to Same. In an opinion submitted to the Secretary of War under date of December 28, 1936, the U. S. Attorney General advised that the Robinson-Patman Antidiscrimination Act "is not applicable to Government contracts for supplies." (39 Opinions, Attorney General 539.)

^{1/}See footnote, page 7.

RULE 16 - DISCRIMINATORY RETURNS.

It is an unfair trade practice for any member of the industry engaged in commerce ^{1/} to discriminate in favor of one customer-purchaser against another customer-purchaser of bedding products, bought from such member of the industry for resale, by contracting to furnish, or furnishing in connection therewith, upon terms not accorded to all competing customer-purchasers on proportionately equal terms, the service or facility whereby such favored purchaser is accorded the privilege of returning bedding products so purchased and receiving therefor credit or refund of purchase price: Provided, however, that nothing in any of the rules herein shall be construed as prohibiting the return of merchandise by purchaser, for credit or refund of purchase price, when and because such merchandise has not been properly tagged, labeled, or marked by the seller in accordance with the requirements of these rules, or has been otherwise falsely or deceptively tagged, labeled, or represented, or when and because such merchandise is defective in material, workmanship, or in any other respect is contrary to guarantee, warranty, or purchase contract.

RULE 17 - COMBINATION OR COERCION TO FIX PRICES, SUPPRESS COMPETITION, OR RESTRAIN TRADE.

It is an unfair trade practice for a member of the industry:

- (a) To use, directly or indirectly, any form of threat, intimidation, or coercion against any member of the industry or other person to unlawfully fix, maintain, or enhance prices, suppress competition, or restrain trade; or
- (b) To enter into or take part in, directly or indirectly, any agreement, understanding, combination, conspiracy, or concerted action with one or more members of the industry, or with one or more persons, to unlawfully fix, maintain, or enhance prices, suppress competition, or restrain trade.

RULE 18 - IMITATION OR SIMULATION OF TRADE-MARKS, TRADE NAMES, ETC.

The imitation or simulation of the trade-marks, trade names, brands, or labels of competitors, with the capacity and tendency or effect of misleading or deceiving purchasers, prospective purchasers, or the consuming public, is an unfair trade practice.

RULE 19 - AIDING OR ABETTING USE OF UNFAIR TRADE PRACTICES.

It is an unfair trade practice for any person, firm, or corporation to aid, abet, coerce, or induce another, directly or indirectly, to use or promote the use of any unfair trade practice specified in these rules.

^{1/}See footnote, page 7.

GROUP II

Compliance with trade practice provisions embraced in Group II rules is considered to be conducive to sound business methods and is to be encouraged and promoted individually or through voluntary cooperation exercised in accordance with existing law. Nonobservance of such rules does not per se constitute violation of law. Where, however, the practice of not complying with any such Group II rules is followed in such manner as to result in unfair methods of competition, or unfair or deceptive acts or practices, corrective proceedings may be instituted by the Commission as in the case of violation of Group I rules.

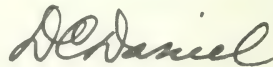

RULE A - PRODUCTS TO BE MANUFACTURED, REPAIRED, RENOVATED, AND SOLD UNDER SANITARY CONDITIONS.

The industry condemns the practice of manufacturing, repairing, renovating, or selling bedding products under unsanitary conditions.

A Committee on Trade Practices is hereby authorized to cooperate with the Federal Trade Commission and to perform such acts as may be legal and proper in the furtherance of fair competitive practices and in promoting the effectiveness of the rules.

Promulgated by the Federal Trade Commission November 14, 1950.

FEDERAL TRADE COMMISSION
Washington

AMENDMENT TO TRADE PRACTICE RULES
FOR THE BEDDING MANUFACTURING AND
WHOLESALE DISTRIBUTING INDUSTRY

As Promulgated January 14, 1955

STATEMENT BY THE COMMISSION:

An amendment to the trade practice rules issued November 14, 1950, for the Bedding Manufacturing and Wholesale Distributing Industry, as hereinafter set forth, is promulgated by the Federal Trade Commission under the trade practice conference procedure.

The rules for the industry, as amended by the addition of Rule 20 on "Push Money," are directed to the elimination and prevention of unfair trade practices to the end that the industry, the trade, and the public may be protected from the harmful effects of such competitive methods, and of providing guidance and assistance to business in the maintenance of free and fair competition.

Members of the industry are the persons, firms, corporations, and organizations engaged in manufacturing and selling in commerce mattresses (including baby crib mattresses), bed pads, bedsprings, box springs, metal cots, metal beds, studio couches, sofa beds, or similar sleeping equipment; also, all persons, firms, corporations and organizations engaged in selling in commerce as wholesalers or jobbers any of the products or equipment mentioned.

Proceedings leading to the addition of this rule on "Push Money" were instituted upon application from the National Association of Bedding Manufacturers, made in behalf of industry members. A public hearing was held in Washington, D. C., at which the proposed rule was submitted for discussion by all interested or affected parties. Following such hearing, final action was taken by the Commission whereby it approved Rule 20 on "Push Money" as hereinafter appearing.

Such rule becomes operative thirty (30) days from the date of promulgation.

RULE 20 - PUSH MONEY.

It is an unfair trade practice for any industry member to pay or contract to pay anything of value to a salesperson employed by a customer of the industry member, as compensation for, or as an inducement to obtain, special or greater effort or service on the part of the salesperson in promoting the resale of products supplied by the industry member to the customer -

(a) When the agreement or understanding under which the payment or payments are made or are to be made is without the knowledge and consent of the salesperson's employer; or

(b) When the terms and conditions of the agreement or understanding are such that any benefit to the salesperson or customer is dependent on lottery or chance; or

(c) When any provision of the agreement or understanding requires or contemplates practices or a course of conduct unduly and intentionally hampering sales of products of competitors of an industry member; or

(d) When, because of the terms and conditions of the understanding or agreement, including its duration, or the attendant circumstances, the effect may be to substantially lessen competition or tend to create a monopoly; or

(e) When similar payments are not accorded to salespersons of competing customers on proportionally equal terms in compliance with Sec. 2(d) and (e) of the Clayton Act, as amended.

(Note: Payments made by an industry member to a salesperson of a customer under any agreement or understanding that all or any part of such payments is to be transferred by the salesperson to the customer, or is to result in a corresponding decrease in the salesperson's salary, are not to be considered within the purview of this Rule 20, but are to be considered as subject to the requirements and provisions of Sec. 2(a) of the Clayton Act, as amended.)

Promulgated by the Federal Trade Commission January 14, 1955.

A handwritten signature in dark ink, appearing to read "Robert M. Parrish". The signature is fluid and cursive, with the first name "Robert" being more prominent and the last name "Parrish" following in a similar style.

TRADE PRACTICE RULES

For The

**FEATHER AND DOWN
PRODUCTS INDUSTRY**

As Promulgated April 26, 1951

FEDERAL TRADE COMMISSION

James M. Mead, Chairman,
William A. Ayres,
Lowell B. Mason,
John Carson,
Stephen J. Spingarn.
D. C. Daniel, Secretary

FEDERAL TRADE COMMISSION
Washington

On May 29, 1959 (see page 4327 of the Federal Register publication of that date), the Commission amended Rule 12, entitled "False Invoicing," of the trade practice rules promulgated for the Feather and Down Products Industry on April 26, 1951. The amendment consisted of deletion of the word "dealers" and the comma immediately following such word. So amended the rule reads as follows:

RULE 12 - FALSE INVOICING. Withholding from or inserting in invoices any statements or information by reason of which omission or insertion a false or misleading record is made, wholly or in part, of the transactions represented on the face of such invoices, with the purpose or effect of thereby misleading or deceiving purchasers, prospective purchasers, or the consuming public, is an unfair trade practice.

FEDERAL TRADE COMMISSION
Washington

TRADE PRACTICE RULES

For The

FEATHER AND DOWN PRODUCTS INDUSTRY

As Promulgated April 26, 1951

STATEMENT BY THE COMMISSION:

Trade practice rules for the Feather and Down Products Industry, as hereinafter set forth, are promulgated by the Federal Trade Commission under the trade practice conference procedure. Such rules constitute a revision and supplementation of the rules promulgated by the Commission for the Feather and Down Industry on July 18, 1932, and supersede the 1932 rules.

Members of the industry are the persons, firms, corporations and organizations engaged in the manufacture, processing, distribution and sale in commerce of pillows, cushions, comforters, sleeping bags, and similar products, which are wholly or partially filled with feathers or down.

The rules are directed to the elimination and prevention of various unfair trade practices and are issued in the interest of protecting the purchasing public and maintaining fair competitive conditions in the industry. To this end the rules provide a helpful guide to all concerned.

The industry affected has fully cooperated with the Commission in the formulation and establishment of the rules. During the course of the proceedings a general industry conference was held under Commission auspices in New York City, at which proposals for rules were submitted for the consideration of the Commission. Thereafter, a draft of proposed rules was released by the Commission and public hearing thereon held in Washington, D. C., at which all interested or affected parties were afforded opportunity to present their views, suggestions, or objections regarding the rules.

Following such hearing, and upon consideration of the entire matter, final action was taken by the Commission whereby it approved and received, respectively, the trade practice rules hereinafter appearing in Group I and Group II.

Such rules become operative thirty (30) days from the date of promulgation.

THE RULES

These rules promulgated by the Commission are designed to foster and promote the maintenance of fair competitive conditions in the interest of protecting industry, trade, and the public. It is to this end, and to the exclusion of any act or practice which suppresses competition, restrains trade, fixes or controls price through combination or agreement, or which otherwise injures, destroys, or prevents competition, that the rules are to be applied.

DEFINITIONS

(a) As used in these rules the term "industry products" means and includes all pillows, cushions, comforters, sleeping bags, and similar products, which are wholly or partially filled with feathers or down.

(b) Members of the industry are the persons, firms, corporations and organizations engaged in the business of manufacturing, processing, distributing or marketing in commerce any such industry products.

(Note: Nothing in these rules shall be construed as relieving any member of the industry of the necessity of complying with the requirements of State laws or regulations or other laws or regulations applicable to the products of this industry.)

GROUP I

The unfair trade practices embraced in the Group I rules herein are considered to be unfair methods of competition, unfair or deceptive acts or practices, or other illegal practices, prohibited under laws administered by the Federal Trade Commission; and appropriate proceedings in the public interest will be taken by the Commission to prevent the use, by any person, partnership, corporation, or other organization subject to its jurisdiction, of such unlawful practices in commerce.

RULE 1 - MISREPRESENTATION AND DECEPTION IN GENERAL.

It is an unfair trade practice to use, or cause or promote the use of, any trade promotional literature, advertising matter, guarantee, warranty, mark, brand, label, trade name, picture, design or device, designation, or other type of oral or written representation, however disseminated or published, which has the capacity and tendency or effect of misleading or deceiving purchasers or prospective purchasers -

(a) with respect to the type, kind, grade, quality, quantity, weight, size, color, origin, durability, processing, testing, construction, manufacture, distribution, or customary or regular price, of any industry product, or concerning any component, contents, or covering of such product; or

(b) with respect to the colorfastness, finish, thread count, weight, pattern, material, type of fiber or weave, or feather- or down-resistant qualities, of the sewn, permanent, or removable cover or covering of any industry product; or

(c) which in any other material respect has the capacity and tendency or effect of misleading or deceiving the purchasing or consuming public.

RULE 2 - DECEPTIVE PICTURES OR SYMBOLS.

It is an unfair trade practice, in connection with the offering for sale, sale, or distribution of industry products, to use as part of a label, advertisement, trade name, or other representation, any depiction of a waterfowl or other picture, symbol, or design which, either alone or in conjunction with accompanying words, phrases, or other representations, has the capacity and tendency or effect of misleading or deceiving purchasers or prospective purchasers into the belief that the product is composed (in whole or in part) of feathers or down when such is not the fact, or is composed (in whole or in part) of feathers or down from fowl of the type or color represented by such words, pictures, or other symbols, when such is not the fact.

RULE 3 - IDENTIFICATION AND DISCLOSURE OF KIND AND TYPE OF FILLING MATERIAL IN INDUSTRY PRODUCTS.

I. In the sale, offering for sale, or distribution of industry products, it is an unfair trade practice to misrepresent or deceptively conceal the identity of the kind or type of filling material contained in any of such products, or of the kinds or types, and proportions of each, when the filling material is a mixture of more than one kind or type. Such identification and disclosure shall be made by tag or label securely affixed to the outside covering of each product and in invoices and all advertising and trade promotional literature relating to the product; and when the filling material is a mixture of more than one kind or type, each kind and type shall either be listed in the order of its predominance by weight, or be listed with an accompanying disclosure of the fraction or percentage by weight of the entire mixture which it represents.

II. Identification of the kind and type of feather and down stock by use of any of the terms listed and defined below will be considered proper when in accord with the definition set forth for such term:

DEFINITIONS:

(a) Down: The undercoating of waterfowl, consisting of clusters of the light, fluffy filaments growing from one quill point but without any quill shaft.

(b) Down fiber: The barbs of down plumes separated from the quill points.

(c) Waterfowl feathers: Goose feathers, duck feathers, or any mixture of goose and duck feathers.

(d) Feathers (or Natural Feathers): Bird or fowl plumage having quill shafts and barbs and which has not been processed in any manner other than by washing, dusting, and sterilizing.

(e) Quill feathers (or Quills): Wing feathers or tail feathers or any mixture of wing and tail feathers.

(f) Crushed feathers: Feathers which have been processed by a crushing or curling machine which has changed the original form of the feathers without removing the quill.

(g) Stripped feathers: The barbs of feathers stripped from the quill shaft but not separated into feather fiber.

(h) Feather fiber: The barbs of feathers which have been completely separated from the quill shaft and any aftershaft and which are in no-wise joined or attached to each other.

(i) Chopped feathers: Feathers which have been subjected to a chopping or cutting process and as a result have been chopped or cut into pieces.

(j) Damaged feathers: Feathers, other than crushed, chopped, or stripped, which are broken, damaged by insects, or otherwise materially injured.

III. TOLERANCE:^{1/} (a) Subject to the restrictions and limitations hereinafter set forth, the filling material of an industry product may be represented as being of but one kind or type when 85% of the weight of all filling material contained in the product is of the represented kind or type; or may be represented as being of a mixture of two or more kinds or types with accompanying disclosure of a fraction or percentage of the weight of the entire mixture represented by each if the fraction or percentage shown is not at variance with the actual proportion of the weight of the entire mixture represented by each such kind or type by more than 15% of the stated fraction or percentage.

Limitations and Restrictions

(b) When the filling material of an industry product is represented, directly or indirectly, as being wholly of down, any proportion within the tolerance percentage provided for in (a) above which is not down shall consist principally of down fiber and/or small, light, and fluffy waterfowl feathers, shall contain no quill feathers, crushed feathers, or chopped feathers, and shall not contain damaged feathers, quill pith, quill fragments, trash, or any matter foreign to feather and down stock in excess of 2% by weight of the filling material contained in the product or which in the aggregate exceeds 5% of such weight.

^{1/}The tolerance provided for in this paragraph III is to be understood as being an allowance for error and as not embracing any intentional adulteration.

(c) When the filling material of an industry product is represented, directly or indirectly, as being wholly of waterfowl feathers, any proportion within the tolerance percentage provided for in (a) above which is not waterfowl feathers shall not contain non-waterfowl feathers in excess of 5% by weight of the filling material in the product, nor quill pith, quill fragments, trash, or any matter foreign to feather and down stock in excess of 2% by weight of the filling material in the product or which in the aggregate exceeds 5% of such weight; and, unless non-deceptively disclosed in the representation, not in excess of 5% by weight of the filling material of the product shall consist of waterfowl quill feathers, waterfowl damaged feathers, waterfowl crushed feathers, or waterfowl chopped feathers.

(d) When the filling material of an industry product is represented, directly or indirectly, as being wholly of feathers (or natural feathers), any proportion within the tolerance percentage provided for in (a) above which is not natural feathers shall not contain quill pith, quill fragments, trash, or any matter foreign to feather and down stock in excess of 2% by weight of the filling material in the product or which in the aggregate exceeds 5% of such weight; and, unless nondeceptively disclosed in the representation, not in excess of 5% by weight of the filling material of the product shall consist of crushed feathers, chopped feathers, quill feathers, or damaged feathers.

(e) When the filling material of an industry product is represented, directly or indirectly, as being wholly of a mixture of down and feathers, or of down and more than one kind or type of feathers, or of feathers of more than one kind or type, any proportion, or the aggregate of any proportions, of the filling material of the product at variance with the representation, but within the tolerance percentage provided for in (a) above, shall not contain quill pith, quill fragments, trash, or any matter foreign to feather and down stock in excess of 2% by weight of the filling material in the product or which in the aggregate exceeds 5% of such weight; and, unless nondeceptively disclosed in the representation, not in excess of 5% by weight of the filling material of the product shall consist of crushed feathers, chopped feathers, quill feathers, or damaged feathers.

Note: It is the consensus of the industry that determination as to whether any representation is violative of the provisions of this Rule should be based on an average of the results of tests of at least two products of the same type when same are readily available for testing, and that a proper method of testing such product would be as follows:

Samples of approximately equal weight and size should be drawn from at least three different locations in the product. Such samples should then be thoroughly mixed so as to assure of substantially uniform distribution of each kind and type of component material. From such mixture a test sample of not less than 3 grams weight should be drawn. The kinds and types of materials in said test sample should then be identified and separated and each kind or type then separately weighed and

the percentage by weight of each kind and type computed from such weights. The identification of the various kinds and types of feather and down stock in the test sample should be made by a competent feather and down analyst.

IV. Nothing in this Rule 3 is to be construed as relieving industry members from complying with the requirements of Rule 5 herein when the filling material of any industry product, or any component thereof, is used or second-hand, or from complying with the requirements of Rule 6 herein entitled "Cleanliness of Feathers, Down, and Other Components."

RULE 4 - DISCLOSURE AS TO COVERING MATERIALS.

It is an unfair trade practice to misrepresent or deceptively conceal the type or kind of fabric or other material used in covers and cases of industry products, or the fiber or material content of any inner, outer, permanent, or removable covers or cases.

Note: Products containing rayon, silk, or linen shall be identified as to their fiber and material content in labels, invoices, and advertisements, in accordance with the requirements of trade practice rules heretofore promulgated by the Commission for the Rayon Industry, Silk Industry, and Linen Industry.

Products containing, purporting to contain, or in any way represented as containing, wool, reprocessed wool, or reused wool, shall be labeled in accordance with the requirements of the Wool Products Labeling Act of 1939 and the Rules and Regulations issued thereunder.

RULE 5 - SECOND-HAND FEATHERS, DOWN, AND OTHER COMPONENTS.

To offer for sale, sell, or distribute any industry product containing any component which has previously been used in any product, or used for any purpose, without clearly disclosing that fact in describing, advertising, labeling, invoicing and selling such product, and in all representations concerning the product, is an unfair trade practice. It is likewise an unfair trade practice to misrepresent or deceptively conceal the type, kind, or amount of such components, or to use with reference to said products descriptive words, phrases, labels, or other representations which have the capacity and tendency or effect of misleading or deceiving purchasers or prospective purchasers concerning the effect on said material of such prior use or concerning the type, extent, method, or effect of any reprocessing, renovation, or re-sterilization of such material.

Note: Disclosure that feathers or down have been previously used may be made by clear and conspicuous use of the term "second-hand." Designation of such material as "reworked" or "reprocessed," or use of similar phrases, without further clear and conspicuous statement that such material is not new or has been previously used, is deemed misleading.

RULE 6 - CLEANLINESS OF FEATHERS, DOWN, AND OTHER COMPONENTS.

It is an unfair trade practice to sell or distribute for sale to the ultimate consumer, without full and nondeceptive disclosure concerning the unclean, unsanitary, and unsterilized nature of the contents, any industry product containing feathers, down, or other components which have not been sterilized and properly washed or otherwise properly cleaned, or containing used or second-hand feathers, down, or any other components which have not been re-sterilized and re-cleaned, such practice having the capacity and tendency or effect of causing purchasers or consumers to be misled or deceived by reason of concealment or nondisclosure of the condition of the feathers, down, or other contents of such product.

NOTE: Standard tests, such as the New York State Oxygen Test, should be used to determine whether feathers and down have been properly cleaned. Such a test may be made in the following manner:

Ten grams of feathers and down are transferred to a glass jar or similar container and 1 liter of distilled water at room temperature is added. The material is thoroughly wetted by shaking and placed in an incubator at 25°C. for one hour. It is then filtered through 19-cm. coarse filter paper, and 100 ml. of filtrate are pipetted into a porcelain casserole. The liquid is made just acid to litmus with 6 N sulfuric acid and 1 ml. of acid is added in excess. The solution is titrated in the cold with 0.1 N potassium permanganate by adding 2-drop portions and then stirring until a pink color persists for 60 seconds.

The number of milliliters of potassium permanganate used is noted, and calculated to number of grams of oxygen per 100,000 grams of sample (oxygen number). 1 ml. of 0.1 N KMnO_4 = 0.8 mg. of oxygen = 80, oxygen number.

Material having an oxygen number above 20 shall be deemed to be not properly cleaned.

RULE 7 - DISCLOSURE AS TO SIZE.

(a) In connection with the offering for sale, sale, or distribution of industry products, it is an unfair trade practice to misrepresent or deceptively conceal the size of any product, or to advertise, mark, brand, stamp, tag, label, or otherwise represent or describe, any industry product in a manner having the capacity and tendency or effect of misleading or deceiving purchasers or prospective purchasers as to the size or any dimension of such product.

(b) In the application of this rule, the following standards and tolerances shall be observed to the end that confusion, misunderstanding, deception, and unfair competitive practices may be avoided and prevented.

(1) Representations concerning the size of a product shall set forth or indicate the finished size of the product (that is, the dimensions of the product as offered for sale) in a clear, definite, and unambiguous manner.

EXAMPLE: Either "Finished Size - 21 x 27" or "Size 21 x 27" is a proper label for a product with a finished size 21 inches wide and 27 inches long. A size label stating only "21 x 27" is also deemed a representation that such is the finished size.

(2) In the case of representations concerning the finished size of industry products, a tolerance on each dimension of one-fourth inch for pillows and one inch for comforters will be allowed.

EXAMPLE: A pillow labeled "Finished Size 21 x 27" is within the tolerance if the measurement of its shortest end and side is not less than $20\frac{3}{4}$ x $26\frac{3}{4}$ and the measurement of its longest end and side is not more than $21\frac{1}{4}$ x $27\frac{1}{4}$.

(3) Truthful disclosure of the cut size of a product's cover before sewing and filling may be made in conjunction with, and with no greater conspicuousness than, any disclosure of the finished size of the product, when explanation is made of the meaning of such cut size, and when such disclosure is made in a clear, definite, and unambiguous manner that does not mislead or deceive the purchaser or prospective purchaser concerning the finished size of the product.

EXAMPLE: A finished product size label stating only "Cut Size - 21 x 27" does not comply with the foregoing rule. A proper label could read: "FINISHED SIZE - 20 x 26; Cut Size of Cover Before Sewing and Filling - 21 x 27."

RULE 8 - GUARANTEES, WARRANTIES, ETC.

(a) It is an unfair trade practice to use or cause to be used any guarantee which is false, misleading, deceptive, or unfair to the purchasing or consuming public.

(b) The following types of guarantees are examples of those considered unfair trade practices and in violation of this rule:

(1) Guarantees which are so used, or are of such form, text, or character, as to import, imply, or represent that the guarantee is broader than is in fact true, and guarantees which in themselves or in the manner of their use are otherwise false, misleading, or deceptive.

(2) Guarantees which purportedly extend for indefinite or unlimited periods of time, or for such long periods of years, as to

have the capacity and tendency or effect of thereby misleading or deceiving purchasers or users into the belief that the product has or is definitely known to have a greater degree of serviceability or durability in actual use than is in fact true.

(3) Guarantees which have the capacity and tendency or effect of otherwise misrepresenting the serviceability, durability, or lasting qualities of the product, or of its feather and down content, or of its fabric covering, or of any mothproofing or other special treatment or quality of such product.

(c) This rule shall be applicable not only to guarantees, but also to warranties, to purported warranties and guarantees, and to any promise or representation in the nature of or purporting to be a guarantee or warranty.

RULE 9 - FICTITIOUS PRICE LISTS.

The publishing or circulating by any member of the industry of false or misleading price quotations, price lists, terms or conditions of sale, or reports as to production or sales, with the capacity and tendency or effect of misleading or deceiving purchasers, prospective purchasers, or the consuming public, or the advertising, sale, or offering for sale of industry products at prices purporting to be reduced from what are in fact fictitious prices, or at purported reductions in price when such purported reductions are in fact fictitious or are otherwise misleading or deceptive, is an unfair trade practice.

RULE 10 - USE OF LOTTERY SCHEMES.

The offering or giving of prizes, premiums, or gifts in connection with the sale or distribution of industry products, or as an inducement thereto, by any scheme which involves a lottery or scheme of chance, and the sale or distribution of industry products by any method or plan which involves a lottery or scheme of chance, are unfair trade practices.

RULE 11 - MISREPRESENTATIONS AS TO CHARACTER OF BUSINESS.

It is an unfair trade practice for any member of the industry to represent, directly or indirectly, through the use of any word or term in his corporate or trade name, in his advertising or otherwise, that he is a manufacturer of feather and down products, or that he is the owner or operator of a factory or producing company manufacturing them, or that he owns, maintains, or operates a research laboratory devoted to feather, down, pillow, comforter, or bedding research and development, when such is not the fact, or in any other manner to misrepresent the character, extent, volume, or type of his business.

RULE 12 - FALSE INVOICING.

Withholding from or inserting in invoices any statements or information by reason of which omission or insertion a false or misleading

record is made, wholly or in part, of the transactions represented on the face of such invoices, with the purpose or effect of thereby misleading or deceiving dealers, purchasers, prospective purchasers, or the consuming public, is an unfair trade practice.

RULE 13 - COMBINATION OR COERCION TO FIX PRICES, SUPPRESS COMPETITION, OR RESTRAIN TRADE.

It is an unfair trade practice for a member of the industry:

(a) To use, directly or indirectly, any form of threat, intimidation, or coercion against any member of the industry or other person unlawfully to fix, maintain, or enhance prices, suppress competition, or restrain trade; or

(b) To enter into or take part in, directly or indirectly, any agreement, understanding, combination, conspiracy, or concerted action with one or more members of the industry, or with one or more other persons, unlawfully to fix, maintain, or enhance prices, suppress competition, or restrain trade.

RULE 14 - PROHIBITED DISCRIMINATION.

I. Prohibited Discriminatory Prices, or Rebates, Refunds, Discounts, Credits, Etc., Which Effect Unlawful Price Discrimination. It is an unfair trade practice for any member of the industry engaged in commerce,^{2/} in the course of such commerce, to grant or allow, secretly or openly, directly or indirectly, any rebate, refund, discount, credit, or other form of price differential, where such rebate, refund, discount, credit, or other form of price differential, effects a discrimination in price between different purchasers of goods of like grade and quality, where either or any of the purchases involved therein are in commerce,^{2/} and where the effect thereof may be substantially to lessen competition or tend to create a monopoly in any line of commerce,^{2/} or to injure, destroy, or prevent competition with any person who either grants or knowingly receives the benefit of such discrimination, or with customers of either of them: Provided, however -

(a) That the goods involved in any such transaction are sold for use, consumption, or resale within any place under the jurisdiction of the United States;

(b) That nothing herein contained shall prevent differentials which make only due allowance for differences in the cost of manufacture, sale, or delivery resulting from the differing methods or quantities in which such commodities are to such purchasers sold or delivered;

^{2/}As here used, the word "commerce" means "trade or commerce among the several States and with foreign nations, or between the District of Columbia or any Territory of the United States and any State, Territory, or foreign nation, or between any insular possessions or other places under the jurisdiction of the United States, or between any such possession or place and any State or Territory of the United States or the District of Columbia or any foreign nation, or within the District of Columbia or any Territory or any insular possession or other place under the jurisdiction of the United States."

(c) That nothing herein contained shall prevent persons engaged in selling goods, wares, or merchandise in commerce 2/ from selecting their own customers in bona fide transactions and not in restraint of trade;

(d) That nothing herein contained shall prevent price changes from time to time where made in response to changing conditions affecting the market for or the marketability of the goods concerned, such as but not limited to actual or imminent deterioration of perishable goods, obsolescence of seasonal goods, distress sales under court process, or sales in good faith in discontinuance of business in the goods concerned.

II. Prohibited Brokerage and Commissions. It is an unfair trade practice for any member of the industry engaged in commerce, 2/ in the course of such commerce, to pay or grant, or to receive or accept, anything of value as a commission, brokerage, or other compensation, or any allowance or discount in lieu thereof, except for services rendered in connection with the sale or purchase of goods, wares, or merchandise, either to the other party to such transaction or to an agent, representative, or other intermediary therein, where such intermediary is acting in fact for or in behalf, or is subject to the direct or indirect control, of any party to such transaction other than the person by whom such compensation is so granted or paid.

III. Prohibited Advertising or Promotional Allowances, Etc. It is an unfair trade practice for any member of the industry engaged in commerce 2/ to pay or contract for the payment of advertising or promotional allowances or any other thing of value to or for the benefit of a customer of such member in the course of such commerce as compensation or in consideration for any services or facilities furnished by or through such customer in connection with the processing, handling, sale, or offering for sale of any products or commodities manufactured, sold, or offered for sale by such member, unless such payment or consideration is available on proportionally equal terms to all other customers competing in the distribution of such products or commodities.

IV. Prohibited Discriminatory Services or Facilities. It is an unfair trade practice for any member of the industry engaged in commerce 2/ to discriminate in favor of one purchaser against another purchaser or purchasers of a commodity bought for resale, with or without processing, by contracting to furnish or furnishing, or by contributing to the furnishing of, any services or facilities connected with the processing, handling, sale, or offering for sale of such commodity so purchased upon terms not accorded to all competing purchasers on proportionally equal terms.

V. Inducing or Receiving an Illegal Discrimination in Price. It is an unfair trade practice for any member of the industry engaged in commerce, 2/ in the course of such commerce, knowingly to induce or receive a discrimination in price which is prohibited by the foregoing provisions of this rule 14.

2/See footnote, page 10.

VI. Exemptions. The inhibitions of this Rule 14 shall not apply to purchases of their supplies for their own use by schools, colleges, universities, public libraries, churches, hospitals, and charitable institutions not operated for profit.

(**NOTE:** In complaint proceedings charging discrimination in price or services or facilities furnished, and upon proof having been made of such discrimination, the burden of rebutting the prima facie case thus made by showing justification shall be upon the person charged; and unless justification shall be affirmatively shown, the Commission is authorized to issue an order terminating the discrimination; provided, however, that nothing herein contained shall prevent a seller rebutting the prima facie case thus made by showing that his lower price or the furnishing of services or facilities to any purchaser or purchasers was made in good faith to meet an equally low price of a competitor or the services or facilities furnished by a competitor.)

RULE 15 - DISCRIMINATORY RETURNS.

It is an unfair trade practice for any member of the industry to discriminate in favor of one customer-purchaser against another customer-purchaser of industry products, bought from such member of the industry for resale, by contracting to furnish, or furnishing in connection therewith, upon terms not accorded to all customer-purchasers on proportionately equal terms, the service or facility whereby such favored purchaser is accorded the privilege of returning industry products so purchased and receiving therefor credit or refund of purchase price; provided, however, that nothing in any of the rules herein shall prohibit or be used to prevent the return of merchandise by purchaser, for credit or refund of purchase price, when and because such merchandise has not been properly labeled by the seller in accordance with these rules, or has been otherwise falsely or deceptively labeled or represented, or when and because such merchandise is defective in material, workmanship, or in any other respect is contrary to warranty or purchase contract.

RULE 16 - COMMERCIAL BRIBERY.

It is an unfair trade practice for a member of the industry, directly or indirectly, to give, or offer to give, or permit or cause to be given, money or anything of value to agents, employees, or representatives of customers or prospective customers, or to agents, employees, or representatives of competitors' customers or prospective customers, without the knowledge of their employers or principals, as an inducement to influence their employers or principals to purchase or contract to purchase industry products manufactured or sold by such industry member or the maker of such gift or offer, or to influence such employers or principals to refrain from dealing in the products of competitors or from dealing on contracting to deal with competitors.

RULE 17 - DEFAMATION OF COMPETITORS OR FALSE DISPARAGEMENT OF THEIR PRODUCTS.

The defamation of competitors by falsely imputing to them dishonorable conduct, inability to perform contracts, questionable credit standing, or by other false representations, or the false disparagement of the products of competitors in any respect, or of their business methods, selling prices, values, credit terms, policies, or services, is an unfair trade practice.

RULE 18 - AIDING OR ABETTING USE OF UNFAIR TRADE PRACTICES.

It is an unfair trade practice for any person, firm, or corporation to aid, abet, coerce, or induce another, directly or indirectly, to use or promote the use of any unfair trade practice specified in these rules.

GROUP II

Compliance with trade practice provisions embraced in Group II rules is considered to be conducive to sound business methods and is to be encouraged and promoted individually or through voluntary cooperation exercised in accordance with existing law. Nonobservance of such rules does not per se constitute violation of law. Where, however, the practice of not complying with any Group II rules is followed in such manner as to result in unfair methods of competition or unfair or deceptive acts or practices in commerce, corrective proceedings in respect thereto may be instituted by the Commission as in the case of violation of Group I rules.

RULE A - USE OF SIZE MARKS AND LABELS

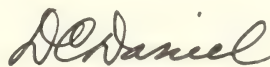

The industry approves the practice of marking and labeling all industry products in a manner which accurately and nondeceptively discloses the size of such products and disapproves the practice of distributing and selling industry products which are not thus marked or labeled with respect to size.

INDUSTRY COMMITTEE

A Committee on Trade Practices is hereby authorized to cooperate with the Federal Trade Commission and to perform such acts as may be legal and proper in the furtherance of fair competitive practices and in promoting the effectiveness of the rules.

Promulgated by the Federal Trade Commission April 26, 1951.

TRADE PRACTICE RULES

For The

HOUSEHOLD FURNITURE INDUSTRY

As Promulgated December 18, 1963

STATEMENT BY THE COMMISSION:

Revised trade practice rules for the Household Furniture Industry, formerly known as the Household Furniture and Furnishings Industry, are promulgated by the Federal Trade Commission as hereinafter set forth.

The industry is composed of persons, firms, corporations and organizations engaged in the manufacture, sale or distribution of articles of utility, convenience or decoration which are suitable for use as furniture in a house, apartment or other dwelling place. Such articles include, but are not limited to, all kinds and types of chairs, tables, cabinets, desks, bedsteads and bureaus.

The rules constitute a revision of, and supersede, the rules promulgated for the Household Furniture and Furnishings Industry on May 10, 1932. Numerous changes embodying clarifications of the applicable provisions of laws administered by the Commission have been made.

Suggested trade practice rules were discussed at trade practice conferences held in Los Angeles, California, Chicago, Illinois and High Point, North Carolina.

Proposed rules were subsequently published by the Commission and made available to all industry members and to all interested and affected parties in a public notice whereby they were afforded opportunity to present their views, including such pertinent information, suggestions, amendments or objections as they desired to offer and to be heard in the premises. Pursuant to such notice, a public hearing was held in Washington on November 28, 1962, and all matters presented or otherwise received in the proceeding were duly considered.

Thereafter, and upon full consideration of the entire matter, final action was taken by the Commission whereby it has approved the rules as hereinafter set forth.

Such rules will not become operative until ninety (90) days from the date of promulgation in order to afford industry members opportunity to bring their practices into conformity with the provisions thereof.

THE RULES

These rules promulgated by the Commission are designed to foster and promote the maintenance of fair competitive conditions in the interest of protecting industry, trade, and the public. It is to this end, and to the exclusion of any act or practice which fixes or controls prices through combination or agreement, or which unreasonably restrains trade or suppresses competition, or otherwise unlawfully injures, destroys, or prevents competition, that the rules are to be applied.

The unfair trade practices embraced in the rules herein are considered to be unfair methods of competition, unfair or deceptive acts or practices, or other illegal practices, prohibited under laws administered by the Federal Trade Commission, and appropriate proceedings in the public interest will be taken by the Commission to prevent the use, by any person, partnership, corporation, or other organization subject to its jurisdiction, of such unlawful practices in commerce.

TABLE OF RULES

<u>Rule No.</u>	<u>Title</u>	<u>Page</u>
1	Deception (General)	3
2	Wood and Wood Imitations	3
3	Deceptive Use of Wood Names	5
4	Leather and Leather Imitations	5
5	Outer Coverings	6
6	Stuffing (Including Filling, Padding, Etc.)	7
7	Deception as to Origin	7
8	Deception as to Being New	8
9	Misuse of the Terms "Floor Sample," "Discontinued Model," Etc.	8
10	Deceptive Pricing	9
11	Bait Advertising	9
12	Guarantees, Warranties, Etc.	10
13	Passing Off Through Imitation or Simulation of Trade-Marks, Trade Names, Etc.	10
14	Misrepresentation as to Character of Business	10
15	Push Money	11
16	Commercial Bribery	11
17	Exclusive Dealing	12
18	Prohibited Forms of Trade Restraints	12
19	Prohibited Discrimination	12

DEFINITIONSINDUSTRY MEMBER:

Any person, firm, corporation or organization engaged in the manufacture, sale or distribution of industry products as such products are hereinafter defined.

INDUSTRY PRODUCTS:

Articles of utility, convenience or decoration which are suitable for use as furniture in a house, apartment, or other dwelling place. Such articles include, but are not limited to, all kinds and types of chairs, tables, cabinets, desks, bedsteads and bureaus.

The following products, covered by sets of trade practice rules heretofore promulgated, are not to be considered as coming within the purview of this definition: bed mattresses, bedsprings, metal cots, cedar chests, mirrors, musical instruments, radio and television receiving sets and venetian blinds. Also excluded from the purview of these rules are pictures, lamps, clocks, rugs, draperies as well as appliances and fixtures such as refrigerators and air conditioners.

RULE 1 - DECEPTION (GENERAL).

Members of the industry shall not distribute any industry product under any representation or circumstance (including failure to adequately disclose relevant facts)^{1/} which has the capacity and tendency or effect of misleading or deceiving purchasers or prospective purchasers with respect to its utility, composition, construction, durability, design, quality, quantity or number of pieces, model, origin, manufacture, price, grade, or in any other material respect.

RULE 2 - WOOD AND WOOD IMITATIONS.

In connection with the sale of furniture having exposed parts or surfaces which are wood, or which are not wood but have the appearance of wood, members of the industry shall not use any direct or indirect representation or sales method which is:

(1) False. Examples would include:

- (a) Describing as "maple," furniture which is constructed of birch wood;
- (b) Use of the term "solid mahogany" or the word "mahogany" unqualifiedly to describe a mahogany veneered table;
- (c) Using the designation "Danish style walnut" to describe a walnut-stained hackberry chair;

^{1/}The Commission, in order to prevent deception, may require affirmative disclosure of material facts concerning merchandise which, if known to prospective purchasers, would influence their decisions of whether or not to purchase. The failure to disclose such information is an unfair trade practice violative of Section 5 of the Federal Trade Commission Act. Unless otherwise specified, any disclosure required by this rule shall be on, or on a tag or label attached to, the industry product and be of such permanency as to remain on or attached to, the product until consummation of its consumer sale. The disclosure shall also appear in any advertising relating to an industry product irrespective of the media used whenever statements, representations or depictions are used in such advertising which, in the absence of such disclosure, serve to create the false impression that the product, or any part thereof, is of a certain kind or composition. In all cases the disclosure required shall be in close conjunction with the representation and shall be of sufficient clarity, conspicuousness and audibility (when spoken) as to be noted by prospective purchasers.

- (d) Describing a non-lumber product as "wood."

(Note: Hardboard, although produced from wood fibers, shall not be unqualifiedly represented as "wood" but may be designated as "hardboard," "fiberboard," "wood product" or by any nondeceptive descriptive word or term), or

- (2) Likely to mislead because of telling a half-truth. Examples would include:
- (a) Describing as "maple," a table consisting of a solid maple top with pecan legs. Such product may be described as "maple top - pecan legs";
 - (b) Designating as "walnut" or "in walnut," a desk top made of walnut veneered plywood. A proper description would be "walnut veneered top";
 - (c) Describing as "solid mahogany" or "mahogany," a product made with laminations of mahogany plies. A proper designation would be "all mahogany plywood";
 - (d) Describing a table top unqualifiedly as "mahogany veneered top" when such product, although mahogany veneered, has been finished by means of decalcomania, printing or otherwise to simulate a different mahogany grain or figure such as crotch mahogany. Such product could be properly described as "mahogany veneer - imitation mahogany crotch figure," or
- (3) Likely to deceive by failure to adequately disclose 1/ facts concerning the composition, of plywood having the appearance of solid wood, or of simulated finishes on wood or wood imitations. Examples would include failure to disclose when an item of furniture or part thereof:
- (a) Has an exposed surface of plastic, metal, hardboard, or other material not possessing a natural wood growth structure but has the appearance of being wood (e. g., "hardboard - mahogany grained" or "walnut finished particle board");
 - (b) Which is wood finished by means of decalcomania, printing or other process so as to have the appearance of a different kind of wood, is not the kind of wood which it resembles (e. g., "mahogany finished gum" or "alder - maple finished");
 - (c) Is veneered so as to have the appearance of solid wood (e. g., "mahogany veneered plywood").

Whenever disclosure is required by this rule it may be accomplished by stating either the true composition (e. g., "mahogany-grained hardboard"), or a disclaimer of composition (e. g., "imitation wood").

1/See footnote, page 3.

RULE 3 - DECEPTIVE USE OF WOOD NAMES.

Industry members shall not use any direct or indirect representation concerning the identity of the wood in items of furniture which is false or which is likely to mislead purchasers as to the actual wood composition of furniture.

The unqualified word "walnut," shall not be used as the name or designation of wood other than genuine walnut (*Juglans*).

The word "mahogany" shall not be used unqualifiedly as the name or designation of wood unless the wood so described is genuine mahogany (*Swietenia*). In naming or designating the Philippine woods Tanguile, Red Lauan, White Lauan, Tiaong, Almon, Mayapis, and Bagtikan, the word "mahogany" may be used but only when prefixed by the word "Philippine" (e. g., "Philippine mahogany table"). Examples of improper use of the word "mahogany" under this rule would include reference to Red Lauan as "Lauan mahogany" or White Lauan as "Blonde Lauan mahogany." Such woods, however, may be described unqualifiedly as "Red Lauan" or "Lauan" or "White Lauan," respectively.

The word "mahogany" may be used to name or designate wood of the genus *Khaya*, but only when prefixed by the word "African" (e. g., "African mahogany desk").

The word "mahogany," with or without qualification, shall not be used to name or designate any wood except as provided above.

(Note: The term "Philippine mahogany" will be accepted as a name or designation of the seven Philippine woods named above. Such term shall not be applied to any other wood, whether or not grown on the Philippine Islands.)

(Note: Nothing in this rule should be construed as prohibiting the nondeceptive use of wood names to describe the color, finish or appearance of items of furniture (e. g., "Plastic-oak grained" or "Mahogany finished gum.")

RULE 4 - LEATHER AND LEATHER IMITATIONS.

Members of the industry shall not make any direct or indirect representation concerning furniture or parts thereof covered with leather or other material which simulates leather, which is false or misleading.

Prohibited by this rule is the use of any trade name, coined name, trade-mark, or other word or term, or any depiction or device, which has the capacity and tendency or effect of misleading prospective purchasers into believing that furniture is covered in whole or in part from the skin or hide of an animal or that the covering of furniture is leather, top grain leather, or split leather, when such is not the case. When a furniture covering is made from bonded, shredded, pulverized or powdered leather, industry members shall conspicuously disclose 1/ such fact.

1/See footnote, page 3.

In the case of non-leather material having the appearance of leather, industry members shall conspicuously disclose facts concerning the composition thereof either by identifying the composition of the product (e. g., "vinyl covering," "upholstered in plastic") or by a disclaimer that the product is not leather (e. g., "imitation leather," "not leather").

RULE 5 - OUTER COVERINGS.^{2/}

In connection with the sale of furniture, members of the industry shall not use any direct or indirect representation concerning the outer covering thereof which:

- (a) is false (e. g., using the term "Mohair" to describe a fabric not produced from fibers derived from the angora goat); or
- (b) has the capacity and tendency or effect of deceiving furniture purchasers by telling a half-truth (e. g., using the unqualified word "Nylon" to describe a blend of nylon and other fibers).

When any identifying reference is made in advertising to an outer covering made of a mixture of different kinds of fibers, each constituent fiber present in substantial quantity (at least 5%) shall be designated ^{1/} in the order of its predominance by weight (e. g., "cotton and nylon"). If a fiber so designated is not present in a substantial quantity (less than 5%) the percentage thereof shall be stated (e. g., "cotton, rayon, 3% nylon").

When any identifying reference is made on a tag or label to an outer covering made of a mixture of different kinds of fibers, each and every kind of fiber present in such outer covering shall be identified by showing the fiber content with percentages of the respective fibers in order of their predominance by weight (e. g., "55% Cotton 45% Rayon"). In the case of pile fabrics, identification of the fiber content shall be made by stating:

- (a) the fiber content of the face or pile and of the back or base, with percentages of the respective fibers in order of their predominance by weight and the respective percentages of the face and back showing the ratio between face and back (e. g., "Face 60% Rayon, 40% Nylon - Back 100% Cotton; Back constitutes 80% of fabric and pile 20%"); or
- (b) the percentages of the fibers of the face or pile and the back or base in relation to the total weight of the fabric, (e. g., "40% Cotton, 40% Rayon, 20% Nylon" to describe a fabric having an

^{2/}Section 12(a)(2) of the Textile Fiber Products Identification Act (72 Stat. 1717; 15 U. S. C. 70) specifically exempts "outer coverings of furniture * * *" from the application of the Act. Section 14 of the same Act provides that the Act "shall be held to be in addition to, and not in substitution for or limitation of, the provisions of any other Act of the United States." Therefore, corrective action involving deceptive practices in the sale of furniture would be initiated under the Authority of Section 5 of the Federal Trade Commission Act which prohibits "unfair methods of competition in commerce, and unfair or deceptive acts or practices in commerce."

^{1/}See footnote, page 3.

all nylon pile constituting 20% of the total weight backed by a 50% - 50% blend of cotton and rayon).

RULE 6 - STUFFING (INCLUDING FILLING, PADDING, ETC.).

Members of the industry shall not make any direct or indirect representation relating to the stuffing of furniture which is:

- (1) false (e. g., describing cotton stuffing as "wool," or urethane foam as "foam rubber"); or
- (2) likely to mislead because of telling a half-truth (e. g., describing shredded or flaked foam rubber stuffing as a "foam rubber" cushion without disclosing ¹/_{that it is shredded or flaked, or describing any non-rubber foam cushion as "foam" without disclosing the kind of foam such as "urethane foam"}).

(Note: The unqualified terms "Latex," "Foam Rubber," "Latex Foam Rubber," or other terms of similar import, shall not be used as descriptive of any part of the filling of an upholstery which does not consist of one or more homogeneous pads of latex.

When the upholstery of an industry product has filling material consisting of a top layer of homogeneous latex which is of substantial thickness, and a lower layer or layers of other material, such terms may be used as descriptive thereof, if in immediate conjunction therewith, nondeceptive disclosure is made of the fact that only a part of such filling is of latex.

When the filling is composed, in whole or in part, of latex which has been shredded, flaked, or ground, full and nondeceptive disclosure shall be made of such fact in immediate conjunction with any such term, irrespective of whether the pieces or shreds of latex are in loose form or are held together by glue or some other adhesive agent.)

(Note: This rule is promulgated under the Federal Trade Commission Act for the purposes of interpreting requirements of such Act and to assist in the general enforcement of the Act. The rule is not to be construed as relieving industry members from full compliance with applicable State and local legal requirements.)

RULE 7 - DECEPTION AS TO ORIGIN.

Industry members shall not make any direct or indirect representation which is false or likely to deceive prospective purchasers of furniture as to the origin, either domestic or foreign, of such furniture. For example, furniture manufactured in the United States shall not be unqualifiedly described as "Danish" or "Scandinavian" or "Swedish Modern." Such furniture may, when appropriate, be described as "Danish Style," "Swedish Modern Style" or by any other word or term which nondeceptively characterizes its style. Also furniture shall not be represented

¹/See footnote, page 3.

by trade name or otherwise as being manufactured in the Grand Rapids, Michigan area or in any other furniture producing area, when such is not the fact.

(Note: Terms such as "French Provincial" or "Chinese Chippendale," because of long usage and general understanding by the furniture buying public, are considered to have acquired a secondary meaning as descriptive of the style of furniture so described. Thus, the unqualified use of such terminology, when appropriate, would not be considered to be violative of this rule.)

In connection with the sale of furniture of foreign manufacture, members of the industry shall clearly and conspicuously disclose the fact that such furniture was manufactured in an identified foreign country, when the failure to make such disclosure has the capacity and tendency or effect of deceiving prospective purchasers of such products. The disclosure of foreign origin, when required under this rule shall be in the form of a legible marking, stamping, or labeling on the furniture, and shall be of such size, conspicuousness and degree of permanency, as to be and remain noticeable and legible upon casual inspection until consumer purchase.

RULE 8 - DECEPTION AS TO BEING NEW.

Industry members shall not make any direct or indirect representation that an industry product is new unless such product is composed entirely of unused materials and parts.

In connection with the sale of furniture which has the appearance of being new but which contains used materials or parts, such as springs, foam rubber stuffing, or hardware, members of the industry shall conspicuously disclose ¹/_{such fact} (e. g., "cushions made from reused shredded foam rubber").

(Note: See also Rule 9.)

RULE 9 - MISUSE OF THE TERMS "FLOOR SAMPLE," "DISCONTINUED MODEL," ETC.

Representations that furniture is a "floor sample," "demonstration piece," etc., shall not be used to describe "trade-in," repossessed, rented or any furniture used other than by prospective purchasers at the place of sale for the purpose of determining their preference and its suitability for their use.

Furniture shall not be described as "discontinued" or "discontinued model" unless the manufacturer has in fact discontinued its manufacture or the industry member offering it for sale will discontinue offering it entirely after clearance of his existing inventories of furniture so described.

¹/See footnote, page 3.

RULE 10 - DECEPTIVE PRICING.

Members of the industry shall not represent directly or indirectly in advertising or otherwise that an industry product may be purchased for a specified price, or at a saving, or at a reduced price, when such is not the fact; or otherwise deceive purchasers or prospective purchasers with respect to the price of any product offered for sale; or furnish any means or instrumentality by which others engaged in the sale of industry products may make any such representation.

(Note: Guides Against Deceptive Pricing adopted by the Commission October 2, 1958, are now in the process of revision. The new guides will supplement this rule by affording additional guidance on the subject. When approved, the new guides will be published in the Federal Register and copies thereof will be furnished upon request.)

RULE 11 - BAIT ADVERTISING.

Industry members shall not offer for sale any industry product when the offer is not a bona fide effort to sell the product so offered as advertised and at the advertised price.

(Note: In determining whether there has been a violation of this rule, consideration will be given to acts or practices indicating that the offer was not made in good faith for the purpose of selling the advertised product, but was made for the purpose of contacting prospective purchasers and selling them a product or products other than the product offered. Among acts or practices which will be considered in making that determination are the following:

- (a) The creation, through the initial offer or advertisement, of a false impression of the grade, quality, make, value, currency of model, size, usability, or origin of the product offered;
- (b) The refusal to show, demonstrate, or sell the product offered in accordance with the terms of the offer;
- (c) The disparagement, by acts or words, of the product offered;
- (d) The showing, demonstrating, and in the event of sale, the delivery, of a product which is unusable or impractical for the purpose represented or implied in the offer;
- (e) The refusal, in the event of sale of the product offered, to deliver such product to the buyer within a reasonable time thereafter;
- (f) The failure to have available a quantity of the advertised product at the advertised price sufficient to meet reasonably anticipated demands;

(g) The use of a sales plan or method of compensation for salesmen or penalizing salesmen designed to prevent or discourage them from selling the advertised product.

It is not necessary that each act or practice set forth above be present in order to establish that a particular offer is violative of this Rule.)

RULE 12 - GUARANTEES, WARRANTIES, ETC.

Industry members shall not represent in advertising or otherwise that a product is "guaranteed" without clear and conspicuous disclosure of:

- (1) the nature and extent of the guarantee, and
- (2) any material conditions or limitations in the guarantee which are imposed by the guarantor, and
- (3) the manner in which the guarantor will perform thereunder, and
- (4) the identity of the guarantor.

Representations that a product is "guaranteed for life" or has a "lifetime guarantee" in addition to meeting the above requirements, shall contain a conspicuous disclosure of the meaning of "life" or "lifetime" as used (whether that of the purchaser, the product or otherwise).

Guarantees shall not be used which under normal conditions are impractical of fulfillment or which are for such a period of time or are otherwise of such nature as to have the capacity and tendency of misleading purchasers or prospective purchasers into the belief that the product so guaranteed has a greater degree of serviceability, durability or performance capability in actual use than is true in fact.

This rule has application not only to "guarantees" but also to "warranties," to purported "guarantees" and "warranties," and to any promise or representation in the nature of a "guarantee" or "warranty."

RULE 13 - PASSING OFF THROUGH IMITATION OR SIMULATION OF TRADE-MARKS, TRADE NAMES, ETC.

Members of the industry shall not mislead or deceive purchasers by passing off the products of one industry member as and for those of another through the imitation or simulation of trade-marks, trade names, brands, or labels. (See also Rule 14.)

RULE 14 - MISREPRESENTATION AS TO CHARACTER OF BUSINESS.

Members of the industry shall not represent, directly or by implication, in advertising or otherwise, that they produce or manufacture products of the industry, or that they own or control a factory making such products, when such is not the fact, or that they are a manufacturer, wholesale distributor or a wholesaler when such is not the fact, or in any

other manner misrepresent the character, extent, or type of their business.

RULE 15 - PUSH MONEY.

Industry members shall not pay or contract to pay anything of value to a salesperson employed by a customer of the industry member, as compensation for, or as an inducement to obtain, special or greater effort or service on the part of the salesperson in promoting the resale of products supplied by the industry member to the customer -

(a) When the agreement or understanding under which the payment or payments are made or are to be made is without the knowledge and consent of the salesperson's employer; or

(b) When the terms and conditions of the agreement or understanding are such that any benefit to the salesperson or customer is dependent on lottery; or

(c) When any provision of the agreement or understanding requires or contemplates practices or a course of conduct unduly and intentionally hampering sales of products of competitors of an industry member; or

(d) When, because of the terms and conditions of the understanding or agreement, including its duration, or the attendant circumstances, the effect may be substantially to lessen competition or tend to create a monopoly; or

(e) When similar payments are not accorded to salespersons of competing customers on proportionally equal terms in compliance with Section 2(d) and (e) of the Clayton Act.

(Note: Payments made by an industry member to a salesperson of a customer under any agreement or understanding that all or any part of such payments is to be transferred by the salesperson to the customer, or is to result in a corresponding decrease in the salesperson's salary, are not to be considered within the purview of this Rule, but are to be considered as subject to the requirements and provisions of Section 2(a) of the Clayton Act.)

RULE 16 - COMMERCIAL BRIBERY.

Members of the industry shall not give, or offer to give, or permit or cause to be given, directly or indirectly, money or anything of value to agents, employees, or representatives of customers or prospective customers, or to agents, employees, or representatives of competitors' customers or prospective customers, without the knowledge of their employers or principals, as an inducement to influence their employers or principals to purchase or contract to purchase products manufactured or sold by such industry member or the maker of such gift or offer, or to influence such employers or principals to refrain from dealing in the products of competitors or from dealing or contracting to deal with competitors.

RULE 17 - EXCLUSIVE DEALING.

Members of the industry shall not contract to sell or sell industry products or fix a price charged therefor, or discount from, or rebate upon, such price, on the condition, agreement, or understanding that the purchaser thereof shall not use or deal in the products of a competitor or competitors of such industry member, where the effect of such sale or contract for sale, or of such condition, agreement, or understanding, may be substantially to lessen competition or tend to create a monopoly in any line of commerce.

RULE 18 - PROHIBITED FORMS OF TRADE RESTRAINTS (UNLAWFUL PRICE FIXING, ETC.).^{3/}

Members of the industry, either directly or indirectly, shall not engage in any planned common course of action, or enter into or take part in any understanding, agreement, combination, or conspiracy, with one or more members of the industry, or with any other person or persons, to fix or maintain the price of any industry products or otherwise unlawfully to restrain trade; or use any form of threat, intimidation, or coercion to induce any member of the industry or other person or persons to engage in any such planned common course of action, or become a party to any such understanding, agreement, combination, or conspiracy.

RULE 19 - PROHIBITED DISCRIMINATION.

Section I. Prohibited Discriminatory Prices, Rebates, Discounts, Etc. No member of the industry engaged in commerce, in the course of such commerce, shall grant or allow, secretly or openly, directly or indirectly, any rebate, refund, discount, credit, or other form of price differential, where such rebate, refund, discount, credit, or other form of price differential, effects a discrimination in price between different purchasers of goods of like grade and quality, where either or any of the purchases involved therein are in commerce, and where the effect thereof may be substantially to lessen competition or tend to create a monopoly in any line of commerce, or to injure, destroy, or prevent competition with any person who either grants or knowingly receives the benefit of such discrimination, or with customers of either of them: Provided, however:

^{3/}The prohibitions of this rule are subject to Public Law 542, approved July 14, 1952 - 66 Stat. 632 (the McGuire Act, commonly referred to as the Fair Trade Amendment) which provides that with respect to a commodity which bears, or the label or container of which bears, the trade-mark, brand, or name of the producer or distributor of such commodity and which is in free and open competition with commodities of the same general class produced or distributed by others, a seller of such a commodity may enter into a contract or agreement with a buyer thereof which establishes a minimum or stipulated price at which such commodity may be resold by such buyer when such contract or agreement is lawful as applied to intrastate transactions under the laws of the State, Territory, or territorial jurisdiction in which the resale is to be made or to which the commodity is to be transported for such resale, and when such contract or agreement is not between manufacturers, or between wholesalers, or between brokers, or between factors, or between retailers, or between persons, firms, or corporations in competition with each other.

(a) That the goods involved in any such transaction are sold for use, consumption, or resale within any place under the jurisdiction of the United States, and are not purchased by schools, colleges, universities, public libraries, churches, hospitals, and charitable institutions not operated for profit, as supplies for their own use;

(b) That nothing contained in Section I of this Rule shall prevent differentials which make only due allowance for differences in the cost of manufacture, sale, or delivery resulting from the differing methods or quantities in which such commodities are to such purchasers sold or delivered;

(Note: Cost justification under the above proviso depends upon net savings in cost based on all facts relevant to the transactions under the terms of proviso (b). For example, if a seller regularly grants a discount based upon the purchase of a specified quantity by a single order for a single delivery, and this discount is justified by cost differences, it does not follow that the same discount can be cost justified if granted to a purchaser of the same quantity by multiple orders or for multiple deliveries.)

(c) That nothing contained in this Rule shall prevent persons engaged in selling goods, wares, or merchandise in commerce from selecting their own customers in bona fide transactions and not in restraint of trade;

(d) That nothing contained in Section I of this Rule shall prevent price changes from time to time where made in response to changing conditions affecting the market for or the marketability of the goods concerned, such as but not limited to obsolescence of seasonal goods, distress sales under court process, or sales in good faith in discontinuance of business in the goods concerned;

(e) That nothing contained in this Rule shall prevent the meeting in good faith of an equally low price of a competitor.

(Note 1: Subsection (b) of Section 2 of the Clayton Act, as amended, reads as follows:

"Upon proof being made, at any hearing on a complaint under this section, that there has been discrimination in price or services or facilities furnished, the burden of rebutting the prima facie case thus made by showing justification shall be upon the person charged with a violation of this section, and unless justification shall be affirmatively shown, the Commission is authorized to issue an order terminating the discrimination: Provided, however, That nothing herein contained shall prevent a seller rebutting the prima facie case thus made by showing that his lower price or the furnishing of services or facilities to any purchaser or purchasers was made in good faith to meet an equally low price of a competitor, or the services or facilities furnished by a competitor.")

(Note 2: Nothing in this Rule should be construed as prohibiting the granting of different prices which are not otherwise violative of the foregoing provisions of this Rule, to customers in different functional categories. For example, a seller may grant a lower price to wholesalers than to retailers to the extent that such wholesalers resell to retailers. If such wholesalers also sell at retail in competition with their customers they may not properly be granted a price lower than the prices granted to competing retailers on that portion of the goods they sell at retail.)

Section II. Prohibited Brokerage and Commissions. No member of the industry engaged in commerce, in the course of such commerce, shall pay or grant, or receive or accept, anything of value as a commission, brokerage, or other compensation, or any allowance or discount in lieu thereof, except for services rendered in connection with the sale or purchase of goods, wares, or merchandise, either to the other party to such transaction or to an agent, representative, or other intermediary therein where such intermediary is acting in fact for or in behalf, or is subject to the direct or indirect control, of any party to such transaction other than the person by whom such compensation is so granted or paid.

Section III. Prohibited Advertising or Promotional Allowances, Etc. No member of the industry engaged in commerce shall pay or contract for the payment of advertising or promotional allowances or any other thing of value to or for the benefit of a customer of such member in the course of such commerce as compensation or in consideration for any services or facilities furnished by or through such customer in connection with the processing, handling, sale, or offering for sale of any products or commodities manufactured, sold, or offered for sale by such member, unless such payment or consideration is made known to and is available on proportionally equal terms to all other customers competing in the distribution of such products or commodities.

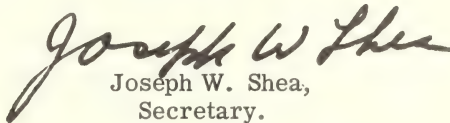

(Note: Subsection (b) of Section 2 of the Clayton Act, as amended, which is set forth in the note concluding Section I of this Rule is applicable to this Section.)

Section IV. Prohibited Discriminatory Services or Facilities. No member of the industry engaged in commerce shall discriminate in favor of one purchaser against another purchaser or purchasers of a commodity bought for resale, with or without processing, by contracting to furnish or furnishing, or by contributing to the furnishing of, any services or facilities including, but not limited to, displays, exhibits, and promotional material connected with the processing, handling, sale, or offering for sale of such commodity so purchased upon terms not accorded to all competing purchasers on proportionally equal terms.

(Note: Subsection (b) of Section 2 of the Clayton Act, as amended, which is set forth in the note concluding Section I of this Rule is applicable to this Section.)

Section V. Inducing or Receiving an Illegal Discrimination in Price, Advertising or Promotional Allowances, or Services or Facilities. No member of the industry engaged in commerce, in the course of such commerce, shall knowingly induce or receive a discrimination in price, advertising or promotional allowances, or services or facilities, which is prohibited by the foregoing provisions of this Rule.

Promulgated by the Federal Trade Commission December 18, 1963.

Joseph W. Shea,
Secretary.

SUPERSEDING

Int. Fed. Spec. C-F-00160 (GSA-FSS)

August 5, 1959 and

Fed. Spec. C-F-151a (In Part)

July 24, 1940

(See 6.4)

FEDERAL SPECIFICATION

FEATHERS, WATERFOWL AND DOWN, WATERFOWL

This specification was approved by the Commissioner, Federal Supply Service, General Services Administration, for the use of all Federal agencies.

1. SCOPE AND CLASSIFICATION

1.1 Scope.—This specification covers feathers and down from domesticated waterfowl (see 6.1).

1.2 Classification.

1.2.1 Types, classes, and grades.—Waterfowl feathers and down, shall be of the following types, classes, and grades as specified (see 6.2).

Type I.—Feathers.

Class 1.—Goose feathers.

Grade A.

Grade B.

Class 2.—Duck feathers.

Grade A.

Grade B.

Type II.—Down.

Class 1.—Goose down.

Grade A.

Grade B.

Class 2.—Duck down.

Grade A.

Grade B.

Type III.—Feathers and down mixture.

2. APPLICABLE SPECIFICATIONS AND STANDARDS

2.1 The following specifications and standards, of the issues in effect on date of invitation for bids, form a part of this specification:

Federal Specifications:

V-T-276—Thread, Cotton.

QQ-S-781—Strapping, Flat, Steel.

RR-S-366—Sieves, Standard for Testing Purposes.

CCC-C-429—Cloth, Cotton, Osnaburg.

CCC-T-191—Textile Test Methods.

PPP-B-636—Boxes, Fiber.

Federal Standards:

Fed. Std. No. 102—Preservation, Packaging, and Packing Levels.

C-F-160a

Fed. Std. No. 123—Marking for Domestic Shipment (Civilian Agencies).

Fed. Std. No. 751—Stitches; Seams; and Stitching.

(Activities outside the Federal Government may obtain copies of Federal Specifications, Standards, and Handbooks as outlined under General Information in the Index of Federal Specifications, Standards, and Handbooks and at the prices indicated in the Index. The Index, which includes cumulative monthly supplements as issued, is for sale on a subscription basis by the Superintendent of Documents, U. S. Government Printing Office, Washington 25, D. C.)

(Single copies of this specification and other product specifications required by activities outside the Federal Government for bidding purposes are available without charge at the General Services Administration Regional Offices in Boston, New York, Atlanta, Chicago, Kansas City, Mo., Dallas, Denver, San Francisco, Los Angeles, Seattle, and Washington, D. C.)

(Federal Government activities may obtain copies of Federal Specifications, Standards, and Handbooks and the Index of Federal Specifications, Standards, and Handbooks from established distribution points in their agencies.)

Military Specifications:

JAN-C-485—Cloth, Cotton, Sheeting.

MIL-C-3985—Compound, Mothproofing, Emulsifiable Concentrate (for Textiles and Feathers).

Military Standards:

MIL-STD-105 — Sampling Procedures and Tables for Inspection by Attributes.

MIL-STD-129 — Marking for Shipment and Storage.

(Copies of Military Specifications and Standards required by contractors in connection with specific procurement functions should be obtained from the procuring activity or as directed by the contracting officer.)

3. REQUIREMENTS

3.1 Laboratory report approval.—Unless otherwise specified (see 6.2), prior to or upon submission of bids to the contracting officer, the prospective contractor shall furnish the contracting officer a certified copy of a recent laboratory report from any of the following:

- (a) An independent or commercial laboratory report.
- (b) The prospective contractor's own laboratory report.
- (c) A Government laboratory report from a recent contract.

The laboratory report shall contain test data which demonstrates that the feathers, down, or feather and down mixture, of the type which the contractor proposes to deliver, have been previously tested and found to comply with all the requirements of this specification.

3.2 Preproduction sample approval.—Unless otherwise specified (see 6.2), before production is commenced the contractor shall submit for approval to the contracting officer a one-pound sample of feathers, down, or feather and down mixture.

3.3 Materials.—Materials shall be new, not previously used or reclaimed (see 6.2) and shall be well dusted, washed, dried and sterilized.

3.4 Definitions.—The materials covered by this specification are defined as follows:

3.4.1 Feathers (or natural feathers).—Bird or fowl plumage having quill shafts and barbs and which has not been processed in any manner other than by washing, dusting, and sterilizing.

3.4.1.1 Waterfowl feathers.—Goose feathers, duck feathers or any mixture of goose or duck feathers.

3.4.1.1.1 Small waterfowl feathers.—Whole waterfowl feathers, other than quill feathers or damaged feathers, which are less than 2½ inches long.

3.4.1.1.2 Pin feathers (or nestling feathers).—A waterfowl feather not fully developed with no distinguishable quill but with relatively short coarse barbs emanating from the sheath.

C-F-160a

3.4.1.1.3 Waterfowl quill feathers (or quills).—Wing and tail feathers commonly known and referred to as quills.

3.4.1.1.4 Plumules.—Small, downy waterfowl feathers with under-developed quill with barbs or filaments undistinguishable from those of down.

3.4.1.1.5 Damaged feathers.—Waterfowl feathers, which are materially broken, materially damaged by insects or otherwise materially injured.

3.4.1.2 Non-waterfowl feathers.—The feathers of any kind of fowl other than goose or duck.

3.4.2 Feather fiber.—The barbs of feathers which have been completely separated from the quill shaft and any aftershaft, and which are in no wise joined or attached to each other.

3.4.3 Pure down.—The undercoating of waterfowl consisting of clusters of the light, fluffy filaments from one quill point but without any quill shaft.

3.4.4 Down fiber.—The detached barbs from down plumes or detached barbs from the basal end of feather quill shafts which are undistinguishable from the barbs of down plumes.

3.4.5 Residual matter.—Residual matter is defined as quill pith, feather fragments, trash, and foreign matter.

3.4.6 Percentage composition.—The percent composition as stated in the applicable paragraph is based on the total weight of the sample tested when tested as specified in table II.

3.5 Requirements applicable to all types.

3.5.1 Preparation.—The feathers (type I), down (type II), and feather and down mixture (type III) shall be thoroughly cleaned, washed, dried (see 6.3), and sterilized.

3.5.2 Blood removal and scouring.—The finished product shall be entirely free of blood, and a commercial laundry sour of the fluoride type, namely sodium acid or silico fluoride or combinations thereof, shall be utilized in the final rinse (except when DDT treatment is specified as in 3.5.3) of the scouring procedure to bring the acidity (pH) of the finished dry product within the limits of 3.5 to 6.0 when tested as specified in table II.

3.5.2.1 Certification.—The contractor shall certify in writing to the use of the fluoride sour in the final rinse of the washing procedures as specified in 3.5.2, and that the materials have been sterilized.

3.5.3 Insecticide.—When specified in the applicable procurement document (see 6.2), the feathers, down, and feathers and down mixture shall be treated with DDT (dichloro—diphenyl-trichloroethane). The DDT shall be applied during the preparation of the feathers so that when tendered for delivery the feathers, down, or feather and down mixture shall contain not less than 0.50 nor more than 0.75 percent of DDT based on the air-dried weight of the material when tested as specified in table II. The DDT shall be applied from an aqueous emulsion in accordance with "Direction for Use (Feathers)" of Military Specification MIL-C-3985.

3.5.4 Cleanliness.

3.5.4.1 Oxygen number.—When tested as specified in table II the feathers, down, and feather and down mixture shall have an oxygen number of not more than 16.

3.5.4.2 Solvent soluble matter.—Fats, oils, and waxes shall not be added to the feathers, down, and feather and down mixture. Solvent soluble materials, exclusive of DDT content, shall not exceed 2½ percent when tested as specified in table II.

3.5.5 Brittleness.—Feathers shall be sufficiently pliable to permit the ends to be

C-F-160a

brought together in the direction of maximum curvature without any fracture (partial or complete) to the quill or rachis. Not more than four feathers shall fail the test specified in table II.

3.6 Requirements applicable to individual types.

3.6.1 Type I feathers.

3.6.1.1 Composition (see table II).

- (a) Whole waterfowl feathers
 - Minimum 80.0 percent
 - (b) Pure down (and plumules)
 - Minimum 10.0 percent
 - (c) Balance ---- Maximum 10.0 percent
- Composed of any combination of the following:
- (1) Non-waterfowl feathers
 - Maximum 8.0 percent
 - (2) Waterfowl quill-feathers, feather fibers, or damaged waterfowl feathers
 - Maximum 5.0 percent
 - (3) Down fiber--Maximum 1.0 percent
 - (4) Residual matter
 - Maximum 2.0 percent

3.6.1.1.1 Class 1 goose feathers (grade A and grade B).—A minimum of 50 percent of all feathers shall measure less than 3 inches in length. Feathers longer than 4 inches but not exceeding 6 inches shall total not more than 5 percent. The balance shall be composed of feathers not exceeding 4 inches in length.

3.6.1.1.2 Class 2 duck feathers (grade A and grade B).—A minimum of 50 percent of all feathers shall measure less than 2½ inches in length. Feathers longer than 3½ inches but not exceeding 5 inches shall total not more than 5 percent. The balance shall be composed of feathers not exceeding 3½ inches in length.

3.6.1.2 Filling power (type I).—The filling power of type I feathers, when measured as specified in 4.4.5, shall be as follows:

Class of feathers	Grade	Filling power (cms)
Class 1—Goose feathers--	A	6.0 (Minimum)
Class 1—Goose feathers--	B	5.0 (Minimum)
Class 2—Duck feathers---	A	5.0 (Minimum)
Class 2—Duck feathers---	B	4.0 (Minimum)

3.6.2 Type II down.

3.6.2.1 Composition (see table II).

- (a) Pure down (and plumules)
 - Minimum 85 percent
 - (b) Balance ----- Maximum 15 percent
- Composed of any combination of the following:
- (1) Down fiber--Maximum 8.5 percent
 - (2) Feather fiber
 - Maximum 5.0 percent
 - (3) Small waterfowl feathers
 - Maximum 10.0 percent
 - (4) Quill feathers, insect damaged feathers and on-waterfowl feathers --Maximum 1.0 percent
 - (5) Residual matter
 - Maximum 2.0 percent

3.6.2.2 Filling power (type II).—The filling power for type II down, when measured as specified in 4.4.5, shall be as follows:

Class	Grade	Filling power (cms)
1 and 2-----	A	9.0 (Minimum)
1 and 2-----	B	7.5 (Minimum)

3.6.3 Type III feather and down mixture.

3.6.3.1 Composition (see table II).

- (a) Pure down (and plumules)
 - Minimum 40.0 percent

C-F-160a

(b) Extraneous materials

Maximum 12.0 percent

Composed of any combination of the following:

(1) Non-waterfowl feathers

Maximum 4.8 percent

(2) Down fiber.—Maximum 4.0 percent

(3) Waterfowl quill feathers, feather fibers, insect or otherwise damaged waterfowl feathers

Maximum 5.4 percent

(4) Residual matter

Maximum 2.0 percent

(c) Balance to be composed of whole waterfowl feathers.

3.6.3.1.1 A minimum of 50 percent by weight of the feathers (excluding down content) shall measure less than 3 inches. Feathers longer than 4 inches but not exceeding 6 inches shall total not more than 5 percent. The balance of the feathers shall be composed of feathers not exceeding 4 inches in length.

3.6.3.2 *Filling power (type III).*—The filling power of type III feather and down mixture shall not be less than 6.0 cms. when tested as specified in table II.

3.7 Packaging and packing.

3.7.1 *Materials purchased by a contractor.*

—When the feathers, down, or feather and down mixture are purchased by a contractor as a component of an end item, they shall be packaged and packed in clean condition in accordance with the feather and down supplier's commercial practice.

3.7.2 *Materials purchased directly by the Government.*—When the feathers, down, or feather and down mixture are purchased directly by the Government, they shall be packaged and packed in the levels specified in accordance with the requirements of section 5 and inspected in accordance with 4.5 through 4.6.1.4.

4. SAMPLING, INSPECTION, AND TEST PROCEDURES

4.1 Contractors inspection responsibility.

—Unless otherwise specified herein, the supplier is responsible for the performance of all inspection requirements prior to submission for Government inspection and acceptance. Except as otherwise specified, the supplier may utilize his own facilities or any other commercial laboratory acceptable to the Government. Inspection records of the examination and tests shall be kept complete and made available to the Government as specified in the contract or order.

4.2 Pre-acceptance inspection.

4.2.1 *Laboratory report.*—The pre-award laboratory report shall contain actual test results showing that the feathers, down, or feather and down mixture have been tested and comply with all physical and chemical requirements of section 3.

4.2.2 *Preproduction sample inspection.*—The preproduction sample submitted in accordance with 3.2 shall be examined and tested to determine compliance with the requirements of section 3.

4.3 *Inspection for acceptance.*—Unless otherwise indicated, inspection shall be in accordance with Military Standard MIL-STD-105 except as otherwise indicated hereinafter.

4.4 *Testing.*—Testing of the end item shall be performed in accordance with methods specified in table II. The test methods indicated by number apply to Federal Specification CCC-T-191. The sample unit (unit of product) for testing shall be a 12-ounce composite of feathers, down, or feather and down mixture as applicable. The sample shall be obtained by drawing approximately 4 ounces each of the material from the top, center and bottom on two opposite sides of each bag selected for sampling, so that approximately 24 ounces of material will be drawn from each sample bag. Bags shall be cut in the

C-F-160a

specified locations for drawing the sample. The sample size (number of bags to be selected) shall be in accordance with level L-7, table IIIB of Military Standard MIL-STD-105, and the lot size shall be expressed in terms of bags. For civil agencies the sample size and the number of defects acceptable shall be as specified in table I.

TABLE I.—*Sampling for test — civil agencies*

Number of bags in lot	Number of bags in test sample	Acceptance number (defects)	Rejection number (defects)
25 and under--	2	0	1
26 to 65-----	3	0	1
66 to 110-----	5	0	1
111 to 300-----	7	0	1
301 to 500-----	10	1	2
501 to 800-----	15	1	2
801 to 1300-----	25	2	3
1301 to 3200 --	35	3	4
3201 to 8000----	50	4	5
8001 to 22000--	75	6	7
22001 and over--	110	8	9

TABLE II.

Characteristic	Requirement reference	Test method	Determinations per sample unit
<i>Composition:</i>		(see 4.4.4)	1
Type I-----	3.6.1		
Type II-----	3.6.2		
Type III-----	3.6.3		
<i>Filling power:</i>		(see 4.4.5)	3
Type I-----	3.6.1.2		
Type II-----	3.6.2.2		
Type III-----	3.6.3.2		
DDT content--	3.5.3	(see 4.4.3)	2
Acidity (pH)--	3.5.2	2811	2
Oxygen number ----	3.5.4.1	(see 4.4.2.1)	2
Solvent soluble matter----	3.5.4.2	(see 4.4.2.2)	2
Brittleness ----	3.5.5	(see 4.4.1)	1

4.4.1 Brittleness test.—Fifty feathers shall be tested to determine compliance with the requirement specified in 3.5.5. The ends of

each feather shall be brought together in the direction of maximum curvature. Fracture of the quill or rachis shall be evidence of failure.

4.4.2 Cleanliness test.

4.4.2.1 Oxygen number.—Ten grams of feathers, down, or feather and down mixture shall be placed in a tumbler jar as specified in method 5500 of Federal Specification CCC-T-191, or in an equivalent agitating device, with one liter of distilled water and tumbled at room temperature for one hour. The resulting suspension shall be filtered through a 74-micron (standard No. 200) sieve conforming to Federal Specification RR-S-366, and evaluated as specified in 4.4.2.1.1.

4.4.2.1.1 A 100-milliliter aliquot of the above filtrate shall be transferred to a porcelain casserole, neutralized and made acid with 1 to 2 milliliters excess of 6*N* sulfuric acid. The solution shall be titrated with standard 0.1*N* potassium permanganate, adding approximately 0.05 milliliters at a time, until a pink color persists for 60 seconds. Calculate oxygen number to number of grams of oxygen per 100,000 grams of sample as follows: Oxygen number = milliliters of 0.1*N* $\text{KMnO}_4 \times 80$.

4.4.2.2 Solvent soluble matter.—Three grams plus or minus 0.5 gram of feathers, down, or feather and down mixture shall be placed in a fat-free extraction thimble (Whatman single thickness) to prevent escape of sample. Thimble with product shall be extracted in a Soxhlet extractor, using carbon tetrachloride or chloroform for a minimum of 20 cycles. The extract shall then be evaporated on a water bath, dried to constant weight in an oven at $100^\circ \pm 2^\circ \text{C}$, cooled and weighed. Report residue, after deducting DDT as determined in 4.4.3 if present, as the solvent soluble matter.

4.4.3 DDT (dichloro-diphenyl-trichloroethane) content.—A 10 ± 1 -gram quantity of feathers, down, or feather and down

C-F-160a

mixture shall be extracted for two hours in a Soxhlet apparatus with petroleum ether or any other suitable solvent, after which most of the solvent shall be removed by evaporation on a steam bath. Do not evaporate to dryness, since the DDT may decompose. Add 25 ml. of 99 percent isopropyl alcohol and 2.5 grams of metallic sodium cut into small pieces and swirl the flask in order to mix its contents. Connect to a water-cooled reflux condenser and boil gently for a minimum of one half hour. Shake the flask occasionally. Decompose the excess sodium by cautiously adding 10 milliliters of 50 percent isopropyl alcohol through the condenser at a rate of one to two drops per second. Boil for an additional 10 minutes and then add 60 milliliters of distilled water. Cool to room temperature, add two to three drops of phenolphthalein solution, neutralize by adding nitric acid (1 to 1), and add 10 milliliters of the diluted acid in excess. Add dropwise, with stirring of the solution, a measured excess (25 ml.) of 0.1N AgNO_3 solution. Coagulate the precipitate by heating on a steam bath for approximately one half hour. Cool to room temperature and filter through a No. 52 Whatman filter paper and wash thoroughly with distilled water, receiving the filtrate in a 500-ml. Erlenmeyer flask. Add 5 milliliters of ferric ammonium sulfate indicator and titrate the excess AgNO_3 . Compute the net number of milliliters of 0.1N AgNO_3 consumed by the sample. Calculate percent DDT as follows:

$$\begin{aligned} &\text{Percent DDT (dichloro-diphenyl-trichloro-} \\ &\quad \text{ethane)} = \\ &\frac{\text{Milliliters of 0.1N AgNO}_3 \text{ (consumed)}}{\times 7.094} \end{aligned}$$

Weight of sample (grams)

4.4.3.1 A blank determination for the chemicals used shall be made following the exact procedure given above, but limiting the 0.1N AgNO_3 solution to 5 milliliters in order to obtain a chloride correction value. This blank value shall be subtracted from the DDT determination to obtain the exact value of DDT present.

4.4.4 Composition analysis by weight of feathers, down, and feather and down mixture.

4.4.4.1 *Atmospheric conditions.*—The test for composition analysis may be made under prevailing atmospheric conditions except in the settlement of disputes. In the case of dispute the test shall be performed under standard conditions as specified in Federal Specification CCC-T-191.

4.4.4.2 *Preparation of specimen.*—Specimens of the end product shall be prepared as specified in 4.4. Approximately one ounce of the material shall be exposed in the relaxed state (without packing) in a screen container for a period of not less than one day. The material shall be mixed with a rod over the exposure period to insure complete conditioning.

4.4.4.3 *Apparatus.*

4.4.4.3.1 A wooden box of the following approximate dimensions:

Base—18 inches long by 12 inches wide
Front—6 inches high
Back—12 inches high

The box shall have a glass lid hinged to the top edge of the back panel to provide a clear view of its interior and a free and secure closure during examination of the sample. It shall also have two openings, one at each end of the front panel, sufficiently large to permit the examiner's hand to enter the box to separate and examine the particles in the sample, and shall be equipped with a light to provide sufficient illumination of its interior.

4.4.4.3.2 Tared weighing bottles or beakers with covers to be used as containers in the separating process.

4.4.4.3.3 A pair of tweezers suitable for extracting and separating the components.

4.4.4.3.4 *Balance.*—An analytical balance capable of accurately weighing to the nearest 0.001 gram shall be utilized in the weighings.

C-F-160a

4.4.4.4 Procedure.

4.4.4.4.1 The sample consisting of approximately four grams of specimen prepared as in 4.4 and 4.4.4.2 shall be transferred into a weighing container of known weight and shall then be weighed to determine its exact weight.

4.4.4.4.1.1 *Weighing*.—All weights shall be determined to the nearest 0.001 gram.

4.4.4.4.2 The weighing bottle or beaker containing the sample shall be placed on the floor of the separating box along with as many empty containers of known weight as necessary for the separation of the sample. In the event of dispute, prior to their use, all weighing bottles or beakers shall be kept in a conditioned atmosphere as defined in Federal Specification CCC-T-191. The lid of the separating box shall be kept closed.

4.4.4.4.3 Each component of the feathers, down, or feather and down mixture in the sample to be analyzed shall be extracted individually and shall be closely examined to determine its nature. Each particle shall be classified in accordance with the definitions in 3.4 and shall be placed into the appropriate weighed container. The weighing bottles or beakers shall be identified as follows:

(a) For type I—waterfowl feathers:

- Whole waterfowl feathers.
- Pure down (and plumules).
- Non-waterfowl feathers.
- Waterfowl quill feathers, feather fibers, or damaged waterfowl feathers.
- Down fiber.
- Residual matter.

(b) For type II—down:

- Pure down (and plumules).
- Down fiber.
- Feather fiber.
- Small waterfowl feathers.
- Quill feathers, insect damaged feathers and non-waterfowl feathers.
- Residual matter.

(c) For type III—feather and down mixture:

- Pure down (and plumules).
- Whole waterfowl feathers.
- Non-waterfowl feathers.
- Waterfowl quill feathers, feather fiber, insect or otherwise damaged waterfowl feathers.
- Down fiber.
- Residual matter.

4.4.4.5 Evaluation.

4.4.4.5.1 Upon completion of the separating process, the weight of the contents of each weighing bottle or beakers shall be determined by subtracting the tare weight of the containers from the gross weight.

4.4.4.5.2 The percentage of each component shall be determined in accordance with the following formula:

$$\frac{\text{Total weight of material in component}}{\text{Weight of sample}} \times 100 = \text{Percent of component sample.}$$

4.4.4.6 Report.

4.4.4.6.1 The percent of each component of the mixture shall be reported to the nearest 0.1 percent based on the weight of the sample prior to separation.

4.4.4.6.2 In the event that the sum of the weights of all components varies more than one percent from the original sample weight, the test shall be repeated and the original results discarded.

4.4.4.7 Preservation of specimens.

4.4.4.7.1 When test reports indicate failure, each separate portion of the sample shall be kept in a properly identified envelope for ready reference in the event of a dispute. If test results are not questioned within three months from date of the report, these samples may be discarded. If results indicate

C-F-160a

failure, a recheck shall be performed on another specimen obtained in a similar manner from the original sample.

4.4.5 Determination of filling power.

4.4.5.1 Atmospheric conditions.—The filling power test may be conducted under prevailing atmospheric conditions except in the settlement of disputes. In the case of dispute the test shall be performed under standard conditions as specified in Federal Specification CCC-T-191.

4.4.5.2 Preparation of specimen.—Specimens of the end product shall be prepared as specified in 4.4. Approximately three ounces of material shall be fluffed in the filling power apparatus for 2 minutes at 50 ± 10 pounds air-gage pressure. The material shall then be exposed in the unpacked state in a screen container for not less than 3 days nor more than 5 days. The material shall be mixed with a rod once a day to insure complete relaxation and conditioning.

4.4.5.3 Test apparatus.—The apparatus (see figure 1) shall consist of the following:

4.4.5.3.1 Cylinder.—The cylinder shall be a rigid phenolic bonded paper or aluminum tube 12.75 inches \pm 0.01 inch inside diameter, and approximately 20 inches in length. The inner wall shall have a smooth finish. The cylinder shall be set in a vertical position and shall be open at both ends with means of supporting the base end rigidly in a horizontal plane. It is convenient to have the cylinder detachable from the base for facilitating specimen removal. A removable perforated cover with the air-blowing unit attached thereto shall be provided for use in retaining the specimen during air fluffing.

4.4.5.3.2 Piston.—The piston shall be made of a rigid material and shall weigh 118.0 grams \pm 0.5 gram (Balsa wood with a stiff, smooth paper contact surface or expanded rubber has been found satisfactory for this purpose). The piston shall have a diameter

of 12.55 inches \pm 0.01 inch with the edge beveled to $\frac{1}{8}$ inch. The exact center of the piston shall be well defined for measuring purposes. A device for lowering the piston in a horizontal position shall be provided. This may be accomplished by suitably attached strings or other manual or mechanical means.

4.4.5.3.3 Measuring device.—The measuring device shall consist of a smooth thread, with small plumbs as counterweights, one of the plumbs serving in connection with the depth indicator. The thread shall run over two pulleys so that one plumb will drop directly on the center of the piston while the other will run along a vertically fixed centimeter scale.

4.4.5.3.4 Fluffing device.—Means for thoroughly fluffing or loosening the specimen shall be provided. A blower is recommended for this purpose.

4.4.5.3.5 Balance.—An analytical balance capable of weighing accurately to the nearest 0.001 ounce shall be utilized for specimen weighings.

4.4.5.4 Procedure.

4.4.5.4.1 Determination of zero reading.—Slowly lower the piston until it rests on the bottom of the empty cylinder. Lower the plumb until it just touches the top surface of the piston. The depth is read directly from the centimeter scale to the nearest millimeter. This shall be repeated until two consecutive identical readings are obtained. This measurement shall be read to the nearest 0.1 cm and shall be considered as zero depth (depth of empty cylinder).

4.4.5.4.2 Test specimen.—The specimen shall consist of 0.80 ± 0.002 ounce of material prepared as specified in 4.4.5.3.

4.4.5.4.3 Fluffing.—This specimen shall be placed in the cylinder and the piston slowly

C-F-160a

FIGURE 1.

C-F-160a

lowered onto the material, and air blown for approximately 10 seconds at 50 ± 10 pounds air-pressure to thoroughly mix and fluff the specimen. Other means may be used provided results equal to the blower method are obtained.

4.4.5.4.4 Volume measuring.—The piston shall be slowly lowered onto the material. When there is a definite slackening of the supporting strings, a stopwatch shall be started. The plumb shall be lowered so that at the end of a 1-minute interval, it just touches the center of the top surface of the piston. The depth shall be read directly from the centimeter scale to the nearest millimeter. Each specimen shall be refluffed and measured three times for depth.

4.4.5.5 Report.—The report shall be based on the volume at the designated time pressure level. The distance between inside surface of the bottom of the cylinder and the bottom surface of the piston shall be reported. This shall be obtained by subtracting the zero reading obtained in 4.4.5.4.1 from the depth obtained in 4.4.5.4.4. Unless otherwise specified, three specimens shall be tested from each unit of product. A measure of the height of the material under the piston shall be considered its filling power. The filling power of the unit of product shall be the average of the results obtained from the specimens tested and shall be reported to the nearest 0.1 cm.

4.5 Inspection of components.

4.5.1 Inspection of cloth and fiberboard.—Cloth and fiberboard used in the fabrication of fabricated bags and bale boards shall be inspected to determine compliance with the requirements of referenced specifications and applicable supplemental provisions specified in 5.1 and 5.2.

4.5.2 Inspection of fabricated bags and bale boards.—Fabricated bags and bale boards shall be inspected to determine con-

formance with the applicable requirements of 5.1 and 5.2. The acceptable quality level shall be 4.0 defects per hundred units, and the inspection level shall be L-3 of table IIIB of Military Standard MIL-STD-105. For civil agencies the sample size and the number of defects acceptable shall be as specified in table III.

TABLE III.—*Sampling for inspection of fabricated bags and bale boards—civil agencies*

Number of bags or bale boards in lot	Number of bags or bale boards in sample	Acceptance number (defects)	Rejection number (defects)
300 and under	1	0	1
301 to 500----	2	0	1
501 to 800----	3	0	1
801 to 1300----	5	0	1
1301 to 3200----	7	0	1
3201 to 8000----	10	1	2
8001 to 22000----	15	1	2
22001 and over	25	2	3

4.6 Inspection of the end product.

4.6.1 Examination of the end item.—The end item (completely packaged and packed product) shall be inspected in accordance with the examinations and tests specified in 4.6.1.1, 4.6.1.2, 4.6.1.3, 4.6.1.4.

4.6.1.1 Weight.—The lot shall be unacceptable if the total net weight of the bags in the sample is less than the total net weight indicated on the bags.

4.6.1.2 The sample size (number of bags to be selected) for the weight examination shall be in accordance with level L-8, table IIIB of Military Standard MIL-STD-105. For civil agencies the sample size shall be as specified in table IV. The net weight of the material contained in the sample bags shall be obtained by deducting the tare weights from the gross weights of the sample bags.

C-F-160a

TABLE IV.—*Sampling for weight examination—civil agencies*

Number of bags in lot	Number of bags in sample
25 and under -----	2
26 to 40 -----	3
41 to 65 -----	5
66 to 110 -----	7
111 to 300 -----	10
301 to 500 -----	15
501 to 800 -----	25
801 to 1300 -----	35
1301 to 3200 -----	50
3201 to 8000 -----	75
8001 to 22000 -----	110
22001 and over -----	150

4.6.1.3 Packaging examination.—The unit of product shall be one bag of feathers, down, or feather and down mixture.

Defects

Not packaged in accordance with specified packaging level.

Bag not new, or any patch.

Not closed in the specified manner.

Wire tie broken or not tightly turned to accomplish a secure closure.

Any hole, rip, tear or open seam; any weak places in bag that may develop into a hole.

Bag wet.

Marking — missing, incomplete, illegible, incorrect, not accomplished in the specified manner, or not in proper location.

4.6.1.4 Packing examination.—The sample unit shall be one bale or shipping container.

Defects

Not packed in accordance with the specified packing level.

Bags not compressed to specified size.

Does not contain the specified number of bags.

Kraft facing of baling board not on outside.

Any board or strap missing.

Baling board or strap too loose or not placed in proper location to a degree where safe delivery of contents may be impaired.

Marking — missing, incomplete, illegible, incorrect, not accomplished in the specified manner or not in proper location.

4.6.1.5 Acceptable quality levels.—Acceptable quality levels (AQL's) and inspection levels shall be as follows: AQL's are expressed in defects per 100 units.

Examination	Inspection level	AQL
4.6.1.3 (packaging)	I	6.5
4.6.1.4 (packing)	1	6.5

For civil agencies the sample size and the number of defects acceptable shall be as specified in table V.

TABLE V.—*Sampling for packaging and packing examination—civil agencies*

Number of bags or bales in lot	Number of bags or bales in sample	Acceptance number (defects)	Rejection number (defects)
110 and under..	5	0	1
111 to 300-----	7	1	2
301 to 500-----	10	1	2
501 to 800-----	15	2	3
801 to 1300----	25	3	4
1301 to 3200----	35	5	6
3201 to 8000----	50	6	7
8001 to 22000----	75	9	10
22001 and over..	110	12	13

5. PREPARATION FOR DELIVERY

Federal Standard No. 102 should be referred to for definitions and applications of the various levels of packaging and packing protection for supplies and equipment (for civil agencies only).

5.1 Packaging.—Packaging shall be level A or C as specified (see 6.2).

5.1.1 Level A.—Fifty pounds \pm 5 pounds of type I feathers of one class and grade only, or 50 pounds \pm 5 pounds of type III feathers and down mixture, or 25 pounds \pm 3 pounds of type II down of one class and grade only shall be packaged in a new (not used or laundered) plain textile bag fabricated from cotton sheeting conforming to type I, class

C-F-160a

D of Military Specification JAN-C-485 or cloth, cotton, osnaburg conforming to type I, class 2, finish A of Federal Specification CCC-C-429. Fabrics in other widths of equivalent weight and construction will be acceptable. For civil agencies only, the package shall be 25 pounds of down (type II) and 50 pounds of feathers (type I) with a minus tolerance of 4 ounces.

5.1.1.1 Bag construction.—The bags shall have a finished length and width measured flat of approximately 72 by 36 inches and shall be constructed in accordance with the following requirements: The side and bottom shall be seamed with 5 to 6 stitches per inch with either seam and stitching type 401-SSa-2 or 301-SSa-2, conforming to Federal Standard No. 751. The stitching shall be at least $\frac{5}{8}$ inch from the cut edge of the fabric or $\frac{1}{4}$ inch from a selvage edge and shall be at least $\frac{1}{2}$ inch apart. The ends of all seams shall be backstitched at least 1 inch. The thread used for seaming shall be cotton, machine, soft finish, type IIIA, unbleached, ticket no. 10/3, 3 ply, conforming to Federal Specification V-T-276 (table V).

5.1.1.1.1 Type 301 stitching. — Thread breaks in stitching shall be backstitched not less than 1 inch at each break. Thread tension shall be maintained so that there will be no loose stitching and that the lock will be embedded in the center of the materials sewed. Thread ends shall be trimmed.

5.1.1.1.2 Type 401 stitching. — Thread breaks in stitching shall be overstitched not less than $1\frac{1}{2}$ inches at each break. Thread tension shall be maintained so that there will be no loose stitching. The chain portion of the stitching shall not appear on the outside of the bag. Thread ends shall be trimmed.

5.1.1.2 Closure.—The closure of the top of the bag after filling shall be effected by means of two 6-inch, 15-gage, soft-iron or steel-wire ties having a $\frac{1}{2}$ -inch-diameter formed eye at each end. One tie shall be applied at the base of an ear formed by gathering the cloth evenly and the second tie applied at a dis-

tance approximately 1 inch from the first tie with the twisted ends of two ties alternated and facing in opposite directions.

5.1.2 Level C.—Feathers, down, and feathers and down mixed shall be packaged in accordance with good commercial practice.

5.2 Packing.—Packing shall be levels A, B, or C as specified (see 6.2).

5.2.1 Levels A and B.—Three 50-pound bags of type I feathers of one class and grade only, or three 50-pound bags of type III feathers and down mixed or four 25-pound bags of type II down of one class and grade only, packaged, with permissible tolerances as specified in 5.1.1, shall be placed between two baling boards and compressed by machine so as to form a bale approximately one-fifth of the original volume. Bales thus formed shall measure approximately 60 by 24 by 20 inches.

5.2.1.1 Baling boards.—Baling boards shall be not less than 0.075 inch thick solid fiberboard conforming to type II, class 1, of Federal Specification PPP-B-636 except that at least one face of the board shall be not less than 0.010-inch kraft paperboard, and the bursting strength of the combined board shall be not less than 200 p.s.i. Two such baling boards size 58 by 36 inches, each with a score line placed 6 inches from each 58-inch edge in such a manner that the kraft facing is on the outside when in a folded position, shall be used in each bale; one board on top of the bags being baled and one on the bottom. The boards shall be bent at the score lines thereby forming a fiberboard cap 58 inches in length, 24 inches in width, with 6-inch flanges extended down over the side of the bale.

5.2.1.2 Strapping. — Not less than eight straps shall be used on each bale; straps shall be affixed girthwise around the sides, top, and bottom of the bale over the baling boards. The two outside straps shall be placed 4 inches in from each end and the intermediate straps placed equidistant between the end bands. All strapping shall be flat steel not less

C-F-160a

than $\frac{3}{8}$ inch wide by 0.020 inches thick conforming to type I, class A, of Federal Specification QQ-S-781.

5.2.2 Level C.—Feathers, down, and feathers and down mixture packaged as specified in 5.1 shall be packed in a manner to insure carrier acceptance and safe delivery at destination. Containers shall be in accordance with Uniform Freight Classification Rules or Regulations of other carriers applicable to the mode of transportation.

5.3 Marking.

5.3.1 Civil agencies.—In addition to any special marking required by the contract or order, shipping containers shall be marked in accordance with the requirements of Federal Standard No. 123.

5.3.2 Military agencies.—In addition to any special marking required by the contract or order, shipments shall be marked in accordance with the requirements of Military Standard MIL-STD-129. All shipments for level A or level B shall be designated "A/A".

6. NOTES

6.1 Intended use.—The type I feathers and type II down are intended for storage for subsequent use in end items as required. The type III feather and down mixture covered by this specification is intended for immediate use in sleeping bags and similar items.

6.2 Ordering data.—Purchasers should exercise any desired options offered herein, and procurement documents should specify the following:

- (a) Title, number and date of this specification.
- (b) Type, class, and grade required (see 1.2)
- (c) When laboratory report is not required (see 3.1).
- (d) When preproduction sample is not required (see 3.2).

- (e) Whether an affidavit is required to show that the materials supplied are new and not used (see 3.3).
- (f) When treatment with insecticide is required (see 3.5.3).
- (g) Selection of applicable levels of packing and packing (see 5.1 and 5.2).

6.3 With reference to 3.5.1, good results have been obtained when the feathers or down are agitated for 20 minutes in water at $90^{\circ} \pm 5^{\circ}$ F. to which has been added a blood solubilizing agent in the proportion of one ounce of the agent to 10 gallons of water. Following the blood solubilizing treatment, the feathers or down are washed using a non-ionic detergent and then rinsed. The final rinse contains one of the commercial fluoride soaps available as laundry soaps, namely, sodium acid fluoride or sodium silica fluoride or combinations thereof.

6.4 Supersession data.—This specification supersedes those requirements of Federal Specification C-F-151a dated July 24, 1940 pertaining to type II duck feathers and type III goose feathers. This specification also supersedes the requirements of Military Specification MIL-F-5652C dated 29 May 1953 for Feathers and Down, Waterfowl. Federal Specification C-F-158 for Feathers, Land Fowl (Crushed) supersedes those requirements of Federal Specification C-F-151a for type I chicken feathers.

6.5 Filling power test.—The testing equipment may be procured at:

CUSTOM SCIENTIFIC INSTRUMENT,
INCORPORATED
541 Devon Street
Arlington, New Jersey

Other sources of equipment may be used provided that the equipment conforms to the standard design or that test results equal to the standard are obtained. Manufacturers are invited to advise the Military Clothing and Textile Supply Agency, Philadelphia Quartermaster Depot, of their readiness to supply

C-F-160a

such testing equipment in order that prospective bidders under this specification may be advised upon their request.

6.6 Transportation description.—Transportation description applicable to this item is:

Feathers NOIBN (specify machine or not machine pressed).

Carload minimum weight 15,000 pounds, subject to rule 34,

Uniform Freight Classification.

Less than 4 lbs. per cubic foot.

Motor volume minimum weight, any quantity.

4 lbs. per cubic foot but less than 7 lbs.

Truckload minimum weight 5,600 pounds, subject to rule 34, National Motor Freight Classification.

7 lbs. per cubic foot but less than 12 lbs.

Truckload minimum weight 10,000 pounds, subject to rule 34, National Motor Freight Classification.

12 lbs. per cubic foot or over.

Truckload minimum weight 12,900 pounds, subject to rule 34, National Motor Freight Classification.

Notice. — When Government drawings, specifications, or other data are used for any purpose other than in connection with a definitely related Government procurement operation, the United States Government thereby incurs no responsibility nor any obligation whatsoever; and the fact that the Government may have formulated, furnished, or in any way supplied the said drawings, specifications, or other data, is not to be regarded, by implication or otherwise as in any manner licensing the holder or any other person or corporation, or conveying any rights or permission to manufacture, use, or sell any patented invention that may in any way be related thereto.

ARKANSAS

CHAPTER 7. SANITARY AND SAFETY REGULATIONS

SECTION.

82-701. Sanitation bureau created.
82-702-82-713. [Repealed.]
82-714. [Obsolete.]
82-715. [Obsolete.]
82-716. Manufacture, renovation and sale of bedding—Definitions.
82-717. Re-use of material exposed to contagion forbidden.
82-718. Sale of used bedding exposed to contagion forbidden.
82-719. Sterilization of material to be re-used.
82-720. Bedding to be labeled—Form and contents of label.
82-721. Removal or alteration of labels forbidden.
82-722. "Felt" defined.

SECTION.

82-723. Noncompliance with act—Separate offenses defined.
82-724. Removal of label on hotel or rooming house bedding unlawful.
82-725. Re-use of mattresses from hospitals or hotels forbidden—Exception.
82-726. Act does not apply to renovation for domestic use—Use of label.
82-727. Rules for sterilization prescribed by state board of health.
82-728. Offenses under act.
82-729. Penalty for violations.
82-730. Inspection of ice boxes and refrigerators—Dismantling.
82-731. Walk-in refrigerators—Handle requirements.

82-701. Sanitation bureau created.—There is hereby created a Bureau of Sanitation of the State of Arkansas, which shall be under the supervision and jurisdiction of the State Board of Health. The usual facilities for transacting its business shall be furnished as hereinafter provided. [Acts 1917, No. 210, § 1, p. 1139; Pope's Dig., § 7211.]

Compiler's Notes.

Acts 1917, No. 210 (§§ 82-701-82-713, 82-715) was not carried in Crawford and Moses' Digest. This section may be obsolete since the purpose for which the bureau was established, the licensing of hotels, rooming houses and restaurants, was repealed by Acts 1949, No. 299, § 1.

NOTES TO DECISIONS

Authority of Cities.

Municipal corporations were not authorized to regulate hotels since such power formerly given to them was repealed by this statute placing the regulation in the state board of health. *Bragg v. Adams*, 180 Ark. 582, 21 S. W. (2d) 950.

82-702—82-713. Licensing and inspection of hotels, restaurants and rooming houses. [Repealed.]

Repeal.

These sections (Acts 1917, No. 210, §§ 2-13, p. 1139; Pope's Dig., §§ 7212-7222; Acts 1943, No. 227, §§ 1, 2, p. 475), relating to the licensing of and sanitary inspection of hotels, restaurants and rooming houses, were repealed by Acts, 1949, No. 299, §§ 1, 2.

82-714. Disposition of hotel inspection fees. [Obsolete.]

Compiler's Note.

This section (Acts 1945, No. 99, § 4, p. 229) is rendered obsolete by the repeal of §§ 82-702-82-713 relating to the licensing of hotels.

82-715. Rules and regulations of board of health. [Obsolete.]

Compiler's Note.

This section (Acts 1917, No. 210, § 16, p. 1139) is rendered obsolete with the repeal of the remainder of the act by Acts 1949, No. 299, § 1.

82-716. Manufacture, renovation and sale of bedding—Definitions.—That the term "bedding" as used in this act [§§ 82-716—82-729] shall be construed to mean any mattress, upholstered spring, comforter, pad, cushion or pillow designed and made for use in sleeping.

The word "person" as used in this act shall be construed to impart the plural and the singular, as the case demands, and shall include individuals, corporations, partnerships, joint-stock companies, societies and associations.

The word "new" as used in this act shall mean any material which has not been used in the manufacture of another article or used for any other purpose.

The words "previously used" as used in this act shall mean any material which has been used in the manufacturing of another article or used for any other purpose.

When construing and enforcing the provisions of this act, the act, omission or failure of any officer, agent or other person acting for, or employed by any individual, corporation, partnership, joint-stock company, society or association, within

the scope of his employment or office shall in every case be also deemed the act, omission or failure of such individual, corporation, partnership, joint-stock company, society or association as well as that of the person. [Acts 1927, No. 249, § 1, p. 846; Pope's Dig., § 6455.]

Comparative Legislation. Bedding—Manufacture or sale—Regulations:

Ill. Rev. Stat. 1959, ch. 38, §§ 67-74.

Ind. Burns' Stat., §§ 35-3601-35-3613.

Ky. Rev. Stat., §§ 214.280-214.310.

La. Rev. Stat. 1950, 40:1191 et seq.

Mo. Vernon's Stat., §§ 421.010-421.120.

Tenn. Code Ann., §§ 53-2208-53-2221.

82-717. Re-use of material exposed to contagion forbidden.—No person shall use in the making or remaking of any article of bedding as herein defined, any material of any kind that has been used by or about any person having an infectious or contagious disease, or has formed a part of any article of bedding which has been so used. [Acts 1927, No. 249, § 2, p. 846; Pope's Dig., § 6456.]

82-718. Sale of used bedding exposed to contagion forbidden.—No person shall sell, offer for sale, deliver, consign for sale, or have in his possession with intent to sell, deliver or consign for sale, any article of bedding that has been used by or about any person having an infectious or contagious disease. [Acts 1927, No. 249, § 3, p. 846; Pope's Dig., § 6457.]

82-719. Sterilization of material to be re-used.—No person shall re-make or renovate any article of bedding unless all the material to be used in said remade or renovated bedding shall first be thoroughly sterilized and disinfected by a process approved by the State Health Commissioner [Officer].

Any person who receives bedding to be renovated shall attach to each such article of bedding at the time of its receipt, a tag upon which has been legibly written the name and address of the owner of the bedding and the date it was received for renovation.

No person shall use in the making of bedding any previously used material unless such material has been sterilized and disinfected by a process approved by the State Health Commissioner [Officer]. [Acts 1927, No. 249, § 4, p. 846; Pope's Dig., § 6458.]

Compiler's Note.

The bracketed words "Officer" were inserted by the compiler because the present law does not provide for a health commissioner but provides for a state health officer. See § 82-103.

Section to Section Reference.

This section is referred to in § 82-725.

82-720. Bedding to be labeled—Form and contents of label.—No person shall sell, offer for sale, deliver, consign for sale, or have in his possession with intent to sell, offer for sale, deliver or consign for sale, any article of bedding unless the same be labeled as follows:

Upon each of such articles of bedding there shall be securely sewed upon the outside thereof a label upon which shall be legibly written or printed, in the English language, the name of the material or the names of the materials used as the filling of such article of bedding; if all the material used as the filling of such article of bedding shall not have been previously used, the words "manufactured of new material" shall appear upon said label, together with the name and address of the maker of the bedding.

If any of the material used in the making or remaking of such article of bedding shall have been previously used, the words "manufactured of previously used material" or "remade of previously used material" as the case may be, shall appear upon said label, together with the name and address of the maker thereof, and also a description of the material used in the filling of such article of bedding.

On any article of bedding not remade, but which has been used shall be labeled "second-hand."

The label required by this section shall be muslin or linen and not less than two [2] inches by three [3] inches in size. The statement required under this section shall be in form as follows:

Manufactured of new material
Materials used in filling

Made by -----
Address -----

The words "manufactured of new material" or "remade of previously used material," or "second-hand," "materials used in filling not known," together with the description of the material used as the filling of an article of bedding shall be in letters not less than one-eighth [$\frac{1}{8}$] of an inch in height.

The sewing of one edge of the said label securely into an outside seam of any article of bedding shall be deemed a compliance with that portion of the act requiring that the label be "securely sewed" upon the article. This label shall contain all the statements required by this act [§§ 82-716—82-729], and shall be securely sewed to the ticking or cover of every article of bedding to be manufactured, before the filling material has been placed inside the ticking or cover.

No term or description likely to mislead shall be used on any label required by this act, in the description of the materials used in the filling of any article of bedding. [Acts 1927, No. 249, § 5, p. 846; Pope's Dig., § 6459.]

Section to Section Reference.

This section is referred to in § 82-725.

82-721. Removal or alteration of labels forbidden.—Any person, other than a purchaser for his own use, who shall remove, deface, alter or shall cause to be removed, defaced or altered, any label upon any article of bedding so labeled under the provisions of this act [§§ 82-716—82-729] shall be guilty of a violation thereof. [Acts 1927, No. 249, § 6, p. 846; Pope's Dig., § 6460.]

82-722. "Felt" defined.—If the label shall bear the word "Felt," it shall be construed to mean that the materials from which the felt was made, has been carded layer upon layer by a garnett, or felting machine. [Acts 1927, No. 249, § 7, p. 846; Pope's Dig., § 6461.]

82-723. Noncompliance with act—Separate offenses defined.—Any person who shall fail to comply with any of the provisions of this act [§§ 82-716—82-729] shall be guilty of a violation thereof. The unit for a separate and distinct offense in violation of this act shall be each and every article of bedding made, or remade, or sold, or offered for sale, or delivered, or consigned, or possessed with intent to sell, offer for sale, deliver, or consign, contrary to the provisions hereof. [Acts 1927, No. 249, § 8, p. 846; Pope's Dig., § 6462.]

82-724. Removal of label on hotel or rooming house bedding unlawful.—It shall be unlawful for any owner, his employees, or servants, of any hostelry or hotel, rooming or boarding house operated for profit, to remove or cause to be removed from mattress purchased for the use in their place of business after the effective date of this act [§§ 82-716—82-729], or [any] label attached thereto. [Acts 1927, No. 249, § 9, p. 846; Pope's Dig., § 6463.]

Compiler's Note.

The bracketed word "any" was inserted by the compiler.

82-725. Re-use of mattresses from hospitals or hotels forbidden—Exception.—It shall be unlawful, and punishable by provisions of this act [§§ 82-716—82-729], for any person, firm, or corporation, or their agent or agents to use or cause to be used in the manufacture, or renovation of mattresses, materials of any description, in whole or in part, that have been used in or about any public or private hospital or sanitorium [sanatorium] for the treatment of any infectious or contagious disease, or materials obtained from mattresses from hotels, rooming and boarding houses, and other public buildings where mattresses have been used for their original purpose, provided however, that this shall not prevent the use of materials as prohibited in section ----- [§ 82-719], when they have been thoroughly sterilized by a method

of sterilization approved or adopted by the State Board of Health; but in which event the mattress shall be labeled as indicated in section _____ [§ 82-720], as may apply. [Acts 1927, No. 249, § 10, p. 846; Pope's Dig., § 6464.]

Compiler's Notes.

The section numbers were not filled in in the act and what are considered the proper sections have been inserted in brackets.

The bracketed word "sanatorium" was inserted by compiler.

82-726. Act does not apply to renovation for domestic use—Use of label.—There shall be nothing in this act [§§ 82-716—82-729] so construed as to prevent any individual from manufacturing, renovating, or having manufactured or renovated, mattresses for his or her own home or domestic use. Provided, that any individual firm or corporation who shall so manufacture or renovate a mattress for another, as set out in this act, shall be required to label same as provided in section _____ [§ 82-720] hereof. [Acts 1927, No. 249, § 11, p. 846; Pope's Dig., § 6465.]

Compiler's Note.

The section number was not filled in in the act and what is considered the proper section has been inserted in brackets.

82-727. Rules for sterilization prescribed by state board of health.—It is hereby made the duty of the State Board of Health to promulgate and publish rules and regulations prescribing the method of sterilization that may be used by those engaged in the manufacture of mattresses and bedding, or in the renovation thereof. All persons, firms, or corporations who shall conform to the regulations as promulgated by the State Board of Health, as herein directed, shall be deemed as complying with the law. [Acts 1927, No. 249, § 12, p. 846; Pope's Dig., § 6466.]

82-728. Offenses under act.—Any person, firm or corporation who shall fail to comply with any of the provisions of this act [§§ 82-716—82-729] shall be guilty of a violation of this act, and each and every mattress manufactured, remade, or renovated, sold, offered for sale, delivered, consigned or possessed with an intent to sell, offer for sale, deliver, or consign contrary to the provisions of this act shall be deemed a separate offense. [Acts 1927, No. 249, § 13, p. 846; Pope's Dig., § 6467.]

82-729. Penalty for violations.—Every person who shall be found guilty of a violation of the provisions of this act [§§ 82-716—82-729] shall be subject to a fine of not less than twenty-five (\$25.00) dollars, nor more than two hundred fifty (\$250.00) dollars, or not less than thirty [30] days, nor more than ninety [90] days in prison, or both, as the court may deem proper. [Acts 1927, No. 249, § 14, p. 846; Pope's Dig., § 6468.]

Repealing Clause and Effective Date.

Section 15 of Acts 1927, No. 249 repealed all laws and parts of laws in conflict therewith and provided that the act should take effect 60 days after its passage. It was approved March 24, 1927, however, such effective date would be invalid under decisions in *Arkansas Tax Comm. v. Moore*, 103 Ark. 48, 145 S. W. 199 and *Cunningham v. Walker*, 198 Ark. 928, 132 S. W. (2d) 24.

82-730. Inspection of ice boxes and refrigerators—Dismantling.—The Chief Safety Engineer of the State Department of Labor or any of his deputies or inspectors shall have the right to remove the door hinges or to dismantle, if necessary, any refrigerator, ice box or freezer located in a place where said refrigerator, ice box or freezer has become or is likely to become hazardous to the lives of children; provided that this section does not apply to refrigerators, ice boxes or freezers located in a home or any retail or wholesale establishment. The Chief Safety Engineer or any of his deputies or inspectors shall have the right to enter any junkyard, vacant lot, dump, yard, or any other place frequented by children in order to perform the above duties. [Acts 1957, No. 347, § 1, p. 996.]

82-731. Walk-in refrigerators—Handle requirements.—The Chief Safety Engineer of the State Department of Labor or any of his deputies or inspectors may require the installation of inside door handles on any walk-in refrigerator, ice box, freezer or the door of a cold storage room where in his discretion the absence of inside door handles in such freezing unit may endanger the life of any employee or other authorized personnel using such unit. [Acts 1957, No. 347, § 2, p. 996.]

Repealing Clause.

Section 4 of Acts 1957, No. 347, repealed all laws and parts of laws in conflict therewith.

Separability.

Section 3 of Acts 1957, No. 347, read: "If any provision of this act or the application thereof to any person or circumstance is held invalid, such invalidity shall not affect other provisions or applications of the act which can be given effect without the invalid provision or application, and to this end the provisions of this act are declared to be severable."

COLORADO

CHAPTER 66—ARTICLE 17

MATTRESSES AND BEDDING

66-17-1.	Definitions.	66-17-10.	Disposition of funds.
66-17-2.	Use of infected material.	66-17-11.	Appropriation.
66-17-3.	Sale of bedding exposed to contagion.	66-17-12.	Posting of license.
66-17-4.	Sterilization.	66-17-13.	Enforcement.
66-17-5.	Receiving bedding to be remade.	66-17-14.	Violation—what constitutes.
66-17-6.	Tagging.	66-17-15.	Penalty for violation.
66-17-7.	Removing or defacing tag or stamp.	66-17-16.	Rules and regulations.
66-17-8.	Administered by department.	66-17-17.	Title.
66-17-9.	License.		

66-17-1. Definitions.—(1) The word “bedding” means and includes any quilted pad, packing pad, mattress pad, hammock pad, mattress, comforter, bunk quilt, sleeping bag, box spring, studio couch, pillow, cushion, or any bag or container made of leather, cloth or any other material, or any other device that is stuffed or filled in whole or in part with any concealed material in addition to the structural units and filling material used therein and its container, all of which can be used by any human being for sleeping or reclining purposes. “Bedding” includes pillows which are hereby defined as a bag or case of cloth filled or stuffed with feathers, down, kapok, cotton, hair, wool, or other sanitary filling not prohibited by this article to be used as a rest or support for the head in reclining or sleeping.

(2) The word “person” means any individual, corporation, partnership, or association.

(3) The term “new material” means any material which has not been formerly used in the manufacture of another article or used for any other purpose.

(4) The term “previously used material” means material which has been used in the manufacture of another article, or previously used for any other purpose.

(5) The term “secondhand” means any article of bedding which has been previously used but not remade before it is offered for resale.

(6) The words “sell” and “sold” shall, in the corresponding tense, include: Sell, offer to sell, or deliver or consign in sale, or possess with intent to sell, deliver or consign in sale, including bedding stored in warehouses for ultimate purpose of sale.

66-17-2. Use of infected material.—No person shall knowingly use in manufacturing or remaking bedding any material that has been used by a person having an infectious or contagious disease, or which has formed a part of bedding so used.

66-17-3. Sale of bedding exposed to contagion.—No person shall knowingly sell bedding that has been used by a person having an infectious or contagious disease.

66-17-4. Sterilization.—No person engaged in manufacturing, remaking or renovating bedding for another person, or in manufacturing bedding for sale, shall use any previously used material which since last used is not sterilized by the following process, or its equivalent: bedding materials shall be placed in an enclosed chamber which shall be heated to a temperature of two hundred degrees Fahrenheit, which temperature shall be maintained for a period of two hours. The heat may be generated by electric units or any other satisfactory method of heating approved by the state department of public health.

No person shall knowingly sell any bedding manufactured in whole or in part from previously used material, or secondhand bedding, unless sterilized since last used by the process herein provided.

No person shall engage in the business of sterilizing bedding as provided in this article without first obtaining a license from the state department of public health for which there shall be charged a license fee of five dollars per calendar year, or any portion thereof. Such person shall apply for a license and set forth the place where the sterilizing apparatus will be located, the type and kind of equipment to be used, the name and addresses of true owners of said sterilizing business, and such other data as the state department of public health may require. The state department of

public health shall cause an investigation to be made, and if it is satisfied that the apparatus will comply with the requirements set forth for sterilization, pursuant to this article, the said license shall be issued. Inspection shall be made from time to time to determine whether the said licensee is fully and faithfully complying with all of the provisions and regulations promulgated as to sterilization.

66-17-5. Receiving bedding to be remade.—Any person who receives bedding to be remade or renovated shall attach thereto at the time of receiving said bedding a tag on which is legibly written the date of receipt and the name and address of the owner or an identification number and keep a record thereof.

66-17-6. Tagging.—No person shall sell bedding to which is not securely sewed by at least one edge, a cloth or clothbacked tag at least two inches by three inches in size, to which has been affixed the adhesive stamp provided in section 66-17-8.

Upon said tag shall be legibly stamped or printed in English in letters at least one-eighth inches high:

(1) If the materials used in the manufacture of the article of bedding to which the label or brand is to be attached are entirely new, the brand or label shall be as follows: "The materials used in the manufacture of this mattress (or other article of bedding) are entirely new."

(2) If the materials used in the manufacture of the article to which the label or brand is to be attached are partially or wholly previously used materials, the brand or label shall be as follows: "The materials used in the manufacture of this mattress (or other article of bedding) are previously used materials and have been sterilized," with a specific statement of the kind and character of the previously used materials used.

(3) If the article to which the label or brand is to be attached is secondhanded, the brand or label shall consist of the following: "This mattress (or other article of bedding) is secondhanded and has been sterilized."

(4) In addition to the foregoing every label shall bear the name and address of the manufacture or vendor of the article of bedding to which it is attached and the name of material or materials used to fill such article of bedding.

Nothing likely to mislead shall appear on said tag, and it shall contain all statements required by this article and it shall be sewed to the outside covering of every article of bedding sold, manufactured or remade.

The name "felt" shall not be used unless the material has been carded in layers by a garnett machine.

66-17-7. Removing or defacing tag or stamp.—No person, other than a purchaser for his own use, shall remove from any article of bedding or deface or alter the tag or stamp required by this article.

66-17-8. Administered by department.—The state department of public health is hereby charged with the administration and enforcement of this article and it shall provide specially designed adhesive stamps for use under section 66-17-6. Upon request it shall furnish no less than one thousand of said stamps to any person paying in advance twenty dollars per thousand stamps.

66-17-9. License.—No person, except for his own use, shall manufacture, remake or renovate any article of bedding until he has secured an annual license from the state department of public health, for which he shall pay to said state department of public health the sum of twenty-five dollars for any calendar year, or part thereof, for each place of business conducted by such person. The state department of public health may revoke and void any license so issued to any person guilty of violating this article, and such person shall not manufacture, remake, renovate or sell any article of bedding until he has shown a proper compliance with this article and has paid another license fee, whereupon the state department of public health shall issue a new license to said person. Individuals making seventy-five or less quilts per annum or individuals making ten or less mattresses per annum, charitable organizations engaged in philanthropic enterprises, and manufacturers of caskets and burial receptacles shall be exempt from the provisions of this article.

66-17-10. Disposition of funds.—All funds paid to the department of revenue pursuant to this article shall be deposited with the state treasurer for the state of Colorado.

66-17-11. Appropriation.—There shall be appropriated to the state department of public health out of any fund available in the state treasury a sum equivalent to the revenue derived from the sale of stamps and license fees, herein provided, for the purpose of employing inspectors to enforce this article and to defray any other expense incurred in the enforcement thereof.

66-17-12. Posting of license.—Any license required pursuant to the terms of this article shall be publicly posted upon the premises of the licensee.

66-17-13. Enforcement.—The state department of public health shall employ a bedding law inspector, or inspectors, whose sole duty shall be to enforce this article. Such inspector, or inspectors, as often as practicable, shall inspect every place where bedding is made, remade, renovated, sterilized or sold, or where previously used material and secondhand bedding is sterilized under this article. Any inspector so employed to enforce this article, who has reason to believe that any article of bedding is not tagged as required by this article, shall have the authority to open the same and examine the materials therein to determine if said filling is of the kind stated on said tag, provided that in opening such bedding he shall use reasonable means not to damage the same, or destroy the value thereof. Said inspector shall also have power to examine any purchase records necessary to determine definitely the kind of material used in said bedding, and he shall have power to seize and hold for evidence any article or material therein possessed or offered for sale contrary to this article. Such inspectors shall promptly report any violations of this article to the state department of public health, which in turn shall report the same to the district attorney of the county wherein the violation has been committed for the purpose of prosecution.

66-17-14. Violation—what constitutes.—Any person who fails to comply with any provision of this article, or who counterfeits the stamps provided for in section 66-17-8, shall be guilty of a violation of this article. Every stamp so counterfeited and every article of bedding manufactured, remade, renovated, sold or sterilized contrary to this article shall be a separate offense.

66-17-16. Rules and regulations.—The state department of public health shall have the right to promulgate rules and regulations deemed necessary for the proper enforcement of this article and not inconsistent therewith.

66-17-17. Title.—This article shall be known and designated as "The Bedding Act."

RULES AND REGULATIONS GOVERNING THE ENFORCEMENT OF THE MATTRESSES AND BEDDING LAWS

The following rules and regulations for the enforcement of Chapter 66, Article 17, 1953 Colorado Revised Statutes known as the Bedding Act are hereby adopted by the State Board of Health under the authority contained in Chapter 66, Article 17, 1953 Colorado Revised Statutes.

Regulation 1. All heat sterilizing chambers must be equipped with a recording thermometer. Charts shall be kept on file and available for inspection at all reasonable times. Articles placed in sterilizing chambers shall be so spaced as to allow air circulation around each article.

Regulation 2. The steam pressure process for sterilizing, cleaning and curling feathers, down, hair, wool or any other material derived from an animal or fowl, may be used when approved by the State Department of Public Health.

Regulation 3. The following sterilization process shall be considered as being "equivalent" to the process described in Chapter 66, Article 17, Section 4, 1953 Colorado Revised Statutes: Such process shall subject the material to treatment by live steam for thirty minutes at a pressure of fifteen pounds or for twenty minutes at a pressure of twenty pounds. Chambers must be bled to exhaust cold air before pressure or time is recorded. Chamber must be steam tight, sufficiently strong to stand the pressure applied, be equipped with an accurate visible steam gauge and necessary valves.

Regulation 4. Any chemical process employed in lieu of heat sterilization must be equivalent in efficacy to the prescribed heat treatment and must be approved by the State Department of Public Health.

Regulation 5. All bedding tags provided for in Chapter 66, Article 17, Section 6, 1953 Colorado Revised Statutes shall be as follows:

(a) If the materials used in the manufacture of the article of bedding to which the label or brand is to be attached are entirely new, the brand or label shall be made of white material, with black lettering reading as follows: "The materials used in the manufacture of this mattress (or other article of bedding) are entirely new, consisting of . . . (naming materials)."

(b) If the materials used in the manufacture of the article to which the label or brand is to be attached are partially or wholly previously used materials, the brand or label should be made of yellow material with black lettering reading as follows: "The materials used in the manufacture of this mattress (or other article of bedding) are previously used material and have been sterilized," with a specific statement of the kind and character of the previously used materials used.

(c) If the article to which the label or brand is to be attached is a remake for an individual or company, the brand or label shall be made of green material with black lettering reading as follows: "This article has been sterilized, renovated, and remade and contains the same material received from owner to which has been added (specifically state the kind and character of material added)."

(d) If the article to which the label or brand is to be attached is secondhand, the brand or label shall be made of red material with black lettering, reading as follows: "This mattress (or other articles of bedding) is secondhand and has been sterilized."

(e) In addition to the foregoing, every label shall bear the name and address of the manufacturer or vendor of the article of bedding to which it is attached and the name of material or materials used to fill such article of bedding.

(f) Every tag shall have printed on the top: "DO NOT REMOVE THIS TAG—UNDER PENALTY OF LAW."

REPEAL SECTION: The regulations adopted by the State Board of Health under the authority contained in Chapter 201, Session Laws, Colorado 1941, on April 18, 1941, are hereby repealed.

Adopted by the Colorado State Board of Health, June 13, 1955.

State of Connecticut
Regulations
Bedding and Upholstered Furniture

LABOR DEPARTMENT
Factory Inspection Division
200 Folly Brook Boulevard
Wethersfield

BEDDING AND UPHOLSTERED FURNITURE

Sec. 19-423-1. Application of regulations. The following regulations issued under authority of section 19-423 pertain to the administration and enforcement of sections 19-419 to 19-423, inclusive, of the general statutes. These regulations and the provisions herein set forth apply to the manufacture, repair and renovation of all articles of bedding and upholstered furniture intended for sale and to such articles when offered for sale or resale, or exchange or lease, or consignment or delivery in consignment for sale, resale, exchange or lease, and shall apply to all persons including manufacturing establishments, both wholesale and retail, when such articles are in their possession for such purpose.

Sec. 19-423-2. Definitions. When used in these regulations, "commissioner" means the labor commissioner or his authorized representative; "department" means the labor department; "article of bedding and upholstered furniture and filling material" means and includes such articles and parts thereof as fall within the scope of section 19-419 of the general statutes; "sale," "sell" or "sold" means offering or exposing for sale or resale, or exchange or lease, or consigning or delivering in consignment for sale, resale, exchange or lease, or holding in possession with like intent. The possession of any article of bedding or upholstered furniture or filling material by any maker or dealer or his agent or servant or other person in the course of business shall be presumptive evidence of intent to sell; "manufacture" means the making by hand or machine of an article of bedding or upholstered furniture or part thereof, including the assembling or processing or finishing of articles or parts produced by another and also including the processing or preparation of filling materials intended for use in the manufacture, renovation or repair of articles of bedding or upholstered furniture; "sterilize," "sterilized" or "sterilization" means the cleaning or decontamination of any article of bedding or upholstered furniture or filling material by a process approved by the commissioner, by a person holding an active sterilization permit issued by the commissioner; "person" means an individual, partnership, corporation, firm or association, receiver, agent or other representative of such person; "license" means the formal permission granted by the commissioner to sell or manufacture for sale or remake, renovate or repair articles of bedding or upholstered furniture or filling materials within the state of Connecticut for a period not to exceed twelve calendar months beginning on October first of each year and such permission is conditioned upon the receipt and approval of an application for a license and the receipt of the required license fee; "licensee" means the person in whose name a license is recorded by the department; "valid license" or "active license" means a license which has not expired or been suspended or revoked, or voluntarily returned to the department during an annual license period; "expiration date" means September thirtieth of each year. No license is valid after said date, but licenses may be renewed in advance of the expiration date so as to become effective on October first, assuring a continuous active license; "registry number" means the number assigned by the commissioner to the person to whom a license is issued; "new" means any material or article which has not been previously used for any purpose and includes by-products produced in the processing of cotton or in the manufacture of new fabrics and materials reclaimed from new fabric and from new material, and also includes any article of bedding or upholstered furniture or filling material returned by the purchaser for exchange, alteration or correction within thirty days of the date of delivery of such article or material, provided the tags have not been removed and further provided substantial proof is at hand to determine the original date of delivery. If the article or material has been returned by the purchaser for exchange, such article or material may be sold

as new provided it had not been used for any purpose. If the article or material has been used in any way it is considered as second-hand and shall comply with the provisions for second-hand merchandise. To be considered as having been returned by the purchaser for alteration or correction, the article or material shall be returned with the original tags intact and, when such alterations or corrections of error of manufacture are completed, the article may be returned to the original purchaser without sterilization but no such article may be sold as a new article; "second-hand" means any article or part thereof and any material which has been used in any manner whatsoever, including any article of bedding, upholstered furniture or filling material returned by a purchaser for exchange, alteration or correction after thirty days from the date of delivery of such articles to such person, and any article from which the tag has been removed or for which the date of original delivery to the purchaser cannot be substantiated; "antique furniture" means any article of bedding or upholstered furniture manufactured at least one hundred years prior to the date on which it is offered for sale or exchange as an antique, and such articles shall be exempt from these regulations provided substantial proof of the age of such articles shall be available to the commissioner or an authorized representative of the commissioner; "tag or identifying tag" means the tag of linen, muslin or equally durable material required to be affixed to all articles of bedding, upholstered furniture, filling material or part thereof; "labels," "labeling" or "labeled" means the information printed on tags.

(See G.S. § 19-419.)

Sec. 19-423-3. Inspection stamps. Inspection stamps are required on tags affixed to articles of bedding, upholstered furniture or filling material in the hands of retail furniture dealers or in transit to such dealers, on or before September 30, 1955, where such articles are offered for sale on October 1, 1955, or thereafter. Such articles may then be legally offered for sale by such dealers if in all other respects they conform to the provisions of statutes and regulations issued under the authority thereof, provided evidence can be furnished to substantiate the date of delivery or shipment and such evidence can be verified by the commissioner or his authorized representative.

Sec. 19-423-4. License requirements. (a) **Annual license.** No person shall sell or offer for sale or manufacture for sale, in the state of Connecticut, any article of bedding or upholstered furniture or filling material unless such person is licensed with the department and has been assigned a registry number and such license is valid at the time such article is sold or offered for sale in Connecticut. A license shall be valid, unless suspended or revoked in the interim, for a period of twelve months beginning on October first of one year and ending on September thirtieth of the following year. In the instance of a new licensee or licensees who are changing to a different classification or type of license, a license may be issued and registry number assigned during any quarterly period beginning on January first, April first or July first, and such license shall be valid, unless suspended or revoked, until the thirtieth day of September next following date of issue, and in such cases the fee for the license shall be prorated from the first day of the quarter in which it is issued to September thirtieth next following. All licenses expire on September thirtieth next following the date of issue, and the assigned registry number shall be withdrawn unless the license has been renewed prior to the expiration date. Except as otherwise provided in these regulations, all articles offered for sale by the licensee or in behalf of the licensee subsequent to the expiration date of a license shall be ordered "off sale" and the vendor shall be considered in violation. A license shall be valid only for the period specified on the license certificate and in no case shall

a license become effective prior to the date upon which the application is approved by the department. Annual license fees shall be payable in advance with the application for the full year's period. In the cases of prorated licenses, the fee shall be payable in advance from the beginning of the quarter in which the license is effective to September thirtieth next following the date of issue. License fees cannot be prorated if the licensee has been issued a license for any part of the previous license year. No rebate of license fees shall be made in the event a license is revoked, suspended or voluntarily returned subsequent to its issue, and only in instances of error on the part of the department shall a licensee be entitled to refund of a license fee. The annual fees for licenses shall be as follows: Manufacturer, fifty dollars; supply dealer, fifty dollars; renovator, twenty-five dollars; and second-hand dealer, twenty-five dollars.

(b) **Transferability.** Each license and the registry number assigned thereto by the commissioner is valid for use only by the person to whom it is issued and is not transferable. The misuse of any license or any registration number or the use of such license or registry number by anyone other than the person to whom it was issued shall be considered a violation and, after a hearing, the license may be cancelled and the registry number revoked. It shall be the responsibility of each person to take adequate precautions against the misuse of any license or registry number issued in his behalf.

(c) **Application for license.** Each person who intends to sell or manufacture for sale in Connecticut any article of bedding, upholstered furniture or filling material shall apply to the commissioner for a license on application forms to be provided by the commissioner. The applicant may request that the registry number issued by a cooperating state be issued to him as a Connecticut registry number, for use as a uniform registry number, but the granting of such request shall be at the discretion of the commissioner. Each application for a license shall be complete and shall be signed and the accuracy of the statements in the application attested by the person to whom the license is to be issued, or the principal executive when the license is to be issued in the name of a firm, partnership, corporation, organization or association. The application, when forwarded to the department, shall be accompanied by cash, check or money order, payable to the Connecticut labor department, for the established fee for one full license year, or for the prorated fee, if applicable. Inaccurate or misleading statements on any application shall be sufficient cause to refuse a license, or, if such license has been issued, shall be sufficient cause to suspend such license and withdraw the registry number. If it is determined after a hearing that the misstatements were deliberate, the license and registry number may be revoked for the balance of the license period. The commissioner may refuse to license and issue a registry number to any person when, in his opinion and after a hearing, such license and the issue of a registry number could result in danger to the life, health, comfort or economic well-being of the people with whom such person may have contact.

(d) **Registry number.** Upon approval of any application for a license the commissioner shall assign a Connecticut registry number and such number shall appear on all tags required under the provisions of sections 19-419 to 19-424, inclusive, of the general statutes and regulations issued under authority thereof. The commissioner may issue, as a Connecticut registry number, the number which has been assigned to the person by any other state having similar standards for the inspection, manufacture and sale of bedding and upholstered furniture and filling material where such number is to be used as a uniform registry number, if such state grants to Connecticut manufacturers the same privilege reciprocally. A Con-

necticut registry number is not transferable and its use by any unauthorized person shall be deemed a violation of statute, and such person shall be liable for prosecution. Licensees who intend to continue operations in Connecticut shall apply for a license in advance of the expiration date of each annual license if they desire the same Connecticut registry number.

(e) **Manufacturer's license.** Each person who manufactures for sale in Connecticut or for consignment or delivery in consignment any article of bedding or upholstered furniture or filling material shall first secure a license with the department as a manufacturer and shall have issued to him a manufacturer's license certificate and registry number. The person so licensed may manufacture for sale, at wholesale or retail, articles of bedding and upholstered furniture or filling materials subject to the laws and regulations relating to such manufacture and to such sale during the period for which the license is valid, and shall affix to such articles a tag upon which shall appear the registry number assigned by the commissioner and such other information as may be required. A licensed manufacturer may also sell, at wholesale or retail, articles manufactured by others than himself, including filling material, and may remake or renovate such articles provided each such article shall be properly tagged and such tags shall bear a valid registry number and otherwise conform with the laws and regulations governing the sale of bedding and upholstered furniture and filling materials in Connecticut.

(f) **Supply dealer.** Each person who sells, or offers for sale in Connecticut, or consigns or delivers in consignment for such purpose, filling material, whether processed or unprocessed, or who prepares or processes filling material in bulk intended for sale in the manufacture of articles of bedding and upholstered furniture, shall first apply for a license as a supply dealer and shall have issued to him a supply dealer's license certificate and registry number, provided such person is not actively licensed as a manufacturer. The person issued a supply dealer's license may, while such license is valid, sell, offer for sale or consign for the purpose of sale filling materials for the use in the manufacture of articles of bedding and upholstered furniture subject to the provisions of statutes relating to the sale of bedding and upholstered furniture and filling materials and regulations issued under the authority thereof, and shall affix thereto a tag bearing the registry number assigned to such license. The provisions of this regulation apply to jobbers and agents, unless the principal for whom they act is properly licensed and the material sold or offered for sale is properly tagged and otherwise conforms to all of the provisions of appropriate statutes and regulations.

(g) **Renovator.** Each person who remakes, renovates or repairs any article of bedding or upholstered furniture or a part thereof, unless he holds an active manufacturer's license, shall first apply for a license with the department and have issued to him a renovator's license certificate and a registry number. The person so licensed may then remake, renovate or repair articles of bedding and upholstered furniture for customers requiring such work to be done, provided he shall affix thereto a yellow tag bearing the assigned registry number and such other information as may be required by law or regulation. Licensed renovators may offer for sale second-hand articles of bedding, upholstered furniture or filling materials, provided they shall affix thereto a yellow tag bearing the assigned registry number and other such information as is required by law or regulation relating to the sale of second-hand articles. The registry number assigned to a renovator may not be used on any but yellow tags nor shall such licensed renovator manufacture or offer for sale any article as new unless such article bears an approved tag upon which shall appear the registry number of a properly licensed manufacturer or supply dealer.

(h) **Second-hand dealer.** Each person who sells or offers for sale any second-hand article of bedding, upholstered furniture or filling material or part thereof shall first apply for a license with the department and have issued to him a second-hand dealer's license certificate and registry number unless such person is actively licensed as a manufacturer or renovator. A person so licensed shall affix to second-hand articles of bedding and upholstered furniture, a yellow tag on which shall appear the words "second-hand" and on which shall also appear the registry number assigned to the licensee and such other information as may be required and may offer such articles for sale, provided each shall conform to the laws and regulations relating to the sale of second-hand articles of bedding and upholstered furniture in Connecticut. A second-hand dealer's license shall not authorize the manufacture, renovation or repair of any article of bedding and upholstered furniture nor shall such licensee offer for sale as new any such article unless the articles shall be tagged with a proper tag bearing the registry number of the manufacturer or supply dealer. The registry number assigned to a second-hand dealer shall not be used on any except a yellow tag upon which shall also appear the words "second-hand." This section shall not apply to articles sold at public auction, to the sale of antique furniture as herein defined or to the private sale from the home of the owner direct to the purchaser.

(i) **Suspension or revocation of license.** When, in the opinion of the commissioner, any licensee is in violation of any provision of sections 19-419 to 19-424, inclusive, of the general statutes, or any regulations issued under the authority thereof, he may summon the licensee to a hearing at which such licensee shall show cause why his license shall not be revoked for the balance of the license period. The failure of a licensee to appear at a hearing, after receiving notice of such hearing, shall be considered sufficient cause for revocation of his license and the licensee shall be immediately notified of this action. In any case where a license is suspended or revoked, all articles of bedding or upholstered furniture or filling materials bearing the registry number of such licensee shall be ordered "off sale" pending determination by the commissioner as to which, if any, of such articles may be legally sold and permission given to offer such articles for sale.

(j) **Exceptions.** The foregoing rules regarding licensing shall not apply to retail dealers in articles of bedding and upholstered furniture or to persons acting as agents in the sale of such articles, provided every article sold or offered for sale by such dealer or such agent shall be otherwise in full compliance with the statutes relating to the sale of bedding and upholstered furniture and the regulations issued under the authority thereof. Any dealer or agent offering for sale any articles not properly tagged by a licensed manufacturer, supply dealer, renovator or second-hand dealer shall be deemed in violation of the provisions of statute and subject to prosecution as provided in section 19-424 of the general statutes, except that articles in the hands of dealers or in transit to them before the date on which the license of the manufacturer or supply dealer becomes invalid for any reason may be legally offered for sale after that date, provided evidence can be furnished and verified to substantiate the date of delivery or shipment.

(See G.S. § 19-422.)

Sec. 19-423-5. Tags. Each article of bedding, upholstered furniture or filling material which is sold or offered for sale or exchange, or is in the possession of any manufacturing or mercantile establishment or other person for such purpose, shall have affixed thereto an approved identifying tag upon which shall be imprinted the registration number of the licensed manufacturer, supply dealer, renovator or second-hand dealer, and such other information as may be required by statute or

these regulations. Each manufacturer, supply dealer, renovator or second-hand dealer shall supply his own tags and shall affix an approved tag to each article of bedding, upholstered furniture or package of filling material, sold or offered for sale by him or in his behalf, in such a manner that the information thereon is completely visible and so that the tag cannot be removed without destroying such tag or rendering it unfit for further use. Articles of bedding, upholstered furniture or packages of filling material composed of separable parts shall be tagged as required on each part. Identifying tags shall be of linen, muslin or other durable cloth material which will not flake when abraded and shall be not less than six square inches in area. Paper face tags shall not be allowed, nor shall such be approved for use. Tags shall be printed or stamped on one side only in fast black letters. Tags shall be so located that the information contained thereon is completely visible to the purchaser at all times and shall be securely sewed to the cushions, pillows, mattresses and similar articles where sewing is possible. Otherwise the tags shall be attached to the article by tacking or pasting in such manner that it cannot be removed without destruction of the tag or so that it is not fit for further use. Each piece of upholstered furniture and every piece of bedding shall have a separate tag affixed thereto in the manner described, and any article which is composed of separable parts shall have a separate tag affixed to each such part, and each tag shall contain a statement of the filling materials used in the piece to which it is attached. Only such information as is required by these regulations and by statute shall appear on any tag affixed to any article of bedding, upholstered furniture or filling materials. No advertisement, trade mark, price tag or any matter other than the required statement shall appear on or be affixed to any tag, nor shall any trade names or superfluous or substitute terms be used on such tag. The appearance of any matter other than that required or authorized in these regulations on any tag shall be sufficient cause to order "off sale" the article to which such tag is affixed. Each applicant for a license shall, on the original application or at any subsequent time that a change in tags is necessary, submit, in duplicate, a sample tag or tags, which shall be approved by the commissioner before use. Bulk filling material shall be tagged by the manufacturer or supply dealer who manufactures or processes such material and shall bear the registry number issued to such manufacturer or supply dealer, and such tags shall be affixed to each bale, bag, carton or other package of filling material when sold, exchanged, offered for sale or exchange, or delivered for use in Connecticut, except that cotton rolls, cotton bat and other filling material which are sold at retail to be used and consumed in the home of the purchaser for his personal use shall require tags as herein specified; however, any such materials that are sold for use in any article of bedding or upholstered furniture intended for sale, exchange or offer for sale shall be tagged as herein provided. Any person, including manufacturers, supply dealers or retailers, who sells or offers for sale any untagged article of bedding or upholstered furniture or package of filling materials except as herein provided without an approved and attached tag or who has such article in his possession for such purpose shall be deemed in violation of the provisions of statute and of these regulations.

(See G.S. § 19-421.)

Sec. 19-423-6. Description of tags. Articles of upholstered furniture which have been remade by removing old upholstery and adding new shall be tagged in the following manner:

(a) All cushions or detachable parts which are made entirely of new material shall bear white tags, stating that such articles consist of all new materials.

(b) A second-hand frame-work to which is attached new upholstery materials

shall bear a yellow tag stating that such article consists of a second-hand frame of wood, iron or steel and filling materials, either new or second-hand.

(c) If any second-hand filling material or cover is used in any article or part of an article, a yellow tag shall be attached stating that such article or part of an article is second-hand.

Sec. 19-423-7. Labeling. On each identifying tag affixed to an article of bedding, upholstered furniture or package of filling material the following information shall be printed or stamped, in the English language, on one side only, in fast black ink with letters not less than one-eighth inch in height:

(a) The Connecticut registry number assigned to the licensed manufacturer, supply dealer, renovator or second-hand dealer and the name of such licensee or the name of the vendor.

(b) The name and character of the filling material contained therein which shall be described only in approved terms as hereinafter provided.

(c) When an article of bedding, upholstered furniture or package of filling materials contains two or more different kinds or types of filling material, the name and character and the percentage of each shall appear on the tag or the entire material shall be designated by the approved name of the lowest grade of material therein contained provided: (1) If an article of bedding, upholstered furniture or package of filling material contains two or more different kinds or types of filling material and the percentage of each is so stated on the tag, a tolerance of not more than ten per cent of the percentage of each kind or type of filling material named shall be allowed, and (2) no tolerance shall be allowed when filling material is described as "all," "pure," "100%" or terms of similar import.

(d) On each identifying tag the word "new" or "second-hand" shall also appear, in addition to the approved terms for each filling material, except as otherwise herein provided.

(e) On each identifying tag affixed to any article of bedding or upholstered furniture or package of filling material containing materials which in whole or in part have been subjected to prior use in any form, or containing material of animal or fowl origin, or containing material that is soiled, contaminated, unsanitary or that for any other reason requires sterilization in accordance with law or regulation, there shall also be imprinted thereon the words "contents sterilized" and the Connecticut permit number of the sterilizer.

(f) On each identifying tag affixed to any article of bedding or upholstered furniture or part thereof that has been remade, repaired or renovated and is to be returned to the owner, shall be imprinted, in addition to all other requirements, a statement that the article contains the same material received from the owner and a description of the kind, type and amount of filling material added, if any, and a statement that such is new or second-hand. A statement that the article shall not be sold but shall be returned to the owner, and the words "contents sterilized" and the Connecticut permit number of the sterilizer shall also appear.

(g) Each identifying tag affixed to any article of bedding, upholstered furniture or package of filling materials, except as otherwise provided by law or regulation, shall, in addition to all other requirements, have imprinted thereon a statement certifying that the filling materials contained in such article are described according

to law and such tag, when attached to articles of bedding, upholstered furniture or package of filling material that contain all new material, shall be imprinted with the statement "date of delivery" and a space left following this statement for the insertion of the delivery date by the vendor or retail dealer.

(h) The identifying tag attached to new articles of bedding and upholstered furniture or bales, packages or cartons of filling materials shall, in addition to all other requirements, be white in color. No previously used materials may be contained in articles or packages to which a white tag is attached.

(i) The identifying tag attached to articles of bedding, upholstered furniture or bales, packages or cartons of filling material that contain any previously used material shall, in addition to all other requirements, be yellow in color.

(j) The identifying tag attached to articles of bedding or upholstered furniture that has been remade or renovated shall, in addition to all other requirements, be yellow in color.

Sec. 19-423-8. Use of terms and definitions relating to filling materials. Terms used to describe filling materials shall include only those set forth and defined in these regulations. Filling materials for which there is no term or definition herein may not be used until the term and definition have been approved by the department, and such term shall thereafter be used to describe such material on any tag affixed to an article, bale or package containing such material.

(a) **General terms.** (1) The word "colored" shall precede any terms used to designate a filling material, if such material has been artificially dyed or colored.

(2) In the terms used to describe feathers and/or down, the color of the material shall precede the term. If mixed colors are used, "colored" shall precede the descriptive term.

(3) The term "shredded clippings" means any material that has been made into fabric and subsequently cut up, torn up, broken up or ground up but which has not been run through a garnett machine. The name of the material need not be included in this term but, if included, shall be as stated.

(4) The term "garnetted clippings" means any material that has been shredded and further processed by passing through a garnett machine. The name of the material need not be included in this term but, if included, shall be as stated.

(5) The word "oily" shall precede any term used to designate a filling material, if such material contains more than five per cent oil.

(6) The term "felt" or "batting" means fiber that has been carded in layers or sheets by a garnett or felting machine. The terms "felt" or "batting" by themselves shall not be used but shall be combined with the name of the material from which they are made. If the felt has been repicked, or consists of small pieces of scrap felt, or is not readily distinguishable from unfelted material, the term "felt" or "batting" shall not be included in the descriptive term.

(7) The word "napper" means the lint removed during the process of raising the face of a cloth and shall be preceded by the name of the textile fiber or fibers from which it is made.

(8) The presence of "down fiber" or "feather fiber" in excess of ten per cent shall be set forth on the tag, together with the kind, color and percentage.

(9) The terms "rubberized" or "resin treated" shall be combined with the required descriptive term only when each hair or fiber of the specified filling material has been thoroughly coated with the stated material, rubber or resin. The terms "rubber coated" or "resin coated" shall be combined with the required descriptive term when the surface only of a filling material has been thoroughly coated with the stated material, rubber or resin. If a filling material pad is coated on one side only, the required descriptive term shall include the notation "(one side only)."

(10) The word "pad" shall be included in the descriptive term only when a hair or fiber filling material has been processed into pad forms.

(b) **Cotton.** (1) "Staple cotton" means the staple fibrous growth as removed from the cotton seed in the usual process of ginning (first cut) containing no foreign material. The term "cotton" by itself shall not be used.

(2) The terms "cotton card strips," "cotton comber," "cotton fly," "cotton picker," "cotton noils" and "cotton notes" may be used to describe these cotton by-products removed by the various machine operations necessary in the manufacture of cotton yarn up to, but not including, the process of spinning. If the exact name of the cotton by-product is not used, such material shall be described as "cotton fiber."

(3) "Cotton linters" shall be used to describe the fibrous growth removed from cotton seed subsequent to the usual process of ginning. The term "linters" alone shall not be used.

(4) The terms "blended cotton felt" or "cotton felt" are acceptable for the description of mixture of cotton by-products, up to the process of spinning, that are further processed by a garnett machine.

(c) **Wool.** (1) "Wool" or "virgin wool" means the fleece of sheep or lambs, which has been scoured and carbonized or scoured. It shall not be the by-product of any process of manufacturing nor shall it have sustained prior use. It shall be free from kemp and vegetable matter or other foreign material.

(2) The terms "wool drawing laps," "wool card waste," "wool card strips" and "wool doffer waste," shall be used to designate new wool fibers removed from the various machine operations necessary in the manufacture of wool yarn up to but not including the process of spinning and shall include noils, fulling flocks, wool pills and shank and tag wools. If the appropriate mill term is not used, the material shall be described as "wool fiber wastes."

(3) "Tanners wool" means wool reclaimed from tanned sheepskin.

(4) "Wool felt" or "virgin wool felt" means wool fiber that meets the requirements of the definition of "wool" or "virgin wool" and has been further processed by a garnett machine.

(5) "Blended wool felt" means mill wastes from the various manufacturing operations, up to but not including the process of spinning, that has been further processed by a garnett machine.

(6) All material having the term "wool" in its approved name shall contain not less than ninety-five per cent wool fibers.

(d) **Feathers and down.** (1) "Down" means the soft undercoating of waterfowl consisting of the light fluffy filaments grown from one quill point but without

any quill shaft. This term shall be combined with the name of the water fowl from which obtained, together with the color of the down, e.g. "white goose down," "grey duck down," etc.

(2) "Down fiber" means the barbs of down plumes separated from the quill points and such term shall be combined with the kind and color of the water fowl from which obtained.

(3) "Feathers" means the appendages growing out of the skin of birds. This term shall be combined with the name and color of the bird from which obtained.

(4) "Feather fiber" means the barbs of feathers separated by any process from the quills, but free from quills. The name and color of the bird from which it is obtained shall be combined with this term.

(5) "Stripped feathers" means the feather barbs stripped from the main stem or quill but not to the extent of separating the barbs into feather fiber. The term "stripped feathers" shall also be combined with the name and color of the bird from which obtained.

(6) "Crushed feather" means feathers which have been processed through a so-called curling machine that has changed the original form of the feather, but has not removed the quill. This term shall also be combined with the name and color of the bird from which obtained and the percentage of each kind of crushed feathers shall be given, in the order of predominance, if the crushed feathers are part of a mixture.

(7) "Chopped feathers" means feathers which have been processed through a chopping machine which has cut the feathers into small pieces. The name and color of the bird from which they are obtained shall be combined with this term. If part of a mixture, such chopped feathers shall be indicated in the order of predominance and percentages stated.

(8) "Broken feathers" shall be so described, together with the name and color of bird from which obtained and the percentage, if the amount of broken feathers exceeds ten per cent of the feather content.

(9) The term "quill" means the main shaft or axis of a feather.

(10) The term "quill feather" means a wing feather or tail feather and shall be combined with the name and color of the bird from which obtained.

(11) Feather mixtures shall be designated by name, color, character and percentage of each kind present in the mixture or the entire mixture shall be designated by the name of the lowest grade material used together with the color of the mixture. The grades of material in descending order are as follows: Goose down, duck down, goose feathers, duck feathers, turkey feathers, chicken feathers.

(e) **Hair.** (1) "Hair" means the coarse, filamentous epidermal outgrowth of such animals as horses, cattle, hogs and goats. When used in the manufacture of upholstered furniture, bedding or filling material, hair shall be clean, properly cured, free from epidermin, excreta, or foreign or objectionable substances or odors. In addition to the word "hair," the tags shall also indicate from what kind of animal the hair originates, and its condition or appearance as hereinafter described.

(2) "Horse hair" means the strands of hair from the mane or tail of horses and shall be further described as "horse tail hair" or "horse mane hair."

(3) "Cattle hair" means the strands or filaments of hair from the body or tail of cattle and shall be further described as "cattle tail hair" or "cattle body hair."

(4) "Hog hair" means the bristle or body hair of swine.

(5) "Curled hair" means any hair that has been curled. The appropriate designation shall appear on the tag preceded by the word "curled."

(6) The term "shredded rubberized hair" means new rubberized hair that has been processed through a shredding machine. The term "curled" is not permitted in connection with shredded hair.

(f) **Rubber.** (1) The term "rubber" shall apply to the following synthetic rubberlike materials as well as to natural rubber: Chloroprene, styrene-butadiene copolymers, butadiene-acrylonitrile copolymers, polymerized isobutylene, with or without comonomers present, and thioplasts (any of the polysulfide rubbers consisting of organic radicals linked through sulfur). Use of the term "rubber products" is not permitted on the tag.

(2) "Sponge rubber" means sponge products made from rubber which have previously been coagulated or solidified. "Sponge rubber" shall be indicated on the tag as follows: (a) "Sponge rubber." The use of this term shall be mandatory for a sponge rubber product consisting of not more than two inserts of unlaminated prime material for attaining desired height, nor more than one vertical splice in every three square feet of top surface area excluding those permitted for T's and U's, and not more than one splice in every three linear feet of added side-walls or in lieu thereof in each corner, excepting side-walls that are irregular in contour in which case the number of splices shall be subject to the approval of the labor department. (b) "Molded sponge rubber." The use of this term may be applied to a sponge rubber product which has been molded in the form in which it is intended to be used. (c) "Sponge rubber pieces." This term shall apply to a sponge rubber product which consists of mere pieces or otherwise fails to conform to the requirements for "sponge rubber" but shall not apply to sponge rubber which has been subjected to a shredding process. (d) "Cemented sponge rubber pieces." The use of this term may be applied to sponge rubber pieces which have been cemented together. (e) "Shredded sponge rubber." This term shall be applied to sponge rubber which has been subjected to a shredding process. (f) "Cemented shredded sponge rubber." This term may be applied to shredded sponge rubber which has been cemented together.

(3) "Latex foam rubber" means a foam product made from rubber latex which previously has not been coagulated or solidified. "Latex foam rubber" shall be indicated on the tag as follows: (a) "Latex foam rubber." The use of one of the terms set forth below shall be mandatory for a latex foam rubber product consisting of not more than two inserts of unlaminated prime material for attaining desired height, not more than one vertical splice in every three square feet of top surface area, except for T's and U's, but not more than two vertical splices regardless of top surface area excluding those permitted for T's and U's, and not more than one vertical splice in every three linear feet of vertical side-walls or in lieu thereof in each corner, excepting side-walls that are irregular in contour in which case the number of splices shall be subject to the approval of the labor department. (b) "Molded latex foam rubber." The use of this term may be applied to a latex foam rubber product which has been molded in the form in which it is intended to be used. (c) "Latex foam rubber pieces." This term shall apply to a latex foam rubber product which consists of mere pieces or otherwise fails to conform to the requirements for "foam rubber," but shall not apply to foam rubber which has been sub-

jected to a shredding process. (d) "Cemented latex foam rubber pieces." The use of this term may be applied to latex foam rubber pieces which have been cemented together. (e) "Shredded latex foam rubber." This term shall be applied to latex foam rubber which has been subjected to a shredding process. (f) "Cemented shredded latex foam rubber." This term may be applied to shredded foam rubber which has been cemented together.

(4) The term "foam" without the word "rubber" means a polymerized material consisting of a mass of thin-walled cells produced chemically or physically and such non-rubber shall be designated on the tag as "foam," together with the name of the organic base from which it is made, e.g., "urethane foam," "vinyl foam."

(5) The term "urethane foam" or "polyurethane" may be applied to a cellular urethane product which is created by the interaction of an ether or an ester and a carbamic acid derivative. If the foam is of the ether type, it may be designated as "polyether foam." If the foam is of the ester type, it may be designated as "polyester foam."

(6) The term "polystyrene foam" shall be applied to foam produced during the polymerization of a styrene monomer.

(7) The term "vinyl foam" shall be applied to a foam produced from vinyl.

(8) The term "molded" may precede the terms set forth above whenever such foam product has been made in a mold in the shape in which it is intended to be used.

(9) The term "pieces" follows the terms set forth in subdivision (4) of this subsection whenever the foam product consists of mere pieces or otherwise fails to conform to the requirements set forth in subdivision (3) above, but does not apply to a foam product which has been subjected to a shredding process.

(10) The term "shredded" shall precede or follow the terms set forth above whenever the foam product has been subjected to shredding process.

(11) The term "cemented" shall be applied to a shredded foam which has been cemented together, e.g., "cemented shredded urethane foam."

(12) When a fabric-topped foam product or sponge used as a cover for an article of bedding is in excess of ten per cent of the weight of the entire filling material, it shall be disclosed on the tag and its percentage given.

(13) The term "polyester foam" means a foam produced by a polymerized reaction product of esters (i.e., a compound formed by the replacement of the acid hydrogen of an acid, organic or inorganic, by a hydro-carbon radical).

(14) The term "polyether foam" means a foam produced by a polymerized reaction product of ethers (i.e., hydro-carbons in which one or several hydrogen atoms are replaced by alkoxy groups).

(g) **Synthetic fibers.** (1) "Acetate fiber" is a specific term used for man-made fibers, monofilaments and continuous filament yarns composed of acetylated cellulose, with or without lesser amounts of non-fiber-forming material. The term "acetate fibers" or the term "cellulose acetate fibers" shall be used for filling materials made of acetate.

(2) The term "rayon fiber" is a generic term for man-made fibers, monofilaments and continuous filament yarns composed of regenerated cellulose, with or

without lesser amount of non-fiber-forming materials. The term "rayon fibers" shall be used to designate man-made fibers composed of regenerated cellulose.

(3) Synthetic fibers (other than acetate and rayon). When different long-chain synthetic polymers and/or copolymers are joined either chemically or physically to form a filament or fiber, a disclosure of the polymers and/or copolymers contained therein shall be made in the descending order of their percentage in the fiber by weight, e.g., "polystyrene fibers," "vinyl-acrylic fibers."

(4) The term "acrylic fibers" shall be used for a long-chain synthetic polymer which contains not less than eighty-five per cent acrylonitrile and which is formed into a filament.

(5) "Azlon fiber" is a generic term for fibers or filaments manufactured from modified proteins or derivatives thereof, with or without lesser amounts of non-fiber-forming materials. The term "azlon fiber" or "protein fibers" shall be used to designate fibers manufactured from azlon.

(6) "Nylon fiber" is a generic term for any long-chain synthetic polymeric amide which has recurring amide groups as an integral part of the main polymer chain, and which is capable of being formed into a filament in which the structural elements are oriented in the direction of the axis. The term "nylon fibers" shall be used to designate fibers manufactured from nylon.

(7) The term "polyethylene fibers" shall be used to designate fibers made from polymers and/or copolymers of ethylene.

(8) The term "polyester fiber" means a fiber produced by a polymerized reaction product of esters (i.e., a compound formed by the replacement of the acid hydrogen of an acid, organic or inorganic, by a hydrocarbon radical).

(9) The term "polyether fiber" means a fiber produced by the polymerized reaction product of others (i.e., hydrocarbons in which one or several hydrogen atoms are replaced by alkoxy groups).

(10) The term "polystyrene fiber" shall be applied to the fibers resulting from the polymerization of styrene monomers.

(11) The term "polyvinylidene fiber" means fibers produced by the copolymer of vinylidene chloride and other monomers.

(12) The term "vinyl" shall be applied to homopolymers or copolymers of vinyl chloride.

(13) The term "vinyl fibers" shall be used to designate fibers or filaments manufactured from vinyl.

(h) Miscellaneous filling materials.

(1) "Cat-tail plant fibers" shall be so designated on the tag.

(2) "Cellulose and/or wood fiber" means fibers reduced from wood or other vegetable growth to a cellulose or fibrous state, and shall be described as "cellulose fiber" or "wood fiber."

(3) "Coco husk fiber" means the fibrous growth obtained from the husk of the cocoanut.

(4) "Excelsior" means shredded threadlike wood fibers, and shall not include waste products such as shavings, sawdust or similar waste.

(5) "Flax tow" means the coarse, broken and refuse parts of flax separated from the fine fibrous parts in preparing the fibers for spinning.

- (6) "Fur fiber" means the fine, soft under fur, with or without the usual guard hair, removed from the tanned or untanned pelt of animals of the class of furbearers. The name of the animal may be stated and when so indicated on the label shall be a true statement.
- (7) "Glass fiber" means the very fine filaments or fibers made of glass.
- (8) "Hay" means any grass, properly dried or cured, free from dust, burrs, sticks or other objectionable material.
- (9) "Jute fiber" means the fiber derived from any species of the *Corchorus* plant.
- (10) "Jute tow" means the broken and refuse parts of jute separated from the fibrous parts in preparing the fibers for spinning.
- (11) "Kapok" means the mass of fibers investing the seed of the Kapok trees (*Ceiba Pentandra*). Any additional term descriptive of the geographical origin or of the quality of such fibers shall be a true statement when set forth on the tag.
- (12) "Milkweed fiber" means the surface fiber from the inside of the seed pods of milkweed plants (*Asclepias*).
- (13) "Moss" means the vegetable fibers processed from the moss growth found in swamps and on trees.
- (14) "Palm fiber" means the fibrous material obtained from the leaf of a palm, palmetto or palmyra tree.
- (15) "Silk fiber" means silk filaments or fibers, including the by-products of any manufacturing or preparing operation up to but not including spinning.
- (16) "Sisal fiber" means the leaf fiber derived from the "*Agave Sisalana*" and similar species of Agaves.
- (17) "Sisal fiber tow" means the residual fibers left after the extraction of the spinnable sisal fiber from the leaf. For the purpose of these regulations, this includes the products known as "Bagassi." It shall not contain over three per cent pulp.
- (18) "Fiber pads" means a fiber interwoven or punched on burlap or any other woven material or otherwise fabricated into a pad, and when the term "fiber pad" is used, the name of the fiber as herein defined shall be included.
- (19) "Tula fiber" means the leaf fiber derived from the "*Tula Istle*" and similar species of agaves.
- (20) "Straw" means the stalk or stem of grain, such as wheat, rye, oats, rice, and the like, after threshing. The kind of straw may be stated, but when indicated shall be a true statement. It shall be free from beards, chaff, bristles, husks, glumes, dirt or extraneous matter.
- (21) "Sea grass" means any material obtained from maritime plants or seaweeds.
- (22) "Shoddy" means any material created from the processing of secondhand materials, clothing or used rags.

Sec. 19-423-9. Cleansing and sterilization of materials required. The bedding and upholstered furniture laws require the cleansing and sterilization of all articles and materials that have become soiled or contaminated in any manner or that come from an animal or fowl or that are infested with germs of any kind or that are unsanitary or that are second-hand. This provision includes all mill wastes, scraps, clippings and other wastes of manufacture which have become soiled or contam-

inated by falling upon the floor or in any other manner. All sterilization shall be in full compliance with the specifications regarding sterilization promulgated under the authority of section 19-423 of the general statutes.

(Sec G.S. § 19-420 (a), (b), (f).)

Sec. 19-423-10. Sterilization permit. Each person who undertakes to do sterilizing work shall secure a sterilization permit which requires a detailed description of the processes to be employed and the payment of a twenty-five dollar license fee.

(Sec G.S. § 19-420 (m).)

Sec. 19-423-11. Records of permit holders. Each person to whom a sterilization permit is issued shall keep an accurate record of the name and address of each person other than the holder of such permit for whom sterilization is done, together with the kind and amount of articles and/or materials sterilized and the date of such sterilization. All records shall be open at all times during business hours for examination by the commissioner or by inspectors of the department, and certified copies of such records shall be furnished to the department not later than the fifth of each month, covering the preceding month.

(Sec G.S. § 19-420.)

Sec. 19-423-12. Sterilization in own plant or by permit holder. Cooperative sterilization plants. (a) A maker or vendor of second-hand articles or materials, or new materials that have been contaminated, may sterilize such articles or materials in his own approved plant or have them sterilized by any concern having a sterilization permit. The permit number of the approved process shall be printed or stamped on each tag attached to any sterilized article or material.

(b) Persons who do a small amount of business in remaking, renovating or selling second-hand furniture may not wish to set up a sterilization plant and to pay the twenty-five dollar annual fee for a sterilization permit. Such small operators and dealers may get sterilization done by a commercial plant or may band together to set up a cooperative sterilization plant to take care of their needs.

Sec. 19-423-13. Sterilization of new materials of animal origin. Any process used for cleaning and curing feathers, cleaning and curling hair, cleaning wool, or cleaning or curing any other material derived from an animal or fowl, shall not be deemed to afford proper and thorough sterilization unless such process effectually removes all disease spores, germs and bacilli, all insects and insect nits, all animal matter subject to decay and all manner of dirt and filth.

(a) **New feathers.** Application for a sterilization permit shall show that feathers are thoroughly washed and rinsed and that live steam and dry heat are applied. The product shall pass all tests for cleanness and freedom from nits and germs.

(b) **New hair.** Application for a sterilization permit shall show the entire process used for washing and curling (if curled) and that at some point during the process the hair remains in live steam or boiling water a sufficient period to kill all dangerous spores and germs.

(c) **New wool.** Application for a sterilization permit shall indicate whether raw wool or previously scoured and carbonized wool is to be treated. Processes for raw wool shall be set forth in detail and indicate that the wool has been subjected to steam or boiling water for a sufficient time to kill all dangerous spores and germs.

(See Reg. 19-423-18.)

Sec. 19-423-14. Sterilization of second-hand articles and materials. The law requires that all second-hand articles or materials of bedding or upholstered furniture shall be sterilized and properly labeled before they are offered for sale or returned to the owner to be offered for sale or to be used by him in any way. This provision is necessary for the protection of those who remake and renovate such articles and materials, as well as those who use them. Each such sterilized second-hand article or material shall bear a yellow tag giving the materials, the date of sterilization and the name of the vendor or owner.

(See G.S. § 19-420.)

Sec. 19-423-15. Sterilization before use. All second-hand materials and all new materials which have been exposed to contamination shall be sterilized before being put through a picker or a garnetting machine.

Sec. 19-423-16. Renovation of second-hand furniture.

(a) **Furniture renovated or remade.** Each complete article of furniture shall be sterilized before being renovated or remade. If sterilization by steam or chemical spray would spoil the finish on the frame of an article of upholstered furniture, sterilization may be done by applying the sterilizing agents by hand. The frame, when so sterilized, shall be labeled with a yellow tag stating that the frame is second-hand. New springs and new filling materials attached as a part of the frame shall be designated as new on the yellow tag attached to the frame. Each cushion, pillow or other separate part, made entirely of new materials, shall be labeled with a white tag stating that such part is new and giving the kinds and percentages of all filling materials.

(b) **Coverings or filling materials reused.** All coverings and filling materials which are to be used again in renovating or remaking any article of furniture shall be sterilized by steam, hot air or approved chemical agents. Fine fabrics which would be spoiled by wetting may be sterilized by hot air. All coverings or filling materials, so sterilized, shall be labeled as second-hand when resold.

Sec. 19-423-17. Storage of unsterilized articles. All unsterilized second-hand articles or materials shall be separately stored and completely segregated from new or clean articles or materials. No new or clean materials shall be kept or stored within a room or space used for sterilizing second-hand materials. Sterilizing chambers shall not be used for storage purposes.

Sec. 19-423-18. Sterilization processes. "Sterilization," in reference to chapter 357 of the general statutes, means the destruction of all bacilli and spores of bacilli as well as insects and insect eggs (nits). Only those processes and agencies which destroy all disease germs, insects and insect eggs shall be accepted as effective sterilization processes or agencies under the law. There are five effective sterilization processes recognized: (1) Live steam under pressure; (2) live steam streaming from a boiler carrying not less than fifteen pounds pressure; (3) boiling water; (4) hot air, and (5) caustic solution of standard strength for sterilizing metal articles and parts. The types of apparatus and processes described below are accepted sterilizers and, when shown to be effective, shall be approved by the commissioner.

(a) **Steam pressure.** The most efficient process of sterilization is the steam pressure process when properly applied. Live steam, applied in a steam tight chamber from which the air has been expelled, so as to penetrate to all parts of any article or material treated, and maintained at a pressure of at least fifteen pounds

per square inch and a temperature of at least 250°F. at the point of lowest temperature for a period of not less than thirty minutes is an effective sterilizer. If the pressure is maintained at twenty pounds per square inch, the time of treatment may be reduced to twenty minutes. The articles or materials treated shall be placed on racks so as to allow free access of steam to all surfaces and parts. Materials treated shall not be compacted or compressed to a density greater than that of ordinary cotton felt used for filling material. The sterilizing chamber shall be strong enough to withstand the pressure indicated and shall be equipped with a standard steam gauge plainly visible at all times from the working floor. Temperature control shall be maintained by means of a recording temperature gauge. A Diac sterilizer control or equally effective control may be used until a recording temperature gauge can be installed.

(b) **Streaming steam.** A stream of live steam applied to articles or materials in the condition described above is acceptable as a sterilizing process, provided the steam shall have a temperature of at least 212°F. and shall be applied for a period of not less than three hours. Streaming steam may be used in two applications of one and one-half hours each with an interval of six hours but not more than twenty-four hours between each application. The steam chamber shall be steam tight with outlet valves at top and bottom which shall be kept open to prevent pressure in the chamber. Condensed steam shall be drawn off.

(c) **Boiling water.** Boiling water is acceptable as a sterilizing process if uncompacted materials are immersed in it for a period of not less than two hours.

(d) **Hot air.** Hot air may be accepted as a sterilizer under proper conditions although it is not as effective as steam or boiling water. A hot air sterilizing process to be approved by the commissioner shall safely produce a temperature of 250°F. at the point of lowest temperature in the chamber. Temperature shall be automatically controlled and shall be maintained for a period of at least two and one-half hours. Temperature shall be generated by means of properly guarded electric heating units or by steam pipes carrying live steam. An indirect gas heating system may be used if the material cannot be ignited by the gas flame. Hot air may be used for sterilizing material which is not compressed to a degree in excess of the customary compression of cotton felt. Articles shall be so spaced as to allow free circulation of hot air.

(e) **Caustic soda.** For sterilizing second-hand metal used in springs, cribs, cots, etc., the commissioner will approve a caustic solution of one-half pound of caustic soda (76% sodium hydroxide) to each gallon of water. The solution shall be used in a tank impervious to the action of the solution and of sufficient size to permit the complete submersion of material. Metal shall remain in a cold solution for a period of at least twenty-four hours but, if the solution is kept at the boiling point, this period may be reduced to three hours. In using such caustic process, all plugs and obstructions shall be removed so as to permit free passage of the solution to the inside of all tubing and to all other parts. After sterilization all metal articles shall be thoroughly washed with clean water until all of the caustic solution is removed.

(f) **Chemical sterilization.** An approved chemical germicide may be used under proper conditions.

Sec. 19-423-19. Chemical sterilization: Temperature of sterilization room or chamber. Chemical reactions are hastened and made more complete by high

temperatures. For the most satisfactory sterilizing results, a temperature range of 75° to 110° is desirable. In no case should the temperature be allowed to fall below 75°F. during the period of sterilization.

Sec. 19-423-20. Period of exposure for complete destruction of bacteria, spores, insects and insect eggs. The period of exposure for complete chemical sterilization is arrived at by adding to the time required to destroy germs by formaldehyde one-half the time required by any given insecticide to kill insects and insect eggs. In no instance shall the total time for complete sterilization be less than the time required by the given insecticide to kill all insect life. The periods of exposure required for complete sterilization with formaldehyde and each of the listed insecticides are given below. The temperature in all cases shall be not less than 75°F.

(a) **Ethylene oxide and carbon dioxide ("carboxide").** If three pounds of this chemical mixture per one thousand cubic feet are used, the exposure time shall be one-half of twelve hours exposure to the insecticide, plus ten hours exposure to formaldehyde, a total of sixteen hours. If five pounds per one thousand cubic feet are used, the time of exposure shall be one-half of eight hours for the insecticide plus ten hours for formaldehyde or fourteen hours all told.

(b) **Hydrocyanic acid gas.** To be used only by licensed operatives. Exposure time for hydrocyanic acid gas, six hours plus ten hours for formaldehyde or sixteen hours all told.

(c) **Methyl formate and carbon dioxide ("malium").** Six hours plus ten hours, total sixteen hours.

(d) **Ethylene dichloride and carbon tetrachloride.** Fourteen hours plus ten hours, total twenty-four hours.

(e) **Carbon tetrachloride.** Fourteen hours plus ten hours, total twenty-four hours.

(f) **Sulphur dioxide.** Ten hours plus ten hours, total twenty hours.

(g) **Dichloro-diphenyl-trichloroethane (DDT).** Six hours plus ten hours for formaldehyde treatment, total sixteen hours.

(For quantities of chemicals, see Regs. 19-423-23, 19-423-24.)

Sec. 19-423-21. Steam, water and hot air as sterilizers. Live steam under pressure, live streaming steam, boiling water, and hot air at a temperature of not less than 212°F. are both germicides and insecticides. All articles and materials which are susceptible of treatment by any of these methods need no further treatment to render them free of all germs and insect life. Dry hot air is not so effective as steam or boiling water in killing either germs or insects. Hence, hot air chambers shall be kept at 250°F. for a period of two and one-half hours to insure complete sterilization. Steam at pressure of fifteen pounds per square inch giving a temperature of 250°F. is effective with an exposure of thirty minutes; at pressure of twenty pounds (temperature of about 300°), the time is twenty minutes. Streaming steam at a temperature of not less than 212°F. is fairly effective with an exposure of three hours. Boiling water is effective with two hours of exposure.

Sec. 19-423-22. Maintenance of apparatus. All rooms, chambers, containers, autoclaves, tanks, boilers, ducts, valves, gauges, heaters and all auxiliary equipment necessary or incidental for the proper sterilization of articles, filling materials or

metal shall be clean and maintained at all times in good repair and in proper working condition.

Sec. 19-423-23. Fumigation: Germicides. (a) Formaldehyde is in common use and is accepted as a germicide (not an insecticide). The commissioner shall permit the use of a proper formaldehyde process until further notice, provided this process is used in conjunction with an approved insecticide process. (See section 19-423-20.)

(b) When approved by the commissioner, formaldehyde gas in the presence of moisture may be used for treating either loose materials or complete articles when the filling is not compressed to a degree in excess of the usual compression of cotton felt. Articles shall be so spaced as to allow free circulation of gas. The exhaust from the sterilizing room or cabinet shall be carried by a duct or a chimney flue extending above the roof of the building.

(c) Formaldehyde gas generated from one pint of formaldehyde solution (United States Pharmacopoeia standard) for each one thousand cubic feet of space in the sterilizing chamber is acceptable. Materials shall be treated with formaldehyde gas and moisture for at least ten hours. The minimum quantity of solution permitted is two ounces, regardless of how small the sterilizing chamber is. The solution shall be heated or boiled to release the gas. The safest and most convenient way to do this is to add to the solution one-half its weight of potassium permanganate. This boils the solution and releases the gas. To avoid boiling over, the mixing should be done in a large pail. The gas shall be disseminated throughout the chamber so as to reach all parts of the materials treated. Sufficient moisture in the chamber may be produced by thoroughly sprinkling the floor of the chamber with warm water before commencing to sterilize. The room shall be gas tight and equipped with air inlet and outlet. (An exhaust fan will greatly facilitate the removal of dead gases and fumes after sterilization is completed.) Tight closure gates or valves shall be provided for both inlet and outlet. Shelves shall be of lattice construction. This process is not suitable, and shall not be approved, for complete sterilization of any materials or articles. For complete sterilization, an approved insecticide shall be used in addition to formaldehyde.

Sec. 19-423-24. Fumigation: Insecticides. The following substances and processes are approved as insecticides for use with formaldehyde or any accepted germicide.

(a) **Ethylene oxide and carbon dioxide: "Carboxide."** A mixture of one part ethylene oxide at ordinary temperatures is a colorless gas with a faint odor of ether. At 50°F. it is a mobile colorless liquid. Concentrated vapors of ethylene oxide are inflammable or explosive. To overcome the fire and explosion hazard, carbon dioxide is added. This eliminates these hazards and about doubles the toxicity of the ethylene oxide gas to insects. Ethylene oxide gas penetrates deeply into articles and materials of bedding and upholstery and destroys insects and insect eggs effectively. It is not very toxic to man. "Carboxide" gas is nonexplosive and noninflammable and does not injure fabrics or furniture. The materials to be treated shall be placed in a gas tight chamber on open lattice racks so as to allow the free access of the gas to the materials. The gas should be released into the chamber in the form of a mist or spray. Three pounds of ethylene oxide-carbon dioxide (or "carboxide") per one thousand cubic feet in a gas tight chamber at a temperature of 75°F. will destroy insects and insect eggs in twelve hours; five pounds per one thousand cubic feet is effective in eight hours.

(b) **Hydrocyanic acid gas.** This gas is very dangerous as it is deadly poisonous to man and should be used only by expert operators, licensed by the local health authorities. (See Reg. 19-423-29.)

(c) **Methyl formate and carbon dioxides: "Malium."** This is a noninflammable liquid consisting of fifteen parts methyl formate and eighty-five parts carbon dioxide by weight. Have air tight room, except for vent pipe to go above roof. Release gas by connecting cylinder to a manifold outside the room with a discharge pipe to the inside room. Moisture in the room is undesirable. Keep the temperature in room at not less than 75°F. Means shall be provided for exhausting vapors after fumigation. Outlet should be above roof. Clear the room of gas before opening the door after fumigation.

(d) **Ethylene dichloride and carbon tetrachloride.** This is a noninflammable liquid mixture of seventy-five per cent of the former and twenty-five per cent of the latter by volume. Ethylene dichloride is inflammable, but the mixture with carbon tetrachloride is not. Use a gas tight room. Place liquid in a shallow trough not more than two and one-half inches deep. Hang it about eighteen inches below the ceiling. The gas is heavy and travels downward. Use not less than fourteen pounds (five quarts) per one thousand cubic feet of air space in the room. Keep the temperature of room at not less than 75°F, nor more than 90°F. Moisture in the room is undesirable. Means shall be provided for exhausting vapors after fumigation. Outlet should be above the roof. Clear the room of gas before opening the door after fumigation.

(e) **Carbon tetrachloride.** Carbon tetrachloride is a thin, transparent, colorless, noninflammable liquid with an odor like chloroform. It is used as a fire extinguisher. Use an air-tight room equipped with a ventilating pipe which leads to a point above the roof. Have a gas-tight valve in the vent pipe. Place the tetrachloride in an open shallow pan at the top of the room. The gas is heavy and travels downward. The liquid evaporates on exposure to air. Use eight pounds per one thousand cubic feet of room space. Keep the temperature of the room at not less than 75°F. Clear the room of gas before opening the door after fumigation.

(f) **Sulphur dioxide.** This is sulphur fumes. The cheapest and simplest method of producing these fumes is the "pot" method. Use broad, shallow pots to assure rapid production of fumes. Use enough pots so that sulphur may be spread to a thickness of not more than two inches. Provide alcohol to start the sulphur burning. Provide a gas-tight room with fresh air inlet and exhaust pipe to outer air above the roof. Have tight valves in each pipe. Use one pound of sulphur to each one thousand cubic feet of room space. There is danger of fire from burning sulphur. Set the pots on brick or metal supports in a large pan of water. These fumes have a bleaching effect and also will tarnish metal. To light the sulphur quickly, sprinkle with alcohol and throw a lighted match in the pot. Keep the room dry—moisture is undesirable during fumigation. Clear the room of gas after the fumigation period before opening room door.

Sec. 19-423-25. Application of insecticides and germicides. Approved insecticides and germicides may be applied in either of two ways: (1) They may be applied in the form of a gas generated in a properly constructed gas tight vault or chamber; or (2) they may be applied with an approved spraying device.

Sec. 19-423-26. Temperature of germicides and insecticides. Any chemical germicide or insecticide acts more quickly and effectively at high temperatures. A

temperature range from 75°F. to 110°F. is desirable. In no case shall the temperature be allowed to fall below 70°F.

Sec. 19-423-27. Use of gas. If sterilization or fumigation is to be effected with gas, a properly constructed gas tight vault or chamber shall be installed.

Sec. 19-423-28. Formaldehyde gas. If formaldehyde is applied in gaseous form, the full strength standard U. S. Pharmacopoeia solution shall be used undiluted. The formaldehyde gas is generated by boiling this solution. The most satisfactory way of generating the formaldehyde gas is to add one-half its weight of potassium permanganate.

Sec. 19-423-29. Poisonous gas. Those who desire to use hydrocyanic gas or any other poisonous gas as an insecticide shall secure the approval of the local health officers before installing the chamber or vault for the use of such processes.

Sec. 19-423-30. Spraying. (a) Certain insecticides may be applied by direct spray or mist spray methods. When these insecticides are effective, they may be approved and used. The germicides and insecticides listed in these specifications are intended merely to indicate the properties and types of chemicals and processes requisite for proper sterilization. The list is not intended to be complete. Any germicide or insecticide not on the list which shall be shown to destroy germs or insects effectively under reasonable conditions without involving any serious hazards will be approved by the commissioner and added to the list.

(b) Two methods of applying chemical germicides and insecticides by means of a spray are permissible: (1) Direct spraying. The material or article shall be placed in a separate, closed room or chamber which shall be quite tight, but need not be gas tight. Either a good hand sprayer or a power sprayer may be used to spray the chemicals on the materials or articles. The materials or articles shall be thoroughly wetted with the chemical solution on all surfaces. The amount of chemicals used shall be approximately the same as would be required in the fumigation process for the same materials or articles; (2) The mist spray method. A gas-tight chamber shall be used. The chemicals are released from container tanks and are sprayed into the sterilizing chamber by an atomizer spray in the form of a mist. The amount of chemicals used shall be the same as that required for the same articles to be sterilized by fumigation.

(c) When germicide or insecticide is applied with a spray, a separate room shall be provided and isolated from other parts of the establishment. The material or article shall be thoroughly sprayed over all surfaces and in all crevices and corners.

Sec. 19-423-31. Formaldehyde spray. (a) If formaldehyde is applied with a spray, the standard U. S. Pharmacopoeia solution shall be diluted with three parts of water to one part of solution. This gives a ten per cent formaldehyde solution which is sufficient to kill all active germs which come in contact with the solution. (This ten per cent solution will not injure or fade fabrics.)

(b) If formaldehyde solution is applied with a spray, the operator shall wear rubber gloves and a mask to protect hands and eyes against the irritating effects of this solution.

Sec. 19-423-32. "Off sale" articles. The commissioner or a representative of the commissioner may order "off sale" and so tag any article of bedding, upholstered furniture or material therefor not tagged or labeled as required by these regulations or which in any other respect does not conform with the requirements of statute or regulation issued under the authority thereof, and may take such other action as may be authorized by statute. No article or material so ordered "off sale" shall be sold or used, nor shall such materials or articles or contents thereof be altered or removed in whole or part, until such articles or materials are released by the commissioner or his authorized representative and the "off sale" tag removed. All articles or materials ordered "off sale" are subject to frequent examination and shall be so placed as to be readily accessible at all times for examination upon demand of the commissioner or his authorized representative.

DELAWARE

INFORMATION CONCERNING THE BEDDING LAW OF THE STATE OF DELAWARE

1. The bedding law applies to articles used primarily for sleeping purposes such as mattresses, pillows, sleeping bags, comforters or play pen pads. See Section 2101 of the attached copy of the law.
A Delaware registry number and stamps are not required for articles such as upholstered chairs, chair cushions, car seat cushions, upholstered headboard of hollywood type beds, or decorative pillows.
2. The following information must be submitted to the Division of Sanitary Engineering, State Board of Health, Dover, Delaware:
 - a. A completed copy of Form SE-15 which has been signed by an authorized representative of the company.
 - b. Two copies of the bedding tag which is described in Section 2106 of Chapter 21, Title 16, Delaware Code.
 - c. A check or money order in the amount required for the number of stamps requested.
3. We do accept the uniform registry number from other states providing the number appears on the printed cloth bedding tag.
4. The adhesive stamps are sold in lots of not less than 1,000 at a cost of \$15.00 per 1,000. See Section 2107 of the Bedding Law. The regulations of the State Treasurer's office prohibit the refund of any money for unused stamps.
5. Information, approval of bedding tags, the issuance of stamps and of registry numbers is done by the Division of Sanitary Engineering, State Board of Health, Dover, Delaware.

CHAPTER 21. MATTRESSES, PILLOWS AND BEDDING

Sec.

2101. Definitions.
2102. Sterilization and disinfection of materials.
2103. Permit for sterilization, disinfection, etc.; requirements for issuance; fee.
2104. Inspection of premises.
2105. Selling or leasing used mattresses, etc.; sterilization and disinfection.
2106. Tagging; regulations and prohibitions.
2107. Registration and registry numbers; issuance and fee for stamps.
2108. Adhesive stamps.
2109. Failure to attach adhesive stamps.
2110. Disposition of fees.
2111. Inspection of products and plants of non-residents.
2112. Enforcement; rules and regulations.
2113. Violations and penalties; appeals.
2114. Revocation of permit.

§ 2101. Definitions

As used in this chapter, unless the context requires a different meaning—

"Comfortable" means any cover, quilt, or quilted article made of cotton, or other textile material, and stuffed or filled with fiber, cotton, wool, hair, jute, feathers, feather down, kapok or other soft material.

"Mattress" means any quilted pad, mattress, mattress pad, mattress protector, bunk, quilt or box spring, stuffed or filled with excelsior, straw, hay, grass, corn husk, moss, fiber, cotton, wool, hair, jute, kapok or other soft material, to be used on a couch or other bed for sleeping purposes.

"New" means any material or article which has not been previously manufactured or used for any purpose.

"Pillows," "bolster," or "feather-bed," mean any bag, case or covering made of cotton or other textile material, and stuffed or filled with excelsior, straw, hay, grass, corn husks, moss, fiber, cotton, wool, hair, jute, feathers, feather down, kapok or other soft material to be used on a bed or other article for sleeping purposes.

"Second-hand" means any material or article of which prior use has been made.

"Shoddy" means any material which has been spun into yarn, knit or woven into fabric, and subsequently cut up, torn up, broken up or ground up.

HISTORY AND SOURCE OF LAW

Derivation:

Code 1935, § 874.

Code 1915, § 824A, as added 36 Del. Laws, Ch. 102.

Revision Note:

Provision of section 874 of Code 1935, defining "person" as including persons, corporations, copartnerships and associations, was omitted as covered by section 302 of Title 1, General Provisions, which contains a general definition of "persons".

Provision of such section 874, relating to words used in singular number as including the plural and the plural the singular, was omitted as covered by section 304 of Title 1, General Provisions, which contains a general provision to the same effect.

§ 2102. Sterilization and disinfection of materials

No person shall employ or use in the making or renovating of any mattress, pillow, bolster, feather-bed or comfortable (1) any material known as "shoddy" or any fabric or material from which shoddy is constructed; (2) any second-hand material; (3) any new or second-hand feathers, unless such shoddy, second-hand material or new or second-hand feathers have been sterilized and disinfected by a reasonable process approved by the State Board of Health.

HISTORY AND SOURCE OF LAW

Derivation:

Code 1935, § 875.

Code 1915, § 824B, as added 36 Del. Laws, Ch. 102.

§ 2103. Permit for sterilization, disinfection, etc.; requirements for issuance; fee

(a) Any person engaged in the making, remaking or renovating of any mattress, pillow, bolster or comfortable in which second-hand material is used, or in the making of any new or second-hand feather or down-filled article or engaged in sterilizing and disinfecting any material, feathers, or article coming under the provisions of this chapter shall submit to the State Board of Health for approval a reasonable and effective process, together with duplicate plans of apparatus or auxiliary devices, for the sterilization and disinfection of second-hand material, feathers and second-hand articles enumerated in this section.

(b) Upon the approval of the process for sterilization and disinfection, a numbered permit for its use shall be issued to the applicant by the State Board. Such permit shall expire one year from date of approval and issue. Every person to whom a permit has been issued, shall keep such permit conspicuously posted in his office or place of business. Refusal to display such permit in accordance with this chapter shall be sufficient reason to revoke and forfeit the permit.

(c) For all permits issued as required by any provision of this chapter (not including, however, by the term "permits," the "tags" otherwise referred to in this chapter), there shall at time of issue thereof, be paid by the applicant to the State Board a fee of \$50.

(d) Nothing in this section shall prevent any person engaged in the making, remaking, renovating or sale of any article described in this section, which requires sterilizing and disinfecting under the provisions of this section, from having such sterilizing and disinfecting performed by any person to whom a permit for such purposes has been issued, provided the number of the permit shall appear in the statement on the tag attached to the article.

HISTORY AND SOURCE OF LAW

Derivation:

Code 1935, § 876.

Code 1915, § 824C, as added 36 Del. Laws, Ch. 102.

§ 2104. Inspection of premises

All places where any mattress, pillow, bolster, feather-bed or comfortable is made, remade, or renovated, or where materials for articles named in this section are prepared, or establishment where the articles are offered for sale, or are in possession of any person with intent to sell, deliver, or consign them, or establishment where sterilizing and disinfecting is performed, shall be subject to inspection by the State Board of Health to ascertain whether the materials and the finished articles enumerated in this section conform to the requirements of this chapter.

HISTORY AND SOURCE OF LAW

Derivation:

Code 1935, § 877.

Code 1915, § 824D, as added 36 Del. Laws, Ch. 102.

§ 2105. Selling or leasing used mattresses, etc.; sterilization and disinfection

No person shall sell, lease, offer to sell or lease, or deliver or consign in sale or lease, or have in his possession with intent to sell, lease, deliver, or consign in sale or lease, (1) any mattress, pillow, bolster, feather-bed or comfortable, made, remade, or renovated in violation of this chapter, (2) any second-hand mattress, pillow, bolster, feather-bed; or comfortable, unless since last used it has been thoroughly sterilized and disinfected by a reasonable process approved by the State Board of Health.

HISTORY AND SOURCE OF LAW

Derivation:

Code 1935, § 878.

Code 1915, § 824E, as added 36 Del. Laws, Ch. 102.

§ 2106. Tagging; regulations and prohibitions (amended 1953)

(a) Each and every mattress or article covered by this chapter, other than a feather or down-filled pillow, bolster, bed or comfortable, shall bear securely attached thereto and visible on the outside covering a substantial cloth tag, upon which shall be plainly and indelibly stamped or printed, in English, (1) a statement showing the kind of materials used in filling the mattress or article and whether the materials used in filling are wholly new or second-hand or partly second-hand; (2) the word "second-hand" upon any article of which prior use has been made; (3) the number of the permit issued for sterilizing and disinfecting; (4) the registry number used in applying and enforcing the tagging, inspection and adhesive stamp provisions of this chapter.

(b) Each and every pillow or other article covered by this chapter, in which feathers or down are used, shall bear securely attached thereto and visible on the outside covering a substantial cloth tag, upon which shall be plainly and indelibly stamped or printed in English (1) a statement that the feathers or down have been sterilized and disinfected in accordance with this chapter; (2) the number of the permit issued for sterilizing and disinfecting the feathers or down; (3) the word "second-hand" upon a feather or down-filled article of which prior use has been made; the registry number used in applying and enforcing the tagging, inspection and adhesive stamp provisions of this chapter. As amended 49 Del. Laws, Ch. 269, §§ 1, 2, eff. July 6, 1953.

* * * * *

1953 Amendments. Subsec. (a) amended by 49 Del. Laws, Ch. 269, § 1, which added clause (4).

Subsec. (b) amended by 49 Del. Laws, Ch. 269, § 2, which at the end thereof inserted: " ; the registry number used in applying and enforcing the tagging, inspection and adhesive stamp provisions of this chapter".

(c) No additional information shall be contained in the statements. The statement of materials used in filling must be in plain type not less than one-eighth inch in height. The tag required by this chapter to be attached to any article covered by this chapter shall be not less than six square inches in size.

(d) No person shall imitate, counterfeit, sell, or have in his possession any imitated or counterfeited adhesive stamp required under the provisions of this chapter.

(e) The word "felt," or words of like import, if any other than garnetted materials are used in filling, or the words "curled hair," or words of like import, if other than curled hair is used in filling, shall not be used, exclusively, in the statement concerning any mattress, pillow, bolster or comfortable.

(f) No person shall make any false, untrue or misleading statement, term or designation on the tag, or remove, deface, alter or in any manner attempt to remove, deface or alter the tag, or the adhesive stamp required by this chapter, or cause to be removed, defaced or altered any statement on a tag placed upon any article included in the provisions of this chapter.

HISTORY AND SOURCE OF LAW

Derivation:

Code 1935, § 879.

Code 1915, § 824F, as added 36 Del. Laws, Ch. 102.

§ 2107. Registration and registry numbers; issuance and fee for stamps (amended 1955)

The State Board of Health shall, upon application to it by any person entitled thereto, register such applicant, and assign a registry number by which number the applicant shall thereafter be known and designated in applying and enforcing the tagging, inspection and adhesive stamp provisions of this chapter, and thereupon the State Board shall furnish to such applicant adhesive stamps in quantities of not less than 1,000 for which the applicant shall pay \$15 for each 1,000 stamps, which payment and charge shall constitute an inspection charge for the purpose of enforcing this chapter. As amended 50 Del.Laws, Ch. 251, § 1, eff. June 8, 1955.

1955 Amendment. 50 Del.Laws, Ch. 251, increased fee from \$10 to \$15, for each 1,000 stamps.

§ 2108. Adhesive stamps (amended 1953)

The State Board of Health may prepare and cause to be printed adhesive stamps which shall bear a replica of the seal of the State, and such other matter as the State Board shall direct. As amended 49 Del.Laws, Ch. 269, § 3, eff. July 6, 1953.

1953 Amendment. 49 Del.Laws, Ch. 269, struck out "the registry number of the person applying therefor," which followed "seal of the State,".

§ 2109. Failure to attach adhesive stamps

No person shall sell, lease, offer to sell or lease, deliver or have in his possession with intent to sell, lease, deliver or consign any article covered by this chapter, unless there shall be attached to the tag required by this chapter, by the person manufacturing, renovating, sterilizing or offering for sale the same, an adhesive stamp prepared and issued by the State Board of Health, as provided in this chapter.

HISTORY AND SOURCE OF LAW

Derivation:

Code 1935, § 882.

Code 1915, § 824I, as added 36 Del.Laws, Ch. 102.

§ 2110. Disposition of fees

All fees collected under the provisions of this chapter shall be paid to the State Board of Health and, when so paid shall be turned over by the Board to the State Treasurer and credited to the General Fund of the State.

HISTORY AND SOURCE OF LAW

Derivation:

Code 1935, § 883.

37 Del.Laws, Ch. 59, § 1.

Code 1915, § 824J, as added 36 Del.Laws, Ch. 102.

§ 2111. Inspection of products and plants of non-residents

(a) It is the intent of this chapter to prevent both the manufacture and the sale within this State of any of the articles enumerated in section 2105 of this title, except in conformity to and in compliance with the provisions of this chapter. Inasmuch, however, as some of the articles so enumerated may be made, or the material used in the manufacture or renovation thereof may be processed, outside of the limits of this State, it is expressly provided, that where the person so manufacturing any such article or processing any such material shall have or operate his plant outside of the limits of this State, the State Board of Health may, in its discretion, in lieu of a physical inspection of the plant of such non-resident person, satisfy itself by examination of the product made or possessed by such non-resident or by such other means as the State Board deems adequate, of the propriety of issuing to such non-resident, the permit required by the provisions of this chapter, or of renewing or keeping in force a permit so issued.

(b) In the event that at any time the State Board deems it necessary to make physical inspection of any plant or factory of the non-resident, it may require the payment by such non-resident, of such sum as may cover the reasonable traveling charges entailed by such physical inspection, and refuse to issue, or revoke or suspend any permit, until or unless such charges are so paid.

HISTORY AND SOURCE OF LAW

Derivation:

Code 1935, § 884.

Code 1915, § 842K, as added 36 Del.Laws, Ch. 102.

§ 2112. Enforcement; rules and regulations

The State Board of Health, through its officers and employees is charged with the administration and enforcement of this chapter and may take for evidence, at any trial involving violation of this chapter, any article made or offered for sale in violation of this chapter. The State Board shall make and enforce reasonable rules and regulations for the enforcement of this chapter.

The provisions of this section shall be subject to the provisions of chapter 23 of Title 11. If there is any conflict or inconsistency between this section and such chapter, the latter shall prevail.

HISTORY AND SOURCE OF LAW**Derivation:**

Code 1935, § 885.

Code 1915, § 824L, as added 36 Del.Laws, Ch. 102.

Revision Note:

The last paragraph of this section is new. It was added to resolve any possible conflicts between provisions of this section and those of chapter 23 of Title 11, Crimes and Criminal Procedure, which is based on 48 Del.Laws, Ch. 303, and prescribes the procedure to be followed in cases of searches and seizures generally, and provides for the repeal and superseding of all other laws relating thereto.

§ 2113. Violations and penalties; appeals

(a) Whoever violates the provisions of this chapter or the rules and regulations adopted thereunder, shall be fined, for each offense, not less than \$10 nor more than \$50. In default of the payment of such fine he shall be imprisoned for not less than ten days for each separate offense. The total term of imprisonment at any one time for additional offenses shall not exceed ten months.

(b) Each mattress, pillow, bolster, feather-bed or comfortable made, remade or renovated, sold, offered for sale, delivered, consigned, or possessed with intent to sell, deliver or consign, contrary to the provisions of this chapter, shall constitute a separate offense.

(c) Each imitated or counterfeited adhesive stamp made, used, sold, offered for sale, delivered or consigned contrary to the provisions of this chapter shall constitute a separate offense.

(d) Any person convicted of an offense under this section, before a justice of the peace or in any court other than the Superior Court, may appeal the judgment of conviction to the Superior Court of the county.

HISTORY AND SOURCE OF LAW**Derivation:**

Code 1935, § 886.

37 Del.Laws, Ch. 59, § 2.

Code 1915, § 824M, as added 36 Del.Laws, Ch. 102.

Revision Note:

Section is based on first three paragraphs of section 886 of Code 1935. For remainder of such section 886, see section 2114 of this title.

Reference to any offense under such section 886 as a misdemeanor was omitted from this revised section as covered by the general classification of crimes in section 101 of Title 11, Crimes and Criminal Procedure. The phrase "upon conviction thereof" was omitted as surplusage.

The provisions vesting jurisdiction of offenses in the justices of the peace, and the Municipal Court for the City of Wilmington, was omitted as covered by section 114 of this title, and by section 2701 of Title 11, Crimes and Criminal Procedure. See, also, Revision Note under such section 114.

Section 886 of Code 1935 provided merely for "right of appeal to the defendant, as in other cases". In this revised section, the appeal provision was completely rewritten for the same reasons given in Revision Note under section 2504 of this title for rewriting the appeal provision in that section. Insofar as conviction, of an offense under this section, before a justice of the peace is concerned, the right of appeal is also conferred by section 115 of this title.

§ 2114. Revocation of permit

The State Board of Health may revoke any permit issued under the provisions of this chapter, if the person to whom the permit was issued has violated any provisions of this chapter or the rules or regulations established thereunder.

HISTORY AND SOURCE OF LAW**Derivation:**

Code 1935, § 886.

37 Del.Laws, Ch. 59, § 2.

Code 1915, § 824M, as added 36 Del.Laws, Ch. 102.

Revision Note:

Section is based on last paragraph of section 886 of Code 1935. For remainder of such section 886, see section 2113 of this title.

FLORIDA BEDDING LAW

1959

FLORIDA STATE BOARD OF HEALTH
BUREAU OF SANITARY ENGINEERING
JACKSONVILLE 1, FLORIDA

FLORIDA BEDDING LAW

Chapter 556 — Florida Statutes, 1959 as Amended

556.01 **SHORT TITLE.** — This chapter shall be designated the "Bedding inspection law" and the same shall be deemed an exercise of the police powers of the state for the health and welfare of the people of the state.

556.02 **DEFINITIONS.** —

Definitions as used in this chapter:

(1) "Person" shall include all persons, masculine as well as feminine, corporations, partnerships, limited partnerships, societies, individual proprietorships, and voluntary associations; it shall import the plural and the singular, as the case demands.

(2) "Sale", "sell" or "sold" includes offering or exposing for sale or give away or exchange or lease or consigning or delivering in consignment for sale, exchange or lease or holding in possession with like intent. The possession of any article of bedding, or filling materials, as herein defined, by any maker or dealer, or his agent or servant in the course of business, shall be presumptive evidence of intent to sell.

(3) "Bedding" or "article of bedding" includes any mattress, pillow, cushion, quilt, quilted pad, quilted bedspread, comforter, upholstered spring bed, box spring, davenport, daybed or couch, sleeping bag, auto bed, beach pad, chaise lounge pad, bolster, quilted or padded headboard, or any other item containing filling material used or intended for use for sleeping purposes.

(4) (a) "Filling material" includes any hair, down, feathers, wool, cotton, kapok, excelsior, natural or synthetic rubber, synthetic fiber, or any other soft material used in the manufacture of and for filling articles of bedding.

(b) "Processed filling material" shall mean any filling material manufactured, prepared or fabricated by any process for use in the manufacture or renovating of articles of bedding and shall include cotton felt or batting; shredded or garnetted clippings; willowed fibers; wool felt; prepared hair, curled or uncurled, felted or rubberized; prepared feathers and down; natural or synthetic rubber in any form; jute felt; sisal pads, kapok or any similar materials.

(5) The term "new" shall refer to and mean any article of bedding or filling material which has not been previously used for any purpose; provided, however, that manufacturing processing shall not be considered a previous use.

(6) The term "used" shall refer to and mean any article of bedding or filling material or portion thereof of which a previous use, other than subjecting the same to manufacturing processing has been made.

(7) "Manufacture", "making", "make", or "made" includes altering, repairing, finishing or preparing articles of bedding or fill-

ing materials for sale, including remaking or renovating when done by any person except the owner.

(8) Whenever in this chapter the singular is used the plural shall be included and where the masculine gender is used the feminine and neuter shall be included.

(9) The word "shoddy" shall mean garnetted or shredded clippings when made in whole or in part from old or worn rags, clothing or second-hand fabric.

(10) The term "garnetted clippings" shall refer to and mean any material which has been made into fabric and subsequently cut up, torn up, broken up or ground up and has been run through a garnet machine and thoroughly processed.

(11) The term "shredded clippings" shall refer to and mean any material which has been made into fabric and subsequently cut up, torn up, broken up or ground up, but which has not been run through a garnet machine and thoroughly processed.

(12) The word "felt" shall mean material which has been carded in layers or sheets by a garnet or felting machine.

(13) The word "board" shall mean the state board of health.

(14) The word "composite" refers to and means any article of bedding or filling material containing both new and used materials.

(15) **"Renovator"** shall mean any person who repairs, renovates, makes over, recovers, restores, or renews any article of bedding for the owner only and not for sale.

(16) **"Supply dealer"** shall mean any person who manufactures, makes, or prepares for sale any processed filling materials in bags, bales, or containers, concealed or not concealed, to be used or intended for use in articles of bedding.

556.03 ADMINISTRATION. —

(1) The state board of health through its officers and employees is hereby charged with the administration and enforcement of this law. The board shall appoint one or more inspectors and other necessary personnel who shall be qualified by either experience or training and who shall not be interested in either the manufacture or renovation or sale of bedding. It shall be the duty of the board to enforce and supervise the inspection of all bedding and filling material subject to the provisions of this chapter and to enforce the provisions thereof within this state. All fees collected under the provisions of this chapter shall be paid to the state treasurer and deposited into the agency fund. All expenses certified by the state board of health as properly and necessarily incurred in the discharge of duties under this chapter including salaries and expenses of inspectors, employees and any other necessary expenses incurred under this chapter shall be paid out of said fund.

(2) The state board of health is hereby authorized and empowered to make such reasonable regulations as may be necessary for the administration of this chapter and to amend or appeal such regu-

lations; provided, however, such regulations shall not enlarge the scope of this chapter, and pertain only to the formal procedure.

556.04 PROHIBITIONS. —

(1) No person shall sell as new any article of bedding unless it is made from all new material and is tagged as provided herein.

(2) No person shall sell, representing it to be new material, any old or second-hand hair, down, feathers, wool, cotton, kapok, or other material used for filling articles of bedding.

(3) No person shall sell any articles of bedding made from old, used, or second-hand material unless it shall be tagged as provided herein.

(4) No person shall knowingly sell any article of bedding, or any material used in the making thereof, which has been used by or about any person having an infectious or contagious disease.

(5) No person shall use in the manufacture of any article of bedding for sale any material (a) that comes from an animal or fowl, (b) that contains any bugs, vermin, or filth, (c) that is unsanitary, (d) that contains burlap or other material that has been used for bailing, unless such material has been sterilized by a process approved by the state board of health.

(6) No person shall sell, offer for sale, exchange or lease or deliver or consign for like purpose any article of bedding herein required to be tagged unless there is affixed on the tag an inspection stamp as required by this article.

(7) It shall be unlawful to use any false or misleading statement, term or designation on said tag or to remove, deface or alter, or to attempt to remove, deface or alter such tag or the statement of filling materials made thereon, or the inspection stamp, hereinafter described.

(8) The state board of health shall have the power to take possession of any article of bedding made or offered for sale for inspection and may open any article of bedding at the seams to examine the contents thereof. The state board of health may also inspect the purchase records of the owner of such articles of bedding in order to determine the kind of materials used therein. Such records shall be kept available for inspection for a period of one year. If any article of bedding does not meet the requirements of this chapter the said board of health shall prohibit the sale and shall affix thereto a label to be designed and prescribed by the board, and within fifteen days of such seizure or labeling the owner shall be furnished with the written reason or reasons for such actions by registered mail; such label shall not be removed except by an agent of the board and said article of bedding shall not be sold without the written consent of the board unless on hearing it be determined that the reasons are unfounded. All places where any article of bedding covered by this chapter, is made, re-made, or renovated or where materials for such articles of bedding are manufactured, prepared or stored, or where such articles of bedding are offered for sale or are possessed with intent to sell; or where sterilization or disinfection is performed shall

be subject to inspection by the board during usual business hours. For the purpose of administering or enforcing this chapter it shall be unlawful for any person to interfere with any such inspection. Any person adversely affected may demand a hearing within fifteen days after assignment of reasons, which hearing shall be held by the board within fifteen days thereafter.

556.05 LABELS, TAGGING. —

(1) No person shall sell an article of bedding unless there shall be securely sewed to the outside covering thereof a substantial cloth or cloth-backed label which shall not flake when abraded, at least two inches by three inches in size, upon which shall be indelibly stamped, typed, or printed with ink, in English, the following:

(a) The name of the material or materials used to fill such article of bedding and where two (2) or more different materials are included they shall be described in the order of their predominance stating percentages by weight of each.

(b) The name and address of the manufacturer, jobber, distributor or vendor of the article of bedding.

(c) In letters at least one-fourth inch high in bold, black type the words "all new material" if such article of bedding contains no used material; or in bold, black type of the same size the word "composite" if new and used materials are contained therein; or in bold, black type of the same size the words "made of used material" if such article of bedding contains second-hand material; and in bold, black type of the same size the word "sterilized" if such articles of bedding have been sterilized.

(d) The body of the labels bearing the descriptive words "of new materials" shall be white; the body of the labels bearing the descriptive word "composite" shall be one-half yellow and one-half blue; the body of the labels bearing the descriptive words "made of used material" shall be yellow. The "composite" label shall clearly and legibly show the correct percentage of new and used material.

(2) The label of any article of bedding containing natural or synthetic rubber shall state the form of such rubber; that is, whether such rubber is in mold, sheet, flake, shredded, ground, crushed or other form.

(3) The word "bonded" shall not be used upon the label of any article of bedding in describing the materials therein used.

(4) If any article of bedding shall contain artificially colored filling materials, the label on such article of bedding shall contain the word "colored" immediately preceding the description of such materials.

(5) Any person who renovates or reprocesses any bedding for an owner shall comply with the following:

(a) Any filling material added to the owners' material shall be new unless otherwise specifically agreed to by the owner.

(b) All bedding renovated, re-processed or re-built for the owner shall be labeled as follows:

Color of label shall be green

Statements on label shall be printed or typed in indelible ink as follows:

"Do not remove this label under penalty of law"

"This article not for sale"

"Owners' material"

"Certification is made that this article contains the same material it did when received from its owner and the added material is according to law and consists of the following:"

The label shall then clearly state the following: Name of the repairers or renovators thereon which did repair or renovate the bedding and it shall be not less than three by five inches and both the printed and imprinted portions shall be of such size to be easily and clearly read.

556.06 REGISTRATION; INSPECTION STAMPS. —

(1) No person shall sell or lease or have in his possession with intent to sell or lease in the state, any article of bedding covered by the provisions of this chapter, unless there be affixed to the tag required by this chapter by the person manufacturing, selling or leasing the same, an adhesive inspection stamp prepared and issued by the board; two types of such stamps shall be furnished by the board.

(2) The board shall register all applicants for stamps and assign to every person a registration number which thereafter shall constitute his identification record and said identification shall not be used by any other person.

(3) No person shall manufacture, renovate, sell or offer for sale any article of bedding or any processed filling materials as defined herein unless said manufacturer, renovator, retailer or seller and supply dealer of the item of bedding or processed filling material shall pay to the board for registration and annually thereafter the following fee:

Manufacturers or supply dealers	\$25.00
Distributors, jobbers or wholesalers	25.00
Renovators	10.00
Retailers	5.00

(a) Every bedding retailer, unless he holds a manufacturer's registration, or a wholesale dealer's registration, shall annually obtain a retail dealer's registration.

(b) Every bedding renovator, unless he holds a manufacturer's registration, shall annually obtain a renovator's registration.

(c) Every distributor, jobber or wholesaler of bedding, unless he holds a manufacturer's registration, shall annually obtain a distributor, jobber or wholesaler registration.

(d) Every supply dealer of processed filling materials, unless he holds a manufacturer's registration, shall annually obtain a supply dealer's registration.

(e) Every bedding manufacturer shall annually obtain a manufacturer's registration.

(f) Every person in each classification shall obtain a separate registration for each branch, factory, store or retail outlet.

(4) Adhesive inspection stamps shall be furnished by the state board of health in quantities of not less than five hundred. One type shall be for use on all articles of bedding as defined herein, except pillows, cushions and comforters, for which the applicant shall pay ten dollars for each five hundred stamps. The other type shall be for use only on pillows, cushions, and comforters, for which the applicant shall pay five dollars for each five hundred stamps.

(5) This act shall also apply to and include the manufacture, preparing and sale of any processed filling material sold or offered for sale for use or intended for use in the manufacture or renovating of articles of bedding as defined within this act.

(a) All of the requirements of this act including registration, labeling, tagging, affixing inspection stamps, prohibitions and penalties as applied to items of bedding shall likewise apply to processed filling materials as defined herein.

(b) Each bundle, bale, box, package or container of said filling materials shall have securely attached thereto a label or tag as specified within the act with the two cent (2¢) bedding inspection stamp affixed thereto.

(6) The board may suspend, revoke and void the registration number of any person convicted of violating the provisions of this chapter. Such person shall not thereafter engage in the manufacture, making, remaking, renovating or delivering for sale or selling in this state articles of bedding covered by this chapter until the board has determined that such person is complying with the provisions of this chapter, whereupon the board shall reinstate or reissue the registration number to such person.

556.07 SCOPE.— This chapter shall apply to all bedding or articles of bedding, including any mattresses, pillows, cushions, quilts, bedpads, comforters, upholstered spring beds, box springs, davenports, day beds or couches used or intended for use for sleeping purposes, whether manufactured, renovated or remade within the state or brought within the state for sale, provided, however, that this law shall not apply to a mattress sold by the owner from his home direct to a purchaser, unless such mattress has been exposed to an infectious or contagious disease.

556.08 BEDDING FOR EXPORT ONLY EXCLUDED.—

This chapter shall not apply to bedding manufactured, processed or held within the state solely for export to points outside the state,

provided such bedding is at all times clearly labelled "For Export Only."

556.09 **VIOLATIONS; PENALTIES.** — Any person who fails to comply or who violates any provisions of this chapter or the rules and regulations of the board of health made pursuant hereto, shall be guilty of a misdemeanor and shall, upon conviction thereof, be fined not more than five hundred dollars, or shall be imprisoned in the county jail for not more than ninety days for each offense, or by both such fine and imprisonment.

NOTE: The portions in bold type of the above law constitute amendments passed by the 1959 session of the Florida Legislature.

GEORGIA

CHAPTER 88-8. ARTICLES OF BEDDING SANITATION

88-801. Definitions. Unless the context clearly disclosed a different meaning, the following words, phrases and terms as used in this Chapter shall have the following meanings:

(a) The words "articles of bedding" mean any of the following type of goods which are intended for use by any human being for sleeping purposes: any mattress, mattress pad, mattress protector, upholstered spring, comforter, quilted pad, quilt, cushion or pillow which is stuffed or filled in whole or part with concealed material and which is not smaller than twelve inches in its greatest dimensions.

(b) The word "manufacturer" means a person who either by himself or through employees or agents, makes any article of bedding in whole or in part, or who does the upholstery or covering of any unit thereof, using either new or previously used material.

(c) The word "person" means: any individual, corporation, partnership or association.

(d) The words "new material" means: any material which has not been used in the manufacture of another article or used for any other purpose.

(e) The words "previously used material" means: any material which has been used in the manufacture of another article and subsequently torn, shredded, picked apart, or otherwise disintegrated, including jute and shearings.

(f) The words "renovator" and "reupholsterer" shall mean: any person who repairs, makes over, recovers, restores, or renews any article of bedding for the owner for a consideration.

(g) The word "sell" or "sold" shall, in the corresponding tense, include: sell, offer to sell, barter, trade, rent, or possess with intent to sell, deliver or consign in sale, or dispose of in any other commercial manner.

(h) The word "sweeps" or "oily-sweeps" as used in the cotton waste trade shall be construed to mean "mill floor sweepings" and shall be classed as previously used material.

(i) The word "felt" shall mean: material which has been carded in layers by a garnett machine.

All words shall include plural and singular as the context demands.

88-802. Department of Health to enforce Chapter. The Department of Health is hereby authorized and empowered, through its duly authorized representatives, to enforce all of the provisions of this Chapter.

88-803. Sale or manufacture in violation of Chapter; Rules and Regulations; Revocation of Certificate of Registration. It is the intention of this Chapter to prevent both the manufacture and sale in this state of articles of bedding unless manufactured and sold in conformity with its provisions. The Department of Health may make and enforce reasonable rules and regulations for the enforcement of this Chapter, and may suspend, revoke and void the certificate of registration of any person convicted of violating the provisions of this Chapter. Any person, a non-resident of this State, who has been issued a certificate of registration and who fails or refuses to enter an appearance in any court of record in this State to answer charge or charges of violation within twenty-five days after service upon him of a notice by registered mail so to do, may have his certificate of registration preemptorily revoked by the Department of Health. The articles of bedding manufactured or sold by such person shall not thereafter be sold in this State until such person has paid a special inspection fee of one hundred dollars and the Department of Health has determined that such person is complying with the provisions of this Chapter; whereupon the Department of Health shall reinstate or reissue the Certificate of Registration to such person.

88-804. Certificates of Registration. No person, except for his own use, shall make, reupholster, or renovate articles of bedding, as heretofore defined, for sale

in the State of Georgia without first securing a numbered certificate of registration from the Department of Health and paying the fee established for said certificate of registration as hereinafter set forth. The payment and charge for this certificate of registration shall constitute an inspection charge for the purpose of enforcing this Chapter. Said certificate of registration shall expire one year from date of issue or until voided by a violation of this Chapter, whichever event occurs first in time.

(A) Manufacturers of Articles of Bedding----- \$100.00

(B) Renovators and Reupholsterers of Articles of Bedding---- \$25.00

88-805. Exemptions for blind persons and agencies of state and local governments. Notwithstanding anything contained in this Chapter, a plant or place of business owned solely by blind persons, in which place of business not more than one seeing assistant is employed in the manufacture, renovation or reupholstering of articles of bedding, and state or local governmental agencies manufacturing articles of bedding for any governmental use in this State shall not be required to pay any fee for a certificate of registration as herein provided, but shall be required to conform to all other provisions of this Chapter.

88-806. Approval of sterilizing process. Every person applying for a certificate of registration hereunder shall furnish a detailed drawing and description of any sterilizing apparatus and process to be used, which apparatus and process shall meet with the approval of the Department of Health before the applicant shall be entitled to a certificate of registration.

88-807. Used material to be sterilized. No person subject to this Chapter shall use any previously used material which, since last used, was not sterilized by a process approved by the Department of Health.

88-808. Used articles of bedding to be sterilized. No person shall sell a used article of bedding unless sterilized, since last used, by a process approved by the Department of Health; provided that nothing in this Chapter shall be construed as prohibiting public sales under process of law or sales by an executor or an administrator of an estate.

88-809. Identification of articles of bedding. Any person who receives articles of bedding for renovation, reupholstering or storage shall keep attached thereto, from the time he receives it, a tag on which is legibly written the date of receipt and the name and address of the owner.

88-810. Tags and Details on Tags. No person shall manufacture, renovate, reupholster or sell any article of bedding to which there is not securely sewed a cloth-backed tag at least six square inches upon which there shall be stamped or printed with ink in the English language:

- (a) the name of the material or materials used to fill such articles of bedding;
- (b) the name and address of the manufacturer, renovator, upholsterer or vendor of the article of bedding;
- (c) the manufacturer's, upholsterer's or renovator's Certificate of Registration number issued by the Department of Health; and
- (d) The words "Made of New Materials" if such mattress contains no previously used material; or the words "Made of Previously Used Material" if such mattress contains any material classified as "Previously Used Material", or the words "Second Hand" on any mattress which has been previously used but not remade.

The words so stamped shall be in letters at least one-eighth of an inch high and the tag shall contain nothing of a misleading nature and shall be sewed to the outside cover of every article of bedding being manufactured, renovated or reupholstered before the filling material has been placed therein, and no person, other than a purchaser for his own use, shall remove from articles of bedding or deface or alter the tag required thereunder.

88-811. Inspection of premises. The Department of Health is hereby authorized and empowered to inspect ever place where articles of bedding are manufactured, renovated, reupholstered or sold or where material used in the manufacture, renovating or reupholstering is mixed, worked, sold or stored.

88-812. Opening and inspection of mattresses; Power to seize and hold as evidence. When a duly authorized representative of the Department of Health has reasonable cause to believe that an article of bedding is not tagged or filled as required hereunder, he shall have authority to open a seam of such article of bedding for the purpose of examining the filling and shall likewise have authority and power to examine any purchase records or invoices necessary to determine the kind of material used in such article of bedding. He shall have power to seize and hold for evidence any article of bedding or material made, possessed, or offered for sale contrary to the provisions of this Chapter.

88-813. Invoices of materials. The Department of Health shall have power to require any person supplying material to manufacturer, renovator or reupholsterer to furnish such manufacturer, renovator or reupholsterer an itemized invoice of all materials so supplied, which shall be retained by such manufacturer, renovator or reupholsterer, for one year subject to inspection by the Department of Health.

88-814. Disposition of fees. Fees collected by the Department of Health under the provisions of this Chapter shall be deposited in the general fund of the State Treasurer.

88-815. Possession prima facie evidence. The possession of one or more articles covered by this Chapter, when found in any store, warehouse, or place of business other than a private home, hotel, or other place where such articles are ordinarily used, shall constitute prima facie evidence that the article or articles so possessed are possessed with intent to sell or process the same for sale.

88-816. Severability of provisions of this Chapter. If any of the sections or provisions of this Chapter are held to be unconstitutional, the same shall not affect the remaining sections or provisions hereof.

88-817. Violations. Any person who violates the provisions of this Chapter shall, upon conviction thereof, be adjudged guilty of a misdemeanor and upon conviction thereof shall be punished as provided by law. Each article of bedding manufactured, renovated or reupholstered contrary to the provisions of this Chapter shall be a separate and distinct violation and offense.

INDIANA BEDDING LAW AND REGULATIONS

CHAPTER 148, ACTS OF 1949
as amended by
CHAPTER 30, ACTS OF 1951, and
CHAPTER 157, ACTS OF 1963

INDIANA STATE BOARD OF HEALTH
1330 West Michigan Street
Indianapolis, Indiana
46207

INDIANA BEDDING LAW

CHAPTER 148, ACTS OF 1949 AS AMENDED BY CHAPTER 30, ACTS OF 1951, AND CHAPTER 157, ACTS OF 1963

AN ACT concerning bedding to regulate and prohibit the use of insanitary material in the manufacture of bedding; to regulate and prohibit the sale of any bedding, filling material or bedding containing insanitary material; to provide for license, proper labeling and inspection thereof; to provide for the administration and enforcement thereof by the State Board of Health; to provide a penalty for the violation thereof; and to repeal acts and parts of acts in conflict therewith.

Be it enacted by the General Assembly of the State of Indiana:

SECTION 1. That the regulation and inspection of the use of insanitary material in the manufacture, renovation or repair of bedding and the sale of articles of bedding containing insanitary material is necessary for the protection of the health and welfare of the people of this State, and is declared to be a proper exercise of the police powers of the State.

SEC. 2. Definitions. As used in this act unless the context clearly requires otherwise:

(a) "Bedding" shall mean any mattress, mattress pad, mattress protector pad, box spring, upholstered spring, upholstered bed davenport, upholstered day bed, upholstered sofa bed, quilted pad, comforter, bolster, cushion, pillow, feather-bed, sleeping bag, or any other bag, case or covering made of leather, textile or other material and stuffed or filled with any soft material or substance, and which is designed or made for sleeping or reclining purposes; or which is an integral part of a bed or couch or other device used for sleeping or reclining purposes.

(b) "Filling Material" shall mean hair, down, feathers, wool, cotton, kapok, plant fibers or any other soft material used in the manufacture of and for filling or stuffing articles of bedding.

(c) "New" shall mean any article of bedding or filling material which has not been previously used for any purpose. Manufacturing processes shall not be considered a prior use.

(d) "Second hand" shall mean any article of bedding or material, or portion thereof, of which prior use of any kind has been made. Any article of bedding shall be considered secondhand if it contains any secondhand material in whole or in part.

(e) "Manufacture" shall mean making, remaking or renovating, and shall include altering, repairing, finishing, refinishing or preparing articles of bedding for sale or resale, made of either new or secondhand material.

(f) "Renovate" shall mean to restore to former condition or to place in a good state of repair.

(g) "Person" shall mean persons, firms, partnerships, companies, corporations and associations.

(h) "Supply Dealer" shall mean any person manufacturing, processing or selling at wholesale any felt, batting, pads or loose material in bags or containers, concealed or not concealed, to be used in articles of bedding.

(i) "Sell" or any of its variants, includes any of, or any combinations of the following: sell, offer or expose for sale, barter, trade, lend, deliver, give away, rent, consign, lease, possess with intent to sell or dispose of in any other commercial manner. The possession of any article of bedding or filling materials, as herein defined, by any maker, remaker or dealer, in the course of business, shall be presumptive evidence of intent to sell.

(j) "Board" shall mean the State Board of Health of Indiana.

(k) "Wholesaler" shall mean a person located outside the State of Indiana who, on his own account, sells or distributes any articles of bedding or filling material therefor, to another for the purpose of resale, but shall not include an affiliate or subsidiary where the ownership and name are identical and which is the exclusive sales outlet of a manufacturer.

SEC. 3. Administration. (a) In addition to all other duties prescribed by law the Board shall have the duty to administer the provisions of this act, and in addition to all other powers conferred on the Board it shall have the power to adopt, amend or rescind rules and regulations for the proper administration of this act as provided by law, employ such persons as necessary in accordance with the provisions of the State Personnel Act, make such expenditures, require such reports and records, make such investigations and take such other action as it may deem necessary or suitable for the proper administration of this act.

(b) The Board may authorize such persons as it may designate to do any act or acts which could lawfully be done by the Board.

(c) The Board shall have the power to take possession of any article of bedding or filling material therefor made or offered for sale for inspection and may open such article of bedding to examine the contents thereof. The Board may also inspect the purchase records of the owner of such articles of bedding in order to determine the kinds of materials used therein. If any article of bedding does not meet the requirements of this act the Board shall prohibit the sale thereof and shall affix thereto a label to be designed and prescribed by the Board and said article of bedding shall not be sold without the written consent of the Board. Said label shall not be removed except by an agent of the Board. All places where any article of bedding covered by this act is made, remade or renovated; or where material for such articles of

bedding are manufactured, prepared, or stored; or where such articles of bedding are offered for sale, or are possessed with intention to sell; or where sterilization or disinfection is performed, shall be subject to periodical inspection by the Board for the purpose of administering or enforcing this act and it shall be unlawful for any person to interfere with any such inspection.

(d) The State Health Commissioner, if in his judgment he deems such action advisable, is hereby authorized to appoint a "Bedding Advisory Board" to consist of persons who, on account of their vocations, employment or affiliations, represent the bedding manufacturing industry. Upon the appointment of such Bedding Advisory Board, the State Health Commissioner shall designate an employee of the State Board of Health to serve as Secretary of said Bedding Advisory Board. The Bedding Advisory Board shall meet at such times as the State Health Commissioner shall designate. Each member shall serve without salary but shall receive actual and necessary travel and other expenses while engaged upon the work of the Bedding Advisory Board.

The Bedding Advisory Board shall consider all matters submitted to it by the Commissioner of Health and make recommendations relative to such matters.

SEC. 4. Manufacture and Sale. It shall be unlawful for any person in the manufacturing, remaking or renovating of any article of bedding or any person processing or selling any felt, batting, pads or loose material to be used in articles of bedding covered by this act, to use any secondhand material, or any new or secondhand feathers or down, or any material that comes from an animal unless such secondhand material, feathers or down or any material that comes from an animal have been thoroughly sterilized or disinfected by a process approved by the Board and it shall be unlawful for any person to sell any article of bedding covered by this act which is made, remade or renovated in violation of this act or any secondhand article of bedding or filling material covered by this act unless since last used it has been sterilized or disinfected by a process approved by the Board.

SEC. 5. Sterilization. (a) Any person desiring to secure approval of the process by which the articles of bedding or filling materials are sterilized or disinfected, in accordance with Section 4 of this act shall submit to the Board a plan of such apparatus and the process intended to be used for such sterilization or disinfection and after inspection and approval of the process and equipment by the Board, a numbered permit for its use shall be issued. Such permits shall be conspicuously posted on the premises near the sterilizer. Any person holding a sterilization or disinfection permit shall be required to keep an accurate written record of all articles of bedding or materials which have been sterilized or disinfected, including date when sterilization or disinfection was performed and also, in the case of articles of bedding, the name and address

of the buyer or owner of such articles. Such records shall be available for examination at any time by the Board.

(b) Every application for a sterilizing or disinfecting permit to be held in a state, other than the state of Indiana, shall be approved only after personal inspection of said sterilizing or disinfecting process and apparatus by the Board unless such state has an inspection service which is acceptable to the Board. The expenses for such inspection outside the state of Indiana shall be paid by the applicant.

(c) Any person desirous of a permit as required under this Section shall pay an initial fee of twenty-five dollars (\$25.00) to the Board at the time of making application for such permit. Such initial permit shall expire one year from date of issue and shall be subsequently renewed annually upon payment to said Board of an annual renewal fee of ten dollars (\$10.00) and upon the making of application for such renewal to the Board.

(d) Any person who after fair hearing or opportunity to be heard by the Board on complaint that he is not complying with the sterilization or disinfecting provisions of this act and is found guilty thereof by the Board shall have his permit revoked and no new permit shall be issued until he has satisfied the Board that he will abide by all the provisions of this act, any rules and regulations promulgated thereunder, and has posted a five hundred dollar bond in favor of the Board to guarantee compliance.

(e) Nothing herein shall prevent any person engaged in the making, remaking, renovation or sale of any article of bedding or material thereof which requires sterilization or disinfection under the provisions of this act, from having such sterilization or disinfecting performed by any person who has a valid permit for such purposes, provided the number of such permit shall appear on the tag, hereafter described, attached to each article of bedding or filling material therefor.

SEC. 6. Labeling. (a) Each new article of bedding covered by this act shall bear securely attached thereto and visible on the outside covering a substantial white cloth tag which will not flake when abraded, the visible portion of which shall be not less than six square inches in size, upon which shall be indelibly stamped or printed, in the English language a statement showing the kind of materials used in filling such article of bedding, and that the materials are new, the name and address of the manufacturer, distributor or vendor, the registry number of the maker as provided for in Section 7, and in the case of articles of bedding made of feathers or down or material that comes from an animal the number of the permit issued to the processor who sterilized or disinfected such materials. Labels attached to articles of bedding containing mixtures of material from animal or fowl shall also state the percentage by weight of each kind of such material contained in the articles of bedding.

(b) Each article of bedding containing secondhand material, in whole or in part, shall have securely attached to it a similar tag of yellow cloth upon which shall be stamped or printed in the same manner as above required, a statement showing the kind of materials used in filling said article of bedding, and a statement that the article of bedding or materials therein are secondhand, and the number of the permit issued to the processor who sterilized or disinfected such article of bedding or materials therein.

(c) Any shipment or delivery however contained, of material used for filling articles of bedding shall have conspicuously attached thereto a tag upon which shall be stamped or printed as required in this section, a statement showing the kind of material and whether the material is new or secondhand, the name and address of the manufacturer, distributor or vendor, and the registration number of the manufacturer, and in the case of secondhand material or material from animal or fowl, the permit number of the processor who sterilized or disinfected such material.

(d) The terms used on the tag to describe filling materials shall be restricted to those defined in the regulations promulgated hereunder, and no trade or substitute terms shall be used, and no additional information shall be contained in said statement. The description of the filling material, and the statement of whether new or secondhand, shall be in plain type not less than one-eighth inch ($\frac{1}{8}$ ") in height. It shall be unlawful to use any false or misleading statement, term or designation on a bedding label, or to remove, deface or alter, or to attempt to remove, deface or alter such label or deface the statement of filling materials made thereon.

SEC. 7. License. (a) It shall be unlawful for any manufacturer, supply dealer, or renovator located in this state to sell, or have in his possession with intent to sell, in the State of Indiana, any article of bedding or filling material therefor covered by the provisions of this act, unless such person shall have registered with the Board and obtained a license bearing a registry number approved by the Board.

It shall be unlawful for any manufacturer, supply dealer, renovator or wholesaler to sell, in the State of Indiana, any article of bedding or filling material therefor covered by the provisions of this act, unless such person shall have registered with the Board and obtained a license bearing registry number approved by the Board.

(b) Each license shall be issued for an initial fee of twenty-five dollars (\$25.00). Such license shall expire one (1) year from the date of issue, and shall be subsequently renewed annually upon payment to said board of an annual license fee of twenty-five dollars (\$25.00) and upon the making of application for such renewal to said Board.

Each of such licensees shall file with the Board a report within thirty (30) days after the expiration of each three month period covered by the annual license. Such report shall be made under oath, by the owner or official of the licensee, that the information therein is true to his best knowledge and belief, and shall show the exact number of articles of bedding or filling material therefor, sold in the State of Indiana during said three month period. The licensee shall remit with said report an amount of money computed as follows: For all articles of bedding and filling material therefor except pillows, cushions, comforters and bolsters, the sum of one and one-half cents ($1\frac{1}{2}\text{¢}$) for each article reported in said three (3) month report; for pillows, cushions, comforters and bolsters, the sum of three quarters of a cent ($\frac{3}{4}\text{¢}$) for each such article reported in said three (3) month report.

(c) Whenever any licensee fails to make such report and remittance, or the board is of the opinion that the report and remittance are not in accordance with the requirements of this act, the Board shall conduct a hearing on said matter, with sufficient notice having been given to said licensee. In the event that the licensee does not attend said hearing, or is found by the Board not to be complying with the provisions of this act, the Board shall revoke the license of said licensee. No license shall subsequently issue to said licensee unless he satisfies the board that he will abide by all the provisions of this act, any rules and regulations promulgated thereunder, and has posted a five hundred dollar (\$500.00) bond in favor of the Board to guarantee compliance.

SEC. 8. Exclusions. Provisions of this act shall not be applicable to the making, remaking, or renovating of any article of bedding by or for the owner thereof for his own use and not for sale; provided that the same material, new or sterilized other material only is used. Provided further, that if sterilized material is used, it shall be so indicated on a label to be prescribed by the Board. Any person who receives an article of bedding covered by this Act for renovation shall attach thereto at the time received, a red tag on which is legibly written the date of receipt and the name and address for the owner. This Act shall not be applicable to any articles of bedding sold under the order of any court and shall not apply to the sale of bedding by a householder of bedding owned and used by said householder and his family, and which was not acquired for resale: provided, however, that the sale of any such bedding by a householder through an agent shall be within the provisions of this act.

SEC. 9. Sanitation. Any filling material which is used in the manufacture of bedding as covered by this act, shall be free from extraneous foreign matter, dirt or trash. The premises, delivery equipment, machinery, appliances and devices of bedding manufacturers, supply dealers, renovators, sterilizers or disinfectors and retailers shall at all times be kept free from refuse, dirt contamination, insects or vermin.

SEC. 10. Penalties. (a) Any person who shall wilfully make a false statement, misrepresentation, or report to the Board or who knowingly fails to disclose a material fact to avoid liability under this act shall be deemed guilty of a misdemeanor and upon conviction shall be fined not less than ten dollars (\$10.00) nor more than five hundred dollars (\$500.00) for each offense, or by imprisonment not exceeding six (6) months in the County Jail or by both such fine and imprisonment.

(b) Any person who shall wilfully violate or fail to comply with any provision of this act or any rule or regulation promulgated hereunder shall be deemed guilty of a misdemeanor and upon conviction shall be fined not less than ten dollars (\$10.00) nor more than five hundred dollars (\$500.00) for each offense, or by imprisonment not exceeding six (6) months in the County Jail or by both such fine and imprisonment.

(c) Each article herein enumerated, made, or remade, or renovated, sold, offered for sale, delivered, consigned, or possessed with intent to sell, deliver or consign, contrary to the provisions hereof, shall constitute a separate offense.

SEC. 11. Criminal Proceedings. All proceedings for the enforcement of this act or to restrain violations thereof shall be by and in the name of the State of Indiana.

SEC. 12. Duty of Prosecuting Attorney. All criminal actions for violations of any provision of this act or any rule or regulation promulgated thereunder shall be prosecuted by the prosecuting attorney of any county where violation is found.

SEC. 13. Separability Clause. If any provision of this Act is declared unconstitutional or the application thereof to any person or circumstances is held invalid, the constitutionality of the remainder of the act and the application thereof to other persons or circumstances shall not be affected thereby.

SEC. 14. Repeal. All laws or parts of laws in conflict herewith are hereby repealed. Acts 1913, Ch. 224 and Acts 1917, Ch. 136 law without the signature of the Governor are hereby specifically repealed in-so-far as the same may conflict with this act.

SEC. 15. Effective Date. This act shall take effect on and after January 1, 1950. 1951 amendments effective July 1, 1951, 1963 amendments effective January 1, 1964.

REGULATIONS RELATING TO ENFORCEMENT OF THE INDIANA BEDDING LAW

Chap. 148, Acts 1949 as Amended by Chap. 30, Acts of 1951
and Chap. 157, Acts of 1963

Regulations numbered HSB 1 to HSB 4

SCOPE

These regulations and the provisions herein set forth shall be construed to cover and apply to the manufacture, renovation, supply, storage and sterilization or disinfection of all articles of bedding or filling materials thereof which are intended for use or sale as defined in Chap. 148, Acts of 1949 as amended by Chap. 30, Acts of 1951 and Chap. 157, Acts of 1963. They shall apply to all manufacturing and other mercantile establishments, both wholesale and retail, when articles of bedding or filling materials thereof are in their possession for purposes as stated above.

REGULATION HSB 1.

No article of bedding shall be manufactured or sold in the State of Indiana which is unclean or insanitary or which contains filling material which is unclean or insanitary. No material which is unclean or insanitary shall be used in the remaking or renovating of any article of bedding.

REGULATION HSB 1A.

LABEL BULK FILLING MATERIAL

A. Containers of processed filling materials wholesaled in Indiana for use in articles of bedding, shall be labeled by the processor and the label shall bear his registry number.

(A1). The following and similar materials shall be deemed to be processed: Cotton felt, batting, shoddy; scoured and carbonized wool, wool felt, or batting; processed hair, curled or uncurled, felted or rubberized; processed feathers and down; processed foam or sponge rubber; jute felt; sisal pads; curled tampico; processed vegetable and synthetic fibers, and processed synthetic foams.

B. Containers of unprocessed filling material shipped into Indiana by a jobber for use in articles of bedding, or such material held in possession for resale by a jobber in Indiana for like purposes, shall be labeled by the jobber and the label shall bear the registry number of the jobber.

(B1). The following and similar materials shall be deemed to be unprocessed: Staple cotton, cotton and spinning mill prod-

ucts or by-products; unprocessed feathers and down, wool, hair, and foam or sponge rubber; kapok; moss; palm fiber; sisal fiber; tampico fiber (not curled); coconut husk fiber; excelsior; jute tow; flax tow; unprocessed vegetable and synthetic fibers, and unprocessed synthetic foams.

REGULATION HSB 2.

MINIMUM DIMENSIONS

- A. Fancy cushions which do not exceed 10 inches in greatest dimension or which are not designed or intended for use for human sleeping or reclining purposes shall not be deemed to be articles of bedding. Nothing herein contained however, shall be deemed to exempt from the law any stuffed article or pad simply because it is designated as a toy or for animal pets or for dolls.
- B. If any pad used as an insulator over the springs of innerspring mattresses made of sisal fiber, curled hair or any other material is smaller than the entire top and bottom surfaces of the mattress then the size of the pad must be stated on the label.

REGULATION HSB 3.

LABELING

- A. Every new or secondhand article of bedding processed for sale shall be properly labeled in accordance with Chap. 148, Acts of 1949 as amended by Chap. 30, Acts of 1951 and Chap. 157, Acts of 1963 and these regulations. The required secondhand label shall be attached when the article of bedding contains secondhand material in whole or in part, including innerspring unit. Each manufacturer, renovator, sterilizer, and disinfector shall furnish his own labels.
- B. The wording on the required label describing the filling materials shall be stamped or printed in bold-face type not less than $\frac{1}{8}$ inch in height and shall employ only the terms which follow after (J) Basic Definitions of this Regulation.
 - (B1). The kinds and percentages of various filling materials shall be shown on the label. Percentages shall be computed on the basis of weight. Any deviation from percentages stated shall not exceed ten percent (10%) of the smaller component except as otherwise provided in these regulations. When the filling material consists of one kind only, the percentage need not be stated.
- C. No trade, superfluous or substitute terms shall be used on the required label except as authorized in Regulation Q.
 - (C1). Trade marks, insignia or advertisements may be placed on another label and attached to the article of bedding in such

manner that it will not interfere with the required label nor contradict any statement thereon.

- D. The terms "All", "Pure", "100%" or similar terms shall be used only with the understanding that no tolerance whatever is allowed when such terms are used and that the slightest departure from the indicated quality makes the label misleading and therefore unlawful.
- E. Labels shall be of good grade vellum cloth or cloth of comparable quality or better which will not flake out when abraded. Paper or paper-faced labels shall not be used.
- F. Labels shall not be less than six (6) square inches in size, exclusive of the portion required to affix the label to article. Labels may be greater in size as the need demands.
- G. Labels shall be securely attached to articles of bedding so that they may be conveniently examined, and the information thereon is visible. Where possible, they shall be securely sewed, but in instances where sewing is not practicable, application can be made to the Board in writing for authorization to otherwise secure.
- H. Every dual purpose article of bedding having one or more cushions requires but one label when the cushions are a necessary part of that article. This label shall contain a statement of the filling materials used in the article as well as that used in the cushions. Where extra cushions are provided that are not an integral part of the article each cushion shall be labeled separately.
 - (H1). Dual purpose articles of bedding such as bed-davenports, studio couches, hide-a-beds, etc., having loose cushions shall have the labels attached under a cushion on top and near the center of the front edge of the platform.
- I. No person other than a purchaser for his own use, shall remove from any article of bedding or alter or deface the required label except as herein otherwise provided.
- J. BASIC DEFINITIONS. It is the purpose of the following definitions to provide names, terms and nomenclature as are commonly used, and are recognized in the manufacture, sale and distribution of bedding products. The following definitions are also intended to have understandable meaning to the ultimate consumer.
- K. COTTON.
 - K 1. *Cotton, Virgin Cotton or Staple Cotton*: Any of these terms shall mean the staple fibrous growth as removed from cottonseed in the usual process of ginning (first cut from seed), containing no foreign material. The presence of the usual amount of leaves, hull, etc., shall not be considered foreign matter.

- K 2. *Cotton By-Products*: This term shall mean the by-products removed from the various machine operations necessary in the manufacture of cotton yarn up to but not including the process of spinning, and shall include only the following materials commonly known in cotton mill terms as (1) cotton comber, (2) cotton card strips or cotton vacuum strips, (3) cotton fly and (4) cotton picker.
- K 3. *Cotton Linters*: This term shall mean the fibrous growth removed from cottonseed subsequent to the usual process of ginning and shall be so designated on the label.
- K 4. *Cotton Waste*: This term shall be used when any "card", "stripes" or "stripping", "comber", "fly", "noils", "picker", or "motes" contain more than 7 percent hull, leaf, stem or other foreign material. When hull, leaf, stem or other foreign material exceed 10 percent, such material shall be designated as "trash".
- K 5. *Garnetted Clippings*: This term shall mean any new material which has been spun into yarn, knit or woven into fabric and subsequently reduced by a garnetting process into a fibrous state.
- K 6. *Shredded Clippings*: This term shall mean any new material which has been spun into yarn, knit or woven into fabric and subsequently reduced to a fibrous state.
- K 7. *Shoddy*: This term shall mean any garnetted or shredded clippings made of new material containing more than 5 percent of any foreign material.
- K 8. *Blends or Mixtures*: Unfelt blends or mixtures of staple cotton, cotton linters, or cotton by-products shall be described as "Blended Cotton". If the blends or mixtures are felted, they shall be described as "Blended Cotton Felt".
- K 9. *Cotton Felt*: This term shall be used only when fibers are garnetted or carded and used in layer form. It cannot be used when cotton batting or cotton felt scraps or clippings are stuffed or blown in the same manner as unfelted materials.
- (K9a). *Colored Cotton Felt*: This term shall be used when all or any portion of garnetted or carded cotton fibers are colored. This term shall not be used to describe garnetted cotton shoddy.
- K10. *Oil Percentages*: When any filling material contains more than five percent (5%) of oil, it must be described as Oily.

K11. *Dirt or Foreign Material*: When any filling material contains more than five percent (5%) of dirt or any other foreign material, it must be described as Dirty.

K12. *Colored*: This term shall be used when all or any portion of the cotton fibers are colored.

L. FEATHERS AND DOWN.

L 1. *Down*: This term shall mean the soft undercoating of waterfowl, consisting of the light fluffy filaments growing from one quill point but without any quill shaft. This term includes all real downs and it shall not be necessary to indicate the kind of down used, but if indicated on the label as a particular kind of down, such as goose down, duck down or eider down, the material must be as stated.

(L1a). *Down Fiber*: This term shall mean the barbs of down plumes separated by any process from the quill point. Any individual fibers resembling down closely enough to create doubt as to whether they are down fiber or feather fiber may be classed as down.

(L1b). A tolerance of 10 percent by weight of the down content stated on the label is permissible. Articles labeled as containing Down must contain not less than 90 percent pure down.

L 2. *Feathers or Natural Feathers*: This term shall mean the original or natural form and means feathers which have not been processed in any manner other than washing, dusting, sterilizing or disinfecting.

L 3. *Crushed Feathers*: This term shall mean feathers which have been processed by a curling or crushing machine which has changed the original form of the feather without removing the quill. Such stock shall be designated on the label as Crushed followed by the name of the fowl from which it came.

L 4. *Chopped Feathers*: This term shall mean feathers which have been chopped or cut into pieces. Such stock shall be designated on the label as Chopped followed by the name of the fowl from which they came.

L 5. *Stripped Feathers*: This term shall mean the barbs of feathers stripped by any process from the feather shaft, but not separated into feather fiber. Such designation shall include the name of the fowl from which they came.

L 6. *Quill Feathers or Wing and Tail Feathers*: Either of these terms shall mean the wing or tail feathers of any fowl.

L 7. *Waterfowl Feathers*: This term shall mean goose or duck feathers or any mixture thereof.

- L 8. *Damaged Feathers*: This term shall mean feathers which have been broken, injured by insects, or depreciated from the original value in any manner; provided however, that this term shall not apply to crushed feathers as defined in L3. Damaged feathers in excess of 10 percent by weight of the total feathers shall be indicated on the label and the name of the feathers shall be stated.
- L 9. *Blends or Mixtures*: Feather or down mixtures shall be designated by the foregoing definitions, by the name, character and percentage of each material used, or the entire mixture shall be designated by the name of the lowest grade of material used.
- L10. *Color*: The color of feathers or down need not be stated on the label, but if stated the contents shall be as declared. Feathers or down from waterfowl may be designated on the label as White or Gray as the case may be. Chicken or turkey feathers may be designated on the label as White or Colored as the case may be.
- L11. *Tolerance*: A tolerance of 10 percent by weight of the feather content stated on the label is permissible. Feathers of any fowl named on the label must contain not less than 90 percent of such feathers.
- L12. *Cleanliness*: All feather and down stocks shall be thoroughly cleaned prior to use by washing, dusting, sterilizing or disinfecting. Feather and down stocks having an oxygen number above 20 shall be deemed to be "not properly clean".
- L13. *Secondhand Feathers or Down*: Either of these terms means any such material which has been previously used for any purpose and shall be so designated on the required label for secondhand material with the proper classification of such feathers or down.

M. HAIR.

Classifications

Horse Tail Hair
Horse Mane Hair
Cattle Tail Hair
Cattle Hide Hair (Body Hair)
Hog Hair
Goat Hair

- M 1. Hair is the coarse filamentous epidermal outgrowth of such mammals as horses, cattle, hogs and goats. When used in the manufacture of bedding or as filling material thereof, it shall be clean, properly cured, free from epidermis, excreta or other foreign or objectionable substances or odors.

- M 2. *Curled Hair*: This term applies when any hair has been curled. The appropriate designation as to origin shall appear on the label preceded by the word Curled.
- M 3. *Uncurled Hair*: This term applies when any hair has not passed through a curling process. The appropriate designation as to origin shall appear on the label preceded by the word Uncurled.
- M 4. *Rubberized Hair*: This term shall mean any hair treated with liquid latex or synthetic rubber. When hair is rubberized the designation on the label shall state whether the rubber is Latex or Synthetic.
- M 5. *Rubberized Curled Hair Pieces*: This term shall mean trimmings and pieces of rubberized curled hair of indefinite size. The term shall be preceded by the term Latex or Synthetic.
- M 6. *Hair Blends or Mixtures*: When hair of two different origins is used in a blend or mixture, the kind and percentage by weight of each shall be stated on the label.
- M 7. *Hair and Fiber Blends or Mixtures*: When any other filling material of whatever origin is used in a blend or mixture with hair, the kind and percentage by weight of each such material shall be designated on the label.
- M 8. *Hair Pad*: This term shall mean hair which is interwoven or punched on burlap or any other woven material or otherwise fabricated into a pad, including the application of latex or synthetic rubber as a component and as a factor in the fabricating process. Percentages shall be based on the hair and fiber content only. No reference to or inclusion of the burlap or woven material backing is required on the label nor is the quantity or percentage of rubber when the rubber is used solely as a binder element.
- M 9. *Color*: Hair need not be identified as to color on the label, but if it is so identified it shall be as represented in all respects.
- M10. *Tolerance*: A tolerance of 10 percent by weight of the percentages stated on the label shall be permitted.
- M11. *Secondhand Hair*: This term shall mean any hair which has sustained prior use and such hair shall be so designated on the required secondhand label with the proper classification of such hair.
- M12. *Labeling Examples for Hair*:

Curled Hair Pad	{ Cattle Tail ... 15% }	100%
	{ Hog ... 85% }	
Curled Hair and Fiber Pad	{ Hog ... 70% }	100%
	{ Sisal Fiber ... 30% }	

Latex Rubberized Curled		
Hair Pad	{ Horse Mane .. 35% }	100%
	{ Hog 65% }	
Cattle Hide Hair Felt Pad		100%

N. WOOL.

- N 1. *Wool or Virgin Wool*: Either of these terms shall apply to the fleece of the sheep or lamb, which has been scoured or scoured and carbonized. It shall not be the by-product of any process of manufacture nor shall it have sustained prior use. It shall be free from kemp and vegetable matter.
- N 2. *Choice Wool or Choice Virgin Wool*: (Optional for those manufacturers who want to use and get credit for using a finer quality of wool). Either of these terms shall apply to Wool or Virgin Wool as defined above that is "¼ blood" (48s) or finer in grade, according to the United States Standards for grades of wool, and shall be natural or bleached white in color. The fibers shall be reasonably uniform in length, viz., it shall contain no admixture of short wool fibers. The term Choice Wool or Choice Virgin Wool shall not be used in describing the component parts of Wool Blends or Mixtures.
- N 3. *Wool By-Products*: This term shall include noils and fulling flocks from fabrics made entirely of new wool fibers.
- N 4. *Wool Waste*: This term shall embrace all other by-products and wastes of machines in any process of manufacture employing only new wool fibers and shall include wool pills, and shank and tag wools.
- N 5. *Tanners Wool*: This term shall apply to wool reclaimed from tanned sheepskins.
- N 6. *Wool Shoddy*: This term shall apply to any wool fiber which has been spun into yarn, knit or woven into fabric and subsequently cut up, torn up, broken up, ground up or otherwise defabricated and shall be designated on the label as Wool Shoddy. Wool shoddy shall not contain in excess of five percent (5%) of fibers other than wool.
- N 7. *Wool Blends or Mixtures*: When two or more of the above materials are used in a product, they shall be described on the label as required above in the order of their predominance.
- N 8. *Wool Batt or Wool Felt*: Either of these terms shall be used only when wool fibers alone are garnetted or carded and used in layer form. Neither can be used when wool batting or wool felt scraps or clippings are stuffed or blown in the same manner as unfelted materials. Either of these terms must be followed by a listing of the component material as required above.

- N 9. *Oil and Grease Percentages*: When any wool filling material contains more than five percent (5%) oil, wool grease or other free fat, it shall be described as Oily.
- N10. *Damaged Wool*: This term shall be applied to wool, although new, which has been damaged through excessive exposure to the elements, faulty storage, fire, or in any other manner, or has begun to disintegrate.
- N11. *Tolerance*: Materials which contain not less than 95 percent wool shall be considered wool.
- N12. *Secondhand Wool*: This term shall apply to any wool which has been previously used for any purpose.
- O. MISCELLANEOUS FILLING MATERIALS.
- O 1. *Casein Fiber*: This term shall mean the textile filament or fiber made from casein by chemical and mechanical processes.
- O 2. *Casein Fiber Waste*: This term shall mean the by-product of any preparing or spinning machinery through which the casein filaments or fibers pass in any operation prior to the weaving or knitting process and shall include "napper" and "fulling flocks."
- O 3. *Coco Husk Fiber*: This term shall mean the fibrous growth obtained from the husk of the coconut.
- O 4. *Excelsior*: This term shall mean shredded threadlike wood fibers, but shall not include waste products such as shavings, sawdust or similar waste. Terms such as Woodwool shall not be used to described excelsior.
- O 5. *Flax Tow*: This term shall mean the coarse, broken and refuse parts of flax separated from the fine fibrous parts in preparing the fibers for spinning.
- O 6. *Fur Fiber*: This term shall mean the fine soft under fur, with or without the usual guard hair, removed from the tanned or untanned pelts of mammals of the class of furbearers. The name of the animal may be stated on the label, and when so indicated shall be a true statement.
- O 7. *Glass Fiber*: This term shall mean the very fine filaments or fibers made of glass.
- O 8. *Hay*: This term shall mean any grass, properly cured and dried, free from dust, burrs, sticks or other objectionable material.

- O 9. *Jute Fiber*: This term shall mean the bast fiber derived from any species of the corchorus plant.
- O10. *Jute Tow*: This term shall mean the broken and refuse parts of jute separated from the fine fibrous parts in preparing the fibers for spinning.
- O11. *Jute Waste*: This term shall mean the by-product of any machines through which jute fiber passes in spinning into yarn or cordage, but prior to the process of weaving.
- O12. *Kapok*: This term shall mean the mass of fibers investing the seed of the kapok tree (*Ceiba Pentandra*). Any additional statement, descriptive of the geographical origin or of the quality of such fibers, shall be a true statement when designated on a label.
- O13. *Latex Foam Rubber*: This term shall mean natural rubber which has been converted into a stable foamy mass and molded into suitable shapes for use in bedding products.
- A. *Latex Foam Rubber Pieces*: This term shall mean latex foam rubber which has been cut or broken into pieces of indefinite size, but shall not apply to shredded latex foam rubber.
- B. *Shredded Latex Foam Rubber*: This term shall mean latex foam rubber which has been subjected to a shredding process.
- C. *Molded Shredded Latex Foam Rubber*: This term shall mean shredded latex foam rubber molded together by use of an adhesive binder.
- D. *Synthetic Foam Rubber*: This term shall mean any of the various artificial substances closely resembling natural rubber converted into a staple foamy mass and molded into suitable shapes for use in bedding products.
- E. *Cemented Foam Rubber Pieces*: The use of this term may be applied to foam rubber pieces which have been cemented together.
- F. *Cemented Shredded Foam Rubber*: This term may be applied to shredded foam rubber which has been cemented together.
- G. When a fabric-topped foam or sponge rubber product is used as a cover for an article of bedding, its presence shall be disclosed on the tag and its percentage by weight given.

- O14. *Latex Sponge Rubber*: This term shall mean natural rubber expanded into cellular sheets and vulcanized in that state into slabs.
- A. *Latex Sponge Rubber Pieces*: This term shall mean latex sponge rubber cut or broken into pieces of indefinite size, but shall not apply to shredded latex sponge rubber.
 - B. *Shredded Latex Sponge Rubber*: This term shall mean latex sponge rubber which has been subjected to a shredding process.
 - C. *Molded Shredded Latex Sponge Rubber*: This term shall mean shredded latex sponge rubber molded together by use of an adhesive binder.
 - D. *Synthetic Sponge Rubber*: This term shall mean any of the various artificial substances closely resembling natural rubber expanded into cellular sheets and vulcanized in that state into slabs.
 - E. *Cemented Sponge Rubber Pieces*: The use of this term may be applied to sponge rubber pieces which have been cemented together.
 - F. *Cemented Shredded Sponge Rubber*: This term may be applied to shredded sponge rubber which has been cemented together.
- O15. *Milkweed Fiber*: This term shall mean the surface fiber from the inside of the seed pods of milkweed plants (*Asclepias*).
- O16. *Moss*: This term shall mean the processed material derived from the moss growth found in swamps and on trees.
- O17. *Nylon*: This term applies to a synthetic protein-like filament or textile fiber (Polymide).
- O18. *Nylon Waste*: This term shall mean the by-product of any preparing or spinning machinery through which the nylon filaments or fibers pass in any operation prior to the weaving or knitting process.
- O19. *Palm Fiber*: This term shall mean the fibrous material obtained from the leaf of the palm, palmetto or palmyra tree.
- O20. *Rayon*: This term shall mean the synthetic filament or fiber made from modified cellulose.
- O21. *Rayon Waste*: This term shall mean the by-product of any preparing or spinning machinery through which the rayon fibers pass in any operation prior to the weaving or knitting process and shall include "napper" and "fulling flocks."

- O22. *Sea Grass*: This term shall mean any of the material obtained from maritime plants or seaweeds.
- O23. *Silk Waste*: This term shall mean the by-product of any preparing or spinning machinery through which the silk filaments or fibers pass.
- O24. *Sisal Fiber*: This term shall mean the leaf fiber derived from the Agave Sisalana and similar species of Agaves.
- O25. *Sisal Fiber Tow*: This term shall mean the residual fibers left after the extraction of the spinnable sisal fiber from the leaf. For the purpose of these regulations, this includes the product known as Bagassi. It shall not contain over 3 percent (3%) pulp.
- O26. *Sisal Fiber Waste*: This term applies to the sisal fiber waste of cordage mills including rope and cordage ends, but shall not contain knots and refuse.
- O27. *Straw*: This term shall mean the stalk or stem of grain, such as wheat, rye, oats, rice and the like, after threshing. The kind of straw need not be stated on the label, but if so indicated, shall be a true statement. It shall be free from chaff, beards, bristles, husks, glumes, dirt or other extraneous matter.
- O28. *Tula Fiber*: This term shall mean the leaf fiber derived from the Tula istle and similar species of Agaves; sometimes called Tulatex. The term Tulatex is a trade name and shall not be used.
- O29. *Vinyon Fiber*: This term shall apply to a synthetic filament or fiber which is a vinyl resin product prepared by the conjoint polymerization of vinyl chloride and vinyl acetate.
- O30. *Vinyon Fiber Waste*: This term shall apply to the by-product of any preparing or spinning machinery through which the vinyon filaments or fibers pass in any operation prior to the weaving or knitting process, and shall include "napper" and "fulling flocks."
- O31. *Wood Fiber Pad*: This term shall apply to wood which has been reduced to a fibrous state and subsequently fabricated into a flat resilient mass.
- O32. *Cleanliness*: All miscellaneous filling materials used in the manufacture of bedding products shall be clean and free from trash, pith, pulp, extraneous matter, oil and grease.
- O33. *Fiber*: This term shall mean any threadlike tissue. The term shall be preceded by a designation which will disclose the true source from which the fiber was obtained. Labeling examples for fiber would be Hemp Fiber, Flax Tow Fiber, etc.

- O34. *Secondhand*: This term shall be applied to any of the above materials which have been previously used for any purpose.
- O35. Tolerances are allowed only where specifically designated for the purpose of adjusting errors due to difficulties in arriving at exact percentages. Tolerances are not intended to permit deliberate admixture of inferior materials.
- P. VEGETABLE AND SYNTHETIC FIBERS AND SYNTHETIC FOAMS
- P 1. *Acetate Fibers or Cellulose Acetate Fibers*: These terms shall be used for filling materials made of acetate.
- P 2. *Acrylic Fibers*: This term shall be used for a long-chain synthetic polymer which contains not less than 85 percent acrylonitrile and which is formed into a filament.
- P 3. *Azlon*: A generic term for fibers or filaments manufactured from modified proteins or derivatives thereof, with or without lesser amounts of nonfiber-forming materials. The term "Azlon" shall be used to designate fibers manufactured from azlon.
- P 4. *Dacron*: This term shall not be used. See Polyester Fibers.
- P 5. *Polyester Fibers*: This term shall be used to designate long-chain synthetic polymers which contain 85 percent or more of the polymeric esters.
- P 6. *Polyethylene Fibers*: This term shall be used to designate fibers made from polymers and/or copolymers of ethylene.
- P 7. *Vinyl Fibers*: This term shall be used to designate fibers or filaments manufactured from vinyl.
- P 8. A foam product means a polymerized material consisting of a mass of thin-walled cells produced chemically or physically and shall be designated on the tag as Foam together with the name of the organic base from which it is made.
- P 9. *Polyurethane Foam*: This term applies to a cellular urethane product which is created by the interaction of an ester and a carbamic acid derivative.
- P10. *Polystyrene Foam*: This term shall be applied to foam produced during the polymerization of a styrene monomer.
- P11. *Vinyl Foam*: This term shall be applied to a foam produced from vinyl.
- P12. The term "pieces" shall follow the terms set forth in P9, P10, and P11 above, whenever the foam product consists of mere pieces.
- P13. The term "shredded" shall precede the terms set forth above whenever the foam product has been subjected to shredding process.
- P14. The term "cemented" shall be applied to a shredded foam which has been cemented together; e. g., cemented shredded urethane foam.

P15. When a fabric-topped foam or sponge product is used as a cover for an article of bedding, its presence shall be disclosed on the tag and its percentage given.

Q. FACSIMILES OF LABELS APPROVED FOR USE IN INDIANA

NO. 1

LABEL FOR ALL NEW MATERIAL

Note (1) All above printing preferably in black ink on red manila paper stock.
(2) Size of Tag: Minimum dimensions shall be 2½ inches wide, 5¼ inches long.

Regulation HSB 4.

STERILIZATION OR DISINFECTION

- A. Each establishment using, or selling secondhand articles of bedding or filling materials therefor shall either have a permit for its own sterilization or disinfection equipment, or have its sterilization or disinfection performed by anyone having such a permit.
- B. Every applicant for permission to operate a sterilizing or disinfecting process shall furnish with such application, detailed plans and specifications in duplicate (2 copies) of the proposed equipment. A permit is valid for one year from date of issue and is renewable prior to expiration date on payment of \$10. If renewed after expiration date, it is renewable only upon payment of the initial permit fee of \$25.
- C. All unsterilized or undisinfected secondhand articles of bedding or materials therefor shall be separately stored and carefully segregated from new or clean articles of bedding or materials therefor. No new or clean materials shall be stored within a room or space used for sterilizing or disinfecting secondhand materials. Sterilizing or disinfecting chambers shall not be used for storage purposes.

- D. A sterilization or disinfection permit number shall not be misused.
- E. All sterilization or disinfection processes shall follow the method approved for that type process.
- F. All sterilization or disinfection equipment shall be maintained in good condition, no leaky joints, faulty construction, etc.
- G. All sterilization or disinfection permits must be kept posted conspicuously, preferably, on the outside wall of the sterilization or disinfection chamber.
- H. The required written record of sterilization or disinfection performed shall be kept in a bound ledger, and such records shall be available for examination at any time by the Board. The record shall show the date on which sterilization or disinfection was performed, and the articles of bedding or materials that were sterilized or disinfected and the name and address of the owner. EXAMPLE:

DATE	ARTICLE	OWNERS NAME AND ADDRESS
3-24-50	4 mattresses	Acme Furn. Store, 919 First Ave., Indianapolis.
	1 bed davenport with three loose cushions	John Doe, 6120 Evans St., Indianapolis.

- I. The Board shall approve or disapprove an application for each separate installation and shall approve or disapprove each process. Processes to be approved shall either thoroughly sterilize or disinfect the article of bedding or materials thereof, to be processed. Such process shall not be placed in commercial operation until a numbered permit has been issued by the Board. Processes which comply with the following requirements will be approved upon application and inspection.

- I. 1. *Steam Pressure:* A Steam pressure process, when approved by the Board, may be used to sterilize or disinfect any article of bedding or filling material.

Satisfactory Compliance: Articles of bedding or filling materials therefor sterilized or disinfected by this process shall be subjected to treatment by live steam for thirty (30) minutes at a pressure of fifteen (15) pounds and at a temperature of 250 degrees Fahr., or for twenty (20) minutes at a pressure of twenty (20) pounds and at a temperature of 260 degrees Fahr. Chamber must be steam tight, sufficiently strong to withstand the pressure applied, be equipped with visible pressure and temperature gauges and necessary safety devices. Chamber must be provided with wire or lattice work shelving which provides a minimum clearance of one (1)

inch from bottom, top, sides and between articles of bedding being sterilized or disinfected.

- I. 2. *Dry Heat.* Dry hot air, when approved by the Board, may be used to sterilize or disinfect articles of bedding or filling materials thereof.

Satisfactory Compliance: Sterilization or disinfection by the dry heat method requires developing and holding a temperature of 230 degrees Fahr. for a minimum period of two (2) hours after the temperature of 230 degrees Fahr. plus or minus 5 degrees is attained in an approved chamber. Steam, electricity or flue gases may be used to produce the heat but gas will not be approved for heating unless an indirect system is used where there could be no possibility of igniting the materials being sterilized or disinfected. A thermostat shall be connected with the heating device to provide and maintain a reasonably uniform temperature of 230 degrees Fahr. plus or minus 5 degrees Fahr. A recording thermometer shall be used to automatically record the temperature and time of each sterilization or disinfection period. The operator shall initial and date each sterilization or disinfection period on the recording thermometer charts and such charts shall be kept carefully filed for examination at any time by the Board.

- I. 3. *Formaldehyde and Moisture.* Formaldehyde gas in the presence of moisture, when approved by the Board, may be used to sterilize or disinfect articles of bedding or filling materials thereof which is not compressed to a degree in excess of the usual compression of cotton felt. Articles of bedding or filling materials shall be so spaced in approved sterilizing or disinfecting chamber as to allow free circulation of gas; not less than 4 inches on all sides and between articles. The exhaust from the sterilization or disinfection chamber shall discharge above the roof of building in such manner as will not create a health hazard. Formaldehyde being a toxic gas, provisions must be made to preclude any danger to employees in workroom. A minimum temperature shall be maintained in sterilization or disinfection chamber of not less than 70 degrees Fahr.

Satisfactory Compliance: Articles of bedding or filling materials thereof to be sterilized or disinfected by this method shall be treated with formaldehyde in a moist atmosphere not less than 70 degrees Fahr. for a period of at least ten (10) hours. Formaldehyde gas shall be generated from the use of one (1) pint of formaldehyde solution (37%) to each

1,000 cubic feet of air space in sterilizing or disinfecting chamber or through the use of any commercial fumigators which generate an equivalent quantity of gas. The minimum quantity of solution permitted is two (2) ounces regardless of how small the sterilizing or disinfecting chamber is. The solution must be heated or boiled to release the gas. Chamber must be gas tight and equipped with air inlet and outlet. Tight closure gate valves shall be provided on both air inlet and outlet. Shelving shall be of wire or lattice type construction or mattresses may be suspended from suitable hangers with proper spacing. Formaldehyde will not sterilize or disinfect unless moisture is present and the gas is used for the full period required, a minimum of ten (10) hours. Care must be taken that no fire hazard is present if a flame is used to vaporize the formaldehyde. This process is a germicidal treatment only and is not recommended as an insecticide.

NOTE 1. The safest and most convenient way to release the gas from the formaldehyde solution is to add to the solution one-half ($\frac{1}{2}$) the amount of potassium permanganate. This boils the solution and releases the gas. The moist atmosphere in the sterilization or disinfection chamber may be obtained by thoroughly sprinkling the floor of the chamber with warm water just before beginning the sterilization or disinfection process.

NOTE 2. There are several types of commercial "fumigators" on the market. Any of these which uses formaldehyde of the proper quantity and quality will be acceptable but those which contain but 2 ounces of "active ingredient" and yet purport to be able to sterilize or disinfect the contents of a room having 1,000 cubic feet of space will not be accepted unless a sufficient number are used to supply gas in the quantity required herein, i.e., the equivalent of gas generated from 1 pint of formaldehyde solution (37%) to each 1,000 cubic feet of space.

NOTE 3. The specific gravity of formaldehyde solution is such that 1 pint equals approximately 15 ounces. To figure the necessary amount of formaldehyde to use, based upon the size of the sterilizing or disinfecting chamber, multiply the length, height and width in feet to obtain the cubical area. Then multiply the cubical area by 15 and point off the three right hand figures. The result will be the number of ounces or "fifteenths of a pint" required. *Example:* Chamber is 8'x7'x6' equals 364 cubic feet \times 15 equals 5.460 or 6 ounces (next higher unit). Use 6 ounces of formaldehyde solution or 6/15 of a pint for a chamber containing 364 cubic feet of space.

- I. 4. *Carbon Dioxide and Ethylene Oxide*: A mixture of carbon dioxide and ethylene oxide gas in proper ratio, when approved by the Board, may be used to sterilize or disinfect articles of bedding, or filling materials therefor which is not compressed to a degree in excess of the usual compression of cotton felt. Approved ratio of gas mixture is 9 parts Carbon Dioxide to 1 part Ethylene Oxide. The two gases are obtainable commercially in the above ratio ready mixed in cylinders.

Satisfactory Compliance: Articles of bedding or filling material therefor, when sterilized or disinfected by this method shall, for each 100 cubic feet of chamber capacity, use a minimum of 1.65 (one and sixty-five hundredths) pounds of commercially mixed carbon dioxide and ethylene oxide in above ratio. *Example*: A 330 cubic foot chamber would require 3.3×1.65 equals 5.44 or $5\frac{1}{2}$ pounds of gas mixture.

Exposure period is 24 hours at a temperature inside chamber of 70°F, or 6 hours at a temperature of 100°F. If the quantity of gas is doubled, the exposure period is 10 hours at 70°F or $2\frac{1}{2}$ hours at 100°F.

The introduction of gas into chamber shall be through gas-tight connections between gas cylinder and chamber. After introduction of gas into chamber, the circulating system shall remain in full operation during the entire processing period. Gas cylinders when not in use shall be stored in a reasonably cool place 70°F or less and where direct sunlight does not increase this temperature appreciably.

Sterilization or disinfection chamber shall be completely gas-tight and able to withstand an internal pressure of 1 to 2 pounds per square inch. An adequate and approved system, which will include the use of a centrifugal type fan, shall be provided for circulating the gas during the processing period and for exhausting the gas at the end of processing period. The exhaust fan shall have a rated capacity three times the cubical content of chamber. *Example*: A 300 cubic foot chamber shall have an exhaust fan with a rated capacity of not less than 900 C.F.M. Motors to operate the circulating and exhaust system shall be Underwriters approved whether located inside or outside chamber. The chamber shall be provided with an exhaust duct of adequate capacity to the outside air discharging above roof of building housing chamber.

Top of exhaust stack shall be provided with an approved weather cap and shall not discharge nearer to a residence than 100 feet. Exhaust duct shall have sealed joints inside building and rivet or friction joints outside building. Positive locking type exhaust valve shall be provided in exhaust

duct and positive locking type air inlet port shall be provided in door or wall opposite exhaust opening. Air inlet port shall not be less than 6 inches in diameter. A thermostat shall be connected with the heating device to provide and maintain a reasonably uniform temperature plus or minus 5 degrees Fahr. of temperature inside chamber. A recording thermometer shall be provided to automatically record the temperature and time of each sterilization or disinfection period. The operator shall initial and date each sterilization or disinfection period on the recording thermometer charts and such charts shall be kept carefully filed for examination at any time by the Board. Room in which chamber is located shall be separated from other work areas and provided with mechanical ventilation.

All equipment and its installation shall be approved in each instance before being placed in commercial operation and tests to demonstrate that chamber is gas-tight shall be made at any time as required by the Board.

The mass temperature of articles or material to be processed shall not be less than 70°F and room in which chamber is located shall be maintained at a minimum temperature of 70°F. Articles in chamber shall be separated from each other by a space of not less than 1 inch in such manner that the largest surfaces are exposed. Chamber shall be loaded to permit free circulation throughout. An open area approximately 30" x 30" x 36" shall be allowed at point of entry of gas into chamber to permit vaporization. At the end of required exposure period the exhaust system shall be operated continuously not less than 20 minutes before entering chamber.

- I. 5. *Dry Cleaning*: Dry cleaning, when approved by the Board, may be used to sterilize or disinfect articles of bedding or filling material thereof.

Satisfactory Compliance: Sterilization or disinfection by dry cleaning shall be deemed to have been met when bedding articles or materials have been subjected to a commercial dry cleaning process.

- I. 6. FEATHERS OR DOWN.

- (1). *New Feathers or Down*: Sterilization or disinfection application must indicate that feathers or down are thoroughly washed and rinsed, that live steam and dry heat are applied and that feathers or down are free of dust or dirt on completion of the process.

- (2). *Secondhand Feathers or Down*: Secondhand feathers or down articles of bedding will be considered as having been sterilized or disinfected when the contents and ticking are kept intact without opening and washed by a commercial laundry method with subsequent drying to remove moisture; or when processed by a method for which approval has been obtained from the Board.

I. 7. HAIR.

- (1). *New Hair*: Sterilization or disinfection application must indicate the entire process used for washing and curling (if curled), and that at some point during the process the hair remains in boiling water a sufficient period (not less than 1 hour) to kill all pathogenic organisms.
- (2). *Secondhand Hair*: Secondhand articles of bedding will be considered as having been sterilized or disinfected when the hair is removed from the ticking and washed by a commercial laundry method and subsequently dried to remove all moisture, and when the ticking is also washed and subsequently dried; or when processed by a method for which approval has been obtained from the Board.

I. 8. WOOL.

- (1). *New Wool*: Sterilization or disinfection application must indicate whether raw wool or previously scoured and carbonized wool is to be treated. The processing of raw wool must be set forth in detail and indicate that at some point during the scouring and carbonizing, the wool is subjected to wet or dry heat or acid treatment sufficient to kill all pathogenic spores and microorganisms. Wool fibers reclaimed from new fabric need not be re-sterilized or re-disinfected.
- (2). *Secondhand Wool*: Secondhand wool articles of bedding will be considered as having been sterilized or disinfected when the contents and cover are kept intact without opening and washed or dry cleaned by a commercial laundering or drycleaning method; or when processed by a method for which approval has been obtained from the Board.

- I. 9. *Other Method*: Articles of bedding or filling materials thereof may be sterilized or disinfected by any other method which is safe to use, and is adequately proficient to thoroughly sterilize or disinfect the product or material to be processed, and for which approval has been given by the Board.

Law Relating to

**Manufacture and Sale of
Mattresses and
Comforts**

Issued by

Iowa Department of Agriculture

L. B. LIDDY

Secretary

BULLETIN NO. 90-C

Published by
THE STATE OF IOWA
Des Moines

**LAW OF IOWA RELATING TO MANU-
CHAPTER 209, CODE OF IOWA, 1958
FACTURE AND SALE OF MATTRESSES
AND COMFORTS**

209.1. **Definitions.** For the purpose of this chapter:

1. A mattress shall include what is commonly known as a bed mattress, and also any other article for use as a bed pad, consisting of an outer covering of cloth, ticking, or other fabric, and stuffed or filled with hair, wool, moss, cotton, excelsior, or any other material.

2. A comfort shall include what is commonly known as a bed comfort and also any other article for use as a bed cover, consisting of an outer covering of cloth, or any other fabric, with wool, cotton or other material between.

209.2. **Materials used.** No person shall knowingly manufacture, introduce into the state, solicit orders for, sell, deliver, transport, have in possession with the intent to sell, or offer or expose for sale, any mattress or comfort which is made from any infectious, insanitary, or unhealthful material, or any material which has been previously used, except sterilized feathers.

209.3. **Labeling.** Every mattress and comfort offered or exposed for sale shall have attached upon the outside thereof, a cloth, or cloth-lined label not less than two by three inches in size, upon which shall be legibly written or printed, in the English language, in letters not less than one-eighth of an inch in height, a description of the materials used in the filling, with the name and address of the maker of such mattress or comfort. The sewing of one edge of said label securely to said article shall be sufficient.

209.4. **Form of label.** The label provided in section 209.3 shall be in substantially the following form, but may contain thereon, additional statements or information:

OFFICIAL STATEMENT

Manufactured of New Material

(Here describe kind and character of filling)

This article is made in compliance with chapter
209 of the Code of Iowa.

(Here state manufacturer's name and address.)

Factory Number

209.5 **Registration of manufacturers.** Every manufacturer of mattresses or comforts shall register with the department of agriculture and be assigned by it a factory number, which shall show on each label as required by section 209.4.

209.6. **Factory inspection—fees.** Each factory in the state, where mattresses or comforts are made, shall be inspected at least once each year, for which inspection a fee of ten dollars shall be paid to the state by the owner of the factory inspected, but no owner shall be required to pay fees in excess of twenty dollars for any one calendar year.

209.7. **Prima-facie evidence.** The finding of any infectious, insanitary, unhealthful, or second-hand material in that part of any factory devoted to the manufacture of mattresses or comforts, shall be prima-facie evidence that such material has been and is being used in violation of this chapter.

209.8. **Exception—remade mattresses.** This chapter shall not apply to any mattress or comfort made by any person for his individual or family use, nor to the remaking of any mattress or comfort not thereafter to be sold or offered for sale.

A remade mattress or comfort shall have attached thereto a label of the kind hereinbefore provided, except that such label shall bear the words "Remade from Used Material" in lieu of the words "Manufactured of New Material".

GENERAL PROVISIONS

CHAPTER 189

189.1. **Definitions.** For the purpose of this title:

1. "Article" shall include food, commercial feed, agricultural seed, commercial fertilizer, drug, insecticide, fungicide, paint, linseed oil, turpentine, and illuminating oil, in the sense in which they are defined in the various provisions of this title.

2. "Department" shall mean the department of agriculture and, wherever said department is required or authorized to do an act, it shall be construed as authorizing performance by a regular assistant or a duly authorized agent of said department.

3. "Secretary" shall mean the secretary of agriculture.

4. "Package" or "container," unless otherwise defined, shall include wrapper, box, carton, case, basket, hamper, can, bottle, jar, tube, cask, vessel, tub, firkin, keg, jug, barrel, tank, tank car, and other receptacles of a like nature; and wherever the expression "offered or exposed for sale or sold in package or wrapped form" is used it shall mean the offering or exposing for sale or selling of an article which is contained in a package or container as herein defined.

5. "Person" shall include a corporation, company, firm, society, or association; and the act, omission, or conduct of any officer, agent, or other person acting in a representative capacity shall be imputed to the organization or person represented, and the person acting in said capacity shall also be liable for violations of this title.

6. "Rules" shall include regulations and orders by the department of agriculture.

7. "United States Pharmacopoeia" or "National Formulary" shall mean the latest revision of said publications official at the time of any transaction which may be in question.

189.2 Duties. The department of agriculture shall:

1. Execute and enforce the provisions of this title, except chapters 203, 204 and 205, which shall be executed and enforced by the Pharmacy Examiners.

2. Make and publish all necessary rules, not inconsistent with law, for enforcing the provisions of this title.

3. Provide such educational measures and exhibits, and conduct such educational campaigns as are deemed advisable in fostering and promoting the production and sale of the articles dealt with in this title in accordance with the regulations herein prescribed.

4. Issue from time to time, bulletins showing the results of inspections, analyses, and prosecutions under this title. These bulletins shall be printed in such numbers as may be approved by the state printing board and shall be distributed to the newspapers of the state and to all interested persons.

189.3. Procuring samples. The department shall, for the purpose of examination or analysis, procure from time to time, or whenever said department has occasion to believe any of the provisions of this title are being violated, samples of the articles dealt with in this title which have been shipped into this state, offered or exposed for sale, or sold in the state.

189.4. Access to factories and buildings. The department shall have full access to all places, factories, buildings, stands, or premises and to all wagons, auto trucks, vehicles, or cars used in the preparation, production, distribution, transportation, offering or exposing for sale, or sale of any article dealt with in this title.

189.5. Dealer to furnish samples. Upon request and tender of the selling price by the department any person who prepares, manufactures, offers or exposes for sale, or delivers to a purchaser any article dealt with in this title shall furnish, within business hours, a sample of the same, sufficient in quantity for a proper analysis or examination as shall be provided by the rules of the department.

189.6. Taking of samples. The department may, without the consent of the owner, examine or open any package containing, or believed to contain, any article or product which it suspects may be prepared, manufactured, offered, or exposed for sale, sold, or held in possession in violation of the pro-

visions of this title, in order to secure a sample for analysis or examination, and said sample and damage to container shall be paid for at the current market price out of the contingent fund of the department.

189.7. **Preservation of sample.** After the sample is taken it shall be carefully sealed with a seal of the department and labeled with the name or brand of the article, the name of the party from whose stock it was taken, and the date and place of taking such sample. Upon request, a duplicate sample, sealed and labeled in the same manner, shall be delivered to the person from whose stock the sample was taken. The label and duplicate shall be signed by the person taking the same. The method of taking samples of particular articles may be prescribed by the rules of the department.

189.8. **Witnesses.** In the enforcement of the provisions of this title the department shall have power to issue subpoenas for witnesses, enforce their attendance, and examine them under oath. Such witnesses shall be allowed the same fees as witnesses in justice of the peace courts. Said fees shall be paid out of the contingent fund of the department.

* * * *

189.14. **Mislabeled articles.** No person shall knowingly introduce into this state, solicit orders for, deliver, transport, or have in his possession with intent to sell, any article which is labeled in any other manner than that prescribed by this title for the label of said article when offered or exposed for sale, or sold in package or wrapped form in this state.

189.15. **Adulterated articles.** No person shall knowingly manufacture, introduce into the state, solicit orders for, sell, deliver, transport, have in his possession with intent to sell, or offer or expose for sale, any article which is adulterated according to the provisions of this title.

189.16. **Possession.** Any person having in his possession or under his control any article which is adulterated or which is improperly labeled according to the provisions of this title shall be presumed to know its true character and name, and such possession shall be prima-facie evidence of having the same in possession with intent to violate the provisions of this title.

189.19. **Penalty.** Unless otherwise provided, any person violating any provision of this title, or any rule made by the department and promulgated under the authority of said department, shall be punished by a fine of not less than ten dollars nor more than one hundred dollars or by imprisonment in the county jail not to exceed thirty days, and on a third conviction for the same offense may be restrained by injunction from operating such place of business.

189.20. **May charge more than one offense.** In any criminal proceeding brought for violation of this title an information or indictment may charge as many offenses as it appears have been committed and the defendant may be convicted of any or all of said offenses.

189.21. **Common carrier.** None of the penalties provided in this title shall be imposed upon any common carrier for introducing into the state, or having in its possession, any article which is adulterated or improperly labeled according to the provisions of this title when the same was received by said carrier for transportation in the ordinary course of its business and without actual knowledge of its true character.

189.22 **Report of violations.** When it shall appear that any of the provisions of this title have been violated, the department shall at once certify the facts to the proper county attorney with a copy of the results of any analysis, examination, or inspection said department may have made, duly authenticated by the proper person under oath, and with any additional evidence which may be in possession of said department.

189.23. **County attorney.** The county attorney may at once institute the proper proceedings for the enforcement of the penalties provided in this title for such violations.

189.24. **Refusal to act.** If the county attorney refuses to act, the governor may, in his discretion, appoint an attorney to represent the state.

189.25. **Institution of proceedings.** In any case when it appears that any of the provisions of this title have been violated, the inspector having the investigation in charge shall, when instructed by the department, file an information against the suspected party.

✓ 189.26. **Goods for sale in other states.** Any person may keep articles specifically set apart in his stock for sale in other states which do not comply with the provisions of this title as to standards, purity, or labeling.

189.27. **Reports by dealers.** Every person who deals in or manufactures any of the articles dealt with in this title shall make upon blanks furnished by the department such reports and furnish such statistics as may be required by said department and certify to the correctness of the same.

189.28 **Contracts invalid.** No action shall be maintained in any of the courts of the state upon any contract or sale made in violation of or with the intent to violate any provision of this title by one who was knowingly a party thereto.

189.29. **Fees paid into state treasury.** All fees collected under the provision of this title shall be paid into the state treasury.

MAINE

Sections 155-162, Chap. 30, R.S. 1954
(amended 1955, c. 151; 1963, c. 49, § 1 & 2)

Department of Labor and Industry

State of Maine

Augusta

1963

Bedding and Upholstered Furniture

Sec. 155. Definitions. 1955, c. 151, §§ 1 and 2. 1963, c. 49, § 1.

I. Article of bedding. "Article of bedding" in sections 155 to 162 shall mean any mattress, upholstered box spring, pillow, comforter, cushion, muff, bed quilt or similar article designed for use for sleeping purposes.

"Article of bedding" in sections 155 to 162 shall also mean any glider, hammock, chaise longue or other substantially similar article which is wholly or partly upholstered.

II. Article of upholstered furniture. "Article of upholstered furniture" in sections 155 to 162 shall mean chairs, sofas, studio couches and all furniture in which upholstery or so-called filling or stuffing is used whether attached or not.

II-A. Cushion. "Cushion" in sections 155 to 162 shall mean any bag or case made of leather, cotton or other textile or plastic material, which is filled in whole or in part with concealed material, capable of use for sitting, sleeping, resting or reclining purposes but does not include any seat or cushion which is used as an integral part of any automobile, truck, bus, airplane, railroad equipment or on any mechanized equipment used generally in the construction industry or in agriculture.

III. New. The word "new" as used in sections 155 to 162 shall mean any article or material which has not been previously used for any other purpose. Manufacturing processes shall not be considered prior use.

IV. Secondhand. The term "secondhand" as used in sections 155 to 162 shall mean any article or material, or portion thereof, of which prior use has been made in any manner whatsoever.

V. Person. The term "person" as used in sections 155 to 162 shall include individuals, partnerships, companies, corporations and associations.

VI. Department. The term "department" where used in sections 155 to 162 shall mean the Department of Labor and Industry.

VII. Stuffed Toy. "Stuffed toy" shall mean any article intended for use by infants or children as a plaything which is filled with or contains any fiber, chemical or other stuffing.

Sec. 156. Secondhand materials. 1963, c. 49, § 2. No person shall manufacture for sale, sell, lease, offer to sell or lease, or deliver or consign in sale or lease, or have in his possession with intent to sell, lease, deliver or consign in sale or lease any article of bedding, upholstered furniture or stuffed toy, covered in sections 155 to 162, in which in the making, remaking or renovation thereof, any secondhand material has been used, unless such material, before such reuse, has been ef-

fectively cleansed and sterilized or disinfected by a process approved by the department and in accordance with the regulations of the department.

Sec. 157. Permits. Any person desiring to secure a permit qualifying them to apply an acceptable sterilizing or disinfecting process, as required by sections 155 to 162 shall submit to the department a plan of such apparatus and the process intended to be used for such sterilization and disinfection, and upon approval a numbered permit shall then be issued by the department. Such permit shall expire one year from date of issue and shall thereafter be annually renewed at the option of permit holder, upon submission of proof of continued compliance with the provisions of sections 155 to 162 and the regulations of the department.

For all initial permits issued there shall, at the time of issue thereof, be paid by the applicant to the department a fee of \$50, and an annual renewal charge of \$5 shall be paid to the same department.

A sterilization or disinfection permit may be revoked by the department upon proof of violation of any of the provisions of sections 155 to 162. A reissue of said permit shall be subject to the provisions as set forth for an initial permit.

Sec. 158. Articles to be tagged. Each article containing new material covered by sections 155 to 162 shall bear securely attached thereto and plainly visible a substantial white cloth tag, upon which shall be indelibly stamped or printed, in English, a statement showing the kind of materials used in filling such article, with approximate percentages when mixed, and with the word "new" clearly printed thereon.

Each article covered by sections 155 to 162 containing secondhand material, or a portion thereof, shall bear securely attached thereto and plainly visible a substantial yellow cloth tag, upon which shall be indelibly stamped or printed, in English, a statement showing the kind of materials used in filling such articles, with approximate percentages when mixed, and shall state "Sterilized and Disinfected."

The size of the tag required by this section shall be not less than 6 square inches, and the lettering thereon covering the statement of filling materials and whether new or secondhand, shall be in plain type not less than $\frac{1}{8}$ inch in height.

It shall be unlawful to use any false or misleading statement, term or designation on said tag or to remove, deface or alter, or to attempt to remove, deface or alter such tag or any statements thereon, or the adhesive stamp hereinafter described.

Sec. 159. Registration. No person shall sell or lease, or have in his possession with intent to sell or lease, in this State, any article covered by the provisions of sections 155 to 162, unless there be affixed to the tag required by said sections by the person manufacturing, selling or leasing the same, an adhesive stamp prepared and issued by the de-

partment. For the purposes of affixing adhesive stamps required by this section, pillows or cushions to be used with or part of an article of upholstered furniture shall be considered as one unit with said article.

The department shall register all applicants for stamps and assign to every such person a registration number, said registration number not to be used by any other person, and furnish to such applicant adhesive stamps in quantities of not less than 500, for which the applicant shall pay \$5 for each 500 stamps.

The department is hereby authorized to prepare and cause to be printed adhesive stamps, which shall contain a replica of the seal of the State, the registry number of the person to whom issued and such other matter as the department shall direct.

Sec. 160. Administration and enforcement. 1955, c. 151, § 3. The department is charged with the administration and enforcement of the provisions of sections 155 to 162; and may make and enforce reasonable rules and regulations for the enforcement of said sections, and shall have the power through its officers or agents to inspect the manufacture and sale or delivery of all articles or materials subject to the provisions of sections 155 to 162, to open and examine the contents thereof and to seize and hold for evidence any article in whole or in part which he has reason to believe is made or offered for sale in violation of the provisions of sections 155 to 162, or the rules and regulations of the department; and any places where any articles covered by said sections are made, remade or offered for sale, or where sterilization or disinfecting is performed under the provisions of said sections, shall be subject to inspection by the department through its officers or agents.

Sec. 161. Proceeds payable into the General Fund. All fees and other moneys collected in the administration of sections 155 to 162 shall be credited to the General Fund. Provided, however, that there shall always be available for the administration of the provisions of sections 155 to 162 state moneys in an amount not less than the revenue derived from the fees collected under the provisions of sections 155 to 162, except that any unexpended balance shall remain in the General Fund.

Sec. 162. Penalty. Any person violating any provision of sections 155 to 162, or the rules and regulations of the department established thereunder shall be guilty of a misdemeanor and upon conviction thereof shall be punished by a fine of not less than \$10, nor more than \$100, for each offense; and, in default of the payment of such fine, by imprisonment for not more than 10 days for each such offense.

Each article manufactured for sale, sold, leased, offered for sale or leased or possessed with intent to sell or lease, contrary to the provisions of sections 155 to 162, or of the rules and regulations established thereunder shall constitute a separate offense and shall be punishable as provided in this section.

MINNESOTA

ATTORNEY GENERAL, STATE OF MINNESOTA

St. Paul, April 6, 1964

THE HONORABLE ALAN SHORT, *Chairman*
Senate Fact Finding Committee on
Business and Commerce
California Legislature
State Capitol
Sacramento, California

Dear Senator Short:

Governor Karl F. Rolvaag has referred your request for information concerning the furniture and bedding industry to my office for attention and reply.

Please be advised that Minnesota currently has no laws governing the conduct of the furniture industry other than our false advertising, consumer fraud, and sales below cost statutes, copies of which are enclosed.

Insofar as the bedding industry is concerned, please be advised that Minn. Stat., 1961, Ch. 325 regulates that industry as follows:

1. No used material may be used in the manufacture of bedding, §325.25.
2. No bedding used in hospitals may be re-sold, §325.26.
3. All materials used in remaking or renovating bedding must be thoroughly sterilized, §325.27, by devices approved by Minnesota's Industrial Commission, §325.28; 325.30.
4. Industrial Commission has power to inspect places where bedding is manufactured or sold, §325.29.
5. Shoddy material must be so labeled, §325.31.
6. All bedding must be labeled according to statutory form before being sold, §325.32.
7. All feathers used in bedding must be thoroughly cured, sterilized or disinfected, §325.33.
8. Violation of the foregoing provisions constitutes a gross misdemeanor with a penalty of \$25-\$100 fine or imprisonment for 30-90 days.

When your senate fact finding committee has issued its final report on the furniture and bedding industry, would it be possible to have a copy of that report forwarded to our office?

Thank you for your cooperation in this matter.

Sincerely,

WALTER F. MONDALE
Attorney General

LAWS RELATING TO TRADE

The State Department of Business Development has prepared copies of the laws of Minnesota which relate to the conduct of trade. Any individual who desires a copy of the full text of any act should address the Department of Business Development and indicate the specific act or acts desired.

FALSE STATEMENT IN ADVERTISEMENT

(Minnesota Statutes, Section 620.52)

620.52. False Statement in Advertisement. Any person, firm, corporation, or association who, with intent to sell or in anywise dispose of merchandise, securities, service, or anything offered by such person, firm, corporation, or association, directly or indirectly, to the public, for sale or distribution, or with intent to increase the consumption thereof, or to induce the public in any manner to enter into any obligation relating thereto, or to acquire title thereto, or any interest therein, makes, publishes, disseminates, circulates, or places before the public, or causes, directly or indirectly, to be made, published, disseminated, circulated, or placed before the public, in this state, in a newspaper or other publication, or in the form of a book, notice, handbill, poster, bill, label, price tag, circular, pamphlet, program, or letter, or over any radio or television station, or in any other way, an advertisement of any sort regarding merchandise, securities, service, or anything so offered to the public, for use, consumption, purchase, or sale, which advertisement contains any material assertion, representation, or statement of fact which is untrue, deceptive, or misleading, shall, whether or not pecuniary or other specific damage to any person occurs as a direct result thereof, be guilty of a misdemeanor, and any such act is declared to be a public nuisance and may be enjoined as such.

The duty of a strict observance and enforcement of this law and prosecution for any violation thereof is hereby expressly imposed upon the commissioner of business research and development, and it shall be the duty of the county attorney of any county wherein a violation of this section shall have occurred, upon complaint being made to him, to prosecute any person violating any of the provisions of this section.

Section 1. [325.78] [Prevention of consumer fraud, definitions.] Subdivision 1. The following words and terms where used in this act shall have the meanings ascribed to them in this section.

Subd. 2. "Merchandise" means any objects, wares, goods, commodities, intangibles, real estate, or services.

Subd. 3. "Person" means any natural person or his legal representative, partnership, corporation (domestic and foreign), company, trust, business entity, or association, and any agent, employee, salesman, partner, officer, director, member, stockholder, associate, trustee, or cestui que trust thereof.

Subd. 4. "Sale" means any sale, offer for sale, or attempt to sell any merchandise for any consideration.

Sec. 2. [325.79] [Unlawful practices.] Subdivision 1. [Fraud, misrepresentation.] The act, use, or employment by any person of any fraud, false pretense, false promise, or misrepresentation, with the intent that others rely thereon in connection with the sale of any merchandise, whether or not any person has in fact been misled, deceived, or damaged thereby, is enjoined as provided herein.

Subd. 2. [Advertising media excluded.] Nothing herein contained shall apply to the owner or publisher of newspapers, magazines, or other printed matter wherein an advertisement appears, or to the owner or operator of a radio or television station which disseminates an advertisement.

Sec. 3. [325.80] [Remedies.] Subdivision 1. [Injunction.] The commissioner of business development or any county attorney may institute a civil action in the name of the state in the district court for an injunction prohibiting any violation of this act. The court, upon proper proof that defendant has engaged in a practice made enjoined by section 2 hereof, may enjoin the future commission of such practice. It shall be no defense to such an action that the state may have adequate remedies at law.

Subd. 2. [Service of process.] Service of process shall be as in any other civil suit, except that where a defendant in such action is a natural person or firm residing outside the state, or is a foreign corporation, service of process may also be made

by personal service outside the state, or in the manner provided by Minnesota Statutes, Section 303.13, Subdivision 1 (3), or in such manner as the court may direct. Process is valid if it satisfies the requirements of due process of law, whether or not defendant is doing business in Minnesota regularly or habitually.

325.02. Application. Section 325.03 shall apply only to the manufacture, production, or distribution of any commodity, article, goods, wares, or merchandise in general use or consumption. Sections 325.04 to 325.06 shall apply only to the selling, offering, or advertising for sale, giving away or offering or advertising the intent to give away of any commodity, article, goods, wares, or merchandise, in wholesale or retail trade.

325.03. Discrimination Unlawful. Any person, partnership, firm, or corporation, foreign or domestic, doing business in the state and engaged in the production, manufacture, or distribution of any printed or mimeograph matter, commodity, article, goods, wares, or merchandise in general use or consumption, who for the purpose or with the effect of injuring a competitor or destroying competition, shall discriminate between different sections, communities, or cities of this state by selling or furnishing such commodity, article, goods, wares or merchandise at a lower price, or rate in one section, community, or city, or any portion thereof, than such person, firm, or corporation, foreign or domestic, charges for such commodity, article, goods, wares, or merchandise in another section, community, or city, or any portion thereof, after making allowance for difference, if any, in the grade, quality, or quantity after equalizing the distance from the point of production, manufacture, or distribution and freight rates therefrom, shall be guilty of unfair discrimination; provided, that sections 325.01 to 325.07 shall not prevent any person, firm, or corporation from, in good faith, meeting local competition within any one section, community, village, or city. The inhibition hereof against locality discrimination shall embrace any scheme of special rebates, collateral contracts, or any device of any nature whereby such discrimination is, in substance or fact, effected in violation of the spirit and intent of sections 325.01 to 325.07.

325.04. Selling Below Cost Forbidden. Any retailer, wholesaler, sub-jobber or vending machines operator engaged in business within this state, who sells, offers for sale or advertises for sale, any commodity, article, goods, wares, or merchandise at less than the cost thereof to such vendor, or gives, offers to give or advertises the intent to give away any commodity, article, goods, wares, or merchandise for the purpose or with the effect of injuring a competitor or destroying competition, shall be guilty of unfair discrimination; and, upon conviction, subject to the penalty therefor provided in section 325.48, subdivision 2.

Any retailer, wholesaler, sub-jobber or vending machines operator who sells goods in any part of this state at prices lower than those exacted by the person elsewhere in the state for like qualities and grades and where the effect of such lower prices may be substantially to lessen competition or tend to create a monopoly in any line of business, or to injure, destroy, or prevent competition with the person selling at such lower prices, shall be guilty of unfair competition and subject to the penalties of section 325.48, subdivision 2; provided, that nothing shall prevent differentials in prices in different localities which make only due allowances for differences in "cost of doing business" or "overhead expense" and in costs of delivery for such goods to different localities; nor differences in prices in an endeavor made in good faith to meet the legal prices of a competitor selling the same commodity, articles, goods, wares or merchandise in the same locality or trade area.

The inhibition against sales below cost or locality discrimination shall embrace any scheme of special rebates, collateral contracts, or any device of any nature whereby such discrimination is, in substance or fact, effected in violation of the spirit and intent of sections 325.01 to 325.07.

325.05. Bankrupt Sales Not to Be Considered in Fixing Costs. In establishing the cost of a given article, goods, wares, or merchandise to the vendor, the invoice cost of the article, goods, wares, or merchandise purchased at a forced, bankrupt, close-out, or other sale outside of the ordinary channels of trade may not be used as a basis for justifying a price lower than one based upon the replacement cost as of date of the sale of the article, goods, wares, or merchandise replaced through the ordinary channels of trade, unless the article, goods, wares, or merchandise is kept separate from goods purchased in the ordinary channels of trade and unless the article, goods, wares, or merchandise is advertised and sold as mer-

chandise purchased at a forced, bankrupt, or close-out sale, or by means other than through the ordinary channels of trade, and the advertising shall state the conditions under which the goods were so purchased and the quantity of such merchandise to be sold or offered for sale.

325.06. Inapplicable Sales. The provisions of section 325.01, subdivisions 2 to 6, and sections 325.04 and 325.05 shall not apply to any sale made:

(1) In closing out in good faith the owner's stock, or any part thereof, for the purpose of discontinuing his trade in any such stock or commodity, and in case of the sale of seasonal goods or merchandise where style is the paramount feature or to the bona fide sale of perishable goods to prevent loss to the vendor by spoilage or depreciation, provided notice is given to the public thereof;

(2) When the goods are damaged or deteriorated in quality, and notice is given to the public thereof;

(3) By an officer acting under the orders of any court;

(4) In an endeavor made in good faith to meet the legal prices of a competitor selling the same commodity, articles, goods, wares, or merchandise in the same locality or trade area.

The price of a retail competitor which is less than eight percent above the manufacturer's published list price less his published trade discounts where the manufacturer publishes a list price, or in the absence of such a list price less than eight percent above the actual current delivered invoice or replacement cost without deducting customary cash discounts plus the amount of any excise or sales tax shall be prima facie evidence that it is not a legal price, within the meaning of this section.

The price of a wholesale or sub-jobbing competitor to a retailer, which is less than two percent above the manufacturer's published list price less his published trade discounts where the manufacturer publishes a list price, or in the absence of such a list price less than two percent above the actual current delivered invoice or replacement cost without deducting customary cash discounts plus the amount of any excise or sales tax shall be prima facie evidence that it is not a legal price, within the meaning of this section.

Any retailer, wholesaler, sub-jobber or vending machines operator may request the commissioner of the department of business development to ascertain and disclose to him, the current manufacturer's published list price less published trade discounts on any commodity, article, goods, wares, or merchandise, and it shall then be the duty of the commissioner of the department of business development, within 48 hours of such request, to ascertain and disclose to the person making such request, the current manufacturer's published list price less published trade discounts.

Failure to make such request by any person before reducing his price on any commodity, article, goods, wares, or merchandise below his cost shall be prima facie evidence of not acting in good faith within the meaning of this paragraph.

MINNESOTA MATTRESS LAW

Relating to Manufacture, Sale and Disinfection of Bed Mattresses and Other Bedding Materials, and Providing for Inspection Thereof

CHAPTER 358—G. L. 1929

AN ACT relating to manufacture, sale and disinfection of bed mattresses and other bedding materials, and providing for inspection thereof, with penalties for the violation of the provisions of said act and repealing Chapter 490, General Laws 1913.

Be it enacted by the Legislature of the State of Minnesota:

Section 1. That the term "bedding" as used in this act shall be construed to mean any mattress, upholstered spring, comforter, pad, cushion or pillow designed and made for use in sleeping or reclining purposes. The word "person" as used in this act shall be construed to impart the plural and the singular, as the case demands, and shall included individuals, corporations, partnerships, joint-stock companies, or other business associations who are manufacturers or dealers in bedding. The word "new" as used in this act, shall mean any material or article that has not

previously been used in the manufacture of bedding articles, or for any other purpose. The term "second hand" shall mean any material or article that has been previously used in the manufacture of bedding or for any other purpose. The word "shoddy" shall mean any material that has been spun into yard, knit or woven into fabric, and subsequently cut up, torn up, broken up or ground up.

Sec. 2. No person shall use in the making or remaking of any article of bedding as herein defined any material that has been used in any private or public hospital, or any material of any kind that has been used by or about any person having an infectious or contagious disease, or has formed a part of any article of bedding which has so been used. This section shall not prevent the renovating of bedding used in any private or public hospital.

Sec. 3. No person shall sell, offer for sale, consign for sale, or have in his possession with intent to sell, or consign for sale, any bedding used in a private or public hospital or any article of bedding that has been used by or about any person having an infectious or contagious disease.

Sec. 4. No person shall remake or renovate any article of bedding unless all the material to be used in said remake or renovated bedding shall first be thoroughly sterilized and disinfected by the methods set out herein, or by any other approved sterilization method:

(a) Dry heat of a temperature of not less than 160 degrees centigrade temperature for not less than one hour. A thermometer for registering the temperature visible from the outside of the room shall be provided where dry heat is used.

(b) Live steam with subsequent drying of the material over steam coils with a pressure of not less than twenty pounds of steam for twenty minutes. A gauge for registering steam pressure visible from the outside of the room shall be provided where steam under pressure is used and valved outlets shall be provided near the bottom and also the top of the room in cases where streaming steam is used.

(c) Formaldehyde and sulphur concurrently in a moist atmosphere for a period of not less than ten hours. Formaldehyde gas shall be generated from the use of one pint of formaldehyde solution, 37 per cent to each 1,000 cubic feet of air space, or through the use of any of the high class commercial fumigators which generate an equivalent quantity of gas. Sulphur shall be from the burning of three pounds of sulphur for each 1,000 cubic feet of air space. The moist atmosphere shall be produced by thorough sprinkling of the floor of the room with warm water just prior to the process of disinfection. The room shall be provided with a separate air inlet and also an exhaust connection, and shall be equipped with tight dampers or closure gates which can be operated from the outside of the room. Rooms for disinfection of bedding materials shall be made gas or steam tight. Shelving for loose bedding materials shall be of lattice or other open construction.

Solid shelves of a type to prevent passage of gas through the materials shall not be permitted.

Sec. 5. All devices and equipment before being used as a process for sterilization and disinfection shall be approved by the Industrial Commission of Minnesota, upon written application of the person desiring to use the same, and, when so approved, a numbered permit for such use shall be issued to the applicant by the Industrial Commission of Minnesota. Such permit shall expire one year from date thereof. Such system of sterilization and disinfection shall be kept in good condition and repair. Every person to whom a permit has been issued shall keep such permit conspicuously posted under glass near such sterilization or disinfection chamber. Refusal to display such permit in accordance with this act shall be sufficient reason to revoke the same. Nothing in this act shall prevent any person engaged in the making or remaking, renovating or sale of any article herein described which requires sterilizing and disinfecting under the provision hereof from having such sterilizing and disinfecting performed by any person to whom a permit for such purposes has been issued, providing the number of the permit, with date of sterilization, shall be printed on the tag or label attached to the article, and a copy of such kept by person doing such sterilization for reference.

Sec. 6. All places where bedding is made, remake, or renovated, or where materials for bedding are prepared, or establishments where said articles are offered for sale, or are in possession of any person with intent to sell, deliver, lease, or to consign them to an establishment where sterilizing and disinfecting is performed, shall be subject to inspection by duly appointed inspector for the Industrial Commission of Minnesota to ascertain whether the materials used or sold or the finished article enumerated conform to the requirements of this act. Inspector shall have authority to open such bedding to examine the material used in filling.

Sec. 7. No person shall sell, lease, offer to sell or lease, or deliver or consign for sale or lease, or have in his possession with intent to sell, lease, deliver or consign for sale or lease, any bedding made, remade, or renovated in violation of this act; or any second hand bedding unless since last used it has been thoroughly sterilized and disinfected by an approved method of sterilization.

Sec. 8. No person, firm or corporation, by himself or his agents, servants or employees, shall make or sell, or offer to sell, deliver or consign for sale, or have in his or their possession with intent to sell, deliver or consign for sale any bedding made of material that has theretofore been used as a container for or in contact with any animal or vegetable matter or any material hereinbefore designated as shoddy, unless the bedding shall be labeled as such, or any material that has theretofore been used unless the same shall have been cleaned and sterilized.

Sec. 9. No person shall make or remake, or sell, offer for sale, consign for sale, or have in his possession with intent to sell, offer for sale, or consign for sale any article of bedding as herein defined unless the same is labeled as follows:

Upon each of such articles of bedding there shall be securely sewed upon the outside thereof a muslin or linen label not less than three by four and one-half inches in size, upon which shall be in plain print, in the English language, a description of the material used as filling of such article of bedding; and if such material or any portion thereof shall not have been previously used, the words "manufactured of new material" shall appear upon said label, together with the name and address of the maker or vendor thereof. If any of the material used in the making or remaking of such article of bedding shall have been previously used, the words "manufactured of second hand material" or "remade a second hand material", as the case may be, shall appear upon said label, together with the name and address of the maker or vendor thereof, and also a description of the material used in the filling of such article of bedding. On any article of bedding, not remade, but which has been previously used, the word "second hand materials used in filling not known" shall appear upon said label, together with the name and address of the vendor thereof. The statement required under the section shall be in form as follows:

OFFICIAL STATEMENT

Materials used in filling-----

Made by -----

Vendor -----

Address -----

This article is made in compliance with an act of the State of Minnesota approved the 24th day of April, 1929.

The statement of compliance required in the foregoing "official statement" shall not be construed to imply that it is prohibited to state also that the article of bedding is made in compliance with act or acts of other states.

The words "manufactured of new material" or "manufactured of second hand material" or any article of bedding not remade, "second hand materials used in filling not known" together with the description of the material used as filling of an article of bedding shall be in letters not less than one-eighth ($\frac{1}{8}$) of an inch in height. Statement of filling shall conform to rules regulating the manufacture and sale of bedding as approved by the Industrial Commission of Minnesota. No term or description likely to mislead shall be used on any label required by this regulation in the description of the material used in the filling of any article of bedding. The label shall be attached to each mattress, pad, or upholstered spring by sewing all four edges of label.

Any person who shall remove, deface, alter, or shall cause to be removed, defaced or altered any label or tag upon any article of bedding so labeled or tagged under the provisions of this act, shall be guilty of a violation thereof.

Sec. 10. Feathers used in making, remodeling or renovating new or second hand bedding shall be thoroughly cured, sterilized or disinfected.

Sec. 11. Any person violating any of the provisions of this act shall be guilty of a misdemeanor, and upon conviction thereof shall be punished by a fine of not more than \$100.00, nor less than \$25.00, or by imprisonment for not more than 90 days, nor less than 30 days, or by both such fine and imprisonment for each offense.

Sec. 12. Chapter 490, General Laws 1913, and all acts or parts of acts inconsistent herewith hereby are repealed.

Approved April 24, 1929.

MISSOURI

Chapter 421—RSMo 1949

MATTRESSES

Sec.		Sec.	
421.010	Definitions	421.070	Used bedding to be sterilized and disinfected before sale
421.020	Permit to manufacture mattresses—fee—period of permit	421.080	Owner's name to be attached to renovated bedding
421.030	Permit issued, when—to be posted	421.090	Director to prosecute for violations
421.040	Inspection and supervision of manufacturers — revocation of permit—prosecutions	421.100	Right to purchase and hold for evidence
421.050	What not to be used in making mattresses	421.110	Offenses
421.060	Article of bedding offered for sale must be labeled	421.120	Misdemeanor

421.010. Definitions.—1. The term, “**bedding**,” as used in this chapter shall be construed to mean any mattress, upholstered spring, comforter, pad, cushion or pillow designed and made for use in sleeping or reclining purposes, except where the filling consists exclusively of sterilized feathers.

2. The word, “**person**,” as used in this chapter shall be construed to impart the plural and the singular, as the case demands, and shall include individuals, corporations, partnerships, joint stock companies, societies and associations.

3. The word, “**new**,” as used in this chapter shall mean any material which has not been used in the manufacture of another article or used for any other purpose.

4. The words, “**previously used**,” as used in this chapter shall mean any material which has been previously used in the manufacture of another article or used for any other purpose. (10253)

421.020. Permit to manufacture mattresses—fee—period of permit.—No person shall make, remake or renovate bedding, except a person, making, remaking or renovating bedding for his own use, until he has secured a permit from the director of the division of industrial inspection of the state department of labor and industrial relations, and has paid to the state collector of revenue an inspection and permit fee of twenty dollars, which such payment or charge shall constitute a factory inspection charge for the purpose of enforcing this chapter. The permit so issued by the director of the division of industrial inspection shall remain in force and effect until the end of the calendar year in which it was issued or until voided by the said director of the division of industrial inspection for failure to maintain the required sanitary con-

ditions in and around a factory in which bedding is made, remade or renovated or for failure to sterilize and disinfect properly all previously used materials used in making, remaking or renovating bedding. (10261, A. 1949 H. B. 2114)

421.030. Permit issued, when—to be posted.—When the director of the division of industrial inspection of the state department of labor and industrial relations has inspected any factory in the state of Missouri where bedding is being made or is to be made, remade or renovated, and has found that the factory conforms to the sanitary conditions prescribed by the director of the division of industrial inspection, then it shall be the duty of said director to issue to the person operating such factory a permit showing that it has been inspected and declared a proper place in which to make, remake or renovate bedding; and assign it a registry number by which said factory shall thereafter be known and designated in applying and enforcing the labeling and inspection provisions of this chapter. Said permit shall be posted by the person to whom it is so issued in a conspicuous place in said factory or office thereof. (10260)

421.040. Inspection and supervision of manufacturers—revocation of permit—prosecutions.—Every place where bedding is made, remade, or renovated, or held for sale, consignment or delivery shall be subject to supervision and inspection of the director of the division of industrial inspection of the state department of labor and industrial relations. Should said director find bedding being made, remade, renovated, or held for sale, consignment or delivery, in other than a sanitary condition, then the said director of the division of industrial inspection shall give the person responsible for this insanitary condition a reasonable length of time within the discretion of said director, said time, however, not to exceed sixty days, in which to remedy the said insanitary conditions. If the person responsible therefor fails to remedy the said insanitary condition, the said failure shall become a violation of this chapter, and the said director of the division of industrial inspection shall revoke and void the permit specified in section 421.030. Should said director have reason to believe that any person is violating or has violated any provision of this chapter, it shall be the duty of said director of the division of industrial inspection to prosecute or to cause prosecution of such person therefor. (10259)

421.050. What not to be used in making mattresses.—No person shall use in the making of bedding any material known as "shoddy" and made in whole or in part from any old or worn clothing, carpets, burlap or other fabric or material from which shoddy is constructed; any material not otherwise prohibited by this chapter of which prior use has been made; unless any and

all of said materials have been thoroughly sterilized, and disinfected by a reasonable process, approved by the division of health of the state department of public health and welfare. (10254)

421.060. Article of bedding offered for sale must be labeled.

—No person shall sell, offer for sale, consign for sale, or have in his possession with intent to sell, offer for sale, or consign for sale any article of bedding as herein defined unless the same be labeled as follows:

(1) Upon each of such articles of bedding, whether new, used or renovated there shall be securely sewed upon the outside thereof a cloth label, upon which shall be legibly written in ink or printed in the English language, in type of not less than one-eighth inch in size, the name of the material, or materials used as the filling of such article of bedding. If all the material used as the filling of such article of bedding shall not have been previously used, the words, "manufactured of new material," shall appear upon said label, together with the name and address of the maker or vendor thereof; if any of the materials used in the making or remaking of such article of bedding shall have been previously used, the words "manufactured of previously used material," shall appear upon said label together with the name and address of the maker or vendor thereof and also a description of the materials used in the filling of such article of bedding; on any article of bedding not remade, but which has been used, the words, "second-hand, materials used in filling not known," shall appear upon said tag or label, together with the name and address of the vendor thereof.

(2) The statement required under this section shall in form be as follows:

"OFFICIAL STATEMENT."

Manufactured of new material
 Manufactured of previously used material
 Second-hand materials used in filling not known
 Materials used in filling
 Maker or vendor
 Address

(3) If cotton lintens is used in the filling of any article of bedding the same shall be specifically designated as "cotton lintens" on any label required under this chapter; if what is known in the trade as "sweeps" or "oily sweepings" is used in the filling of any article of bedding such material shall be specifically designated as "mill sweepings" on any label required by this article.

(4) Wherever the word "felt" is used it shall be interpreted to mean that the material has been carded in layers by a garnett or felting machine.

(5) It shall be unlawful to use on any label concerning any bedding filling the word, "floss" or words of like import, if there has been used in filling said bedding any materials which are not termed as "kapok."

(6) It shall be unlawful to use in such statement on said label concerning any bedding filling the word, "hair" unless such bedding is manufactured of animal hair. If materials other than hair are used in combination with hair, the percentages of hair and such other material shall be stated.

(7) It shall be unlawful to use in the description on the label concerning any bedding any misleading term or designation, or any term or designation to mislead. (10257)

421.070. Used bedding to be sterilized and disinfected before sale.—No person shall sell, offer for sale, deliver, consign for sale, or have in his possession with intent to sell, deliver or consign for sale, any article of bedding which has been used unless the said article of bedding shall first be thoroughly sterilized and disinfected by a process approved by the division of health. (10256)

421.080. Owner's name to be attached to renovated bedding.—Any person who receives bedding to be renovated shall attach to each such article of bedding, at the time of its receipt, a tag upon which has been legibly written the name and address of the owner of the bedding and the date it was received for renovation. (10255)

421.090. Director to prosecute for violations.—If and when the director of the division of industrial inspection of the state department of labor and industrial relations finds that any article of bedding sold, or offered for sale, or delivered, or consigned or possessed with intent to sell, offer for sale, deliver or consign, that is not truthfully and correctly labeled as required by the provisions of this chapter, it shall be the duty of the director of the division of industrial inspection to prosecute said violation of this chapter and upon conviction to revoke the permit, the registry number and the rights conferred thereunder, heretofore mentioned, and the person whose permit has been so revoked and voided shall not make, remake or renovate or sell, or offer for sale or consign any article of bedding until he has secured another permit from the director of the division of industrial inspection. (10262)

421.100. Right to purchase and hold for evidence.—The director of the division of industrial inspection, his employees and assistants are hereby charged with the administration and enforcement of this chapter and shall have the right to purchase and hold for evidence at a trial for the violation of this chapter any article of bedding offered for sale or made in violation of this chapter. The director of the division of industrial inspection shall make reasonable rules and regulations for the enforcement of this chapter. (10263)

421.110. Offenses.—Any person who shall fail to comply with any of the provisions of this chapter shall be guilty of a violation thereof. The unit for separate and distinct offense in violation of this chapter shall be each and every article of bedding made, remade, sold, offered for sale, delivery, consigned or possessed with intent to sell, offer for sale, deliver or consign contrary to the provisions hereof. (10258)

421.120. Misdemeanor.—Any person or corporation violating the provisions of this chapter shall be guilty of a misdemeanor. (10264)

STATE OF NEBRASKA

LAW RELATING TO BEDDING

1943 Revised Statutes

71-507. Terms, Defined. In sections 71-507 to 71-515, the term "bedding" shall be construed to mean any mattress, mattress pad, bed comforter or quilted pad, designed and made for use in sleeping. The word "person" shall be construed to impart the plural and singular, as the case demands, and shall include corporations, companies, societies and associations.

71-508. Bedding; Act; Scope; How Construed. When construing and enforcing the provisions of sections 71-507 to 71-515, the act, omission or failure of any officer, agent or other person, acting for, or employed by, any corporation, company, society or association, within the scope of his employment or office, shall in every case be also deemed to be the act, omission or failure of such corporation, company, society, or association, as well as that of the person. The provisions of said sections shall not apply in the case of renovation of articles of bedding by or for the owner thereof for his own use.

71-509. Bedding; Renovation; Tag Indication Source Required. Any person who receives bedding to be renovated shall attach to each article of bedding at the time of its receipt, a tag upon which has been legibly written the name and address of the owner of the bedding, and the date it was received for renovation.

71-510. Bedding; Manufacture; Material Exposed to Disease; Use Prohibited; Exception. No person shall use in the making or remaking of any article of bedding as defined in section 71-507, any material of any kind that has been used by or about any person having an infectious or contagious disease, or has formed a part of any article of bedding which has been so used, unless such material has been disinfected by a process approved by the Department of Health.

71-511. Bedding; Use by Diseased Person; Sale Prohibited. No person shall sell, offer for sale, deliver, consign in sale, or have in his possession with intent to sell, deliver or consign in sale, any article of bedding that has been used by or about any person having an infectious or contagious disease.

71-512. Bedding; Sale; Labels Required. No person shall sell, offer for sale, consign in sale, or have in his possession with intent to sell, or consign in sale, any article of bedding as defined in section 71-507, unless the same be labeled and tagged as follows: (1) Upon each of such articles of bedding, there shall be securely sewed upon the outside thereof a muslin or linen label or tag, not less than two inches by three inches in size, upon which shall be legibly written or printed, in the English language, the materials used in the filling of such article of bedding; (2) if all the material used in the manufacture of such articles of bedding shall not have been previously used, the words "Manufactured of New Material" shall appear upon such label or tag, together with the name and address of the maker or his registered factory number; (3) if any of the material used in the making or remaking of such article of bedding shall have been previously used, the words "Manufactured of Used Material" or "Remade of Used Material," as the case may be, shall appear upon such tag or label, together with the name and address of the maker or his registered factory number, and also a description of the material used in the filling of such article of bedding; (4) the words "Manufactured of New Material" or "Manufactured of Used Material" or "Remade of Used Material," together with a description of the materials used as a filling for articles of bedding, shall be of letters not less than one eighth of an inch in height; and (5) in the description of material used on such label or tag, it shall be unlawful to use in the description of such material, used as the filling of any article of bedding, any term or designation likely to mislead. Any person who shall remove, deface or alter, or shall cause to be removed, defaced or altered, any label or tag upon any article of bedding so labeled or tagged under the provisions of this section, shall be guilty of the violation thereof.

71-513. Bedding Factories; Registration Required; Inspection; Duty of Department of Health; Fee. Every manufacturer of bedding in the State of Nebraska shall register with the Department of Health, and be assigned by it a factory number, which shall show on the label attached to each article of bedding. Each factory in the state, where bedding is made, shall be inspected at least once a year, for which inspection a fee of ten dollars shall be paid to the state by the owner of the factory inspected, but no owner shall be required to pay fees in excess of twenty dollars for any one calendar year.

71-514. Bedding; Act; Enforcement. The unit for a separate and distinct offense in violation of sections 71-507 to 71-515 shall be each and every article of bedding made, remade, sold, offered for sale, delivered, consigned or possessed with intent to sell, deliver or consign, contrary to the provisions of said sections. It shall be the duty of the Department of Health, when it has reason to believe that any of the provisions of said sections are being or have been violated, to make an immediate investigation, and, if it finds the facts warrant, it shall present the same to the county attorney for the county in which the supposed violation has occurred, and it shall thereupon be the duty of the county attorney to cause appropriate proceedings to be begun and prosecuted in the proper court for the enforcement of the penalties herein provided for.

71-515. Violations; Penalty. Any person violating the provisions of sections 71-507 to 71-515 shall be deemed guilty of a misdemeanor and upon conviction thereof shall be fined not less than twenty-five dollars nor more than five hundred dollars, or be imprisoned for not more than six months, or both.

STATE OF NEVADA
LAW REGULATING THE SALE OF
USED BEDDING

1945

STATE HEALTH DEPARTMENT
DIVISION OF PUBLIC HEALTH ENGINEERING
36 EAST SECOND STREET
RENO, NEVADA

CARSON CITY, NEVADA
STATE PRINTING OFFICE - - JACK MCCARTHY, SUPERINTENDENT
1945

LAW REGULATING SALE OF USED BEDDING

An Act regulating the sale of used bedding and other material, designating the agency for the enforcement hereof, defining the duties of certain persons in relation hereto, providing a penalty for the violation hereof, and other matters properly relating thereto.

(Approved March 21, 1935, p. 173)

Sale of Used Bedding and Other Material Must Be Labeled.

SECTION 1. From and after the passage and approval of this act it shall be unlawful for any person, firm, association or corporation, engaged in the operation of the business of manufacturing, making, renovating and selling mattresses, bed coverings, sheets, pillows and other similar bedding used for sleeping purposes, in this state, to sell or to offer to sell, or to dispose of any used or second-hand bedding as described in this act, directly or indirectly, without first having the same thoroughly sterilized and securely labeled with a tag sewed on each article marked thereon "Sterilized, Second-hand" which said tag shall show name of manufacturer, renovator, or dealer.

Duty of State Board of Health.

SEC. 2. It shall be the duty of the state board of health to prescribe rules, regulations, method and process of sterilization as mentioned in this act.

Who To Enforce Act.

SEC. 3. It shall be the duty of the state health officer and his duly authorized agents to enforce all the provisions of this act and the rules, regulations, method, and process authorized by this act.

Penalty for Violation.

SEC. 4. Every person violating any of the provisions of this act shall be guilty of a misdemeanor and punished accordingly.

Repeal.

SEC. 5. All acts and parts of acts in conflict herewith are hereby repealed.

In Effect.

SEC. 6. This act shall become effective from and after its passage and approval.

NEVADA STATE BOARD OF HEALTH

Regulations Governing the Sterilization of Second-hand Mattresses,
Pillows and any Other Kind of Bedding

Under and by virtue of the authority vested in the Nevada State Board of Health by "An Act Regulating the Sale of Used Bedding, * * *" approved March 21, 1935, as amended, and "An Act to Create a State Board of Health, * * *" as amended March 25, 1939, the State Board of Health does hereby adopt and promulgate the following rules and regulations governing the sterilization or disinfection of used or second-hand mattresses, bed coverings, sheets, pillows, and other similar bedding used for sleeping purposes.

REGULATION 1. Used or second-hand articles of bedding requiring sterilization or disinfection are:

Quilted pads.	Sheets.
Bunk quilts.	Blankets.
Comforters.	Any other contaminated or
Mattresses.	soiled article of bedding.
Mattress pads.	Materials used in the fill-
Cushions.	ing of any of the above or
Pillows.	similar articles.

REGULATION. 2. Sterilization or disinfection of used or second-hand articles listed in Regulation 1 shall be by one of the following methods, and under the conditions outlined in such methods:

I

WASHING AND BOILING

By thorough washing and sterilization by prolonged boiling for at least one hour.

II

STEAM UNDER PRESSURE

By steam under 15 pounds pressure for at least thirty minutes. A gauge for registering steam pressure, visible from the outside of the room shall be provided where steam under pressure is used.

III

STREAMING STEAM PROCESS

Two applications of streaming steam maintained for a period of one hour each to be applied at intervals of not less than six hours nor more than twenty-four hours will be accepted as an alternate for steam under pressure for disinfection of mattress materials or made-up mattresses.

When streaming steam is employed, valved outlets shall be provided near the bottom and top of room used for this purpose.

IV

FORMALDEHYDE AND SULPHUR PROCESS

By treating with formaldehyde and sulphur concurrently in a moist atmosphere for a period of at least twelve hours.

Formaldehyde gas shall be generated from the use of one pint of formaldehyde solution (37%) to each thousand cubic feet of air space, or through the use of any of the high-class commercial fumigators which generate an equivalent quantity of gas.

Formaldehyde gas can be made by mixing eight ounces potassium permanganate with one pint of formaldehyde.

Directions—Place potassium permanganate in large galvanized pail and place pail in room to be fumigated and, when everything is in readiness, add the formaldehyde and quickly close the door.

Sulphur shall be from the burning of four pounds of sulphur for each thousand cubic feet of air space.

The moist atmosphere is provided by thoroughly sprinkling the floor of the room with warm water just prior to undertaking disinfection.

V

LETHAL GAS METHOD

This method embraces the use of hydrocyanic acid gas generated by the action of sulphuric acid on sodium cyanide. The gas generated is very effective, extremely poisonous, and if this method is chosen, the room for sterilization must be apart from any living or working quarters and installed under strict approval of the State Health Officer or his duly authorized agents.

REGULATION 3. Before engaging in any of the above-mentioned processes, application must be made to the State Health Officer or his duly authorized agents, designating the process which will be employed and the fumigating room must be approved by the State Health Officer or his duly authorized agents.

REGULATION 4. In making application for approval of a sterilization plant, complete statement shall be made of the method to be employed for disinfection and such statement shall be accompanied by a plan in duplicate (2) drawn to scale showing details of the installation. This plan shall bear a title indicating clearly where the installation is to be made, the scale of the drawing, and be signed by the applicant.

REGULATION 5. No approval will be issued for a period longer than one year and may be revocable at any time without notice, providing it is found that the manufacturer is not carrying on the disinfection process in accordance with the spirit and purpose of the law.

REGULATION 6. Filthy or soiled articles of bedding shall not be considered properly sterilized or disinfected unless the fabric covering such articles be laundered or replaced by a clean or new covering and the filling material be subjected to one of the sterilizing methods outlined in Regulation 2.

REGULATION 7. All premises, rooms, chambers, and devices used for the purpose of sterilization or disinfection shall be kept in a clean and orderly condition, free from accumulated dust, dirt and other filth, and shall be kept free of vermin.

REGULATION 8. No articles or materials obtained from public dump grounds, junk yards or hospitals may be reused in the manufacturing, making or renovating of mattresses, bed coverings, pillows, cushions, or any other similar bedding that may be used for sleeping purposes unless a special permit is obtained from the State Health Officer or his duly authorized agents.

Now, THEREFORE, At a regular meeting of the State Board of Health, a majority of the members do vote to adopt the above rules and regulations.

APPROVED :

EDWARD E. HAMER, M. D.,
Secretary, State Board of Health.

JOHN J. SULLIVAN, M. D.
Chairman.

E. P. CARVILLE

STEPHEN W. COMISH, D. D. S.

SALLIE R. SPRINGMEYER.

Dated July 16, 1945.

NEW HAMPSHIRE

MANUFACTURE, SALE, ETC., OF BEDDING

339:56 Labels; Use of Undisinfected Second Hand Materials Prohibited. No person shall manufacture for purposes of sale, sell, offer or expose for sale, or have in possession with intent to sell, any mattress, pillow, cushion, muf bed, quilt, upholstered furniture or similar article having a filling of hair, down, feathers, wool, cotton, kapok or other material, unless there is plainly marked upon each such article, or upon a tag of some durable substance sewed thereon, or otherwise securely attached thereto, a statement of the kind of material used for filling in the manufacture of such article, the name of the manufacturer or vendor, and also, if the material has been previously used, the words, second hand. Provided, that no second hand materials, the use of which is not prohibited under section 59 hereof and which may be deemed by the state board of health suitable for re-use, shall be used unless the same have been disinfected by a method or methods approved by the said board.

Sources: 1925, 157:1. PL 162:58. 1941, 162:1. RL 193:58.

339:57 Bales, etc. If any such article is enclosed in a bale, box, crate or other receptacle, there shall be plainly marked upon such receptacle, or upon a durable tag securely attached thereto, a statement that the contents of the package are marked as herein required.

Sources: 1925, 157:1. PL 162:59. RL 193:59.

339:58 Renovated Mattresses. Whoever renovates or remakes any mattress shall attach a tag thereto bearing the word remade and a statement of the kind of material used for filling.

Sources: 1925, 157:1. PL 162:60. RL 193:60.

339:59 Prohibited Materials. No person shall use, in the manufacture of any such article for purposes of sale, or sell, offer or expose for sale, or have in possession for the purpose of such use or for sale or for use in remaking or renovating any such article, any material which has previously been used in or about a hospital, or on or about the person of anyone having an infectious or contagious disease, nor shall any person sell, or offer or expose for sale, any such article containing materials which have been previously so used.

Sources: 1925, 157:2. PL 162:61. RL 193:61.

339:60 Labeling Material. No person engaged in the business of selling any hair, down, feathers, wool, cotton, kapok or other materials commonly used for filling such articles, shall ship any box, crate, package or other container in which is placed any such hair or other such material unless there is attached thereto a tag containing a statement of the contents of the package together with the name of the vendor, and, if the material has been used before, with the words, second hand. Provided, that no person shall ship, sell or use for the purposes named in this subdivision any second hand materials, not being prohibited under section 59 hereof and deemed by the state board of health suitable for re-use, which have not been disinfected by a method or methods approved by the said board.

Sources: 1925, 157:3. PL 162:62. 1941, 162:2. RL 193:62.

339:61 False Representation. No person shall sell or offer for sale any such material which has been used before, representing the same to be new material.

Sources: 1925, 157:3. PL 162:63. RL 193:63.

339:62 Penalty. Whoever violates any of the foregoing provisions of this subdivision shall be fined not more than five hundred dollars or imprisoned not more than six months, or both.

Sources: 1925, 157:3, 8. PL 162:64. RL 193:64.

339:63 Removing Label. Whoever, except a purchaser at retail, removes or effaces any marking upon any article or receptacle or any tag or label attached thereto as above provided, shall be fined not more than fifty dollars.

Sources: 1925, 157:7. PL 162:65. RL 193:65.

339:64 Evidence. Possession of any such article, not marked as herein provided, by any person engaged in the business of manufacturing, selling or offering the same for sale shall be *prima facie* evidence that such article is being manufactured, remade or renovated, or is offered or exposed for sale, in violation of the provisions of this subdivision.

Sources: 1925, 157:1. PL 162:66. RL 193:66.

339:65 Duty, Police, etc. Any police officer, member of any local board of health, or other town official, who has reason to believe that any provision hereof has been or is being violated shall give notice thereof to the state board of health.

Sources: 1925, 157:6. PL 162:67. RL 193:67.

339:66 Duty, State Board of Health. The state board of health, whenever there is reason to believe that any provision hereof is being violated in any factory, shop, warehouse, store or other place, shall cause an investigation of such place to be made, and for this purpose any member or duly authorized employee of said board may enter such building or other place at all reasonable times. If, upon investigation, mattresses, pillows, cushions, muff beds, quilts or similar articles, or materials for use in the manufacture, remaking or renovating of the same, shall there be found, which have been previously used in or about a hospital or on or about the person of any one having an infectious or contagious disease, such materials or articles, whether manufactured, remade or renovated or in process thereof, shall be marked by the department with labels bearing the word *unclean* in conspicuous letters, and the board, with or without notice to the owner or supposed owner, may order the removal and destruction of the said materials or articles or make such other order relating thereto as the circumstances of the case require.

Sources: 1925, 157:4. PL 162:68. RL 193:68.

339:67 Posting Premises. The board or its duly authorized employee, whenever it is deemed necessary to safeguard the public health, may post upon any building or part thereof containing such materials or articles, or from which the same have been removed, a notice or warning of the danger of contagion or infection resulting from violation of the provisions hereof, and may continue such notice upon the said premises until the same have been properly cleaned and disinfected. Whoever removes or effaces such notice or warning except by order of the board shall be fined not more than fifty dollars.

Sources: 1925, 157:5. PL 162:69. RL 193:69.

339:68 Limitation. The provisions of this subdivision, except sections 66 and 67, shall not apply to persons who sell or offer for sale goods of the kinds herein mentioned which are owned by them and have been in good faith used by them in their own houses or hotels, or to administrators, executors, guardians or trustees in bankruptcy.

STATE OF NEW YORK
DEPARTMENT OF STATE

UPHOLSTERY AND BEDDING

Law and Rules Applicable to the Manufacture
and Sale of Articles of Bedding, Articles
of Upholstered Household Furniture
and Materials Used Therein

JOHN P. LOMENZO

Secretary of State

DIVISION OF UPHOLSTERY & BEDDING

270 Broadway
New York 7, N. Y.

As last amended
March, 1959

ARTICLE 25-A
GENERAL BUSINESS LAW

added by L. 1933, C. 408, eff. July 1, 1933.

Section	383.	Definitions.
	384.	Prohibitions; sterilization; permits.
	385.	Tagging; tags.
	386.	License and application; fees; reclassification; reissuances; payments.
	387.	Enforcement; division of bedding; advisory board.
	388.	Rules; violations.
	389.	Repealed.
	389-a.	Repealed.
	389-b.	Repealed.

§ 383. Definitions. Whenever used herein "commissioner" means the industrial commissioner;

"Department" means the department of labor;

"Bedding" or "article of bedding" includes upholstered furniture and filling material (as herein defined) and any mattress, pillow, cushion, quilt, bed pad, comforter, upholstered spring bed, box-spring davenport or day-bed, bedspring metal couch, metal bed, metal cot, metal cradle, metal bassinet, used or intended for use for sleeping, resting or reclining purposes and any glider, hammock or other substantially similar article which is wholly or partly upholstered;

"Upholstered furniture" means any article of household furniture wholly or partly stuffed or filled with soft material and which is used or intended for use for sitting, resting or reclining purposes;

"Filling material" includes any hair, down, feathers, wool, cotton, kapok or other soft material used in the manufacture of and for filling articles of bedding or upholstered furniture but shall not include any new filling material sold at retail, which is open to inspection at the time of sale, and which is prepared and intended for use in the home of the owner. As amended L1958, C139, eff. July 1, 1958

"New" means any material or article which has not been previously used for any purpose, including by-products produced in the manufacture of new fabric, and material reclaimed from new fabric; except that an article of bedding returned by the purchaser for exchange, alteration, or correction, within thirty days after date of delivery after original sale at retail, shall be deemed to be a new article, but thirty days after date of such delivery such article shall be deemed to be second-hand;

"Second-hand" means any material or article of which prior use has been made except as otherwise provided in this article;

"Old" means material which cannot be defined as "new" or "second-hand" but which, through age, has become stale or brittle and has lost its natural quality of resilience;

"Garnetted clippings" means any material which has been made

1959

§ 383 cont'd

into fabric and subsequently cut up, torn up, broken up or ground up and has been run through a garnett machine and thoroughly processed;

"Shredded clippings" means any material which has been made into fabric and subsequently cut up, torn up, broken up or ground up but which has not been run through a garnett machine and thoroughly processed;

"Shoddy" means garnetted or shredded clippings when made in whole or in part from old or worn rags, clothing or second-hand fabrics;

As amended L1958, C139, eff. July 1, 1958

"Felt" means material that has all been carded in layers or sheets by a garnett or felting machine;

"Manufacture," "making," "make," or "made" includes altering, repairing, finishing or preparing articles of bedding or upholstered furniture or filling materials for sale, including remaking or renovating, when done away from the home of the owner;

"Sale," "sell," "sold" includes offering or exposing for sale or exchange or lease or consigning or delivering in consignment for sale, exchange or lease or holding possession with like intent. The possession of any article of bedding, as herein defined, by any maker or dealer, or his agent or servant in the course of business, shall be presumptive evidence of intent to sell.

"Person" means an individual, partnership, corporation or an association.

"Retail sale" or "sale at retail" means a sale to a consumer or to any person for any purpose other than for resale.

"Wholesale" or "sale at wholesale" means a sale to any person for purposes of resale.

"Manufacturer of articles of bedding for sale at wholesale" means any person who makes, reupholsters, renovates, repairs, recovers, in whole or in part, any article of bedding, or imports any such article wholly or partly stuffed or filled with filling material, for sale other than at retail, or performs any of such services for a person other than an ultimate consumer. Such term includes (a) any person who manufactures or processes any filling material loose or in batting, pads, or other prefabricated form, to be used or which could be used in articles of bedding for sale other than at retail; and (b) any junk dealer who purchases and sells articles of bedding at other than retail.

"Supply dealer" means any person who breaks bulk, packages or repackages, or otherwise prepares or tags any filling material or articles of bedding, for sale other than at retail.

1957

§ 383 cont'd

"Repairer-renovator" means any person who repairs, makes over, re-covers, restores, renovates, or otherwise prepares or tags articles of bedding, directly for the consumer, or for direct sale by such person at retail.

"Manufacturer of articles of bedding for sale at retail" means any person who makes, or prepares for sale by tagging or retagging, or imports, articles of bedding, in whole or in part, for direct sale by such person at retail.

"Retailer of second-hand articles of bedding" means any person who prepares for sale by tagging or retagging any second-hand article of bedding for sale at retail, and shall include any junk dealer who purchases or otherwise acquires any article of bedding from the home of the owner.

§ 383 as last amended by L1954, C394, eff. Jan. 1, 1954.

§ 384. Prohibitions; sterilization; permits. 1. Prohibitions. No person shall sell as new any article of bedding unless it is made from all new material and is tagged as provided herein.

No person shall sell, representing it to be new material, any old or second-hand hair, down, feathers, wool, cotton, kapok or other material used for filling articles of bedding.

No person shall sell any article of bedding made from old or second-hand material unless it shall be tagged as provided herein.

The presence on the premises of any maker or vendor of any old or second-hand material or article, shall be presumptive evidence of the sale or use.

No person shall sell any article of bedding, or any material used in the making thereof, which has been used by or about any person having an infectious or contagious disease, unless such article or material shall have been sterilized and is tagged as provided herein.

No person shall use any material to make any article of bedding for sale that is made from material (a) that comes from an animal or fowl, (b) that contains any bugs, vermin, insects or filth, (c) that is unsanitary, (d) that contains burlap or other material that has been used for baling, (e) that is second-hand, unless such material has been thoroughly sterilized by a process approved by the commissioner.

No person shall sell, offer for sale, exchange or lease or deliver or consign for like purpose any article or material herein required to be tagged unless there appears on the tag a license num-

1957

§ 384 cont'd

ber assigned by the commissioner as required by this article. Nor shall any person sell or offer for sale, exchange, lease, deliver or consign for like purpose any such article upon which appears the number of a license which has expired or has been suspended or revoked by the commissioner, provided such person has notice constructive or otherwise that such license has expired, been suspended or revoked, and provided further that such person received such article after receiving such notice. The commissioner may make rules with respect to what shall constitute constructive notice.

No person other than a purchaser at retail for his own use, or except as herein otherwise provided, shall remove, deface, alter or cause to be removed, defaced or altered, any tag attached to an article of bedding; but immediately after material used for filling has been removed from its container the tag shall be removed and destroyed by the person removing such material.

No manufacturer or vendor shall deliver to any person any tag required by this article unless it is affixed or attached to an article as required herein; except that the commissioner may, on application, permit the delivery of unattached tags.

No person shall have in his possession or shall make, use or sell any counterfeit or colorable imitation of the license or permit required by this article. Each counterfeited or imitated license or permit made, used, sold, offered for sale, delivered or consigned for sale contrary to the provisions of this article shall constitute a separate offense.

No person shall appropriate for his own use or for use of another or for sale, any article of bedding, as herein defined, which has been abandoned by the owner. It shall be the duty of local authorities to collect and remove all articles of bedding which have been abandoned by the owner and to destroy them.

No person shall insert or cause to be inserted upon any tag any license number other than the one assigned to him by the commissioner.

No person shall insert or cause to be inserted upon any tag any license number nor shall he affix or cause to be affixed to any article of bedding any tag bearing any license number after such license has expired or been revoked or during a period when it is suspended by the commissioner.

Subd 1 as last amended by L1953, C687, eff. Jan. 1, 1954.

2. Sterilization. Any sterilization process used in connection herewith shall be approved by the commissioner.

1957

§ 384 cont'd

3. Permits. Every person, firm or corporation desiring to operate such sterilization process shall first obtain a numbered permit from the commissioner and shall not operate such process unless such permit is kept conspicuously posted in the establishment. Fee for original permit shall be fifty dollars. Application for such permit shall be accompanied by specifications in duplicate, in such form as the commissioner shall require. Each permit shall expire one year from date of issue. Fee for annual renewal of a sterilizing permit shall be one-half the original fee. The commissioner may revoke or suspend any permit for violation of the provisions of this article. Upon notification of such revocation or suspension, the person to whom the permit was issued or his successor, shall forthwith return such permit to the commissioner. For reissuing a revoked or expired permit the fee shall be the same as for an original permit.

Subd 3 as last amended by L1936, C799, eff. May 29, 1936.

§ 385. Tagging; tags. 1. Tagging. Every article of bedding made for sale, sold, or offered for sale shall have attached thereto a tag which shall state (a) the name of the material used in such article; (b) that such material used is new, or old, or second-hand; (c) the license number of the manufacturer or supply dealer, except in the case of a second-hand article of bedding for sale "as is"; (d) the name and address of the manufacturer, supply dealer or vendor; and (e) that such material has been sterilized and the number of the sterilizing permit, unless sterilization was not required.

A complete second-hand article of bedding, which has not been remade or renovated, may be sold "as is" without being sterilized but the tag if any which is attached to it shall be removed by the manufacturer, supply dealer or retail vendor who purchases it from the immediately prior user, and such purchaser shall attach a tag (a) bearing his license number, and (b) stating that the article is "second-hand—contents unknown" but this requirement shall not apply (1) to sales at public auction, (2) to the sale of antique furniture, or (3) to a private sale from the home of the owner direct to the consumer.

All tags attached to new articles shall be legibly stamped or marked by the retail vendor with the date of delivery to the customer. Every remade or renovated article of bedding not for sale but for return to the owner for his own use shall have attached thereto a tag which, in addition to the statements hereinbefore required, shall state the name and address of the owner, the name and address of the remaker or renovator, or the statement "Remade

1957

§ 385 cont'd

and renovated for" followed by the name and address of the person for whom the article of bedding is remade or renovated, provided that such person is not the owner of the article of bedding, the date of the sterilization, that the article is not for sale and that such article contains the same material received from the owner and the name and amount of any material added during remaking. Any shipment or delivery, however contained, of material used for filling articles of bedding shall have firmly and conspicuously attached thereto a tag which shall state the name, the license number and the address of the manufacturer, preparer or vendor, the name of the material and whether such material is new or old or second-hand and, if sterilized, the number of the sterilization permit. In the description of material used on any tag attached to an article of bedding no term or designation intended or likely to mislead shall be used; but where such article contains more than one material and rules adopted hereunder require the amount of such materials to be stated on the tag, a variance not in excess of ten per centum from the amount stated on the tag shall not be deemed misleading. No variance shall be allowed for material which is described as "all," "pure," "one hundred per centum," or terms of similar import. The commissioner may order off sale and may so tag, any article of bedding or material therefor, which is not tagged as herein required or which is tagged with a tag bearing a misleading term, description, designation or statement and no articles or materials placed off sale or seized by the commissioner shall be sold nor shall the contents thereof be altered, interfered with or removed in whole or in part, nor shall the articles or contents thereof be removed from the premises where placed off sale or seized, until such articles or materials are released by the commissioner. All articles or materials placed off sale or seized shall be subject to frequent examination by inspectors of the division of bedding and must be so placed or stored as to be readily accessible at all times and shall be produced for examination upon demand of any such inspector made upon the person or persons in charge of the establishment or premises where such articles or materials were placed off sale or were seized. Nothing in this article shall authorize the sale of an article of bedding that has been exposed to infectious or contagious disease and which, after such exposure, has not been sterilized and approved for use. If the commissioner shall find any article of bedding or filling material which has been used by or about any person having an infectious or contagious disease he shall tag such article of bedding or material with a tag bearing the word "unclean" in conspicuous letters. Such tag shall not be removed except

1957

§ 385 cont'd

by the commissioner. Tags shall be prominently and securely attached to articles of bedding in such manner as the commissioner may require.

Subd 1 as last amended by L1954, C394, eff. Jan. 1, 1954.

2. Tags. Whenever a tag is required by this article it shall be approved by the commissioner and shall be made of muslin, linen or other material of like durability and shall be the same color stock throughout. Paper faced tags shall not be used. For designating all new material the tag shall be white; for designating old or second-hand or renovated material or articles the tag shall be yellow; for designating articles or materials placed off sale by the commissioner the tag shall be blue; and for designating articles or materials exposed to infectious or contagious disease and declared "unclean" by the commissioner, the tag shall be red. Statements required on tags shall be legibly printed or stamped on one side only, in the English language and in letters at least one-eighth of an inch in height. Tags attached to mattresses or pillows shall be at least six square inches in area. The commissioner may permit smaller tags and may require larger tags for other articles. On each tag there shall be a certification that such article complies with the requirements of law but such tag also may state that the article complies with the law of any other state.

Subd 2 as last amended by L1936, C799, eff. May 29, 1936.

§ 386. License and application; fees; reclassification; reissuances; payments. 1. License and application. No person shall be engaged (a) as a manufacturer of articles of bedding for sale at wholesale; (b) as a manufacturer of articles of bedding for sale at retail; (c) as a supply dealer; (d) as a repairer-renovator; or (e) as a retailer of second-hand articles of bedding, unless he has obtained the appropriate numbered license therefor from the commissioner, who is hereby empowered to issue such license. Application for such license shall be made on forms provided by the commissioner and shall contain such information as he may deem material and necessary. Based on the information furnished in such application and on any investigation deemed necessary by the commissioner the applicant's classification shall be determined. Each license issued by the commissioner pursuant to this article shall be conspicuously posted in the establishment of the person to whom issued and it shall expire one year from date of issue. The commissioner may withhold

1957

§ 386 cont'd

the issuance of a license to any person who shall make any false statement in the application for a license under this article.

Subd 1 as last amended by L1954, C394, eff. Jan. 1, 1954.

2. Fees. The annual fees imposed for licenses issued pursuant to this article shall be as follows:

(a) Every applicant classified as a manufacturer of articles of bedding for sale at wholesale or as a supply dealer shall pay, prior to the issuance of a general license, an annual fee of fifty dollars, and the licensee may be engaged in any or all of the following: (1) manufacturer of articles of bedding for sale at wholesale; (2) manufacturer of articles of bedding for sale at retail; (3) supply dealer; (4) repairer-renovator; (5) retailer of second-hand articles of bedding.

(b) Every applicant classified as a manufacturer of articles of bedding for sale at retail, repairer-renovator, or retailer of second-hand articles of bedding shall pay, prior to the issuance of a limited license, an annual fee of ten dollars, and the licensee may be engaged in any or all of the following: (1) manufacturer of articles of bedding for sale at retail; (2) repairer-renovator; (3) retailer of second-hand articles of bedding.

Subd 2 as last amended by L1954, C394, eff. Jan. 1, 1954.

3. Reclassification. If a licensee is reclassified from one category to another which calls for a higher license fee he shall pay a license fee of fifty dollars, and the license issued to him shall be for a one year period from the date of issue of such license.

If, through error, a licensee has been improperly classified as of the date of issue of his current license the proper fee for the entire period shall be payable. Any overpayment shall be refunded to the licensee. No refunds shall be allowed to any licensee who has discontinued business, or whose license has been revoked or suspended or who has been reclassified to a category calling for a greater or lesser license fee, except as provided herein.

Subd 3 as last amended by L1954, C394, eff. Jan. 1, 1954.

4. Reissuances. For reissuing a revoked or expired license the fee shall be the same as for an original license.

Subd 4 as last amended by L1954, C394, eff. Jan. 1, 1954.

5. Payment of moneys. All fees, fines, penalties and other moneys derived from the operation of this article shall be paid to

1959

§ 386 cont'd

the department of labor. Any license fee paid prior to the date upon which such license becomes effective shall be returnable to the applicant of such license, or to his heirs, or creditors, upon submission of proof to the commissioner that such applicant was deceased or that such applicant's business was liquidated prior to the date upon which such license becomes effective.

Subd. 5 as last amended by L1958, C226, eff. March 18, 1958

§ 387. Enforcement; division of bedding; advisory board. 1. Enforcement. Every place where articles of bedding are made, re-made or renovated, or materials therefor are prepared or sterilized, or where such articles or materials are sold, shall be subject to inspection by the commissioner who shall have power to inspect the manufacture and sale or delivery of all articles or materials covered by this article, to open and examine the contents thereof and power to seize and hold for evidence any article of bedding, in whole or in part, which he has reason to believe is made or sold or held in possession in violation of this article or of section four hundred forty-six of the penal law. For the purpose of administering and enforcing the provisions of this article the commissioner shall have and may use the powers conferred on him by the labor law in addition to the powers conferred herein. No person shall interfere with, obstruct or otherwise hinder, any inspector, officer or employee of the division of bedding in the performance of his duties.

Subd. 1 as last amended by L1939, C112, eff. March 23, 1939.

2. Division of bedding. There is hereby created in the department of labor a division of bedding which shall have jurisdiction of such matters, exercise such powers and perform such duties as may be assigned to it by the commissioner. The bedding division shall be in immediate charge of a director and shall have such employees as may be designated by the commissioner who shall fix their salaries within the amount appropriated therefor.

3. Advisory board. There is hereby created for the bedding division an advisory board, to consist of not more than nine representatives of interests affected by this article, to be appointed for a term of two years by the commissioner. Members of the board shall meet at the call of the commissioner and the members, except the commissioner, shall each receive twenty-five dollars per diem for each meeting called by the commissioner attended by them and reasonable and necessary traveling and other expenses. The commissioner may remove any member when he ceases to

1959

§ 387 cont'd

represent the interests in whose behalf he was appointed. The commissioner may designate a member of the board to act as chairman and shall designate an employee of the department to be secretary.

The board shall:

(a) Consider all matters submitted to it by the commissioner.

(b) On its own initiative recommend to the commissioner such changes of rules or of administration of bedding division as, after consideration, may be deemed important and necessary.

(c) Co-operate in the preparation of rules and regulations supplemental to the provisions of this article.

(d) Co-operate with the civil service commission in conducting examinations and in preparing lists of eligibles for positions in the division of bedding the duties of which require special knowledge or training, and advise the commissioner in the selection and appointment of employees to such positions in such division.

Subd. 3 as last amended by L1954, C393, eff. July 1, 1954.

§ 388. Rules; violations. 1. Rules. Rules supplemental to, but not in conflict with, the provisions of this article may be made by the advisory board and shall be subject to approval by the commissioner. When approved they, and any amendments or repeal thereof, shall be filed with the secretary of state and become effective thirty days after filing and shall have all the force and effect of law. If there shall be practical difficulty or unnecessary hardship in carrying out a provision of this article or of a rule made thereunder affecting the manufacture and sale of articles of bedding, as herein defined, the board shall have power to make a variation from such provision or rule if the spirit of the provision or rule shall be observed. If the board makes a variation it shall be in the form of a resolution adopted by at least five votes and shall apply to all places or conditions where the facts are substantially the same as set forth in the record of the board as being the basis of the variation. Such variation shall be effective for a period not in excess of sixty days during which period the board may adopt a new rule or repeal or amend an existing rule, to cover the condition affected by the variation. Such rule, amendment or repeal shall be filed with the secretary of state at least thirty days prior to the expiration of the period for which the variation was granted. If the board does not adopt such new rule or repeal or amend an existing rule, the variation shall automatically become null and void at the expiration of thirty days after the date the variation was made.

Subd. 1 as last amended by L1946, C671, eff. April 10, 1946

1959

§ 388 cont'd

2. Violations. Violation of any provision of this article is a misdemeanor. Each article of bedding made, remade, or renovated, sold or exposed for sale, exchange or lease, delivered, re-delivered or consigned for sale, exchange or lease, contrary to the provisions of this article, shall constitute a separate violation.

3. Analysis as presumptive evidence. A certified copy of the analysis made by the department shall be received in evidence without the presence in court of the person making such analysis.

Subd 3 as added by L1936, C799, eff. May 29, 1936.

4. Suspension or revocation of license. Any license issued pursuant to this article may be suspended or revoked by the commissioner for violation of the provisions of this article, or if the applicant has made any false statement in his application for an annual license. Upon notification of such suspension or revocation the person to whom the license was issued shall forthwith return such license to the commissioner.

Subd. 4 as added by L1954, C394, eff. Jan. 1, 1954.

5. Hearing. No license shall be denied, suspended or revoked unless the applicant or licensee shall be given an opportunity to be heard.

Subd. 5 as added by L1954, C394, eff. Jan. 1, 1954.

6. Appeal. A determination by the commissioner revoking or suspending a license, or denying a license shall be subject to review by the supreme court in the manner provided in article seventy-eight of the civil practice act.

Subd. 6 as added by L1954, C394, eff. Jan. 1, 1954

1957

§ 446. Articles of bedding, upholstered furniture and filling materials.

Any person who 1. Makes, remakes, renovates, sterilizes, prepares, sells, offers for sale, exchange or lease any article of bedding, article of upholstered furniture or filling material for either, not properly tagged, as required by article twenty-five-A of the general business law, or

2. Uses in the making, remaking, renovating or preparing of any article of bedding or article of upholstered furniture or in preparing cotton or other material therefor which has been used as a mattress, pillow or bedding in any public or private hospital, or which has been used by or about any person having an infectious or contagious disease, and which after such use has not been sterilized and approved for use, by the industrial commissioner, or

3. Violates any provision of article twenty-five-A of the general business law or any rule or regulation supplemental thereto, or

4. Counterfeits or imitates any license, license number, permit, permit number or tag issued under such article, shall be guilty of a misdemeanor, punishable by a fine of not more than five hundred dollars or by imprisonment for not more than six months or by both.

Subd 4 as last amended by L1954, C394, eff. Jan. 1, 1954.

RULE 1

PRIOR RULES REPEALED

1957

RULES MADE BY THE ADVISORY BOARD OF THE DIVISION OF BEDDING, DEPARTMENT OF LABOR, AND APPROVED BY THE INDUSTRIAL COMMISSIONER PURSUANT TO SECTION 388 OF ARTICLE 25-A OF THE GENERAL BUSINESS LAW, EFFECTIVE AND OPERATIVE AUGUST 11, 1957.

RULE 1. Prior Rules Repealed

1.1 Each and every rule made by the Advisory Board, Division of Bedding, and approved by the Industrial Commissioner and effective and operative before August 11, 1957 is hereby repealed.

1.2 Rules which were in effect and operative before August 11, 1957 and which are repealed in accordance with 1.1 hereof shall continue to govern with respect to the duties and obligations of any person, as defined in Article 25-A of the General Business Law, for the period preceding such date.

FILLING MATERIALS,
1957 DEFINITIONS AND DESIGNATIONS RULE 2

RULE 2. Definitions and Designations of Filling Materials

2.1 "Filling material" includes any hair, down, feathers, wool, cotton, kapok, or other filling material used in the manufacture of and for filling articles of bedding or upholstered furniture but shall not include any new filling material sold at retail, which is open to inspection at the time of sale, and which is prepared and intended for use in the home of the owner. When contained in durable material, such combination of filling material and outer covering or container shall be considered to be an article of bedding, other than filling material, and shall be tagged.

2.2 The following and similar materials shall be deemed to be processed: wool (sterilized), hair (sterilized), feathers and down (sterilized), defabricated fibers, shredded clippings, pads, batts or felt, curled fibers, foam and sponge materials, and all second-hand materials.

2.3 Unprocessed material may be tagged either by the jobber or by the preparer, but in each case, whether processed or unprocessed, the person having his license number on the tag shall be responsible for all statements on the tag and for violations in case the material is not as represented on the tag.

2.4 The following and similar materials shall be deemed to be unprocessed: vegetable and synthetic fibers, excelsior, glass fiber, metal fiber, wood fiber.

2.5 Unprocessed material shipped from out of the state directly to a manufacturer of articles of bedding or upholstered furniture need not be tagged during shipment and delivery. When held by the manufacturer for resale it must be tagged. If the material is held solely for use in the products of the factory to which it was shipped, it need not be tagged.

2.6 Unprocessed material shipped from out of the state to a jobber and held for resale must be tagged either by the original shipper or by the jobber; however, such material need not be tagged while it is at a warehouse, depot, or pier, but it must be tagged before the material is shipped from any such place.

2.7 Processed materials must be tagged by the processor and must bear his license number.

	FILLING MATERIALS,	
RULE 2	DEFINITIONS AND DESIGNATIONS	1959

2. 8 All filling material shipped from any point in the State of New York shall be tagged before it leaves the point of shipment.

2. 10 Any new stiffening material, such as fiberboard, corrugated fiberboard, wood or paper when present in an amount exceeding 10% by weight of the entire filling material of an article of bedding or upholstered furniture shall be designated on the tag and its percentage given. When made of secondhand material, regardless of the amount in which it is present, it shall be designated on the tag. When coming from any animal or fowl, regardless of the amount in which it is present, it shall be designated on the tag.

2. 11 Filling material in pre-built border constructions need not be stated on the tag, providing the filling material is new and does not exceed 10% of the filling material in the article to which the border construction is affixed.

2. 12 When the filling material contained in a quilted ticking, glazed wadding, or trapunto embroidery affixed to the cover of an article of bedding is in excess of 10% of the weight of the entire filling material, or consists of the product of an animal or fowl, or consists of secondhand material, such material shall be designated on the tag and its percentage given.

2. 13 Burlap, muslin, tape, webbing, etc., when new, need not be specifically mentioned. When made of old or secondhand material it shall be so designated on the tag.

2. 20 Filling material which has been artificially dyed or colored shall be designated as "colored". The natural color of filling material need not be stated.

2. 21 Any filling material containing more than 5% oil shall be designated on the tag as "oily".

2. 22 The presence of non-fibrous mineral matter in excess of 5% in any filling material shall be designated on the bedding law tag as "dirt" and the actual percentage thereof contained in the filling material shall be stated on the tag.

Rule 2. 22 as amended, eff. February 4, 1958

FILLING MATERIALS,		
1957	DEFINITIONS AND DESIGNATIONS	RULE 2

2. 23 If an article of bedding contains more than one kind of material, the percentages of all filling materials shall be clearly designated on the tag except as otherwise provided in these rules.

2. 30 "Staple cotton" shall mean the staple fibrous growth as removed from the cotton seed in the usual process of ginning (first cut) containing no foreign material. The term "cotton" by itself shall not be used.

2. 31 The term "Cotton linters" shall be used to designate the fibrous growth removed from cottonseed subsequent to the usual process of ginning. The term "linters" alone shall not be used.

2. 32 The term "Cotton by-products" shall be used to designate the by-products removed from the various machine operations necessary in the manufacture of cotton yarn up to but not including the process of spinning, and shall include only the following materials commonly known in cotton-mill terms as (1) cotton card strips or cotton vacuum strips, (2) cotton comber, (3) cotton fly and (4) cotton picker; or the by-product may be designated by the particular mill term applicable to it, e. g., "cotton card", "cotton comber", "cotton fly", "cotton picker".

2. 33 The term "card", "strips" or "stripping" preceded by the name of the textile fiber from which it is produced, may be used to designate a tangled or matted mass of fibers produced by or removed from the carding cloth following the carding process.

2. 34 The term "comber", preceded by the name of the textile fiber or fibers from which it is produced, may be used to designate tangled fibers removed during the combing process of textile fibers.

2. 35 The term "fly" preceded by the textile fiber or fibers from which it is produced, may be used to designate fibers which come off the machines during carding, drawing, or similar textile operations.

2. 36 The term "picker", "picker mote", or "mote", preceded by the textile fiber or fibers from which it is produced may be used to designate matted or tangled masses of fiber resulting from the opening and cleaning of fibers in the opener room of the textile mill.

	FILLING MATERIALS,	
RULE 2	DEFINITIONS AND DESIGNATIONS	1957

2. 37 Whenever any "card", "strips" or "stripping", "comber", "fly", "noils", "picker", "motes" or "sweepings" contain more than 7% but not more than 10% of trash, hull, leaf, stem, pulp, etc., it shall be designated as "waste".

2. 38 When the hull, leaf, stem, pulp, etc., exceeds 10% such filling material shall be designated on the tag as "trash".

2. 39 The term "sweepings" preceded by the name of the textile fiber or fibers shall be used to designate the fibrous sweepings from the floors of the textile mill.

2. 40 The term "noils" preceded by the textile fiber or fibers from which it is produced, may be used to designate the short fibers removed during the combing process.

2. 41 The term "napper" preceded by the textile fiber or fibers from which it is made shall be used to designate the lint removed during the process of raising the face of a cloth.

2. 51 "Cat-tail plant fibers" shall be so designated on the tag.

2. 52 The term "Coconut husk fiber" or "coir" shall be used to designate the fibrous material obtained from the husk or the outer shell of the coconut.

2. 53 The term "jute" by itself shall not be used.

2. 54 The term "jute fibers" shall be used to designate jute of which no prior use has been made.

2. 55 The term "jute pad" may be used to designate a pad made from jute fibers.

2. 56 The term "jute shoddy" shall be used to designate reclaimed used cordage or other used jute material which has been fabricated and used for baling or other purposes.

2. 57 The term, "kapok", shall be used to designate the fibres obtained from the seeds of the kapok tree. The use of the term "silk floss" is prohibited.

	FILLING MATERIALS, DEFINITIONS AND DESIGNATIONS	RULE 2
1957		

2.58 The term "sisal fibers" shall be used to designate sisal of which no prior use has been made.

2.59 The term "sisal pad" may be used to designate a pad made from sisal fibers.

2.60 The term "sisal shoddy" shall be used to designate reclaimed used cordage or other sisal material which has been fabricated and used for baling or other purposes.

2.61 The term "palm fibers" shall be used to designate the fibrous material obtained from the leaf of the palm, palmetto, or palmyra tree.

2.62 The term "sea grass" shall be used to designate any of the material obtained from maritime plants or sea-weeds.

2.63 Tampico fibers when curled shall be designated as "curled tampico fibers".

2.64 The term "cellulose", "cellulose fiber" or "cellulosic" shall be used to designate cellulosic products containing not more than 4% lignin and 12% pentosans.

2.65 The term "wood fiber pad" shall be used to designate a pad made of cellulose fiber containing more than 4% lignin or 12% pentosans.

2.66 Pads made from "cellulose" may be designated as "cellulose fiber pads".

2.67 The term "steel wool pads" is not permitted. When passed through some form of garnetting machine and carded in layers or sheets, steel fibers may be designated as "steel batting", or "steel fiber pads". When not garnetted they shall be designated as "steel fibers".

2.68 The presence of paper in an article of bedding in lieu of other filling material shall be designated on the tag.

2.69 New paper sheets used for separating or covering felt or wadding, when present in an amount not exceeding 10% by weight of the entire filling material, need not be designated on the tag and the percentage need not be given.

	FILLING MATERIALS,	
RULE 2	DEFINITIONS AND DESIGNATIONS	1957

2. 70 Paper by-products which have been used in the manufacture or processing of other products and subsequently used for the manufacture of edging or other articles of bedding or upholstered furniture shall be classified as "new" and shall be designated on the tag as "all new material consisting of paper by-products".

2. 71 The use of the term "excelsior" is permitted to designate curled wood shreds. The term "wood wool" is prohibited.

2. 72 A pad made of curled wood shreds shall be designated "excelsior pad".

2. 80 When different long-chain synthetic polymers and/or copolymers are joined either chemically or physically to form a filament or fiber (other than acetate and rayon) a disclosure of the polymers and/or copolymers contained therein shall be made in the descending order of their percentage in the fiber by weight, e. g., "polystyrene fibers", "vinylacrylic fibers", or the fibers may be designated as "synthetic fibers".

2. 81 Acetate is a specific term used for man-made fibers, monofilaments and continuous filament yarns composed of acetylated cellulose, with or without lesser amounts of non fiber-forming material.

2. 82 The term "acetate fibers" or the term "cellulose acetate fibers" shall be used to designate filling materials made of acetate.

2. 83 The term "triacetate fibers" may be used to designate man-made fibers and continuous filaments composed of cellulose acetylated to a degree of not less than 95%.

2. 84 The term "acrylic fibers" or the term "synthetic fibers" shall be used to designate a long-chain synthetic polymer which contains not less than 85% acrylonitrile and which is formed into a filament.

2. 85 Azlon is a generic term for fibers or filaments manufactured from modified proteins or derivatives thereof, with or without lesser amounts of non-fiber-forming materials. The term "azlon", "protein fibers" or "synthetic fibers" shall be used to designate azlon fibers.

FILLING MATERIALS,		
1957	DEFINITIONS AND DESIGNATIONS	RULE 2

2.86 Nylon is a generic term for any long-chain synthetic polymeric amide which has recurring amide groups as an integral part of the main polymer chain, and which is capable of being formed into a filament in which the structural elements are oriented in the direction of the axis.

2.87 The term "nylon fibers" or the term "synthetic fibers" shall be used to designate fibers manufactured from nylon.

2.88 "Polyester" means polymerized reaction product of esters (i. e., a compound formed by the replacement of the acid hydrogen of an acid, organic or inorganic, by a hydrocarbon radical).

2.89 The term "polyester fibers" may be applied to a long-chain synthetic polymer which contains 85% or more of the polymeric esters produced from the reaction of ethylene glycol and terephthalic acid or its derivatives and which is formed into a filament, or the fibers may be designated as "synthetic fibers".

2.90 "Polyether" means a polymerized reaction product of ethers (i. e., hydrocarbons in which one or several hydrogen atoms are replaced by alkoxy groups).

2.91 The term "polyethylene fibers" or the term "synthetic fibers" shall be used to designate fibers made from polymers and/or copolymers of ethylene.

2.92 The term "polystyrene" shall be applied to the product resulting from the polymerization of styrene monomers, or the product may be designated as "synthetic", i. e., "synthetic foam".

2.93 "Polyvinylidene" means a copolymer of vinylidene chloride and other monomers.

2.94 Polyvinylidene fibers manufactured from polyvinylidene shall be designated as "polyvinylidene fibers" or as "synthetic fibers".

2.95 "Rayon" is a generic term for man-made fibers, monofilaments and continuous filament yarns composed of regenerated cellulose, with or without lesser amounts of non fiber-forming materials.

FILLING MATERIALS,		
RULE 2	DEFINITIONS AND DESIGNATIONS	1957

2.96 The term "rayon fibers" shall be used to designate man-made fibers composed of regenerated cellulose.

2.97 "Urethane" means any ester of carbamic acid.

2.98 The term "vinyl" shall be applied to homopolymers or copolymers of vinyl chloride.

2.99 The term "vinyl fibers" or "synthetic fibers" shall be used to designate fibers or filaments manufactured from vinyl.

2.101 "Glass fibers" shall be so designated. When resin-treated they shall be designated as "resin-treated glass fibers".

2.201 The term "curled hair" may not be used by itself. It shall be designated in conjunction with the name of hair used, e. g., "curled horse hair", or "curled cattle hair".

2.202 When hair is rubberized or resin-treated it shall be so designated. The percentage of rubber or resin need not be stated on the tag. When hair is shredded, it shall be so designated. The kind of hair used shall be stated and the percentages if there are more than one. The use of the term "curled" is not permitted in connection with shredded hair.

2.203 "Tanners wool" shall be so designated. It is classed as "new material" but shall be sterilized by an approved process. The percentage of tanners wool in batting shall be designated on the tag.

2.204 The term "virgin" is permitted only in connection with wool which has never before been used in any manufacturing or other process.

2.205 "Goat hair" shall be so designated.

2.206 "Rubberized curled hair pads" shall be so designated and the kind and percentage of hair used shall be stated.

FILLING MATERIALS

1959

DEFINITIONS AND DESIGNATIONS

2. 207 The kind and percentage of hair shall be designated. It is not necessary to mention whether horse hair is mane or tail hair, but hair from different animals shall be designated. When designated as "curled" it shall be in fact curled hair.

2. 300 "Garnetted Clippings" means any material which has been made into thread, yarn or fabric and subsequently reduced to a fibrous state. When yarns, threads and/or fabric shreds are present in an amount of less than 5%, the material may be designated as "Defabricated Fibers". When fabric or fabric shreds are present in an amount of more than 10%, they shall be designated on the tag as "Shredded Clippings" and the percentages thereof together with the percentage of garnetted clippings shall be stated on the tag; when thread or yarns are present in an amount of more than 10%, their presence shall be designated on the tag as "yarns or threads" and the percentage thereof together with the percentage of garnetted clippings shall be stated on the tag, or the entire material may be designated as "Shredded Clippings". When made in whole or in part of Secondhand material, it shall be designated as "Shoddy".

"Shredded Clippings" means any material which has been made into thread, yarn or fabric and subsequently cut up, torn up, broken up or ground up. When made in whole or in part of secondhand material it shall be designated as "Shoddy".

Rule 2. 300 as amended, eff. March 20, 1959

2. 301 The term "textile by-products" or the name of the specific by-product, unless otherwise provided for in these rules, may be used to designate any of the fibrous by-products produced during the processing of textile fibers up to but not including the spinning of yarns.

2. 302 The kind of fiber contained in "shoddy" as defined by Section 383 of the General Business Law need not be designated, but if designated on the tag the fiber shall be as indicated. If the shoddy is made from more than one kind of fiber, any one kind of fiber is designated on the tag, the name of each fiber and its percentage shall be designated. The term "shoddy" may also be used to designate mixed secondhand material taken from old articles of bedding. Sterilization is required.

2. 303 The term "age" does not necessarily refer to a long period of time. Filling material which has aged rapidly as a result of deterioration or other damage due to heat, moisture, irradiation, fire damage, mildew, etc., shall be designated as "old".

RULE 2	FILLING MATERIALS DEFINITIONS AND DESIGNATIONS
--------	---

1959

2.400 The term "down" by itself may be used for the soft undercoating of water-fowl, consisting of the light fluffy filaments grown from one quill-point but without any quill-shaft. It is permitted however, to set forth on the tag the name of the fowl from which the down is obtained, such as, "goose down", "duck down", etc. The presence of loose down fibers in excess of 10% shall be designated as "down fibers".

FILLING MATERIALS,
RULE 2 DEFINITIONS AND DESIGNATIONS

1957

2.401 The term "goose feathers" shall be used to designate feathers of any kind of goose, which are whole in physical structure, with the natural form and curvature of the feather.

2.402 The term "duck feathers" shall be used to designate feathers of any kind of duck, which are whole in physical structure, with the natural form and curvature of the feather.

2.403 The term "waterfowl feathers" may be used to designate any mixture of goose and duck feathers.

2.404 The term "turkey feathers" shall be used to designate feathers of any kind of turkey, which are whole in physical structure.

2.405 The term "chicken feathers" shall be used to designate feathers of any kind of chicken, which are whole in physical structure.

2.406 The term "feathers" shall not be used alone.

2.407 The term "feathers", by itself, does not include crushed or chopped quill feathers, or stripped, chopped, crushed or broken feathers, or feather fibers.

2.408 Broken feathers in excess of the amount allowed as tolerance by Rule 6.1 shall be designated on the tag and the name of the feathers shall be stated, e. g., "broken chicken feathers".

2.409 The term "Chopped feathers" in conjunction with the name of the fowl from which the feathers came shall be used to designate feathers which have been processed through a chopping machine which has cut the feathers into small pieces, e. g., "chopped duck feathers". The term "chopped feathers" shall not be used alone.

2.410 The term "crushed feathers" in conjunction with the name of the fowl from which the feathers came shall be used to designate feathers which have been processed through a so-called curling machine which has changed the original form of the feathers, but has not removed the quill, e. g., "crushed duck feathers". The term "crushed feathers" shall not be used alone.

	FILLING MATERIALS,	
1959	DEFINITIONS AND DESIGNATIONS	RULE 2

2.411 The term "stripped feathers" in conjunction with the name of the fowl from which the feathers came shall be used to designate feather barbs stripped from the main stem or quill but not to the extent of separating the barbs into feather fiber, e. g., "stripped goose feathers". The term "stripped feathers" shall not be used alone.

2.412 The term "feather fibers" in conjunction with the name of the fowl from which the fibers came shall be used to designate any barbs of feathers separated by any process from the quills, but free from the quills, e. g., "chicken feather fibers".

2.413 "Quill" shall mean the main shaft or axis of a feather and "quill feather" shall mean a flight feather or tail feather.

2.414 Feather mixtures shall be designated by the name, character and percentage of each material used or the entire mixture shall be designated by the name of the lowest grade of material used. The grades of materials in descending order are as follows: goose down, duck down, goose feathers, duck feathers, turkey feathers, chicken feathers.

2.500 "Foam" means a polymerized material consisting of a mass of thin-walled cells produced chemically or physically. The term "foam" by itself shall not be used.

2.501 A foam product shall be designated on the tag as "foam" together with the name of the organic base from which it is made, e. g., "latex foam rubber", "urethane foam", "vinyl foam"; or, when made from "urethane", "vinyl" or any other synthetic organic base, it may be designated on the tag as "synthetic foam".

2.502 The term "polystyrene foam" shall be used to designate foam produced during the polymerization of a styrene monomer or the product may be designated as "synthetic foam".

2.503 The term "urethane foam" shall be used to designate a cellular urethane product which is created by the interaction of an ester or an ether and a carbamic acid derivative, or the product may be designated as "synthetic foam". However, below the "date of delivery" line on the tag, the term "polyether foam", or "polyester foam" or "polyurethane foam" may also appear.

Rule 2.503 as amended, eff. February 4, 1958

FILLING MATERIALS,
RULE 2 DEFINITIONS AND DESIGNATIONS

1959

2.504 The term "vinyl foam" shall be used to designate a foam produced from vinyl or the product may be designated as "synthetic foam".

2.505 The term "rubber" shall apply to the following synthetic rubber-like materials as well as to natural rubber: chloroprene, styrene-butadiene copolymers, butadiene-acrylonitrile copolymers, polymerized isobutylene, with or without comonomers present, and thioplasts (any of the polysulfide rubbers consisting of organic radicals linked through sulfur). The term "rubber products" is not permitted on the tag.

2.506 "Latex foam rubber product" means a foam product made from rubber latex which previously has not been coagulated or solidified.

2.507 The use of one of the terms set forth in Rule 2.501 above without further modification shall be used to designate a foam product consisting of not more than two inserts of unlaminated prime material for attaining desired height, not more than one vertical splice in every three square feet of top surface area, except for T's and U's, but not more than two vertical splices regardless of top surface area excluding those permitted for T's and U's, and not more than one vertical splice in every three linear feet of vertical side-walls or in lieu thereof in each corner, excepting side-walls that are irregular in contour in which case the number of splices shall be subject to the approval of the Commissioner.

2.508 The term "molded" may precede the terms set forth above whenever all of the foam product has been made in the mold in the shape in which it is intended to be used.

2.509 The term "pieces" shall follow the terms set forth above whenever the foam product consists of more pieces or otherwise fails to conform to the requirements set forth in Rule 2.507 above but shall not apply to a foam product which has been subjected to a shredding process.

2.510 The term "shredded" shall precede or follow the terms set forth above whenever the foam product has been subjected to a shredding process.

FILLING MATERIALS,

1957

DEFINITIONS AND DESIGNATIONS

RULE 2

2.511 When cement is used to put together shreds or pieces of a foam product whether or not this is done in a mold, the term "cemented" may be used, e. g., "cemented shredded latex foam rubber", "cemented urethane foam pieces". The term "molded" shall not be used.

2.512 A covering made of latex foam rubber, or of any foam product, not exceeding one-eighth inch in thickness shall not be stated on the tag. Below the "date of delivery" line it is permissive to carry a statement, such as "covered with latex foam rubber". This provision shall apply only to an article that is not encased in another covering regardless of the composition of that covering unless it shall be a transparent wrapper which may be opened for the examination of the article. The contents of the article, however, shall be stated on the tag regardless of whether it is or is not encased in another covering.

2.513 When a fabric-topped foam product or sponge used as a cover for an article of bedding is in excess of 10% of the weight of the entire filling material, it shall be stated on the tag and its percentage given.

2.514 "Sponge rubber products" means sponge products made from rubber which has previously been coagulated or solidified.

2.515 "Sponge rubber products" shall be designated on the tag as follows: (a) "Sponge rubber" - The use of this term shall be mandatory for a sponge rubber product consisting of not more than two inserts of unlaminated prime material for attaining desired height, not more than one vertical splice in every three square feet of top surface area excluding those permitted for T's and U's, and not more than one splice in every three linear feet of added side-walls or in lieu thereof in each corner, excepting side-walls that are irregular in contour in which case the number of splices shall be subject to the approval of the Commissioner.

2.516 The term "molded sponge rubber" may be used to designate a sponge rubber product which has been molded into a form in which it has been intended to be used.

2.517 The term "pieces" shall follow the term "sponge rubber" whenever a sponge rubber product consists of pieces, or otherwise fails to conform to the requirements set forth in Rule 2.515 but shall not apply to a sponge rubber product which has been

FILLING MATERIALS,		
RULE 2	DEFINITIONS AND DESIGNATIONS	1957

subjected to a shredding process.

2.518 The term "shredded" shall precede or follow the term "sponge rubber" whenever a sponge rubber product has been subjected to a shredding process.

2.519 When cement is used to put together shreds or pieces of a sponge rubber product whether or not this is done in a mold, the term "cemented", may be used, e. g., "cemented sponge rubber pieces", "cemented shredded sponge rubber". The term "molded" shall not be used.

1957

FELT

RULE 3

RULE 3 - Felt

3.1 Felt means material that has all been carded in layers or sheets by a garnett or felting machine.

3.2 "Felt" does not include felt scraps or repicked felt.

3.3 Even though material has previously been carded in layers or sheets, if it is not readily distinguishable from unfelted material, it shall not be designated as "felt".

3.4 The term "felt" or "felted" by itself shall not be used but shall be combined with the name of the material from which it is made, e. g., "blended cotton felt", "wool felt", "jute felt", etc. The use of the term "batting" instead of "felt" is permissible.

3.5 The terms "felted textile by-products", "felted textile wastes", "felted blended fibers", "felted defabricated fibers" may be used. The kind of fibers need not be designated, but if designated on the tag, the fibers shall be as indicated. If the material is made of more than one kind of fiber and one fiber is designated on the tag, the name of each fiber and its percentage shall be designated.

3.6 Felt made of mixtures of any of the following: staple cotton, cotton linters, or cotton by-products, shall be designated on the tag as "blended cotton felt".

3.7 Felt made entirely of staple cotton shall be designated on the tag as "staple cotton felt".

3.8 Felt impregnated with vinyl or any other resin shall be designated as "resin-treated felt", e. g., "resin-treated blended cotton felt".

RULE 4 TAGS, GENERAL REQUIREMENTS

1957

RULE 4. Tags, General Requirements

4.1 The term "tag", "tags", "tagged", or other similar term, unless otherwise specified in these rules, refers to the tag required by Article 25-A of the General Business Law to be affixed to every article of bedding as set forth in Section 385 of the Law.

4.2 A tag made of cloth or other material of like durability from which the filling flakes out when the tag is abraded shall not be used.

4.3 Tags shall be at least six square inches in area, exclusive of the portion required to attach these tags to the articles, unless the Commissioner otherwise permits.

4.4 A tag shall be firmly and conspicuously attached to the outside of the article.

4.5 All mandatory information required by law or by these rules to appear on the tag shall be in capital letters at least 1/8 inch high.

4.6 Tags shall be printed, typed or stamped with black ink only.

4.7 Nothing shall be printed or written on the back of the tag. Nothing shall be affixed to the tag.

4.8 No advertisement or insignia shall appear on the tag.

4.9 It is permitted to use two lines below the "date of delivery line" on the tag to indicate size, grade, quality, brand, catalogue number, price, etc.

4.10 Information appearing below the date of delivery line on the tag or elsewhere on the article to which the tag is attached, or on any container, wrapper, label, labeling or tag other than the bedding law tag accompanying the article, shall not contradict any statement required by law to appear on the tag.

4.11 No term, designation, or pictorial device which is false or which might tend to mislead or deceive the public as to the material content, composition, or construction of an article of bedding or which is deceptive in any other material respect, shall be used on any tag, including tags not required by Section 385 of the

1959

TAGS, GENERAL REQUIREMENTS

RULE 4

General Business Law, or on any label or labeling affixed to or accompanying such article.

4. 12 No handwriting is permitted on any tag except on yellow tags for renovated articles and on white tags to show date of delivery of new articles.

4. 13 Responsibility for properly designating the filling material used in an article is upon the manufacturer of the finished article and upon any person who tags or retags such article.

4. 14 Advertising tags on second-hand articles shall be colored.

4. 15 A person having establishments at more than one location in one city or at more than one city in the state may designate on the tag as the "address of the person", the address of the establishment or office within the state, at which such person, in writing, shall agree to accept service of legal processes issued by any court within the state for a violation of any provision of Article 25-A of the General Business Law or any rule supplemental thereto.

4. 16 Tags, in addition to conforming to Subdivision 2 of Section 385 of the Law, shall also have a minimum thread count of 68 X 72.

Rule 4. 16 as added June 30, 1958

RULE 5 ARTICLES OF BEDDING, TAGGING OF

1957

RULE 5. Articles of Bedding, Tagging Of

5.1 If an article of upholstered furniture would not be complete without cushions, a tag shall be attached to the body of the article. The tag shall designate the number of cushions and the names of the materials used for filling the cushions as well as the materials used in the body of the article.

5.2 Mattresses made in more than one part shall have a tag attached to each part, unless fastened together by a slide fastener or other means to comprise one unit. The tag on such unit shall designate the number of component parts and the mattress shall be shipped as one unit. If the articles are shipped in separate parts, each part shall be tagged.

5.3 Rubber mattress cores and quilted mattress tops and side walls, contained in a carton, need not be tagged providing a tag is attached to the carton.

5.4 Bed pads or mattress protectors containing filling material shall be tagged.

5.5 Tags may be attached to the bottoms of slip seats or other lightweight articles. They may also be attached to the backs or bottoms of upholstered dining room or bedroom chairs but they shall not be attached to the bottoms or backs of divans, sofas, love seats, day-beds, davenports or studio couches.

5.6 Upholstered wood furniture stripped to the frame and rebuilt of all new material including new springs, webbing, etc., may be tagged as a new article. The law does not apply to the wood frame and it does not have to be sterilized. If, however, the wood frame contains vermin it shall not be used unless first treated to kill the vermin.

5.7 If articles of furniture and cushions are recovered only or merely require repairs to the frame without the addition of or the disturbance or exposure of any filling material, they may be repaired or re-covered without the article being sterilized. However, they shall be tagged with a yellow tag and they shall be marked "Repaired only - Filling Not Disturbed or Exposed" and after "Date Sterilized" the word "Not" shall be inserted.

1959

ARTICLES OF BEDDING, TAGGING OF

RULE 5

5.8 Wood furniture which is not upholstered except for detachable cushions which are a part of the complete article, shall have a tag attached to the body of the article, which tag shall designate the number of cushions and the names of the filling materials used therein.

5.9 Upholstered furniture with a detachable cushion shall have the tag securely attached to the top at the front of the platform where it may be clearly visible when the front of the cushion is raised.

5.10 Upholstered furniture without a detachable cushion shall have the top of the tag securely attached to the front of the bottom of the article in such position that the tag is clearly visible.

5.11 Any cushion and chair back, when securely attached to each other, require only one tag which shall read "2 pieces". If not so attached, each cushion shall be tagged.

5.12 Electric comforters when filled with soft filling material shall be tagged.

5.13 In addition to the usual and customary meanings of the terms "quilt" and "comforter" as used in section 383 of the General Business Law, such terms shall be deemed to include any sleeping bag, baby carriage cover, beach roll or article of similar character, when containing filling material.

5.14 Miniature upholstered furniture, if for display only, need not be tagged.

5.15 Upholstered headboards shall be tagged. Headboards when not upholstered need not be tagged.

Rule 5.15 as amended, eff. March 20, 1959

5.16 Upholstered headboards with metal frame attached, when sold as one unit, need bear only one tag; however, when sold separately each part shall be tagged.

5.17 Upholstered slip seats shall be tagged.

5.18 Upholstered beach chairs or beach rolls shall be tagged.

5.19 Upholstered dividers (e. g. a wall-like partition separating the head regions of a bed) shall be tagged.

5.20 Upholstered box springs shall be tagged.

RULE 5 ARTICLES OF BEDDING, TAGGING OF

1957

5.21 Wickerwork furniture with detachable cushions as part of a complete article shall be tagged by attaching the tag to the body of the article. The tag shall designate the number of cushions and the name of the material used for filling the cushions. If seat cushions and back cushions are filled with different materials, the tag shall designate the number of each such cushion and the materials used for filling them.

5.22 Twin studio couches require two tags: One tag designating the contents of the body, the number of cushions and their filling; the other tag to be placed on the separate mattresses.

5.23 A studio couch, consisting of a metal construction with attached spring and a separate mattress, must bear two tags, one for the spring and one for the mattress.

5.24 Single studio couches require only one tag.

5.25 Metal articles of upholstered furniture rebuilt with all new filling material may be tagged as new.

5.26 A metal bed consisting of one or more pieces shall require but one tag. The tag shall designate the number of pieces unless otherwise provided for in these rules and it shall be attached by wire and lead seal.

5.27 Metal bed frames shall be tagged. An imprint of the license number and the legend "All New Material" on the frame shall be deemed to be a tag.

5.28 Metal chair frames which are not upholstered do not have to be tagged. However, if a detachable cushion is part of the chair or bench, the filling contents of the cushion shall be designated on a tag affixed to the cushion.

5.29 Metal gliders, metal couches and substantially similar articles with detachable cushions as part of the complete article shall be tagged by attaching the tag to the body of the article. The tag shall designate the number of cushions and shall designate the names of the materials used for filling the cushions. The tag shall also designate the metal, if new, as "new metal". If the cushions are filled with different materials, the tag shall indicate the number of each type of cushion and shall designate the materials used for filling it.

1957

ARTICLES OF BEDDING, TAGGING OF

RULE 5

5.30 Metal cradles shall be tagged.

5.31 Second-hand spring units shall be tagged with a yellow tag.

5.32 New spring units need not be tagged unless the springs are covered with filling material.

5.33 The presence of an innerspring unit in an article of bedding or upholstered furniture shall be designated on the tag.

5.34 Wooden frames, beds, sofas, divans, or couches, with metal spring assemblies shall be tagged.

5.35 Office furniture which is upholstered in whole or in part, excepting swivel chairs, shall be tagged.

5.36 Pillows, cushions, comforters, bed pads, etc. made of all new material and used in doll cradle sets need not be tagged (1) if they do not exceed 6 inches in their greatest dimension, or (2) if they have permanently affixed to them a figure, statuette, or doll and do not exceed 10 inches in their greatest dimension. When sold as a set, only one tag is required, provided the tag designates the number of pieces in the set. If a tag is required and the items are sold separately, each item shall be tagged.

5.37 Cushions or pads of kitchen chair sets shall be tagged separately unless they are affixed to each other in which case each set may carry but one tag.

5.38 All extra cushions not an essential part of the complete article, shall be tagged separately.

5.39 Fancy cushions which do not exceed 10 inches in greatest dimension and which are not intended for use for sleeping, resting or reclining purposes shall not be deemed to be "articles of bedding". The term "fancy cushions" is construed to mean cushions to which "figures", "statuettes", "dolls" and so forth, are permanently affixed in such manner as to preclude them from being used for resting, sleeping or reclining purposes.

5.40 Cushions or pillows used with any other article shall be separately tagged unless otherwise provided for in these rules.

RULE 5	ARTICLES OF BEDDING, TAGGING OF	1957
--------	---------------------------------	------

5.41 Cushion life preservers shall be tagged.

5.42 Auto seat cushions with soft filling material shall be tagged.

5.43 High chair sets consisting of seat and back cushion or pad may be sold together with only one tag, but the tag shall designate the number of cushions and pads. If seat and back cushions are sold separately, each cushion shall be tagged.

5.44 Cushions measuring more than 6 inches in any dimension shall be tagged unless otherwise provided for in these rules.

5.45 Back rests containing filling material shall be tagged.

5.46 Safety seats for children's use in automobiles, when containing filling material and of such design that they may be used in the home or elsewhere shall be tagged.

5.47 Chair pads, sanitary chair pads, and babies' quilted pads shall be tagged. The presence of a wooden board separating two layers of filling material need not be designated.

5.48 Quilted toilet seat covers shall be tagged.

5.49 Hammocks when filled in whole or in part with filling material shall be tagged.

5.50 Hassocks shall be tagged.

5.51 Massage tables that are wholly or partly upholstered shall be tagged.

5.52 Baby bottle holders that contain filling material shall be tagged, unless exempted by the Commissioner.

5.53 Doll pillows and pads measuring more than 6 inches in any dimension used in doll sets shall be tagged.

5.54 Metal toy beds, metal toy bed springs and upholstered doll carriages with one or more inside dimension of more than 24 inches shall be tagged.

1957

ARTICLES OF BEDDING, TAGGING OF

RULE 5

5.55 Only one tag is required to designate the contents of a pillow and mattress set used in doll beds, providing the number of pieces is designated on the tag and the pieces are not sold separately.

5.56 Toy chests with padded tops, which can also be used as benches, shall be tagged.

5.57 Edging shall be tagged by the manufacturer of the edging.

5.58 The law is fully applicable to the rental of beds, mattresses, adjustable beds, invalid chairs, cushions, etc., customarily used by invalids. It is not intended to and it does not apply to renting out for a few hours of folding chairs used by caterers and undertakers, etc.

5.59 Trapunto embroidery need not be tagged, but if used to cover a filled article, the article shall be tagged.

5.60 Whenever an article is sterilized, the tag affixed to that article must read "contents sterilized" or "material sterilized" and it must also bear the sterilization permit number assigned to the sterilizer by the Commissioner.

5.61 Articles of bedding or upholstered furniture which are rented out must bear a tag stating "~~SECOND-HAND~~CONTENTS UNKNOWN-NOT STERILIZED".

5.62 Imported articles should be tagged by the foreign person or firm licensed by the Division of Bedding. If not so tagged, the importer shall tag the article in compliance with the Law. If the importer does not know the contents of the article, or whether the article is new or second-hand, he shall attach a yellow tag reading "ALL SECOND-HAND MATERIAL-CONTENTS UNKNOWN-NOT STERILIZED". If he sterilizes the article by a process approved by the Industrial Commissioner, he may strike out the word "NOT" and after the word "STERILIZED", he shall insert the date of sterilization. He shall also state the sterilization permit number.

5.63 Any new article which has not been used for any purpose and which has the original tag attached thereto may be returned within 30 days and shall be deemed to be a new article and may be sold at any time thereafter as a new article, but if such article has actually been used or has the tag removed, it can be

RULE 5 ARTICLES OF BEDDING, TAGGING OF

1959

re-sold only as a second-hand article and shall be tagged "SECOND-HAND-CONTENTS UNKNOWN". The term "alteration or correction" as used in the definition of "new" in Section 383 of the General Business Law, means that articles with the original tags attached thereto may be returned for alteration or correction of errors of manufacture within 30 days and when such alterations or corrections are completed the article may be returned to the original purchaser without sterilization but such article may not be sold as a new article.

5.64 Every remade or renovated article not for sale but for return to the owner for his own use shall have a tag approved by the Commissioner affixed to it. This tag shall be attached to the article upon its receipt and the name and address of the owner shall immediately be entered on the tag. Any such article wherein the filling material(s) is disturbed or exposed during making or renovating shall be sterilized by a process approved by the Commissioner. The presence of added material and whether it is new or second-hand and the amount used in pounds shall be designated on the tag. Immediately after the article has been remade or renovated, if no additional material has been used, the word "none" shall be entered on the tag. There shall also be entered the date of sterilization of the material, the sterilizing permit number and the license number of the remaker or renovator.

5.65 Second-hand feathers and down, when sold by junk dealers directly for export, or to other dealers for export, or to feather processors, shall be tagged with a number 8 tag which shall read "Second-hand, Contents Unknown, Not Sterilized." When sold to a feather processor they shall be sterilized by such processor by a process approved by the Commissioner.

Rule 5.15, new rule, eff. February 4, 1958

1957

TOLERANCE

RULE 6

RULE 6. Tolerance

6.1 To allow for unintentional variations, a variation not in excess of ten (10%) percent by weight from the amount stated on the tag shall not be considered as misleading.

6.2 No tolerance shall be allowed to diminish the amount of any filling material in an article of bedding by more than 10% of the amount stated on the tag.

6.3 The 10% tolerance is allowed only where specifically permitted in these rules and also for the purpose of adjusting unintentional errors due to processing difficulties in arriving at exact percentages. Tolerance is not intended to permit deliberate admixture of inferior materials.

6.4 The terms "all", "pure", "100%", or terms of similar import are permitted only if the material is as stated. No tolerance is allowed where such terms are used.

RULE 7

STERILIZATION

1957

RULE 7. Sterilization

7.1 Sterilizing processes are subject to inspection by the Commissioner.

7.2 A permit must be obtained for each separate sterilizing process approved.

7.3 All approvals of sterilizing processes shall be conditioned upon the person or firm to whom the certificate of approval is issued, keeping an accurate record of the name and amount of material and the date of sterilization of the materials sterilized for any person or firm other than the one to whom the certificate of approval was granted. Such record shall be open to examination by, and a copy of such record shall be furnished on demand of, the Commissioner.

7.4 It is not mandatory that each establishment have its own sterilizer. It is permissive to have material sterilized by any concern having a certificate of approval for a sterilizing process. In every case the permit number of the approved process used must be designated on the tag.

7.5 Sterilizing processes are approved as germicides only. Processes described below which are preceded by an asterisk (*) are both germicides and insecticides.

7.6 Any process used for cleaning and curing feathers, cleaning and curling hair, cleaning wool, or cleaning or curling any other material derived from an animal or fowl, shall not be deemed to afford proper and thorough sterilization unless such process effectually removes all disease bearing spores or disease breeding germs or bacilli and all dirt, filth, vermin and extraneous organic matter.

7.7 *Steam Pressure - A steam pressure process, when approved by the Commissioner, may be used to sterilize any article of bedding or filling material. Material subjected to treatment by live steam for 30 minutes at a pressure of 15 pounds or for 20 minutes at a pressure of 20 pounds. Chamber must be steam tight, sufficiently strong to stand the pressure applied, be equipped with a visible steam gauge and necessary valves.

7.8 *Streaming Steam - The streaming steam process, when approved by the Commissioner, may be used to sterilize any article of bedding or material which is not compressed to a degree in excess of the usual compression of cotton felt. Two applications of streaming steam maintained for one hour each with an interval of at least 6 hours and not more than 24 hours between each application. Chamber must have outlet valves at top and bottom but room should otherwise be steam-tight and provision made for draining off condensed steam. Outlet valves must be kept open to prevent pressure in chamber.

7.9 Formaldehyde and Moisture - Formaldehyde gas in the presence of moisture, when approved by the commissioner, may be used to sterilize either loose materials or completed articles when the filling is not compressed to a degree in excess of the usual compression of cotton felt. Completed articles shall be so spaced as to allow free circulation of gas; not less than 4 inches on all sides. Formaldehyde gas to be generated from 1 pint of formaldehyde solution (U. S. P.) for each 1,000 cubic feet of space in the sterilizing chamber. Materials or articles shall be exposed to formaldehyde gas and moisture for at least 10 hours. The minimum quantity of formaldehyde permitted is 2 ounces regardless of how small the room is. The chamber must be gas tight and equipped with air inlet and outlet and with other means, if necessary, to facilitate the removal of gases and fumes after sterilization is completed. Tight closure gates or valves must be provided for both inlet and outlet. Shelves shall be of lattice construction. The exhaust from the sterilizing room or cabinet shall be carried by a duct to a chimney flue extending above the roof of the building or the exhaust duct shall be extended to a point above the roof. This process is the one most generally used for sterilizing secondhand material. It is not suitable, and will not be approved, for sterilizing raw feathers, hair or wool.

7.10 *Hot Air - A hot air sterilizing method, when approved by the Commissioner, may be used for sterilizing material which is not compressed to a degree in excess of the customary compression of cotton felt. Completed articles shall be so spaced as to allow free circulation of hot air; not less than 4 inches on all sides. The air in the chamber must be heated to at least 250 degrees Fahrenheit for a period of at least 2 1/2 hours. The department may approve a shorter period (not less than 1 hour) at a like temperature when the material is loose and opened, so as to permit easy penetration of hot air. Temperature shall be generated by means of properly guarded electric heating units or by steam pipes

RULE 7

STERILIZATION

1957

carrying live, dry steam of sufficient heating capacity. An indirect gas heating system may be used when so arranged that the material cannot be ignited by the gas flame.

7. 11 *Caustic Process - A caustic solution process, when approved by the Commissioner, may be used for sterilizing second-hand metal (other than aluminum or magnesium) used in springs, cribs, cots, etc. A caustic solution of 1/2 lb. of caustic soda to each gallon of water shall be used. The metal must be completely submerged in a cold solution for a period of at least 24 hours but if the solution is brought to the boiling point this period may be reduced to 3 hours. After sterilization, all metal articles shall be thoroughly washed with clean water to remove all caustic solution. The process shall be so located and guarded as to prevent any person from unintentionally coming into contact with the caustic solution. The solution must be used in a tank impervious to the action of the solution. In using this process, all plugs or obstructions shall be removed so as to permit free passage of the solution to the inside of all tubing or other hollow or concealed spaces.

7. 12 Second-hand Latex foam rubber may be sterilized by the formaldehyde method.

7. 13 All second-hand material shall be sterilized before going through a picker or a garnetting machine.

7. 14 All unsterilized second-hand articles or materials shall be separately stored and completely segregated from new or clean articles or materials. No new or clean materials shall be kept or stored within a room or space used for sterilizing second-hand materials. Sterilizing chambers shall not be used for storage purposes.

7. 15 Any other method of sterilization not herein mentioned may be used only if approved by the Commissioner.

7. 16 All rooms, chambers, containers, auto-claves, tanks, boilers, ducts, valves, gauges, heaters and all auxiliary equipment necessary or incidental to properly sterilizing filling material or metal by an approved sterilizing process shall be maintained at all times in good repair and in proper working condition.

1957

STERILIZATION

RULE 7

7.17 Renovation of Secondhand Feather Pillows - An ultraviolet irradiation process together with ozone gas, when approved by the Commissioner, may be used to sterilize the contents of second-hand feather pillows for renovation only, i. e. not for sale but for return to the owner. The feathers must be removed from the old ticking and sterilized in the loose state. The loose feathers must be agitated, dusted and exposed to an effective concentration and intensity of ultraviolet rays for at least 4 minutes with an additional exposure to ozone gas of at least 2 minutes. The contents of each renovated pillow must be sterilized separately. After sterilization the feathers should be enclosed in a new ticking unless the old ticking has been laundered. The ultraviolet tubes should be kept clean and should be replaced periodically in order to maintain effective radiation intensities. This process shall not be approved for use in establishments where there is a possibility of formation of poisonous phosgene gas by the interaction of ozone with carbon tetrachloride or other chemical compounds, unless adequate mechanical exhaust ventilation is provided so that these vapors will be vented to the outside air.

RULE 8

TESTS AND SAMPLINGS

1957

RULE 8. Tests and Samplings

8. 1 For the purpose of obtaining a sample of material other than feathers or down, for test or analysis preliminary to prosecution, the inspector shall take a representative sample at random. If the sample is of feathers or down, or feather and down mixture, he shall take material from at least 3 different parts of the article, thoroughly mix the material and then take a representative sample at random from such mixture. All samples shall be divided into 2 parts. Each part shall be placed in a clean envelope and sealed in the presence of the person in whose possession the material was found. If an analysis is deemed necessary, 1 part shall be transmitted to the laboratory maintained by the Department of Labor for examination, test or analysis. Day and hour of its receipt at the laboratory shall be indicated on the envelope by the person receiving it. One part shall be given to the maker or preparer of the material, if found on his premises or if he is present when the sample is taken, but if found off the premises of the maker or preparer or if he was not present when the sample was taken, such part shall be promptly transmitted to the bedding division and shall there be held subject to call of the maker or preparer but need not be held more than 60 days; or the inspector may deliver 1 part to the maker or preparer.

The part of the sample transmitted to the laboratory shall be kept sealed until the analyst is ready to test it, at which time he shall note on the envelope the day and hour when the seal was broken. If the sample is feathers, or down and feathers, the analyst shall again thoroughly mix the sample and quarter it. One such quarter, or as much thereof as can be accurately separated in 3 hours, shall be analyzed. An analysis made in accordance with the foregoing shall be deemed an analysis of the entire article or material used therein. After analysis the remainder of the sample shall be sealed by the analyst who shall put on the envelope his name and the day and hour of sealing. Such seal shall not again be opened except in court or until the matter has been otherwise disposed of.

8. 2 Doubtful feathers shall be proportioned to the ratio of identifiable feathers.

8. 3 Broken feathers when present in excess of 10% shall be separately named in the report of analysis. When present but not in excess of 10% they shall be treated in the same manner as doubtful feathers.

8.4 Feathers and Downs - The cleanliness of feathers and down, shall for the purposes of administering article 25-A of the General Business Law, be determined by either of the following tests or their reasonable equivalents:

A. The oxygen test shall be made by the following procedure: "Ten grams of feathers and down are transferred to a large Mason jar and 1 liter of distilled water at room temperature is added. The material is thoroughly wetted by shaking and placed in an incubator at 25°C. for 1 hour. It is then filtered through 19-cm. coarse filter paper, and 100ml. of filtrate are pipetted into a porcelain casserole. The liquid is made just acid to litmus with 6 N sulfuric acid and 1 ml. of acid is added in excess. The solution is titrated in the cold with 0.1 N potassium permanganate by adding 2-drop portions and then stirring until a pink color persists for 60 seconds.

The number of milliliters of potassium permanganate used is noted, and calculated to number of grams of oxygen per 100,000 grams of sample (oxygen number). 1 ml. of 0.1 N KMnO_4 = 0.8 mg. of oxygen = 80 oxygen number."

B. The water-soluble ammonia content shall be determined by the following procedure: "Five grams of feathers and down are boiled 20 minutes in 200 ml. of distilled water containing 1 ml. of 0.1 N hydrochloric acid, then filtered and washed with hot water. The combined filtrate and washings are evaporated on a hot plate to a volume of 4 to 6 ml. The residue is washed into a graduated Kramer-Gittelmantube, cooled, and diluted with water to 12.5 ml. A 5-ml. aliquot is pipetted into a large culture tube, 250 x 25 mm. in diameter, 5 drops of caprylic alcohol are added to prevent foaming, and then 7 ml. of saturated borax solution. The culture tube is immediately inserted into the steam-distilling apparatus (figure 1), and the liberated ammonia is distilled over through a water-cooled block-tin condenser into a 50 ml. Erlenmeyer flask containing 10 ml. of 2 per cent boric acid and 5 drops of methyl red indicator (0.05 per cent methyl red in 95 per cent ethyl alcohol). The culture tube is kept in the apparatus for 5 minutes after the top of the tin condenser has become too hot to touch. During

RULE 8

TESTS AND SAMPLINGS

1957

the last 2 minutes the Erlenmeyer flask is lowered so that the end of the condenser is above the boric acid solution.

The solution is titrated with 0.01 N sulfuric acid, using a microburet, until the color is a deep pink. It is then heated to boiling, and the titration is continued until a full red color is reached. The number of milliliters of sulfuric acid used is noted.

A blank determination is made using water and the reagents alone. The milliliters of sulfuric acid obtained with the blank are subtracted to get the corrected volume of sulfuric acid. Calculations: $\text{Ml. of } \text{H}_2\text{SO}_4 \text{ (corrected)} \times 0.0085 = \% \text{ of } \text{NH}_3 \text{ in sample.}$

C. Conclusion: Material having either an oxygen number above 20 or a water-soluble ammonia content above .020% shall be deemed to be "not properly clean".

Figure 1

8.5 Hair and Wool - The cleanliness of hair and wool, shall for the purpose of administering article 25-A of the General Business Law be determined by the following test or its reasonable equivalent:

Allow 1/2 ounce sample of the material to stand in 1 quart of freshly boiled but cold water for at least 2 hours and then thoroughly agitate the material. Strain off the water through clean muslin into a clean container. There shall be no visible sediment nor cloudiness and no cloudiness or offensive odor shall develop in the wash water when allowed to stand for 72 hours in an unsealed container at room temperature not below 70 degrees Fahrenheit. (Reasonably equivalent tests may be used only if approved by the Commissioner).

8.6 Tests for spores, disease germs or harmful bacteria shall be by means of bacteriological examination at the discretion of the Division of Bedding.

RULE 9	RECORDS OF SECOND-HAND SALES	1959
--------	------------------------------	------

RULE 9. Records of Second-Hand Sales

9.1 All dealers in and users of, second-hand filling materials, as defined in Section 383 of the General Business Law shall establish, maintain and preserve for not less than 1 year a separate record with respect to all sales of such materials. Such record shall be open to inspection by the Commissioner and a copy thereof shall be furnished on his

Such record shall show:

- (1) Date of sale.
- (2) Name and amount of material included in each sale.
- (3) Name and address of person or concern to whom material was sold.
- (4) Whether material was sold in bulk or in a re-made article. If the latter, the name of the article is to be stated.

BEDDING LAW
OF
NORTH CAROLINA

North Carolina State Board of Health

BEDDING LAW

(ARTICLE 16 OF THE GENERAL STATUTES OF NORTH CAROLINA, SECTION 130-171 to 130-179 AS AMENDED BY THE 1959 GENERAL ASSEMBLY)

Regulation of the Manufacture of Bedding.

Section 130-171. Definitions. In addition to the definitions set out in Article one of this Chapter, as used in this Article, or on the tags required by this Article:

The word 'bedding' means: Any mattress, upholstered spring, quilt, comforter, pad of a thickness of more than one inch, cushion or pillow used principally for sleeping, or like item of a thickness of more than one inch used principally for sleeping. Dual purpose furniture such as sofa beds and studio couches shall be included within this definition.

The term 'second hand bedding' means: Any bedding of which prior use has been made.

The term 'new material' means: Any material or article that has not been used in the manufacture of another article or used for any other purpose: Provided this shall not exclude by-products of industry that have not been in human use, unless otherwise excluded in this Article.

The term 'previously used material' means: (a) Any material which has been used in the manufacture of another article or used for any other purpose, (b) any material made into thread, yarn, or fabric, and subsequently torn, shredded, picked apart, or otherwise disintegrated, including jute.

The word 'renovate' means: The reworking or remaking of used bedding and returning it to the owner for his personal use or the use of his immediate family.

The word 'manufacture' means: Any making or remaking of bedding out of new or previously used materials, except for the maker's own personal use or the use of his immediate family, other than renovating.

The word 'sanitize' means: Treatment of bedding or materials to be used in bedding for the destruction of pathogenic microorganisms and arthropods and the removal of dirt and filth.

The word 'sell' or 'sold' shall, in the corresponding tense, include: Sell, have to sell, give away in connection with a sale, deliver or consign in sale, or rent,⁴ or, possess with intent to sell, deliver, consign in sale, or rent.

The term 'itinerant bedding vendor' means: Any person who sells bedding from a movable conveyance.

The terms 'cotton', 'virgin cotton' and 'staple cotton' mean: The staple fibrous growth as removed from cottonseed in the usual process of ginning.

The term 'cotton by-products' means: Any by-products removed from cotton by the various machine operations necessary in the manufacture of cotton yarn.

The term 'cotton linters' means: The fibrous growth removed from cottonseed subsequent to the usual process of ginning.

The word 'felt' means: Material that has been carded in layers by a garnett machine and is inserted into the bedding in layers.

Section 130-172. Sanitizing. No person shall renovate any mattress without first sanitizing it in accordance with rules and regulations adopted by the State Board of Health.

Any sanitizing apparatus or process used under this Article must conform to rules and regulations adopted by the State Board of Health, and shall be inspected and approved by a representative of the State Board of Health according to the rules and regulations of the State Board of Health. If, in the opinion of such representative, the apparatus or process does not meet the standards established by said rules and regulations, such apparatus or process may be condemned by the representative of the State Board of Health, in which event such apparatus or process shall not be used for sanitizing any bedding or material required to be sanitized under this Article until the defects have been remedied and the apparatus or process complies with the rules and regulations of the State Board of Health.

Any person sanitizing bedding must attach to said bedding a yellow tag containing such information as the State Board of Health may require, and affix thereto the adhesive stamp prescribed by G. S. 130-177.

Any person sanitizing material or bedding for another person shall keep a complete record of the kind of material and bedding so sanitized, such record to be open to inspection by any representative of the State Board of Health.

Any person who receives bedding for renovation or storage shall keep attached thereto, from the time received, a tag on which is legibly written the date of receipt and the name and address of the owner.

Section 130-173. Manufacture Regulated. No person shall manufacture in this State any bedding containing previously used materials without first sanitizing the previously used materials in accordance with rules and regulations adopted by the State Board of Health.

No manufacturing establishment shall store any unsanitized previously used materials in the same room with bedding or

materials that are new or have been sanitized unless the new or sanitized bedding or materials are completely segregated from the unsanitized materials in a manner approved by regulations of the State Board of Health.

All materials used in the manufacture of bedding in this State shall be reasonably clean and free from trash, oil, grease, or other extraneous matter. No material known as 'sweeps' or 'oily sweeps' may be used unless washed by a process approved by the State Health Director.

No person shall manufacture any bedding to which is not securely sewed a tag of durable material approved by the State Board of Health, which tag shall be at least two inches by three inches in size, and to which is affixed the adhesive stamp provided for in G. S. 130-177. Such stamp shall be so affixed as not to interfere with the wording on the tag.

Upon said tag shall be plainly stamped or printed with ink in English: (a) the name and kind of material or materials (as defined by this Article or by the regulations of the State Board of Health) used to fill such bedding; (b) the name and address of the maker or vendor of the bedding; (c) a registration number designated by the State Health Director; (d) in letters at least one-eighth inch high the words 'made of new material', if such bedding contains no previously used material; or the words 'made of previously used materials', if such bedding contains any previously used material; or the word 'second hand' on any bedding which has been used but not remade.

A white tag shall be used for new materials and a yellow tag for previously used materials or second hand bedding.

Nothing false or misleading shall appear on said tag, and it shall contain all statements and the adhesive stamp required by this Article, and shall be sewed to the outside covering of every piece of bedding being manufactured. Except in the case of dual purpose furniture, said tag must be sewed to the outside covering before the filling material has been inserted. No trade name or advertisement will be permitted on said tag.

Section 130-174. Altering, etc., Tags Prohibited. No person, other than one purchasing bedding for his own use, or a representative of the State of Board of Health, shall remove, deface, or alter the tag required by this Article.

Section 130-175. Selling Regulated. No person shall sell any bedding in this State (whether manufactured within or without this State) which has not been manufactured, tagged, labeled, and stamped in the manner required by this Article, and which does not otherwise comply with the provisions of this Article.

No person shall sell any second hand bedding or bedding containing any previously used material unless sanitized, since last used, in accordance with rules and regulations adopted by the State Board of Health: Provided, this Article shall not apply to a mattress sold by the owner and previous user from his home directly to a purchaser for his own personal use unless such mattress has been exposed to an infectious or contagious disease.

Possession of any item covered by this Article in any store, warehouse, itinerant vendor's conveyance, or place of business, other than a private home, hotel, or other place where such articles are ordinarily used, shall constitute prima facie evidence that the item so possessed is possessed with intent to sell. No second hand bedding shall be so possessed for a period exceeding 60 days until sanitized.

Section 130-176. Registration Numbers, Licenses. All persons manufacturing or sanitizing bedding in North Carolina, or manufacturing bedding to be sold in North Carolina, shall make an application, in such form as the State Health Director shall prescribe, for a registration number. Upon receipt of such application, the State Board of Health shall issue to the applicant a certificate of registration showing such person's name and address, registration number, and such other pertinent information as the State Board of Health may require.

For the purpose of defraying expenses incurred in the enforcement of the provisions of this Article, the following license fees are to be paid to the State Board of Health, deposited in the 'bedding law fund,' and expended in accordance with the provisions of G. S. 130-177. No person shall sanitize any bedding, as required by this Article, unless he is exempted by other provisions of this Article, until he has secured a 'Sanitizer's License' from the State Board of Health upon the payment of twenty-five dollars (\$25.00) for each calendar year. No person shall manufacture any bedding in this State, unless he is exempted by other provisions of this Article, until he has secured a 'Manufacturer's License' from the State Board of Health upon the payment of twenty-five dollars (\$25.00) for each calendar year.

The regular license period shall be from January 1 to December 31 of each year. However, any license bought after July 1 of any year shall be valid for the remaining part of that calendar year and shall be furnished at half the regular license fee. If any establishment owned by the holder of any such license or licenses should be sold, the license or licenses may be transferred with the business, such transfer to be accomplished under rules prescribed by the State Board of Health.

All licenses required by this Article shall, at all times, be kept conspicuously posted in the place of business of the licensee.

The State Health Director may revoke and void any of the aforesaid licenses of any person convicted twice within a twelve months' period for violating this Article; provided, that the State Board of Health shall have authority, after 30 days from the date of revocation, to reinstate any revoked license upon the payment of the required fees.

Section 130-177. Enforcement Funds. The State Board of Health is hereby charged with the administration and enforcement of this Article, and the Board shall provide specially designated adhesive stamps for use under the provisions of this Article. Upon request the Board shall furnish no less than five hundred such stamps to any person paying in advance eight dollars (\$8.00) per five hundred stamps.

Any person who manufactures bedding in North Carolina or any person who manufactures bedding to be sold in North Carolina may, in lieu of purchasing and affixing the adhesive stamps provided for by this Article, annually secure from the State Board of Health a 'Stamp Exemption Permit' upon compliance with the provisions of this Section and the rules and regulations of the State Board of Health. The holder of a stamp exemption permit shall not be required to purchase or affix adhesive stamps to bedding manufactured or sold in North Carolina. The cost of a stamp exemption permit is to be determined annually by the total number of bedding items manufactured or sold in North Carolina by the applicant during the calendar year immediately preceding the issuance of the permit, at the rate of eight dollars (\$8.00) for each five hundred (500) pieces of bedding or fraction thereof. A maximum charge of four hundred dollars (\$400.00) shall be made for pieces of bedding manufactured in North Carolina but not sold in North Carolina.

Applications for stamp exemption permits must be submitted in such form as the State Board of Health shall prescribe. No stamp exemption permit may be issued to any person unless he has done business in North Carolina throughout the preceding calendar year in compliance with the provisions of this Article, and unless he complies with the rules and regulations of the State Board of Health governing the granting of stamp exemption permits.

The State Board of Health is hereby authorized and directed to prepare rules and regulations for the proper enforcement of this Section. The rules and regulations shall include provisions governing the type and amount of proof which must be submitted

by the applicant to the State Board of Health in order to establish the number of bedding items that were, during the preceding calendar year: (a) Manufactured in North Carolina and sold in North Carolina; (b) manufactured outside of North Carolina and sold in North Carolina; and (c) manufactured in North Carolina but not sold in North Carolina. Because of the greater difficulty involved in auditing the records of out-of-State manufacturers, the State Board of Health is authorized to require a greater amount of proof from out-of-State manufacturers than from in-State manufacturers. The State Board of Health may provide in its regulations for additional proof of the number of bedding items sold during the preceding calendar year when it has reason to believe that the proof submitted by the manufacturer (whether in-State or out-of-State) is incomplete, misleading, or incorrect.

All money collected under this Article shall be paid to the State Health Director, who shall place all such money in a special 'bedding law fund', which is hereby created and specifically appropriated to the State Board of Health, solely for expenses in furtherance of the enforcement of this Article. The State Health Director shall semiannually render to the State Auditor a true statement of all receipts and disbursements under said fund, and the State Auditor shall furnish a true copy of said statement to any person requesting it.

All money in the 'bedding law fund' shall be expended solely for: (a) Salaries and expenses of inspectors and other employees who devote their time to the enforcement of this Article, or (b) expenses directly connected with the enforcement of this Article, including attorney's fees, which are expressly authorized to be incurred by the State Health Director without authority from any other source when in his opinion it is advisable to employ an attorney to prosecute any persons: Provided, however, that a sum not exceeding twenty per cent (20%) of such salaries and expenses above enumerated may be used for supervision and general expenses of the State Board of Health.

Section 130-178. Enforcement by State Board of Health. The State Board of Health, through its duly authorized representatives, is hereby authorized and empowered to enforce the provisions of this Article. Any person who shall hinder any representative of the State Board of Health in the performance of his duty under the provisions of this Article shall be guilty of a violation of this Article.

Every place where bedding is made, remade, renovated, or sold, or where material which is to be used in the manufacture of bed-

ding is mixed, worked, or stored, shall be inspected by duly authorized representatives of the State Board of Health.

Any representative of the State Board of Health may order off sale, and so tag, any bedding which is not made, sanitized, tagged, or stamped as required by this Article, or which is tagged with a tag containing a statement false or misleading, and such bedding shall not be sold or otherwise removed except with the consent of a representative of the State Board of Health, until such defect is remedied and a representative of the State Board of Health has re-inspected same and removed the 'off-sale' tag.

Any person supplying material to a bedding manufacturer shall furnish therewith an itemized invoice of all material so furnished. Each material entering into willowed or other mixtures shall be shown on such invoice. The bedding manufacturer shall keep such invoice on file for one year subject to inspection by any representative of the State Board of Health.

When an authorized representative of the State Board of Health has reason to believe that bedding is not tagged or filled as required by this Article, he shall have authority to open a seam of such bedding to examine the filling; and if unable after such examination to determine if the filling is of the kind stated on the tag, he shall have the power to examine any purchase or other records necessary to determine definitely the kind of material used in such bedding, and he shall have power to seize and hold for evidence any such records and any bedding or bedding material which in his opinion is made, possessed, or offered for sale contrary to this Article, and shall have power to take a sample of any bedding or bedding material for the purpose of examination or for evidence.

Section 130-179. Exemptions for Blind Persons and State Institutions. In the cases where bedding is manufactured, sanitized, or renovated in a plant or place of business owned or operated by blind persons in which place of business not more than one sewing assistant who is not blind is employed in the manufacture or renovation of mattresses, the bedding shall be inspected pursuant to this Article, but it shall not be required that stamps be affixed or that a license tax be paid, and bedding made by such blind persons may be sold by any dealer without the stamps being affixed.

State institutions engaged in the manufacture, renovation, or sanitization of bedding for their own use or that of another State institution are exempted from all provisions of this Article.

RULES AND REGULATIONS

RULES AND REGULATIONS GOVERNING THE SANITIZING OF MATTRESSES, PREVIOUSLY-USED MATERIALS, SECOND-HAND BEDDING, AND BEDDING CONTAINING PREVIOUSLY-USED MATERIALS; THE STORAGE OF PREVIOUSLY-USED MATERIALS; THE ISSUANCE OF STAMP EXEMPTION PERMITS; AND, THE TRANSFER OF MANUFACTURERS' LICENSES AND SANITIZERS' LICENSES.

For the purpose of carrying out the provisions of Article 16 of Chapter 1357 of the 1957 Session Laws of North Carolina, the North Carolina State Board of Health hereby adopts the following rules and regulations governing: the sanitizing of mattresses, previously-used materials, second-hand bedding, and bedding containing previously-used materials; the storage of previously-used materials; the issuance of stamp exemption permits; and, the transfer of manufacturers' licenses and sanitizers' licenses.

SECTION I. SANITIZING

a. No person shall renovate any mattress without first sanitizing it in accordance with one of the processes authorized in subsection (e) below.

b. Any sanitizing apparatus or process used to sanitize articles as required by Article 16 of Chapter 1357 of the 1957 Session Laws of North Carolina, or by these rules and regulations, must comply with the provisions of these rules and regulations.

c. No person shall manufacture or sell in this State any bedding containing previously-used materials without first sanitizing the previously-used materials in accordance with one of the processes authorized in subsection (e) below.

d. No person shall sell any second-hand bedding or bedding containing any previously-used material unless it is sanitized, since last used, in accordance with one of the processes authorized in subsection (e) below; provided, however, that this requirement shall not apply to a mattress sold by the owner and previous user from his home directly to a purchaser for his own personal use, unless such mattress has been exposed to an infectious or contagious disease.

e. Authorized sanitizing processes

(1) Process Number 1—Dry Heat

In this process, the bedding must be heated at a temperature of 230°F. for a period of one hour.

The chamber in which this process is performed must be insulated sufficiently to insure maintenance of a uniform temperature of 230°F. Articles to be sanitized must be placed on racks, or other devices provided therein, in such a manner that a minimum space of 6" is left around each item being sanitized, and between such item and the walls, floor, ceiling, and other items. Loose materials to be sanitized must be placed in tiers on slats, or in other arrangements that permit an even distribution of heat throughout the material. A thermometer that has been checked for accuracy within 1°F. must be placed within the chamber at a point where it can be easily read at all times through a window for that purpose.

(2) Process Number 2—Formaldehyde and Sulfur

In this process, the bedding must be exposed to formaldehyde and sulfur dioxide gas in a moist and warm atmosphere for at least 10 hours, using one pint of .37% formalin and three pounds of sulfur to 1,000 cubic feet. Formaldehyde is generated from the formalin by adding potassium permanganate.

Commercial fumigators which generate an equivalent quantity of gas may be used.

The chamber in which this process is performed shall be sealed in such a manner as to make it gas tight. The placing of bedding within the chamber shall conform with the requirements set out for process Number 1 above.

(3) Process Number 3—Washing

In this process, the bedding is boiled for fifteen minutes, and washed with an approved soap or detergent. After drying, the bedding shall be clean to touch, sight, and smell.

(4) Notwithstanding the provisions of subsections (e) (1) through (e) (3) of this section, other methods of sanitizing may be used after receiving the approval of the State Board of Health in writing, if it is demonstrated that they destroy pathogenic microorganisms and arthropods, and remove dirt and filth.

(5) Notwithstanding the provisions of subsections (e) (1) through (e) (4) of this section, second-hand bedding and previously-used materials that show evidence of contamination with feces, urine, pus, vomit, blood, mucus, or other filth, or are not reasonably clean, must be sanitized by process Number 3 only.

SECTION II. STORAGE OF PREVIOUSLY-USED MATERIALS

When previously-used materials that have not been sanitized are stored in a bedding manufacturing establishment in the same room with new, or sanitized bedding or bedding materials, such previously-used materials must be segregated from the new, or sanitized bedding or bedding materials, by partitions that are free of holes, cracks, or other openings. The top of the partitions must be at least one foot higher than the level of the unsanitized materials.

SECTION III. STAMP EXEMPTION PERMITS

(a) Any person who manufactures bedding in North Carolina or any person who manufactures bedding to be sold in North Carolina may, in lieu of purchasing and affixing the adhesive stamps provided for by Article 16 of Chapter 1357 of the 1957 Session Laws, annually secure from the State Board of Health a stamp exemption permit upon compliance with the provisions of said Article and these rules and regulations. The holder of the stamp exemption permit shall not be required to purchase or affix adhesive stamps to bedding manufactured or sold in North Carolina. The cost of a stamp exemption permit is to be determined annually by the total number of bedding items manufactured or sold in North Carolina by the applicant during the calendar year immediately preceding the issuance of the permit, at the rate of Eight Dollars (\$8.00) for each five hundred pieces of bedding or fraction thereof. A maximum charge of Four Hundred Dollars (\$400.00) shall be made for pieces of bedding manufactured in North Carolina but not sold in North Carolina.

(b) Applications for stamp exemption permits must be submitted on forms supplied by the State Board of Health. No stamp exemption permit may be issued to any person unless he has done business in North Carolina throughout the preceding calendar year in compliance with the provisions of Article 16 of Chapter 1357 of the 1957 Session Laws, and unless he complies with these regulations.

(c) Any person applying for a stamp exemption permit must include on the application form furnished by the State Board of Health a statement in writing showing the number of bedding items that were, during the preceding calendar year: (1) manufactured in North Carolina and sold in North Carolina; (2) manufactured outside of North Carolina and sold in North Carolina; and, (3) manufactured in North Carolina but not sold in North Carolina. Provided, however, that if the applicant's statement sets out the total number of bedding items which such manufacturer

produced during the preceding calendar year, it shall not be necessary for the applicant to set out what proportion of that total was manufactured inside or outside of North Carolina, or sold inside or outside of North Carolina, in which case the cost of the stamp exemption permit will be determined as if the total production were manufactured in North Carolina and sold in North Carolina. The statement of the applicant required by this subsection must contain a certification by a certified public accountant that he has examined the records of the applicant and finds that the statement correctly reflects the information contained in the records of the applicant.

(d) The State Board of Health may require additional proof of the number of bedding items sold during the preceding calendar year when it has reason to believe that the proof submitted by the manufacturer (whether in-state or out-of-state) is incomplete, misleading, or incorrect.

(e) The stamp exemption permits issued pursuant to these rules and regulations shall be valid from the first day of March of any calendar year through the last day of February of the following calendar year.

SECTION IV. TRANSFER OF MANUFACTURERS' LICENSES AND SANITIZERS' LICENSES

(a) If any person to whom a manufacturer's license or sanitizer's license has been issued shall sell his manufacturing or sanitizing establishment, he may transfer the license with the business, if such transfer is accomplished in accordance with the provisions of these rules and regulations.

(b) In order to make such transfer, and before the purchaser may use such license of the seller, the purchaser must submit to the State Board of Health the following: (1) the name and address of the seller; (2) the location of the establishment being purchased; (3) the name of the establishment being purchased; (4) the name and address of the purchaser; (5) the effective date of sale; and (6) whether the name of the establishment being purchased is to be changed, and if so, the name under which it is to be operated by the purchaser.

SECTION V. VIOLATIONS

If any person shall wilfully violate any rule or regulation adopted by the State Board of Health pursuant to Chapter 1357 of the 1957 Session Laws, or shall wilfully fail to perform any act required by, or shall wilfully do any act prohibited by such

rules and regulations, he shall be guilty of a misdemeanor and upon conviction thereof shall be punished by a fine not to exceed Fifty Dollars (\$50.00), or by imprisonment for a period not to exceed thirty days (30), as provided in Article 22 of Chapter 1357 of the 1957 Session Laws.

SECTION VI. CONFLICTING RULES AND REGULATIONS REPEALED

All rules and regulations heretofore adopted by the State Board of Health which are in conflict with the provisions of these rules and regulations are hereby repealed.

SECTION VII. SEVERABILITY

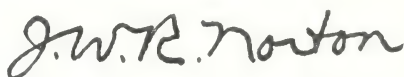

If any provision of these rules and regulations, or the application thereof to any person or circumstance, is held invalid, the remainder of the rules and regulations, or the application of such provision to other persons or circumstances, shall not be affected thereby.

SECTION VIII. EFFECTIVE DATE

These rules and regulations shall be in full force and effect from and after February 15, 1958.

The foregoing rules and regulations governing the sanitizing of mattresses, previously-used materials, second-hand bedding, bedding containing previously-used materials; storage of previously-used materials; the issuance of stamp exemption permits; and, the transfer of manufacturers' licenses and sanitizers' licenses were adopted at a meeting of the State Board of Health on February 7, 1958, at Raleigh, North Carolina.

Certified as a true copy

A handwritten signature in dark ink, appearing to read "J. W. R. Norton". The signature is written in a cursive, flowing style.

State Health Director

OHIO

Sec. 3713.01. Definitions. As used in sections 3713.01 to 3713.11, inclusive, of the Revised Code:

(A) "Person" means an individual, group of individuals, partnership, corporation, or association.

(B) "Bedding" means any upholstered furniture filled with material, any mattress, upholstered spring, comforter, bolster, pad, cushion, pillow, mattress protector, quilt, and any other upholstered article, to be used for sleeping, resting, or reclining purposes, and any glider, hammock, or other substantially similar article which is wholly or partly upholstered.

(C) "Material" means any article, substance, or portions thereof used in the manufacture, repair, or renovation of bedding.

(D) "New material" means any material which has not been used in the manufacture of another article, or used for any other purpose, and includes by-products of machines at mills using only new raw material.

(E) "Secondhand material" means any material which is not "new."

(F) "Shoddy material" means any material which has been spun into yarn, knit or woven into fabric and subsequently cut up, torn up, broken up, ground up or otherwise defabricated and shall be so designated on the label as "shoddy."

(G) "Secondhand article of bedding" means any article of bedding which has been put to bodily use by, on, or about any person or animal and is sold or offered for sale "as is."

(H) "Remade, repaired, or renovated articles of bedding not for sale" means any article of bedding that is remade, repaired, or renovated for and is returned to the owner for his own use.

(I) "Sale," "sell," or "sold" shall, in the corresponding tense, mean sell, offer to sell, or deliver or consign in sale, or possess with intent to sell, or deliver in sale.

(J) "Upholstered furniture" means any article of household furniture wholly or partly stuffed or filled with material and which is used or intended for use for sitting, resting, or reclining purposes.

Sec. 3713.02. Administration and enforcement; license. The department of industrial relations shall administer and enforce sections 3713.01 to 3713.11, inclusive, of the Revised Code. All persons manufacturing or making bedding which is sold, consigned or delivered for sale, or offered for sale, or remaking, repairing, or renovating bedding, in the state shall make application for, in such form as the director of industrial relations shall prescribe, and obtain from the director a registration number which shall be printed on each tag or label required to be attached to all bedding articles manufactured, made, remade, repaired, or renovated by such person for sale or use

in this state. Upon receipt of any such application the director shall issue to the applicant a certificate of registration showing such person's name and address, registration number, and such other pertinent information as the director deems necessary. The director shall prescribe and make available to any registered person manufacturing, making, remaking, repairing, or renovating bedding for sale or use in this state, or any person selling or offering for sale "secondhand articles of bedding," specially designed adhesive stamps, if the registrant is not licensed, one of which shall be securely affixed to one of the tags or labels required to be sewed or attached to each article of bedding. The stamps, provided for in this section, shall be sold by the department in amounts of not less than one thousand, or multiples thereof, at the rate of ten dollars per thousand stamps for all stamps required on pillows, comforters, cushions, headboards, mattress pads, and infant accessories; all other articles of bedding shall require stamps costing twenty dollars per thousand stamps.

The director may issue a license, in lieu of requiring the use of adhesive stamps, to any registrant who makes application pursuant to appropriate regulations of the department and complies and agrees with the following conditions:

(A) Submission with the application payment of an annual license privilege fee at a time and in an amount determined by the bedding advisory board, and under the terms and conditions such board prescribes;

(B) Any annual license fee and any other payments, accepted under division (A) of this section, are "funds" and "fees" under this section, and shall not be refundable, in whole or in part, to any registrant.

The funds derived from the sale of said stamps and all fees, fines, and penalties collected under this section and sections 3713.06, 3713.07, and 3713.09 of the Revised Code, shall be paid into the state treasury to the credit of a rotary fund to be used and appropriated for the administration and enforcement of sections 3713.01 to 3713.11, inclusive, of the Revised Code. Whenever the funds accumulated in said fund in any biennial period, exceed the amount required for the enforcement of such sections and after there has first been accumulated a reserve operating fund of fifty thousand dollars for emergencies, such excess funds shall be transferred to the general revenue fund.

Sec. 3713.021. Exceptions. The provisions of section 3713.02 relating to upholstered furniture do not apply to any such articles of upholstered furniture which are in any of the following categories:

(A) In the hands of retail merchants on October 6, 1955;

(B) In transit or in warehouses between the manufacturer and the retailer on October 6, 1955;

(C) In the process of manufacture on October 6, 1955 which process of manufacture is completed within thirty days after such date.

Sec. 3713.03. Appointment of chief of division of bedding inspection; appointment of inspectors. The director of industrial relations may appoint a chief of the division of bedding inspection as created under section 121.04 of the Revised Code. The chief, with the consent and approval of the director may appoint two inspectors. The director, with the advice of the bedding advisory board, shall determine the qualifications of inspectors. The director, with the advice and consent of the board, may appoint such additional inspectors, as the work requires.

The inspectors shall inspect periodically every establishment where bedding is manufactured, made, remade, renovated, repaired, sterilized, sold, or offered for sale, or where previously used material is processed for use in the manufacture of bedding.

Such inspector shall have the authority to place "off sale" any article of bedding which is offered for sale, or found in the possession of any person with intent to sell, in violation of sections 3713.01 to 3713.11, inclusive, of the Revised Code. When articles are removed from sale, they shall be so tagged, and such tags shall not be removed except by an authorized representative of the division, after satisfactory proof of compliance with all requirements of such sections, and of the rules and regulations of the division.

When an inspector has cause to believe that any bedding is not tagged or labeled as required by sections 3713.01 to 3713.11, inclusive, of the Revised Code, he may open seams of such bedding to examine the material used or contained therein and take a reasonable amount of such materials for testing and analysis and, if necessary, examine any and all purchase records in order to determine the contents thereof or the kind of material used in such bedding. Such inspector may seize and hold for evidence any article of bedding or material manufactured, made, possessed, renovated, remade, or repaired, sold, or offered for sale contrary to such sections, and shall immediately report such fact to the director who shall forthwith conduct a hearing or make a ruling in the matter, and upon finding that such article of bedding or material is not in violation of such sections shall order the same returned to the owner.

Any inspector who, after examination and inspection of any article of bedding, material used in bedding, or of any establishment where bedding is manufactured, made, remade, repaired, renovated, sterilized, sold, or offered for sale, has found that there has been a violation of such sections shall immediately make a complete report to the director of his findings and recommendations. The director, after consideration of such report, may order a further examination and inspection, and in either event when he has cause to believe that such a person has violated any of sections 3713.01 to 3713.11, inclusive, of the Revised Code, shall cause prosecution of such person.

Each inspector shall make a written report to the department of each examination and inspection and of his findings and recommendations. Such inspectors shall perform such other duties relating to the inspection and examination of such establishments as the director prescribes.

Sec. 3713.04. Bedding advisory board. There is hereby created in the department of industrial relations a "bedding advisory board" which shall consist of eight members. The director of industrial relations shall be a member of said board and its chairman. The other seven members shall be appointed by the governor with the advice and consent of the senate. Five of such members so appointed shall be persons who on account of their vocations, employment, or affiliations represent the manufacturing interests of the various products or branches of the bedding industry. The other two members shall be persons qualified to represent the retail business and the public. The term of office of each member shall be seven years. Each member of the board shall serve without salary, but shall receive actual and necessary travel and other expenses while engaged upon the work of the board. Such board shall meet quarterly and at other necessary times at the call of the chairman. The governor may remove any member of the board when such member ceases to represent the interest in whose behalf he was appointed.

The board may:

- (A) Consider all matters submitted to it by the director;
- (B) Propose and promulgate such rules and regulations pertaining to the definition, name, and description of materials necessary to carry out sections 3713.01 to 3713.11, inclusive, of the Revised Code;
- (C) Make recommendations to the state civil service commission relative to the qualifications and duties of the inspectors provided for in such sections;
- (D) Exercise such other powers and duties as are necessary to carry out the purpose and intent of such sections.

If there is practical difficulty or undue hardship in carrying out such sections or any rule or regulation adopted by the board, the director may make a variation of such rule or regulation if the spirit of such rule or regulation is being observed. Whenever the director makes any such variation, he shall forthwith notify the members of the board of such variation and set a date for the board to meet and consider the reasons and causes necessary for making such variation in the rules or regulations.

Such variation shall be effective for a period not to exceed thirty days during which time the board shall meet and approve, amend, modify, or rescind the rule or regulation governing the condition requiring the variation.

Sec. 3713.05. Tag or label to be attached to bedding. Every article of bedding manufactured for sale, delivered, consigned, or possessed for sale, sold or offered for sale, remade, repaired or renovated for return to the owner, in this state, shall have securely attached thereto a cloth tag or label, or a tag or label made of such other material as the director of industrial relations, with the advice of the bedding advisory board, may prescribe, bearing the adhesive stamp provided for in section 3713.02 of the Revised Code, or in lieu

thereof, such information as shall be prescribed by the Advisory Board. Such tag or label shall contain in plain print in the English language such information and data as the director, with the advice and consent of the board prescribes.

Any person selling, offering for sale, or having in his possession for sale any "secondhand article of bedding," shall, immediately upon receiving such secondhand article of bedding, remove the original tag or label and securely attach thereto a red tag or label, not less than four by eight inches in size, on which shall be legibly written or printed in black the words:

"SECONDHAND
PREVIOUSLY USED
CONTENTS UNKNOWN"

Such tag or label shall have affixed thereto the stamp required under section 3713.02 of the Revised Code. This section shall not apply to the sale of antique furniture or to the sale from the home of the owner directly to the purchaser.

Nothing likely to mislead shall be used on any tag or label. Every tag or label shall contain all statements required by sections 3713.01 to 3713.11, inclusive, of the Revised Code, and shall be securely sewed to the outside covering of such bedding before the filling material has been inserted. On pillows, mattress protectors, quilts, bolsters, and comforters such tag or label may be attached thereto after the filling material has been inserted.

When an article of bedding is manufactured or made of "second-hand material," each such article shall have the tag or label required by such sections securely sewed by each of its four edges to each sleeping surface of the bedding article, except that on comforters, mattress protectors, quilts, cushions, and pillows, only one such tag shall be used which shall be sewed by one of its ends to an outside seam thereof.

Material known in the cotton waste trade as "sweeps," "oily sweeps," or "oily card" shall be designated as "mill sweepings" on such tag or label.

The name "felt" shall not be used unless the material has been carded in layers by a garnett or card machine.

Any person who receives an article of bedding for remaking, repairing, or renovation shall, while such article is in his possession for remaking, repairing, or renovation, keep attached thereto a tag or label showing the date of receipt and the name and address of the owner.

No person, other than a purchaser for his own use, shall remove from any article of bedding or alter or deface the tag, label, or stamp.

Sec. 3713.06. Registration number required. No person, except for his own use, shall manufacture, make, remake, renovate, repair, or deliver for sale any article of bedding until he has applied for and received from the director of industrial relations a registration num-

ber as provided for in section 3713.02 of the Revised Code. Such registration number shall be valid until revoked or voided by the director for violation of sections 3713.01 to 3713.11, inclusive, of the Revised Code.

The director may suspend, revoke, and void the registration number of any person convicted of violating such sections. Any person, a resident or non-resident of this state, who has been issued a certificate of registration, and who fails or refuses to enter an appearance in any court of record in this state to answer a charge of violation of section 3713.09 of the Revised Code within twenty-five days after service upon such person of a notice by registered mail to enter such appearance, shall have his certificate of registration forthwith revoked by the director. Such person shall not thereafter engage in the manufacture, making, remaking, renovating, repairing, or delivering for sale in this state of articles of bedding until he has paid a special investigation fee of five hundred dollars and the director has determined that such person is complying with sections 3713.01 to 3713.11, inclusive, of the Revised Code; whereupon he shall reinstate or reissue the registration number to such person.

Sec. 3713.07. Designation of laboratories for tests and analyses; fees to be charged. The director of industrial relations, with the advice of the bedding advisory board, shall designate established laboratories in various sections of the state that are qualified to make tests and analyses of articles of material used in the manufacture of bedding. When any inspector finds it necessary to have a test or analysis of material used in the manufacture of bedding, he shall have such test or analysis made at the most conveniently located approved laboratory. The director, with the advice of the board, shall determine the fees and charges to be paid for making any such test or analysis.

If the director determines that it is advisable to establish and maintain facilities within the department of industrial relations to make such tests and analyses of materials used in the manufacture of bedding, he may establish such facilities.

Sec. 3713.08. Prohibited material. No person shall use, in the manufacture, making, remaking, renovating, or repairing of any article of bedding for sale or offered for sale in this state, any material that has been used by a person having an infectious or contagious disease or any material which has been a part of a bedding article so used.

No person shall sell or offer for sale any article of bedding that has been used by a person having an infectious or contagious disease.

Sec. 3713.09. Prohibitions. No person shall manufacture, offer for sale, sell, deliver, or have in his possession, for such purpose, an article of bedding which is not tagged or labeled as provided for in section 3713.05 of the Revised Code, or which does not have the stamp, provided for in section 3713.02 of the Revised Code, affixed

to said tag or label, if the registrant is not licensed, or which is falsely tagged or labeled. No person shall use, in the making, manufacture, remaking, repairing, or renovating of any article of bedding material which has been used or formed a part of any article of bedding, that has been used by or about any person having an infectious or contagious disease. No person shall deal in bedding articles or have such an article in his possession for the purpose of sale or offer it for sale without the tag or label required by section 3713.05 of the Revised Code. No person shall remove, conceal, alter, or deface the tag, label, or other device thereon or cause such tag, label, or other device to be removed, concealed, altered, or defaced. No person shall counterfeit the stamps provided for in section 3713.02 of the Revised Code. Each stamp counterfeited and each article of bedding manufactured, made, remade, repaired, renovated, delivered for sale, offered for sale, or sold in violation of sections 3713.01 to 3713.11, inclusive, of the Revised Code, constitutes a separate offense.

Sec. 3713.10. Applicability of sections. Sections 3713.01 to 3713.11, inclusive, of the Revised Code shall be governed by and be in accordance with sections 119.01 to 119.13, inclusive, of the Revised Code.

Sec. 3713.11. Prosecution of violations. Any city prosecutor, city attorney, or the prosecuting attorney, in the city or county where the alleged violation occurred, upon affidavit filed by the department of industrial relations, or upon affidavit and complaint of any person submitting reasonable proof of a violation of sections 3713.01 to 3713.11, inclusive, of the Revised Code, shall prosecute the person against whom such affidavit or complaint has been filed.

Sec. 3713.99. Penalty. (A) Whoever violates section 3713.09 of the Revised Code shall be fined not less than twenty-five nor more than five hundred dollars or imprisoned not more than six months, or both.

RULES AND REGULATIONS

FOREWORD

Chapter 3713 of the Ohio Revised Code, Inspection of Bedding and Upholstered Furniture Materials, provides for the inspection and regulation of the manufacture and sale of articles of bedding and upholstered furniture in the state. Chapter 3713, as amended by the 101st session of the Ohio General Assembly, became effective on October 6, 1955.

Ohio's first bedding law was signed by Governor Harmon on June 6, 1911, "An act to provide for the branding and labeling of mattresses, and to provide against the use of insanitary and unhealthy materials in the manufacture of mattresses, and to provide against the sale of mattresses containing such insanitary or unhealthy materials." The purposes and principles for the protection of the public have been continued undiminished since that date. Subsequent legislation was required to expand the protection of the law to users of other types of bedding and to protect the reputable manufacturers against unfair competition.

In May, 1943, our modern bedding law was signed into law. The methods of safety inspection and the administrative organization under that law are substantially the same today. Administration and enforcement was placed within the Department of Industrial Relations, and all manufacturers of bedding to be sold in the state were required to register with the Department. This law was amended in 1955 to include upholstered furniture.

A Bedding Advisory Board of eight members was given power to:

Consider all matters submitted to it by the Director;

Propose and promulgate such rules and regulations pertaining to the definition, name, and description of materials necessary to carry out the provisions of the act;

Make recommendations to the civil service commission relative to the qualifications and duties of the inspectors provided for in the act;

Exercise such other powers and duties as are necessary to carry out the purposes and intent of the act.

The members of the Board represent the manufacturing, renovating, retailing, and public interests, and both the Board and the Director were given broad powers to amend the rules and regulations if there is any practical difficulty or undue hardship in carrying out the provisions of the law.

The law authorizes an inspector to seize and hold for evidence any article of bedding or upholstered furniture which he has cause to believe is in violation of any provision of this act. Violations are punishable by a fine of not less than \$25.00 nor more than \$500.00, or by imprisonment for not more than six (6) months, or both such fine and imprisonment. Each stamp counterfeited and each article made, remade, renovated, repaired, delivered for sale, offered for sale, or sold in violation of the provisions of the act constitutes a separate offense so punishable.

It is provided further that the registration number of any person convicted of violating this act may be voided by the Director. Only after the payment of a special investigation fee of \$500.00 and the determination by the Director that such person is complying with the provisions of this act, may it be reissued.

DIVISION A

STAMP AND LICENSE REQUIREMENTS

Every article of bedding or upholstered furniture manufactured for sale, offered for sale, or sold, remade, repaired, or renovated for return to the owner, in this state, shall have securely affixed to one of the required tags or labels an Ohio bedding and upholstered furniture stamp, if the registrant is not licensed. These special adhesive stamps for bedding and upholstered furniture are sold by the Department in amounts of not less than one thousand, or multiples thereof, at the rate of ten dollars per thousand for all stamps required on pillows, comforters, cushions, headboards, mattress pads, and infant accessories; all other articles of bedding and upholstered furniture require stamps costing twenty dollars per thousand stamps. A registrant is a person either manufacturing bedding or upholstered furniture to be sold or offered for sale in this state, or renovating, repairing or remaking bedding or upholstered furniture for return to the owner in this state. Any registrant desiring to do so may make application to the Director for a license, and the Director may issue said license, which will relieve the holder of the requirement that a bedding and upholstered furniture stamp be attached to every tag or label. Every such application for a license shall be accompanied by an annual license privilege fee of twenty-five dollars, payable in one amount prior to annual issuance. A license will not be issued for a period of less than one year and no refunds will be made for unused portions thereof. Licenses are not transferable. Each license shall expire one year from the date of issuance, renewable annually, unless sooner revoked.

Every holder of a license shall make a report to the Director every three months. Such reports shall show the exact number of articles manufactured for sale, consigned or delivered for sale, offered for sale, or renovated for return to the owner in the State of Ohio by such licensee, which are included within the provisions of sections 3713.01 to 3713.11, inclusive, and section 3713.99 of the Revised Code, and within the Rules and Regulations for the Bedding and Upholstered Furniture Industry during the period covered by the report, and such licensee shall at the same time pay to the Director one cent each on pillows, comforters, cushions, headboards, mattress pads, and infant accessories, and two cents on all other articles of bedding and upholstered furniture manufactured for sale, consigned or delivered for sale, offered for sale, or renovated for return to the owner in the State of Ohio. Such reports shall be made under oath that they are true to the best of the knowledge and belief of the person making the affidavit, within thirty days of the expiration of the three month period, unless such time is extended by the Director. Whenever any licensee fails to make such report and payment or whenever it is advisable at the discretion of the Director, the Director or his agents shall examine the books and records of such licensee for the purpose of determining the correct amount due from such licensee. In case of default in the payment of the amount so found to be due or in default of the payment of the reasonable expenses incurred in making such examination, the license shall be forfeited.

DIVISION B

DEFINITIONS

As used in the regulations of the Division of Bedding and Upholstered Furniture Inspection: The words, terms, and phrases as used in these regulations have the following meaning and include the singular and plural, masculine and feminine as the case demands.

1. "DEPARTMENT" means the Department of Industrial Relations.
2. "DIRECTOR" means the Director of the Department of Industrial Relations.
3. "DIVISION" mean the Division of Bedding and Upholstered Furniture Inspection.
4. "PERSON" means an individual, group of individuals, partnership, corporation, or association.
5. "BEDDING" means any upholstered furniture filled with material, any mattress, upholstered spring, comforter, bolster, pad, cushion, pillow, mattress protector, quilt, and any other upholstered article to be used for sleeping, sitting, resting, or reclining purposes, and any glider, hammock, or other substantially similar article which is wholly or partly upholstered.
6. "COMFORTER" or "QUILT" means any covering, stuffed or filled, to be used for sleeping, sitting, resting, or reclining purposes.
7. "MATTRESS", "MATTRESS PAD", "MATTRESS PROTECTOR", or "PAD" means any mattress, mattress pad, mattress protector, chair pad, pad, or quilted pad to be used for sleeping, sitting, resting, or reclining purposes.
8. "PILLOW", "BOLSTER", "FEATHER BED", "CUSHION", "SLEEPING BAG", or "UPHOLSTERED HEADBOARD" means any bag, case, or covering that has been stuffed or filled, to be used for sleeping, sitting, resting, or reclining purposes.
9. "UPHOLSTERED SPRING" means any box spring, hollywood bed, studio couch, sofa bed, or bed davenport, to be used for sleeping, sitting, resting, or reclining purposes.
10. "UPHOLSTERED FURNITURE" means any furniture, including children's furniture, movable or stationary, which is made or sold with cushions or pillows, loose or attached, or is itself stuffed or filled in whole or in part with any material, hidden or concealed by fabric or any other covering, including cushions or pillows belonging to or forming a part thereof, together with the structural units, the filling material and its container and its covering which can be used as a support for the body of a human being, or his limbs and feet when sitting or resting in an upright or reclining position.

11. "MATERIAL" means any article, substance, or portions thereof used in the manufacture, repair, remaking, or renovation of bedding and upholstered furniture.
12. "NEW MATERIAL" means any material which has not been used in the manufacture of another article, or used for any other purpose, and includes by-products of machines at mills using only new raw material.
13. "SECONDHAND MATERIAL" means any material which is not new.
14. "SHODDY MATERIAL" means any material which has been spun into yarn, knit or woven into fabric, and subsequently cut up, torn up, broken up, ground up, or otherwise defabricated and shall be so designated on the label as "Shoddy".
15. "SECONDHAND ARTICLE OF BEDDING AND UPHOLSTERED FURNITURE" means any article put to bodily use by, on, or about any person or animal and then sold or offered for sale.
16. "REMADE, REPAIRED, OR RENOVATED ARTICLES OF BEDDING AND UPHOLSTERED FURNITURE NOT FOR SALE" means any article that is remade, repaired, or renovated for, and is returned to the owner for his own use.
17. "SALE", "SELL", or "SOLD" shall, in the corresponding tense, mean sell, offer to sell, or deliver or consign in sale, or possess with intent to sell, or deliver in sale.
18. "LABEL" means any tag or label used for identification of an article of bedding or upholstered furniture.

DIVISION C

GENERAL REQUIREMENTS

1. Every article of bedding or upholstered furniture manufactured for sale, delivered, consigned, or possessed for sale, sold or offered for sale, remade, repaired, or renovated for return to the owner, in this state, shall have sewed or otherwise securely attached thereto a tag or label. Said label shall be of the material, size, and color, and shall contain such information and data as prescribed in these requirements.
2. All persons manufacturing, making, remaking, renovating, or repairing except for their own use, or delivering for sale any article of bedding or upholstered furniture shall apply for a registration number. Application shall be made to the Director of the Department of Industrial Relations, Ohio Departments of State Building, Columbus, Ohio.
3. No person shall make any false, untrue, or misleading statement, term, or designation on any tag or label.
4. Each tag or label attached to an article of bedding or upholstered furniture shall state the kind of materials used in filling said article, using terms defined by these regulations.
5. Every tag or label shall contain all information required by Chapter 3713 of the Revised Code and by these regulations.
6. No person, other than a purchaser for his own use and except as herein otherwise provided, shall remove, alter, or deface the tag or label, or the stamp required by these regulations, nor shall he alter any statement on such tag or label.
7. Responsibility for properly designating the filling material used in a finished article is upon the manufacturer of the finished article.
8. "ALL", "PURE", "100%", and "VIRGIN" are definitive and the slightest departure from the indicated quality makes the tag or label misleading and unlawful. No tolerance is allowed where such terms are used.
9. When more than one type of filler is used in an article of bedding or upholstered furniture, such fillers must be shown on the label in the order of their predominance. Where down, silk, latex products, or synthetic materials such as nylon are used in conjunction with other materials, the percentages by weight shall be shown on the label. A maximum tolerance of ten percent (10%) of the stated percentages may be allowed.

DIVISION D

LABEL REQUIREMENTS FOR ARTICLES OF BEDDING AND UPHOLSTERED FURNITURE MANUFACTURED OF ALL NEW MATERIAL

1. MATERIAL: Shall be of white vellum cloth or a cloth of comparable quality which will not flake out when abraded, or such other material as prescribed or authorized by the Director.
2. SIZE. Not less than two by three inches, exclusive of the portion required to affix the label to the article.
3. COLOR OF MATERIAL: White is required.
4. COLOR OF PRINTING: Black is required.
5. Each article shall have one label.
6. Each label shall state in the English language in black type not less than $\frac{1}{8}$ inch high:
 - a. The words

ALL NEW MATERIAL

- b. The filling contents used in the article, employing the terms and provisions set forth in these regulations. When fillings other than those defined are used, a true description of such fillings shall be stated.
 - 1) An article consisting of a main body and one or more accompanying cushions requires the filling contained in the the body and in the cushions be separately stated and identified on one or more attached labels. The number of cushions must also be stated.
 - 2) An upholstered article made with the back separate from the seat requires that the fillings of each be separately stated and identified on the label.
 - c. The manufacturer's registration number, preceded by the name of the state issuing the registration number and followed by the abbreviated name of the state in which the plant is located.
 - d. The name and address of the manufacturer, maker, distributor, or vendor of the article.
7. An Ohio bedding and upholstered furniture stamp shall be affixed to each label if the registrant is not licensed.
8. The label shall be securely fastened and clearly visible. Mattresses, boxsprings, pillows, pads, comforters, bolsters, quilts, mattress protectors, and other such articles shall have the tag sewed into one of the outside seams thereof. Upholstered furniture with detachable cushions should have the tag attached to the front of the platform supporting the cushions where it may be seen when the cushions are raised. Upholstered furniture that does not have detachable cushions should have the tag attached to the front of

the bottom in such a manner that it is in plain view and may be seen when the article is in normal position, except that on such items where this would place the label next to the floor, it may be attached to the outside back at the top of the item. Chairs, benches, and other articles that may be readily lifted for inspection may have the tag attached to the bottom of the seat.

9. Illustration I shows the arrangement and form of the label suggested for use on articles containing ALL NEW MATERIALS, as defined in these regulations.

DIVISION E**LABEL REQUIREMENTS FOR ARTICLES OF BEDDING AND UPHOLSTERED FURNITURE MANUFACTURED OF SECONDHAND MATERIAL**

1. **MATERIAL:** Shall be of white vellum cloth or a cloth of comparable quality which will not flake out when abraded, or such other material as prescribed or authorized by the Director.
2. **SIZE:** Not less than four by eight inches, except on pillows, where size shall be not less than three by four inches.
3. **COLOR OF MATERIAL:** White is required.
4. **COLOR OF PRINTING:** Red is required. Each label shall have a red colored border at least $\frac{3}{8}$ inches wide.
5. Each article shall have two labels, except on comforters, mattress protectors, quilts, cushions, and pillows only one label is required.
6. Each label shall state in the English language:
 - a. In bold red type of not less than $\frac{1}{4}$ inch high the words

MADE OF SECONDHAND MATERIAL

- b. The filling contents used in the article employing the terms and provisions set forth in these regulations. When fillings other than those defined are used, a true description of such fillings shall be stated.
 - 1) An article consisting of a main body and one or more accompanying cushions requires the filling contained in the body and in the cushions be separately stated and identified on one or more attached labels. The number of cushions must also be stated.
 - 2) An upholstered article made with the back separate from the seat requires that the fillings of each be separately stated and identified on the label.
 - c. The manufacturer's registration number, preceded by the name of the state issuing the registration number and followed by the abbreviated name of the state in which the plant is located.
 - d. The name and address of the manufacturer, maker, distributor, or vendor of the article.
7. An Ohio bedding and upholstered furniture stamp shall be affixed to one of the required labels if the registrant is not licensed.
 8. The label shall be securely fastened by each of its four edges to each sleeping, sitting, resting, or reclining surface, except as otherwise herein provided. Pillows, comforters, bolsters, quilts, mattress protectors, and other such articles shall have the tag sewed into one of the outside seams thereof. Upholstered furniture with detachable cushions should have the tag attached to the

front of the platform supporting the cushions where it may be seen when the cushions are raised. Upholstered furniture that does not have detachable cushions should have the tag attached to the front of the bottom in such a manner that it is in plain view and may be seen when the article is in normal position, except that on such items where this would place the label next to the floor, it may be attached to the outside back at the top of the item. Chairs, benches, and other articles that may be readily lifted for inspection may have the tag attached to the bottom of the seat.

9. The required secondhand label shall be attached when the article contains secondhand material in whole or in part, including the innerspring unit.
10. Illustration II shows the arrangement and form of the label suggested for use on articles containing SECONDHAND MATERIAL, as defined in these regulations.
11. No person shall use, in the manufacturing, making, remaking, repairing or renovating of any article of bedding or upholstered furniture for sale, being offered for sale, or renovated, repaired or remade for return to the owner in this state, any material that has been used by a person having an infectious or contagious disease or any material which has been a part of an article so used.

DIVISION F**LABEL REQUIREMENTS FOR RENOVATORS**

1. All renovators are governed by the requirements of Divisions A, B, C, D, and E of these regulations, except that those parts relating to the type and description of filling materials shall apply only when materials are added in remaking, repairing, or renovating.
2. Any person receiving an article of bedding or upholstered furniture for remaking, repairing, or renovating shall, while such article is in his possession, keep securely attached thereto a tag or label (Illustration III, next page) showing:
 - a. Name and address of the owner.
 - b. Date of receipt.
3. When only new material is added in remaking, repairing or renovating, the requirements of Divisions A, B, C, and D apply, except that the label (Illustration IV) shall read "Renovated by Adding New Material" instead of "All New Material."
4. When remaking, repairing, or renovating is done without adding any material the requirements of Divisions A, B, C, and D apply, except that the label (Illustration V) shall read "Renovated Without adding Any Material" instead of "All New Material."
5. When secondhand material is added in remaking, repairing, or renovating, the requirements of Divisions A, B, C, and E apply, except that the label (Illustration VI) shall read "Renovated by Adding Secondhand Material" instead of "Made of Secondhand Material."
6. On all labels the two words immediately preceding the name and address of the renovator shall read "Renovated by" instead of "Manufactured by."
7. An Ohio bedding and upholstered furniture stamp shall be affixed to each label if the registrant is not licensed.
8. Any article of bedding or upholstered furniture that is renovated for sale is a secondhand article and as such is governed by Division G of these regulations.

DIVISION G**LABEL REQUIREMENTS FOR THE SALE OF SECONDHAND
ARTICLES OF BEDDING AND UPHOLSTERED
FURNITURE**

1. MATERIAL: Suitable cloth or heavy paper as is generally used for tags.
2. SIZE: Not less than four by eight inches.
3. COLOR OF MATERIAL: Red is required.
4. COLOR OF PRINTING OR WRITING: Black is required.
5. Each label shall state in type or legible writing of not less than $\frac{1}{4}$ inch high the words

**SECONDHAND
PREVIOUSLY USED
CONTENTS UNKNOWN**

6. STAMPS: An Ohio bedding and upholstered furniture stamp shall be affixed to each tag or label. These stamps are sold by the Department of Industrial Relations, Division of Bedding and Upholstered Furniture Inspection, Columbus, Ohio, in amounts of not less than one thousand or multiples thereof, at the rate of ten dollars per thousand for all stamps required on pillows, comforters, cushions, headboards, mattress pads, and infant accessories; all other articles of bedding and upholstered furniture require stamps costing twenty dollars per thousand stamps.
7. No person shall sell, offer for sale, or have in his possession for sale any secondhand article of bedding or upholstered furniture, unless he first removes the original tag or label and securely attaches a tag or label where clearly visible, meeting the requirements of this Division.
8. The requirements of this Division do not apply to the sale of antique furniture or to the sale from the home of the owner directly to the purchaser, except that no person shall sell or offer for sale any article of bedding or upholstered furniture that has been used by a person having an infectious or contagious disease.

DIVISION H

FILLING DEFINITIONS

Scope

The purpose of these regulations is to designate the terms, definitions and nomenclature as commonly used and recognized in the manufacture, sale, and distribution of furniture and bedding products. Classifications of materials in these regulations are intended to have understandable meaning to the ultimate consumer. The definitions are in conformity with those adopted by the majority of the states in the Union. It is hereby declared to be the direction, policy, and intent of the Department of Industrial Relations of Ohio to adopt and promote these terms, definitions and nomenclature.

I

GENERAL PROVISIONS AND DEFINITIONS

A. DEFINITIONS:

Each of the following terms shall be used where appropriate, and shall be preceded by the plant, animal, or other origin of the material.

1. FELT means fibers that have been garnetted or carded in layer form. This term cannot be used when batting, or felt scraps, or clippings are stuffed or blown in the same manner as unfelted materials. Nor may this term be used for material which has been felted, but is not readily distinguishable from unfelted materials. The use of the term "Batting" instead of "Felt" is permissible.
2. FIBER means any natural or synthetic substance composed of thread-like tissue.
3. PAD means any material interwoven, punched, pressed, or molded into a flexible padded form.
4. NAPPER means the lint removed during the process of raising the face of a cloth.
5. CARD, STRIPS, OR STRIPPING means the fibrous by-product produced by or removed from the carding cloth following the carding process.
6. COMBER means the fibrous by-product removed during the combing process.
7. FLY means the fibrous by-product removed from the machines during carding, drawing, or other textile operations.
8. NOILS means the short fibers removed during the combing process.

9. PICKER, PICKER MOTES, or MOTES means the fibrous by-product resulting from the opening and cleaning of fibers in the opener room of the textile mill.
10. SWEEPINGS means the fibrous sweepings from textile mills.
11. SHODDY means material reclaimed from any yarn, fabric, or product by shredding, cutting, tearing, grinding, or breaking. The white ALL NEW MATERIAL label shall be used for new shoddy; the red-bordered SECONDHAND MATERIAL label shall be used for secondhand shoddy. In Ohio, this type material may not be described as either "Garnetted Clippings" or "Shredded Clippings", but must be described as "Shoddy".

B. PROVISIONS FOR PROPER LABELING OF HIDDEN FIL-
LERS:

1. Percentages: Percentages, as herein specified, are based on the percent by weight of the filling materials required to be shown on the label.
2. Mixtures: The names and percentages of the component materials in a mixture must be shown on the law label, and listed thereon in the order of predominance. Percentages need not be stated for shoddies.
3. Articles containing more than one type filler: When more than one type material is used in the construction of an article of bedding or upholstered furniture, each type material used must be shown on the law label, together with its percent by weight, and listed thereon in the order of predominance, except as otherwise provided for in Division C, 9.
4. Tolerance: A tolerance of 10% by weight of the materials listed on the label shall be allowed. The 10% tolerance is allowed for the purpose of adjusting unintentional errors due to processing difficulties in arriving at exact percentages. Tolerance is not intended to permit deliberate admixture of inferior materials.
5. "All", "Pure", "100%": "All", "Pure", "100%" or terms of similar import are permitted only if the material is as stated. No tolerance is allowed where such terms are used.
6. Color of material: The natural color of any material used as a filler need not be stated on the label. When this is stated, it must be a true statement. The term "Colored" shall be used when the material has been dyed or otherwise artificially colored.
7. Cleanliness: All fillings shall be clean, free from trash, excreta or foreign or objectionable substances or odors.
8. Bleached: When any filling material has been bleached, it shall be so stated on the label.

9. Resin treated or rubberized filler: When any filling material has been resin treated or rubberized, it shall be so stated on the label. The percent of rubber or resin used as a binder on a filler need not be shown.
10. Use of secondhand material: Secondhand filling, when used in whole or in part in the manufacture or renovation of bedding and upholstered furniture products, requires the use of the appropriate secondhand label as specified in Division E and Illustration II of these regulations. Secondhand material which has been used, or formed a part of any article which has been used by, on, or about any person having an infectious or contagious disease shall not be used again in any manner whatsoever.
11. Exclusions from labeling: The presence of any of the following need not be shown on the tag, provided such materials are new: burlap, muslin, tape, webbing, metal insulators; and if under 10% of the filling, the following are excluded: paper sheets used for separating or covering felts, the filling contained in a quilted ticking, glazed wadding, or trapunto embroidery when affixed to an article of bedding containing hidden filling, and the filling used in pre-built border constructions.
12. Stiffening material: The presence of any stiffening material, such as fiberboard, wood, or paper shall be shown on the label, and its percentage given.
13. Innerspring unit: The presence of an innerspring unit shall be shown on the label.
14. Name of fiber: The terms defined in these regulations shall be the proper terms to use in the labeling of bedding and upholstered furniture products. When it is desired to list the trade name in addition, this may be done at the bottom of the label, in the space for additional information.
15. Presence of oil: Any material containing in excess of 5% oil must be described as "oily".
16. Dirt or foreign material: The presence of non-fibrous mineral matter in excess of 5% in any filling material shall be described as "Dirt" and its percentage stated.

II

COTTON FILLERS

DEFINITIONS:

1. COTTON FELT means the product obtained when one or more of the cotton products defined under 2, 3, and 4, herein, has been carded in layers or sheets by a garnett or felting machine. The term "Blended Cotton Felt" may be used when more than one type material, as specified above, is used.

2. STAPLE COTTON means the staple fibrous growth as removed from the cotton seed in the usual process of ginning (first cut) containing no foreign material. The presence of the usual amount of leaves, hull, etc., shall not be considered foreign material. The term "Cotton" by itself shall not be used.
3. COTTON LINTERS means the fibrous growth removed from cottonseed subsequent to the usual process of ginning.
4. COTTON BY-PRODUCTS means the by-products removed from the various machine operations necessary in the manufacture of cotton yarn up to but not including the process of spinning, and shall include only the following materials commonly known in cotton mill terms as (1) cotton comber, (2) cotton card strips or cotton vacuum strips, (3) cotton fly, and (4) cotton picker. Either the blanket term "Cotton By-Products" or the individual terms: "Cotton Fly", etc., may be used on the law label.
5. COTTON WASTE means any material defined under cotton by-products containing more than 7% of trash, hull, leaf, stem, pulp, etc., and includes cotton motes.
6. COTTON MILL SWEEPINGS means sweeps, oily sweeps, or oily card.
7. TRASH means hull, leaf, stem, pulp, etc.: when present in excess of 10% of the filling, it shall be shown on the label as "Trash".

III

DOWN AND FEATHER FILLERS

A. DEFINITIONS:

Each of the following terms, herein defined, shall be further designated on the label by the name of the fowl—Goose, Duck, Turkey, and Chicken—from whence the material came, except as otherwise noted. The term "Waterfowl" may be used to designate goose, duck, or any mixture of goose and duck stock. A ten percent tolerance will be allowed on the statement of species.

1. DOWN means the soft undercoating of waterfowl consisting of the light, fluffy filaments grown from one quill-point but without any shaft. The term "Down" may be used by itself without denoting the species of fowl from whence it came. A ten percent tolerance of feathers is allowed in down stock.
2. DOWN FIBER means the barbs of down plumes separated from the quill-points of down. The presence of barbs in excess of 10% of the filling shall be shown on the label as "Down Fiber" and the percentage given.
3. FEATHERS means whole feathers which have not been processed in any way except for cleaning and dusting.

4. FEATHER FIBER means the barbs of feathers separated by any process from the quills, but free from quills. The presence of feather barbs in excess of 10% of the filling shall be shown on the label as "Feather Fiber" and the percentage given.
5. QUILL FEATHERS means wing feathers and/or tail feathers.
6. CRUSHED FEATHERS means feathers which have been processed by a curling or crushing machine, thereby changing the original form of the feathers without removing the quills.
7. STRIPPED FEATHERS means the barbs of feathers stripped from the quill shaft but not separated into feather fiber.
8. CHOPPED FEATHERS means feathers which have been chopped or cut into pieces by a chopping machine.
9. BROKEN FEATHERS means feathers which were broken or damaged by insects or in any manner apart from direct processing. The presence of broken feathers in excess of 10% of the filling shall be shown on the label as "Broken Feathers" and the percentage given.

B. LABELING:

1. Feather and down mixtures shall be designated in accordance with the definitions under part A of this section, by the name, character, and percent of each material used, and listed in the order of predominance, or else the entire mixture shall be designated by the name of the lowest grade of material used. The grades of materials in descending order are as follows: Goose down, duck down, goose feathers, duck feathers, turkey feathers, and chicken feathers.
2. The deviations from the statement on the label on species and character of feather and down materials shall not exceed 10% of the stated percentages.
3. Cleanliness: All feather and down stocks shall be thoroughly cleaned prior to use.

IV

HAIR FILLERS

A. Definitions:

Each of the following terms, herein defined, shall be further designated on the label as to origin, according to the following classifications: Horse Tail, Horse Mane, Cattle Tail, Cattle Hide, Hog, and Goat. A ten percent tolerance will be allowed on the statement of origin.

1. HAIR means the coarse, filamentous, epidermal outgrowth of such mammals as horses, cattle, hogs and goats. When used

in the manufacture or renovation of bedding or upholstered furniture, it shall be clean, properly cured, free from epidermis, excreta or foreign or objectionable substances or odors

2. DYED HAIR or BLEACHED HAIR means hair that is dyed or bleached. The appropriate designation shall appear on the label preceded by the word "Dyed" or "Bleached".
3. CURLED HAIR means hair which has been curled. The appropriate designation shall appear on the label preceded by the word "Curled".
4. UNCURLED HAIR means hair which has not passed through a curling process. The appropriate designation shall appear on the label preceded by the word "Uncurled".
5. HAIR PAD means hair which is interwoven or punched on any woven material or otherwise fabricated into a pad. The kind, grade, and percentage of each type material in the pad shall be stated on the label. No description of the woven material or any reference to it is required.
6. RUBBERIZED HAIR or RESIN TREATED HAIR means hair which has been rubberized or resin treated. The appropriate designation shall appear on the label preceded by the word "Rubberized" or "Resin Treated".
7. SHREDDED HAIR means hair which has been shredded. The appropriate designation shall appear on the label preceded by the word "shredded". The use of the term "curled" is not permitted in connection with shredded hair.

B. LABELING.

1. Hair mixtures: When hair of different origins is used in a blend, the kind and percent by weight of each shall be shown on the label. A tolerance of ten percent (10%) by weight of the percentages stated on the label shall be permitted.
2. Hair and fiber mixtures: When any material of whatever origin other than hair is used in a mixture or blend with hair, the kind and percent by weight of each such material shall be shown on the label. A tolerance of ten percent (10%) by weight of the percentages stated on the label shall be permitted.

V

WOOL FILLERS

A. DEFINITIONS:

1. WOOL FELT means the product obtained when one or more of the wool products defined under 2, 3 and 4, has been carded in layers or sheets by a garnett or felting machine. The term "blended Wool Felt" may be used when more than one type material, as specified above, is used.

2. WOOL and/or VIRGIN WOOL means the fleece of the sheep or lamb, which has been scoured, or scoured and carbonized. It shall not be the by-product of any manufacturing process, nor shall it have sustained prior use. It shall be free from kemp and vegetable matter.
3. (Optional for those manufacturers who want to use, and get credit for using a finer quality of wool.)
CHOICE WOOL and/or CHOICE VIRGIN WOOL means wool and/or virgin wool, as defined above, that is "1/4 blood" (48's) or finer in grade, according to the United States Standards for grades of wool, and shall be natural or bleached white in color. The fibers shall be reasonably uniform in length, viz., they shall contain no admixture of short wool fibers. The term "Choice Wool" and/or "Choice Virgin Wool" may not be used in describing the component parts of wool blends or mixtures.
4. WOOL BY-PRODUCTS means the by-products removed from the various machine operations necessary in the manufacture of wool yarn up to but not including the process of spinning, and shall include the following materials commonly known in wool mill terms as (1) noils, and (2) fulling flocks. Either the blanket term "Wool By-Products" or the individual terms: "Wool Noils," etc., may be used on the law label.
5. WOOL WASTE means all other by-products and wastes from any manufacturing process employing only new wool fibers, and includes wool pills and shank and tag wools.
6. TANNERS WOOL means wool reclaimed from tanned sheepskin.

B. LABELING:

1. Wool blends or mixtures: When two or more of the above materials are used in a product, they shall be described on the label as required above in the order of their predominance.
2. Tolerance: Materials which contain not less than 95% wool shall be considered wool.

VI

FOAM AND RUBBER FILLERS

DEFINITIONS:

1. The following terms shall be used with the appropriate foam or sponge product when applicable:
 - a. SHREDDED: This term shall be used when any foam product has been shredded.
 - b. CEMENTED: This term shall be used when any foam product has been cemented together.

- c. **MOLDED**: This term may be used when a foam product has been molded in the form intended for use.
 - d. **PIECES**: This term shall be used to describe pieces of unshredded foam waste from production, or trimmings from cutting sheets or shapes.
 - e. **IMPERFECT**: This term shall be used when any foam product shows major manufacturing imperfections and is sold as other than first quality material.
- 2. **RUBBER** means natural rubber as well as any of the following synthetic rubber-like materials: chloroprene, styrene-butadiene copolymers, butadiene-acrylonitrile copolymers, polymerized isobutylene, with or without comonomers present, and thioplasts (any of the polysulfide rubbers consisting of organic radicals linked through sulfur).
 - 3. **RUBBER FIBER** means a fiber composed of natural or synthetic rubber.
 - 4. **FOAM RUBBER** means the foam-like product made from white liquid rubber latex, either natural or synthetic, as defined above, which has not undergone previous use or processing.
 - 5. **SPONGE RUBBER** means crude rubber expanded into a cellular state.
 - 6. **SYNTHETIC FOAM** means the foam made from the polymerization product of certain organic chemicals. It includes the following chemical types:
 - URETHANE FOAM** means a foam made from a polymerized reaction product whose basic ingredient is a diisocyanate, and whose molecular structure contains, as a predominating structural unit, the urethane linkage. It shall include both polyether and polyester type foams.
 - POLYSTYRENE FOAM** means a foam made from a polymerization product of styrene monomers.
 - VINYL FOAM** means a foam made from homopolymers or copolymers of vinyl chloride.

Either the blanket term "Synthetic Foam", or the individual terms: "Urethane Foam", etc., may be used for these materials. The term "Rubber" may not be used in conjunction with these materials.

VII

SYNTHETIC FIBER FILLERS

DEFINITIONS:

- 1. **SYNTHETIC FIBERS** means long-chain synthetic polymers and/or copolymers joined either chemically or physically to form a filament or fiber. A disclosure of the polymers and/or copolymers contained therein shall be made in the descending order of their percentage by weight in the fiber, e. g., 'Polystyrene

Fibers", "Vinyl-Acrylic Fibers", etc., or the fibers may be designated as "Synthetic Fibers". This applies to all synthetic fibers defined in this section. The trade name of these fibers may be shown at the bottom of the label in the space for additional information.

2. ACRYLIC FIBER means the fiber formed from any long-chain synthetic polymer containing not less than 85% acrylonitrile.
3. AZLON FIBER means fiber formed from regenerated naturally occurring proteins.
4. MODACRYLIC FIBER means the fiber formed from any long-chain synthetic polymer containing less than 85% acrylonitrile units.
5. NYLON FIBER means the fiber formed from any long-chain synthetic polymeric amide which has recurring amide groups as an integral part of the main polymer chain.
6. NYTRIL FIBER means the fiber formed from a synthetic polymer of at least 85% vinylidene dinitrile, where the vinylidene dinitrile content is no less than every other unit in the polymer chain.
7. OLEFIN FIBER means the fiber formed from any synthetic polymer composed of at least 85% ethylene, propylene, or other olefin units.
8. POLYETHYLENE FIBER means the fiber formed from polymers and/or copolymers of ethylene.
9. POLYESTER FIBER means the fiber formed from a polymerized reaction product of esters and containing not less than 85% of a dihydric alcohol and terephthalic acid.
10. POLYETHER FIBER means the fiber formed from a polymerized reaction product of ethers.
11. POLYSTYRENE FIBER means the fiber formed from the polymerization product of styrene monomers.
12. POLYVINYLIDENE FIBER means the fiber formed from copolymers of vinylidene chloride and other monomers.
13. SARAN FIBER means the fiber formed from any long chain synthetic polymer containing not less than 80% vinylidene chloride units.
14. SPANDEX FIBER means the fiber formed from any long chain synthetic polymer containing at least 85% of a segmented polyurethane.
15. VINAL FIBER means the fiber formed from any long-chain synthetic polymer composed of at least 50% vinyl alcohol units and in which the total of the vinyl alcohol units and any one or more of the various acetal units is at least 85% of the fiber.
16. VINYON FIBER means the fiber formed from any synthetic polymer containing at least 85% vinyl chloride units.

VIII

MISCELLANEOUS FILLERS

DEFINITIONS:

1. ACETATE FIBER means the fiber formed from cellulose acetate.
2. CAT-TAIL PLANT FIBERS means fibers from the cat-tail plant.
3. CELLULOSE FIBER means fibers from wood or other vegetable growth to a cellulose state and containing not more than 4% lignin and 12% pentosans.
4. COCONUT HUSK FIBER or COIR means the fibrous material obtained from the husk or the outer shell of the coconut.
5. CORN HUSK means the leafy covering obtained from ears of corn.
6. CORRUGATED FIBER BOARD means the combination of three sections of stiff compact pasteboard whereby one section has been formed into folds and is enclosed between the other two sections.
7. EXCELSIOR means shredded threadlike wood fibers. It shall not include waste products such as shavings, sawdust or similar waste.
8. FLAX TOW means the coarse, broken and refuse parts of flax separated from the fine, fibrous parts in preparing the fibers for spinning.
9. FUR means the fine soft under fur removed from the tanned or untanned pelt of mammals of the class of furbearers. The name of the animal may be stated, and when so indicated on the label, it must be a true statement.
10. GLASS FIBER means the fiber obtained when glass is spun into thin filaments from a liquid state.
11. HAY means any grass, properly dried or cured, free from dust, burrs, sticks, or other foreign material.
12. JUTE FIBER means the bast fiber derived from any species of the corchorus plant.
13. JUTE TOW means the broken or refuse parts of jute separated from the fine, fibrous parts in preparing the fibers for spinning.
14. JUTE WASTE means the by-product of any machine through which jute fiber passes in spinning into yarn or cordage, but prior to the process of spinning.
15. KAPOK means the mass of fibers investing the seed of the kapok tree (*Ceiba Pentandra*). Any additional term descriptive of the geographical origin or of the quality of such fibers shall be a true statement when set forth on the label.

16. METALLIC FIBER means a fiber composed of metal, plastic-coated metal, metal-coated plastic, or a core completely covered by metal.
17. MILKWEED FIBER means the surface fiber from the inside of the seed pods of milkweed plants. (*Asclepias*).
18. MOSS means the vegetable fiber hair growth found in swamps and on trees.
19. PALM FIBER means the fibrous material obtained from the leaf of the palm, palmetto, or palmyra tree.
20. PAPER BY-PRODUCTS means paper which has been used in the manufacture or processing of other products and subsequently used in bedding and upholstered furniture products.
21. PAPER SHEETS means the sheets of paper used for separating or covering felts or batting. If this material does not exceed 10% of the filling, it need not be shown on the label.
22. RAYON means the fiber formed from regenerated cellulose.
23. SEA GRASS means the material obtained from maritime plants or seaweeds.
24. SILK WASTE means the by-products of any preparing or spinning machinery through which the silk filaments or fibers pass.
25. SISAL means the leaf fiber derived from the *Agave Sisalina* and similar species of agaves.
26. STEEL FIBERS means thin steel fibers similar to those found in steel wool pads. The term "STEEL WOOL" is not permitted.
27. STRAW means the stalk or stem of grain, such as wheat, rye, oats, rice and the like, after threshing. The kind of straw may be stated, but when indicated must be a true statement. It shall be free from chaff, beards, bristles, husks, glumes, dirt or other extraneous matter.
28. TAMPICO means the leaf fiber derived from the Tampico Istle (*Ixtle de lechuguilla*).
29. TULA means the leaf fiber derived from the Tula Istle and similar species of agaves.
30. WOOD FIBER means fibers reduced from wood or other vegetable growth to a cellulose state, and containing more than 4% lignin or 12% pentosans.

The division should be consulted for the correct labeling of any materials not defined in these regulations.

DIVISION I

INFORMATION FOR RETAILERS OF BEDDING AND
UPHOLSTERED FURNITURE

It is the responsibility of the retailer to make certain that any article of bedding or upholstered furniture which he offers for sale in the State of Ohio, regardless of where manufactured, is properly labeled, is stamped if the manufacturer is not licensed, and is in compliance with all provisions of the law. Retailers are subject to the penalties, outlined in the foreword of these regulations, when any article of bedding or upholstered furniture in violation of the law is possessed for sale or sold by them.

The requirements for bedding and upholstered furniture manufactured from the various classes of material, are clearly outlined elsewhere as follows:

	Division
General Requirements	C
Articles made of New Material	D
Articles made of Secondhand Material	E
Sale of Secondhand Articles of Bedding and Upholstered Furniture	G

Each manufacturer of bedding or upholstered furniture now has a choice of continuing the practice of affixing Ohio bedding and upholstered furniture stamps on labels or of obtaining a license in lieu of using such stamps (see Division A herein). The names of manufacturers who are licensed may be secured by contacting the Division of Bedding and Upholstered Furniture Inspection.

A study of the rules and regulations with emphasis on those parts indexed above, which apply to the particular class of goods handled, will enable retailers to become familiar with the requirements of their suppliers and themselves.

Inasmuch as the ultimate intent and purpose of this law is to protect the health and promote the general welfare of the citizens of Ohio, the cooperation of retailers will be of immeasurable help in accomplishing this end.

DIVISION J**PROCEDURE FOR NOTICE OF PUBLIC HEARING**

Public Notice of hearings to be conducted by the Ohio Bedding and Upholstered Furniture Advisory Board for the purpose of adopting, amending, or rescinding any of these rules and regulations shall be as follows:

At least thirty days prior to the public hearing required to be held by Section 119.03, Revised Code, a notice shall be advertised once in five newspapers published in different counties and of general circulation in the state. Such notice shall contain: a statement of the Board's intention to consider adopting, amending or rescinding any of these Rules and Regulations; the date and time and place of public hearing on such proposed action; and a general statement of the subject matter to which such proposed rule relates.

OKLAHOMA
STATE BEDDING LAW

WITH

RULES AND REGULATIONS

STATE DEPARTMENT OF HEALTH
ENVIRONMENTAL HEALTH SERVICES
DIVISION OF ENVIRONMENTAL SANITATION
GENERAL SANITATION SECTION
3400 N. EASTERN
OKLAHOMA CITY, OKLAHOMA

OKLAHOMA STATE BEDDING ACT

Title 63, O.S. 1951, Sections 51-62

Amended Title 63, O.S. 1959, Supplement, Sections 56-57

TITLE

An Act defining bedding to include mattresses, pillows, bolsters, feather beds, and other filled bedding of any description; requiring the labeling of bedding as to whether new or second-hand materials are used; prohibiting the use of materials from dump grounds, junk yards, and hospitals; requiring germicidal treatment of second-hand mattresses; placing enforcement of this Act in the State Board of Health; requiring permits for manufacture, repair or renovation, and application of germicidal process, payment of fees for permits; providing for the issuance of adhesive stamps and registration for selling bedding; providing that proceeds be placed in the State Treasury to the credit of the general revenue funds; creating positions of sanitary inspectors and setting salaries; providing penalty for violation; requiring bedding manufacturers or renovators to keep premises sanitary, except all bedding manufactured, repaired, or renovated, or sold prior to effective date of this Act; making provisions of Act severable.

SECTION 51. DEFINITIONS

(a) The term "bedding" as used in this Act shall mean mattresses, pillows, bolsters, feather beds, and other filled bedding of any description.

(b) The term "Department" when used in this Act shall mean the State Board of Health.

(c) The term "person" as used in this Act shall include persons, partnerships, companies, corporations, and associations.

(d) The term "renovate" as used in this Act shall mean to restore to former condition, or to place in a good state of repair.

(e) The term "materials" as used in this Act shall mean all articles or portions thereof, used as filling or covering in the manufacture, repair, or renovation of bedding.

(f) The term "new" as used in this Act shall mean any article or material which has not been previously used for any purpose.

(g) The term "second-hand" as used in this Act shall mean any article or material, or portions thereof, of which former use has been made in any manner whatsoever.

(h) Wherever in this Act the singular is used, the plural shall be included; and where the masculine gender is used, the feminine and neuter shall be included.

SECTION 52. LABELING OF BEDDING REQUIRED

(a) All bedding shall bear securely attached thereto and plainly visible a substantial white cloth tag upon which shall be indelibly stamped or printed with black ink, in the English language, a statement showing whether new materials or second-hand materials have been used in filling such bedding, and type

or grade of cotton and all other materials used in filling mattress to which attached when new materials are used, with approximate percentages when mixed; what germicidal treatment, if any, has been applied to the materials or to the bedding; the date of such germicidal treatment, the number of the permit of the person manufacturing the bedding, and the number of the permit of the person applying such germicidal treatment, if any.

(b) The terms used on the tag to describe materials shall be restricted to those defined in the Regulations of the Department, and no trade or substitute terms shall be used.

(c) It shall be unlawful to make any false or misleading statements on the tag required by this Section. It shall be unlawful for any person to remove, deface, alter, or cause to be removed, defaced, or altered any tag or statement contained thereon for the purpose of defeating any of the provisions of this Act. The placing of registration stamps required in Section 57 of this Act over any lettering on the tag shall be construed to be defacement of the tag.

(d) The size of the tag to be affixed to new bedding required by this Section shall not be less than six (6) square inches, and the lettering thereon covering the statement of filling materials shall be in plain type not less than one-eighth (1/8) inch in height.

(e) Every article of bedding manufactured for resale containing second-hand material shall bear, securely sewn thereto on all four sides of the tag, four (4) by eight (8) inches in size, upon which shall be indelibly stamped or printed in red ink, in the English language, in plain type not less than one-half (1/2) inch in height, stating "second-hand material."

SECTION 53. USED MATERIALS FROM DUMP GROUNDS AND HOSPITALS

No person shall manufacture, repair, or renovate into bedding or batting, using discarded materials obtained from dump grounds, junk yards, or hospitals within or without the State of Oklahoma.

SECTION 54. GERMICIDAL TREATMENT OF MATERIALS

All second-hand materials or portions thereof for resale shall be subjected to a germicidal treatment that will render said second-hand material safe for human use.

SECTION 55. ENFORCEMENT OF ACT

The State Board of Health is hereby charged with the enforcement of this Act for the protection of health and to prevent the spread of disease; to make rules and regulations providing for examination of bedding offered for sale; to embargo bedding suspected of being improperly labeled; to regulate disposal of bedding determined to be unsafe for human use; and to prescribe means, methods, and practices to make effective such provision.

SECTION 56. PERMITS

(a) No person shall engage in the business of manufacturing, repairing or renovating any bedding unless he shall have obtained a permit from the Department.

(b) No person shall be considered to have qualified to apply an acceptable germicidal process until such process has been registered with and approved by the Department, after which a

numbered permit shall then be issued by the Department. Such permit shall expire on June 30th following date of issue and shall thereafter be annually renewed at the option of the permit holder upon submission of proof of continued compliance with the provisions of this Act and the regulations of the Department. Every person to whom a permit has been issued shall keep such permit conspicuously posted on the premises of his place of business near the treatment device. Holder of permits to apply germicidal treatment shall be required to keep an accurate record of all materials which have been subjected to germicidal treatment, including the source of material, date of treatment, and name and address of buyer of each, and such records shall be available for inspection at any time by authorized representatives of the Department.

(c) For all initial permits issued, as required by the preceding paragraph (a) of this Section, there shall, at the time of issuance thereof, be paid by the applicant to the Department an initial fee not to exceed Five Dollars (\$5.00) to be determined by the State Board of Health and an annual renewal charge not to exceed Five Dollars (\$5.00) to be determined by the State Board of Health.

(d) For all initial permits issued, as required by preceding paragraph (b) of this Section, there shall, at the time of issuance, be paid by the applicant, to the Department, a fee not to exceed Twenty-five Dollars (\$25.00) to be determined by the State Board of Health. An annual renewal charge not to exceed Five Dollars (\$5.00) to be determined by the State Board of Health shall be paid to the same Department.

(e) Any permit issued in accordance with the provisions may be revoked by the State Health Office upon proof of violation of any of the provisions of this Act. A reissuance of said permit shall be subject to provisions as set forth for an initial permit. (As amended Session Laws, 1955, p. 351, Sec. 1.)

SECTION 57. REGISTRATION FOR SELLING

(a) No person shall manufacture, renovate, sell or lease, or have in his possession with intent to sell or lease, in the State of Oklahoma any bedding covered by the provisions of this Act, unless there be affixed to the tag required by this Act by the person manufacturing, renovating, selling or leasing the same, an adhesive stamp prepared and issued by this Department; Provided, however, that the provisions of this Section shall not apply to the sale of bedding owned and used by a householder and his family at auction or private sale.

(b) The Department shall register all applicants for stamps and assign to every such person a registration number, which thereafter shall constitute identification record, and said identification shall not be used by any other person.

(c) Adhesive stamps, as provided by this Act, shall be furnished by the Department in quantities of not less than one hundred (100), for which the applicant shall pay at the rate not to exceed Five Dollars (\$5.00) for each one hundred (100) stamps to be determined by the State Board of Health. The State Health Officer is hereby authorized to prepare and cause to be printed adhesive stamps which shall contain a replica of the seal of the State of Oklahoma, and such other matter as the State Health Officer shall direct. (As amended Laws 1955, p. 352, Sec. 2, Laws 1957, p. 469, Sec. 1.)

SECTION 58. PROCEEDS PLACED IN GENERAL FUND

Repealed. Session Laws, 1955, p. 352, Sec. 3. Eff. 90 days after May 27, 1955, date of adjournment of Legislature.

SECTION 59. PENALTIES

(a) Any person who shall be convicted of violation of any of the provisions of this Act, or of the rules and regulations established thereunder, shall be sentenced to pay a fine of not less than Fifty Dollars (\$50.00), nor more than One Hundred Dollars (\$100.00) for each offense.

(b) Each day of violation shall constitute a separate offense.

SECTION 60. SANITARY PREMISES

Every bedding manufacturer or renovator shall keep his place of business in a sanitary condition satisfactory to the Health Department, and failure to do so shall be sufficient cause to revoke his permit.

SECTION 61. EXCEPTION

The provisions of this Act shall apply to all bedding manufactured, repaired, renovated, and/or sold after the effective date hereof; but the same shall not apply to bedding which has been manufactured, repaired, or renovated prior to the effective date hereof.

SECTION 62. UNCONSTITUTIONALITY

If any Section, sub-section, sentence, clause, phrase, or words of this Act is for any reason held to be unconstitutional, such decree shall not affect the validity of any remaining portion of this Act.

RULES AND REGULATIONS

All Regulations promulgated prior to the effective date of these Regulations are hereby repealed.

RULE I - Terms Defined

As used in these rules, unless the context otherwise specifically requires:

A. The term "Act" means Title 63, O.S. 1951, Sections 51-62, and all amendments thereto (Title 63, O.S. 1959, Supplement, Sections 56 and 57.)

B. The terms "rule," "rules," "regulations," and "rules and regulations" mean the Rules and Regulations adopted by the Board of Health pursuant to Section 55 of the Act.

C. The definition of terms contained in Section 51 of the Act shall be applicable also to such terms when used in rules promulgated under the Act.

D. The terms "tag," "tags," "tagged," and "tagging" mean tag or label required to be on or affixed to bedding products by the Act and Regulations and on which the information required is to appear.

E. The term "bedding" means mattresses, box springs,

mattress pads, mattress protectors, quilts, comfortables, pillows, bolsters, feather beds, sofa beds, chair beds, day beds, studio couches, convertible chaise lounges, and any stuffed, filled, or upholstered items made for bedding purposes.

F. The term "second-hand" as defined in the Act does not apply to new materials subjected to manufacturing processes or to new materials which are the by-product of manufacturing processes.

G. The terms "filling," "filling material," and "materials" mean materials used as filling in the manufacture, repair, or renovation of bedding.

RULE II - General Requirements

A. These regulations shall apply to all persons, partnerships, corporations, and associations engaged in the business of manufacturing, repairing, renovating, germicidally treating, and selling items of bedding. These regulations do not apply to persons who make, renovate, and germicidally treat bedding for their own use.

B. Each item of bedding shall be tagged in conformity with the requirements of the Act and Regulations. All tags shall be attached at the factory.

C. It shall be unlawful to make any false or misleading statement on the tag required by the Act and Regulations; it shall be unlawful for any person to remove, deface, or alter any tag or statement thereon, or cause the same to be done, for the purpose of defeating the provisions of the Act and Regulations.

D. The terms used on the tag to describe materials used in filling shall be restricted to those defined in the Regulations under the Act.

E. When percentages are required in these Regulations it shall mean percentage by weight in lieu of percentage by volume. Wood frames, metal springs, and parts shall be excluded when calculating percentages.

F. The presence of an innerspring unit in an article of bedding shall be designated on the law tag. Spring unit may be designated as "spring unit," "coil spring unit," etc. as the case may be. Stating the number of coils in a spring unit is permissible and not mandatory. If the number of coils is stated, the statement must be true and correct.

G. If an article of bedding contains more than one kind of material, the percentage of each material shall be clearly stated on the tag.

H. Filling materials in pre-built border constructions used in the manufacture of mattresses and similar bedding products need not be stated on the tag provided the filling material does not exceed ten per cent (10%) of the material in the article to which the border construction is affixed.

I. When the filling material contained in a quilted ticking affixed to the cover of an article of bedding is in excess of ten per cent (10%) of the weight of the entire filling material of the article of bedding, such material shall be designated on the tag and its percentage given.

J. Burlap, muslin, webbing, and tape, when less than ten per

cent (10%) of the filling material, need not be stated on the law tag.

K. To allow for unintentional variations, a tolerance or variation not in excess of ten per cent (10%) by weight from the amount stated on the tag shall be allowed.

L. The terms "all," "pure," "100%" or terms of similar import are permitted only if the material is as stated. No tolerance is allowed where such terms are used.

M. Any new stiffening material, such as fiberboard, corrugated fiberboard, wood, or paper, when present in an amount exceeding ten per cent (10%) by weight of the entire filling material of an article of bedding shall be designated on the tag and its percentage given.

N. Filling material which has been artificially dyed or colored shall be designated as "colored." The natural color of filling material need not be stated.

O. Any filling material containing more than 5% oil shall be designated on the tag as "oily."

P. The presence of silicates in excess of 5% in any filling material shall be designated on the bedding-law tag as "clay" and the actual percentage thereof contained in the filling material shall be stated on the tag.

RULE III - Definitions and Designations of Filling Materials

A. Cotton

1. "Staple cotton" shall mean the staple fibrous growth as removed from the cottonseed in the usual process of ginning (first-cut from the seed) containing no foreign material. The term "cotton" by itself shall not be used.

2. The term "cotton linters" shall be used to designate the fibrous growth removed from cottonseed subsequent to the usual process of ginning. The term "linters" alone shall not be used.

3. The term "cotton by-products" shall be used to designate by-products removed from the various machine operations necessary in the manufacture of cotton yarn up to but not including the process of spinning, and shall include the following materials commonly known in cotton-mill terms as (a) cotton card strips or cotton vacuum strips, (b) cotton comber, (c) cotton fly, and (d) cotton picker; or the by product may be designated by the particular mill term applicable to it, e.g., "cotton card," "cotton comber," "cotton fly," or "cotton picker."

4. The term "mixed cotton" shall mean a mixture of staple cotton, cotton linters, and cotton by-products in any proportion which has not been garnetted or felted.

5. The term "cotton waste" shall mean any material of cotton origin containing more than ten per cent (10%) of hull, leaf, stem, and pulp.

B. Universal Definitions

1. The terms "cards," "strips," or "stripping," preceded by the name of the textile fiber from which it is produced, may be used to designate a tangled or matted mass of fibers produced by or removed from the carding cloth following the carding process.

2. The term "comber," preceded by the name of the textile fiber or fibers from which it is produced, may be used to designate tangled fibers removed during the combing process of textile fibers.

3. The term "fly," preceded by the textile fiber or fibers from which it is produced, may be used to designate fibers which come off the machines during carding, drawing, or similar textile operations.

4. The term "picker," "picker mote," or "mote," preceded by the textile fiber or fibers from which it is produced may be used to designate matted or tangled masses of fiber resulting from the opening and cleaning of fibers in the opener room of the textile mill.

5. The term "sweepings," preceded by the name of the textile fiber or fibers, shall be used to designate the fibrous sweepings from the floors of the textile mill.

6. The term "noils," preceded by the textile fiber or fibers from which it is produced, may be used to designate the short fibers removed during the combing process.

7. The term "napper," preceded by the textile fiber or fibers from which it is made shall be used to designate the lint removed during the process of raising the face of a cloth.

8. The term "defabricated fibers" means any new material which has previously been made into yarn or fabric and which subsequently has been reduced to a fibrous state. When yarns, threads, and/or fabric shreds are present in excess of five per cent of the entire filling material, the material shall be designated as "shredded clippings."

9. The term "textile by-products" or the name of the specific by-product, unless otherwise provided for in these rules, may be used to designate any of the fibrous by-products produced during the processing of textile fibers up to but not including the spinning of yarns.

C. Wool

1. The term "wool" and/or "virgin wool" shall mean the fleece of the sheep or lamb, which has been scoured or scoured and carbonized. It shall not be the by-product of any process of manufacture nor shall it have sustained prior use. It shall be free from kemp and vegetable matter.

2. The term "wool by-products" shall be used to designate the following by-products: "wool drawing laps," "wool card waste," "wool card strips," "wool doffer waste," removed from the various machine operations necessary in the manufacture of wool yarn up to but not including the process of spinning; or the by-product may be designated by the particular mill term applicable to it, e.g., "wool drawing laps," "wool card waste," "wool card strips," "wool doffer waste."

3. The term "wool waste" shall embrace all by-products and wastes of machines in any process of manufacture employing only new wool fibers except as set forth under "wool by-products" and shall also include wool pills and shank and tag wools.

4. The term "tanners wool" shall be applied to wool reclaimed from tanned sheepskin.

5. Mixtures of any of the following: "wool," "wool by-products," "wool wastes," or "tanners wool" shall be designated on the tag by the particular terms applicable to each of the constituents present in the mixture expressed in percentages, or the mixture may be designated as "blended wool."

6. Materials which contain at least ninety-five per cent (95%) wool shall be considered wool.

D. Hair

1. The term "hair" means the coarse filamentous epidermal outgrowth of such mammals as horses, cattle, hogs, and goats. When used in the manufacture of upholstered furniture, bedding, or filling material, it shall be clean, properly cured, free from epidermis, excreta, or foreign or objectionable substances or odors. The classifications of "hair" are as follows:

"horse hair," "cattle hair," "hog hair," and "goat hair."

2. When hair of different origins is used in a blend, the kind and percentage by weight of each shall be stated on the tag.

3. When any material of whatever origin other than hair is used in a mixture or blend with hair, the kind and percentage by weight of each such material shall be designated on the tag.

4. When hair has been curled, the kind of hair shall be stated preceded by the word "curled," e.g., "curled horse hair," "curled cattle hair."

5. Curled hair which has been placed in pad form and rubberized shall be stated on the tag as "rubberized curled hair pad."

6. When hair is rubberized or resin-treated, it shall be so designated on the tag. The percentage of rubber need not be stated on the tag. When rubberized hair is shredded, it shall be termed "shredded rubberized hair." The use of the term "curled" is not permitted in connection with shredded hair.

E. Feathers and Down

1. The term "down" by itself may be used for the soft undercoating of water-fowl, consisting of the light fluffy filaments grown from one quill-point but without any quill-shaft. It is permitted, however, to set forth on the tag the name of the fowl from which the down is obtained, such as "goose down," "duckdown," etc. The presence of loose down fibers in excess of ten per cent (10%) shall be designated as "down fibers."

2. The term "goose feathers" shall be used to designate feathers of any kind of goose, which are whole in physical structure, with the natural form and curvature of the feather.

3. The term "duck feathers" shall be used to designate feathers of any kind of duck, which are whole in physical structure, with the natural form and curvature of the feather.

4. The term "water-fowl feathers" may be used to designate any mixture of goose and duck feathers.

5. The term "turkey feathers" shall be used to designate feathers of any kind of turkey, which are whole in physical structure.

6. The term "chicken feathers" shall be used to designate feathers of any kind of chicken, which are whole in physical structure.

7. The term "feathers" shall not be used alone.

8. The term "feathers," by itself does not include crushed or chopped quill feathers, or stripped, chopped, crushed, or broken feathers, or feather fibers.

9. Broken feathers in excess of the amount allowed as tolerance by these Rules shall be designated on the tag and the name to the feathers shall be stated, e.g., "broken chicken feathers."

10. The term "chopped feathers" in conjunction with the name of the fowl from which the feathers came shall be used to designate feathers which have been processed through a chopping machine which has cut the feathers into small pieces, e.g., "chopped duck feathers." The term "chopped feathers" shall not be used alone.

11. The term "crushed feathers" in conjunction with the name of the fowl from which the feathers came shall be used to designate feathers which have been processed through a so-called curling machine which has changed the original form of the feathers, but has not removed the quill, e.g., "crushed duck feathers." The term "crushed feathers" shall not be used alone.

12. The term "stripped feathers" in conjunction with the name of the fowl from which the feathers came shall be used to designate feather barbs stripped from the main stem or quill but not to the extent of separating the barbs into feather fiber, e.g., "stripped goose feathers." The term "stripped feathers" shall not be used alone.

13. The term "feather fibers" in conjunction with the name of the fowl from which the fibers came shall be used to designate any barbs of feathers separated by any process from the quills, but free from the quills, e.g., "chicken feather fibers."

14. "Quill" shall mean the main shaft or axis of a feather and "quill feather" shall mean a flight feather or tail feather.

15. Feather mixtures shall be designated by the name, character, and percentage of each material used or the entire mixture shall be designated by the name of the lowest grade of material used. The grades of materials in descending order are as follows: goose down, duck down, goose feathers, duck feathers, turkey feathers, chicken feathers.

F. Manufactured Fibers (Synthetic Fibers)

"Synthetic fibers" means manufactured fibers as opposed to natural fibers from animal, fowl, or plant origin. Generic terms for manufactured fibers may be used in lieu of the term "synthetic fibers." The generic terms for manufactured fibers defined in Rule 7 of the Federal Trade Commission Rules and Regulations under the Textile Fiber Products Identification Act (Public Law 85-897, 85th Congress, Second Session, H.R. 469) may be used. If generic terms are used, they must be true and correct.

G. Rubber and Foam

1. The term "rubber" as used in these regulations shall apply to synthetic rubber as well as natural rubber.

2. "Latex foam rubber" means foam products made from rubber latex which previously has not been coagulated or solidified.

3. "Sponge rubber" means sponge products made from rubber which has previously been coagulated or solidified.

4. "Synthetic foam" means a polymerized cellular material made from an organic base other than rubber. Generic terms together with the word "foam" may be used in lieu of the term "synthetic foam." If generic terms are used, they must be true and correct, e.g., "urethane foam," "polystyrene foam," "vinyl foam."

5. When any one of the materials defined in Rule III, Sections G (2), G (3), and G (4) above are cut or broken into pieces of indefinite size, they shall be further defined as "pieces," e.g., "latex foam rubber pieces," "synthetic foam pieces," "urethane foam pieces."

6. When any one of the materials defined in Rule III, Sections G (2), G (3), and G (4) above have been shredded, they shall be further defined as "shredded," e.g., "shredded sponge rubber," "shredded synthetic foam," "shredded polystyrene foam."

7. When any one of the materials defined in Rule III, Sections G (2), G (3) and G (4) above have been molded into the form in which they are intended to be used, they may be further defined as "molded," e.g., "molded sponge rubber," "molded latex foam rubber," "molded synthetic foam," "molded vinyl foam."

8. When any one of the materials defined in Rule III, Sections G (2), G (3), and G (4) above have been either cut or broken into pieces of indefinite size or subjected to a shredding process and subsequently cemented together, whether or not this is done in a mold, the resulting product shall be further defined as "cemented." The term "molded" shall not be used, e.g., "cemented sponge rubber pieces," "cemented shredded latex foam rubber," "cemented shredded synthetic foam," "cemented shredded urethane foam."

H. Miscellaneous Filling Materials

1. "Cat-tail plant fibers," shall be so designated on the

tag.

2. The term "coconut husk fiber" or "coir" shall be used to designate the fibrous material obtained from the husk or the outer shell of the coconut.

3. The term "jute" by itself shall not be used.

4. The term "jute fibers" shall be used to designate jute of which no prior use has been made.

5. The term "jute pad" may be used to designate a pad made from jute fibers.

6. The term "jute shoddy" shall be used to designate reclaimed used cordage or other used jute material which has been fabricated and used for baling or other purposes.

7. The term "kapok" shall be used to designate the fibers obtained from the seeds of the kapok tree. The use of the term "silk floss" is prohibited.

8. The term "sisal fibers" shall be used to designate sisal of which no prior use has been made.

9. The term "sisal pad" may be used to designate a pad made from sisal fibers.

10. The term "palm fibers" shall be used to designate the fibrous material obtained from the leaf of the palm, palmetto, or palmyra tree.

11. The term "sea grass" shall be used to designate any of the materials obtained from maritime plants or sea-weeds.

12. Tampico fibers when curled shall be designated as "curled tampico fibers."

13. The term "cellulose," "cellulose fiber," "cellulose," shall be used to designate cellulosic products containing not more than four per cent (4%) lignin and twelve per cent (12%) pentosans.

14. The term "wood fiber pad" shall be used to designate a pad made of cellulose fiber containing more than four per cent (4%) lignin or twelve per cent (12%) pentosans.

15. Pads made from "cellulose" may be designated as "cellulose fiber pads."

16. The term "steel wool pads" is not permitted. When passed through some form of garnetting machine and carded in layers or sheets, steel fibers may be designated as "steel batting" or "steel fiber pads." When not garnetted, they shall be designated as "steel fibers."

17. The presence of paper in an article of bedding in lieu of other filling material shall be designated on the tag.

18. The use of the term "excelsior" is permitted to designate curled wood shreds. The term "wood wool" is prohibited.

19. A pad made of curled wood shreds shall be designated "excelsior pad."

RULE IV - Felt

A. "Felt" means material that has been carded in layers or sheets by a garnett or felting machine.

B. "Felt" does not include felt scraps or repicked felt.

C. The term "felt" or "felted" by itself shall not be used but shall be combined with the name of the material from which it is made. The use of the term "batting" instead of "felt" is permissible, e.g., "blended cotton felt," "jute felt," "wool batting."

D. Felt made of "mixed cotton" (Rule III, Section A (4) may be designated on the tag as "blended cotton felt." Stating the percentages of component materials in "blended cotton felt" is permissible but not mandatory. If percentages of component materials in "blended cotton felt" are stated, it must be a true

and accurate statement preceded by the term "blended cotton felt."

E. Felt made entirely of staple cotton shall be designated as "staple cotton felt."

F. Felt made from "blended wool" Rule III, Section C (5) may be designated on the tag as "blended wool felt."

G. Felt impregnated with vinyl or any other resin shall be defined as designated on the tag with the words "resin-treated" preceding the name of the material from which the felt is made, e. g., "resin-treated blended cotton felt."

RULE V - Labels

The following described law labels are required by these regulations as authorized by the State Bedding Law:

A. "All New Material" - Bedding meeting all requirements for new materials shall carry the "New Materials Label," and no other label is required.

B. "Second-hand Material" (white label to be affixed by manufacturer or renovator only) is required on all second-hand materials renovated, remade, or manufactured. This label, together with the "Second-hand Material" (red label), is required on all articles manufactured, renovated, or remade, using second-hand materials. Germicidal treatment label must also be affixed to this article.

C. "Second-hand Material" (red label to be affixed by the germicidal treatment permit holder) is required on all articles or materials containing second-hand materials for sale, regardless of whether they have been renovated or remade, or are only sterilized and offered for sale.

D. "Second-hand Material Sanitized" label is to be attached by the person holding germicidal treatment permit to every article of bedding or material undergoing the process of sterilization, regardless of the conditions requiring sterilization. Bedding stamp must be affixed to this label when treatment is performed for a retail store.

E. "Owner's Own Material" label is required on all articles of bedding to be renovated or remade for the owner. Bedding stamp must be affixed by the renovator permit holder.

RULE VI - Germicidal Treatment

A. A person shall not sell, offer for sale, or include in a sale any article of second-hand bedding or any article of bedding manufactured in whole, or in part, from second-hand material, unless such bedding has been cleaned and germicidally treated by a method approved by the Department.

B. A person shall not use in the manufacture, renovation or repair of bedding any material which has been obtained from dump grounds, junk yards, or hospitals within or without the State of Oklahoma.

C. The following are approved methods of germicidal treatment:

1. Steam

All materials to be germicidally treated shall be subjected to treatment by steam under a pressure of fifteen (15) pounds maintained for thirty (30) minutes or a pressure of twenty (20) pounds maintained for twenty (20) minutes.

Alternate methods: Two (2) applications of streaming steam maintained for a period of one (1) hour each, to be applied at intervals of not less than six (6) nor more than twenty-four (24) hours will be accepted as an alternate for steam under pressure.

A gauge for registering steam pressure, visible from the outside of the room or chamber, shall be provided where steam under pressure is used and valved outlets shall be provided near the bottom and also the top of the room in cases where streaming steam is employed.

2. Dry Heat

A minimum temperature of two hundred thirty (230) degrees Fahrenheit, held for a period of one (1) hour, within a closed container is considered satisfactory for proper germicidal treatment. This method is not recommended for furniture.

3. Washing and Drying

a. Pillows: Feather pillows will be considered as having been germicidally treated when the feathers and ticking are kept intact without opening, and washed by a commercial laundry method with subsequent drying to remove moisture.

b. Mattresses: Hair mattresses will be considered as having been germicidally treated when the hair is removed from the ticking and washed by a commercial laundry method and subsequently dried to remove all moisture, and where the ticking is washed and subsequently dried.

4. Other Methods

Any other method of germicidal treatment may be used in germicidally treating bedding and materials, provided it has first been approved by the Department.

D. Germicidal treatment devices shall be properly housed to afford protection to the device and to allow for adequate working space around the device. Adequate space shall be provided for storage and segregation of treated and untreated bedding and materials. All rooms shall be clean, and germicidal treatment devices shall be cleaned and maintained in good repair and proper working condition.

E. Dry-heat germicidal treatment devices shall be equipped with recording clocks that will accurately record time and temperature. Recording clocks shall be attached to the outside of the chamber where they can be easily observed. The heat bulb of

the recording clock shall be installed at the farthest point practical in the chamber from the entry of heat.

F. All dry heat chambers and automatic circulating heat devices shall be constructed to maintain equal and uniform temperatures in all sections of the chamber.

G. All articles of bedding and materials shall be spaced within the germicidal treatment chamber to allow for not less than four (4) inches on all sides of each article for full circulation of heat or air.

H. When articles of bedding are manufactured in whole or in part from second-hand material and germicidally treated by the dry heat method as herein approved, the application of the dry heat germicidal treatment shall be subsequent to the manufacturing process.

I. Accurate records shall be kept by the operator of the germicidal treatment device, and such records shall show the following information concerning each article treated.

1. Date germicidally treated
2. Lot number (chart number)
3. Tag number (article number)
4. Length of time treated (time of day in chamber)
5. Name and address of person for whom treated and/or source of material
6. Name and address of buyer, if any

J. Recording charts from recording clocks shall be kept as part of the operator's record for a period of not less than two years. All records and charts and/or information thereon shall be available to the Department.

RULE VII - Sanitary Premises

Every person engaged in the business of manufacturing, repairing, or renovating bedding shall keep his place of business in a sanitary condition by complying with the rules that follow.

A. Adequate housing and floor space shall be provided to prevent crowding of materials and equipment and to allow for the practice of cleanliness and sanitation.

B. All work rooms shall be well ventilated, and high dust counts, odors, and stale air shall not be permitted. Any dust in excess of fifty (50) millions of particles per cubic foot of air shall be regarded as excessive. Dust control measures may include the housing or partitioning of dust producing machinery from other work rooms and the installation of metal hoods and extraction fans over dust producing machinery.

C. All work rooms shall be well lighted. Industrial lighting standards established by the American Standards Association may be used as a guide.

D. The floors of all rooms in which materials are stored, processed, or otherwise used in the manufacturing or renovating of bedding, shall be of such construction as to be easily cleaned, shall be smooth, and shall be kept clean and in good repair.

E. Walls and ceilings of all rooms where materials are stored, processed, or otherwise used in the manufacturing or renovating of bedding, shall be of tight, smooth construction, shall be painted, and kept clean and in good repair; cracks or recesses which would tend to harbor vermin and bacteria shall not be allowed.

F. All buildings, rooms therein, and immediate surroundings shall be kept in neat and clean condition. All rooms and surroundings shall be free of rubbish, trash, discarded equipment, or other unnecessary articles which may promote insanitary conditions.

G. There shall be no living quarters in the rooms, or opening directly into the rooms where materials are stored, processed, or otherwise used in the manufacturing or renovating of bedding.

H. Clean toilet facilities of a type approved by the Department shall be provided.

I. Adequate and clean hand washing facilities shall be provided. One lavatory (wash basin) with adequate and acceptable water supply shall be provided for every twenty (20) employees or portion thereof up to one hundred (100) persons and one lavatory (wash basin) for each additional twenty-five (25) persons or portion thereof. Soap or a suitable cleaning agent shall be provided at each lavatory.

J. A water supply and drinking fountain approved by the Department shall be provided. Paper cups with dispenser may be used instead of a fountain. The common drinking cup is prohibited.

RULE VIII - Permits

A. A person shall not engage in the business of manufacturing, repairing, and selling bedding unless he has obtained an authorizing permit from the Department.

B. A person shall not germicidally treat bedding unless he has obtained an authorizing permit from the Department.

C. Permits required by the Act and Regulations must be renewed annually on a fiscal year basis, i. e., July 1.

D. Permit fees are as follows:

Initial Bedding Permit	\$5.00
Renewal Bedding Permit	\$5.00
Initial Germicidal Treatment Permit	\$25.00
Renewal Germicidal Treatment Permit	\$5.00

RULE IX - Adhesive Revenue Stamps

A. A person shall not manufacture, renovate, and/or sell, or have in his possession with intent to sell, any bedding unless there be affixed to the law label required by the Act and Regulations an adhesive stamp prepared and issued by the Department. Adhesive stamps shall be affixed to law label by the person manufacturing, renovating, selling, or germicidally treating items of bedding.

B. Adhesive revenue stamps are valued at 5¢ each and shall be issued to authorized permit holders by the Department in multiples of 100. The smallest quantity of stamps which can be issued is 100 for \$5.00.

C. Persons applying for initial permits shall also purchase not less than 100 adhesive stamps unless the applicant has stamps on hand as the result of a previously assigned permit.

RULE X - Identification of Materials

A. Persons engaged in the manufacture, repair, and renovation of bedding shall keep new and second-hand materials segregated and identified; when new and second-hand materials are mixed, the entire mixture shall be regarded as second-hand.

B. Persons engaged in the manufacture, repair, renovation, and/or germicidal treatment of bedding shall tag, label, or mark all second-hand bedding and materials prior to manufacture, renovation, or germicidal treatment to show name and address of owner and reason for possession.

STATE OF OREGON

**Laws Relating
to
Sanitation of Upholstered
Furniture and Bedding**

Oregon State Board of Health

SANITATION OF UPHOLSTERED FURNITURE AND BEDDING

[S. B. 28]

To register and regulate persons engaged in the business of manufacturing and selling at wholesale and retail, repairing, renovating, sterilizing and fumigating bedding and upholstered furniture; to provide for the securing and issuing of registration certificates and the payment of fees therefor; to provide for the administration of this act by the state board of health and defining its duties and powers; to provide for disposition of fees and penalties collected hereunder; to provide for penalties and to repeal sections 99-1301, 99-1302, 99-1303, 99-1307, 99-1308, 99-1309, 99-1310, 99-1314, 99-1316, 99-1317, 99-1318, O. C. L. A., sections 99-1304, 99-1305, 99-1306, 99-1311, 99-1312, 99-1313, O. C. L. A., as amended by sections 1, 2, 3, 4, 5 and 6, chapter 147, Oregon Laws 1941, respectively, and section 99-1315, O. C. L. A., as amended by section 1, chapter 142, Oregon Laws 1947; and all acts or parts of acts inconsistent herewith; and providing a saving clause; having as its purpose the health, safety and welfare of the people of Oregon.

Be It Enacted by the People of the State of Oregon:

ADMINISTRATION

433.420 Administration by State Board of Health. The board shall administer ORS 433.405 to 433.680 and may adopt such rules and regulations as may be necessary for their administration. All rules and regulations shall have the full force and effect of law and shall become effective not earlier than 10 days after being filed with the Secretary of State.

433.660 Advisory council; membership; terms. There is created a Furniture and Bedding Advisory Council to the board which shall consist of the State Health Officer as secretary and five other members to be appointed by the Governor for a term of five years. On July 1 of each year, upon the expiration of the term of one member of the commission, the Governor shall appoint a successor.

433.665 Qualifications of appointed members. The five appointive members of the advisory

council shall be persons who, because of their vocations, employment or affiliations, are qualified to represent the various branches of the affected industries. Appointments shall be apportioned so that: (1) One member represents the upholstered furniture manufacturing industry; (2) One member represents the bedding manufacturing industry; (3) One member represents the retail furniture industry; (4) One member represents the sterilizing and fumigation industry; (5) One member, who having no commercial interest, affiliation or relationship in or to the industry, represents the public.

433.670 Vacancies and removals. (1) The Governor shall fill such vacancies as may occur in the membership of the council, and a member so appointed shall serve during the unexpired term of his predecessor; (2) The Governor may remove any member of the council when he ceases to represent the interest in whose behalf he was appointed.

433.680 Functions of the council. The advisory council may: (1) Consider all matters submitted to it by the State Health Officer; (2) Propose such rules and regulations as may, in its opinion, be necessary in carrying out ORS 433.405 to 433.680; (3) Make recommendations to the Civil Service Commission and the State Health Officer relative to the qualifications and duties of the inspectors; (4) Advise regarding enforcement policy and other matters which may be pertinent to the purpose and intent of ORS 433.405 to 433.680.

433.675 Meetings; compensation. (1) The Furniture and Bedding Advisory Council shall choose one of its members to act as chairman and shall meet twice each year at a time and place designated by the secretary. However, the secretary may, at the written request of two members of the council or, at his own option, call a special meeting of the council to discuss such matters as may, in his opinion, require interim discussion and advice; (2) The members of the advisory council shall receive \$10.00 per diem plus necessary travel and other expenses while engaged upon the work of the council.

DEFINITIONS

433.405 General definitions. As used in ORS 433.405 to 433.680, unless the context requires otherwise: (1) "Annually" or any of its variants means that period beginning July 1 of each year and ending June 30 of the succeeding year or any unexpired portion of that period; (2) "Board" means the State Board of Health; (3) "Certificate" means any registration certificate issued by the board; (4) "Chief" means the chief of the Furniture and Bedding Inspection Section; (5) "Inspector" means an inspector of the Furniture and Bedding Inspection Section; (6) "Person" includes individual, copartnership, association, firm, auctioneer, trust and corporation, and the agents, employees and servants of any of them; (7) "Section" means the Furniture and Bedding Inspection Section of the Board; (8) "Sell" or any of its variants means one or any combination of the following: Sell, offer or expose for sale, barter, trade, deliver, give away, rent, consign, lease, possess with an intent to sell or dispose of in any other commercial manner. Merchandise found on sales floors or in places from which sales or deliveries are made, is assumed to be for sale; (9) And for the purpose of the rules and regulations under those statutes, the present tense includes the past and future tenses, and the future, the present.

433.410 Definitions of affected materials. As used in ORS 433.405 to 433.680, unless the context requires otherwise: (1) "Bedding" means any quilted pad, packing pad, mattress pad, hammock pad, mattress, comforter, bunk quilt, sleeping bag, box spring, upholstered baby carriage, studio couch, pillow, cushion, hassock or any bag or container made of leather, cloth or any other material or any other device that is stuffed or filled in whole or in part with concealed material in addition to the structural units, all of which may be used by any human being for sleeping, resting or reclining purposes. "Pillow" includes a bag or a case of cloth filled or stuffed with feathers, downs, kapok, cotton, hair, wool or other sanitary filling not prohibited by the regulations of ORS 433.405 to 433.680 to be used, or that may be used, as a rest or a support for the

head in reclining, resting or sleeping; (2) "Filling material" means cotton, wool, kapok, feathers, downs, or any other material or combination thereof, loose or in batting, pads or any other prefabricated form, concealed or not concealed, to be used or that may be used in articles of bedding or upholstered furniture; (3) "Owner's own material" means any article or material belonging to any person for his own or his tenant's use that is sent to any manufacturer, repairer or renovator to be repaired or renovated or used in repairing or renovating; (4) "Secondhand" means any article or material of which prior use has been made, and includes all filling materials, not otherwise classed as new by the regulations of ORS 433.405 to 433.680. Any article of upholstered furniture or bedding on sales floors in a private residence or room which is not separated from living quarters is secondhand furniture or bedding. Any article of upholstered furniture or bedding shall be classed as secondhand if it contains any secondhand material in whole or in part; (5) "Slip cover" means any casing or cover without any filling material and which meets any of the following requirements: (a) is for use or is to be placed on or over any manufactured article of upholstered furniture or bedding, (b) covers or conceals the upholstered furniture or bedding in whole or in part, (c) is closed or held in place by snaps or hooks and eyes or lacing so that it may be removed without the use of tools or instruments, (d) is not permanently attached by tacking, sewing or in any other manner; (6) "Upholstered furniture" means any furniture, movable or stationary, including children's furniture, ottomans, barber chairs, beauty shop chairs, office furniture, massage and surgical tables and related equipment which is stuffed or filled in whole or in part with any material hidden or concealed by fabric or any other covering, including pillows, loose or attached, belonging to or forming a part thereof and the structural units, that can be used as a support for the body of a human being or his limbs and feet when in a sitting, resting or reclining position.

433.415 Definitions relating to trade or business. As used in ORS 433.405 to 433.680, unless the context requires otherwise: (1) "Branch fac-

tory" means one separated from the parent factory manufacturing in whole or in part any article of upholstered furniture or bedding; (2) "Branch renovating shop" means one separated from the parent shop renovating or re-covering any article of bedding; (3) "Branch repair shop" means one separated from the parent shop repairing any article of upholstered furniture; (4) "Fumigator" means any person certified by the board to fumigate any article of upholstered furniture or bedding or filling material relating thereto; (5) "Manufacturer" means a person who either by himself or through employees or agents makes any article of upholstered furniture or bedding in whole or in part or who does the upholstery or covering of any structural unit or part thereof, using either new or secondhand material; (6) "Repairer" or "renovator" means a person who repairs, makes over, re-covers, restores, renovates or renews upholstered furniture or bedding; (7) "Residence dealer" means any person who sells any new or used article of upholstered furniture or bedding from his own or another person's place of abode or from any sales room not having a recognized and ordinary store entrance; (8) "Retailer" means a person who sells any article or thing to a consumer or user of the article or thing purchased; (9) "Retail branch store" means any subordinate establishment, place or private residence maintaining a sales service other than one situated immediately next door to the main store, office or headquarters; (10) "Sterilizer" means any person certified by the board to sterilize any upholstered furniture, bedding or filling material relating thereto; (11) "Supply dealer" means any person certified by the board to manufacture, process or sell at wholesale any felt, padding, pads or loose material in bags or containers, concealed or not concealed, to be used or that could be used in articles of bedding or upholstered furniture; (12) "Supply depot" means any warehouse or storeroom used as a merchandising center or supply outlet, to supply or for the purpose of supplying merchandise subject to ORS 433.405 to 433.680, either directly or indirectly at wholesale or retail, which merchandise is sold or held for the purpose of sale to any person regardless of whether the

purchaser is in business or in the employ of any person; (13) "Transient repairer or renovator" means any person who travels from place to place and repairs upholstered furniture or renovates bedding with or without benefit of mobile facilities but who has no permanent shop or address; (14) "Wholesale branch house" means a branch situated in another locality and conducting a wholesale business independent of the parent house in so far as showroom and service to the trade are concerned, excepting however, sales or showrooms in established furniture marts or exchanges; (15) "Wholesaler" means a person who sells any article or thing to another for the purpose of resale.

ENFORCEMENT

433.550 Unauthorized sales prohibited. No person shall, directly or indirectly, sell any upholstered furniture, bedding or filling material made, repaired, renovated, sterilized or fumigated contrary to ORS 433.405 to 433.680.

433.425 Regulations on standards, grades and labels. The board shall, by regulation, establish grades, cleanliness standards and tolerances on the kinds and qualities of materials which are used or intended to be used or that may be used in the manufacture of upholstered furniture or bedding, provided such grades, specifications and tolerances are not in conflict with accepted national standards, relating thereto. The board may approve or adopt standard designations and rules for the proper labeling of articles filled with these materials, provided such rules are not in conflict with ORS 433.405 to 433.680.

433.595 Persons authorized to inspect records, materials and processing equipment; scope of inspection. The State Health Officer, the chief or any authorized inspector shall have access to any premises or to any records held by any person containing any information pertaining to any materials or articles affected by and subject to the provisions of ORS 433.405 to 433.680. They may inspect materials and structural parts intended to be used in the manufacture of upholstered furniture or bedding, partly finished and finished articles of upholstered furniture

and bedding, may open such articles or parts thereof for the purpose of inspecting concealed filling material and may take either the entire articles or samples of filling material in such quantities as may be necessary for laboratory analysis.

433.655 Presumption of intent to sell. The presence of any article or material regulated by ORS 433.405 to 433.680 on sales floors or premises from which sales or deliveries are made shall be presumptive evidence of intent to sell or use.

433.600 Methods of controlling fitness of materials and finished products. (1) The State Health Officer, the chief or any authorized inspector may determine the fitness of any second-hand or damaged article of upholstered furniture or bedding for sterilization or fumigation and sale and of any materials intended to be used in the manufacture of any article or articles of upholstered furniture or bedding; (2) The board may condemn, withhold from sale, seize or destroy any upholstered furniture or bedding which is found to be in violation of ORS 433.405 to 433.680 and any filling material, units or other structural parts, intended to be used or that could be used in the manufacture, repair or renovation of upholstered furniture or bedding in violation of ORS 433.405 to 433.680.

433.610 Condemned articles or articles ordered held to be produced on demand. Every person shall produce upon demand of an inspector any article or material that has been condemned or ordered held on an inspection notice.

433.605 Condemnation tags; removal prohibited. (1) The tag to be affixed to any articles of condemned upholstered furniture or bedding or any material by an inspector shall be a colored tag and shall contain such information as may be required by the board; (2) No person shall remove or cause to be removed any tag or device placed upon any upholstered furniture or bedding or any material by an inspector.

433.575 Separate storage of new and processed articles. New or sterilized or fumigated articles of upholstered furniture or bedding or materials shall at all times be kept separate from

secondhand articles or materials not fumigated or sterilized.

433.580 Identification of articles for repair and secondhand materials. Every person upon receiving upholstered furniture or bedding for repair or renovation shall securely affix immediately a tag of identification showing the owner's or dealer's name and address and the date upon which it was received. The tag shall remain affixed until actual repair or renovation is begun. Secondhand springs, structural parts and filling materials shall be likewise identified.

433.590 Imported goods to meet requirements. (1) Every person importing or selling either at wholesale or retail, directly or indirectly, any unlabeled foreign-made upholstered furniture or bedding, shall fully comply with all the requirements of ORS 433.405 to 433.680, including the registration and labeling provisions, before any such upholstered furniture or bedding can be offered or exposed for sale; (2) Secondhand upholstered furniture or bedding or secondhand filling materials to be used or that may be used in upholstered furniture or bedding, received from outside this state, shall comply with all the sterilization and fumigation provisions of ORS 433.405 to 433.680 before being accepted, sold or delivered, either directly or indirectly by any person.

433.640 Persons to comply with sterilization and fumigation laws. Responsibility for compliance with ORS 433.405 to 433.680 rests not only with the manufacturer but also with any person subject to the registration provisions of ORS 433.405 to 433.680.

433.645 Interference with inspectors prohibited; police powers of inspectors. (1) No person shall interfere with, obstruct or otherwise hinder any inspector of the board in the performance of his duties; (2) the chief and all inspectors in the performance of their official duties shall have the powers of peace officers of this state.

433.650 Courts having jurisdiction over prosecutions. Justices of the peace, district courts, county courts and all other courts having jurisdiction as justice of the peace, shall have con-

current jurisdiction with the circuit court of all prosecutions under ORS 433.405 to 433.680.

433.990 Penalties. (6) Violation of ORS 433.405 to 433.680 is punishable, upon conviction, for each offense by a fine of not less than \$50 nor more than \$500 or by imprisonment in the county jail for not less than three nor more than six months, or both. The unit for a separate and distinct offense under those sections is every article of improperly labeled, or not labeled, upholstered furniture or bedding made, repaired, re-covered, renovated, sterilized or fumigated, sold, exposed or offered for sale, delivered, consigned, rented or possessed with intent to sell contrary to ORS 433.405 to 433.680.

EXEMPTIONS

433.475 Slip cover makers need no certificate. Any person engaged exclusively in the manufacture of slip covers shall not be required to have a certificate under ORS 433.405 to 433.680.

433.480 Upholstered caskets excluded. Upholstered caskets used in the burial of the dead shall not be considered as upholstered furniture within the meaning of ORS 433.405 to 433.680.

433.585 Regulation of exported goods. ORS 433.405 to 433.680 do not apply to upholstered furniture or bedding manufactured, repaired or renovated which is for sale outside the borders of this state, except that if such articles when manufactured, repaired or renovated contain, in whole or in part, secondhand materials, such articles shall first be sterilized or fumigated as required by ORS 433.405 to 433.680.

FUMIGATION

433.550 Unauthorized sales prohibited. No person shall, directly or indirectly, sell any upholstered furniture, bedding or filling material made, repaired, renovated, sterilized or fumigated contrary to ORS 433.405 to 433.680.

433.555 Sale of used articles without processing prohibited. No person shall, directly or indirectly, sell in this state, at wholesale or retail or otherwise, any secondhand or previously used article of upholstered furniture or bedding or any

secondhand or previously used filling material to be used or that could be used in the manufacture, repair or renovation thereof, unless such article or material has, subsequent to its last use, been sterilized or fumigated by a process approved by the board and labeled according to ORS 433.405 to 433.680.

433.510 Registration of sterilizing and fumigating plants. (1) No person shall engage in the business of sterilizing or fumigating articles or materials subject to the regulations of ORS 433.405 to 433.680 without first applying for the proper registration certificate; (2) The application shall describe the place where the sterilization apparatus, or fumigation chamber, will be located, the type and kind of equipment to be used, the names and addresses of the true owners of the sterilizing or fumigating business and such other data as the board may from time to time require.

433.515 Certificate for approved equipment; subsequent inspection. (1) Upon receipt of an application to sterilize or fumigate, the board may cause an investigation to be made and, if satisfied that the apparatus or chamber will comply with the requirements of ORS 433.405 to 433.680 for sterilization or fumigation, the certificate shall be granted; (2) inspection shall be made by the board, or its authorized representatives, from time to time to determine whether the sterilizer or fumigation apparatus is fully and faithfully complying with the requirements and regulations of ORS 433.405 to 433.680 for sterilization and fumigation.

433.520 Construction of sterilization equipment; safety rules. (1) Sterilization and fumigation chambers shall be steam and gas tight in construction and only such methods and processes as will effectively destroy all insect and bacterial life shall be approved for use; (2) The board also shall prescribe by regulation such rules as may be necessary to the safety of sterilization and fumigation operators and to such human and animal life as may normally exist in the affected area.

433.530 Sterilization and fumigation of mate-

rials; articles labeled after processing. (1) Every person who receives for sterilization or fumigation any upholstered furniture, bedding or filling material to be used or that can be used in upholstered furniture or bedding for resale, shall sterilize or fumigate all such articles or material in accordance with ORS 433.405 to 433.680 and the regulations thereunder and shall affix a sterilization or fumigation label approved by the board immediately after the sterilization or fumigation has been completed; (2) the label shall be attached securely to the article or material at the sterilizing or fumigating plant as evidence that the article or material has been sterilized or fumigated by a process approved by the board. Such label shall be fixed in a position where it may be conveniently examined.

433.535 Additional data on sterilization or fumigation label; record of labels. (1) In addition to the language required by ORS 433.495 to 433.500, the sterilization or fumigation label shall show or state: (a) the lot number and label number of the attached sterilization or fumigation label; (b) the kind of article or filling material sterilized or fumigated and a statement as to the cushions, pads and pillows belonging to or forming a part thereof; (c) the name of the person for whom sterilized or fumigated; (d) the date sterilized or fumigated; (e) the name, address and registration number of the sterilizing or fumigating plant; (f) any other data which may be necessary and proper to establish that effective results are being obtained; (2) the sterilizer or fumigator shall keep a record of the data required by subsection (1) of this section showing the disposition of each and every label. The record shall be accessible at all times to authorized inspectors of the board.

433.540 Issue of labels restricted; illegal possession or transfer prohibited; return of void labels. (1) Sterilization or fumigation labels shall be issued only to persons who are authorized to sterilize or fumigate under ORS 433.405 to 433.680; (2) illegal possession of any sterilization or fumigation label is prohibited. No sterilization or fumigation label may be sold, given away or transferred, unless such sale or transfer is first

approved by the board; (3) void or multilabeled labels shall be returned to the board.

433.545 Processing required prior to repair. Every article of upholstered furniture or bedding from any private or public source shall be sterilized or fumigated before it is repaired or renovated.

433.585 Regulation of exported goods. ORS 433.405 to 433.680 do not apply to upholstered furniture or bedding manufactured, repaired or renovated which is for sale outside the borders of this state, except that if such articles when manufactured, repaired or renovated contain, in whole or in part, secondhand materials, such articles shall first be sterilized or fumigated as required by ORS 433.405 to 433.680.

LABELS AND LABELING REQUIREMENTS

433.495 Size, contents and attachment of labels. (1) Labels to be attached to articles of upholstered furniture and bedding regulated by ORS 433.405 to 433.680 shall: (a) not be less than six square inches in size, (b) be made of a fabric of good quality approved by the board, (c) show or state that the filling material is "new", "secondhand", "sterilized", "fumigated" or "owner's own", as the case may be, (d) show or state, in addition to the prescribed language, the registration number of the manufacturer as assigned by the board; (2) filling materials, singly or when blended, shall be described by true name as defined by the regulations of ORS 433.405 to 433.680. Feather and down contents shall be shown by percentage only, based on avoirdupois weight. The manner of describing the various filling materials, including the language required by law, together with such other descriptive information as may be required, and the type size, placement, and the color of ink thereof, shall be prescribed by the board; (3) if desired, the label also may describe the frame, cover and style of the article to which it is attached. When such descriptive statements are made they must, in fact, be true statements; (4) before display, sale or delivery of any article of upholstered furniture or bedding, all labels required by ORS 433.405 to 433.680 shall be attached securely to the article

at the factory or shop. Such labels shall be fixed in such position that they may be conveniently examined.

433.490 Articles to be labeled. (1) No person shall, at wholesale or retail or otherwise, directly or indirectly, make, repair, renovate or sell any upholstered furniture or bedding for use in any household or place of abode or which can be used by human beings, if it is made of new or secondhand material which is concealed by fabric or any other covering, unless such article is plainly and indelibly stamped or labeled with a tag or other marking as provided in ORS 433.405 to 433.680 and approved by the board; (2) before being sold, offered or exposed for sale, cotton, wool, kapok, feathers, downs or any other material or any combination thereof, loose, in batting, pad or any other prefabricated form, concealed or not concealed, to be used or that could be used in articles of bedding or upholstered furniture, shall be labeled with a tag or other device setting forth its true content in accordance with ORS 433.405 to 433.680.

433.500 Labels and stamps on particular items. (1) The finished size of bed pillows shall be stated on the label; (2) quilt and comforter labels shall show the "cut" size on the label, and a reasonable tolerance from the "cut" size measurement shall be established by regulations; (3) labels appearing upon decorative pillows, boudoir and fancy cushions need not show the finished size; (4) slip seat chairs and benches or upholstered stools and similar articles of upholstered furniture, having a wood or metal bottom, may be clearly and indelibly stamped at the factory in lieu of the label. The stamp to be used shall not be smaller than the minimum size approved by the board. When a stamp is approved in lieu of a label, such stamp shall show or state such information as would be required on the label which it replaces; (5) all feathers and downs, excepting raw stocks sold in bulk or package, shall be labeled with a tag or other marking upon each and every parcel setting forth the true contents according to the requirements of ORS 433.405 to 433.680; (6) any person who renovates or repairs upholstered furniture or

bedding for any owner or customer for his own use or for use by his tenants shall attach when completed the "Owner's Own Material" label approved by the board. The "Owner's Own Material" label shall be attached securely to the article at the factory or shop, and it shall be fixed in such position that it may be conveniently examined.

433.570 Special processing of certain fillers; proper labeling. Whenever the words "batt", "batting" or "felt" are used in any statement required by ORS 433.405 to 433.680, the material designated shall be in layers as processed by garnetting or carding machines and the statement on the label shall indicate whether the batt is a "staple cotton" or a "cotton linters batt" or such other true statement as may be in order.

433.505 Abuse of labels prohibited. No person shall: (1) place on labels required by ORS 433.405 to 433.680 any mark, tag or sticker or any other device, in such a way as to cover the statements required by law; (2) use on any label any misleading term or designation or term or designation likely to mislead; (3) attempt to or in fact remove, deface, alter, or cause to be removed, defaced or altered, the label or any mark or statement placed upon any upholstered furniture, bedding or material under ORS 433.405 to 433.680. A purchaser for his own use is exempted from the prohibition in this subsection; (4) use the required furniture and bedding label to advertise falsely or misrepresent any merchandise to which the bedding or furniture label is required to be attached.

433.530 Sterilization and fumigation of materials; articles labeled after processing. (1) Every person who receives for sterilization or fumigation any upholstered furniture, bedding or filling material to be used or that can be used in upholstered furniture or bedding for resale, shall sterilize or fumigate all such articles or material in accordance with ORS 433.405 to 433.680 and the regulations thereunder and shall affix a sterilization or fumigation label approved by the board immediately after the sterilization or fumigation has been completed; (2) the label shall be attached securely to the article or material at

the sterilizing or fumigating plant as evidence that the article or material has been sterilized or fumigated by a process approved by the board. Such label shall be fixed in a position where it may be conveniently examined.

433.535 Additional data on sterilization or fumigation label; record of labels. (1) In addition to the language required by ORS 433.495 and 433.500, the sterilization or fumigation label shall show or state: (a) the lot number and label number of the attached sterilization or fumigation label, (b) the kind of article or filling material sterilized or fumigated and a statement as to the cushions, pads and pillows belonging to or forming a part thereof, (c) the name of the person for whom sterilized or fumigated, (d) the date sterilized or fumigated, (e) the name, address and registration number of the sterilizing or fumigating plant, (f) any other data which may be necessary and proper to establish that effective results are being obtained; (2) the sterilizer or fumigator shall keep a record of the data required by subsection (1) of this section showing the disposition of each and every label. The record shall be accessible at all times to authorized inspectors of the board.

433.540 Issue of labels restricted; illegal possession or transfer prohibited; return of void labels. (1) Sterilization or fumigation labels shall be issued only to persons who are authorized to sterilize or fumigate under ORS 433.405 to 433.680; (2) illegal possession of any sterilization or fumigation label is prohibited. No sterilization or fumigation label may be sold, given away or transferred, unless such sale or transfer is first approved by the board; (3) void or mutilated labels shall be returned to the board.

433.630 Issuance and cost of labels. (1) All labels necessary to the enforcement of ORS 433.405 to 433.680 shall be issued by the board, except that labels to be affixed to articles manufactured of "All New Materials" shall be provided and affixed by the manufacturer; (2) Labels issued by the board may be sold to qualified persons in minimum quantities of 100 at a net price to the board of \$1 for each 100 labels sold.

REGISTRATION

433.470 Business to be certified. No person shall engage in a business regulated under ORS 433.405 to 433.680 unless he has first obtained the proper certificate required by ORS 433.405 to 433.680.

433.415 Definitions relating to trade or business. As used in ORS 433.405 to 433.680, unless the context requires otherwise: (1) "Branch factory" means one separated from the parent factory manufacturing in whole or in part any article of upholstered furniture or bedding; (2) "Branch renovating shop" means one separated from the parent shop renovating or re-covering any article of bedding; (3) "Branch repair shop" means one separated from the parent shop repairing any article of upholstered furniture; (4) "Fumigator" means any person certified by the board to fumigate any article of upholstered furniture or bedding or filling material relating thereto; (5) "Manufacturer" means a person who either by himself or through employees or agents makes any article of upholstered furniture or bedding in whole or in part or who does the upholstery or covering of any structural unit or part thereof, using either new or second-hand material; (6) "Repairer" or "renovator" means a person who repairs, makes over, recovers, restores, renovates or renews upholstered furniture or bedding; (7) "Residence dealer" means any person who sells any new or used article of upholstered furniture or bedding from his own or another person's place of abode or from any sales room not having a recognized and ordinary store entrance; (8) "Retailer" means a person who sells any article or thing to a consumer or user of the article or thing purchased; (9) "Retail branch store" means any subordinate establishment, place or private residence maintaining a sales service other than one situated immediately next door to the main store, office or headquarters; (10) "Sterilizer" means any person certified by the board to sterilize any upholstered furniture, bedding or filling material relating thereto; (11) "Supply dealer" means any person certified by the board to manufacture, process or sell at wholesale any felt, padding,

pads or loose material in bags or containers, concealed or not concealed, to be used or that could be used in articles of bedding or upholstered furniture; (12) "Supply depot" means any warehouse or storeroom used as a merchandising center or supply outlet, to supply or for the purpose of supplying merchandise subject to ORS 433.405 to 433.680, either directly or indirectly at wholesale or retail, which merchandise is sold or held for the purpose of sale to any person regardless of whether the purchaser is in business or in the employ of any person; (13) "Transient repairer or renovator" means any person who travels from place to place and repairs upholstered furniture or renovates bedding with or without benefit of mobile facilities but who has no permanent shop or address; (14) "Wholesale branch house" means a branch situated in another locality and conducting a wholesale business independent of the parent house in so far as showroom and service to the trade are concerned, excepting however, sales or showrooms in established furniture marts or exchanges; (15) "Wholesaler" means a person who sells any article or thing to another for the purpose of resale.

433.485 Each branch and firm name treated as separate unit; exception. (1) Every person in any class shall secure a separate certificate for each branch; (2) Every branch is subject to the provisions of ORS 433.405 to 433.680; (3) Every person doing business at the same address under more than one firm name is subject to the registration provisions for each firm name; (4) However, a person whose manufacturing plant is located in another state or foreign country and who is certified to manufacture upholstered furniture and bedding for sale in this state may have one wholesale outlet covered by the certificate issued to the factory.

433.445 Manufacturer's certificate. Every person manufacturing either upholstered furniture or bedding, or both, shall obtain annually a furniture and bedding manufacturer's certificate from the board bearing a registration number assigned by the board.

433.430 Assignment of registration numbers. The board shall prescribe the procedure relative

to assignment or reassignment of registration numbers.

433.455 Repairer's and renovator's certificate. Every person repairing upholstered furniture, or renovating bedding, unless he holds a furniture and bedding manufacturer's certificate, shall obtain annually a repairer's and renovator's certificate from the board bearing a registration number assigned by the board.

433.440 Special certificates required. Except as otherwise provided in ORS 433.405 to 433.680; a person who advertises, solicits or contracts to manufacture, repair or renovate upholstered furniture or bedding and either does the work himself or employs others to do it for him, shall secure the particular certificate required by ORS 433.405 to 433.680 for the particular type of work that he solicits or advertises that he will do, regardless of whether he has a shop or factory.

433.460 Retail dealer's certificate. Every person selling any upholstered furniture or bedding at retail, including upholstered antique furniture, regardless of its condition, unless he holds a furniture and bedding manufacturer's certificate, a wholesale furniture and bedding dealer's certificate, or a repairer's and renovator's certificate, shall obtain annually a furniture and bedding dealer's certificate from the board. This does not apply to upholstered furniture or bedding sold by a peace officer when so ordered by a court.

433.510 Registration of sterilizing and fumigating plants. (1) No person shall engage in the business of sterilizing or fumigating articles or materials subject to the regulations of ORS 433.405 to 433.680 without first applying for the proper registration certificate; (2) The application shall describe the place where the sterilization apparatus, or fumigation chamber, will be located, the type and kind of equipment to be used, the names and addresses of the true owners of the sterilizing or fumigating business and such other data as the board may from time to time require.

433.450 Wholesale dealer's certificate. A wholesaler of either upholstered furniture or bedding, or both, unless he holds a furniture and bedding manufacturer's certificate, shall obtain annually a wholesale furniture and bedding dealer's certificate from the board.

433.465 Supply dealer's certificate. Every person manufacturing, processing or selling at wholesale, any felt or batting or any pads or loose materials in bags or containers for use in bedding or upholstered furniture, unless he holds a furniture and bedding manufacturer's certificate shall procure annually a supply dealer's certificate from the board bearing a registration number assigned by the board.

433.615 Annual registration fees. The annual registration fee for each certificate granted under ORS 433.405 to 433.680 shall be in accordance with the following table and shall be due and payable on or before July 1.

Certificate to engage in business as a Manufacturer of Furniture and Bed- ding or of either	\$60
Wholesaler of Furniture and Bedding or of either	\$60
Supply Dealer	\$60
Supply Depot	\$60
Renovator of Furniture and Bedding or of either	\$25
Sterilizer and Fumigator or either	\$25
Retailer of Furniture and Bedding or of either	\$15

433.620 Fees to be prorated. A person who applies for a certificate of registration after July 1 of any year for a particular classification of business, and who was not subject to registration during the preceding registration year, may obtain the certificate on a prorated basis by payment of an amount equal to one-fourth of the annual registration fee, for the particular classification of business for each quarter or fraction thereof remaining in the annual registration period in which he applies. The quarterly periods shall begin July 1, October 1, January 1 and April 1.

433.625 Additional fee for delinquency in obtaining certificates. (1) Any person failing to apply for the proper certificate within 30 days after engaging in a business for which a certificate is required is delinquent and shall pay a delinquent fee amounting to 20 percent of the requisite registration fee in addition to the requisite registration fee. (2) An applicant submitting a renewal registration fee: (a) On or after August 1 and prior to September 1 shall pay a delinquency fee amounting to 20 percent of the requisite fee in addition to that requisite fee. (b) On or after September 1 shall pay a delinquency fee amounting to 30 percent of the requisite registration fee in addition to that requisite fee.

433.635 Disposition of moneys and fines collected under ORS 433.405 to 433.680. (1) All fines resulting from prosecutions under ORS 433.405 to 433.680 shall be paid to the board and credited to the Furniture and Bedding Inspection Fund. (2) All moneys collected by the board under ORS 433.405 to 433.680 and any other available moneys in the Bedding and Upholstery Fund, as established by the State Treasurer, shall be received by the board and expended only in carrying out ORS 433.405 to 433.680.

433.435 Reciprocity with other states. The board may reciprocate with other states regarding the mutual recognition and acceptance of labels in interstate commerce, the recognition of manufacturer-shipper identification numerals and in such other manner as may be consistent with the best interests of this state.

SANITATION

433.525 Cleanliness of equipment. The premises, delivery equipment, machinery, appliances, and devices of all persons under ORS 433.405 to 433.680 shall at all times be kept free of refuse, dirt, contamination, insects or vermin.

433.560 Soiled articles not to be sold. No person shall sell for human use an article of

upholstered furniture or an article of bedding which is unclean, filthy, soiled, offensive, hazardous or which has been obtained from any garbage or refuse dump or any other type of refuse disposal site; and no person shall sell for human use any article of upholstered furniture or any article of bedding which has been manufactured of, repaired or renovated with, in whole or in part, filling material which is unclean, filthy or soiled or contains foreign matter or dirt, or structural units, filling material, or parts obtained from any garbage or refuse dump or any type of refuse disposal site.

433.565 Cleanliness of filling materials. No person shall sell for human use filling material which contains foreign matter or dirt or which is unclean, filthy, offensive, hazardous or has been obtained from a garbage or refuse disposal dump or any type of refuse disposal site. No person shall use filling material which is unclean, filthy, offensive, hazardous or has been obtained from a garbage or refuse dump or any type of refuse disposal site in the manufacture, repair or renovation of an article of upholstered furniture or an article of bedding.

433.685 to 433.700 [Reserved for expansion]

COMMONWEALTH OF PENNSYLVANIA
DEPARTMENT OF LABOR
AND INDUSTRY
BEDDING AND UPHOLSTERY LAW
ACT No. 249, MAY 27, 1937 AS AMENDED
MAY 22, 1953 AND AUGUST 23, 1961

Relating to the manufacture, repair, renovating, cleansing, sterilizing, and disinfecting of mattresses, pillows, bolsters, feather beds, and other filled bedding, cushions, upholstered furniture *and bulk materials intended for use in such products* intended for sale or lease, and to the sale or lease thereof; requiring the placing of tag and adhesive stamp on such material; providing for the sale of adhesive stamps; authorizing and requiring the Department of Labor and Industry to adopt rules and regulations; providing penalties; and repealing certain acts.

Section 1. Be it enacted, &c., That the provisions herein set forth shall be construed to cover and apply to the manufacture, repair, and renovation of all mattresses, pillows, bolsters, feather beds, and other filled bedding of any description, also to cushions and all types of upholstered furniture which are intended for sale or lease in this Commonwealth, and to the sale or lease thereof.

Department of
Labor and
Industry.

Section 2. (a) The term "Department," when used in this act, shall mean the Department of Labor and Industry, *and the term "secretary" shall mean the Secretary of the Department of Labor and Industry.*

Definitions.

(b) The term "new," as used in this act, shall mean any article or material which has not been subjected to a previous manufacturing process, or which has not been previously used for any purpose.

(c) The term "secondhand," as used in this act, shall mean any article or material, or portion thereof, of which prior use has been made in any manner whatsoever.

(d) The term "person," as used in this act, shall include persons, partnerships, companies, corporations, and associations.

(e) The term "renovate," as used in this act, shall mean to restore to former condition or to place in a good state of repair.

(f) The term "auction," as used in this act, shall mean a public sale of property or effects conducted upon the principle of the highest bidder becoming the purchaser of any particular article or lot offered for sale.

(g) Wherever in this act the singular is used the plural shall be included, and where the masculine gender is used the feminine and neuter shall be included.

Compliance with provisions of act.

Section 3. (a) No person shall manufacture, offer for sale or lease, or have in his possession with intent to sell, auction, or include in a sale, lease or auction, any new or secondhand article or material covered by this act, unless all provisions of this act have been complied with.

(b) It is intended that the responsibility for compliance with this section, in the case of any article or material imported into the Commonwealth, shall rest upon the vendor, lessor or other person having such article or material in his possession.

Use of secondhand material.

Section 4. (a) No person shall use any secondhand material in the renovation of any article covered by this act, unless, since last used, such secondhand material has been effectively cleansed and sterilized or disinfected by a process approved by the department, and in accordance with the regulations of the department, and such article, if not so cleansed, sterilized or disinfected, shall be returned to

its original owner, and shall not thereafter be offered for sale.

(b) The use of secondhand material previously used in any article covered by the act, shall be prohibited in the manufacture of any article covered by this act other than an article to be returned to its original owner.

Section 5. (a) No secondhand article covered by this act, except upholstered furniture, shall be offered for sale, lease, or auction, or be in the possession of any person with intent to sell, lease, or auction, unless such article, since last used, has been effectively cleansed and sterilized or disinfected by a process approved by the department and in accordance with regulations of the department. Secondhand upholstered furniture shall be so treated when required by the rules and regulations of the department.

Secondhand
articles.

Section 6. (a) No person shall be considered to have qualified to apply an acceptable sterilizing or disinfecting process, as required by the provisions of this act, until such process has been registered with and approved by the department, after which a numbered permit shall then be issued by the department. Such permit shall expire one year from date of issue and shall thereafter be annually renewed at the option of the permit holder, upon submission of proof of continued compliance with the provisions of this act and the regulations of the department. Every person to whom a permit has been issued shall keep such permit conspicuously posted on the premises of his place of business near the sterilizer. Holders of permits to apply sterilization or disinfection shall be required to keep an accurate record of all articles or material which have been sterilized or disinfected, including the date of the same, and name and address of the buyer of each, and such records shall be available for inspection at any time by authorized representatives of the department.

Permits.

Fees.

(b) For all initial permits issued, as required by the preceding section, there shall, at the time of issue thereof, be paid by the applicant to the Department of Labor and Industry a fee of twenty-five dollars (\$25.00). An annual renewal charge of *five dollars (\$5.00)* shall be paid to the same department.

(c) Every application for a sterilizing or disinfecting permit to be held in a state, other than Pennsylvania, shall be approved only after personal inspection of said sterilizer or disinfector by the Secretary of Labor and Industry or his authorized representative. The expenses for such inspections out of the State shall be paid by the applicant.

(d) A sterilization or disinfection permit may be revoked by the Secretary of Labor and Industry upon proof of violation of any of the provisions of this act. A reissue of said permit shall be subject to provisions as set forth for an initial permit.

Articles to be
tagged.

Section 7. (a) Every article containing *only* new material covered by this act shall bear securely attached thereto and plainly visible a substantial white tag of *approved material*, upon which shall be indelibly stamped or printed, in the English language, *the registration number of the manufacturer or vendor and* a statement showing the kind of materials used in filling such article, with approximate percentages when mixed, and with the word NEW clearly printed thereon. When required to be sterilized or disinfected, the number of the permit of the person who sterilized or disinfected such material shall appear thereon.

(b) Every article covered by this act containing secondhand material, or a portion thereof, shall bear securely attached thereto and plainly visible a yellow tag of *approved material* upon which shall be indelibly stamped or printed, in the English language, *the registration number of the manufacturer, vendor or renovator and* a statement showing

the kind of materials used in filling such article, with approximate percentages when mixed, and shall state STERILIZED AND DISINFECTED, with the permit number of the person who performed such work.

(c) The terms used on the tag to describe filling materials shall be restricted to those defined in the regulations of the department, and no trade or substitute terms shall be used.

(d) It shall be unlawful to make any false or misleading statements on the tag required by this section. It shall be unlawful for any person to remove, deface, or alter, or cause to be removed, defaced, or altered, any tag or statement contained thereon. The placing of stamps required in the next succeeding section of this act over any lettering on the tag shall be construed to be defacement of the tag.

(e) The size of the tag required by this section shall be not less than six (6) square inches, and the lettering thereon, covering the statement of filling materials and whether new or secondhand, shall be in plain type not less than one-eighth ($\frac{1}{8}$) inch in height.

Section 8. (a) No person shall sell or lease, or have in his possession with intent to sell or lease, in the Commonwealth of Pennsylvania, any article covered by the provisions of this act, unless there be affixed to the tag required by this act by the person manufacturing, selling, or leasing the same, an adhesive stamp prepared and issued by the department, *except that any person desiring to do so may make application to the secretary on an approved form for a license which, if issued, will relieve him of the requirement that an adhesive stamp be attached to every tag. Each license shall expire one year from the date of issue unless revoked prior thereto.*

Registration.

(b) The department shall register all applicants for stamps or licenses and assign to every such person a registration number,

which thereafter shall constitute his identification record, and said identification shall not be used by any other person. *Each registration shall expire one year from the date of issue unless revoked prior thereto. The annual registration fee for an applicant for stamps shall be five dollars (\$5). The annual registration fee for an applicant for a license shall be twenty-five dollars (\$25).*

(c) Adhesive stamps as provided for by this act shall be furnished by the Secretary of Labor and Industry in quantities of not less than one thousand (1000), for which the applicant shall pay fifteen dollars (\$15.00) for each one thousand stamps. The Secretary of Labor and Industry is hereby authorized to prepare and cause to be printed adhesive stamps, which shall contain a replica of the seal of the Commonwealth, and such other matter as the secretary shall direct.

(D) *Every licensee shall make a report to the secretary every three months. The report shall show the exact number of articles sold in this Commonwealth, or shipped into this Commonwealth, for sale in this Commonwealth by the licensee, which are covered by the provisions of this act during the period covered by the report, and the licensee shall, at the same time, pay to the secretary one and one-half cents ($1\frac{1}{2}\text{¢}$) for each such article. The reports shall be made under oath within thirty days of the expiration of the three month period unless the period is extended by the secretary. Whenever any licensee shall fail to make the report and payment required herein or whenever a report is unsatisfactory, the secretary may cause the books and records of such licensee to be examined for the purpose of determining the correct amount due from such licensee. Any licensee failing to pay any amount found to be due, or the expenses incurred in making the examination, shall forfeit its license and registration.*

Section 9. (a) The Department of Labor and Industry is hereby charged with the *administration and enforcement* of this act, and it is further empowered and its duty shall be to make, amend, alter or repeal general rules and regulations for carrying into effect all the provisions of this act and to prescribe means, methods and practices to make effective such provisions.

Duties of the
Department of
Labor and
Industry.

(b) All places where mattresses, pillows, bolsters, feather beds, and other filled bedding, cushions, or articles of upholstered furniture are manufactured, repaired, or renovated, or where materials for the herein named articles are prepared, or where said articles are offered for sale or lease, or where there is possession with intent to sell or lease, or where sterilizing and disinfecting is performed, shall be subject to inspection by authorized representatives of the department to ascertain whether the requirements of this act and of regulations of the department have been met.

The department, through its officers and employes, is hereby empowered to take samples of materials under the authority of this act and to hold for evidence at a trial for the violations of this act any articles or materials manufactured or offered for sale or lease in violations of this act.

(c) Properly accredited representatives of the department shall have authority to place "off sale" any article or material which is offered for sale or lease, or found in the possession of any person with intent to sell or lease in violation of any of the provisions of law herein set forth. When articles or materials are removed from sale, they shall be so tagged, and such tags shall not be removed except by an authorized representative of the department, after satisfactory proof of compliance with all requirements of this act and of regulations of the department.

(d) The department is also empowered to test samples of materials when requested to do so by any reputable person.

(e) All auctioneers shall be required to be registered in the Department of Labor and Industry, and shall secure thereupon a certificate authorizing the sterilization of articles under the jurisdiction of this act by an approved process. Each certificate at the time of issue thereof shall be subject to a fee of *ten dollars (\$10.00)*, with an annual renewal of *five dollars (\$5.00)*.

(f) An auctioneer's certificate may be revoked by the Secretary of Labor and Industry upon proof of violation of the provisions of this act. A reissue of said certificate shall be subject to provisions set forth for initial certificate.

Proceeds payable
into the General
Fund.

Section 10. (a) All proceeds of the sale of stamps and all fines and other monies collected in the administration of this act shall be payable to the Secretary of Labor and Industry, and when collected shall thereafter be transmitted by him to the State Treasury, through the Department of Revenue.

Prosecutions for
violations.

Section 11. (a) Prosecution for violations of the provisions of this act or of the rules and regulations adopted by the department may be instituted by said department, and shall be in the form of summary proceedings before an alderman, magistrate or justice of the peace. Upon conviction, after a hearing, the penalties herein provided for shall be imposed.

Violations.

Section 12. (a) Any person, who shall be convicted of violation of any of the provisions of this act, or of the rules and regulations established thereunder, shall be sentenced to pay a fine of not less than fifty dollars (\$50.00) or more than one hundred dollars (\$100.00) for each offense, and in default of payment of such fine, to undergo an imprisonment of not less than thirty days for each sep-

Penalties.

arate offense, provided that the term of imprisonment at any one time for total computed offenses shall not exceed six (6) months.

(b) Of all monies collected by the magistrates of cities of the first class and turned over to the department, one-half shall be returned to the treasurer of such cities, and the other half to the General Fund of the Commonwealth of Pennsylvania.

(c) Each mattress, pillow, bolster, feather bed, and other filled bedding, cushion, or article of upholstered furniture manufactured, repaired, or renovated, sold, offered for sale, or leased or possessed with intent to sell or lease, contrary to the provisions of this act or of the rules and regulations established thereunder, shall constitute a separate offense and shall be punishable as provided in clause (a) of this section.

(d) The Secretary of Labor and Industry may revoke any permit issued under the provisions of this act if the person to whom the permit was issued has violated any provisions of this act or of the rules and regulations established thereunder.

Section 13. This act shall become effective and operative immediately upon final enactment.

When effective.

Section 14. It is intended that the various provisions of this act are severable, and if any such provisions are declared to be unconstitutional at any time by courts of authorized jurisdiction, the said action shall not be considered to affect the remainder of the provisions of this act.

Constitutional provisions.

Section 15. The following act, which this act is to replace, approved the fourteenth day of June, one thousand nine hundred and twenty-three (Pamphlet Laws, eight hundred two), entitled "An act relating to mattresses, pillows, bolsters, feather beds, comfortables,

Act of June 14, 1923 (P.L. 802) repealed.

cushions, and upholstered furniture; regulating the making, remaking, renovating, sterilizing, disinfecting, sale, leasing, delivering, and consigning thereof, and the possession thereof with intent to sell, lease, deliver, or consign," and the amendments thereto, are hereby repealed. All other acts or parts of acts inconsistent herewith are hereby repealed.

LAW RELATING TO BEDDING

ARTICLE 1

General Provisions

32-1351. Definitions.

The term "*bedding*" as used in this chapter shall mean any mattress, upholstered spring, comforter, pad, cushion or pillow designed and made for use in sleeping or reclining.

The word "*shoddy*" shall mean any material which has been spun into yarn, knit or woven into fabric and subsequently cut up, torn up, broken up or ground up.

32-1352. Material not to be used in making bedding for sale.

No person shall in the making or remaking of any article of bedding for sale within the State use:

(a) Any material of any kind that has been used by or about any person having an infectious or contagious disease or has formed a part of any article of bedding which has been so used;

(b) Any material known in the cotton waste trade as cotton mill sweeps or shoddy and consisting in whole or part of old or worn clothing, carpets or other fabric or material previously used; or

(c) Any other fabric or material from which shoddy is constructed;

Unless washed or sterilized by a process approved by the State Board of Health.

32-1353. Invoices of material furnished for bedding.

Any person supplying material to a bedding manufacturer shall furnish therewith an itemized invoice of all material so furnished. Each material entering into willowed or other mixtures shall be shown on such invoice. The bedding manufacturer shall keep such invoice on file for one year subject to inspection by any officer of the State Board of Health.

32-1354. Bedding used by diseased person not to be sold.

No person shall sell, offer for sale, deliver or consign for sale, have in his possession with intent to sell, deliver or consign for sale, barter, trade, rent, lease or give away in connection with a sale any article of bedding that has been used by or about any person having an infectious or contagious disease.

32-1355. Sterilization and disinfection of material and of used bedding.

No person shall remake or renovate any article of bedding unless all the material used in such remade or renovated bedding shall first have been thoroughly sterilized and disinfected by a process approved by the State Board of Health. No person shall sell, offer for sale, deliver, consign for sale, have in his possession with intent to sell, deliver or consign for sale, barter, trade, rent, lease or give away in connection with a sale any article of bedding which has been previously used unless such article shall first have been thoroughly sterilized and disinfected by a process approved by the State Board of Health. Any person who receives bedding for renovation, sterilization or storage shall keep attached thereto, from the time such bedding is received, a tag on which is legibly written the date of receipt and the name and address of the owner.

32-1356. Construction as to manufacture from materials furnished by user.

This chapter shall not be construed to prevent a person from making or having made any bedding out of materials furnished by such person for his own use, providing the label required under § 32-1371 is attached.

32-1357. Remodeling or renovation by owner.

The provisions of this chapter shall not apply in cases where a mattress or mattresses are being remodeled or renovated by the owner.

32-1358. Liability of principals and agents.

When construing and enforcing the provisions of this chapter, the act, omission or failure of any officer, agent or other person acting for or employed by any other person, within the scope of his employment or office, shall in every case be deemed the act, omission or failure of both such persons.

ARTICLE 2*Tags and Stamps***32-1371. Tags required on bedding for sale.**

No person shall sell, offer for sale, consign for sale, have in his possession with intent to sell, offer for sale or consign for sale, barter, trade, rent, lease or give away in connection with a sale any article of bedding unless there shall be securely sewed upon the outside thereof a cloth or cloth-back tag as hereinafter provided, approved by the State Board of Health and to which is affixed an adhesive stamp purchased from the South Carolina Tax Commission pursuant to the provisions of § 32-1375, such stamp to be so affixed as not to interfere with the wording on the tag. In the case of all articles of bedding, the sewing of any edge of the tag securely into an outside seam of the article before material used for filling has been placed inside the ticking or cover shall be deemed a compliance with the requirement that the tag be "*securely sewed*" upon the article.

The tag required under this section must be approved by the State Board of Health and may contain the statement that the article of bedding is made in compliance with an act or acts of other states.

32-1372. Statements on tags.

Upon the tag shall be legibly written or printed, in the English language, a description of the material used as the filling of such article of bedding. If none of the

material used as the filling of such article of bedding shall have been previously used the words "Manufactured of new material" shall appear upon the tag, together with the name and address of the maker or vendor thereof.

If any of the material used in the making or remaking of such article of bedding shall have been previously used, the words "Manufactured of previously used material" or "Remade of previously used material", as the case may be, shall appear upon the tag, together with the name and address of the maker or vendor thereof, and also a description of the material used in the filling of such article of bedding.

The word "Manufactured of new material", "Manufactured of previously used material", or "Remade of previously used material", together with the description of the material used as the filling of an article of bedding, shall be in letters not less than one-eighth of an inch in height.

It shall be unlawful to use in such statement concerning any mattress the word "felt" or words of like import if there has been used in filling such mattress any materials which are not felted and filled in layers.

No term of description likely to mislead shall be used on any tag required by this chapter in the description of the materials used in the filling of any article of bedding.

32-1373. Defacement or alteration of label or tag on bedding.

Any person other than a purchaser for his own use who shall remove, deface or alter or shall cause to be removed, defaced, or altered any label or tag upon any article of bedding labeled or tagged under the provisions of this chapter shall be guilty of a violation hereof.

32-1374. Prohibiting sale of bedding not properly tagged.

Any officer of the State Board of Health may order off sale, and so tag, any bedding which is not made and tagged as required by this chapter or which is tagged with a tag containing a statement false or misleading and such bedding shall not be sold until such defect is remedied and an officer of the State Board of Health has reinspected same and removed the off-sale tag.

32-1375. Tax commission to provide and sell stamps.

The South Carolina Tax Commission shall contract for the printing of stamps required by this chapter and shall, upon the application of any person, furnish to such person such stamps, fashioned and formed in accordance with the provisions hereof, in lots not less than two hundred fifty or multiples thereof at a cost of five dollars per two hundred and fifty. State institutions engaged in the manufacture of bedding shall not be required to pay a fee for the stamps.

32-1376. Disposition of proceeds of sale of stamps.

The charges for such stamps shall be paid directly to the South Carolina Tax Commission and when so paid and collected shall be paid into the general funds of the State after the Commission shall have deducted therefrom and paid the cost for the printing of the stamps.

ARTICLE 3*Enforcement***32-1391. State Board of Health to supervise and inspect manufacture or sale.**

Every place where articles of bedding are made, remade or renovated or held for sale, consignment or delivery and material which is to be used in the manufacturing of bedding shall be subject to supervision and inspection by the State Board of Health, which shall

supervise and inspect the manufacture and the sale of articles of bedding.

32-1392. Regulations.

The State Board of Health may make such regulations as may be found necessary for carrying out the provisions of this chapter and may amend or repeal such regulations.

32-1393. Powers of officers inspecting bedding.

If and when any officer of the State Board of Health has reason to believe that any article of bedding sold, ordered for sale, delivered, consigned or possessed with intent to sell, offer for sale, deliver or consign is not correctly labeled as to contents the officer may open such article of bedding to examine the material used in filling it. If the officer after examination of the material used as filling is unable to determine definitely (a) whether the material used as filling is new or has been previously used, (b) whether the material used in filling such article of bedding is of the kind it is stated to be on the label or (c) in the case of feather pillows, whether the feathers used in filling may have been sterilized or not, the officer may seize and hold the article as evidence and examine the purchase invoice or invoices of such material and such other records of the business as are necessary to determine definitely the kind and character of the material used in such articles of bedding.

32-1394. Second-hand or damaged articles; condemnation.

Any officer of the State Board of Health may determine the fitness of any second-hand or damaged article of bedding for sale or sterilization and sale or of any materials intended to be used in manufacturing any article of bedding. The officer of the State Board of Health may condemn and seize any article of bedding or any filling material found to be in violation of this

chapter. The tag to be affixed to any article of condemned bedding or material shall be approved and provided by the State Board of Health. The failure of any person to produce upon demand of any officer of the State Board of Health any article that has been condemned and ordered held is a violation of this chapter.

32-1395. Opportunity to correct insanitary conditions.

Should the State Board of Health find articles of bedding being made, remade or renovated or held for sale, consignment or delivery or material which is to be used in the manufacturing of bedding in other than sanitary condition, the Board shall give the person responsible for this insanitary condition a definite length of time, within the discretion of the Board, not to exceed sixty days, in which to remedy the insanitary condition and in the event of failure to do so on the part of the person responsible therefor, such failure shall become a violation of this chapter.

32-1396. Prosecution for violation.

The State Board of Health may prosecute all violations of this chapter. Should the Board have reason to believe that any person is violating or has violated any provision of this chapter the Board shall prosecute such person therefor.

32-1397. Enforcement by persons generally.

Any person who has reason to believe that this chapter has been or is being violated may present the facts to the sheriff of the county wherein such violation is believed to have occurred and thereupon the sheriff shall investigate the facts and institute a prosecution if he finds reasonable cause to believe that there has been such a violation. Any individual may institute proceedings to enforce this chapter and punish any violation thereof in the county in which such violation occurs.

32-1398. Penalties for violation.

Any person who shall fail to comply with any of the provisions of this chapter shall be guilty of a violation thereof. The unit for each separate and distinct offense in violation of this chapter shall be each article of bedding made, remade, sold, offered for sale, delivered, consigned or possessed with an intent to sell, offer for sale, deliver or consign contrary to the provisions hereof.

Any person who violates any provision of this chapter shall be guilty of a misdemeanor and upon conviction thereof shall be fined not more than one hundred dollars or imprisoned for not more than thirty days.

RULES AND REGULATIONS

*Bedding and Bedding Material;
Sterilization, Labeling and Renovation*

(Filed in the Secretary of State's office June 16, 1949.)

Section 1. Sterilization methods of bedding materials.

The sterilization of bedding and bedding materials shall be in accordance with one of the following methods:

(a) *The dry heat method*: Loose materials or bedding shall be subjected to dry heat at a temperature of 230 degrees F. and maintained at that temperature for at least sixty (60) minutes. Dry heat sterilization apparatus shall be equipped with a suitable recording thermometer and with such control devices as will provide an adequate control of the temperature to be maintained.

(b) *The steam method*: Loose materials or bedding shall be subjected to direct steam under a pressure of 15 pounds per square inch and maintained at that pressure for at least thirty (30) minutes. A gauge for registering the steam pressure inside the sterilizer, and visible from the outside of the sterilizer, and a suitable

recording thermometer shall be provided where steam sterilization is employed.

Section 2. Specifications for dry heat method sterilization.

Bedding or bedding materials to be sterilized by the dry heat method shall be stood on end or placed upon shelves or other open construction with a space of not less than six (6) inches between, or shall be suspended by means of suitable hangers with space of not less than six (6) inches between bedding, or between bedding and floors, ceiling or sidewalls. Shelving for bedding or loose bedding materials shall be of lattice or other open construction.

Section 3. Location of recording thermometer and temperature charts.

The recording thermometer used in either of the above methods shall be located as far as reasonably possible from the source of heat or steam entering the sterilization chamber, and in no event more than one (1) foot above the floor of the chamber. The temperature charts from the recording thermometer, together with entries thereon of the date and bedding or bedding materials sterilized, shall be kept by the person performing such sterilization for a period of at least one (1) year, and shall be available at all times for inspection by the State Board of Health or its agents. The said board or its agents may seal the recording thermometers on sterilization apparatus to prevent tampering or falsification of records, and any unwarranted removal or breakage of such seal shall be a violation of the act under which these regulations are issued.

Section 4. Certificate to be issued; may be revoked.

Satisfactory compliance with these regulations as to sterilization shall be evidenced by a certificate which shall be issued by the State Board of Health to all persons who operate sterilization apparatus for bedding or bedding materials, such certificate of satisfactory compliance to be displayed at all times in a conspicuous place

at the location or place of business where such sterilization is conducted. Such certificate may be revoked or removed without notice by the said Board or its agents upon failure to comply with or maintain the standards set up by these regulations and the act under which these regulations are issued; and such person shall be liable to the penalties provided for violation of the said act and regulations.

Section 5. Labeling.

The labels to be attached to all articles of bedding as provided by the act, shall be furnished by the manufacturer or maker or seller thereof. A white label shall be used on bedding, as defined in the act, which is manufactured of all new materials. A yellow label shall be used on bedding, as defined in the act, that is manufactured or remade of previously used materials. The notation "Contents Sterilized" shall be entered upon such label where sterilization is required by the act.

Section 6. Printing on labels.

All printing on said labels shall be in permanent ink on vellum cloth or a cloth of comparable quality, which shall not flake out when abraded; and exclusive of such portion allowed to affix the tag to the article, the minimum size of the tag shall not be less than six (6) square inches, but may be greater; and shall appear approximately as follows:

DO NOT REMOVE THIS TAG UNDER PENALTY OF LAW	
ALL NEW MATERIAL (or) PREVIOUSLY USED MATERIAL Consisting of (Description of Materials in Clear letters at least $\frac{1}{8}$ inch high)	
Reg. No. (For Use where other states require)	
(Space for Stamp)	Certification is made that the materials in this article are de- scribed in accordance with law.
CONTENTS STERILIZED	
(Name of Manufacturer or Vendor) (Address of Manufacturer or Vendor)	
(Additional Information)	

 Space for Stitching

 (White tags to Read
thus)

 (Yellow tags to Read
thus)

 (Insert this in letters $\frac{1}{4}$
inch high where law re-
quires sterilization of
any part of article.)

 (For use of manufacturer
or vendor)

Section 7. Description of materials used to appear on label.

An accurate and complete description of materials used in the filling of bedding, including the exact number of spring coils in spring units, shall be written or printed in permanent ink in the space provided on the said label.

Section 8. Specifications for cotton filling materials.

Description of cotton filling material used in the manufacture of bedding shall be as follows:

COTTON and/or VIRGIN COTTON and/or STAPLE COTTON: This term shall mean the staple fibrous growth as removed from cottonseed in the usual process of ginning (first cut from seed), containing no foreign material. The presence of the usual amount of leaves, hull, etc., shall not be considered foreign matter. This term shall be shown on the label.

COTTON BY-PRODUCTS: This term shall mean the by-products removed from the various machine operations necessary in the manufacture of cotton yarn

up to but not including the process of spinning, and shall include only the following materials commonly known in cotton-mill terms as (1) cotton comber, (2) cotton card strips, (3) cotton fly and (4) cotton picker.

COTTON LINTERS: This term shall mean the fibrous growth removed from cotton-seed in cotton-oil mills subsequent to the usual process of ginning and shall be so designated on the label.

COTTON WASTE: This term shall mean the by-products removed from the various machine operations necessary in the manufacture of cotton products but not including those grades defined as cotton by-products. Oil mill motes shall be included as cotton waste.

SHODDY: This term shall mean any material which has been spun into yarn, knit or woven into fabric and subsequently cut up, torn up, broken up, ground up or otherwise defabricated and shall be so designated on the label as "Shoddy."

BLENDS OR MIXTURES: When two or more of the above materials are used in a product, they shall be described on the label as required above in the order of their predominance.

COTTON FELT: This term shall be used only when fibres are garnetted or carded and used in layer form. It cannot be used when cotton batting or cotton felt scraps or clippings are stuffed or blown in the same manner as unfelted materials. This term must be followed by a listing of the component materials as required above.

OIL PERCENTAGES: When any filling material contains more than five percent (5%) of oil, it must be described as "oily."

DIRT and/or FOREIGN MATERIAL: When any filling material contains more than five percent (5%) of dirt and/or any other foreign material it shall be described as dirt.

Section 9. All new or previously used material.

Any person supplying material to a bedding manufacturer, within the provisions of the bedding law, shall state in writing, upon the itemized invoice required thereunder whether each item of material is "all new" or "previously used" as defined in the bedding law.

Section 10. Stamps to be sold by South Carolina Tax Commission.

The South Carolina Tax Commission, Columbia, South Carolina, will sell stamps required by the act in lots of not less than 250, or multiples thereof, at a cost of five (\$5.00) dollars per 250. Stocks of labels or stamps previously issued or provided by the State Board of Health or the State Tax Commission under this or previous bedding acts may be used by the purchaser thereof until such stocks are exhausted.

TEXAS STATE BEDDING LAWS and REGULATIONS

RULES AND REGULATIONS CONCERNING
TEXAS STATE BEDDING LAWS

Bulletin No. 5
June 20, 1960

TEXAS STATE DEPARTMENT OF HEALTH
Environmental Health Services
Bedding Division
Austin, Texas

RULES AND REGULATIONS UNDER
THE TEXAS BEDDING ACT
(Senate Bill No. 200 of the 46th Legislature
and All Amendments Thereto)
Art. 4476a V.C.S.

All Regulations promulgated prior to the effective date of these Regulations and in conflict therewith are repealed.

RULE I — *Terms Defined*

As used in these rules, unless the context otherwise specifically requires:

A. The term "Act" means Senate Bill No. 200 of the 46th Legislature and all amendments thereto (Art. 4476a V.C.S.).

B. The terms "rule," "rules," "regulations," and "rules and regulations" mean the Rules and Regulations prescribed by the Department pursuant to Section 5 (a) of the Act.

C. The definition of terms contained in Section 1 (a) of the Act shall be applicable also to such terms when used in rules promulgated under the Act.

D. The terms "tag," "tags," "tagged," and "tagging" mean tag or label required to be on or affixed to bedding products by the Act and Regulations and on which the information required is to appear.

E. The term "bedding" means mattresses, box springs, mattress pads, mattress protectors, quilts, comfortables, pillows, bolsters, feather beds, sofa beds, chair beds, day beds, studio couches, convertible chaise lounges, and any stuffed, filled, or upholstered items made for bedding purposes.

F. The term "second-hand" as defined in the Act does not apply to new materials subjected to manufacturing processes or to new materials which are the by-product of manufacturing processes.

G. The terms "filling," "filling material," and "materials" mean materials used as filling in the manufacture, repair, or renovation of bedding.

RULE II — *General Requirements*

A. These regulations shall apply to all persons, partnerships, corporations, and associations engaged in the business of manufacturing, repairing, renovating, germicidally treating, and selling items of bedding. These regulations do not apply to persons who make, renovate, and germicidally treat bedding for their own use.

B. Each item of bedding shall be tagged in conformity with the requirements of the Act and Regulations. All tags shall be attached at the factory.

C. It shall be unlawful to make any false or misleading statement on the tag required by the Act and Regulations; it shall be unlawful for any person to remove, deface, or alter any tag or statement thereon, or cause the same to be done, for the purpose of defeating the provisions of the Act and Regulations.

D. The terms used on the tag to describe materials used in filling shall be restricted to those defined in the Regulations under the Act.

E. When percentages are required in these Regulations it shall mean percentage by weight in lieu of percentage by volume. Wood frames, metal springs, and parts shall be excluded when calculating percentages.

F. The presence of an innerspring unit in an article of bedding shall be designated on the law tag. Spring unit may be designated as "spring unit," "coil spring unit," etc. as the case may be. Stating the number of coils in a spring unit is permissible and not mandatory. If the number of coils is stated, the statement must be true and correct.

G. If an article of bedding contains more than one kind of material, the percentage of each material shall be clearly stated on the tag.

H. Filling materials in pre-built border constructions used in the manufacture of mattresses and similar bedding products need not be stated on the tag provided the filling material does not exceed ten per cent (10%) of the material in the article to which the border construction is affixed.

I. When the filling material contained in a quilted ticking affixed to the cover of an article of bedding is in excess of ten per cent (10%) of the weight of the entire filling material of the article of bedding, such material shall be designated on the tag and its percentage given.

J. Burlap, muslin, webbing, and tape, when less than ten per cent (10%) of the filling material, need not be stated on the law tag.

K. To allow for unintentional variations, a tolerance or variation not in excess of ten per cent (10%) by weight from the amount stated on the tag shall be allowed.

L. The terms "all," "pure," "100%" or terms of similar import are permitted only if the material is as stated. No tolerance is allowed where such terms are used.

M. Any new stiffening material, such as fiberboard, corrugated fiberboard, wood, or paper when present in an amount exceeding ten per cent (10%) by weight of the entire filling material of an article of bedding shall be designated on the tag and its percentage given.

N. Filling material which has been artificially dyed or colored shall be designated as "colored." The natural color of filling material need not be stated.

O. Any filling material containing more than 5% oil shall be designated on the tag as "oily."

P. The presence of silicates in excess of 5% in any filling material shall be designated on the bedding-law tag as "clay" and the actual percentage thereof contained in the filling material shall be stated on the tag.

RULE III — *Definitions and Designations of Filling Materials*

A. Cotton

1. "Staple cotton" shall mean the staple fibrous growth as removed from the cotton seed in the usual process of ginning (first-cut from the seed) containing no foreign material. The term "cotton" by itself shall not be used.

2. The term "cotton linters" shall be used to designate the fibrous growth removed from cottonseed subsequent to the usual process of ginning. The term "linters" alone shall not be used.

3. The term "cotton by-products" shall be used to designate by-products removed from the various machine operations necessary in the manufacture of cotton yarn up to but not including the process of spinning, and shall include the following materials commonly known in cotton-mill terms as (a) cotton card strips or cotton vacuum strips, (b) cotton comber, (c) cotton fly, and (d) cotton picker; or the by product may be designated by the particular mill term applicable to it, e.g., "cotton card," "cotton comber," "cotton fly," or "cotton picker."

4. The term "mixed cotton" shall mean a mixture of staple cotton, cotton linters, and cotton by-products in any proportion which has not been garnetted or felted.

5. The term "cotton waste" shall mean any material of cotton origin containing more than ten per cent (10%) of hull, leaf, stem, and pulp.

B. Universal Definitions

1. The terms "cards," "strips," or "stripping," preceded by the name of the textile fiber from which it is produced, may be used to designate a tangled or matted mass of fibers produced by or removed from the carding cloth following the carding process.

2. The term "comber," preceded by the name of the textile fiber or fibers from which it is produced, may be used to designate tangled fibers removed during the combing process of

textile fibers.

3. The term "fly," preceded by the textile fiber or fibers from which it is produced, may be used to designate fibers which come off the machines during carding, drawing, or similar textile operations.

4. The term "picker," "picker mote," or "mote," preceded by the textile fiber or fibers from which it is produced may be used to designate matted or tangled masses of fiber resulting from the opening and cleaning of fibers in the opener room of the textile mill.

5. The term "sweepings," preceded by the name of the textile fiber or fibers, shall be used to designate the fibrous sweepings from the floors of the textile mill.

6. The term "noils," preceded by the textile fiber or fibers from which it is produced, may be used to designate the short fibers removed during the combing process.

7. The term "napper," preceded by the textile fiber or fibers from which it is made shall be used to designate the lint removed during the process of raising the face of a cloth.

8. The term "defabricated fibers" means any new material which has previously been made into yarn or fabric and which subsequently has been reduced to a fibrous state. When yarns, threads, and/or fabric shreds are present in excess of five per cent of the entire filling material, the material shall be designated as "shredded clippings."

9. The term "textile by-products" or the name of the specific by-product, unless otherwise provided for in these rules, may be used to designate any of the fibrous by-products produced during the processing of textile fibers up to but not including the spinning of yarns.

C. Wool

1. The term "wool" and/or "virgin wool" shall mean the fleece of the sheep or lamb, which has been scoured or scoured and carbonized. It shall not be the by-product of any process of manufacture nor shall it have sustained prior use. It shall be free from kemp and vegetable matter.

2. The term "wool by-products" shall be used to designate the following by-products: "wool drawing lap\$,," "wool card waste," "wool card strips," "wool doffer waste," removed from the various machine operations necessary in the manufacture of wool yarn up to but not including the process of spinning; or the

by-product may be designated by the particular mill term applicable to it, e.g., "wool drawing laps," "wool card waste," "wool card strips," "wool doffer waste."

3. The term "wool waste" shall embrace all by-products and wastes of machines in any process of manufacture employing only new wool fibers except as set forth under "wool by-products" and shall also include wool pills and shank and tag wools.

4. The term "tanners wool" shall be applied to wool reclaimed from tanned sheepskin.

5. Mixtures of any of the following: "wool," "wool by-products," "wool wastes," or "tanners wool" shall be designated on the tag by the particular terms applicable to each of the constituents present in the mixture expressed in percentages, or the mixture may be designated as "blended wool."

6. Materials which contain at least ninety-five per cent (95%) wool shall be considered wool.

D. Hair

1. The term "hair" means the course filamentous epidermal outgrowth of such mammals as horses, cattle, hogs, and goats. When used in the manufacture of upholstered furniture, bedding, or filling material, it shall be clean, properly cured, free from epidermis, excreta, or foreign or objectionable substances or odors. The classifications of "hair" are as follows: "horse hair," "cattle hair," "hog hair," and "goat hair."

2. When hair of different origins is used in a blend, the kind and percentage by weight of each shall be stated on the tag.

3. When any material of whatever origin other than hair is used in a mixture or blend with hair, the kind and percentage by weight of each such material shall be designated on the tag.

4. When hair has been curled, the kind of hair shall be stated preceded by the word "curled," e. g. "curled horse hair," "curled cattle hair."

5. Curled hair which has been placed in pad form and rubberized shall be stated on the tag as "rubberized curled hair pad."

6. When hair is rubberized or resin-treated, it shall be so designated on the tag. The percentage of rubber need not be stated on the tag. When rubberized hair is shredded, it shall be termed "shredded rubberized hair." The use of the term "curled" is not permitted in connection with shredded hair.

E. Feathers and Down

1. The term "down" by itself may be used for the soft undercoating of water-fowl, consisting of the light fluffy filaments

grown from one quill-point but without any quill-shaft. It is permitted, however, to set forth on the tag the name of the fowl from which the down is obtained, such as "goose down," "duck down," etc. The presence of loose down fibers in excess of ten (10%) shall be designated as "down fibers."

2. The term "goose feathers" shall be used to designate feathers of any kind of goose, which are whole in physical structure, with the natural form and curvature of the feather.

3. The term "duck feathers" shall be used to designate feathers of any kind of duck, which are whole in physical structure, with the natural form and curvature of the feather.

4. The term "water-fowl feathers" may be used to designate any mixture of goose and duck feathers.

5. The term "turkey feathers" shall be used to designate feathers of any kind of turkey, which are whole in physical structure.

6. The term "chicken feathers" shall be used to designate feathers of any kind of chicken, which are whole in physical structure.

7. The term "feathers" shall not be used alone.

8. The term "feathers," by itself does not include crushed or chopped quill feathers, or stripped, chopped, crushed, or broken feathers, or feather fibers.

9. Broken feathers in excess of the amount allowed as tolerance by these Rules shall be designated on the tag and the name to the feathers shall be stated, e. g., "broken chicken feathers."

10. The term "chopped feathers" in conjunction with the name of the fowl from which the feathers came shall be used to designate feathers which have been processed through a chopping machine which has cut the feathers into small pieces, e. g., "chopped duck feathers." The term "chopped feathers" shall not be used alone.

11. The term "crushed feathers" in conjunction with the name of the fowl from which the feathers came shall be used to designate feathers which have been processed through a so-called curling machine which has changed the original form of the feathers, but has not removed the quill, e. g., "crushed duck feathers." The term "crushed feathers" shall not be used alone.

12. The term "stripped feathers" in conjunction with the name of the fowl from which the feathers came shall be used to designate feather barbs stripped from the main stem or quill but not to the extent of separating the barbs into feather fiber, e. g.,

"stripped goose feathers." The term "stripped feathers" shall not be used alone.

13. The term "feather fibers" in conjunction with the name of the fowl from which the fibers came shall be used to designate any barbs of feathers separated by any process from the quills, but free from the quills, e. g., "chicken feather fibers."

14. "Quill" shall mean the main shaft or axis of a feather and "quill feather" shall mean a flight feather or tail feather.

15. Feather mixtures shall be designated by the name, character, and percentage of each material used or the entire mixture shall be designated by the name of the lowest grade of material used. The grades of materials in descending order are as follows: goose down, duck down, goose feathers, duck feathers, turkey feathers, chicken feathers.

F. Manufactured Fibers (Synthetic Fibers)

"Synthetic fibers" means manufactured fibers as opposed to natural fibers from animal, fowl, or plant origin. Generic terms for manufactured fibers may be used in lieu of the term "synthetic fibers." The generic terms for manufactured fibers defined in Rule 7 of the Federal Trade Commission Rules and Regulations under the Textile Fiber Products Identification Act (Public Law 85-897, 85th Congress, Second Session, H.R. 469) may be used. If generic terms are used, they must be true and correct.

G. Rubber and Foam

1. The term "rubber" as used in these regulations shall apply to synthetic rubber as well as natural rubber.

2. "Latex foam rubber" means foam products made from rubber latex which previously has not been coagulated or solidified.

3. "Sponge rubber" means sponge products made from rubber which has previously been coagulated or solidified.

4. "Synthetic foam" means a polymerized cellular material made from an organic base other than rubber. Generic terms together with the word "foam" may be used in lieu of the term "synthetic foam." If generic terms are used, they must be true and correct, e. g., "urethane foam," "polystyrene foam," "vinyl foam."

5. When any one of the materials defined in Rule III, Sections G(2), G(3), and G(4) above are cut or broken into pieces of indefinite size, they shall be further defined as "pieces," e. g., "latex foam rubber pieces," "synthetic foam pieces," "urethane foam pieces."

6. When any one of the materials defined in Rule III, Sections

G(2), G(3), and G(4) above have been shredded, they shall be further defined as "shredded," e. g., "shredded sponge rubber," "shredded synthetic foam," "shredded polystyrene foam."

7. When any one of the materials defined in Rule III, Sections G(2), G(3), and G(4) above have been molded into the form in which they are intended to be used, they may be further defined as "molded," e. g., "molded sponge rubber," "molded latex foam rubber," "molded synthetic foam," "molded vinyl foam."

8. When any one of the materials defined in Rule III, Sections G(2), G(3), and G(4) above have been either cut or broken into pieces of indefinite size or subjected to a shredding process and subsequently cemented together, whether or not this is done in a mold, the resulting product shall be further defined as "cemented." The term "molded" shall not be used, e. g., "cemented sponge rubber pieces," "cemented shredded latex foam rubber," "cemented shredded synthetic foam," "cemented shredded urethane foam."

H. Miscellaneous Filling Materials

1. "Cat-tail plant fibers," shall be so designated on the tag.

2. The term "coconut husk fiber" or "coir" shall be used to designate the fibrous material obtained from the husk or the outer shell of the coconut.

3. The term "jute" by itself shall not be used.

4. The term "jute fibers" shall be used to designate jute of which no prior use has been made.

5. The term "jute pad" may be used to designate a pad made from jute fibers.

6. The term "jute shoddy" shall be used to designate reclaimed used cordage or other used jute material which has been fabricated and used for baling or other purposes.

7. The term "kapok" shall be used to designate the fibers obtained from the seeds of the kapok tree. The use of the term "silk floss" is prohibited.

8. The term "sisal fibers" shall be used to designate sisal of which no prior use has been made.

9. The term "sisal pad" may be used to designate a pad made from sisal fibers.

10. The term "palm fibers" shall be used to designate the fibrous material obtained from the leaf of the palm, palmetto, or palmyra tree.

11. The term "sea grass" shall be used to designate any of the materials obtained from maritime plants or sea-weeds.

12. Tampico fibers when curled shall be designated as "curled tampico fibers."

13. The term "cellulose," "cellulose fiber," or "cellulose," shall be used to designate cellulosic products containing not more than four per cent (4%) lignin and twelve per cent (12%) pentosans.

14. The term "wood fiber pad" shall be used to designate a pad made of cellulose fiber containing more than four per cent (4%) lignin or twelve per cent (12%) pentosans.

15. Pads made from "cellulose" may be designated as "cellulose fiber pads."

16. The term "steel wool pads" is not permitted. When passed through some form of garnetting machine and carded in layers or sheets, steel fibers may be designated as "steel batting" or "steel fiber pads." When not garnetted, they shall be designated as "steel fibers."

17. The presence of paper in an article of bedding in lieu of other filling material shall be designated on the tag.

18. The use of the term "excelsior" is permitted to designate curled wood shreds. The term "wood wool" is prohibited.

19. A pad made of curled wood shreds shall be designated "excelsior pad."

RULE IV — *Felt*

A. "Felt" means material that has been carded in layers or sheets by a garnett or felting machine.

B. "Felt" does not include felt scraps or repicked felt.

C. The term "felt" or "felted" by itself shall not be used but shall be combined with the name of the material from which it is made. The use of the term "batting" instead of "felt" is permissible, e. g., "blended cotton felt," "jute felt," "wool batting."

D. Felt made of "mixed cotton" (Rule III, Section A(4) may be designated on the tag as "blended cotton felt." Stating the percentages of component materials in "blended cotton felt" is permissible but not mandatory. If percentages of component materials in "blended cotton felt" are stated, it must be a true and accurate statement preceded by the term "blended cotton felt."

E. Felt made entirely of staple cotton shall be designated as "staple cotton felt."

F. Felt made from "blended wool" (Rule III, Section C(5) may be designated on the tag as "blended wool felt."

G. Felt impregnated with vinyl or any other resin shall be de-

fined as designated on the tag with the words "resin-treated" preceding the name of the material from which the felt is made, e.g., "resin-treated blended cotton felt."

RULE V — *Tags*

A. The tag required by Section 2(b) of the Act shall be known as the "All New Material Tag."

B. The tag required by Section 2(c) of the Act shall be known as the "Second-Hand Material Tag."

C. The tag required by Section 2(d) of the Act shall be known as the "Renovate Tag."

D. The tag required by Section 4(c) of the Act shall be known as the "Germicidal Treatment Tag."

E. Tags shall be printed on substantial white cloth tag material or a material of equal quality. Tag material must be of substantial quality and must have Departmental approval.

F. Tags shall be securely attached where clearly visible. The "Germicidal Treatment Tag" shall be securely attached with a wire and lead seal unless both the manufacturing and germicidal treatment is performed by the same person, in which case, germicidal treatment tags may be securely sewn to articles of bedding. All other tags required by the Act and Regulations shall be securely attached by sewing, tacking, or by any other method approved by the Department. All tags must be attached where the information contained thereon is visible.

G. The "All New Material Tag" shall not be less than six (6) square inches in size; all other tags required by the Act and Regulations shall not be less than twelve (12) square inches in size.

I. Tag forms approved in Texas are as follows:

1. The "All New Material Tag"

This tag shall be printed in black ink on a white background and shall not be less than six (6) square inches in size.

RULE VI — *Germicidal Treatment*

A. A person shall not sell, offer for sale, or include in a sale any article of second-hand bedding or any article of bedding manufactured in whole, or in part, from second-hand material, unless such bedding has been germicidally treated and cleaned by a method approved by the Department. Upholstered sofa beds and studio couches are exempt from germicidal treatment unless they, or the materials used in their manufacture, are filthy, harbor loathsome insects or pathogenic bacteria, or have been used by a person with an infectious or contagious disease.

B. A person shall not use in the manufacture of bedding any material which (1) has been used by a person with an infectious or contagious disease, (2) or which is filthy, (3) oily, (4) or harbors loathsome insects and pathogenic bacteria, unless such material is cleaned and germicidally treated by a process or treatment approved by the Department.

C. The following are approved methods of germicidal treatment:

1. Steam

All materials to be germicidally treated shall be subjected to treatment by steam under a pressure of fifteen (15) pounds maintained for thirty (30) minutes or a pressure of twenty (20) pounds maintained for twenty (20) minutes.

Alternate method: Two (2) applications of streaming steam, maintained for a period of one (1) hour each, to be applied at intervals of not less than six (6) nor more than twenty-four (24) hours will be accepted as an alternate for steam under pressure.

A gauge for registering steam pressure, visible from the outside of the room or chamber, shall be provided where steam under pressure is used and valved outlets shall be provided near the bottom and also the top of the room in cases where streaming steam is employed.

2. Dry Heat

A minimum temperature of two hundred thirty (230) degrees Fahrenheit, held for a period of one (1) hour, within a closed container is considered satisfactory for proper germicidal treatment. This method is not recommended for furniture.

3. Washing and Drying

a. Pillows: Feather pillows will be considered as having been germicidally treated when the feathers and ticking are kept intact without opening, and washed by a commercial laundry method with subsequent drying to remove moisture.

b. Mattresses: Hair mattresses will be considered as having been germicidally treated when the hair is removed from the ticking and washed by a commercial laundry method and subsequently dried to remove all moisture, and where the ticking is washed and subsequently dried.

4. Other Methods

Any other method of germicidal treatment may be used in germicidally treating bedding and materials, provided it has first been approved by the Department.

D. Germicidal treatment devices shall be properly housed to afford protection to the device and to allow for adequate working space around the device. Adequate space shall be provided for storage and segregation of treated and untreated bedding and materials. All rooms shall be clean, and germicidal treatment devices shall be cleaned and maintained in good repair and proper working condition.

E. Dry-heat germicidal treatment devices shall be equipped with recording clocks that will accurately record time and temperature. Recording clocks shall be attached to the outside of the chamber where they can be easily observed. The heat bulb of the recording clock shall be installed at the farthest point practical in the chamber from the entry of heat.

F. All dry heat chambers and automatic circulating heat devices shall be constructed to maintain equal and uniform temperatures in all sections of the chamber.

G. All articles of bedding and materials shall be spaced within the germicidal treatment chamber to allow for not less than four (4) inches on all sides of each article for full circulation of heat or air.

H. When articles of bedding are manufactured in whole or in part from second-hand material and germicidally treated by the dry heat method as herein approved, the application of the dry heat germicidal treatment shall be subsequent to the manufacturing process.

I. Accurate records shall be kept by the operator of the germicidal treatment device, and such records shall show the following information concerning each article treated.

1. Date germicidally treated
2. Lot number (chart number)
3. Tag number (article number)
4. Length of time treated (time of day in chamber)
5. Name and address of person for whom treated and/or source of material
6. Name and address of buyer, if any

J. Recording charts from recording clocks shall be kept as part

of the operator's record for a period of not less than two years. All records and charts and/or information thereon shall be available to the Department.

RULE VII — *Sanitary Premises* (Section 10 of Act)

Every person engaged in the business of manufacturing, repairing, or renovating bedding shall keep his place of business in a sanitary condition by complying with the rules that follow.

A. Adequate housing and floor space shall be provided to prevent crowding of materials and equipment and to allow for the practice of cleanliness and sanitation.

B. All work rooms shall be well ventilated, and high dust counts, odors, and stale air shall not be permitted. Any dust in excess of fifty (50) millions of particles per cubic foot of air shall be regarded as excessive. Dust control measures may include the housing or partitioning of dust producing machinery from other work rooms and the installation of metal hoods and extraction fans over dust producing machinery.

C. All work rooms shall be well lighted. Industrial lighting standards established by the American Standards Association may be used as a guide.

D. The floors of all rooms in which materials are stored, processed, or otherwise used in the manufacturing or renovating of bedding, shall be of such construction as to be easily cleaned, shall be smooth, and shall be kept clean and in good repair.

E. Walls and ceilings of all rooms where materials are stored, processed, or otherwise used in the manufacturing or renovating of bedding, shall be of tight, smooth construction, shall be painted, and kept clean and in good repair; cracks or recesses which would tend to harbor vermin and bacteria shall not be allowed.

F. All buildings, rooms therein, and immediate surroundings shall be kept in neat and clean condition. All rooms and surroundings shall be free of rubbish, trash, discarded equipment, or other unnecessary articles which may promote insanitary conditions.

G. There shall be no living quarters in the rooms; or opening directly into the rooms where materials are stored, processed, or otherwise used in the manufacturing or renovating of bedding.

H. Clean toilet facilities of a type acceptable to the Department shall be provided. Departmental requirements shall be in conformity with Occupational Health Regulation No. 2, subsection V., approved by the State Board of Health June 17, 1957.

I. Adequate and clean hand washing facilities shall be provided.

One lavatory (wash basin) with adequate and acceptable water supply shall be provided for every twenty (20) employees or portion thereof up to one hundred (100) persons and one lavatory (wash basin) for each additional twenty-five (25) persons or portion thereof. Soap or a suitable cleaning agent shall be provided at each lavatory.

J. A water supply and drinking fountain acceptable to the Department shall be provided. Paper cups with dispenser may be used instead of a fountain. The common drinking cup is prohibited.

RULE VIII – *Permits* (Section 6 of Act)

A. A person shall not engage in the business of manufacturing, repairing, and selling bedding unless he has obtained an authorizing permit from the Department.

B. A person shall not germicidally treat bedding unless he has obtained an authorizing permit from the Department.

C. Permits required by the Act and Regulations must be renewed annually (one year from issue date).

D. The initial permit issued to a person under the provisions of Rule VIII, Section A., above, shall be known as "Initial Bedding Permit." The initial permit issued to a person under the provisions of Rule VIII, Section B., above, shall be known as "Initial Germicidal Treatment Permit."

E. Permits issued subsequent to initial permits as provided in Rule VIII, Section D., above, but on or before the expiration date of said permits, shall be known as "Renewal Bedding Permit" and "Renewal Germicidal Treatment Permit."

F. Permit fees are as follows:

Initial Bedding Permit	\$15.00
Renewal Bedding Permit	\$10.00
Initial Germicidal Treatment Permit	\$15.00
Renewal Germicidal Treatment Permit	\$10.00

G. Persons who do not renew previously assigned permits by paying renewal fees on or before expiration date shall be required to comply with the requirements for obtaining initial permits.

RULE IX – *Adhesive Revenue Stamps*

A. A person shall not manufacture, renovate, and/or sell, or have in his possession with intent to sell, any bedding unless there be affixed to the tag required by the Act and Regulations an adhesive stamp prepared and issued by the Department. Adhesive stamps shall be affixed to tags by the person manufacturing, renovating, selling, or germicidally treating items of bedding.

B. Adhesive revenue stamps are valued at 1¢ each and shall be issued to authorized permit holders by the Department in multiples of 500. The smallest quantity of stamps which can be issued is 500 for \$5.00.

C. Persons applying for initial permits shall also purchase not less than 500 adhesive stamps unless the applicant has stamps on hand as the result of a previously assigned permit.

RULE X — *Identification of Materials*

A. Persons engaged, in the manufacture, repair, and renovation of bedding shall keep new and second-hand materials segregated and identified; when new and second-hand materials are mixed, the entire mixture shall be regarded as second-hand.

B. Persons engaged in the manufacture, repair, renovation, and/or germicidal treatment of bedding shall tag, label, or mark all second-hand bedding and materials prior to manufacture, renovation, or germicidal treatment to show name and address of owner and reason for possession.

TEXAS BEDDING ACT
Art. 4476a, V.C.S.

Definitions

Section 1. (a) The term "bedding," as used in this Act shall mean mattresses, mattress pads, mattress protectors, pillows, bolsters, feather beds, quilts, comfortables, sofa beds, studio couches, box springs and other filled bedding of any description.

(b) The term "department," when used in this Act, shall mean the Texas State Department of Health.

(c) The term "person," as used in this Act, shall include persons, partnerships, companies, corporations and associations.

(d) The term "renovate," as used in this Act, shall mean to restore to former condition or to place in good state of repair.

(e) The term "materials" as used in this Act, shall mean all articles, materials or portions thereof, used as filling in the manufacture, repair or renovation of bedding.

(f) The term "new," as used in this Act, shall mean any article or material which has not been previously used for any purpose.

(g) The term "second-hand," as used in this Act, shall mean any article or material or portion thereof, of which former use has been made in any manner whatsoever.

(h) Wherever in this Act the singular is used, the plural shall be included; and where the masculine gender is used, the feminine and neuter shall be included. As amended Acts 1949, 51st Leg., p. 918, ch. 497, § 1.

Labeling of Bedding Required

Sec. 2 (a) No person shall manufacture, repair, renovate or sell, or have in his possession with intent to sell, any article of bedding, unless there is securely attached, where clearly visible, a white tag, made of substantial cloth or a material of equal quality, as provided in this Act. All tags required by this Section shall be attached at the factory.

(b) Bedding manufactured in whole from all new material shall have attached a tag not less than six (6) square inches in size upon which shall be plainly stamped or printed, in black ink, in the English language, the statement "All New Material" in lettering not less than one-eighth (1/8) inch in height; the kind and grade of each material used in the filling, expressed in percentages by weight when more than one kind or grade of material is used; and the manufacturer's permit number, assigned by the Department.

(c) Bedding manufactured in whole, or in part, from second hand material shall have securely attached a tag not less than twelve (12) square inches in size upon which shall be plainly printed in red ink, in the English language, the statement "Second Hand Material" in lettering not less than one-fourth ($\frac{1}{4}$) inch in height and the manufacturer's permit number assigned by the Department. The provisions of this paragraph (c) of Section 2 are not intended to apply to bedding reworked, repaired or renovated for the owner for his own use.

(d) Bedding renovated, reworked or repaired for the owner, for the owner's use, from the owner's material, which is in whole or in part second hand, shall have attached a tag not less than six (6) square inches in size, upon which shall be plainly printed in black ink, in the English language, the statement "Not for Sale, Owner's Own Material which is Second Hand Material" in lettering not less than one-eighth ($\frac{1}{8}$) inch in height; the name and address of the owner; and the manufacturer's permit number assigned by the Department.

(e) The terms used on the tag to describe kinds and grades of materials used in filling shall be restricted to those defined in the regulation of the Department, and no trade or substitute terms shall be used.

(f) It shall be unlawful to make any false or misleading statements on the tag required by this Section. It shall be unlawful for any person to remove, deface, alter or cause to be removed, defaced or altered, any tag or statement contained thereon for the purpose of defeating any of the provisions of this Act. The placing of registration stamps required in Section 7 of this Act over any lettering on the tag shall be construed to be defacement of the tag. As amended Acts 1955, 54th Leg., p. 578, ch. 192, § 1; Acts 1959, 56th Leg., p. 126, ch. 74, § 1.

Use of materials from dump-grounds and hospitals

Sec. 3. No person shall manufacture, repair or renovate into bedding or batting, using discarded materials obtained from dump-grounds, junk yards, or hospitals within or without the State of Texas.

Germicidal treatment of bedding and materials

Sec. 4. (a) No person shall sell, offer for sale or include in a sale any article of secondhand bedding or any article of bedding manufactured in whole or in part from secondhand material, except sofa beds and studio couches, unless such bedding has been germicidally treated and cleaned, by a method approved by the Department.

Upholstered sofa beds and studio couches shall be germicidally treated and cleaned only when required by the Rules and Regulations of the Department.

(b) No person shall use in the manufacture, repair and renovation of bedding any material which has been used by a person with an infectious or contagious disease, or which is filthy, oily or harbors loathsome insects or pathogenic bacteria, unless such material is cleaned and germicidally treated by a process or treatment approved by the Department.

(c) No person shall sell, or offer for sale or include in a sale any material or bedding requiring germicidal treatment by this Act unless there is securely attached, by a method approved by the Department, by the person applying the germicidal treatment, a white tag not less than twelve (12) square inches in size, made of substantial cloth or a material of equal quality, upon which shall be plainly printed, in black ink, in the English language, a statement showing that the article or material has been germicidally treated by a method approved by the State Health Department, the method of germicidal treatment applied, the lot number and the tag number of the article germicidally treated, the name and address of the person for whom germicidally treated, and the permit number of the person applying germicidal treatment. As amended Acts 1955, 54th Leg., p. 578, ch. 192, §1-a.

Enforcement of Act

Sec. 5. (a) The Department is hereby charged with the enforcement of this Act, for the protection of the public health and the public welfare. It is further empowered, and its duty shall be to make, amend, alter or repeal general rules and regulations of procedure for carrying into effect all the provisions of this Act, and to prescribe means, methods, and practices to make effective such provisions.

(b) No person shall interfere, obstruct, or hinder an authorized representative of the Department in the performance of his duty as set forth in the provisions of this Act.

(c) The Department, through its authorized representative, shall have the authority to enter any place or establishment where bedding is manufactured, repaired, renovated, stored, sold, offered for sale, or where materials are prepared for use in bedding, or where germicidal treatment of bedding is performed, for the purpose of ascertaining whether the requirements of this Act and the regulations of the Department have been met.

(d) The Department, through its authorized representative, is empowered to take samples of materials for inspection and analysis, and to hold for evidence, at a trial, for the violation of this Act any article of bedding or materials manufactured, repaired, renovated, sold or offered for sale, in violation of this Act.

(e) The Department, through its authorized representative, shall have authority to place "Off-Sale" any article of bedding or material which is offered for sale, or which could be offered for sale, in violation of this Act. When articles of bedding or materials are removed from sale, they shall be so tagged; and such tags shall not be removed except by an authorized representative of the Department, or as the Department may direct, after satisfactory proof of compliance with all requirements of this Act and of the regulations of the Department and after a "Release for Sale" has been issued by the Department through its authorized representative.

(f) The violation of a general rule or regulation of procedure promulgated under this Act shall be deemed to be a violation of this Act.

(g) If any party at interest be dissatisfied with any act, order, ruling or decision of the State Department of Health in connection with the administration of this Act, such party may file an action, naming the State Department of Health as defendant, in any of the District Courts of Travis County to set aside the particular act, order, ruling or decision. The cause shall be tried by the court without a jury in the same manner as civil actions generally and all fact issues material to the validity of such act, order, ruling or decision shall be re-determined in such trial on the preponderance of the competent evidence but no evidence shall be admissible which was not either tendered to the State Department of Health or in its files while the matter was pending before the Department for decision. The burden of proof shall be on the plaintiff and judgment shall be entered by the court declaring the action, order, ruling or decision in question either valid or invalid. Appeals from any final judgment may be taken in the manner provided for in ordinary civil actions generally. No appeal bond shall be required by the State Department of Health. All acts, orders, rulings and decisions of the State Department of Health shall be final unless an action to set aside as herein authorized is filed within thirty days after the action, order, ruling or decision is taken or made by the State Department of Health. As amended Acts 1959, 56th Leg., p. 126, ch. 74, § 2.

Permits

Sec. 6. (a) No person shall engage in the business of manufacturing, repairing, renovating, and selling any bedding unless he shall have obtained a permit from the Department.

(b) No person shall be considered to have qualified to apply an acceptable germicidal process until such process has been registered with and approved by the Department, after which a numbered permit shall then be issued by the Department. Such permit shall expire one year from date of issue and shall thereafter be annually renewed at the option of the permit holder upon submission of proof of continued compliance with the provisions of this Act and the regulations of the Department. Every person to whom a permit has been issued shall keep such permit conspicuously posted on the premises of his place of business near the treatment device. Holders of permits to apply germicidal treatment shall be required to keep an accurate record of all materials which have been subjected to germicidal treatment, including the source of material, date of treatment, and name and address of the buyer of each, and such records shall be available for inspection at any time by authorized representatives of the Department.

(c) For all initial permits issued, as required by the preceding paragraph (a) of this Section, there shall, at the time of issuance thereof, be paid by the applicant to the Department a fee of Fifteen (\$15.00) Dollars. An annual renewal charge of Ten (\$10.00) Dollars shall be paid to the same Department.

(d) For all initial permits issued, as required by the preceding paragraph (b) of this Section, there shall, at the time of issuance thereof, be paid by the applicant, to the Department, a fee of Fifteen (\$15.00) Dollars. An annual renewal charge of Ten (\$10.00) Dollars shall be paid to the same Department.

(e) Any permit issued in accordance with the provisions of this Act may be revoked by the Commissioner of Health, after a hearing and upon proof of violation of any of the provisions of this Act.

Registration for Selling

Sec. 7. (a) No person shall manufacture, renovate, sell or lease or have in his possession with intent to sell or lease in the State of Texas, any bedding covered by the provisions of this Act, unless there be affixed to the tag required by this Act by the person manufacturing, renovating, selling or leasing the same, an adhesive stamp prepared and issued by this Department.

(b) The Department shall register all applicants for stamps and assign to every such person a registry number and/or separate and different serial numbers to be printed on each stamp as a means of identifying the applicant and the stamps issued thereto, and said identification shall not be used by any other person.

(c) Adhesive stamps as provided for by this Act shall be furnished by the Department in quantities of not less than five hundred (500), for which the applicant shall pay at the rate of Five Dollars (\$5.00) for each five hundred (500) stamps. The Department is hereby authorized to prepare and cause to be printed, adhesive stamps which shall contain a replica of the Seal of the State of Texas, the registry number and/or serial numbers assigned by the Department, and such other matter as the Department shall direct. As amended Acts 1955, 54th Leg., p. 578, ch. 192, § 2.

Proceeds placed in general fund

Sec. 8. All moneys obtained from the sale of stamps, fees and other moneys collected in the administration of this Act shall be payable to the Department, and when collected shall thereafter be transmitted to the State Treasury and be placed in the General Fund and be appropriated out in such amounts that may be deemed necessary by the Legislature. In the administration of this enactment the Regular Departmental Appropriation Bill will be adopted.

Expenditure of moneys

Sec. 8c. The expenditure of any moneys under this Act shall never exceed the amount of money obtained from the collection of money required by any fee, permit, license or registration required by the provisions of this Act.

Penalties

Sec. 9. Every person who violates any of the provisions of this Act and the rules and regulations established thereunder, is guilty of a misdemeanor and punishable for each offense by a fine of not less than Fifty Dollars (\$50.00) and not more than Two Hundred Dollars (\$200.00). As amended Acts 1949, 51st Leg., p. 918, ch. 497, § 5.

Sanitary premises

Sec. 10. Every bedding manufacturer or renovator shall keep his place of business in a sanitary condition satisfactory to the Health Department, and failure to do so shall be sufficient cause to revoke his permit.

Exceptions

Sec. 11. The provisions of this Act shall apply to all bedding manufactured, repaired, renovated and/or sold after the effective date hereof; but the same shall not apply to bedding; which has been manufactured, repaired or renovated prior to the effective date hereof. Acts 1939, 46th Leg., p. 376.

Unconstitutionality

Sec. 12. If any section, subsection, sentence, clause, phrase or word of this Act is, for any reason, held to be unconstitutional, such decree shall not affect the validity of any remaining portion of this Act.

STATE OF UTAH

BEDDING AND UPHOLSTERED FURNITURE INSPECTION ACT

LAWS OF UTAH
1959

AMENDED
1961

RULES AND REGULATIONS 1964

UTAH STATE
BOARD OF AGRICULTURE

BEDDING AND UPHOLSTERED FURNITURE INSPECTION ACT

4-28-1. Title of Act.

This act shall be known and may be cited as the "bedding and upholstered furniture inspection act."

4-28-2. Definitions.

As used in this act:

(1) The word "person" means individual, copartnership, association, firm, auctioneer, trust, and corporation, and the agents, servants and employees of any of them.

(2) The word "sell" or any of its variants, includes any of, or any combination of, the following: sell, offer or expose for sale, barter, trade, deliver, give away, rent, consign, lease, possess with intent to sell or dispose of in any other commercial manner; but does not include any judicial, executor's, administrator's, or guardian's sale, or any insolvency or bankruptcy sale, or any sale for charitable or benevolent purposes. The possession of any article of bedding, furniture or filling materials, as herein defined, by any maker, or dealer, or his agent or servant in the course of business, shall be presumptive evidence of intent to sell.

(3) The word "bedding" means any quilted pad, packing pad, mattress pad, hammock pad, mattress, comforter, quilt, sleeping bag, box spring, studio couch, pillow or cushion made of leather, cloth or any other material, which is stuffed or filled in whole or in part with concealed material, which can be used by any human being for sleeping or reclining purposes.

(4) The words "upholstered furniture" mean any furniture, including children's furniture, movable or stationary, which is made or sold with cushions or pillows, loose or attached, or is itself stuffed or filled in whole or in part with any material, hidden or concealed by fabric or any other covering, including cushions or pillows, belonging to or forming a part thereof, together with the structural units, the filling material and its container and its covering which can be used as a support

for the body of a human being, or his limbs and feet when sitting or resting in an upright or reclining position.

(5) The words "filling material" mean cotton, wool, kapok, feathers, down, hair, or any other material, or any combination thereof, loose or in batting, pads, or any other prefabricated form, concealed or not concealed, to be used or that could be used in articles of bedding or upholstered furniture.

(6) The word "new" means any article or material which has not been previously used for any purpose.

(7) The words "second-hand" mean any article or material, or portion thereof, of which prior use has been made. Any article of bedding is second-hand, if it contains any second-hand material in whole, or in part.

(8) The words "manufacture," "making," "make," or "made" include altering, repairing, finishing, or preparing articles of bedding or upholstered furniture or filling material for sale, made out of either new or second-hand material.

(9) The word "shoddy" means garnetted or shredded clippings when made in whole or in part from old or worn rags, clothing or second-hand fabrics.

(10) The word "department" means the State Department of Agriculture of the State of Utah.

(11) The word "manufacturer" means a person who, either by himself or through employees or agents, makes for the purpose of sale any article of upholstered furniture or bedding in whole or in part, or who does the upholstering or covering of any structural unit thereof, using either new or second-hand material.

(12) The word "wholesaler" means a person who sells any article or thing to another for the purpose of resale, but shall not include an affiliate or a subsidiary corporation where the ownership is identical, and which is the exclusive sales outlet of such a manufacturing plant.

(13) The words "repairer" and "renovator" mean a person who repairs, makes over, recovers, restores, renovates or renews upholstered furniture or bedding for a consideration.

(14) The words "supply dealer" mean a person licensed by the department to manufacture, process or sell at wholesale any felt, batting, pads or other filling, loose in bags, in bales, or in containers, concealed or not concealed, to be used or that could be used in articles of bedding or upholstered furniture.

(15) The word "retailer" means a person who sells any article of upholstered furniture or bedding or filling material to a consumer or user of the article as purchased.

(16) The word "annually" or any of its variants, means that period beginning January first of each year and ending December thirty-first of the same year, or any unexpired portion of that period.

(17) The words "owner's own material" mean any article or material belonging to any person for his own or his tenant's use that is sent to any manufacturer, repairer or renovator to be repaired or renovated or used in repairing or renovating.

(18) The word "board" means the Utah State Board of Agriculture.

(19) The word "nonresident" means a person who is not a resident of the State of Utah at the time he engages in business in the State of Utah as licensed by this act.

(20) Whenever in this act the singular is used, the plural shall be included and where the masculine gender is used the feminine and neuter shall be included.

4-28-3. Department of Agriculture to Administer Act.

The State Department of Agriculture, through its officers and employees, is charged with the administration and enforcement of this act. It shall be the duty of the said department to inspect and supervise the inspection of all bedding and upholstered furniture subject to the provisions of this act, and to enforce the provisions thereof within this state.

4-28-4. Bedding Advisory Board — Membership — Duties.

There is created in the Department of Agriculture a bedding advisory committee which shall consist of five members. One of the commissioners of agriculture shall be a member of said committee and its chairman. The other four members shall be appointed by the department and shall be residents of Utah who, on account of their vocations, employment or affiliations, truly represent the manufacturing and distributing interests of the various products or branches of the industries affected by this act. The term of office of each member shall be two years; except that of the five members first appointed by the department after the effective date of this act, the term of office of two of said members shall be one year. The department is authorized to fill vacancies occurring in the membership of the committee. The members of the advisory committee shall be reimbursed for actual and necessary traveling and other expenses incurred while attending meetings, as provided in this act. Such committee shall meet quarterly, and other necessary times at the call of the chairman. The committee shall advise and consult with the department on all matters pertaining to the promulgation by the department of rules and regulations, the qualification and duties of inspectors, and the enforcement policies and procedures under this act.

4-28-5. Establish Regulations.

The department is hereby authorized and empowered to make such regulations as may be found necessary for carrying out the provisions of this act and to amend or repeal such regulations.

4-28-6. License — Who to be Licensed.

Except as otherwise provided in this act, any person who advertises, solicits, or contracts to manufacture, repair or renovate upholstered furniture or bedding, and who either does the work himself or has others do it for him, shall secure the particular license required by this act for the particular type of work that he solicits or advertises that he will

do, regardless of whether he has a shop or factory.

4-28-7. Manufacturer's License.

Every person manufacturing upholstered furniture and/or bedding shall annually obtain a manufacturer's license from the department bearing a serial number assigned by the department.

4-28-8. Wholesale Dealer's License.

A wholesaler of upholstered furniture and or bedding, unless he holds a manufacturer's license, shall obtain annually a wholesale dealer's license from the department.

4-28-9. Repairer's License.

Every person repairing or renovating upholstered furniture or any article of bedding for a consideration, unless he holds a manufacturer's license shall obtain annually a repairer's license from the department bearing a serial number assigned by the department.

4-28-10. Supply Dealer's License.

Every person manufacturing, processing or selling at wholesale any felt or batting or any pads of loose material in bags, in bales or containers for use in bedding or upholstered furniture, and every person engaged in the manufacture of materials, other than prime material, which is used as a component part of bedding or upholstered furniture, unless he holds a manufacturer's license shall procure annually a supply dealer's license from the department bearing a serial number assigned by it.

4-28-11. Each Firm Named to Be Licensed.

Every person doing business at the same address under more than one firm name is subject to the license provisions for each firm name.

4-28-12. Premises, etc., to Be Kept Clean.

The premises, delivery equipment, machinery, appliances, and devices of all persons licensed under this act shall at all times be kept free from refuse, dirt, contamination or insects.

4-28-13. New Articles to Be Labeled.

No person shall sell as new any article of bedding or upholstered furniture unless it is made from all new material and is tagged as provided herein.

4-28-14. Sale of Used Material as New Prohibited.

No person shall sell, representing it to be new material, any old or second-hand hair, down, feathers, wool, cotton, kapok, or other material used for filling articles of bedding and upholstered furniture.

4-28-15. Used Material to Be Labeled.

No person shall sell any article of bedding or upholstered furniture made from old or second-hand material unless it shall be tagged as provided herein.

4-28-16. Materials Prohibited for Use in Bedding or Furniture.

No person shall use in the making, repair or renovating of any article of bedding or furniture any shoddy, or any material:

- (1) that contains any bugs, vermin, or filth;
- (2) that is unsanitary;
- (3) that contains burlap, or other material, that has been used for baling.

4-28-17. Articles to Be Tagged.

No person shall sell, offer for sale, exchange, or lease, or deliver, or consign for like purpose, any article or bedding or upholstered furniture or filling material unless tagged as herein required.

4-28-18. Tag — No False Statement — Not to Be Removed.

It shall be unlawful to use any false or misleading statement, term or designation on said tag. When the label contains descriptive statements of the filling material, frame, cover, and style of the article to which it is attached, such descriptive statements must, in fact, be true statements. Filling material shall be de-

scribed by true name and grade. When more than one kind or grade is described in a mixture, the component parts shall be listed in order of their predominance. Feather and down contents shall be shown by percentage. Labels required on every article of bedding or upholstered furniture or filling material which contains all new material covered by this act shall be securely attached to the article or filling material at the factory or shop in a position where they can be conveniently examined. It shall be unlawful for any person, except the purchaser for his own use, to remove, deface or alter, or to attempt to remove, deface or alter such tag or the statement of filling materials made thereon.

4-28-19. Labeling.

No person shall make, repair, renovate, process, prepare, sell at wholesale or retail or otherwise, offer for sale, display, or deliver any article or upholstered furniture or bedding or any filling material in prefabricated form, or loose in bags or containers, if made of new or second-hand material concealed by fabric or any other covering, unless such material is plainly and indelibly stamped or labeled with a tag or other marking as provided in this act.

4-28-20. Required Information.

Labels to be attached to articles of upholstered furniture and bedding and filling material regulated by this act shall not be less than six square inches in size and shall be plainly and indelibly stamped, in the English language, with the words "All New Material," "Second-Hand Material," or "Owner's Own Material," as the case may be. The serial number of the person manufacturing the said article, as issued by the department, shall appear on said label. The material from which furniture and bedding labels are made shall be a cloth fabric of good quality approved by the department. Labels on articles manufactured wholly of new material shall be white in color. Labels on articles manufactured in whole or in part of second-hand material shall be red in color. Labels for "Owner's Own Material" shall be green in color. Color of ink on labels shall be black.

4-28-20.5. Labels Required.

The information required by this act shall be printed on one side of the label only and no mark, tag, sticker, advertising matter, or any other device shall be placed upon the labels in such a way as to cover the required information.

4-28-21. Stamp or Stencil May Be Used.

A rubber stamp or stencil may be used in lieu of a label on articles with slip seat covers having a smooth backing on which the imprint can be legibly and indelibly stamped, and on suitable surfaces of bales or containers of felt, batting, pads or other filling material used or to be used in articles of bedding or upholstered furniture. Any filling material or other component parts used or to be used in upholstered furniture or bedding which does not have a smooth surface on which the imprint can be legibly and indelibly stamped shall be plainly labeled with a tag approved by the department.

4-28-21.5. Second-Hand Material.

The repairer or renovator of any second-hand upholstered furniture or bedding or filling material which is subsequently sold shall affix the "Second-Hand Material" label. Retailers of second-hand upholstered furniture or bedding or filling material which is not repaired or renovated, but offered for sale shall affix the "Second-Hand Material" label, which shall be approved by the department.

4-28-22. Filling Material to Be Tagged.

A person shall not make, process, prepare, felt or sell, directly or indirectly, at wholesale or retail or otherwise, any filling material or other component parts to be used or that could be used in upholstered furniture or bedding, unless such material is plainly labeled with a tag as described in the preceding sections.

4-28-22.5. Owner's Material.

Every person who repairs or renovates upholstered furniture or filling material for the owner, for his own or a tenant's use, shall securely affix, immediately upon arrival at his place of business, the "owner's material" label

which shall be a tag of identification showing the owner's or dealer's name, address and the date upon which it was received. This tag shall remain affixed until the article is in the process of repair or renovation and shall be re-attached to the article immediately after this process of repair or renovation is completed.

4-28-23. Annual License Fee.

The annual fee imposed for each license granted under this act shall be set annually by the department at a sum not more nor less than that shown in the following table:

	Maximum Fee	Minimum Fee
Manufacturer's license	\$45.00	\$20.00
Wholesale dealer's license....	45.00	20.00
Supply dealer's license	45.00	20.00
Repairer's license:		
For repairers having one or more employees	25.00	10.00
For repairers having no employees	5.00	5.00

4-28-23.5. Renewal Fees.

All license fees shall be paid in advance for each year and the license shall expire December 31 of the year in which it is issued. Any person not licensed during the last preceding year may obtain a license after July 1 for one-half of the amounts above specified. Renewal license fees shall be paid on or before January 1. When such fees are not paid before March 1, they shall become delinquent, and there shall be added to the fee a penalty of 20 percent. If such fee and penalty are not paid on or before April 1, the license shall be subject to further penalties as approved by the department.

4-28-24. Disposition of Fees.

All fees collected under the provisions of this act shall be paid to the department, and deposited in a separate fund, which shall be used exclusively for the administration of this act, and from which shall be paid all expenditures necessary in carrying out the provisions of this act. All monies in said bedding fund are specifically appropriated to the department for the payment of salaries and expenses of

inspectors, employees, for research or any other necessary expenses of said department connected with the enforcement of this act; except that all monies in excess of \$10,000.00 remaining in said fund at the end of any biennial period shall be transferred to the general fund.

4-28-25. Applicability of Act.

This act shall apply to upholstered furniture and bedding and filling materials sold in Utah regardless of their point of origin.

4-28-26. Material Received from Outside State to Be Labeled.

Second-hand upholstered furniture or bedding, or second-hand filling to be used, or that could be used in upholstered furniture or bedding, received from outside of Utah shall be labeled as required herein, and shall comply with all of the provisions of this act before it is accepted, sold, or delivered either directly or indirectly by any person.

4-28-27. Compliance with Act — Responsibility.

Responsibility for compliance with this act rests not only with the manufacturer, but also with the wholesaler, and any person having in his possession any article of upholstered furniture or bedding or filling materials contrary to the provisions of this act.

4-28-28. Labeling Foreign Made Upholstered Furniture or Bedding — Responsibility.

Responsibility for labeling of unlabeled foreign-made upholstered furniture or bedding in compliance with the requirements of this act, shall rest with the person selling such merchandise in Utah.

4-28-28.5. Tagging Condemned Articles.

The tag to be affixed to any article of condemned upholstered furniture or bedding, or any material by an inspector shall be a red tag and shall contain such information as may be required by the department.

4-28-29. Violation — Misdemeanor.

Any person who fails to comply with or who violates any of the provisions of this act, or of the rules and regulations of the department shall be guilty of a misdemeanor.

4-28-30. Each Improperly Labeled Article a Violation.

The unit for a separate and distinct offense in violation of this act is each and every article of improperly labeled, or unlabeled, upholstered furniture or bedding or filling material made, repaired, re-covered, renovated, sterilized, sold, exposed or offered for sale, delivered, consigned, rented or possessed with intent to sell contrary to the provision of this act.

4-28-31. Right to Inspect — Access to Premises.

The department or any inspector thereof, shall have access to the premises, equipment, materials and partly finished and finished articles, of any person subject to the provisions of this act. The word "premises" includes all places where these articles are sold, offered for sale, exposed for sale, stored, or manufactured, and the delivery vehicles used in their transportation.

4-28-32. Inspection — Payment for Damage.

The department or any inspector may open any articles of upholstered furniture or bedding, including pillows or cushions belonging to or forming a part thereof, for the purpose of inspecting concealed filling material, and may take either the entire article, or samples of the filling material in such quantities as may be necessary for analysis; provided, however, that the department shall reimburse any retail dealer who has possession of such articles for any damage done by any inspector of the department during the process of inspection to merchandise of the retailer.

4-28-33. Articles in Violation — Seizure.

The department may condemn, withhold from sale, seize, or destroy any upholstered furniture or bedding or any filling material which is found to be in violation of this act.

4-28-34. Violation — What Constitutes.

Every person who removed, or causes to be removed, any tag or device placed upon any upholstered furniture or bedding or any material, by an inspector, is guilty of violation of this act.

4-28-35. Duty to Produce Article Upon Demand.

The failure of any person to produce upon demand of an inspector any article that has been condemned and ordered held on an inspection notice signed by such person, or an inspection notice that the person has refused to sign, is a violation of this act.

4-28-36. Inspection — No Interference.

No person shall interfere with, obstruct or otherwise hinder any inspector of the department in the performance of his duties. The department, its deputies and assistants, and all inspectors in the performance of their official duties, shall have the same powers as are possessed by the peace officers of this state.

4-28-37. Notification of Violation.

Any inspector having knowledge of a violation of any of the provisions of this act shall notify the department of the violation.

4-28-38. Nonresident Rights.

The acceptance of a nonresident licensee of any of the rights and privileges conferred upon him by this act, as evidenced by his engaging within this state, either personally or through an agent or an employee, in a business subject to license under this act, is equivalent to the appointment by such licensee of the chairman of the board as his true and lawful attorney upon whom may be served all lawful process in any proceedings conducted against him under this act.

4-28-39. Service Upon Licensee.

The acceptance of such rights and privileges as so evidenced shall signify the agreement of the licensee that any such process

which is served against him in the manner provided in this act shall be of the same legal force and validity as if served upon him personally in this state.

4-28-40. Service of Process.

Service of such process shall be made by serving a copy thereof upon the chairman of the board together with payment of a fee of \$2 and such service shall be sufficient service upon the said nonresident, provided that notice of such service and a copy of the process are within ten days thereafter sent by registered mail by the plaintiff to the defendant at his last known address as furnished by the board, and proof of compliance with this section shall be made by affidavit of the plaintiff showing such service by mail, together with the return receipt of the United States Post Office bearing the signature of the licensee or his agent. Such affidavit and receipt shall be appended to the original pleading filed with the court.

4-28-41. Court Action.

The court in which the action is pending may order such continuance as may be necessary to afford the defendant reasonable opportunity to defend any such action not exceeding ninety days from the date of filing of the action in such court. The fee of two dollars paid by the plaintiff to the chairman of the board at the time of service of such proceedings shall be taxed as costs if he prevails in the suit. The said chairman of the board shall keep a record of all such processes so served which shall show the day and hour of such service.

4-28-42. Separability Clause.

If any of the provisions of this act are determined to be unconstitutional, all the remaining provisions shall be given full force and effect, as fully as if the part or parts so determined to be unconstitutional had not been included in this act.

REGULATIONS GOVERNING UPHOLSTERED FURNITURE AND BEDDING, Promulgated under authority of Title 4, Chapter 28, Utah Code Annotated 1953, as amended; Adopted by the Utah State Board of Agriculture, December 4, 1963, to become effective January 1, 1964.

I. Scope.

It is the purpose of these regulations to designate the terms, definitions, and nomenclature as are commonly used and as recognized in the manufacture, sale and distribution of furniture and bedding products.

II. General Provisions.

A. Application of These Regulations. These regulations shall apply to all persons, partnerships, corporations and associations engaged in the business of manufacturing, repairing, renovating, and selling items of bedding, upholstered furniture or filling materials.

B. The term "second-hand" as defined in the act does not apply to new materials subjected to manufacturing processes or to new materials which are the by-product of manufacturing processes, when these materials are adequately protected from dirt or other contamination.

C. Names, Standards and Definitions of Filling Materials. When filling materials are named, designated or represented on the label as being present in any material or article, they shall conform to the names, definitions, standards, descriptions and terminology for such materials as outlined in the following regulations and standards.

D. In wastes which contain more than one type of synthetic fiber, the quantity of the different types shall be combined and shall be classified as "Synthetic Fiber."

E. Deviation From Percentage Stated. No deviation from percentages represented, in excess of 5 percent is permitted in any material except as provided in these regulations.

F. Other Materials. A material represented as consisting of one kind and grade of material may not contain more than 5 percent of other materials.

G. The terms "all," "pure," "100%" or terms of similar import are permitted only if the material is as stated. No tolerance is allowed where such terms are used.

H. Cleanliness of Filling Materials. All filling materials shall be reasonably clean and free from extraneous material, dirt, dust, filth, epidermis, excreta, disagreeable odors, or other contamination.

I. Sludge Limitation. When any filling material contains sludge in excess of .3 milliliters per 20 gram sample, it is unfit for use. As used in this section "sludge" means any material which will settle out of a solution which has been passed through a 40 mesh sieve.

J. Oil and Grease Limitations. When any filling material contains more than 2 percent but not more than 5 percent of oil, grease, or fat or a combination thereof, it shall be classified as "oily." Material which contains more than 5 percent of oil, grease, or fat or a combination thereof is unfit for use.

K. Trash Limitations. (1) Vegetable Fibers. When any batting, felt, pad or any other prefabricated material of vegetable origin contains more than 7 percent but not more than 10 percent of trash, shell, shale, leaf, stem, pulp, undecorticated fibers, etc., it shall be classified as "Waste." When the trash, shell, shale, leaf, stem, pulp, etc., exceeds 10 percent, but does not exceed 20 percent, such extraneous material shall be classified as "Trash" and the material itself shall be classified as "Waste." Any batting, felt, pad, or any other prefabricated material in which the trash exceeds 20 percent is unfit for use.

(2) Animal Fibers. When any product of animal origin contains more than 2 percent but not more than 10 percent of trash, burrs, stickers, seeds, sticks, epidermis, kemp, etc., it shall be classified as "Waste." When the trash,

burrs, stickers, seeds, etc., exceed 10 percent, the material is unfit for use.

(3) When any filling material, not covered by (1) and (2) above, contains more than 20 percent of a combination of trash, debris, seeds, sticks, etc., and/or foreign material, it is unfit for use.

L. Thread Limitation. Any material which contains more than 2 percent of hard spun thread, yarn or roving shall be classified as "Waste."

III. Definitions and Classifications of Filling Material.

A. Waste. Any new material classified as "Waste" under Sections II K, or L, and any other new material which is the by-product or waste of the various machines in any process of manufacture employing only new materials, except as provided in Section III B (By-products), and fibers recovered from clean fabric clips and similar scraps made in whole of new materials, and which are subsequently completely defabricated, and pills, shank, and tag wools, etc., shall be classified as "Waste."

B. "By-products" shall mean new fibers that are the by-products removed from the various machine operations in the preparation and manufacture of yarn up to and including the process of spinning, spun fibers being subsequently reduced to individual fibers, together with the cotton known as gin flues, and shall include only the following materials:

- (a) Comber
- (b) Strips
- (c) Fly
- (d) Picker
- (e) Textile spun fiber
- (f) Gin flues
- (g) Noils
- (h) Tanners wool
- (i) Napper flocks
- (j) Fulling flocks

C. "Batting" or "Felt." Either of these terms shall be used only when fibers are gar-

netted or carded and used in layer form. They may not be used when batting or felt scraps or clipping are stuffed or blown in the same manner as unfelted materials.

D. Pads. Any material or fiber which is interwoven or punched on burlap or any other woven material or otherwise fabricated into cushion-like form including the application of man-made materials or latex rubber as a factor in a molding process, if the binding material is mentioned on any label, the designation shall be accurate, true and not misleading. The word "pad" shall not be used alone, but shall be preceded by the name of any by-product or fiber as approved; e.g. "cotton pad," "cotton waste pad."

E. Cotton.

(1) "Staple Cotton" shall mean the staple fibrous growth as removed from the cottonseed in the usual process of ginning (first-cut from the seed) free from excessive foreign material. The term "cotton" by itself shall not be used.

(2) The term "cotton linters" shall mean the fibrous growth removed from cottonseed subsequent to the usual first process of ginning.

F. Feathers and Down.

(1) "Down" shall mean the undercoating of waterfowl, consisting of the light fluffy filaments growing from one quill point but without any quill shaft.

(2) "Feathers" shall mean the feathers of any fowl which are whole in structure and which have not been processed in any manner other than dusting, washing and sterilizing.

(3) "Body feathers" shall mean the feathers of any fowl other than wing and tail feathers. "SMALL BODY FEATHERS" shall mean body feathers the overall length of which does not exceed 3½ inches.

(4) "Quill feathers" shall mean the wing and tail feathers commonly known as quills.

(5) "Crushed feathers" shall mean feathers which have been processed by a curling or

crushing machine and includes the feather fiber resulting from such processing.

(6) "Free fiber" shall mean the detached barbs from down plumes or detached barbs from the basal end of feathers and undistinguishable from the barbs of down plumes.

(7) "Feather fiber" shall mean the detached barbs and strippings of waterfowl, chicken and turkey feathers.

(8) "Damaged feathers" shall mean feathers which have been broken, injured by insects, or depreciated from the original value in any manner; provided, however, that this shall not apply to "crushed feathers" as defined in III F (5) above. "Damaged feathers" in excess of 5 percent of any stock shall not be permitted.

(9) "Residue" shall mean quill pith, quill fragments, trash or any foreign matter and shall not exceed 2 percent of any feather and down stock.

(10) (a) Products represented as down may contain not over 10 percent of small natural body feathers of the same fowl as that from which the down is derived. There shall be no chicken or turkey feather fiber in down.

(b) A product represented as "goose down" shall not contain duck down in excess of 10%.

(c) A product represented as "goose feathers" shall not contain duck feathers in excess of 10% nor shall it contain chicken and/or turkey feathers in excess of 5%. Such chicken and/or turkey feather content shall reduce the permissible duck feather content in like amount.

(d) A product represented as "duck feathers" shall not contain chicken and/or turkey feathers in excess of 5%.

(11) Cleanliness. (a) The oxygen number of any filling material consisting of whole feathers or down or a combination thereof, and the oxygen number of any filling material consisting of an admixture of feathers and down

which contains 5 percent or less of crushed feathers, shall not exceed 25 grams of oxygen per 100,000 grams of sample.

(b) The oxygen number of any filling material which contains more than 5 percent of crushed feathers shall not exceed 40 grams of oxygen per 100,000 grams of sample.

G. Hair. The term "hair" means the coarse filamentous epidermal outgrowth of such mammals as horses, cattle, hogs and goats. When used in the manufacture of upholstered furniture, bedding, or filling material, it shall be clean, properly cured, free from epidermis, excreta, or foreign or objectional substances or odors.

H. Generic Names and Definitions for Vegetable Fibers.

(1) Akund—Seed fiber of the *Calitropis* member of the *Asclepiadaceae* family, *C. gigantes* and *C. procera*.

(2) Coco or Coir—The fibrous growth obtained from the husk or outer shell of the coconut.

(3) Cotton—The fibrous hair clothing of the seeds of the genus *Gossypium* of the malvow family. (Cotton plant).

(4) *Excelsior*—Shredded thread-like wood fibers.

(5) Flax—Fiber derived from the plant of genus *Linum usitatissimum* raised primarily for fiber.

(6) Jute—The bast fiber derived from any species of the *Corchorus* plant.

(7) Kapok—The mass of fibers investing the seed of the kapok tree (*Ceiba Pentandra*).

(8) Manila—The leaf fiber derived from the Abaca Plant (*Musa-textilis*).

(9) Milkweed—The surface fiber from the inside of the seed pods of milkweed plants (*Asclepias*).

(10) Moss—The processed fiber of epiphytic plants. These plants, while growing, form pendant tufts from trees.

(11) Palm—The fibrous material obtained from the leaf of the palm, palmetto, or Palmyra tree.

(12) Sisal—Leaf fiber derived from the *Agave Sisalana* and similar species of *Agaves*.

(13) Tula—The fiber derived from the leaf of the "tula istle" and similar species of *Agaves*.

I. Synthetic or Manufactured Fibers.

(1) Acetate Fiber — Manufactured fiber in which fiber-forming substance is cellulose acetate. Where not less than 92% of hydroxyl groups are acetylated, term triacetate may be used as generic description of the fiber.

(2) Acrylic Fiber—Manufactured fiber in which fiber-forming substance is any long chain synthetic polymer composed of at least 85% by weight of acrylonitrile units $(-\text{CH}_2-\text{CH})$.
CN

(3) Azlon—Manufactured fiber in which fiber-forming substance is composed of any regenerated naturally occurring proteins.

(4) Cellulose Fiber—Fiber obtained from cellulosic products and containing not more than 4% lignin and 12% pentosans.

(5) Glass Fiber—Manufactured fiber in which fiber-forming substance is glass.

(6) Modacrylic Fiber—Manufactured fiber in which fiber-forming substance is any long chain synthetic polymer composed of less than 85% but at least 35% by weight of acrylonitrile units (CH_2-CH) .
CN

(7) Nylon, Nylon Fiber — Manufactured fiber in which fiber-forming substance is any long chain synthetic polyamide having recurring amide groups $(-\text{C}-\text{NH}-)$.
O

(8) Nytril, Nytril Fiber—Manufactured fiber containing at least 85% of long chain polymer of vinylidene dinitrile $(-\text{CH}-\text{C}(\text{CN})_2-)$ where vinylidene dinitrile content is no less than every other unit of polymer chain.

(9) Olefin, Olefin Fiber — Manufactured fiber in which fiber-forming substance is any long chain synthetic polymer composed of at least 85% by weight of ethylene, propylene, or other olefin units.

(10) Polyester Fiber—Manufactured fiber in which fiber-forming substance is any long chain synthetic polymer composed of at least 85% by weight of an ester of dihydric alcohol and terephthalic acid ($\text{p-HOOC-C}_6\text{H}_4\text{-COOH}$).

(11) Rayon — Manufactured fiber composed of generated cellulose, as well as manufactured fibers composed of regenerated cellulose in which substituents have replaced not more than 15% of the hydrogens of the hydroxyl groups.

(12) Saran—Manufactured fiber in which fiber-forming substance is any long chain synthetic polymer composed of at least 80% by weight of vinylidene chloride units ($-\text{CH}_2\text{-CCl}_2-$).

(13) Spandex—Manufactured fiber in which fiber-forming substance is a long chain synthetic polymer comprised of at least 85% of a segmented polyurethane.

(14) Vinal, Vinal Fiber — Manufactured fiber in which fiber-forming substance is any long chain synthetic polymer composed of at least 50% by weight of vinyl alcohol units ($-\text{CH}_2\text{-CH}(\text{H})-$), and in which the total of vinyl alcohol units and any one or more of the various acetal units is at least 85% by weight of the fiber.

(15) Vinyon, Vinyon Fiber — Manufactured fiber in which fiber-forming substance is any long chain synthetic polymer composed of at least 85% by weight of vinyl chloride units ($-\text{CH}_2\text{-CHCl}-$).

J. Wool. (1) "Virgin wool" shall mean the fleece of the sheep or lamb, which has been scoured, or scoured and carbonized. It shall not be the by-product of any process or manufacture nor shall it have sustained prior use. The fibers shall be reasonably uniform in length, viz: it shall contain a mixture of long

and short fibers. It shall be free from kemp and vegetable matter.

(2) Choice Virgin Wool. "Choice virgin wool" shall mean wool as defined above that is " $\frac{1}{4}$ blood" (48s) or finer in grade, according to the United States standards for grades of wool, and shall be natural or bleached white in color. The fibers shall be reasonably uniform in length, viz.,: it shall not contain a mixture of long and short fibers. The term "choice virgin wool" may not be used in describing the component parts of wool blends or mixtures.

K. Foam Products.

(1) "Latex foam rubber" shall mean the product made from rubber latex to which compounding ingredients are added in dissolved form and the mixture usually agitated to a foam and vulcanized in this state. It has interconnecting cells.

(a) "Latex foam rubber" shall mean first quality latex rubber products.

(b) "Imperfect latex foam rubber" shall mean any foam rubber product which shows major manufacturing imperfections and the producer sells as other than first quality material.

(c) "Shredded latex foam rubber" shall mean shredded waste or trimmings from cutting sheets or shapes, shredded imperfect products or shredded overflow from molds known as flashings and similar material.

(d) "Latex foam rubber scrap" shall mean unshredded waste from production and similar unshredded material.

(e) "Remolded shredded latex foam rubber" shall mean the material described in (c) above, remolded into a predetermined stable shape.

(2) "Sponge rubber" shall mean the product made from solid rubber into which the compounding ingredients are milled or mechanically worked and a blowing agent, usually sodium bicarbonate, is added which expands during vulcanization. It has interconnecting cells.

(a) "Sponge rubber" shall mean first quality sponge rubber products.

(b) "Imperfect sponge rubber" shall mean any sponge rubber product which shows major manufacturing imperfections and which the producer sells as other than first quality material.

(c) "Shredded sponge rubber" shall mean shredded waste or trimmings from cutting sheets or shapes, shredded imperfect products or shredded overflow from molds known as flashings and similar material.

(d) "Sponge rubber scrap" shall mean unshredded waste from production and similar unshredded material.

(e) "Remolded sponge rubber scrap" shall mean the material described in (c) above, remolded into a predetermined stable shape.

(3) Synthetic Foam. Any synthetic foam shall be labeled by its proper chemical name, such as "Polyurethane foam," "Polyether foam," "Polyester foam," Polyvinylchloride foam," etc. Polyurethane foam, Polyester foam, etc., shall mean first quality foam products.

(a) Second-grade or Imperfect Polyurethane foam, Polyester foam, etc., shall mean any product which shows major manufacturing imperfections.

(b) "Shredded Polyurethane foam, Polyester foam, etc., shall mean shredded waste or trimmings from cutting sheets or shapes, shredded imperfect, seconds, products or shredded overflow from molds and any other material which has gone through the process of shredding.

(c) Polyurethane "Foam Scrap" or any other synthetic foam scrap shall mean unshredded waste from production and similar unshredded material.

(d) Remolded Shredded Polyurethane foam or any other synthetic foam shall mean the material described in "Shredded" remolded into a predetermined stable shape.

IV. Size of Feather and Down Articles.

A. Any size representation made for pillows or other items of bedding shall mean the finished size.

B. Standard Size. No down pillow represented as being of standard size shall be less than 20" x 26" finished size and shall contain not less than 13 oz. of down.

C. When pillows which are represented as down pillows are represented to be of a certain size they shall contain not less than the corresponding net weight of down as specified in the following schedule of sizes and weights.

Finished Pillow Size	Minimum Net Weight of Down
21" x 27"	15 oz.
20" x 26"	13 oz.
19" x 27"	12 oz.
18" x 25"	11 oz.
17" x 24"	10 oz.

Pillows represented to be of any other size than those set forth in the above schedule shall contain a proportionate weight of down.

D. The size represented for comforters, sleeping bags or any other article of bedding shall mean the minimum finished size.

SANITARY ENGINEERING

Part 5 § 5-872

*Subchapter 9. Bedding, Mattresses, and Upholstered Furniture***§ 5-871. Used materials prohibited**

(a) A person shall not manufacture for purposes of sale, sell or offer or expose for sale, or have in possession with intent to sell any article of bedding or article of upholstered furniture the filling of which shall have been previously used for like purpose in other bedding or upholstered furniture. Possession by a manufacturer of or dealer in bedding or upholstered furniture of any article of bedding or article of upholstered furniture the filling of which shall have been previously used for like purpose in other bedding or upholstered furniture shall be prima facie evidence that such article is being manufactured, remade or renovated or is offered for sale in violation of this chapter.

(b) A person shall not use in the manufacture of any article of bedding or article of upholstered furniture for purposes of sale, or sell, or offer or expose for sale, or have in his possession for the purpose of such use or for sale or for use in the remaking or renovating of any such article, any material which has previously been used in or about a hospital, or on or about the person of anyone having an infectious or contagious disease, nor shall any person sell, or offer or expose for sale, any article containing materials which have previously been so used.

Source. Section is section 2941 of Title 9, V.S.A.

§ 5-872. Tagging of bedding and furniture

A person shall not manufacture for purposes of sale, sell or offer or expose for sale, or have in possession with intent to sell any article of bedding or article of upholstered furniture unless there is plainly marked upon each such article or upon a tag sewed thereon, or otherwise securely attached thereto, a statement in the English language, containing no misleading terms or descriptions of the kind of material used for filling in the manufacture of such article, the name of the manufacturer or vendor, and a statement that such article contains all new material, and unless, if any such article is enclosed in a bale, box, crate or other receptacle, there shall be plainly marked upon such receptacle, or upon a tag securely attached thereto, a statement that the contents of the package are marked as herein required. Possession of any article of bedding or article of upholstered furniture not marked as provided herein, by any person engaged in the business of manufacturing, selling

Part 5 § 5-872**ENVIRONMENTAL HEALTH****Ch. 5**

or offering for sale any such article, shall be prima facie evidence that such article is being manufactured or is offered or exposed for sale in violation of the provisions of this section. The tag required by this section shall be at least three inches by four inches in dimensions and made of cloth or with a cloth back, or, in the case of articles of upholstered furniture, of paper or cloth, and shall be permanently pasted or attached to each such article.

§ 5-873. Penalties

(a) A person who violates a provision of sections 2941 and 2942 of this title, shall be imprisoned not more than six months or fined not more than \$500, or both.

(b) A person, except a purchaser at retail, who removes or effaces any marking upon any article or receptacle or any tag or label attached thereto, as provided in section 2942 of this title, shall be fined not more than \$50.

FOREWORD

So that all interested may be fully advised regarding the "Bedding and Upholstered Furniture Law" of the State of Virginia, the Department of Health herewith presents the requirements of the law, regulating the manufacture and sale of articles of bedding and upholstered furniture and supplier of filling materials used therein including renovating, reupholstering, sterilizing, tagging and licensing.

The law authorizes an inspector to seize and hold for evidence any article of bedding, upholstered furniture or filling material he has cause to believe is in violation of any provision of this act. Violations are punishable for each offense by a fine of not less than twenty-five nor more than one hundred dollars or by imprisonment not exceeding six months or by both such fine and imprisonment.

It is provided further that the registration number of any person, convicted of violating this act may be revoked or suspended by the Commissioner. Only after the payment of a special inspection fee of \$100.00 and the determination, by the Commissioner, that such person is complying with the Provisions of this act, may it be issued.

VIRGINIA BEDDING AND UPHOLSTERED FURNITURE LAW

(Chapter 7 of Title 32 of the Code of Virginia, as amended.)

§ 32-117. The following words, as used in this chapter, shall have the following meanings, unless the context otherwise requires:

(1) "Mattress" means any mattress, mattress pad, mattress protector, box spring, upholstered spring, or quilted pad, which is stuffed, padded or filled with any soft material, and whether containing metal springs or not, designed or made for use on a bed or couch for sleeping or reclining purposes.

(2) "Pillow," "Bolster" or "featherbed" means any bag, case or covering made of textile or other material and stuffed with feathers, down or other soft material, designed or made for use on a bed or couch for sleeping, sitting or reclining purposes.

(3) "Comfortable" means any cover, quilt or quilted article, made of textile or other material and stuffed or filled with any soft material designed or made for use on a bed or couch for sleeping purposes.

(4) "New" means any material or article which has not been previously used for any purpose. Manufacturing processes shall not be considered a prior use.

(5) "Secondhand" means any article or material of which prior use has been made.

(6) "Shoddy" means any material which has been spun into yarn, knit or woven into fabric and subsequently cut up, torn up, broken or ground up.

(7) "Upholstered furniture" means any article designed to be used for sitting, resting or reclining which is covered, stuffed or filled with excelsior or other soft material.

(7a) "Supply dealer" shall mean any person manufacturing, processing or selling at wholesale any felt, batting, pads, or loose material in bags or containers, concealed or not concealed, to be used in articles of bedding or upholstered furniture.

(8) "Person" includes persons, corporations, partnerships and associations.

(9) "Commissioner" means the State Health Commissioner.

§ 32-118. No person shall use in the making, remaking or renovating of any mattress, pillow, bolster, featherbed, upholstered furniture or comfortable any material known as shoddy or any fabric from which shoddy is made; or any secondhand material; or any new or secondhand feathers or down, unless such shoddy, secondhand material and feathers or down have been thoroughly sterilized and disinfected by a reasonable process approved by the Commissioner.

§ 32-119. No person shall rent, offer or expose for sale, barter, give away, or dispose of in any other commercial manner any article mentioned in § 32-118, made, remade, or renovated in violation of this chapter, or any secondhand article covered by this chapter, unless since last used, it has been thoroughly sterilized and disinfected by a reasonable process approved by the Commissioner.

§ 32-120. Any person desiring to secure approval of the process by which the materials or articles named in sections 32-118 and 32-119 of this Act are sterilized and disinfected, shall submit to the Commissioner a plan of such apparatus and the process intended to be used for such sterilization and disinfection, and upon approval a numbered permit for its use shall be issued. Such permit shall expire one year from date of issue, and there shall be paid by the applicant to the Commissioner at the time of issue thereof, the sum of twenty-five dollars (\$25.00). Nothing herein shall prevent any person engaged in the manufacture, renovation or sale of any article or material which requires sterilizing and disinfecting under the provisions of this act, from having such sterilizing and disinfecting performed by any person who has a valid permit for such purposes, provided the number of such permit appears on the tag, hereafter described, attached to each article.

§ 32-120.1. Every person engaged in the manufacturing of bedding and upholstered furniture or renovating or reupholstering any article or processing or selling any filling material to be used in articles of bedding or upholstered furniture covered by this act shall first obtain a numbered license certificate from the Commissioner. The payment and charge for this license shall constitute an inspection charge for the purpose of enforcing this chapter. All fees collected under the provisions of this chapter, shall be paid to the State treasurer, and deposited by him in a separate fund, to be known as the bedding and furniture fund, from which shall be paid all expenditures necessary in carrying out the provisions of this chapter. Such license certificate shall expire one year from date of issue. The Commissioner may revoke or suspend any such license certificate issued for any violation of the provisions of this article. The annual fees imposed for license certificates issued pursuant to this article shall be as follows:

- (1) Manufacturers of bedding—forty dollars;
- (2) Manufacturers of upholstered furniture—forty dollars;
- (3) Supply dealer—ten dollars;
- (4) Bedding renovators—ten dollars;
- (5) Reupholsters—ten dollars.

§ 32-121. All places where any article covered by this act is made or renovated; or where materials for such articles are prepared; or where such articles are offered for sale or are possessed with intention to sell or deliver; or where sterilizing and disinfecting is performed, shall be subject to inspection at reasonable hours by the Commissioner or his representative to ascertain whether such materials and articles conform to its provisions. No person shall interfere with such inspections.

§ 32-122. Each new mattress, pillow, bolster, featherbed, upholstered furniture and comfortable shall bear securely attached thereto and visible on the outside covering a substantial white cloth tag or equivalent, not less than six square inches in size, upon which shall be plainly stamped or printed, in English, a statement showing the kind of materials used in filling such articles, and that the materials are new, and the number of the permit issued for sterilizing and disinfecting new feathers or down. Each secondhand article of the kinds above mentioned, each article of secondhand upholstered furni-

ture, and each such article containing any secondhand material shall have securely attached to it a similar tag, printed on yellow cloth or equivalent upon which shall be stamped or printed, in the same manner as above required, a statement showing the kind of materials used in filling such articles, and that the article or materials are secondhand, and the number of the permit issued to the processor who sterilized and disinfected such articles or material. No additional information shall be contained in such statement, which must be in type not less than one-eighth inch in height.

§ 32-122.1. Any shipment or delivery however contained, of material used for filling articles of bedding or upholstered furniture mentioned in § 32-117 shall have conspicuously attached thereto a tag upon which shall be stamped or printed as required in § 32-122, or as required by the regulations of the State Health Department, a statement showing the kind of material and whether the material is new or secondhand, the name and address of the manufacturer, distributor or vendor, and the registration number of the manufacturer, distributor, or vendor, and in the case of secondhand material or material from animal or fowl, the permit number of the processor who sterilized or disinfected such material.

§ 32-122.2. Tagging bulk filling material.

(a) Processed material must be tagged by the processor and must bear his registry number.

(b) Unprocessed material may be tagged by the jobber or preparer and may bear the registry number of either the jobber or the preparer, but in each case whether processed or unprocessed the concen having its registry number on the tag shall be responsible for all statements on the tag and for violations in case the material is not as represented on the tag.

(a-1) The following and similar materials shall be deemed to be processed; cotton felt, batting, shoddy; scoured and carbonized wool, wool felt or batting; processed hair, curled or uncurled, felted or rubberized; processed feathers and down; processed foam or sponge rubber; jute felt; sisal pads; curled tampico.

(b-1) The following and similar materials shall be deemed to be unprocessed; staple cotton, cotton and spinning mill products or by-products; unprocessed feathers and down, wool, hair and foam or sponge rubber; kapok; moss; palm fiber; sisal fiber; tampico fiber (not curled); coconut husk fibers; excelsior; jute tow; flat tow; napper waste.

§ 32-123. Repealed by Chapter 530, Acts 1954

§ 32-124. Repealed by Chapter 530, Acts 1954

§ 32-125. It shall be unlawful to use any false or misleading statement, term or designation on any such tag or to remove, deface or alter, or to attempt, to remove, deface or alter such tag or the statement of filling materials made thereon.

§ 32-126. The State Board of Health is hereby charged with the administration and enforcement of this chapter, and shall have the power, through any of its officers or agents, to take for evidence, any article made or offered for sale in violation of this chapter. It is the intention of this chapter to prevent both the manufacture and sale in this State of any articles covered by this chapter, unless manufactured and sold in conformity with its pro-

visions. The Board may make and enforce reasonable rules and regulations for the enforcement of this chapter, and may suspend, revoke and void the registration number of any person convicted of violating the provisions of this act. Any person, a nonresident of this State, who has been issued a certificate of registration who fails or refuses to enter an appearance in any court of record in this State to answer charge or charges of violation within twenty-five days after service upon him of a notice by registered mail so to do, shall have his certificate of registration peremptorily revoked by the Board. Such person shall not thereafter engage in the manufacture, making, remaking, renovating or delivering for sale in this State of articles of bedding or upholstered furniture until he has paid a special inspection fee of one hundred dollars and the Board has determined that such person is complying with the provisions of this act whereupon the Board shall reinstate or reissue the registration number to such person. The State Health Commissioner, if in his judgment he deems such action advisable is hereby authorized to appoint a "Bedding and Upholstery Furniture Advisory Board" to consist of persons who, on account of their vocations, employment or affiliations, represent the bedding and upholstery manufacturing industry. Upon the appointment of such Bedding and Upholstery Advisory Board, the State Health Commissioner shall designate an employee of the State Board of Health to serve as Secretary of said Bedding and Upholstery Advisory Board. The Bedding and Upholstery Advisory Board shall meet at such time as the State Health Commissioner shall designate.

§ 32-127. The provisions of this chapter shall not apply to any such articles sold under the order of any court, or under any sale of a decedent's estate, or any sale made by any person of household effects incident to a change of residence.

§ 32-128. The provisions of this chapter shall not apply to any interstate railroad passenger trains and except as provided in this section shall not apply to any state institution, agency or department unless such institution, agency or department offers for sale the articles manufactured or renovated. Further, the provisions of this chapter shall not apply to individual blind persons renovating mattresses for institutions or individuals for their own use and not for sale. The provisions of this chapter relating to secondhand upholstered furniture shall apply to any such furniture which has been used by any person suffering from an infectious or contagious disease, including such articles owned by or used in any hospital, jail or other public or private institution, but shall not require the sterilization or tagging of any upholstered furniture which has not been used by any such person.

§ 32-129. Any person violating any of the provisions of this chapter, or any rule or regulation of the State Board of Health adopted hereunder, shall be guilty of a misdemeanor and upon conviction thereof, shall be punished for each offense by a fine of not less than twenty-five nor more than one hundred dollars or by imprisonment not exceeding six months or by both such fine and imprisonment. Each remaking, renovating, selling, offering for sale, delivering, consigning, or possessing with intent to sell deliver or consign, any mattress, pillow, bolster, featherbed, article of upholstered furniture or comfortable, contrary to this chapter, shall be a separate offense.

THE FOLLOWING FORMS COMPLY WITH THE VIRGINIA LAW

NO. 1

LABEL FOR ALL NEW MATERIAL

For Filling Materials NOT Requiring Sterilization or Disinfection

**RECOMMENDED DEFINITIONS OF FILLING MATERIALS
WHICH ARE NEITHER LAW NOR RULES
BUT ARE BASED ON BOTH**

Basic Definitions. It is the purpose of the following definitions to provide names, terms and nomenclatures as are commonly used, and are recognized in the manufacture, sale and distribution of bedding products. The following definitions are also intended to have understandable meaning to the ultimate consumer.

COTTON:

1. Cotton, Virgin Cotton or Staple Cotton: Any of these terms shall mean the staple fibrous growth as removed from cottonseed in the usual process of ginning (first cut from seed), containing no foreign material. The presence of the usual amount of leaves, hull, etc., shall not be considered foreign matter.
2. Cotton By-Products: This term shall mean the by-products removed from the various machine operations necessary in the manufacture of cotton yarn up to but not including the process of spinning, and shall include only the following materials commonly known in cotton mill terms as (1) cotton comber, (2) cotton card strips or cotton vacuum strips, (3) cotton fly and (4) cotton picker.
3. Cotton Linters: This term shall mean the fibrous growth removed from cottonseed subsequent to the usual process of ginning and shall be designated on the label.
4. Cotton Waste: This term shall mean the by-products removed from the various machine operations necessary in the manufacture of cotton products but not including those grades defined in 2 above. Cotton waste to which the immature ends or particles of seed hull adhere, and known to the industry as cotton motes, shall be included as cotton waste.
5. Shoddy: This term shall mean any material which has been spun into yarn, knit or woven into fabric and subsequently cut up, torn up, broken up, ground up or otherwise defabricated and shall be so designated on the label as Shoddy.
6. Blends or Mixtures: When two or more of the above materials are used in a product, they shall be described on the label as required above in the order of their predominance. Any of the materials listed under cotton by-products may be designated on the label individually or as cotton by-products.
7. Cotton Felt: This term shall be used only when fibers are garnetted or carded and used in layer form. It cannot be used when cotton batting or cotton felt scraps or clippings are stuffed or blown in the same manner as unfelted materials.

8. Oil Percentages: When any filling material contains more than five percent (5%) of oil, it must be described as Oily.
9. Dirt or Foreign Material: When any filling material contains more than five percent (5%) dirt or any other foreign material, it must be described as Dirty.

FEATHERS AND DOWN:

1. Down: This term shall mean the soft undercoating of waterfowl, consisting of the light fluffy filaments growing from one quill point but without any quill shaft. This term includes all real downs and it shall not be necessary to indicate the kind of down used, but if indicated on the label as a particular kind of down, such as goose down, duck down or eider down, the material must be as stated.
 - 1a. Down Fiber: This term shall mean the barbs of down plumes separated by any process from the quill point. Any individual fibers resembling down closely enough to create doubt as to whether they are down fiber or feather fiber may be classed as down.
 - 1b. A tolerance of 10 percent by weight of the down content stated on the label is permissible. Articles labeled as containing Down must contain not less than 90 percent pure down.
2. Feathers or Natural Feathers: This term shall mean the original or natural form and means feathers which have not been processed in any manner other than washing, dusting, sterilizing or disinfecting.
3. Crushed Feathers: This term shall mean feathers which have been processed by a curling or crushing machine which has changed the original form of the feather without removing the quill. Such stock shall be designated on the label as Crushed followed by the name of the fowl from which they came.
4. Chopped Feathers: This term shall mean feathers which have been chopped or cut into pieces. Such stock shall be designated on the label as Chopped followed by the name of the fowl from which they came.
5. Stripped Feathers: This term shall mean the barbs of feathers stripped by any process from the feather shaft, but not separated into feather fiber. Such designation shall include the name of the fowl from which they came.
6. Quill Feathers or Wing and Tail Feathers: Either of these terms shall mean the wing or tail feathers of any fowl.
7. Waterfowl Feathers: This term shall mean goose or duck feathers or any mixture thereof.
8. Damaged Feathers: This term shall mean feathers which have been broken, injured by insects, or depreciated from the original value in any manner; provided however, that this term shall not apply to crushed feathers as defined in 3. Damaged feathers in excess of 10 percent by

weight of the total feathers shall be indicated on the label and the name of the feathers shall be stated.

9. Blends or Mixtures: Feathers or down mixtures shall be designated by the foregoing definitions, by the name, character and percentage of each material used, or the entire mixture shall be designated by the name of the lowest grade of material used.
10. Color: The color of feathers or down need not be stated on the label, but if stated the contents shall be as declared. Feathers or down from waterfowl may be designated on the label as White or Gray as the case may be. Chicken or turkey feathers may be designated on the label as White or Colored as the case may be.
11. Tolerance: A tolerance of 10 percent by weight of the feather content stated on the label is permissible. Feathers of any fowl named on the label must contain not less than 90 percent of such feathers.
12. Cleanliness: All feather and down stocks shall be thoroughly cleaned prior to use by washing, dusting, sterilizing or disinfecting.
13. Secondhand Feathers or Down: Either of these terms means any such material which has been previously used for any purpose and shall be so designated on the required label for secondhand material with the proper classification of such feathers or down.

HAIR:

Classifications

Horse Tail Hair
Horse Mane Hair
Cattle Tail Hair
Cattle Hide Hair (Body Hair)
Hog Hair
Goat Hair

1. Hair is the coarse filamentous epidermal outgrowth of such mammals as horses, cattle, hogs and goats. When used in the manufacture of bedding or as filling material thereof, it shall be clean, properly cured, free from epidermis, excreta or other foreign or objectionable substances or odors.
2. Curled Hair: This term applies when any hair has been curled. The appropriate designation as to origin shall appear on the label preceded by the word Curled.
3. Uncurled Hair: This term applies when any hair has not passed through a curling process. The appropriate designation as to origin shall appear on the label preceded by the word Uncurled.
4. Rubberized Hair: This term shall mean any hair treated with liquid latex or synthetic rubber. When hair is rubberized the designation on the label shall state whether the rubber is Latex or Synthetic.

5. **Rubberized Curled Hair Pieces:** This term shall mean trimmings and pieces of rubberized curled hair of indefinite size. The term shall be preceded by the term Latex or Synthetic.
6. **Hair Blends or Mixtures:** When hair of two different origins is used in a blend or mixture, the kind and percentage by weight of each shall be stated on the label.
7. **Hair and Fiber Blends or Mixtures:** When any other filling material of whatever origin is used in a blend or mixture with hair, the kind and percentage by weight of each such material shall be designated on the label.
8. **Hair Pad:** This term shall mean hair which is interwoven or punched on burlap or any other woven material or otherwise fabricated into a pad, including the application of latex or synthetic rubber as a component and as a factor in the fabricating process. Percentages shall be based on the hair and fiber content only. No reference to or inclusion of the burlap or woven material backing is required on the label nor is the quantity or percentage of rubber when the rubber is used solely as a binder element.
9. **Color:** Hair need not be identified as to color on the label, but if it is so identified it shall be as represented in all respects.
10. **Tolerance:** A tolerance of 10 percent by weight of the percentages stated on the label shall be permitted.
11. **Secondhand Hair:** This term shall mean any hair which has sustained prior use and such hair shall be so designated on the required second-hand label with the proper classification of such hair.
12. **Labeling Examples For Hair:**

Curled Hair Pad	{	Cattle Tail .. 15%	}	100%
		Hog 85%		
Curled Hair and Fiber Pad	{	Hog 70%	}	100%
		Sisal Fiber .. 30%		
Latex Rubberized Curled Hair Pad	{	Horse Mane . 35%	}	100%
		Hog 65%		
Cattle Hide Hair Felt Pad				100%

WOOL:

1. **Wool or Virgin Wool:** Either of these terms shall apply to the fleece of the sheep, or lamb, which has been scoured or scoured and carbonized. It shall not be the by-product of any process of manufacture nor shall it have sustained prior use. It shall be free from kemp and vegetable matter.

2. Choice Wool or Choice Virgin Wool: (Optional for those manufacturers who want to use and get credit for using a finer quality of wool). Either of these terms shall apply to Wool or Virgin Wool as defined above that is " $\frac{1}{4}$ blood" (48s) or finer in grade, according to the United States Standards for grades of wool, and shall be natural or bleached white in color. The fibers shall be reasonably uniform in length, viz; it shall contain no admixture of short wool fibers. The term Choice Wool or Choice Virgin Wool shall not be used in describing the component parts of Wool Blends or Mixtures.
3. Wool By-Products: This term shall include noils and fulling flocks from fabrics made entirely of new wool fibers.
4. Wool Waste: This term shall embrace all other by-products and wastes of machines in any process of manufacture employing only new wool fibers and shall include wool pills, and shank and tag wools.
5. Tanners Wool: This term shall apply to wool reclaimed from tanned sheepskins.
6. Wool Shoddy: This term shall apply to any wool fiber which has been spun into yarn, knit or woven into fabric and subsequently cut up, torn up, broken up, ground up or otherwise defabricated and shall be designated on the label as Wool Shoddy. Wool shoddy shall not contain in excess of five percent (5%) of fibers other than wool.
7. Wool Blends or Mixtures: When two or more of the above materials are used in a product, they shall be described on the label as required above in the order of their predominance.
8. Wool Batt or Wool Felt: Either of these terms shall be used only when wool fibers alone are garnetted or carded and used in layer form. Neither can be used when wool batting or wool felt scraps or clippings are stuffed or blown in the same manner as unfelted materials. Either of these terms must be followed by a listing of the component materials as required above.
9. Oil and Grease Percentages: When any wool filling material contains more than five percent (5%) oil, wool grease or other free fat, it shall be described as Oily.
10. Damaged Wool: This term shall be applied to wool, although new, which has been damaged through excessive exposure to the elements, faulty storage, fire, or in any other manner, or has begun to disintegrate.
11. Tolerance: Materials which contain not less than 95 percent wool shall be considered wool.
12. Secondhand Wool: This term shall apply to any wool which has been previously used for any purpose.

MISCELLANEOUS FILLING MATERIALS:

1. Casein Fiber: This term shall mean the textile filament or fiber made from caesin by chemical and mechanical processes.
2. Caesin Fiber Waste: This term shall mean the by-product of any preparing or spinning machinery through which the casein filaments or fibers pass in any operation prior to the weaving or knitting process and shall include "napper" and "fulling flocks."
3. Coco Husk Fiber: This term shall mean the fibrous growth obtained from the husk of the coconut.
4. Excelsior: This term shall mean shredded threadlike wood fibers, but shall not include waste products such as shavings, sawdust or similar waste. Terms such as Woodwool shall not be used to describe excelsior.
5. Flax Tow: This term shall mean the coarse, broken and refuse parts of flax separated from the fine fibrous parts in preparing the fibers for spinning.
6. Fur Fiber: This term shall mean the fine soft under fur, with or without the usual guard hair, removed from the tanned or untanned pelts of mammals of the class of furbearers. The name of the animal may be stated on the label, and when so indicated shall be a true statement.
7. Glass Fiber: This term shall mean the very fine filaments or fibers made of glass.
8. Hay: This term shall mean any grass, properly cured and dried, free from dust, burrs, sticks or other objectionable material.
9. Jute Fiber: This term shall mean the bast fiber derived from any species of the corchorus plant.
10. Jute Tow: This term shall mean the broken and refuse parts of jute separated from the fine fibrous parts in preparing the fibers for spinning.
11. Jute Waste: This term shall mean the by-product of any machines through which jute fiber passes in spinning into yarn or cordage, but prior to the process of weaving.
12. Kapok: This term shall mean the mass of fibers investing the seed of the kapok tree (*Ceiba pentandra*). Any additional statement, descriptive of the geographical origin or of the quality of such fibers, shall be a true statement when designated on a label.
13. Latex Foam Rubber: This term shall mean natural rubber which has been converted into a staple foamy mass and molded into suitable shapes for use in bedding products.
 - A. Latex Foam Rubber Pieces: This term shall mean latex foam rubber which has been cut or broken into pieces of indefinite size, but shall not apply to shredded latex foam rubber.
 - B. Shredded Latex Foam Rubber: This term shall mean latex foam rubber which has been subjected to a shredding process.

- C. Molded Shredded Latex Foam Rubber: This term shall mean shredded latex foam rubber molded together by use of an adhesive binder.
 - D. Synthetic Foam Rubber: This term shall mean any of the various artificial substances closely resembling natural rubber converted into a staple foamy mass and molded into suitable shapes for use in bedding products.
14. Latex Sponge Rubber: This term shall mean natural rubber expanded into cellular sheets and vulcanized in that state into slabs.
- A. Latex Sponge Rubber Pieces: This term shall mean latex sponge rubber cut or broken into pieces of indefinite size, but shall not apply to shredded latex sponge rubber.
 - B. Shredded Latex Sponge Rubber: This term shall mean latex sponge rubber which has been subjected to a shredding process.
 - C. Molded Shredded Latex Sponge Rubber: This term shall mean shredded latex sponge rubber molded together by use of an adhesive binder.
 - D. Synthetic Sponge Rubber: This term shall mean any of the various artificial substances closely resembling natural rubber expanded into cellular sheets and vulcanized in that state into slabs.
15. Milkweed Fiber: This term shall mean the surface fiber from the inside of the seed pods of milkweed plants. (*Asclepias*).
16. Moss: This term shall mean the processed material derived from the moss growth found in swamps and on trees.
17. Nylon: This term applies to a synthetic protein-like filament or textile fiber. (Polyamide).
18. Nylon Waste: This term shall mean the by-product of any preparing or spinning machinery through which the nylon filaments or fibers pass in any operation prior to the weaving or knitting process.
19. Palm Fiber: This term shall mean the fibrous material obtained from the leaf of the palm, palmetto or palmyra tree.
20. Rayon: This term shall mean the synthetic filament or fiber made from modified cellulose.
21. Rayon Waste: This term shall mean the by-product of any preparing or spinning machinery through which the rayon fibers pass in any operation prior to the weaving or knitting process and shall include "napper" and "fulling flocks."
22. Sea Grass: This term shall mean any of the material obtained from maritime plants or seaweeds.
23. Silk Waste: This term shall mean the by-product of any preparing or spinning machinery through which the silk filaments or fibers pass.

24. Sisal Fiber: This term shall mean the leaf fiber derived from the (Agave Sisalana) and similar species of Agaves.
25. Sisal Fiber Tow: This term shall mean the residual fibers left after the extraction of the spinnable sisal fiber from the leaf. For the purpose of these regulations, this includes the product known as Bagassi. It shall not contain over 3 percent (3%) pulp.
26. Sisal Fiber Waste: This term applies to the sisal fiber waste of cordage mills, including rope and cordage ends, but shall not contain knots and refuse.
27. Straw: This term shall mean the stalk or stem of grain, such as wheat, rye, oats, rice and the like, after threshing. The kind of straw need not be stated on the label, but if so indicated, shall be a true statement. It shall be free from shaff, beards, bristles, husks, glumes, dirt or other extraneous matter.
28. Tula Fiber: This term shall mean the leaf fiber derived from the (Tula istle) and similar species of Agaves; sometimes called Tulatex. The term Tulatex is a trade name and shall not be used.
29. Vinyon Fiber: This term shall apply to a synthetic filament or fiber which is a vinyl resin product prepared by the conjoint polymerization of vinyl chloride and vinyl acetate.
30. Vinyon Fiber Waste: This term shall apply to the by-product of any preparing or spinning machinery through which the vinyon filaments or fibers pass in any operation prior to the weaving or knitting process, and shall include "napper" and "fulling flocks."
31. Wood Fiber Pad: This term shall apply to wood which has been reduced to a fibrous state and subsequently fabricated into a flat resilient mass.
32. Cleanliness: All miscellaneous filling materials used in the manufacture of bedding products shall be clean and free from trash, pith, pulp, extraneous matter, oil and grease.
33. Fiber: This term shall mean any threadlike tissue. The term shall be preceded by a designation which will disclose the true source from which the fiber was obtained. Labeling examples for fiber would be Hemp Fiber, Flax Tow Fiber, etc.
34. Secondhand: This term shall be applied to any of the above materials which have been previously used for any purpose.

ADVICE RELATIVE TO STERILIZATION IS NEITHER LAW NOR RULE BUT IS BASED ON BOTH. ITS PURPOSE IS TO ASSIST MANUFACTURERS AND MERCHANTS TO PROPERLY COMPLY WITH THE LAW. IT INCLUDES OPINIONS AND INFORMATION SUPPLIED AS ANSWERS TO QUESTIONS MOST COMMONLY ASKED.

ADVICE RELATIVE TO STERILIZATION

1. **Steam Pressure:** A Steam pressure process, when approved by the Board, may be used to sterilize or disinfect any article of bedding or filling material.

Satisfactory Compliance: Articles of bedding or filling materials therefor sterilized or disinfected by this process shall be subjected to treatment by live steam for thirty (30) minutes at a pressure of fifteen (15) pounds and at a temperature of 250 degrees Fahr., or for twenty (20) minutes at a pressure of twenty (20) pounds and at a temperature of 260 degrees Fahr. Chamber must be steam tight, sufficiently strong to withstand the pressure applied, be equipped with visible pressure and temperature gauges and necessary safety devices. Chamber must be provided with wire or lattice work shelving which provides a minimum clearance of one (1) inch from bottom, top, sides and between articles of bedding being sterilized or disinfected.

2. **Dry Heat:** Dry hot air, when approved by the Board, may be used to sterilize or disinfect articles of bedding or filling materials thereof. Satisfactory Compliance: Sterilization or disinfection by the dry heat method requires developing and holding a temperature of 230 degrees Fahr. for a minimum period of two (2) hours after the temperature of 230 degrees Fahr. plus or minus 5 degrees is attained in an approved chamber. Steam, electricity or flue gases may be used to produce the heat but gas will not be approved for heating unless an indirect system is used where there could be no possibility of igniting the materials being sterilized or disinfected. A thermostat shall be connected with the heating device to provide and maintain a reasonably uniform temperature of 230 degrees Fahr. plus or minus 5 degrees Fahr. A recording thermometer shall be used to automatically record the temperature and time of each sterilization or disinfection period. The operator shall initial and date each sterilization or disinfection period on the recording thermometer charts and such charts shall be kept carefully filed for examination at any time by the Board.

3. **Formaldehyde and Moisture:** Formaldehyde gas in the presence of moisture, when approved by the Board, may be used to sterilize or disinfect articles of bedding or filling materials thereof which is not compressed to a degree in excess of the usual compression of cotton felt. Articles of bedding or filling materials shall be so spaced in approved sterilizing or disinfecting chamber as to allow free circulation of gas; not less than 4 inches on all sides and between articles. The exhaust from the sterilization or disinfection chamber shall discharge above the roof of building in such manner as will not create a health hazard. Formaldehyde being a toxic gas, provisions must be made to preclude any danger to employees in workroom. A minimum temperature shall be maintained in sterilization or disinfection chamber of not less than 70 degrees Fahr.

Satisfactory Compliance: Articles of bedding or filling materials thereof to be sterilized or disinfected by this method shall be treated with formaldehyde in a moist atmosphere not less than 70 degrees Fahr.

for a period of at least ten (10) hours. Formaldehyde gas shall be generated from the use of one (1) pint of formaldehyde solution (37%) to each 1,000 cubic feet of air space in sterilizing or disinfecting chamber or through the use of any commercial fumigators which generate an equivalent quantity of gas. The minimum quantity of solution permitted is two (2) ounces regardless of how small the sterilizing or disinfecting chamber is. The solution must be heated or boiled to release the gas. Chamber must be gas tight and equipped with air inlet and outlet. Tight closure gate valves shall be provided on both air inlet and outlet. Shelving shall be of wire or lattice type construction or mattress may be suspended from suitable hangers with proper spacing. Formaldehyde will not sterilize or disinfect unless moisture is present and the gas is used for the full period required, a minimum of ten (10) hours. Care must be taken that no fire hazard is present if a flame is used to vaporize the formaldehyde. This process is a germicidal treatment only and is not recommended as an insecticide.

NOTE 1. The safest and most convenient way to release the gas from the formaldehyde solution is to add to the solution one-half ($\frac{1}{2}$) the amount of potassium permanganate. This boils the solution and releases the gas. The moist atmosphere in the sterilization or disinfecting chamber may be obtained by thoroughly sprinkling the floor of the chamber with warm water just before beginning the sterilization or disinfection process.

NOTE 2. There are several types of commercial "fumigators" on the market. Any of these which uses formaldehyde of the proper quantity and quality will be acceptable but those which contain but 2 ounces of "active ingredient" and yet purport to be able to sterilize or disinfect the contents of a room having 1,000 cubic feet of space will not be accepted unless a sufficient number are used to supply gas in the quantity required herein, i.e., the equivalent of gas generated from 1 pint of formaldehyde solution (37%) to each 1,000 cubic feet of space.

NOTE 3. The specific gravity of formaldehyde solution is such that 1 pint equals approximately 15 ounces. To figure the necessary amount of formaldehyde to use, based upon the size of the sterilizing or disinfecting chamber, multiply the length, height and width in feet to obtain the cubical area. Then multiply the cubical area by 15 and point off the three right hand figures. The result will be the number of ounces or "fifteenths of a pint" required. EXAMPLE: Chamber is 8'x7'x6' 6" equals 364 cubic feet x 15 equals 5.460 or 6 ounces (next higher unit). Use 6 ounces of formaldehyde solution or 6/15 of a pint for a chamber containing 364 cubic feet of space.

4. FEATHERS OR DOWN:

- (1). New Feathers or Down: Sterilization or disinfection application must indicate that feathers or down are thoroughly washed and rinsed, that live steam and dry heat are applied and that feathers or down are free of dust or dirt on completion of the process.

- (2). Secondhand Feathers or Down: Secondhand feathers or down articles of bedding will be considered as having been sterilized or disinfected when the contents and ticking are kept intact without opening and washed by a commercial laundry method with subsequent drying to remove moisture; or when processed by a method for which approval has been obtained from the Board.

5. HAIR:

- (1). New Hair: Sterilization or disinfection application must indicate the entire process used for washing and curling (if curled), and that at some point during the process the hair remains in boiling water a sufficient period (not less than 1 hour) to kill all pathogenic organisms.
- (2). Secondhand Hair: Secondhand articles of bedding will be considered as having been sterilized or disinfected when the hair is removed from the ticking and washed by a commercial laundry method and subsequently dried to remove all moisture and when the ticking is also washed and subsequently dried; or when processed by a method for which approval has been obtained from the Board.

6. WOOL:

- (1). New Wool: Sterilization or disinfection application must indicate whether raw wool or previously scoured and carbonized wool is to be treated. The processing of raw wool must be set forth in detail and indicate that at some point during the scouring and carbonizing, the wool is subjected to wet or dry heat or acid treatment sufficient to kill all pathogenic spores and microorganisms. Wool fibers reclaimed from new fabric need not be re-sterilized or re-disinfected.
- (2). Secondhand Wool: Secondhand wool articles of bedding will be considered as having been sterilized or disinfected when the contents and cover are kept intact without opening and washed or dry cleaned by a commercial laundering or dry cleaning method; or when processed by a method for which approval has been obtained from the Board.

7. Dry Cleaning: Dry cleaning, when approved by the Board, may be used to sterilize or disinfect articles of bedding or filling materials thereof.

Satisfactory Compliance: Sterilization or disinfection by dry cleaning shall be deemed to have been met when bedding articles or materials have been subjected to a commercial dry cleaning process.

8. Other Method: Articles of bedding or filling materials thereof may be sterilized or disinfected by any other method which is safe to use, and is adequately proficient to thoroughly sterilize or disinfect the product or material to be processed, and for which approval has been given by the Board.

State of Washington
DEPARTMENT OF HEALTH
Seattle

Chapter 183, Laws of 1951

RELATING TO
UPHOLSTERED FURNITURE
AND
BEDDING INDUSTRY

**STATE OF WASHINGTON
DEPARTMENT OF HEALTH**

Chapter 183, Laws of 1951

Relating to furniture and bedding; defining terms; prescribing the duties of certain officers; creating the furniture and bedding advisory council; prescribing fees, providing penalties, and repealing sections 70.66.010 to 70.66.160, inclusive, RCW.

Be it Enacted by the Legislature of the State of Washington:

Section 1. When used in this act, the following terms, words or phrases shall have the following meaning:

"Person" includes individual, copartnership, association, firm, auctioneer, trust and corporation and the agents, employees and servants of any of them.

"Sell" or any of its variants includes any of, or any combination of, the following: Sell, offer or expose for sale, barter, trade, deliver, give away, rent, consign, lease, possess with an intent to sell or dispose of in any other commercial manner. Merchandise found on sales floors or in places from which sales or deliveries are made, shall be assumed to be for sale.

"Department" refers to department of health.

"Director" refers to the director of health or his authorized representatives.

"Annually," or any of its variants, means that period beginning July first of each year and ending June thirtieth of the succeeding year, or any unexpired portion of that period.

"Certificate" means any registration certificate issued by the department of health.

"Upholstered furniture" includes any furniture, including children's furniture, movable or stationary, which

(1) is made or sold with cushions or pillows, loose or attached, or

(2) is itself stuffed or filled in whole or in part with any material, hidden or concealed by fabrics or any other covering, including cushions or pillows belonging to or forming a part thereof, together with the structural units, the filling material and its covering and its container, that can be used as a support for the body of a human being, or his limbs and feet when sitting or resting in an upright or reclining position.

"Bedding" means any quilted pad, packing pad, mattress pad, hammock pad, mattress, comforter, bunk quilt, sleeping bag, box spring, studio couch, pillow, cushion, hassock or any bag or container made of leather, cloth or any other material or any other device that is stuffed or filled in whole or in part with concealed material in addition to the structural units, all of which may be used by any human being for sleeping, resting, or reclining purposes.

"Bedding" also includes pillows which are hereby defined as a bag or a case of cloth filled or stuffed with feathers, down, kapok, cotton, hair, wool, or other sanitary filling not prohibited by the regulations of this act to be used, or that may be used, as a rest or a support for the head in reclining, resting, or sleeping.

"Filling material" means cotton, wool, kapok, feathers, down, or any other material, or any combination thereof, loose or in batting, pads, or any other prefabricated form, concealed or not concealed, to be used, or that may be used, in articles of bedding or upholstered furniture.

"Secondhand" means any material or article of which prior use has been made, and includes defabricated material, thread, and yarn, not otherwise classed as new by the regulations of this act.

Any article of upholstered furniture or bedding is secondhand if it contains any secondhand material in whole or in part.

Any article of upholstered furniture or bedding on sales floors in a private residence or room, which is not separated from living quarters, is secondhand furniture or bedding.

"Manufacturer" means a person who, either by himself or through employees or agents, makes any article of upholstered furniture or bedding in whole or in part, or who does the upholstery or covering of any structural unit or part thereof, using either new or secondhand material.

A "wholesaler" is a person who sells any article of upholstered furniture or bedding or filling material to another for purpose of resale.

A "retailer" is a person who sells any article of upholstered furniture or bedding or filling material to a consumer or user of the article purchased.

"Repairer" or "renovator" means a person who repairs, makes over, re-covers, re-stores, renovates, or renews upholstered furniture or bedding.

"Transient repairer or renovator" means any person who travels from place to place and repairs upholstered furniture or renovates bedding with or without benefit of mobile facilities but who has no permanent shop or address.

"Sterilizer" means any person certified by the department to sterilize any upholstered furniture, bedding, or filling material relating thereto.

"Fumigator" means any person certified by the department to fumigate any article of upholstered furniture or bedding or filling material relating thereto.

"Supply dealer" means any person certified by the department to manufacture, process, or sell at wholesale any felt, padding, pads, or loose material in bags or containers, concealed or not concealed, to be used, or that could be used, in articles of bedding or upholstered furniture.

"Supply depot" means any warehouse or storeroom used as a merchandising center or supply outlet, to supply, or for the purpose of supplying, merchandise subject to this act, either directly or indirectly at wholesale or retail, which merchandise is sold or held for the purpose of sale to any person regardless of whether the purchaser is in business or in the employ of any person.

"Auctioneer" means any person who sells at auction to the highest bidder, either for himself or another party, at public or private sale, any article or material regulated by this act.

"Residence dealer" means any person who sells any new or used article of upholstered furniture or bedding from his own or another person's place of abode or from any salesroom not having a recognized and ordinary store entrance.

"Slip cover" means any casing or cover without any filling material and meeting any of the following requirements:

(1) Which is for use or is to be placed on or over any manufactured article or upholstered furniture or bedding;

(2) Which covers or conceals the upholstered furniture or bedding in whole or in part;

(3) Which is closed or held in place by snaps or hooks and eyes or lacing so that it may be removed without the use of tools or instruments;

(4) Which is not permanently attached by tacking, sewing, or in any other manner.

Any person engaged exclusively in the manufacture of slip covers shall not be required to have a certificate under the provisions of this act.

"Branch" means any subordinate establishment situated apart from the parent house, maintaining a separate service to the trade.

"Owner's own material" means any article or material belonging to any person for his own or his tenant's use that is sent to any manufacturer, repairer or renovator to be repaired or renovated or used in repairing or renovating.

Sec. 2. The director shall administer this act.

Sec. 3. It shall be unlawful for any person to engage in a business regulated by this act unless he has first obtained the proper certificate as required by this act.

Sec. 4. Except as otherwise provided in this act, a person who advertises, solicits, or contracts to manufacture, repair, or renovate upholstered furniture or bedding and either does the work himself or employs others to do it for him, shall secure the particular certificate required by this act for the particular type of work that he solicits or advertises that he will do, regardless of whether he has a shop or factory.

Sec. 5. Every person manufacturing either upholstered furniture, or bedding, or both, shall annually obtain a furniture and bedding manufacturer's certificate from the department bearing a registration number assigned by the department.

Sec. 6. A wholesaler of either upholstered furniture, or bedding, or both, unless he holds a furniture and bedding manufacturer's certificate, shall annually obtain a wholesale furniture dealer's certificate from the department.

Sec. 7. Every person repairing upholstered furniture or renovating bedding, unless he holds a furniture and bedding manufacturer's certificate, shall annually obtain a repairer's and renovator's certificate from the department bearing a registration number assigned by the department.

Sec. 8. Every person selling any upholstered furniture or bedding at retail, including upholstered antique furniture, regardless of its condition, unless he holds a furniture and bedding manufacturer's certificate, a wholesale furniture and bedding manufacturer's certificate, a wholesale furniture and bedding dealer's certificate, or a repairer's and renovator's certificate, shall annually obtain a retail furniture and bedding dealer's certificate from the department. This does not apply to upholstered furniture or bedding sold by a peace officer when so ordered by a court: "Provided, That the provisions of this section and of section 7 shall not apply to any person repairing and/or selling the furnishings of his own household."

Sec. 9. Every person manufacturing, processing, or selling at wholesale any felt or batting or any pads or loose material in bags or containers for use in bedding or upholstered furniture, unless he holds a furniture and bedding manufacturer's certificate shall annually procure a supply dealer's certificate from the department bearing a registration number assigned by the department. Each and every branch is likewise subject to the provisions of this act.

Sec. 10. Every person in any class shall secure a separate certificate for each branch. But one whose manufacturing plant is located in another state or foreign country and who is certified to manufacture upholstered furniture or bedding for sale in Washington, may have one wholesale outlet covered by the certificate issued to the factory.

Sec. 11. Every person doing business at the same address under more than one firm name is subject to the registration provisions for each firm name.

Sec. 12. The department may reciprocate with other states regarding the mutual recognition and acceptance of labels in interstate commerce, the recognition of manufacturer-shipper identification numerals, and in such other manner as may be consistent with the best interests of the state of Washington.

Sec. 13. The department shall prescribe the procedure relative to assignment or reassignment of registration numbers.

Sec. 14. This act shall not apply to upholstered furniture or bedding manufactured, repaired, or renovated which is for sale outside the borders of this state, except that if such articles when manufactured, repaired, or renovated, contain in whole or in part, secondhand materials, such articles shall first be sterilized, fumigated, or otherwise treated as required by this act.

Sec. 15. Secondhand upholstered furniture or bedding, or secondhand filling materials to be used, or that may be used, in upholstered furniture or bedding, received from outside of this state shall comply with all provisions of this act before being accepted, sold or delivered, either directly or indirectly by any person.

Sec. 16. Every person importing or selling either at wholesale or retail, directly or indirectly, any unlabeled foreign-made upholstered furniture or bedding, shall fully comply with all the requirements of this act, including the registration and labeling provisions before any such upholstered furniture or bedding can be offered or exposed for sale.

Sec. 17. A person shall not, at wholesale or retail or otherwise, directly or indirectly make, repair, renovate, or sell any upholstered furniture or bedding for use in any household or place of abode which can be used by human beings, if it is made of new or secondhand material which is concealed by fabric or any other covering, unless such article is plainly and indelibly stamped or labeled with a tag or other marking as provided in this act and approved by the department. The presence of any article or material regulated by this act on sales floors or premises from which sales or deliveries are made shall be presumptive evidence of intent to sell or use.

Sec. 18. A person shall not, directly or indirectly, sell in this state, at wholesale or retail or otherwise, any secondhand or previously used article of upholstered furniture or bedding or any

secondhand or previously used filling material to be used, or that could be used in the manufacture, repair, or renovation thereof, unless such article or material has, subsequent to its last use, been sterilized, fumigated, or otherwise treated by a process approved by the department and labeled in accordance with the provisions of this act.

Sec. 19. Labels to be attached to articles of upholstered furniture and bedding regulated by this act shall not be less than six square inches in size and shall show or state that the filling material is "new," "secondhand," or "owner's own," as the case may be.

Sec. 20. Filling material shall be described by true name and grade. When more than one kind or grade is used in a mixture the component parts shall be described in order of their predominance. Feather and down contents shall be shown by percentage. The manner of describing the various filling materials, including the language required by law, together with such other descriptive information as may be required, and the type size, placement and the color of ink thereof, shall be prescribed by the department. In addition to the prescribed language appearing on the label, the label shall show or state the registration number of the manufacturer as assigned by the department.

Sec. 21. If desired, the label may also describe the frame, cover, and style of the article to which it is attached. When such descriptive statements are made they must, in fact, be true statements. Before display, sale, or delivery of any articles of upholstered furniture or bedding, all labels required by this act shall be securely attached to the article at the factory or shop. Such labels shall be fixed in such position that they may be conveniently examined.

Sec. 22. The finished size of bed pillows shall be stated on the label. Quilt and comforter labels shall show the "cut" size on the label and a reasonable tolerance from the "cut" size measurement shall be established by regulation. Labels appearing upon decorative pillows, boudoir and fancy cushions, need not show the finished size. Slip-seat chairs and benches or upholstered stools and similar articles of upholstered furniture, having a wood or metal bottom, may be clearly and indelibly stamped at the factory in lieu of the label. The stamp to be used shall not be smaller than the minimum size approved by the department. When a stamp is approved in lieu of a label, such stamp shall show or state such information as would be required on the label which it replaces.

Sec. 23. Before being sold, offered, or exposed for sale, cotton, wool, kapok, feathers, down, or any other material or any combination thereof, loose, in batting, pad, or any other prefabricated form, concealed or not concealed, to be used, or that could be used, in articles of bedding or upholstered furniture, shall be labeled with a tag or other device setting forth its true content in accordance with this act.

Sec. 24. All feathers and down, excepting raw stocks sold in bulk or package, shall be labeled with a tag or other marking upon each and every parcel setting forth the true contents according to the requirements of this act.

Sec. 25. Any person who renovates or repairs upholstered furniture or bedding for such owner's or customer's own use or by his tenants, shall attach, when completed, the "owner's own material" label approved by the department.

Sec. 26. The "owner's own material" label shall be securely attached to the article at the factory or shop and it shall be fixed in such position that it may be conveniently examined.

Sec. 27. The material from which furniture and bedding labels are made shall be a fabric of good quality approved by the department.

Sec. 28. No mark, tag or sticker, or any other device shall be placed upon labels required hereby by any person in such a way as to cover the statements required by law.

Sec. 29. It shall be unlawful to use on any label any misleading term or designation or term or designation likely to mislead.

Sec. 30. Every person except the purchaser for his own use, who attempts to or does remove, deface, alter, or causes to be removed, defaced or altered, the label or any mark or statement placed upon any upholstered furniture, bedding, or material under the provisions of this act, is guilty of a violation of this act.

Sec. 31. Filthy articles of upholstered furniture or filthy articles of bedding cannot be sold, offered for sale, or exposed for sale.

Sec. 32. No person shall engage in the business of sterilizing, fumigating, or otherwise treating articles or materials subject to the regulations of this act without first obtaining the proper registration certificate.

Sec. 33. Every article of upholstered furniture or bedding from any private or public hospital, jail, or any other institution, or which has been used by any person suffering from an infectious or contagious disease, shall be sterilized before it is repaired or renovated.

Sec. 34. New, sterilized, fumigated, or otherwise treated articles of upholstered furniture or bedding or materials shall at all times be kept separate from secondhand articles or materials not sterilized, fumigated, or otherwise treated.

Sec. 35. Every person who uses the required furniture and bedding label coming under the provisions of this act or who uses any other type of tag or device to falsely advertise or misrepresent any merchandise to which the bedding or furniture label is required to be attached is guilty of a violation of this act.

Sec. 36. Whenever the words "bat," "batting," or "felt" are used in any statement required by this act, the material designated shall be in layers as processed by garnetting or carding machines and the statement on the label shall indicate whether the bat is a "staple cotton bat" or a "cotton linters bat," or such other true statement as may be in order.

Sec. 37. Any and all filling material to be used in the manufacture of upholstered furniture or bedding shall be free from foreign matter, dirt or trash.

Sec. 38. The state board of health shall by regulation, establish grades, specifications, and tolerances on the kinds and qualities of materials which are used or intended to be used or that may be used in the manufacture of upholstered furniture or bedding, provided such grades, specifications and tolerances are not in conflict with accepted national standards relating thereto, and may approve or adopt standard designations and rules for the proper labeling of articles filled with those materials, provided such rules are not in conflict with any of the provisions of this act, and may adopt such other rules and regulations as may be necessary for carrying out the provisions of this act.

Sec. 39. Every person, upon receiving upholstered furniture or bedding for repair or renovation, shall securely affix immediately a tag of identification showing the owner's or dealer's name and address and the date upon which it was received. The tag shall remain affixed until actual repair or renovation is begun. Secondhand springs, structural parts and filling materials shall be likewise identified.

Sec. 40. The premises, delivery equipment, machinery, appliances and devices of all persons under this act shall at all times be kept free of refuse, dirt, contamination, insects or vermin.

Sec. 41. The annual registration fee for such certificates granted under this act shall be in accordance with the following table and shall be due and payable on or before July 1st of each year:

Furniture and bedding manufacturer's certificate	\$35
Wholesale furniture and bedding dealer's certificate	\$35
Supply dealer's certificate	\$35
Supply depot	\$35
Furniture repairer's and renovator's certificate	\$25
Sterilizer's or fumigator's certificate	\$25
Retail furniture and bedding dealer's certificate	\$10
Auctioneer's certificate	\$10

The schedule of fees prescribed in this act constitutes a maximum, and the director, with the approval of the advisory council, may make a proportionate reduction in the schedule for any year upon the basis of the department's needs for the proper enforcement of this act.

Sec. 42. All registration fees shall be paid in full up to the following July 1st. Prorated license fees shall be on a quarterly basis beginning as of July 1st, October 1st, January 1st, April 1st.

Sec. 43. Any person not licensed during the last preceding fiscal year may obtain a certificate on the prorated basis by payment of the registration certificate fee beginning the quarter in which he engages in business.

Sec. 44. Renewal registration fees are payable on or before July 1st. When such fees are not paid in full before September 1st they shall become delinquent and there shall be added to the requisite fee a penalty of twenty per cent. If such fee and delinquent penalty are not paid on or before October 1st the licensee shall be subject to such further penalties as provided elsewhere in this act.

Sec. 45. All monies received under this act shall be paid over to the state treasurer at the close of each month. Expenses for carrying out the provisions of this act shall be obtained from these monies. The department shall maintain separate records showing receipt and expenditure of such monies.

Sec. 46. The director shall have access to any premises or to any records held by any person containing any information pertaining to any materials or articles affected by and subject to the provisions of this act. They may inspect materials and structural parts intended to be used in the manufacture of upholstered furniture or bedding, may open such articles or parts thereof for the purpose of inspecting concealed filling material and may take either the entire article or samples of filling material in such quantities as may be necessary for laboratory analysis.

Sec. 47. When the director determines that any secondhand or damaged article of upholstered furniture or bedding for sale, or any materials intended to be used in the manufacture of any article or articles of upholstered furniture or bedding are detrimental to public health, he may condemn, withhold from sale, seize, or destroy any such article or articles.

Sec. 48. The tag to be affixed to any article of condemned upholstered furniture or bedding or any material by a representative shall be a colored tag and shall contain such information as may be required by the department.

Sec. 49. The failure of any person to produce upon demand of the director any article or material that has been condemned or ordered held on an inspection notice is a violation of this act.

Sec. 50. Every person who violates any of the provisions of this act is guilty of a misdemeanor and upon conviction shall be punished by a fine of not less than fifty dollars nor more than five hundred dollars or by imprisonment in the county jail for not less than thirty days nor more than six months or by both such fine and imprisonment.

Sec. 51. The unit for a separate and distinct offense in violation of this act is each and every article of improperly labeled, or not labeled, upholstered furniture or bedding made, repaired, re-covered, renovated, sterilized, fumigated, or otherwise treated, sold, exposed or offered for sale, delivered, consigned, rented or possessed with intent to sell contrary to the provisions of this act.

Sec. 52. There is hereby created a furniture and bedding advisory council to the department which shall consist of the director as secretary and seven members to be appointed by the governor. The seven appointive members shall be persons who, because of their vocations, employment or affiliations, are qualified to represent the various branches of the affected industries. Members shall be appointed for a seven-year term, except that in the initial instance following the effective date of this act, one member shall serve for one year, one member for two years, one member for three years, one member for four years, one member for five years, one member for six years, and one member for seven years, as the governor may designate. Vacancies of unexpired terms shall be filled by appointment by the governor.

Sec. 53. Appointments to the advisory council, except to fill vacancies, shall be as of July 1st and apportioned as follows: One representing the upholstered furniture manufacturing industry; one representing the bedding manufacturing industry; one representing the retail furniture industry; one representing the sterilizing and fumigation industry; and three having no commercial interest, affiliation or relationship in or to the industry, to represent the public. The governor shall fill such vacancies as may occur in the membership of the council and a member so appointed shall serve during the unexpired term for which his predecessor was appointed. The furniture and bedding

advisory council shall choose one of its members to act as chairman and shall meet once each year at a time and place to be designated by the chairman: *Provided, however,* The chairman may, at the written request of two members of the council, or, at his own option, call a special meeting of the council to discuss such matters as may, in his opinion, require interim discussion and advice.

Sec. 54. The governor may remove any member of the council for misconduct or when he is no longer connected with that segment of industry in whose behalf he was appointed. All advisory council members shall serve without pay. The advisory council shall have full power to:

- (1) Consider all matters submitted to it by the director;
- (2) Recommend such rules and regulations as may in their opinion be necessary in carrying out the provisions of this act;
- (3) Make recommendations to the state merit system and the director relative to the qualifications and duties of the representatives provided for in this act;
- (4) Advise regarding enforcement policy and other such matters as may be pertinent to the purpose and intent of this act.

Sec. 55. If any provision of this act or the application thereof to any person or circumstance shall be held invalid, such invalidity shall not affect the provisions or the application of this act which can be given effect without the invalid provision or application, and to this end the provisions of the act are declared to be severable.

Sec. 56. Sections 70.66.010 to 70.66.160, inclusive, RCW, as derived from chapter 125, Laws of 1931, are repealed. [Rep. R.R.S. §§ 6294-1 to 6294-17 incl.]

Passed by the House February 28, 1951.

Passed by the Senate March 6, 1951.

Approved by the Governor March 16, 1951.

WISCONSIN

146.04 MISCELLANEOUS HEALTH PROVISIONS

146.04 Mattresses and upholstering. (1) Whoever manufactures for sale, offers for sale, sells, delivers, or has in his possession with intent to sell or deliver any mattress which is not properly branded, or labeled; or whoever uses, in whole or in part in the manufacture of mattresses, any material which has been used, or has formed a part of any mattress, pillow or bedding used in or about public or private hospitals or on or about any person having a communicable disease; or dealing in mattresses, has a mattress in his possession for the purpose of sale, or offers it for sale, without a brand or label as herein provided, or removes, conceals or defaces the brand or label, shall be fined not less than twenty-five nor more than five hundred dollars, or imprisoned not to exceed six months, or both. The brand or label herein required shall contain, in plain print in the English language, a statement of the material used, whether they are, in whole or in part, new or secondhand, and the qualities. Such brand or label shall be a paper or cloth tag securely attached. A mattress within this section is a quilted, stuffed pad, to be used on a bed for sleeping or reclining purposes.

(2) Any person upholstering or reupholstering any article, or who manufactures for sale, offers for sale, sells or delivers, or who has in his possession with intent to sell or deliver anything containing upholstering, without a brand or label as herein provided or who removes, conceals or defaces the brand or label, shall be punished as provided in subsection (1). The brand or label shall contain, in plain print in English, a statement of the kind of materials used in the filling and in the covering, according to the grades of filling and covering used by the trade, whether they are in whole or in part new or secondhand, and the qualities, and whether, if secondhand, they have been thoroughly cleaned and disinfected. Such brand or label shall be a paper or cloth tag securely attached.

(3) If the industrial commission believes this section is being or has been violated, it shall advise the attorney-general, giving the grounds of its belief; and the attorney-general or, under his direction, the district attorney, shall forthwith institute proceedings for enforcement and punishment.

Association of Bedding & Furniture Law Officials

PREFACE

Presented herein is an itemized list of definitions, nomenclature and terms that are commonly used and as recognized for the various filling materials employed in the manufacture and sale of upholstered furniture and bedding products. Most states in the nation have a law and regulations controlling to a varied extent the processing, sale and use of filling materials and the manufacture, renovation and sale of upholstered furniture and items of bedding. These definitions are an essential and a mandatory part of the labeling requirements of these state laws. The long-range program of the ABFLO is to standardize these definitions for national uniformity among all states having such law.

It must be recognized that a state law is often explicit and mandatory as to the meaning, application and use of specific definitions. Therefore, uniformity or standardization of terms and definitions for all filling material among all states is not now obtainable and will depend in instances upon legislative amendments to existing laws.

This list reflects uniformity where uniformity exists and specifies for each definition its mandatory use, acceptable use or prohibited use by the respective states having applicable law and contributing to a nationwide poll. Its purpose is to inform the manufacturer, particularly where engaged in inter-state shipments, on the labeling requirements of the various states and, also, to accent the lack of uniformity where lack of uniformity exists to those states constituting a minority of individual and contrary requirements on specific definitions with the hope that positive effort will prevail for ultimate conformity among all states in the nation.

COTTON

1. COTTON

Cotton, virgin cotton or staple cotton: the staple fibrous growth removed from cottonseed in the usual process of ginning (first cut from seed) not containing any foreign material. Presence of usual amount of leaves, hull, etc. shall not be considered foreign material. Term "cotton" alone shall not be used.

Mandatory in all states except Indiana.

Term "cotton" acceptable if blown into mattress in unfelted condition.

2. COTTON
LINTERS

Fibrous growth removed from cottonseed subsequent to ginning. Term "linters" alone shall not be used.

Mandatory in all states.

3. COTTON
BY-PRODUCTS

Fibers removed from various machine operations in manufacture of cotton yarn up to but not including process of spinning and includes following materials commonly known in cotton mill terms as cotton comber, cotton card strips, cotton vacuum strips, cotton fly and cotton picker. By-products may be designated by applicable mill term.

Mandatory in all states except

California - Mill term mandatory.

Oregon - " " "

Connecticut - Mill term specified or term "cotton fiber" optional.

4. COTTON
WASTE

Comber, noils, card strips, vacuum strips or strippings, fly, picker, notes and sweepings containing more than seven per cent (7%) but not more than ten per cent (10%) hull, leaf, stem, pulp, etc. shall be classified waste.

Mandatory in all states except

Connecticut - Prohibited.

Oregon - When trash, shale, shell, hull or seed particles exceed five per cent (5%) same shall be termed "dirt" and be so designated by percentage by weight. Over ten per cent (10%) material unfit for use.

Washington -- Fibrous by-products removed from various machine operations necessary in manufacture of cotton products but shall not include grades defined in No. 3. Napper flocks from new material classified "cotton waste."

5. COTTON FELT-"A" Felt made of mixture of any of the following: staple cotton, cotton linters or cotton by-products shall be designated as cotton felt. Percentages of component parts of each grade shall be listed in order of their predominance stating percentage by weight of each.

Mandatory in Arkansas, California, Colorado, City of Detroit, District of Columbia, Georgia, Maine, Massachusetts, Missouri, Oregon, Pennsylvania, Rhode Island, South Carolina, Tennessee, Utah, Washington, West Virginia.

Acceptable in Connecticut, Florida, Louisiana, Maryland, North Carolina, Ohio, Indiana, Virginia.

Prohibited in New York, Oklahoma, Texas.

6. COTTON FELT-"B" Felt made of mixture of any of the following: staple cotton, cotton linters or cotton by-products shall be designated as cotton felt.

Acceptable in Connecticut, Florida, Louisiana, Maryland, North Carolina, Ohio, Indiana, Virginia.

Prohibited in New York, Oklahoma, Oregon, Texas.

7. BLENDED
COTTON FELT Felt made of mixture of any of the following: staple cotton, cotton linters or cotton by-products.

Mandatory in New York, Oklahoma, Texas, Virginia.

Prohibited in Oregon.

Acceptable in other states.

8. STAPLE
COTTON FELT Felt made entirely of staple cotton.

Acceptable in all states.

HAIR

9. HAIR Coarse filamentous epidermal outgrowth of mammals as horses, cattle, hogs and goats used in the manufacture of bedding, upholstered furniture or filling materials. It shall be clean, properly cured, free from epidermis, excreta or other foreign or objectionable substances or odors.

Mandatory in all states.

10. HAIR MIXTURES Hair of different animal origin used in blend or mixture. Kind and percentage by weight of each shall be stated on the label. When materials other than hair are used in a blend or mixture with hair, kind and percentage by weight of each material shall be designated.
- Mandatory all states except North Carolina. Percentages not required.
11. HAIR CLASSIFICATION Hair is to be classified according to the body origin as horse tail hair, horse mane hair, cattle tail hair, cattle hide (body) hair, hog hair, goat hair and shall be so labeled.
- Mandatory in all states except Florida and North Carolina. Designation of tail, mane or body not required.
12. CURLED HAIR Hair which has been curled. Appropriate designation as to origin shall appear on label preceded by word "curled."
- Mandatory in all states.
13. DYED HAIR OR BLEACHED HAIR Hair that is dyed or bleached shall be indicated on the label as "dyed" or "bleached" respectively.
- Mandatory in all states except
- | | | |
|----------------|---|------------------------------|
| Florida | - | See Colored. |
| New York | - | " " |
| North Carolina | - | " " |
| Virginia | - | " " |
| Indiana | - | Acceptable but not required. |
14. HAIR TOLERANCE Tolerance of ten per cent (10%) by weight of percentage stated on label permitted.
- Acceptable in all states except
- | | | |
|------------|---|---|
| California | - | Tolerance of five per cent (5%) allowed. |
| Oregon | - | Trash over five per cent (5%) but less than ten per cent (10%) shall be termed "dirt" and be so designated by percentage of weight. Over ten per cent (10%) material unfit for use. |

FEATHERS AND DOWN

15. DOWN Soft undercoating of waterfowl consisting of light fluffy filaments grown from quill point without quill shaft. Name of fowl from which down is obtained may be designated, such as goose down, duck down. Loose down fibers in excess of ten per cent (10%) shall be designated down fiber.
- Acceptable in all states except Connecticut, Maryland, Oregon, Washington. Name of fowl and color must be stated.
16. DOWN FIBER Single strand of fiber or barb detached from down plume and plumules which are not joined or attached to each other.
- Acceptable in all states.
17. LABELING DOWN The following composition specified for items labeled as containing "down."
- | | |
|---|-------|
| A. Down (pure) - Minimum content | = 80% |
| B. Balance - Maximum content | = 20% |
| Composed of any combination of the following: | |
| 1. Down Fiber - Maximum | = 10% |
| 2. Small water fowl feathers including plumules - Maximum | = 10% |
| 3. Feather Fiber - Maximum | = 5% |
| 4. Quill Feathers, damaged feathers, etc. - Maximum | = 1% |
| 5. Residual Matter - Maximum | = 2% |
- Acceptable in Florida, Georgia, Louisiana, North Carolina, Ohio, Oklahoma, Rhode Island, Tennessee, Texas, Virginia, West Virginia.
- Prohibited in Connecticut, Indiana, New York, Oregon, Maryland.
18. GOOSE FEATHERS Feathers of goose, whole in physical structure with natural form and curvature.
- Mandatory in all states.
19. DUCK FEATHERS Feathers of duck, whole in physical structure with natural form and curvature.
- Mandatory in all states.

20. **WATER FOWL
FEATHERS** May be used to designate mixtures of goose and duck feathers.
- Acceptable in all states except California, Connecticut, City of Detroit, Maryland, Massachusetts, Oregon, Washington.
21. **TURKEY
FEATHERS** Feathers of turkey in whole physical structure.
- Mandatory in all states.
22. **CHICKEN
FEATHERS** Feathers of chicken in whole physical structure.
- Mandatory in all states.
23. **LAND FOWL
FEATHERS** May be used to designate mixtures of turkey and chicken feathers.
- Acceptable in Louisiana, Oklahoma, Texas.
- Prohibited in all other states.
24. **FEATHER
DESIGNATION** Term feathers as designation shall not be used alone.
- Mandatory in all states.
25. **BROKEN
FEATHERS** Broken feathers in excess of allowed tolerance shall be designated with name of feathers; e.g., "broken chicken feathers."
- Mandatory in all states except Oregon, Utah, and Washington. See "damaged feathers."
26. **DAMAGED
FEATHERS** Feathers which have been materially broken, injured by insects or depreciated from the original value in any manner. Damaged feather in excess of two per cent (2%) of the feather content shall be stated with percentage by weight; e.g., "damaged chicken feathers."
- Mandatory in Oregon, Utah, Washington.
- Acceptable in Connecticut, Georgia, Indiana (with ten per cent (10%) tolerance), Louisiana, North Carolina, Ohio, Virginia, West Virginia.
- Prohibited in Florida, New York, Oklahoma, Tennessee, Texas.

27. STRIPPED
FEATHERS
- With name of fowl from which feathers originated designate feather barbs stripped from main stem or quill but not separating barbs from feather into feather fiber; e.g., "stripped goose feathers."
- Mandatory in all states except Oregon, Washington.
See "crushed and/or damaged feathers."
28. CRUSHED
FEATHERS
- Crushed feathers with name of fowl from which feathers originated designate feathers processed through so-called curling machine which has changed original form of feathers without removing quill; e.g., "crushed duck feathers." Crushed feathers as designation shall not be used alone.
- Mandatory in all states.
29. CHOPPED
FEATHERS
- With name of fowl from which feathers originated designate feathers processed through chopping machine which has cut feathers into small pieces; e.g., "chopped duck feathers." Chopped feathers as designation shall not be used alone.
- Mandatory in all states except Oregon, Washington.
See "crushed feathers."
30. FEATHER
FIBERS
- With name of fowl from which feather originated designates barbs of feathers separated by processing from quills but free from quills; e.g., "chicken feather fibers."
- Acceptable in Indiana.
- Mandatory in all other states.
31. PLUMULE
- Small downy water fowl feathers with underdeveloped soft and flaccid quill, with barbs or filament undistinguishable from those of down.
- Acceptable in all states.
32. QUILL
- Main shaft or axis of feathers.
- Mandatory in all states.
33. QUILL
FEATHERS
- Wing or tail feathers.
- Mandatory in all states.

34. FEATHER
MIXTURES

Feather or down mixture shall be designated by name, character and percentage of each material or mixture may be designated by lowest grade used.

Mandatory in all states except Connecticut, Massachusetts. Must also be designated by color.

Prohibited in Oregon, Washington. Components of a feather and down mixture shall be designated by specie, color and percentage of each.

35. GRADE -
FEATHERS and
DOWN

Grades of materials in descending order are: goose down, duck down, goose feathers, duck feathers, turkey feathers and chicken feathers.

Mandatory in all states.

36. COLOR -
FEATHERS and
DOWN

Color of feather or down need not be designated but, if so, contents shall be as designated. Feathers or down from waterfowl may be designated as white or gray. Chicken and turkey feathers may be designated as white or colored.

Acceptable in all states except

Connecticut - Color mandatory.

California - " "

Maryland - " "

Oregon and

Washington - Color mandatory except for chicken and turkey feathers.

37. TOLERANCE -
FEATHERS and
DOWN

Ten per cent (10%) tolerance unless otherwise permitted is allowed for purpose of adjusting unintentional errors due to processing difficulties in arriving at exact percentages. Tolerance is not intended to permit deliberate admixture of inferior materials. See also "labeling down."

Acceptable in all states except Oregon.

Fiber up to and including five per cent (5%) of down content considered "down." Fiber above five per cent (5%) and including ten per cent (10%) of feather content shall be reported as "feather." Fiber present exceeding combined amounts allowed for down and feather shall be designated "fiber" by percentage of weight.

WOOL

38. WOOL or VIRGIN WOOL Fleece of sheep or lamb scoured or scoured and carbonized. It shall not be the by-product of any process of manufacture or sustained prior use and shall be free from kemp and vegetable matter.
- Mandatory in all states.
39. WOOL BY-PRODUCTS By-products removed from various machine operations necessary in manufacture of wool yarn up to but not including process of spinning; e.g., "wool drawing laps," "wool card waste," "wool card strips," "wool doffer waste," or the by-product may be designated by the particular mill term applicable.
- Mandatory in all states except
- California - Mill term mandatory.
 - Connecticut - Shall include noils, fulling flocks, wool pills and shank and tag wools. Mill term or wool fiber waste shall be designated.
 - Florida - Includes only noils and fulling flocks from fabrics made of new wool fibers.
40. WOOL WASTE Other by-products and wastes of machines from process of manufacture employing new wool fibers and shall include wool pills, shank and tag wools.
- Prohibited in Connecticut.
- Mandatory in all other states.
41. TANNERS WOOL Reclaimed from tanned sheepskin and classed as new material. Percentage of tanners wool in felt or batting shall be designated.
- Mandatory in all states except North Carolina, Oklahoma, Texas. Percentage not required.
42. WOOL SHODDY Any wool fiber which has been spun into yarn, knitted or woven into fabric and subsequently cut up, torn up, broken up, ground up or otherwise defabricated, shall be designated on the label as "wool shoddy." Excess of five per cent (5%) fiber other than wool not allowed.
- Mandatory in all states except Connecticut, Florida, Maryland, Massachusetts, North Carolina, New York. Acceptable as used material.
- Prohibited in Louisiana, Oklahoma, Texas. See defabricated fibers. Oregon - Excess of five per cent (5%) other than wool must be designated by percentage by weight.

43. WOOL BLENDS
or MIXTURES
(BLENDED WOOL) Mixtures of wool, wool by-products, wool wastes and tanners wool shall be designated by term applicable to each constituent present, exposed in percentage or the mixture may be designated "blended wool."

Mandatory in all states except

California - Prohibited.
Utah - "

Indiana - Permissible - with percentage of component parts in order of their predominance stated.

Oklahoma - Term "mixed wool" mandatory.
Texas - " " " "

Oregon) Term applicable to each constituent
Washington) expressed by percentage mandatory.

44. WOOL FELT,
WOOL BATT,
WOOL BATTING Either term shall be applied to felt made of wool that has not been the by-product of any process of manufacture.

Mandatory in all states except California, Indiana.
Terms for component parts with per cent in order of predominance mandatory.

45. BLENDED WOOL
FELT "A" Mixture of any of the following: wool, wool by-products, wool waste or tanners wool, when felted, may be designated by particular term applicable to each of these constituents or the mixture may be designated "blended wool felt," "blended wool batt," or "blended wool batting."

Prohibited in California, Indiana, Oregon, Washington, Utah.

Acceptable in all other states.

46. BLENDED WOOL
FELT "B" Mixture of any of the following: wool, wool by-products, wool waste or tanners wool, when felted, may be designated by particular term applicable to each of these constituents or the mixture may be designated "blended wool felt," "blended wool batt," "blended wool batting," and percentages of component parts of each grade shall be listed in order of their predominance stating percentage by weight of each.

Mandatory in California, Indiana, Oregon, Washington, Utah.

Prohibited in New York, Oklahoma, Texas.

Acceptable in all other states.

47. WOOL - OIL
and GREASE
PERCENTAGES

Wool filling material containing more than five per cent (5%) oil, grease and/or other free fat shall be described as "oily."

Mandatory in all states except

California - Over five per cent (5%) unfit for use.
Washington - " " " " " " " "

Oregon - More than two per cent (2%) and not more than five per cent (5%) shall be designated as "waste." Over five per cent (5%) unfit for use.

Utah - More than two per cent (2%) and not more than five per cent (5%) label as "oily." Over five per cent (5%) unfit for use.

48. WOOL - SECOND
HAND

Wool filling material which previously has been used for any purpose. Manufacturing process shall not be considered previous use.

Mandatory in all states except North Carolina. Manufacturing process considered previous use.

49. WOOL -
TOLERANCE

Materials which contain at least ninety-five per cent (95%) new wool shall be considered wool.

Mandatory in all states except Oregon, Washington. Percentage shall be ninety-eight per cent (98%).

50. WOOL -
FOREIGN
MATERIAL

When dirt and/or any other foreign matter not otherwise provided for is present in a filling material in excess of five per cent (5%) by weight, its presence shall be disclosed as "foreign material."

Mandatory in all states except

California) - When dirt exceeds .3 milliliters
Oregon) per 20 gram sample, unfit for use.

Ohio - Foreign matter in excess of five per cent (5%) shall be classified dirt and percentage given.

Utah - Prohibited.

Washington - Foreign matter over ten per cent (10%) unfit for use.

FOAM

51. **FOAM** Polymerized material consisting of a mass of thinwalled cells produced chemically or physically and shall be designated as "foam" together with the name of the organic base from which it is made; e.g., "urethane foam," "vinyl foam."
- Mandatory in all states except Connecticut.
See Connecticut law.
52. **URETHANE
FOAM** A cellular urethane product which is created by the inter-action of an ester or an ether and a carbamic acid derivative. If of an ester type, may be designated as "polyester foam." If of an ether type, may be designated as "polyether foam."
- Mandatory in all states.
53. **VINYL
FOAM** Designates foam produced from "vinyl."
- Mandatory in all states.
54. **SYNTHETIC:
FOAM** Foam made from "urethane," "vinyl" or any other synthetic base, may be designated as "synthetic foam."
- Prohibited in Connecticut, Indiana, Massachusetts, Oregon and Washington.
- Acceptable in all other states.
55. **MOLDED** May precede the terms set forth above whenever such foam product has been made in a mold in the shape in which it is intended to be used.
- Acceptable in all states.
56. **FOAM
PIECES** Shall apply to foam which has been cut or broken into pieces of indefinite shape, size or form, but shall not apply to shredded foam. Word "foam" shall not be used alone but preceded by type of foam; e.g., "urethane foam pieces."
- Mandatory in all states except Oregon and Washington.
Term "scrap" mandatory.
57. **SHREDDED** Shall precede or follow the term foam or foam products set forth above whenever the product has been subjected to a shredding process; e.g., "shredded urethane foam."
- Mandatory in all states.

58. CEMENTED FOAM Shall be applied to foam pieces and to shredded foam which has been cemented together; e.g., "cemented shredded urethane foam," "cemented urethane foam pieces."

Mandatory in all states.

RUBBER

59. RUBBER Shall apply to the following synthetic rubber-like materials as well as to natural rubber: chloroprene, styrene-butadiene, copolymers, butadiene-acrylonitrile copolymers, polymerized isobutylene, with or without co-monomers present, and thioplasts (any of the polysulfide rubbers consisting of organic radicals linked through sulfur).

Mandatory in all states except

Massachusetts - "natural rubber" mandatory for rubber latex.

Oregon - Defined as "Manufactured fibers in which fiber forming substance is comprised of natural or synthetic rubber."

60. SPONGE RUBBER Sponge products made from rubber which has previously been coagulated or solidified and shall be mandatory for a sponge rubber product consisting of not more than two inserts of unlaminated prime material for attaining desired height, not more than one vertical splice in every three square feet of top surface area excluding those permitted for T's and U's and not more than one splice in every three linear feet of added side-walls or in lieu thereof in each corner, excepting side-walls that are irregular in contour in which case the number of splices shall be subject to the approval of the individual enforcing agency.

Mandatory in all states.

61. MOLDED SPONGE RUBBER May be applied to a sponge rubber product which has been molded in the form in which it is intended to be used.

Acceptable in all states.

62. SPONGE RUBBER PIECES Shall apply to sponge rubber which has been cut or broken into pieces of indefinite shape, size or form, but shall not apply to shredded sponge rubber.

Mandatory in all states except

Oregon) Term "sponge rubber scrap" mandatory.
Washington) " " " " "

Utah - Size limit to be specified.

63. CEMENTED SPONGE RUBBER PIECES Shall be applied to sponge rubber pieces which have been cemented together.
- Mandatory in all states.
64. SHREDDED SPONGE RUBBER Shall be applied to sponge rubber which has been subjected to a shredding process.
- Mandatory in all states.
65. CEMENTED SHREDDED SPONGE RUBBER Shall be applied to shredded sponge rubber which has been cemented together.
- Mandatory in all states.
66. LATEX FOAM RUBBER A foam product made from rubber latex which previously has not been coagulated or solidified and shall be mandatory for a latex foam product consisting of not more than two inserts of unlaminated prime material for attaining desired height, not more than one vertical splice in every three square feet of top surface area, except in T's and U's, but not more than two vertical splices regardless of top surface area excluding those permitted for T's and U's and not more than one vertical splice in every three linear feet of vertical side-walls or in lieu thereof in each corner, excepting side-walls that are irregular in contour in which case the number of splices shall be subject to the approval of the individual enforcing agency.
- Mandatory in all states.
67. MOLDED LATEX FOAM RUBBER May be applied to a latex foam rubber product which has been molded in form in which it is intended to be used.
- Acceptable in all states.
68. LATEX FOAM RUBBER PIECES Term shall apply to latex foam rubber which has been cut or broken into pieces of indefinite shape, size or form, but shall not apply to shredded latex foam rubber.
- Mandatory in all states except Oregon, Washington. Must be labeled "foam rubber scrap." Utah - Size limits to be specified.
69. CEMENTED LATEX FOAM RUBBER PIECES Shall be applied to latex foam rubber pieces which have been cemented together.
- Mandatory in all states.
70. SHREDDED LATEX FOAM RUBBER Latex foam rubber which has been subjected to a shredding process.
- Mandatory in all states.

71. CEMENTED
SHREDDED
LATEX FOAM
RUBBER Shredded latex foam rubber which has been cemented together.

Mandatory in all states.
72. MOLDED Term shall not be used to describe pieces, shreds, or fragments of latex or sponge rubber that have been cemented together whether or not this is done in a mold.

Mandatory in all states.
- SYNTHETIC FIBERS
73. ACETATE
FIBERS Man-made fibers, monofilaments and continuous filament yarns of acetylated cellulose, with or without lesser amounts of non-fiber forming material. "Cellulose acetate fibers" may be used.

Mandatory in all states.
74. ACRYLIC
FIBERS Fibers of long chain synthetic polymer containing not less than eighty-five per cent (85%) acrylonitrile which is formed into a filament.

Mandatory in all states.
75. AZLON
FIBERS Fibers or filaments manufactured from modified proteins or derivatives with or without lesser amounts of non-fiber forming materials.

Mandatory in all states.
76. CASEIN
FIBERS Filament made from casein by chemical and mechanical process.

Mandatory in all states.
77. MODACRYLIC
FIBERS Manufactured fiber in which fiber forming substance is any long chain synthetic polymer composed of less than eighty-five per cent (85%) but at least thirty-five per cent (35%) by weight of acrylonitrile units.

Mandatory in all states.
78. NYLON Long chain synthetic polymeric amide which has recurring amide groups as integral part of main polymer chain and capable of being formed into filament in which structural elements are oriented in direction of axis.

Mandatory in all states.

79. **NYTRIL FIBERS** Manufactured fiber containing at least eighty-five per cent (85%) of long chain polymer of vinylidene dinitrile when the vinylidene dinitrile content is not less than every other unit in the polymer chain.
- Mandatory in all states.
80. **OLEFIN FIBERS** Manufactured fiber in which the fiber forming substance is any long chain synthetic polymer composed of at least eighty-five per cent (85%) by weight of ethylene, propylene or other olefin units.
- Mandatory in all states.
81. **POLYESTER FIBER** Fibers manufactured from a polymerized reaction product of esters.
- Mandatory in all states.
82. **POLYETHYLENE FIBERS** Fibers made from polymers and/or copolymers of ethylene.
- Mandatory in all states.
83. **POLYETHER** A polymerized reaction product of ethers; e.g., hydrocarbons in which one or several hydrogen atoms are replaced by alkoxy groups.
- Mandatory in all states.
84. **POLYSTYRENE** The product resulting from the polymerization of styrene monomers.
- Mandatory in all states.
85. **POLYVINYLIDENE** A copolymer of vinylidene chloride and other monomers.
- Mandatory in all states.
86. **RAYON FIBERS** Man-made fibers, monofilaments and continuous filament yarns composed of regenerated cellulose, with or without lesser amounts of non-fiber forming materials.
- Mandatory in all states.
87. **SARAN FIBERS** Fiber in which the fiber forming substance is any long chain synthetic polymer composed of at least eighty per cent (80%) by weight of vinylidene chloride units.
- Mandatory in all states.
88. **SPANDEX FIBERS** Manufactured fiber in which the fiber forming substance is a long chain synthetic polymer comprised of at least eighty-five per cent (85%) of a segmented polyurethane.
- Mandatory in all states.

89. TRIACETATE FIBERS Man-made fibers and continuous filaments of cellulose acetylated to a degree of not less than ninety-two per cent (92%).
- Mandatory in all states.
90. VINYL FIBERS Manufactured fiber in which the fiber-forming substance is any long chain synthetic polymer composed of at least fifty per cent (50%) by weight of vinyl alcohol units ($-\text{CH}_2-\text{CHOH}-$) and in which the total of the vinyl alcohol units and any one or more of the various acetal units is at least eighty-five per cent (85%) by weight of the fiber.
- Mandatory in all states.
91. VINYLON FIBERS Fiber in which the fiber-forming substance is any long chain synthetic polymer composed of at least eighty-five per cent (85%) by weight of vinyl chloride units.
- Mandatory in all states.
92. SYNTHETIC FIBERS Any synthetic fiber may be described as "synthetic fibers" instead of name of fiber.
- Acceptable in all states except Connecticut, Indiana, Massachusetts, Oregon, Tennessee, Washington. Name of fiber must be stated.

MISCELLANEOUS DEFINITIONS

93. BAGASSE Fibers from pressed beets, sugar cane and other fibrous plants.
- Acceptable in all states.
94. CARD, CARD STRIPS, STRIPPINGS Either term preceded by the name of the textile fiber from which it is produced may be used to describe a tangled or matted mass of fibers produced by or removed from the carding cloth following the carding process.
- Acceptable in all states.
95. CAT TAIL FIBERS Fiber from the seed pod of tall marsh plant having long flat leaves, typha latifolia. (Family Typhaceae).

96. CELLULOSE Cellulose, cellulose fiber or cellulosic shall describe cellulosic products containing not more than four per cent (4%) lignin and twelve per cent (12%) pentosans.
- Mandatory in all states except Connecticut.
Designate as "cellulose fiber" or "wood fiber."
97. COCONUT HUSK Fibrous material obtained from husk or outer shell
FIBER or COIR of coconut.
- Mandatory in all states.
98. COMBER or Preceded by the name of the textile fiber or fibers
NOILS from which it is produced may be applied to tangled fibers removed during the combing process of textile fibers.
- Acceptable in all states except Indiana. Must be designated "cotton waste."
99. CORRUGATED Combination of three sections of compact pasteboard
FIBER BOARD where one section has been formed into folds enclosed between other two.
- Mandatory in all states.
100. DEFABRICATED New material spun or made into yarn or fabric and
FIBERS reduced to a fibrous state. When yarns and thread are present in excess of five per cent (5%) material shall be designated "shredded clippings."
- Acceptable in all states except
- | | | |
|---------------|---|--|
| California | - | Term "shoddy" mandatory. |
| Ohio | - | " " " |
| Tennessee | - | " " " |
| Connecticut | - | Prohibited. |
| Massachusetts | - | " |
| Indiana) | - | Prohibited. Must be designated |
| Maryland) | | as "shredded clippings," |
| | | "garnetted clippings," or |
| | | "shoddy." |
| Oregon | - | Designate as "waste." |
| Washington | - | " " " |
| Utah | - | Designate as "waste" with percent-
age of fabricated material stated. |
| North | - | Term acceptable with classification |
| Carolina | | "used material" mandatory. |

101. EXCELSIOR Curled wood shreds. (use of term "wood wool" prohibited).
- Mandatory in all states.
102. FELT Material carded in layers or sheets by a garnett or felting machine. Term "felt" or "felted" by itself shall not be used but must be combined with name of material from which it is made; e.g., "cotton felt," "wool felt," "jute felt," etc. Term "batting" may be used instead of "felt." Felt scrap or repicked felt shall not be designated as "felt."
- Mandatory in all states.
103. FLY May be used to designate fibers which come off carding machines when preceded by term for textile fiber or fibers from which produced.
- Acceptable in all states except Indiana. Must be designated "cotton by-products."
104. GARNETTED
 CLIPPINGS Any material which has been made into fabric and subsequently cut up, torn up, broken up or ground up and has been run through a garnett machine and thoroughly processed.
- Mandatory in all states except
- | | | |
|----------------|---|--|
| California | - | Term "shoddy" mandatory. |
| Ohio | - | " " " " |
| Tennessee | - | " " " " |
| Oregon | - | Term "waste" or "shoddy" mandatory. |
| Washington | - | " " " " " |
| Utah | - | Term "waste" mandatory. |
| North Carolina | - | Term acceptable with classification "used material" mandatory. |
105. GLASS FIBER Fiber made from glass. When "resin treated" it shall be so designated.
- Mandatory in all states.
106. HAY Grass properly cured, dried, free from dust, dirt, burrs, sticks, or other objectionable material.
- Mandatory in all states.
107. JUTE FIBERS Glossy fiber of either of two East Indian plants (*Corchorus olitorius* and *Corchorus capsularis*) of the linden family. Word "jute" shall not be used alone.
- Mandatory in all states.

108. JUTE SHODDY Shall designate reclaimed used cordage or other jute material which has been used for baling or other purposes.
- Prohibited in West Virginia.
- Mandatory in all other states.
109. KAPOK Fibers from seeds of kapok tree.
- Mandatory in all states except
- Tennessee - Over five per cent (5%) hull, dirt, etc., shall be classified "kapok waste."
- Utah - Specie shall be specified.
110. MILKWEED Surface fiber from inside of seed pods of milkweed plant. (Asclepias)
- Mandatory in all states.
111. MOSS The processed filamentous structure of any of several pteridophytic plants found growing on certain types of trees in tropical regions.
- Mandatory in all states except Utah. Type shall be specified.
112. NAPPER Lint removed during process of raising face of cloth and shall be preceded by name of textile fiber from which composed.
- Mandatory in all states.
113. PAD Any fiber, filament or similar material that has been carded, interwoven, loomed or punched, with or without fabricated backing, with or without bonding agent of resin, rubber, or plastic and compressed into a compact, dense, tough homogeneous solid by simultaneous application of heat and/or pressure. The term "pad" shall not be used alone but preceded by the name of any product or fiber as approved; e.g., "sisal pad," " jute pad."
- Acceptable in all states.

114. PALM FIBER Fibrous material obtained from leaf of palm, palmetto or palmyra tree.
- Mandatory in all states.
115. PICKER, PICKER MOTE, MOTE May be applied to matted or tangled masses of fiber resulting from opening and cleaning of fibers in opener room of the textile mill where preceded by textile fiber or fibers from which produced.
- Acceptable in all states except Indiana.
Must be designated "cotton waste."
116. RUBBERIZED or RESIN TREATED When each fiber or filament in a pad has been thoroughly coated with resin, rubber or plastic, this term, as appropriate shall be combined with the descriptive term. Percentage of resin, rubber or plastic need not be stated; e.g., "rubberized hair pad," "resin treated cotton pad."
- Acceptable in all states except Massachusetts.
Percentage of rubber mandatory.
117. RUBBERIZED or RESIN COATED When the surfaces only of a pad have been coated with resin, rubber or plastic, the term as appropriate shall be combined with the descriptive term. If a pad is coated on one side only, term must include "ONE SIDE ONLY." Percentage of resin rubber or plastic need not be stated.
- Acceptable in all states.
118. SEA GRASS Material obtained from maritime plants or sea weeds.
- Mandatory in all states.
119. SHODDY (NEW) Any fiber which has been spun into yarn, woven or knitted into fabric, which has not been used by ultimate consumer, subsequently cut, broken, torn or ground up and reduced to fibrous state.
- Mandatory in Californis, Ohio, Oregon, South Carolina, Tennessee, Utah, Washington.
- Acceptable in Indiana provided it contains more than five per cent (5%) dirt, trash or other foreign material. Otherwise shredded clippings or garnetted clippings acceptable.
- Prohibited in all other states.

120. SHODDY
(USED)

Any fiber which has been spun into yarn, woven or knitted into fabric which has been used by ultimate consumer, subsequently cut, broken, torn or ground up and reduced to a fibrous state.

Mandatory in all states except

Oklahoma	-	Prohibited.
Texas	-	"
West	-	"
Virginia		

Acceptable in Indiana. If containing more than five per cent (5%) trash, dirt or other foreign material and must be sterilized.

121. SHREDDED
CLIPPINGS

Any material which has been made into fabric and subsequently cut up, torn up, broken up or ground up, but which has not been run through a garnett machine and thoroughly processed.

Mandatory in all states except

California	-	Term "shoddy" mandatory.
Ohio	-	" " "
Tennessee	-	" " "
Utah	-	" " "

Oregon)	Classification "waste" or "shoddy"
Washington)	mandatory.

North Carolina	-	Term acceptable with classification "used material" mandatory.
Rhode Island		

122. SILK WASTE

Products recovered from machine operations in manufacture of threads of natural silk.

Mandatory in all states.

123. SISAL FIBER

Leaf fiber derived from agave, sisalana and similar species of agaves.

Mandatory in all states.

124. SISAL FIBER WASTE Waste of cordage mills, including rope and cordage ends but shall not contain knots and refuse.
- Mandatory in all states.
125. SISAL SHODDY (USED) Shall be used to designate reclaimed used cordage or other sisal material which has been fabricated and used for baling or other purposes.
- Prohibited in West Virginia.
- Mandatory in all other states.
126. STEEL FIBER-STEEL BATTING Fine shavings of steel or fine steel wire fragments and when passed through some form of garnetting machine and carded in layers, may be designated "steel batting."
- Prohibited in Indiana.
- Mandatory in all other states.
127. STRAW Stalk or stem of grain as wheat, rye, oats, rice and like after threshing. Kind of straw need not be designated, but if so indicated, shall be a true statement. It shall be free from chaff, beards, bristles, husks, glumes, dirt or other extraneous matter.
- Mandatory in all states.
128. SWEEPINGS Designates fibrous sweepings from floors of textile mills, oil mills or warehouses and shall be preceded by name of textile fiber or fibers.
- Prohibited in Indiana and West Virginia
- Mandatory in all other states.
129. TAMPICO FIBERS Mixture of various Mexican agave fibers from Tampico, Mexico. When curled shall be designated "curled tampico fibers."
- Oregon - term "sisal" mandatory.
- Mandatory in all other states.
130. TULA FIBER Leaf fiber from Tula Istle and similar species of agaves.
- Acceptable in all states.
131. TOW Coarse strawlike part of plant recovered as by-product in securing commercial fibers and shall be designated by plant origin.
- Mandatory in all states.

132. USED Shall refer to and mean any material, or portion thereof, of which previous use, other than subjecting same to manufacturing process, has been made.
- Acceptable in all states except North Carolina. Manufacturing process considered previous use.
- Prohibited in Connecticut.
- RESTRICTIONS - LIMITATIONS
133. ALL, PURE, Or terms of similar import are permitted only if
100% material is as stated. No tolerance allowed.
- Mandatory in all states.
134. BONDED Shall not be used on any label describing filling materials.
- Acceptable in Massachusetts.
- Mandatory in all other states.
135. BORDER Filling material in prebuilt border need not be stated on label provided it does not exceed ten per cent (10%) of total filling material and is all new.
- Mandatory in all states except Massachusetts.
136. BURLAP Burlap, muslin, tape, etc. when new need not be mentioned on label.
- Acceptable in all states.
137. COLORED Material which has been artificially dyed or colored shall be designated as "colored."
- Mandatory in all states except
- | | | |
|----------------|---|------------------------------------|
| Massachusetts | - | Not required. |
| North Carolina | - | " " |
| Virginia | - | " " |
| Utah | - | Mandatory with term dyed optional. |
| Indiana | - | Required with cotton fibers only. |
138. CURLED FEATHERS Term prohibited.
- Mandatory in all states.

139. DACRON

Term prohibited.

Mandatory in all states.

140. DIRT

Presence of non-fibrous mineral matter in excess of five per cent (5%) in any filling material shall be described as "dirt" and actual percentage thereof contained in filling material shall be stated on label. Mineral fibers excepted.

Mandatory in all states except

California) - When dirt exceeds .3 milliliters
Oregon) per 20 gram sample, material unfit
for use.

North - Percentage not required.
Carolina

Utah - One and one-half per cent (1 ½%)
allowed.

141. HEN FEATHERS

Term prohibited.

Mandatory in all states.

142. OILY

Any material containing more than five per cent (5%) oil shall be described as "oily."

Mandatory in all states except

California) - Over five per cent (5%) unfit
Oregon) for use.

Utah - Over two per cent (2%) unfit for
use.

Connecticut - Prohibited.
West Virginia - "

143. PAPER
BY-PRODUCT

Paper which has been used in manufacture or processing of other products and subsequently used for manufacture of edging or other articles may be described on label as "all new material consisting of paper by-products."

Mandatory in all states except

Indiana - Prohibited.
Oregon - "

North - Classify as "second-hand."
Carolina

144. PAPER SHEETS Sheets used for separating or covering felt or wadding when present in amount not exceeding ten per cent (10%) by weight of entire filling material, need not be disclosed on label.
- Prohibited in Utah.
- Acceptable in all other states.
145. PERCENTAGES Any article of bedding containing more than one kind of filling material, the different materials shall be described in order their predominance stating percentages of each by weight.
- Not required in Georgia and North Carolina.
- Required only with down, silk, latex and synthetic products in Ohio.
- Mandatory in all other states.
146. RUBBER PRODUCTS Term prohibited.
- Mandatory in all states.
147. SPRING UNIT The presence of innerspring unit in an article of bedding or upholstered furniture shall be disclosed on label.
- Acceptable but not required in California, Florida, Tennessee, Oregon and Washington.
- Mandatory in all other states.
148. STEEL WOOL Term prohibited.
- Mandatory in all states.
149. TAN-O-QUILL Term shall not be used to describe feathers or down.
- Acceptable in Oklahoma and Texas.
- Acceptable at bottom of label below delivery date in Indiana and Florida.
- Mandatory in all other states.
150. TOLERANCE To allow for unintentional variations, ten per cent (10%) by weight from amount stated on label is allowed except as otherwise stated herein. Tolerance allowed for purpose of adjusting unintentional errors due to processing difficulties in arriving at exact percentage of individual materials in mixture. Tolerance is not to permit deliberate admixture of inferior materials.
- Mandatory in all states.

151. ~~TRADE NAMES~~,
TRADE MARKS All trade names and trade marks are prohibited.

Mandatory in all states.
152. TRASH When hull, leaf, stem, pulp, etc. exceeds ten per cent (10%) such filling material shall be designated on the label as "trash."

Mandatory in all states except

Florida - When trash exceeds twenty per cent (20%) unfit for use.

Oregon - Prohibited.
153. VIRGIN Term permitted only in connection with textile fiber filling material which has never been reclaimed from any spun, woven, knitted, felted or similarly manufactured products.

Acceptable in all states except Florida, New York, Oregon. Acceptable with virgin wool only.
154. WOOD WOOL Term prohibited.

Mandatory in all states.

SURVEY OF ADMINISTRATION OF STATE BEDDING LAWS

FEDERAL TRADE COMMISSION,
BUREAU OF INDUSTRY GUIDANCE

Washington 25, D.C., Sept. 30, 1964

MR. WILLIAM W. MONTGOMERY, *Consultant*
Senate Fact Finding Committee on
Business and Commerce,
California Legislature,
State Capitol,
Sacramento, California.

Dear Mr. Montgomery :

Your letter of September 2, 1964, directed to the Commission has been referred to me for reply.

The Commission has promulgated trade practice rules for the Household Furniture Industry and the Bedding Manufacturing and Wholesale Distributing Industry, copies enclosed. The rules for each of these industries are administered by a staff attorney as are the trade practice rules for the Feather and Down Products Industry. In addition to the above rules, these same attorneys also administer other trade practice rules for various industries.

Trade practice rules are interpretive of requirements of laws administered by the Commission. In the event we are unable to secure voluntary compliance with the rules, alleged violations may be referred to other Bureaus within the Commission for attention. In these circumstances it would be most difficult to determine the amount of money expended for administering any particular set of rules.

I hope the above information will prove helpful to you.

Very truly yours,

FAUSTER VITTONI,
Attorney

Enc.

STATE OF CONNECTICUT, LABOR DEPARTMENT
OFFICE OF THE COMMISSIONER

Hartford 15, Connecticut, July 17, 1964

MR. W. W. MONTGOMERY, *Consultant*
Senate Fact Finding Committee on
Business and Commerce
State Capitol
Sacramento, California 95814

Dear Mr. Montgomery :

Commissioner Ricciuti has directed your letter of July 1st to my attention. I submit the following information which I trust will be of help to your legislative committee.

The Connecticut Labor Department, in the enforcement of Bedding and Upholstered Furniture Laws, utilizes the services of three full-time employees and five part-time employees at an annual cost of approximately \$30,000. The three full-time employees are a consultant, a senior factory inspector and a typist. The five part-time factory inspectors spend approximately 40% of their time in the enforcement of the Bedding and Upholstering Statutes and inspection of those facilities coming within the purview of the law. (Labor Laws of Connecticut, Chapter 357—pages 259-263—Revised October 1, 1963) a copy of which was previously directed to your attention.

The department maintains an analytical laboratory which testing equipment, apart from laboratory cost built in as part of a new building, initially cost \$2,100. The average yearly maintenance has not been fully computed.

The effectiveness of this program is bearing results as reports of retailers indicate that their suppliers are providing a better quality of merchandise and follow-up samples of upholstered filling material tested in the laboratory are indicating proper labeling of contents.

From the latest figures available covering the period July 1962 through June 1963, revenue received was \$76,193.75 collected in bedding and upholstered furniture fees and \$8,875 in sterilization fees. There were 3,874 inspections made during this period.

Very truly yours,

LEO J. DUNN
Deputy Commissioner

STATE OF MAINE, DEPARTMENT OF LABOR AND INDUSTRY

Augusta, July 7, 1964

SENATE FACT FINDING COMMITTEE ON
BUSINESS AND COMMERCE
California Legislature
State Capitol
Sacramento, California 95814

Attention: W. W. Montgomery
Committee Consultant

Gentlemen:

We are replying to your letter of July 1 in which you request certain information regarding the administration of the Maine Bedding and Upholstered Furniture Law.

Total expenses for the fiscal year 1963-1964 amounted to \$6,215. We have no full-time inspector but the Deputy Commissioner handles bedding inspections on a *part-time basis* as his available time permits. It should be noted that a *very limited time* is spent on such inspections.

We do not maintain a laboratory to test samples but, rather, refer them to the Sanitation Division of the Department of Health and Welfare to check our samples for us when requested and bill this Department for its services.

We are one of those States employing the bedding stamp system and the revenue received from the sale of stamps during the year as noted above amounted to \$6,935.

Should you need any further information, please do not hesitate to let us know.

Yours truly,

C. WILDER SMITH
Deputy Commissioner

STATE OF NEBRASKA, DEPARTMENT OF HEALTH
ENVIRONMENTAL HEALTH SERVICES

Lincoln 9, Nebraska, March 31, 1964

THE HON. ALAN SHORT, *Senator*
Suite 105, Hunter Building
807 North San Joaquin Street
Stockton 3, California

Dear Senator Short :

Enclosed please find a copy of Nebraska Laws relating to bedding. After reading these you will undoubtedly reach the conclusion that *these are inadequate for the intended purpose and should be subject to amendment.*

In meeting with the National Association of Bedding Law enforcement officials, I attempted to learn just what inspection should be made of a factory but was told that the important phase of bedding law inspection is that of checking the product on the retailers display floor or warehouse to insure that the bedding materials are such as represented by the label and especially to insure that disinfection has been carried out in case second hand materials are offered for sale. You will notice that neither of these two details are included in our law.

We will, therefore, wait with interest to learn of the amendments that you make to your law with the possibility of adopting them for our use and thereby benefit by the experience that you are now realizing.

Very truly yours,

T. A. FILIPI, Director
Environmental Health Services

STATE OF NEBRASKA, DEPARTMENT OF HEALTH
ENVIRONMENTAL HEALTH SERVICES

Lincoln 9, Nebraska, July 10, 1964

MR. W. W. MONTGOMERY
State Capitol
Sacramento, California 95814

Dear Sir:

Nebraska is *budgeting no money for the enforcement of its bedding laws.*

We have never become fully organized to administer this act and occasion has not as yet arisen where activation appears to be justified. Our present program consists mainly of informing persons interested in shipping bedding materials into the State that they should bear the stamp of approval in their state of origin and if the bedding complies with the mother state, it is acceptable to us.

Yours very truly,

T. A. FILIP, Director
Environmental Health Services

THE STATE OF NEVADA, EXECUTIVE CHAMBER

Carson City, April 15, 1964

HON. ALAN SHORT

*Senator, Twentieth Senatorial District
San Joaquin County
California Legislature
State Capitol
Sacramento, California*

Dear Senator Short:

I am enclosing herewith a copy of the law regulating the sale of used bedding in Nevada.

On new items of upholstered furniture, pads and bedding, we *suggest* they have the approved uniform label of the National Association of Bedding Manufacturers.

Sincerely,

GRANT SAWYER
Governor

THE STATE OF NEW HAMPSHIRE, ATTORNEY GENERAL

Concord, July 27, 1964

SENATE FACT FINDING COMMITTEE ON BUSINESS AND COMMERCE

*State Capitol
Sacramento, California*

Att: Mr. W. W. Montgomery, Committee Consultant

Gentlemen:

With regard to your further inquiry concerning our law pertaining to the manufacture and sale of bedding, this is to advise that enforcement of same is delegated to our State Board of Health under RSA 339:66. This Board advises that it has *no active program under this law and only investigates complaints registered with it*; that no one person in that department has been delegated to this one activity as the number of complaints does not warrant this, and that they have no statistics on enforcement costs and/or revenue received which has been negligible.

Very truly yours,

IRMA A. MATTHEWS
Attorney

NORTH CAROLINA, STATE BOARD OF HEALTH

Raleigh 27602, July 8, 1964

MR. W. W. MONTGOMERY
Committee Consultant
Senate Fact Finding Committee
California Legislature
Sacramento, California 95814

Dear Mr. Montgomery:

In your letter of July 1, information was sought concerning the method of financing and cost of enforcing the North Carolina Bedding Law.

Approximately \$40,000 is expended annually on this activity. We have three full time inspectors and a part of my time is devoted to supervision. We do not maintain a laboratory for bedding alone, but, the State Laboratory of Hygiene, which is a branch of the State Board of Health performs such work when it is requested by us.

We require all manufacturers to obtain a registration number from us and have this number printed or stamped on the law label that is attached to each piece of bedding. The Uniform Registry System is recognized. No charge is made for registration but all in-state manufacturers are required to purchase a Bedding Manufacturer's License at the cost of \$25 per annum. It is also required that a bedding stamp be affixed to the law label on each item. In lieu of affixing the stamp, a Stamp Exemption Permit can be obtained. The cost of this permit is based on the volume of business done during the previous calendar year. Details covering this can be found in the enclosed copy of our Bedding Law with rules and regulations adopted pursuant thereto.

Sincerely,

CHARLES M. WHITE, Chief
Insect and Rodent Control Section
Sanitary Engineering Division

STATE OF OHIO, DEPARTMENT OF INDUSTRIAL RELATIONS,
DIVISION OF BEDDING AND UPHOLSTERED FURNITURE INSPECTION

Columbus 15, Ohio, July 7, 1964

W. W. MONTGOMERY, *Consultant To*
Senate Fact Finding Committee
State Capitol
Sacramento, California 96814

Dear Mr. Montgomery :

Acknowledging your letter of July 1st, please find enclosed copy of the Ohio Bedding and Upholstered Furniture Law and Rules. Also, we are sending you Registration and License Applications.

Following is the information you requested.

NUMBER OF EMPLOYEES—All Full-Time

- 1—Acting Chief
- 1—Assistant Chief
- 1—Chemist
- 4—Office Staff
- 8—Field Inspectors

The heart of the Ohio Law is "WHAT'S INSIDE". Therefore, we maintain a Laboratory for testing samples of filling materials sent to this office by our Field Inspection Staff.

Also, we encourage many of our 3200 registrants, when in doubt of the fillings they are using, to avail themselves without charge, of our Laboratory service.

Revenue for this Division is derived from the sale of Stamps and our License Plan. The enclosed chart shows amounts of each.

The following may not be of interest for the recommendations that you are making to your Committee, but we thought we would call it to your attention.

At the Chicago Conference, a member suggested from the floor that Bedding Stamps should be discontinued by all States. This we opposed.

Sure, 57 percent of our total revenue is contributed by manufacturers on our License Plan—but they are all big corporations—shipping thousands of units each month into this State, and save money by not using Stamps.

We opposed the suggestion in Chicago because we must be fair to the medium and small manufacturers who may ship only one or two thousand units to dealers in Ohio during a whole calendar year. Also, our Law cannot be changed by Executive Order.

Very truly yours,

T. F. NOONE
Acting Chief of Division

Enc.: Chart—Law Book
License & Registration Applications

STATE OF OREGON, OREGON STATE BOARD OF HEALTH

Portland 1, July 15, 1964

MR. W. W. MONTGOMERY
Committee Consultant
Senate Fact Finding Committee on
Business and Commerce
California Legislature
State Capitol
Sacramento, California 95814

Dear Mr. Montgomery :

This is in reply to your inquiry of July 2, 1964. Currently we are expending approximately \$70,000 annually in the enforcement of the Furniture and Bedding Program.

Four field men, a laboratory man, one-and-a-half secretaries, and a supervisor are employed on a full-time basis. During the peak of the registration period, June through August inclusive, a part-time clerk is employed.

The Licensing structure is specified on pages 21 and 22 of the enclosed copy of the Law, O.R.S. 433.615 to 433.620, 433.625 and 433.635.

Another statute requires that ten per cent of all fees received be immediately transferred to the State's General Fund. The remaining ninety percent is retained in the Furniture and Bedding Fund and expended for that activity only. The fees received are adequate to fully finance this activity of the State Board of Health.

A third statute requires that all fines or like revenues resulting from litigation be paid to and retained by the county in which the litigation occurred. The Furniture and Bedding Program does not receive any of these moneys.

I hope this information will be useful to your committees.

Very truly yours,

RICHARD H. WILCOX, M.D.
State Health Officer

RHW :RR :hr
Enclosure

COMMONWEALTH OF PENNSYLVANIA,
DEPARTMENT OF LABOR AND INDUSTRY

Harrisburg, July 13, 1964

MR. W. W. MONTGOMERY
Senate Fact Finding Committee
on
Business and Commerce
State Capitol
Sacramento, California

Dear Mr. Montgomery :

This is in response to your requests of July 2, 1964, for additional information concerning the operation of the Division of Bedding and Upholstery. I am sorry that I am unable to give you the amount of money expended in the enforcement of the Bedding and Upholstery Law due to the fact that our expenses are included in the totals for the Bureau of Inspection. There is no breakdown of expenditures for each Division.

The number of employees in this Division are as follows: nine (9) full time Field Inspectors, one (1) Secretary, one (1) Clerk-Steno and one (1) Division Chief.

At this time there is no working laboratory in this Division. However, we now have a contract with the Department of Health for their laboratory services when simple tests employed in this office fail to produce the required information.

Below is a breakdown of the revenue received for the fiscal year July 1, 1963, to July 1, 1964.

Stamp Fees:	\$60,135.00
Permit Fees:	10,310.00
Auctioneer Certificate Fees:	2,710.00
Toy Registration Fees:	3,325.00
B & U Registration Fees:	13,050.00
Manufacturers License Fees:	7,200.00
Quarterly Report Fees:	73,272.64
Total	<hr/> \$170,002.64

I hope the above information is beneficial to you and if there are any further questions, please do not hesitate to write.

Very truly yours,

A. RICHARD GEISLER, Chief
Division of Bedding and Upholstery

ARG/fn

TEXAS STATE DEPARTMENT OF HEALTH

Austin, Texas, July 13, 1964

MR. W. W. MONTGOMERY
Committee Consultant
Senate Fact Finding Committee
on Business and Commerce
California Legislature
State Capitol
Sacramento, California 95814

Dear Mr. Montgomery :

We have your letter of July 2 in which you have asked for certain information about the Texas Bedding Law program.

In answer to your questions, approximately \$75,000 per year is received from bedding revenue stamps and bedding permit fees, all of which is spent on the inspection program. This is about half enough money to properly carry on the inspection program in Texas.

There are nine people full time on the bedding law program, and laboratory services are supplied gratis from the Department's Bureau of Laboratories. In other words, laboratory services are not directly under the supervision and control of the Bedding Division.

Our present system of revenue is from annual permit fees and fees from revenue stamps. The Initial Permit fee for manufacturer's permits is \$15.00, renewable annually at a fee of \$10.00. Each item of bedding sold in Texas must have a bedding revenue stamp affixed to law tag. These revenue stamps are issued to manufacturers and vendors in multiples of 500 at a fee of \$5.00 for each 500 stamps.

In our opinion, there is much to be desired concerning the financing of the Texas Bedding Law. We feel that the revenue stamp system is somewhat archaic and does not lend itself to mass production. The system also makes for easy violations of revenue, and enforcement is most difficult. We hope in the near future to go to an annual licensing system similar to California.

The Texas Bedding Law is not also an upholstered furniture law. The Texas Bedding Law is applicable to various items of bedding but does not include various items of upholstered furniture. This narrows the scope of business establishments subject to permit fees. We think this is a weakness in the law. We look on the California system of licensing and the California law as being ideal. In fact, *we hope to pattern the Texas law after some of the features in the California law.*

If we may be of further assistance in any way, please let us know.

Very truly yours,

W. H. MALLARD
Director
Bedding-Law Division

THE STATE OF UTAH, DEPARTMENT OF AGRICULTURE

Salt Lake City, July 15, 1964

MR. W. W. MONTGOMERY
Committee Consultant
California Legislature
State Capitol Building
Sacramento, California 95814

Dear Mr. Montgomery:

This is in answer to your questions. In the fiscal year from July 1, 1963 to June 30, 1964, we expended for the enforcement of this act—\$25,028.32. The money received through the licensing structure was \$25,325.50. We have one inspector working full time on this program and part of the time, one stenographer, and also part of the time, myself, as the supervisor of the program, along with other programs of the department.

Also, part of the time, one analyst in the laboratory, and we do maintain and operate a laboratory and laboratory facilities for the examination of samples under this program.

The organization of our licensing procedure, I would think, would be self explanatory in the booklet which we have already sent you, and this does not provide for the collection of use taxes or stamps or anything of that kind.

Yours truly,

UTAH STATE DEPARTMENT OF AGRICULTURE
GUY P. STEVENS, Supervisor
Food and Drug Division

NATIONAL ENFORCEMENT OFFICIALS ASSOCIATION

The consultant to the committee attended a meeting of the Association of Bedding and Furniture Law Enforcement Officials, as an observer, at their meeting in Chicago March 14 through 18, 1964. The purpose of his attendance was to secure information as to various regulations in the other states and the type of enforcement pursued in said states.

The Association of Bedding and Furniture Law Enforcement Officials, commonly known as ABFLO, is a voluntary association of state officials charged with the enforcement of the various bedding and furniture laws in their respective states. Approximately 32 states are members of ABFLO, and each state has one vote. The organization is incorporated under the laws of the State of Ohio and the annual dues are \$25. In attendance at the 1964 meeting in Chicago were 35 people representing approximately 15 states. Some states had as many as five of their enforcement people present and, quite obviously, some states were not represented.

ABFLO holds its meeting in connection with the annual meeting of the National Bedding Manufacturers Association. The expense of the ABFLO conference, with the possible exception of the traveling expenses, is apparently borne by the manufacturers.

There are 11 committees of ABFLO in addition to the usual committees, such as program committee, executive committee, and membership committee. They deal with such varied programs as nomenclature, laboratory, sterilization, label uniformity, FTC liaison, and model law. Between sessions of the annual meeting, it appears that the work of the organization is conducted by correspondence and questionnaires. An effort is being made on the part of the officials of this organization to secure uniformity with respect to legislation throughout the country and a uniformity with respect to nomenclature.

TRANSCRIPT OF SPEECH BY SENATOR ALAN SHORT
TO THE
CALIFORNIA FURNITURE MANUFACTURERS
ASSOCIATION

PALM SPRINGS, CALIFORNIA

October 30, 1964

Good morning, ladies and gentlemen:

Most speeches begin with the usual "It's a real pleasure," and so forth. In this instance, I use it advisedly. A year ago such would not have been the case. An invitation from you then would have been highly suspect. A lynching bee would probably have been what you had in mind.

Well, a year has passed, and we know each other better. I hope you found out that I haven't horns on my head and, for sure I want you to know that I never did suspect that 50 percent of the furniture manufactured in California was either mislabeled or unfit for human use.

In the interim, I have learned quite a bit about your problems. As a result of our study of the furniture industry, I have come to the conclusion that California is the best regulated state in the nation. Furthermore, we have higher standards than any of the other states. As a matter of fact, our standards, almost without exception, are higher than those set by our federal government. Notwithstanding this, there is room for improvement and I am proud to say that the industry itself is in the forefront, striving for such improvement. The public will benefit from this and so will the quality-minded, honest manufacturer. We are proud of the furniture industry in California and feel that any manufacturer shipping products into our fair state should compete on the same basis and meet the same high standards we have set for our home industry. I can assure you that, without stifling competition, we are going to recommend legislation to accomplish that very thing.

I look back to a year ago and the cries of anguish raised over the publicity coming out of the hearings. As I recall, there was quite a furor over the figures and percentages emanating from the laboratory tests. Well, gentlemen, a year has passed, and progress has been made. If you ever had a complacent attitude, it has disappeared. There has been more industry participation than ever before. I had the pleasure of attending an industry meeting in Sacramento earlier this year, and I was most impressed. There were manufacturers, suppliers, and retailers from all over the United States there. They thought enough of

the meeting to pay their own expenses. They came because California is the leading state in the Union and because they were looking to us for leadership and guidance. We are number one and we intend to remain one. It won't be easy.

No state and no nation in history has ever had to meet such an enormous challenge as that now facing California. Let me give you just one or two examples.

Each year we must build the equivalent of 2,000 miles of highway lanes to accommodate a half-million additional cars.

Every week from now until 1975 we must build three elementary schools to house 750 students. At the same time, we must build three high schools every month.

Just as urgent is our need to create some 200,000 new jobs every year. And that means we must attract many, many industries to our state. And a look at the record shows that in that great effort we are meeting with success.

We are building an industrial complex on the Pacific Coast which will one day surpass the industrial regions of the Midwest, the East, and the South. In the last generation, one-sixth of the nation's industrial growth has taken place in California. One-tenth of the increase in economic value contributed by manufacturing has occurred in California. And our industrial leadership is being recognized increasingly throughout the nation.

Last year, for example, some 100 companies invested close to one billion dollars in new or expanded plant facilities here in our state. Recently, *Business Week* magazine concluded its annual national survey of companies asking which states they favored as sites for new plants. Again California came away the winner, hands down, far ahead of any other state, with 26 percent of the vote. What accounts for this striking gain? In part we must attribute it to our God-given natural resources, to the imagination and faith in our society shown by business leaders, and to the vigor and hard work of our labor force.

Let me add that we must also have a government which gives top priority to fiscal stability and a business climate which encourages industrial growth. The record shows that we have both. Our state government is sound.

For example, all our economic indicators last January led us to expect a modest budget surplus of \$8.7 million on June 30, 1964. California's booming economy, however, surpassed our expectations. The Controller recently reported that we closed the last fiscal year with a surplus of \$113 million on June 30, 1964. These and other factors have led us to revise our estimates upward. It is now expected that we will have a free budget surplus of \$62 million on June 30, 1965.

Let me say emphatically here that we don't just automatically assume that tax money should be raised for any and all purposes. Nor do we ever overlook any opportunity to save money for the taxpayers of the state. In the middle of the last fiscal year, there was an accelerated drive for economy in government. Reports from the Controller's office show that an additional \$10 million over and above the original anticipated amount was saved before that drive took place. I can assure you that I will do all that I can to see that a similar drive takes place this

year. There should and I understand there will be a task force to go over every existing state program to see which have become obsolescent or have lost their former priority. A number of items, I am sure, will be found. As a member of the Senate Finance Committee, you can be certain that I will watch for such items and strongly recommend that such programs be dropped. Such budget cuts may be politically painful, but will have to be made.

We believe, in short, that California is combining drive and imagination with sound and solid fiscal policies—and the result is progress and a business climate second to none in the United States. . . .

At the same time, we recognize that there will be changes in manufacturing employment as redirections are effected in this nation's program of national defense. We intend to be ready for those changes.

Right now we are seeking solutions through the cooperation of private industry, labor, and government—both federal and state. We know that we must apply our advanced scientific, technical, and systems-management knowledge to all the fields which should absorb our energies in the future. . . .

California will continue to make investments in public services of the highest quality in order to maintain our good business climate. In the wake of our water project, for example, there will be new cities and farms, and new billions in industrial and agricultural wealth. And just as inevitably, our massive efforts in education will lend new strength to California's economy in the future.

We are making other substantial investments in progressive programs. . . . Let me be the first to add that all this booming growth does not blind us to the fact that there are problems yet unsolved, and injustices still to be put right. . . . And if a changing economy, or the changing tides of history, make new demands on us—as surely they will—you know and I know that California will be in a position to take those changes in stride.

When I talked to your secretary, John Beebe, and asked him for some suggestions, he indicated that you would be interested in the general economic outlook for the manufacturing industry in California. Well, the facts I have just given to you should give you the obvious answer. A state growing at the rate of more than 1,000 people daily, populationwise, and with the highest personal income increase in the nation, is a pretty healthy place to be in business.

California is a state rich in people, rich in talent, rich in wealth, rich in natural resources, and all indications are we will retain our position of eminence for some time to come.

John Beebe also indicated that you were interested in what the state has done or is doing to protect you from unfair out-of-state competitors. Well, let me give you a few examples.

As a result of our hearings last October, the entire enforcement and inspection program of the Bureau of Furniture and Bedding Inspection has been changed. Inspectors formerly would check an article in the field, check the contents, and send a sample to the laboratory for analysis. This was fine as far as it went, but the basic weakness of this program was that, by the time they got the laboratory analysis back, all of the similar items in the store or plant had been sold. The

net result was that we knew there was a violation and the culprit was told to cease and desist, but the unfit merchandise was still passed on to the public. This was one of the principal things that bothered our committee last October. On paper there was a good set of laws and rules to protect the public, but in practice they were meaningless. . . .

We now have an enforcement program regarding furniture and bedding. Perhaps our prodding, prying, and the attendant publicity was not without some benefit.

I still recall asking a bureau representative what had happened to the supply of some feathers that the laboratory had analyzed a sample of and found unfit for use. Everyone at the hearing laughed when he told us that when the inspectors returned to the supplier, they were informed that the feathers had been sold and probably were already in pillows. Here we had a supplier who sold chicken feathers as a sideline, not particularly interested in the state program; to him it was a nuisance and an interference with his regular business. Well, it would really have been funny except you saw what happened after the newspaper reports. You were offended. The public was offended. Inspection of the bureau records indicated that this was not an uncommon occurrence.

Another time, one of our large retail chains advertised lounging chairs, and by the time the contents were analyzed and it was determined that they were mislabeled it was too late to take them off sale.

Well, it was time for a change. I'm happy to report that such a change has taken place.

Now when the inspectors find a *prima facie* violation of the state regulations, the article is sent to the laboratory for analysis and all articles of the same style are withheld from sale. The laboratory procedure has been streamlined to get faster results. Now the entire article is analyzed rather than a small sample. Also, for a change for the better, the inspectors are now picking up and checking mattresses, chairs, and sofas, rather than the heavy concentration in pillows as in the past. Of course, I realize the retailer will scream less loudly at a pillow being picked up than he will a chesterfield set, but we also have to realize that a consumer invests probably once in his lifetime in a living-room set and they, too, need close checking. The figures indicate that the new procedure is working. Let me give you some of them:

First: 25,235 articles of furniture and bedding have been held off sale.

Second: 3,889 articles of furniture and bedding have been shipped out of state (in lieu of destruction).

Third: 11,088 pieces of furniture and bedding have been released for sale.

Close to one-half million dollars' worth of chairs and sofas from out of state were held off sale early this year at one time. You can well imagine the cries of anguish from eastern competitors. Protests were received. Phone calls from pretty high-placed officials were made. Our state officials were questioned quite thoroughly regarding their author-

ity to pick up and dismantle whole pieces of furniture. This was particularly true when the retail prices of some pieces were in hundreds of dollars. Their greatest concern, however, was the order to withhold from sale and to destroy or ship out of state articles found unfit for sale under California regulations. When you get calls from Governors, U.S. Senators, Congressmen and nationally known attorneys, you have some idea as to the impact of the "new look" in California law enforcement insofar as it pertains to the furniture and bedding industry.

It is interesting to note that, once the legal basis for the state's activities was explained and letters of legal notice were mailed to the manufacturers concerning each type of violation and what had to be done to correct it, no one challenged the law or the right to act as the Bureau of Furniture and Bedding had done. Trade papers all over the country publicized the new enforcement program. Independent laboratories called, requesting copies of our laboratory's test procedures. Supply dealers called because the manufacturers were holding them accountable for the materials they had supplied.

Obviously one of the cries raised when the state changed its activities was discrimination against out-of-state manufacturers and restraint of trade. There was a total of 242 manufacturers represented in the figures I just gave you; 31 of these were in state and 211 were out of state. This may seem disproportionate until you realize that percentage-wise probably more California manufacturers were included than out-of-state when you consider the total number of manufacturers in the United States. Even if this were not so, the California manufacturer is checked periodically at his factory, and closer control can be maintained. This type of control is impossible for the out-of-state manufacturer. We have plans to correct this, I can assure you.

It is my understanding that the new program provides for checking each manufacturer's products at least once in a three-year period. These will be selected on a random basis. The inspectors are notified and a whole article of furniture is picked up and sent to the laboratory for analysis. In California, this article will be picked up at the factory. For out-of-state manufacturers, however, the article must be picked up either at a wholesaler's or at a retail store. The present field inspection will continue but with greater emphasis on unlicensed activity and prima facie violations of the law.

Let's take a look at more of the new look. Let's look at mattresses. A survey was started last January of all bedding manufacturers. At one period earlier this year, there was not a mattress for sale in California that fully complied with our regulations. Either the component parts of the cotton batting were not listed, or there was an improper description of the sisal pads, or there was a misquoting of size and weight on the label, or a violation as to content. As a result of this survey, the manufacturers, retailers, suppliers, and allied groups were invited to meet with your advisory board and the bureau director. Our committee consultant attended this meeting in Los Angeles as an observer. The results of this meeting were beneficial both to the consumer and to the industry. There were subsequent meetings with the legislative committee of the Furniture Manufacturers Association and the Bureau of Furniture and Bedding Inspection. More meaningful

rules were proposed and adopted. Additional meetings are being held to adopt rules which will offer more protection to the consumer, particularly in the field of advertising. The word "guarantee" has several connotations, and I am happy to see the industry and the bureau making a joint effort to eliminate sharp practices.

The whole question of false and misleading advertising is one that cannot have too much emphasis. I am happy to report that the bureau has stepped up its enforcement program in this area; 13 cases have been referred to the Attorney General and are scheduled for administrative hearing. The general types of violations for these cases are aiming at advertisements which (a) state "going out of business"; (b) falsely advertise great reductions in price such as "prices slashed 50 percent"; and (c) advertisements which show in one ad "Former price \$-----, regular price \$-----, sale price \$-----." It is interesting to note that 2 of the 13 cases have been completed and have resulted in suspension of licenses.

In addition to the rule changes previously mentioned, the bureau and the advisory board are taking a new look at the sterilization regulations and at those pertaining to synthetic fibers as well as to feather and down. To my knowledge this is the first time since the inception of the Bureau of Furniture and Bedding Inspection that there has been such a wholesale change in outlook. I like to think that we had a little part in this change.

Our factfinding committee has been busy also. We've been doing some research to ascertain what is going on elsewhere in the country. We wrote letters to the other 49 states as well as to the federal government seeking information so we might compare the California program with the rest of the country. We received replies from 25 of the states. Some of them are most interesting.

After receiving those replies, another letter was sent asking how much money was spent in enforcement, how many people were employed, and the source of revenue. The response to the latter letter was poor. Only 12 states replied and those replies left a lot to be desired. Perhaps when we call on some of them personally, we'll get the answers.

You will be interested in some of their replies on enforcement. Let me read some of the excerpts.

This is from the State of Maine. "We have no full-time inspector, but the deputy commissioner handles bedding inspections on a *part-time basis as his available time permits*. It should be noted that a *very limited time* is spent on such inspections."

The Attorney General of New Hampshire advises that furniture and bedding law enforcement is delegated to the State Board of Health. I quote from his reply. "This board (Board of Health) advises that it has no active program under this law and only investigates complaints registered with it."

The letters from Nebraska are refreshing for their candor. Let me quote from the first reply to our inquiry. "After reading these [he is referring to the Nebraska laws] you will undoubtedly reach the conclusion that these are inadequate for the intended purpose and should be subject to amendment." The reply to our second letter is even more

revealing, and I quote: "Nebraska is budgeting no money for the enforcement of its bedding laws." The laws are not only inadequate but apparently they aren't even enforced.

Let's take a look closer to home. You must be aware of Nevada's regulations. Used bedding is controlled. New furniture and bedding is unregulated. May I read from the letter we received—"we suggest they have the approved uniform label of the National Association of Bedding Manufacturers." After looking at some of the California violations, where we have what must be classed as strict enforcement, I can only imagine what happens to such a, and I quote, "suggestion."

Wisconsin says that it has no complete law covering the specifics of either the manufacture or marketing of furniture and bedding. The Department of Agriculture is charged with the enforcement of the mattress and bedding regulations in the State of Iowa. There are none for upholstered furniture, and this is common with most of the states. Their letter states, "Our mattress law is very brief and greatly in need of updating." After reading their statutes, I agree wholeheartedly with their conclusion. It certainly does need updating.

Let me quote from the Director of the Division of Industrial Inspection of the State of Missouri: "The mattress and beddings laws of our state fall far short of being adequate, and, in my opinion, legislation in this area is badly needed."

You'll never believe where this letter came from. In discussing his state's laws this gentleman says, "we look on the California system of licensing and the California law as being ideal. In fact, we hope to pattern the Texas law after some of the features in the California law." Yes, this is from Texas. I never thought I'd ever live to see the day that Texas would concede that California has better laws.

The State of Florida indicates that they hope to secure a revision in their present regulations at the next session of their State Legislature.

Just two or three more excerpts and that will be all. The State of Georgia states that the bedding industry is fully regulated but, and I quote, "The State of Georgia does not in any way regulate the furniture industry." Arkansas does have certain regulations promulgated by the State Board of Health. They say, however, "We have no licensing requirements for manufacturers or renovators of bedding, etc. . . . We have no way of knowing the cost of enforcement. We are informed by the State Health Officer that the cost is very minor."

It doesn't paint a very pretty picture. You can count on the fingers of one hand the number of states that have fairly adequate regulations and enforcement programs. The concern on our part was magnified when we tried to secure information on the role of the federal government in its regulation of the furniture and bedding industry.

Originally we wrote to the Federal Trade Commission to ascertain what rules and standards had been set. We received them in due course and were impressed by them. The trade practice rules promulgated by the Federal Trade Commission for the household furniture industry, the bedding manufacturers, the wholesale distributing industry, and the feather and down regulations are excellent. We wrote to them in an effort to ascertain how large their enforcement staff was and the number of violators prosecuted. Here is the reply we received:

FEDERAL TRADE COMMISSION

WASHINGTON, D.C.

Mr. William Montgomery,
Consultant,
Factfinding Committee
on Business and Commerce,
California Legislature,
State Capitol,
Sacramento, California.

Dear Mr. Montgomery,

Your letter of September 2, 1964, directed to the Commission has been referred to me for reply.

The Commission has promulgated trade practice rules for the Household Furniture Industry and the Bedding Manufacturing and Wholesale Distributing Industry, copies enclosed. The rules for each of these industries are administered by the staff attorney as are the trade practice rules for the feather and down products industry. In addition to the above rules, these same attorneys also administer other trade practice rules for various industries.

Trade practice rules are interpretive of requirements of laws administered by the Commission. In the event we are unable to secure voluntary compliance with the rules, alleged violations may be referred to other bureaus within the Commission for attention. In these circumstances it would be most difficult to determine the amount of money expended for administering any particular set of rules.

I hope the above information will prove helpful to you.

Very truly yours,

Fauster Vittone,
Attorney

Enclosures.

I can only conclude that there is no federal enforcement program of its own rules. This was vividly brought home to me earlier this year when complaints were coming in relative to the stepped-up enforcement program and the number of out-of-state articles held off sale by the Bureau of Furniture and Bedding Inspection in California. Our committee had requested the bureau to check a certain out-of-state manufacturer's merchandise when we were tipped off that it contained used material. The report was true and the merchandise held off sale. At the manufacturer's request, it was returned to him. In checking reports of the bureau, we learned that this was common with out-of-state merchandise. When we asked what happened, we were advised that, in all probability, that merchandise was shipped to another state that either had no regulations or no enforcement program. I'd like to point out that all of this merchandise was in violation of the FTC rules and had twice crossed state lines, so there was no question of interstate commerce coverage.

A further check revealed that there are only two federal inspectors in all of California. If the federal regulations are to be meaningful, they should be enforced. The FTC rules are good ones. I hope that California adopts some of them. But let's see that they are enforced. If there were rigid federal enforcement, it wouldn't be necessary for the State of California to protect you from unfair out-of-state competition. In the first place, there wouldn't be much competition if federal laws were enforced and, in the second place, it certainly wouldn't be unfair. We hope to do something about it. We also want to make

certain that any merchandise manufactured in California meets the minimum standards for California before it is shipped to other states. I'm sorry to say that isn't so today.

Perhaps it's time to go over some of the recommendations we will make to the Legislature in our report. While these are not final, they have been given considerable thought.

We expect to make to the Legislature in our report of the Furniture and Bedding Industry in California, the following recommendations:

1. That the present advisory board should be a full policymaking and regulatory board with powers to adopt rules, discipline licensees, set fees above the minimum established by the Legislature, and such other powers necessary to protect the welfare of the public.
2. That the Legislature by resolution request through Congress and the executive branch of the government to insure rigid enforcement of Federal Trade Commission Regulations.
3. That the Furniture and Bedding Regulatory Board, by rule, make mandatory that the FTC and the home state be informed of any violations discovered in California by out-of-state manufacturers, suppliers, etc.
4. That there be a review of the license fees charged by the Bureau of Furniture and Bedding.
5. That there be a periodic review of the rules and regulations adopted by the Furniture and Bedding Regulatory Board, not less than biennially.
6. That some control of out-of-state shipments be adopted so better inspection is advanced. Perhaps a requirement that the bureau receive a copy of the bill of lading for each shipment would be the answer.
7. That consideration be given to a system of fines for violators, and the moneys so derived be set up in a special fund to pay for samples taken for inspection.
8. That a system of lot numbers be worked out so that merchandise found to be unfit could be traced and placed off sale.
9. That a statement of policy be adopted that California standards be not less than those of the federal government.
10. That consideration be given to rules covering quality standards for all materials used, including designation of the types of woods used in furniture construction.

Some of these recommendations need no further explanation. With respect to the present advisory board, in my opinion it is high time it be recognized for what it is and be given the authority and responsibility for the good conduct of the industry and protection of the public.

We feel that the fees should be reviewed. The present ones don't make sense. As a matter of fact, they helped to create much of the resentment of the bureau's enforcement program and led to the present interim hearings and study of the furniture and bedding industry. It didn't make sense at our hearings last October to learn that drug

chains and grocery chains which sold a few pillows paid the largest license fees in the state; that the Goodwill Society and other charitable organizations paid far more than the largest mattress manufacturer in the United States.

Not much more need be said about periodic review of the board rules and regulations. In the course of our study, we discovered that technological improvements and new synthetics were either ignored or their use curtailed. Some rules were of no protection to the public but did hamstring the industry. Periodic review should be made.

Out-of-state merchandise is a real problem. Information we have garnered tends to indicate that the vast majority of it is never checked. The new hotels and buildings being erected as well as the new apartment houses being built are furnished by contractors and are not in the normal course of trade. If our enforcement program is to really work, we have to know where the merchandise is coming from, where it is going, and if it meets California standards. I am certain from talking to many of you that if we had this information, a great deal of merchandise would either be held off sale or never get here in the first place. It would also give our California manufacturers a chance to bid on some of this business. . . .

I touched a little on FTC regulations. These are good and some of them would be helpful if adopted for California. I trust and hope that we will do all within our power to see that these regulations are enforced and, further, that California does nothing to dilute or eliminate them. The reason I stress this is that I know the eminent position California holds in the industry. Should we adopt any weaker rules, it would be used to get the FTC to weaken theirs. Let us be honest with ourselves and let us keep the eminent position we have. Let us also not forget the rules are for the protection of the consumer.

This, then, is what we propose. Most of these proposals have been made after meeting with leaders of the furniture and bedding industry and a study of what goes on elsewhere in this land of ours. I think they are fair and will be of help to the industry and to the public if adopted.

CONCLUSION

Legislation incorporating the committee's major recommendations was introduced in the 1965 session of the Legislature. This was a consensus bill that had the full support of the manufacturing, retailing, and material-supply segments of the furniture and bedding industry as well as the consumer groups.

Though the bill passed both houses of the Legislature with the unanimous support of both parties, the bill was vetoed by the Governor. The main reason given for the veto was that the director was not given the authority deemed necessary to administer the proposed bill, and that a new board was being created.

The committee has consistently maintained that the present rules and regulations have a history of weak and lax enforcement. Subsequent to the public hearings held by this Committee, the increased activity by the Bureau of Furniture and Bedding Inspection can be directly attributed to the leadership of the Director and Deputy Director of the department. This obviously was at the expense of the 29 other boards and commissions under their direction.

It is felt that a policy-making board rather than an advisory board would result in better protection for the industry and for the public. A review of the other boards and commissions within the Department of Business and Vocational Standards verifies this conclusion.

The committee is continuing its study of the Furniture and Bedding Industry. It is compiling additional data with respect to licensing fees and in regard to disciplinary proceedings. It is anticipated that another bill incorporating the committee's earlier recommendations will be introduced possibly in 1966, but certainly in 1967.

SENATE BILL No. 224

An act to amend Sections 19004, 19012.5, 19031, 19034, 19035, 19035.5, 19052, 19054, 19056, 19058.3, 19059, 19059.5, 19063, 19064, 19081, 19089, 19120, 19121, 19122, 19122.5, 19123.4, 19123.5, 19123.6, 19124, 19124.5, 19127, 19127.5, 19127.6, 19129, 19131, 19132, 19170, 19170.5, 19171.6, 19174, 19202, 19203, 19206, 19208, 19210, 19215, 19215.1, 19215.3, 19215.4, 19215.5, 19215.6, and 19215.7 of, to add Sections 19000.5, 19012.6, 19222, 19223, 19224, and 19225 to, and to repeal Sections 19030, 19033, 19035.6, and 19035.8 of, the Business and Professions Code, and to amend Sections 19034, 19035, 19121, 19123.4, 19123.6, 19124, 19132, 19170, 19202, and 19203 of said code, as proposed by Assembly Bill No. 3227 of the 1965 Regular Session, relating to furniture and bedding inspection.

The people of the State of California do enact as follows:

SECTION 1. Section 19004 of the Business and Professions Code is amended to read:

19004. (a) "Board" refers to the Board of Furniture and Bedding.

(b) "Chief" refers to the executive secretary and chief of the board.

(c) "Inspector" refers to an inspector of the board.

(d) "Director" refers to the Director of Professional and Vocational Standards.

(e) "Department" refers to the Department of Professional and Vocational Standards.

SEC. 1.5. Section 19012.5 of said code is amended to read:

19012.5. "Disinfestor" means a person who disinfests articles of upholstered furniture or bedding or filling materials.

SEC. 1.6. Section 19012.6 is added to said code, to read:

19012.6. "Disinfest" means and includes for the purposes of this chapter disinfest, disinfect, and fumigate, and all the noun and verb forms thereof.

SEC. 2. Section 19030 of said code is repealed.

SEC. 3. Section 19031 of said code is amended to read:

19031. The chief shall be appointed by the Governor and shall serve at his pleasure. His compensation shall be fixed by the Director of Professional and Vocational Standards in accordance with law. The chief shall serve as executive secretary of the board and shall perform the duties delegated to him by

the board and he shall be responsible to the board for performance thereof.

SEC. 4. Section 19033 of said code is repealed.

SEC. 5. Section 19034 of said code is amended to read:

19034. With the approval of the director, the board may adopt rules and regulations necessary for the administration of this chapter and declaring the policy of the board, and shall determine when any article, not otherwise clearly defined is "upholstered furniture," "stuffed, padded or lined toys," or "bedding" under the provisions of this chapter.

SEC. 6. Section 19035 of said code is amended to read:

19035. There is in the Department of Professional and Vocational Standards a California Board of Furniture and Bedding, which consists of eight members appointed by the Governor. The first members of the board shall be the board members of the former California Advisory Board of Furniture and Bedding who shall serve until expiration of the respective terms for which each of them was heretofore appointed and until such expirations said members shall be charged with all of the duties and be vested with the authorities pertaining to board members of the Board of Furniture and Bedding.

SEC. 7. Section 19035.5 of said code is amended to read:

19035.5. The board shall meet at least once in each calendar quarter of each year. Special meetings of the board may be held at such times as the board may provide.

Four members shall constitute a quorum for the transaction of business.

The board shall elect from its members, each for a term of one year, a chairman and a vice chairman, and may appoint such committees as it deems necessary to carry out its duties. The duty of enforcing and administering this chapter is vested in the board and it is responsible to the director therefor. The board is authorized to operate and maintain a laboratory for the purpose of performing chemical and other research, analysis and inspections of all filling materials used or useable in the manufacture, renovation or repair of articles of upholstered furniture, bedding and stuffed, padded or lined toys, for the protection of the public.

SEC. 8. Section 19035.6 of said code is repealed.

SEC. 9. Section 19035.8 of said code is repealed.

SEC. 10. Section 19052 of said code is amended to read:

19052. Every upholstered furniture repairer, unless he holds a furniture manufacturer's license, shall hold a furniture repairer's license bearing a registry number assigned by the board.

SEC. 11. Section 19054 of said code is amended to read:

19054. Every upholstered furniture manufacturer shall hold a furniture manufacturer's license, bearing a registry number assigned or approved by the board.

SEC. 12. Section 19056 of said code is amended to read:

19056. Every bedding renovator, unless he holds a bedding manufacturer's license, shall hold a bedding renovator's license, bearing a registry number assigned by the board.

SEC. 13. Section 19058.3 of said code is amended to read:

19058.3. Every manufacturer of toys which are stuffed, padded, or lined with filling material shall hold a toy manufacturer's license, bearing a registry number assigned or approved by the board.

SEC. 14. Section 19059 of said code is amended to read:

19059. Every supply dealer, unless he holds an upholstered furniture manufacturer's license or a bedding manufacturer's license, shall hold a supply dealer's license bearing a registry number assigned or approved by the board.

SEC. 15. Section 19059.5 of said code is amended to read:

19059.5. Every disinfestor shall hold a disinfestor's license bearing a registry number assigned by the board.

SEC. 16. Section 19063 of said code is amended to read:

19063. The board may refuse to issue any license provided for in this chapter to any individual:

(a) Who has had any license issued to him revoked, or whose license is under suspension, or who has failed to renew his license while it was under suspension.

(b) If any license of a partnership of which he is or was a member, or of a corporation of which he is or was an officer or director, or of a firm or association of which he is or was an officer or of which he is or was acting in a managerial capacity, has had any license issued to it revoked or suspended, and while acting as such member, officer, director, or in such managerial capacity he participated in any of the prohibited acts for which any such license was revoked or suspended.

SEC. 17. Section 19064 of said code is amended to read:

19064. The board may refuse to issue any license provided for in this chapter to any partnership, corporation, firm, or association:

(a) Who has had any license issued to it revoked, or whose license is under suspension, or who has failed to renew its license while it was under suspension.

(b) If any member of any such partnership, or any officer or director of any such corporation, or any officer or person acting in a managerial capacity of any such firm or association has had any license issued to him revoked, or whose license is under suspension, or who has failed to renew his license while it was under suspension.

(c) If any member of the partnership, or any officer or director of the corporation, or any officer or person acting in a managerial capacity of the firm or association, was either a member of any partnership, or an officer or director of any corporation, or an officer or person acting in a managerial capacity of any firm or association, whose license has been revoked, or whose license is under suspension, or who failed to renew a license while it was under suspension, and while acting as such member, officer, director, or person acting in a managerial capacity participated in any of the prohibited acts for which any such license was revoked or suspended.

SEC. 18. Section 19081 of said code is amended to read:

19081. The form and size of labels, the fabric of which they are made and the wording and statements thereon necessary to carry out the provisions of this chapter, shall be approved by the board.

SEC. 19. Section 19089 of said code is amended to read:

19089. The board may establish grades, specifications and tolerances for the kinds and qualities of materials which are used or intended to be used in the manufacture, repair or renovation of upholstered furniture, bedding or filling materials, and may approve or adopt designations and rules which are not in conflict with any provisions of this chapter, for the labeling of articles filled with these materials.

SEC. 20. Section 19120 of said code is amended to read:

19120. The enforcement of all disinfection regulations approved by the California State Department of Public Health pertaining to any article subject to the provisions of this chapter is vested in the board.

SEC. 21. Section 19121 of said code is amended to read:

19121. Filthy or soiled articles of new or used upholstered furniture or bedding, or toys which are stuffed, padded, or lined with filling material, cannot be sold, offered or exposed for sale unless the fabric covering them is either properly cleaned or replaced by a new covering and then subjected to disinfection when so provided for in this chapter.

SEC. 22. Section 19122 of said code is amended to read:

19122. A person shall not engage in the business of disinfecting any article of upholstered furniture or bedding or filling material, provided for in this chapter, without first having his disinfection equipment tested and approved by the board.

SEC. 23. Section 19122.5 of said code is amended to read:

19122.5. Periodic tests and inspections shall be made by an authorized representative of the board, to determine whether or not the equipment and procedures used, comply with the requirements of the disinfection regulations.

SEC. 24. Section 19123.4 of said code is amended to read:

19123.4. Newly manufactured articles of upholstered furniture and bedding, or toys which are stuffed, padded, or lined with filling material, which contain any secondhand filling material shall be disinfested before they are offered or exposed for sale, except feather- and down-filled articles. Feathers and down must be disinfested loose.

SEC. 25. Section 19123.5 of said code is amended to read:

19123.5. Every article of upholstered furniture and bedding and all filling material, repaired or renovated for resale or repaired or renovated for an owner but subsequently offered for sale shall be disinfested before being offered or exposed for sale.

SEC. 26. Section 19123.6 of said code is amended to read:

19123.6. Every article of upholstered furniture or bedding, and all toys which are stuffed, padded, or lined with filling material, to which any secondhand material has been added in the process of repairing, shall be disinfested in accordance with the provisions of the disinfestation regulations.

SEC. 27. Section 19124 of said code is amended to read:

19124. Every person who receives for disinfestation any upholstered furniture or bedding, or any toys or filling material, which are stuffed, padded, or lined with filling material, shall disinfest all such articles and material in accordance with the disinfestation regulations.

SEC. 28. Section 19124.5 of said code is amended to read:

19124.5. Every person who disinfests any upholstered furniture or bedding or filling material shall affix a disinfestation label to the article or material immediately after the disinfestation has been completed. The label shall be securely attached in a position where it may be conveniently examined.

SEC. 29. Section 19127 of said code is amended to read:

19127. The form, size and color of disinfestation labels, and the paper of which they are made shall be approved by the board and as provided in the label regulations.

SEC. 30. Section 19127.5 of said code is amended to read:

19127.5. Disinfestation labels shall be sold by the board only to disinfestors licensed under this chapter. Illegal possession of any disinfestation label is a violation of this chapter. Void or mutilated labels shall be returned to the board.

SEC. 31. Section 19127.6 of said code is amended to read:

19127.6. The disinfestor shall keep a record of all data and show the disposition of every label as required in the disinfestation regulations. The record shall be accessible at all reasonable times to the board, chief and the inspectors.

SEC. 32. Section 19129 of said code is amended to read:

19129. Articles of secondhand upholstered furniture and bedding listed in the disinfestation regulations, and any

secondhand article that can be used for sleeping or reclining purposes, shall be disinfested under the provisions of this chapter before being sold and have attached thereto a disinfection label.

SEC. 33. Section 19131 of said code is amended to read:

19131. Every article of upholstered furniture or bedding from any private or public hospital, jail or other institution, or which has been used by any person, suffering from an infectious or contagious disease, shall be disinfested before it is repaired or renovated.

SEC. 34. Section 19132 of said code is amended to read:

19132. New or disinfested articles of upholstered furniture or bedding, toys, or materials shall at all times be kept separate from any secondhand articles or materials that are non-disinfested.

SEC. 35. Section 19170 of said code is amended to read:

19170. (a) The fee imposed for the issuance and for the renewal of each license granted under this chapter shall be set by the board, with the approval of the director, at a sum not more nor less than that shown in the following table:

	Maximum fee	Minimum fee
Furniture manufacturer's license.....	\$120	\$40
Wholesale furniture dealer's license.....	120	40
Bedding manufacturer's license.....	120	40
Wholesale bedding dealer's license.....	120	40
Supply dealer's license.....	120	40
Furniture repairer's license.....	80	20
Bedding renovator's license.....	80	20
Disinfestor's license.....	80	20
Retail furniture dealer's license.....	20	4
Retail bedding dealer's license.....	20	4
Toy manufacturer's license.....	120	40
Wholesale toy dealer's license.....	120	40
Retail toy dealer's license.....	20	4

(b) A person who has paid the required fee and who is duly licensed as a furniture manufacturer, a furniture repairer, a bedding manufacturer or a bedding renovator under this chapter shall not be required to pay, in addition, the fee prescribed herein for a disinfestor's license.

(c) A person who has paid the required fee and who is duly licensed as a retail furniture dealer or a retail bedding dealer under this chapter shall not be required to pay, in addition, the fee prescribed herein for a retail toy dealer's license.

(d) A person who has paid the required fee and who is duly licensed as a wholesale furniture dealer or a wholesale

bedding dealer under this chapter shall not be required to pay, in addition, the fee prescribed herein for a wholesale toy dealer's license.

SEC. 36. Section 19170.5 of said code is amended to read:

19170.5. Licenses issued under this chapter expire at 12 p.m. on August 31, 1962, and thereafter, at 12 p.m. on August 31 of each even-numbered year, if not, in each instance renewed. To renew his license, a licensee shall, on or before the date on which it would otherwise expire, apply for renewal on a form prescribed by the board, and pay the fee prescribed by Section 19170. If the licensee fails to renew his license before its expiration, a delinquency fee of twenty percent (20%) shall be added to the renewal fee. If the renewal fee and delinquency fee are not paid within five years after expiration of the license, the licensee shall be subject to such penalties as are provided elsewhere in this chapter.

SEC. 37. Section 19171.6 of said code is amended to read:

19171.6. The board shall prescribe the procedure for licensing of any applicants for proration not clearly defined elsewhere in this chapter.

SEC. 38. Section 19174 of said code is amended to read:

19174. All fees collected under this chapter shall be reported to the State Controller and paid to the State Treasurer and credited to the Board of Furniture and Bedding Fund, which fund is hereby created. The Bureau of Furniture and Bedding Inspection Fund is hereby abolished. The unencumbered balance in said fund on the effective date of this act shall on order of the Controller be transferred to the Board of Furniture and Bedding Fund and shall be available for expenditure by the board and the director carrying out their respective functions and duties under this chapter.

SEC. 39. Section 19202 of said code is amended to read:

19202. The board may condemn, withhold from sale, seize or destroy any upholstered furniture or bedding, or any toys stuffed, padded, or lined with filling material, or any filling material which is found to be in violation of this chapter. The board may also withhold from sale any such item in the possession or control of any person not duly licensed and required to be licensed under the provisions of this chapter or of any person whose license is delinquent or subject to suspension or revocation.

SEC. 40. Section 19203 of said code is amended to read:

19203. The tag to be affixed to any article of condemned upholstered furniture, bedding, toys, or any material by an inspector shall be a red tag and shall contain such information as may be required by the board.

SEC. 41. Section 19206 of said code is amended to read:
19206. No person shall interfere with, obstruct or otherwise hinder any inspector of the board in the performance of his duties. The chief, his deputies, and assistants, and all inspectors in the performance of their official duties, shall have the same powers as are possessed by peace officers in this state.

SEC. 42. Section 19208 of said code is amended to read:
19208. The chief or any inspector may cite any person subject to the provisions of this chapter to a hearing before the board to show cause why he should not be subject to disciplinary action or prosecution for any act or omission in violation of this chapter.

SEC. 43. Section 19210 of said code is amended to read:
19210. After a hearing, the board may suspend a license for a period not to exceed six months for a violation of any of the provisions of this chapter or of the rules and regulations of the board, or for a violation of Article 1, Chapter 1 of Part 3 of Division 7 of the Business and Professions Code, relating to false or misleading advertising; provided, however, that the license of a wholesaler or retailer shall not be suspended in the absence of a finding that the wholesaler or retailer knowingly offered for sale or sold articles not conforming to the requirements of this chapter or the rules and regulations of the board.

(a) In lieu of a third suspension, the board may revoke a license.

(b) In any order of suspension or revocation, the board may impose conditions relative to the disposition of articles not conforming to the requirements of this chapter or the rules and regulations of the board, or may impose conditions relative to the completion or fulfillment of any orders or contracts entered into prior to the date of the hearing.

SEC. 44. Section 19215 of said code is amended to read:
19215. As used in this article, unless otherwise indicated, "presiding officer" means the Presiding Officer of the Office of Administrative Procedure.

SEC. 45. Section 19215.1 of said code is amended to read:
19215.1. The acceptance by a nonresident licensee of any of the rights and privileges conferred upon him by this chapter, as evidenced by his engaging within this state, either personally or through an agent or employee, in a business subject to license under this chapter, is equivalent to the appointment by such licensee of the presiding officer as his true and lawful attorney upon whom may be served all lawful process in any disciplinary proceeding conducted against him under this chapter.

SEC. 46. Section 19215.3 of said code is amended to read:

19215.3. Service shall be made by leaving a copy of the accusation, together with a notice of defense and statement to respondent as described in Section 11505 of the Government Code, with a fee of two dollars (\$2) for each licensee to be served, in the hands of the presiding officer or in his office in Sacramento. Such service shall be sufficient service on the licensee subject to compliance with Section 19215.4 of this code.

SEC. 47. Section 19215.4 of said code is amended to read:

19215.4. A notice of such service and a copy of the accusation, together with the notice of defense and statement to respondent, shall forthwith be sent by registered mail by the presiding officer to the licensee at his last known address as furnished by the board. Personal service of such notice, copy of the accusation, notice of defense, and statement to respondent upon the licensee wherever found outside this state shall be the equivalent of such mailing.

SEC. 48. Section 19215.5 of said code is amended to read:

19215.5. Proof of compliance with Section 19215.4 of this code shall be made in the event of service by mail by affidavit of the presiding officer or his authorized employee showing such service by mailing, together with the return receipt of the United States post office bearing the signature of the licensee or his agent. Such affidavit and receipt shall be appended to the original accusation on file with the board. In the event of personal service outside this state such compliance may be proved by the return of any duly constituted public officer qualified to serve process in civil actions in the state or jurisdiction where the licensee is found, showing such service to have been made. Such return shall be appended to the original accusation on file with the board.

SEC. 49. Section 19215.6 of said code is amended to read:

19215.6. The board, or if the proceeding has been assigned to a hearing officer of the Office of Administrative Procedure, such hearing officer, may order such postponements or continuances and grant such extensions of time as may be necessary to afford the licensee reasonable opportunity to defend the proceedings. In no event shall the licensee have less than 30 days after the date of mailing or delivery to him of the copy of the accusation in which to file a notice of defense, nor shall the notice of hearing provided for in Section 11509 of the Government Code or the notice and copy of affidavit referred to in Section 11514 of said code be mailed or delivered less than 20 days prior to the date of hearing, and the time for making a request to cross-examine under said Section 11514 shall be not less than 15 days.

SEC. 50. Section 19215.7 of said code is amended to read:
19215.7. The presiding officer shall keep a record of all process served upon him pursuant to this article which shall show the day and hour of service.

SEC. 51. Section 19222 is added to said code, to read:

19222. The operation of any business, establishment, plant, shop, store, agency or franchise, in violation of this chapter may be enjoined by the superior court of any county upon petition by the board. Proceedings under this section shall be conducted in accordance with Chapter 3, Title 7, Part 2 of the Code of Civil Procedure, except that no undertaking shall be required of the board.

SEC. 52. Section 19223 is added to said code, to read:

19223. Whenever a decision of the board suspending a license for 30 days or less becomes final, whether by failure of the licensee to appeal the decision or by exhaustion of all appeals and judicial review, the licensee may, before the operative or effective date of such suspension, petition the board for permission to make an offer in compromise, to be paid into the State Treasury for deposit in the Board of Furniture and Bedding Fund, consisting of a sum of money in lieu of serving such suspension. Upon the receipt of such a petition, the board may stay the proposed suspension and cause such investigation to be made as it deems desirable and may grant such petition if it is satisfied (a) that the public welfare, health and safety would not be impaired or placed in jeopardy by permitting the licensee to operate during the period set for suspension and that the payment of the sum of money will achieve the desired disciplinary purpose; (b) that the books and records of the licensee are kept in such a manner that the loss of sales which the licensee would have suffered had such suspension gone into effect can be determined with reasonable accuracy therefrom. Such offer in compromise shall be the equivalent of 20 percent of the estimated gross sales for each day of such proposed suspension and such offer in compromise shall be not less than two hundred fifty dollars (\$250) nor more than two thousand dollars (\$2,000).

SEC. 53. Section 19224 is added to said code, to read:

19224. In connection with any petition referred to in Section 19223, the authority of the board is limited to the granting of such stays as are necessary for it to complete its investigation and make its findings and, if it makes such findings, to the granting of an order permanently staying the imposition of the entire suspension or of that portion of the suspension not otherwise conditionally stayed by the decision of the board. If the suspension was imposed as a result of an

accusation filed by another public officer other than the board or any board member thereof acting in his official capacity, the board shall not order such permanent stay of suspension without the written consent of such other public officer.

SEC. 54. Section 19225 is added to said code, to read:

19225. If the board does not make the findings required in Section 19223 and does not order the suspension permanently stayed, the suspension shall be effective on the operative date finally set by the board.

SEC. 55. Section 19000.5 is added to said code, to read:

19000.5. Notwithstanding any other provision of this chapter the director may, to the extent he considers necessary or desirable and through personnel designated by him, perform the ministerial duties vested in or authorized to be performed by the board under this chapter and, in accordance with standards established by the board, do any or all of the following:

(a) Receive applications and related materials, filed pursuant to this chapter, process and evaluate such applications and related materials, and make recommendations to the board concerning their disposition.

(b) Initiate and conduct inspections and investigations necessary for the administration and enforcement of this chapter and make recommendations to the board concerning disposition thereof.

(c) Prescribe the form of applications, licenses, identification cards, labels, and notices.

SEC. 56. Section 19034 of said code, as proposed by Assembly Bill No. 3227 of the 1965 Regular Session, is amended to read:

19034. With the approval of the director, the board may adopt rules and regulations necessary for the administration of this chapter and declaring the policy of the board, and shall determine when any article, not otherwise clearly defined, is "upholstered furniture" or "bedding" under the provisions of this chapter.

SEC. 57. Section 19035 of said code, as proposed by Assembly Bill No. 3227 of the 1965 Regular Session, is amended to read:

19035. There is in the Department of Professional and Vocational Standards a California Board of Furniture and Bedding, which consists of seven members appointed by the Governor. The first members of the board shall be the board members of the former California Advisory Board of Furniture and Bedding who shall serve until expiration of the respective terms for which each of them was heretofore appointed and until such expirations said members shall be

charged with all of the duties and be vested with the authorities pertaining to board members of the Board of Furniture and Bedding.

SEC. 58. Section 19121 of said code, as proposed by Assembly Bill No. 3227 of the 1965 Regular Session, is amended to read:

19121. Filthy or soiled articles of new or used upholstered furniture or bedding cannot be sold, offered or exposed for sale unless the fabric covering them is either properly cleaned or replaced by a new covering and then subjected to disinfestation when so provided for in this chapter.

SEC. 59. Section 19123.4 of said code, as proposed by Assembly Bill No. 3227 of the 1965 Regular Session, is amended to read:

19123.4. Newly manufactured articles of upholstered furniture and bedding which contain any secondhand filling material shall be disinfested before they are offered or exposed for sale, except feather and down-filled articles, Feathers and down must be disinfested loose.

SEC. 60. Section 19123.6 of said code, as proposed by Assembly Bill No. 3227 of the 1965 Regular Session, is amended to read:

19123.6. Every article of upholstered furniture or bedding to which any secondhand material has been added in the process of repairing, shall be disinfested in accordance with the provisions of the disinfestation regulations.

SEC. 61. Section 19124 of said code, as proposed by Assembly Bill No. 3227 of the 1965 Regular Session, is amended to read:

19124. Every person who receives for disinfestation any upholstered furniture or bedding or filling material, shall disinfest all such articles and material in accordance with the disinfestation regulations.

SEC. 62. Section 19132 of said code, as proposed by Assembly Bill No. 3227 of the 1965 Regular Session, is amended to read:

19132. New or disinfested articles of upholstered furniture or bedding or materials shall at all times be kept separate from any secondhand articles or materials that are nondisinfested.

SEC. 63. Section 19170 of said code, as proposed by Assembly Bill No. 3227 of the 1965 Regular Session, is amended to read:

19170. (a) The fee imposed for the issuance and for the renewal of each license granted under this chapter shall be

set by the board, with the approval of the director, at a sum not more nor less than that shown in the following table:

	Maximum fee	Minimum fee
Furniture manufacturer's license-----	\$120	\$40
Wholesale furniture dealer's license---	120	40
Bedding manufacturer's license-----	120	40
Wholesale bedding dealer's license-----	120	40
Supply dealer's license-----	120	40
Furniture repairer's license-----	80	20
Bedding renovator's license-----	80	20
Disinfestor's license -----	80	20
Retail furniture dealer's license-----	20	4
Retail bedding dealer's license-----	20	4

(b) A person who has paid the required fee and who is duly licensed as a furniture manufacturer, a furniture repairer, a bedding manufacturer or a bedding renovator under this chapter shall not be required to pay, in addition, the fee prescribed herein for a disinfestor's license.

SEC. 64. Section 19202 of said code, as proposed by Assembly Bill No. 3227 of the 1965 Regular Session, as amended to read:

19202. The board may condemn, withhold from sale, seize or destroy any upholstered furniture or bedding or any filling material which is found to be in violation of this chapter. The board may also withhold from sale any such item in the possession or control of any person not duly licensed and required to be licensed under the provisions of this chapter or of any person whose license is delinquent or subject to suspension or revocation.

SEC. 65. Section 19203 of said code, as proposed by Assembly Bill No. 3227 of the 1965 Regular Session, is amended to read:

19203. The tag to be affixed to any article of condemned upholstered furniture or bedding, or any material by an inspector shall be a red tag and shall contain such information as may be required by the board.

SEC. 66. Sections 56, 57, 58, 59, 60, 61, 62, 63, 64, and 65 of this act become operative only if Assembly Bill No. 3227 is enacted by the Legislature at its 1965 Regular Session, and in such case at the same time as said Assembly Bill No. 3227 takes effect, at which time Sections 19034, 19035, 19121, 19123.4, 19123.6, 19124, 19132, 19170, 19202, and 19203 of the Business and Professions Code, as amended by Sections 5, 6, 21, 24, 26, 27, 34, 35, 39, and 40, respectively, of this act are repealed.

SEC. 67. Any revenues derived from increases in fees or assessments provided by this act shall not be available for expenditure until appropriated.

LETTER OF TRANSMITTAL

The Honorable Glenn M. Anderson
President of the Senate

Dear Mr. President :

Pursuant to Senate Rule 12.5, the Senate Fact Finding Committee on Education submits this report on its study of problems in the field of education.

The work of the committee was carried out during the interim by five subcommittees appointed October 14, 1963. All recommendations were adopted by the full committee and therefore appear here as full committee reports.

Verbatim transcripts of all hearings are on deposit with the California State Library, the Assembly Legislative Reference Service and the Library of the University of California. And a limited number of transcripts for each hearing are available without charge in the committee office.

Respectfully submitted,

DONALD L. GRUNSKY, *Chairman*
ALBERT S. RODDA, *Vice Chairman*

PART II

Analysis of Senate Bill 728 (1965)	37
--	----

THE STATE'S STRUCTURE FOR POLICY DIRECTION AND SUPERVISION OF THE PUBLIC JUNIOR COLLEGES

Senator Stiern's Higher Education Subcommittee conducted two hearings in 1964, exploring *the state's structure for policy direction and supervision of the public junior colleges*. The first hearing was held July 10 at Foothill College in Los Altos Hills; the second was held December 2 at the State Building in Los Angeles.

The July hearing explored the existing relationship of the junior colleges to the State Board of Education and to the State Department of Education, including the statutory basis of those relationships. At this hearing the committee was interested in learning from the various associations and public agencies, who deal with the junior colleges, the effectiveness of the existing structure for the governance of the junior colleges.

The December hearing provided the various agencies and associations concerned an opportunity to present plans and suggestions for re-organizing the state's structure for governance of the junior colleges. At this hearing, as in July, the State Board of Education and the State Department of Education presented views and recommendations along with other agencies and associations.

The governance of the public junior colleges is a subject that cannot be treated as simply as can the other problems explored by the various subcommittees of the education fact finding committee. A full comprehension of the subject and the problems related to it requires some background knowledge and an understanding concerning the considerations upon which the statement of findings is based.

General Background and Statement of Considerations

The Master Plan for Higher Education made the junior colleges an equal partner in the tripartite system of public higher education in California. The Donahoe Act of 1960 gave the junior colleges primary responsibility for vocational and technical education. The master plan requires the diversion of large numbers of lower division students from the University of California and the state colleges to the junior colleges. Finally, the junior colleges are going to grow at an unprecedented rate, from 473,500 students in the fall of 1964 to 863,000 by 1975 and to about a million students in 1980. The number of campuses required to accommodate these students will grow from the current 74 to over 100 by 1975.

The junior colleges are a major element in the state's system of higher education; they are structured to provide a vocational-technical program tailored to the needs of the individual communities served, as well as providing the lower division of a four-year college program leading to the Baccalaureate degree. Unlike the California State Colleges and the University of California, however, policy direction and supervision over the junior colleges is shared between the State Board of Education and 68 separate local junior college governing boards,

each with its own interests. This situation has given the junior college administrator an unusual amount of freedom of action and has caused the Legislature considerable frustration when attempting to determine the consensus on any issue of importance to the various junior colleges.

The following paragraphs are a brief descriptive outline of the existing structure for policy direction and control over the public junior colleges:

1. *The Legislature* establishes the level of state apportionments, which when combined with local contributions at specified tax levels, assures an effective financial base for the junior college program. To achieve reasonable uniformity of tax efforts, the Legislature has established minimum standards of wealth as one criteria for the formation of a new junior college district. Minimum projected attendance levels are another legislatively established criteria for the establishment of any new junior college district.

The Legislature has, through law, delegated other areas of control and policy direction over the junior colleges to specific public agencies.

2. *The Coordinating Council for Higher Education* is responsible for furnishing definitive studies and surveillance of the junior colleges with respect to the master plan and the elements of higher education policy among the segments. The coordinating council reports directly to the Legislature.

3. *The State Board of Education* is, by law, the agency with authority to prescribe minimum standards for the organization and operation of the junior college districts with regard to calendars, attendance accounting, employment of teachers, course standards, requirements for graduation, and many other areas.

4. *The State Department of Education* is the administrative agency of the state for junior colleges. It apportions funds as provided by law, does the staff work required for course approval by the State Board of Education; and it provides services by consultants on district organization, credential requirements, curriculum development; financing and other areas. The department also participates in the accreditation process of junior colleges. The junior colleges are served by some 18 different bureaus within the department.

5. *Local governing boards*, by law, exercise a high degree of control over the individual colleges; including hiring and assigning personnel, development of curriculum, management of property, planning and construction of facilities and much more.

6. *Junior college policy* is influenced by other than official bodies taking official action: Local governing boards speak to the Legislature through the *California School Boards Association* and directly through their administrators whom they send to Sacramento with instructions to influence, in a specific way, the various legislative proposals that concern junior colleges. *Junior college administrators* speak to their governing boards and to the Legislature through the *California Junior College Association* which has a Department of Education staff member on its board of directors. Junior college faculty members speak to their boards and the Legislature through the *Junior College Faculty As-*

sociation, the *California Teachers Association*, the *California Federation of Teachers* and other associations.

The following are some of the principal considerations that must be taken into account when evaluating the existing policy direction and control structure for the junior colleges:

1. The local autonomy of junior college governing boards is fundamental. The junior college program must reflect the needs and desires of the local people. Recognizing that junior colleges are largely supported by local taxes, there must be allowances for local variations in programs, while maintaining economy of operation and reasonable equality of tax effort among the individual college districts.

2. At the same time, however, the junior colleges must serve a state-wide purpose as an important segment of the state's system of higher education.

The junior colleges must serve the state's interest by affording all youth of the state an opportunity to acquire an education beyond high school. And they must maintain acceptable quality and uniformity of program. Regardless of the content of course offerings and differences between individual junior college programs, students should be able to transfer from one junior college to another without having to repeat basic courses in a field of specialization.

Students who complete two years of transfer work in the junior colleges should meet the requirements for upper division work in the state's four-year collegiate institutions.

Although the individual junior college vocational-technical programs are independently established and are maintained under separate governing boards, they should meet the statewide needs in this area without unnecessary duplication.

With the foregoing background and considerations, the findings of the committee are based upon legislative experience in dealing with the junior colleges and upon information received and recorded at the July and December hearings.

Findings

1. There is an absence of adequate attention to junior colleges by the State Board of Education because of the growing burdens imposed on that board by elementary and secondary education matters—the statements of the board itself to the contrary notwithstanding.

2. There is no official body which exercises effective, continuing supervision over junior college affairs and can communicate junior college needs and policy recommendations to the Legislature.

3. There is no centralized educational authority which has day-to-day relationship with the junior colleges and can effectively guide the development of strong academic standards, coordinated educational planning, and efficient financial management; thus assuring efficient and effective conduct of the junior college program with available state and local funds.

4. There is a growing criticism of the tax burden on property to meet all local educational needs which results in increasing pressure for a larger contribution from the state for junior college current

operating expense and capital outlay costs. At the same time, there is a wide disparity in tax effort and expenditure levels among the junior colleges, with little direct correlation between tax effort and expenditure levels.

5. As the individual junior college districts become larger in geographic area and in student attendance, local autonomy is visibly becoming a matter of autonomy for junior college district administrators.

Conclusion

There is almost unanimous agreement among the associations and agencies, including members of the Legislature concerned, that the existing structure for the governance of the junior colleges is unsatisfactory. There is no consensus, however, even among the membership of some of the individual associations and agencies, regarding the form a new governing structure should take.

For this reason it is unlikely that any definitive action to modify the structure for governance of junior colleges can be accomplished by the 1965 Legislature. Only the reorganization of bureaus and agencies within the Department of Education that the Superintendent of Public Instruction can accomplish on his own authority is likely before 1967.

Recommendations

Members of the committee were unable to agree on recommendations for reorganizing the structure for governance of the public junior colleges.

SECRETARIAL ALLOWANCES FOR MEMBERS OF THE STATE BOARD OF EDUCATION

Senator Rattigan's Subcommittee on School Finance conducted a hearing on September 17, 1964, in Los Angeles concerning the subject matter of SB 1063, Farr (1963); *Secretarial Allowances for Members of the State Board of Education*. The following findings, conclusions and recommendations are based upon information received and recorded at this hearing and from firsthand observation of the state board in action.

Findings

1. The State Board of Education is unique among nonsalaried statewide policy boards because (A) the State Board of Education does not appoint its own executive officer—this official is the elected Superintendent of Public Instruction, whose policies and views concerning public education are often at odds with those of the board; and (B) the almost universal public interest in education gives the State Board of Education and its individual members, a larger, more active "constituency" than any other such board.

2. The board is making an increasing number of policy decisions rather than allowing these to be made within the Department of Education. Even though the board does rely on the department for many things, there are some matters, such as personnel appointments, which members feel require their personal attention.

3. The board is also studying ways of improving education. It has formed itself into 10 committees for depth studies of such areas as legislation, (the board often supports measures that are opposed by the Superintendent of Public Instruction and vice versa); credentials and accreditation; school finance and economy; textbook adoption procedures; high school standards; basic economic education; the Bill of Rights; vocational education; junior college education and the organization and function of the Department of Education.

These studies, together with additional responsibilities delegated by the Legislature (for example: approval of all school district unification proposals), have greatly increased the demands on board members' time; and there has been a corresponding increase in the amount of letters and other communications received by individual board members.

4. Much of the correspondence received by board members can be turned over to the staff for reply, but, in addition to the problem of time lag, there is often the necessity of followup appointments, conferences and other matters that require more personal contact. Frequently letter writers seek the personal opinion of a board member and deserve the courtesy of an answer.

Eight board members, however, are business or professional men who "bootleg" secretarial help at the expense of their firms; two others are housewives who must hire secretarial help out of their own pockets.

One member reported over \$1,300 in nonreimbursable expenses for 1963.

More importantly, most board members are able to respond to less than half of the mail and other communications they receive.

Conclusions

1. Public service inevitably must take a considerable amount of an individual's time, and will of necessity involve out-of-pocket expense, but this should have some reasonable limit.

2. Because the State Board of Education is unique among state-wide nonsalaried policy boards, providing for reimbursement to members for necessary secretarial and clerical expenses will not, in itself, establish a precedent for providing such expense reimbursements to all such boards. The issue is not one of financial help to board members; it is that of service to the people of California who deserve answers to their questions in an ever-increasing flow of correspondence to all members of the State Board of Education.

Recommendation

Provision should be made for the members of the State Board of Education to be reimbursed for necessary secretarial and clerical expenses incurred in performance of their duties as members of the board.

The above recommendation has been implemented by the introduction of SB 1072 by Senator Farr.

SUBCOMMITTEE ON SCHOOL FINANCE

LOS ANGELES, SEPTEMBER 17

WITNESSES IN ORDER OF APPEARANCE

Mr. Cecile B. Cline, President, California Small School Districts Association; Member, Board of Trustees, Mountain View School District, Los Angeles County

Dr. Daniel A. Collins, Member, State Board of Education (written statement submitted)

Mrs. Margarite Bates, Member, State Board of Education (written statement submitted)

SPECIAL STATE ALLOWANCES FOR UNIVERSITY IMPACTED AREAS

Senator Rattigan's Subcommittee on School Finance conducted a hearing on September 17, 1964, in Los Angeles concerning the subject matter of Assembly Bill 1722, Rumford (1963): *Special State Allowances for University Impacted Areas*. The following findings, conclusions and recommendations are based primarily upon information received and recorded at that hearing.

Findings

1. Pupils from the University of California housing facility comprise 31.5 percent of the pupils in grades kindergarten through seven in the Albany Unified School District. Because these students reside in tax-exempt housing, their attendance constitutes a serious hardship in the form of an excess tax burden which falls chiefly upon homeowners as there is no great amount of industrial development in the district.

2. The Albany district spends slightly more than average for current expense of education per unit of average daily attendance—\$485 as opposed to a statewide average of \$471. This level of support is maintained at considerable sacrifice on the part of the local taxpayers, who pay a unified school district tax rate of \$4.30 per \$100 of assessed valuation as opposed to a statewide median rate of \$2.60 per \$100 assessed valuation. (The Albany district has the second highest tax rate in Alameda County.)

3. An expanded tax base through annexation or reorganization is not a solution open to the Albany district as it is surrounded by unified districts; and, is itself a long-time unified district which would meet today's criteria for becoming a unified district.

4. The Legislature has, in the past, provided for special financial assistance to school districts where attendance is increased due to state water project construction. This precedent invalidates the Department of Finance contention that similar assistance to the Albany schools would be a piecemeal approach to the problem. The principle involved in the Albany schools and in state-impacted schools due to state construction of a dam is the same.

5. The University of California business officials agree that the Albany district has a university-caused problem, and the university has, in the past, budgeted funds for special subventions to that district, only to have the regents remove the funds from the budget on recommendation of the Department of Finance.

Conclusions

1. There is no lack of effort on the part of the Albany taxpayers in meeting the financial needs of their schools. The impaction of the elementary grades by pupils from the University of California student housing project is due to state-created circumstances beyond the con-

trol of the district and constitutes a special burden on the taxpayers of that district which can be alleviated only by legislative action.

2. The precedent for special state financial assistance to state-impacted school districts has been established by assistance grants to districts impacted by state water project construction activity. The Albany situation merits the same consideration; any other similar situation should be examined separately and the decision whether to grant special financial assistance made on the basis of applicable facts.

Recommendation

The Legislature should provide special subventions to the Albany Unified District in a sufficient amount to offset the cost to the district for educating the pupils residing in the nontaxable university student housing project. This may be done by either a special augmentation to the University of California budget or by a statutory authorization for the university to make such subventions from funds available to it for the purpose.

The above recommendation is applicable to AB 2323 by Assemblyman Rumford and Senator Stiern.

THE CREATION OF EDUCATIONAL TELEVISION REGIONS SUPPORTED IN PART WITH STATE FUNDS

Senator Farr's Subcommittee on Instructional Television conducted a hearing in Salinas on October 23, 1964, concerning the subject matter of Senate Bill 1169, Rodda (1963): *The Creation of Educational Television Regions Supported in Part With State Funds*; and to receive a status report on the development of a statewide instructional television network. The following findings, conclusions and recommendations are based primarily upon the information received and recorded at that hearing.

Findings

1. The fact that instructional television (ITV), properly used, can be an exceptionally effective teaching tool is no longer a matter of argument. The ability of television to give greater results in terms of measured learning than any other single factor, except a talented teacher, that can be added to the classroom has been proven by reliable research. Instructional television is one of the most effective means available for improving the learning situation and for expanding the curriculum of our public schools. For certain courses at the college level and in adult education classes, the television set can, to a very large extent, take the place of the teacher in the classroom.

2. Many school districts that now use television instruction to a good advantage and desire to expand their use of this medium are unable to do so because of the costs involved. Many other districts have been unable to take advantage of television instruction for the same reason.

3. The instructional television pilot project at San Bernardino College has developed reliable evidence indicating that ITV programming and the use of ITV by schools can be greatly expanded when supported at the level of \$1 per user-pupil per year.

4. The development of a statewide ITV network is progressing slowly, due primarily to the lack of funds. The ITV coordinator has been appointed and the Television Advisory Committee has begun formulating plans for the statewide network.

5. The state colleges and the University of California are not currently furnishing the level of leadership they have in the past for developing television as an instructional tool. Neither system has a statewide instructional television coordinator, although both have such a position authorized and are seeking qualified applicants.

6. The enactment of Senate Bill 1169 (referred for interim study) would create an extensive administrative superstructure at the county level that would be expensive to support and would tend to smother ITV with procedure. The act that created the ITV pilot project at San Bernardino College provides a simpler approach to the development of ITV on a regional and statewide basis. This act, already part of the Education Code, could be easily modified to become the instru-

ment for state support of, and general policy direction over, ITV for classroom use.

Conclusions

1. State support, on a matching basis, of classroom use of ITV will enable school districts now using ITV to expand their programming into new curriculum areas and to additional grade levels. State support will also make classroom ITV available to many districts which now cannot take advantage of available ITV programs.

2. Any state subvention of ITV will go farther and be more effective if it is limited to support of procuring classroom ITV programs as opposed to the purchase of equipment and the production of programs.

3. The lack of leadership in ITV on the part of the state colleges and the University of California is due to internal problems of those institutions with no need for legislative action indicated at this time.

Recommendations

1. The state should encourage the further development and use of classroom ITV with a program of state support at the school district level. State support of classroom ITV should be on a matching basis and should not be available for the purchase of equipment or program production by school districts. The initial level of state support should be \$0.50 per user-pupil per year when matched by \$0.50 of local district funds, for a total of \$1 per pupil per year.

2. The Superintendent of Public Instruction should be responsible for establishing rules and regulations for administering any program of state support for classroom ITV. Such rules and regulations should, among other things, encourage cooperation among the districts in using available ITV material and should aid in minimizing duplication of costs and effort on the part of school districts.

3. The Television Advisory Committee through the State Television Coordinator should be the approving agency for the creation of new publicly supported television production facilities. (This agency already has authority to recommend for or against federal licensing of publicly supported over-the-air television transmission facilities.)

The above recommendations have been implemented by the introduction of Senate Bill 635 by Senator Farr and other members of the Fact Finding Committee on Education.

PROCEDURE FOR HEARING WHEN PROBATIONARY TEACHERS ARE NOT REHIRED

Senator Sedgwick's personnel subcommittee conducted a hearing November 6, 1964, in San Diego concerning the subject matter of Senate Bill 1504, Farr (1963): *Procedure for Hearing When Probationary Teachers Are Not Rehired*. The following findings, conclusions and recommendations are based primarily upon the information gained at this hearing and upon reports concerning dismissal of teachers submitted biennially to the Legislature as required by Education Code Section 13443.5.

Findings

1. All of the witnesses appearing before the subcommittee expressed the view that the existing procedure for dismissing a probationary teacher was unsatisfactory and needed certain basic modifications to be workable.

2. The 1961 law requiring school district governing boards to grant probationary teachers the right to a hearing in a dismissal case has not operated to the benefit of teachers or school districts for the following reasons:

A. The law permits a governing board to reach a final decision to dismiss a probationary teacher prior to the granting and scheduling of the hearing. Since enactment of the 1961 law, not a single board has reversed its decision not to rehire a teacher.

B. The law does not require the hearing to be held and concluded before the end of the school year—thus leaving the teacher's employment status in limbo during a time when districts are interviewing prospective teachers for the following school year.

Conclusions

1. Granting a teacher a hearing after the board has reached its decision not to rehire has three effects which operate to prevent an objective judgment on the part of the board:

A. The board is tacitly expected to publicly admit an error in judgment and failure to investigate thoroughly prior to making an important decision.

B. The dismissed teacher is placed in a position of opposition to the body that is judging him.

C. Mitigating circumstances cannot be considered by a hearing officer when ruling on the case before him.

2. The absence of any requirement for boards to initiate and conclude a dismissal hearing prior to May 15 works a hardship on all concerned. Often the hearings pend all summer while the teacher and the board and the school administration are uncertain of the final outcome. The teacher, particularly, is disadvantaged when the hearing is delayed until midsummer or fall. His employment status is in limbo

and he cannot logically seek another teaching position while awaiting the decision on the position he is seeking to retain.

3. Requiring the board to conduct the hearing prior to any decision concerning retention of the teacher would assist in arriving at an objective decision in the following ways:

A. The board would be acting in the capacity of a fact finding body prior to committing itself to any action regarding the services of the teacher in question.

B. The teacher would be placed in opposition to the recommending administrator rather than the board.

C. In a proceeding prior to the fact, mitigating circumstances could be considered by the hearing officer when developing recommendations for board action.

Recommendations

1. The probationary teacher dismissal law should be modified to require a hearing at the teachers request prior to the board voting not to rehire the teacher. This should be initiated when the administrator advises the teacher of his intentions to recommend the teacher not be rehired.

2. Hearings in probationary teacher dismissal cases should be required to be held and completed prior to May 15 of the year the teacher is given notice of intent not to rehire. In all cases, however, the teacher should be given reasonable time to retain counsel, prepare his case and obtain witnesses.

The above recommendations have been implemented by the introduction of AB 230 by Assemblyman Garrigus, which was *approved by the Senate Education Committee and placed on the consent calendar.*

Mr. William Plosser, Secretary, Northern Section, California Federation of Teachers

Mr. Robert Formhals, Executive Secretary, California School Boards Association

THE FUNCTION OF THE COUNTY SUPERINTENDENT OF SCHOOLS OFFICE

Senator Rodda's Subcommittee on Public School Administration conducted a hearing on November 11, 1964, in San Diego concerning the subject matter of Senate Resolution 125, Rodda (1964): *The Function of the County Superintendent of Schools Office*. The following findings, conclusions and recommendations are based primarily upon information received and recorded at that hearing.

Findings

1. The functions of the county schools office has been considerably affected by the enactment of Assembly Bill 145 (1964). This act has accelerated the rate of school district unification thus diminishing the number of small school districts served by the county superintendent's office. As these small districts become fewer the need for the county direct services to such districts lessens. The county superintendent's office is faced with the alternative of finding other areas where it can effectively serve the educational process or become a useless anachronism left over from the days when California had thousands of small school districts.

2. Some county superintendents are expanding their other services to larger districts through contracts. These services include curriculum development, library services, instructional television programing and coordination and many others. Where these functions are performed by individual districts it is at considerable cost in money and personnel and often with less than satisfactory results.

3. Under developing patterns of administration at the county superintendents' level, any one county schools office may fulfill a given service for all the districts in several counties.

Conclusion

The county superintendent of schools is a constitutional office which could be effectively utilized as a middle level of school administration between the State Department of Education and the local school districts. By assigning greater responsibilities to the county schools office, duplication and overlap of effort by individual school districts could be minimized with commensurate savings in personnel and money.

Recommendation

The county level of school administration should be expanded to fill such functions as curriculum development; in-service training of certificated and classified personnel; library and audiovisual coordination, and educational research (development of techniques in making use of new knowledge and materials at the classroom level) for all except the very largest districts, and these larger districts should coordinate their efforts with the county schools office. This action will require a statutory redefinition of the role of the county schools office.

The above recommendation has been implemented by the introduction of SB 803, 804, and 805 by Senator Rodda and other members of the Fact Finding Committee on Education.

Mr. Robert L. Small, Principal Administrative Analyst, San Diego County

THE ADULT EDUCATION PROGRAM IN THE PUBLIC SCHOOLS

Senator Rodda's Subcommittee on Public School Administration conducted a hearing on November 12 and 13, 1964, in Los Angeles concerning the subject matter of Senate Resolution 118x, Rodda (1964): *The Adult Education Program in the Public Schools*. The findings, conclusions and recommendations are based primarily upon information received and recorded at that hearing, and upon information and impressions gained from field studies made in connection with the hearing.

Findings

1. The adult education programs are soundly based, classes are well taught with a minimum of administrative overhead "backup" personnel servicing the classroom teacher. There is, however, frequently an overlap or duplication of effort between the adult education programs offered by the high school and junior college districts in the same areas.

2. The adult education programs of the state are presently serving people in all walks of life, including housewives who are learning to sew in order to clothe their families without accepting charity. There are classes for immigrants who are learning English. Many elementary school and high school dropouts voluntarily turn to adult education classes to complete their education and improve their job opportunities. The end of every school year sees a growing list of adults who are receiving their elementary or high school diplomas. Adult education also serves the college graduate who is following new interests.

In addition to the practical-type classes, there are adult classes for people who wish to develop their creative talents in writing, in art, in music and in many other areas that make a person's life richer and more productive.

3. In the 1963-64 school year, nearly a million Californians were enrolled in adult education classes and the enrollments are increasing at an increasing rate.

The Stanford Research Institute, in report issued in 1963 titled "Impact of Adult Education," estimated that by 1975 sixty million adults will be taking courses (not including college graduate classes) and in California the adult education enrollment will equal or nearly equal the public school enrollment.

Conclusions

1. The adult education program, as presently constituted, is performing a vital role which will become increasingly important as our technology becomes increasingly complex and automation forces more and more adults to learn new marketable skills. Also, increased leisure, made possible by modern technology, is causing increasing numbers of people to turn to adult education for leisure time (not idle time) learning.

2. The Legislature should prepare for the expansion in adult education that is already underway and make certain society continues to get the most from the money and human resources that will inevitably flow into the program.

Recommendations

1. To facilitate further study and policy direction of the adult education program, legislation should be enacted which will bring together under a single chapter heading in the Education Code, the various adult education provisions that are now scattered throughout the code.

2. The adult education program should be identified separately from other programs of the public schools and all adult courses of study should be approved by the State Department of Education in order to qualify for state apportionments.

3. The authority of local governing boards to issue elementary and high school diplomas to persons who have completed the prescribed course of study for such diplomas should be clarified.

4. The state's level of support for adult education should be continually reviewed as should the overlap between adult education programs in the junior colleges and those in the elementary and secondary schools.

The above recommendations have been implemented by the introduction of Senate Bills 740, 741, 742 and 743 by Senator Rodda and other members of the Fact Finding Committee on Education.

Dr. Thomas A. Blakey, District Director, Orange Coast Junior College

THE TEACHING OF PHYSICAL EDUCATION IN THE PUBLIC SCHOOLS

Senator Rodda's Subcommittee on Public School Administration conducted a hearing December 22, 1964, in San Diego concerning the subject matter of Senate Resolution 250, Farr (1963): *The Teaching of Physical Education in the Public Schools*. The following findings, conclusions and recommendations are based primarily upon information received and recorded at that hearing.

Findings

1. California's program of daily physical education in the public schools has received national acclaim and is recognized as a model for other states. This program may be credited, in part, for the preeminence of California athletes on the United States Olympic team and on many college athletic teams throughout the United States.

2. The physical education program, as constituted in California public schools, is reportedly designed to make beneficial contributions to the social development and the mental attitudes of California children and youth as well as to their physical development. (This finding was not confirmed by field studies or by impartial expert testimony.)

3. Physicians, physical education specialists and school administrators are in almost unanimous agreement that a program of regular vigorous exercise is essential to the good health and normal physical development of growing children and youth. A program of daily physical exercise is of optimum benefit, provided such program is of sufficient duration and is properly structured and carried out.

4. Many school administrators hold the view that the length of class periods in most California secondary schools does not allow students sufficient time for actual physical activity. The time required for changing into gym clothes at the beginning of the physical education period and for showering and changing back into school clothes at the end of the period leaves insufficient time for extended physical activity. If two or more physical education periods could be combined, students would be able to have longer periods of actual physical activity with commensurate benefits in all aspects of the program.

5. Many school administrators, with the California School Boards' Association concurring, hold the view that the daily physical education requirement prevents or greatly interferes with the adoption of flexible class schedules, *i.e.* the scheduling of classes of any given subject two or three days a week rather than every day of the week. Flexible scheduling is becoming increasingly necessary as the curriculum expands and the demands for student time within a limited school day continue to increase.

6. Leaders in California physical education oppose any alteration of the daily physical education requirement. This opposition is based primarily on the concern that a deviation from the daily physical education program will lead to irregular physical education sessions, or

that physical education will be scheduled by some schools as an end-of-the-week, end-of-the-month or end-of-the-semester activity with greatly diminished benefit to the students.

7. The leaders in California physical education are concerned about the following problems:

a. Some schools are making nonauthorized substitutions for physical education at various times during the year.

b. The size of physical education classes are frequently larger than is consistent with the requirements of good instruction and safety.

c. The requirements for the standard elementary teaching credential should include preparation for the teaching of physical education.

Conclusions and Recommendations

1. The physical education program must remain an integral part of the school curriculum and a schedule of regular vigorous exercise suitable to the needs of every age group must be maintained in the public schools.

2. The pressures of an expanding curriculum and the practical limits on the duration of the school day make it necessary that schools be permitted to adopt a flexible class schedule whenever the governing board of the district determines that such scheduling is in the best interests of the students.

3. School districts should be permitted to depart from the daily physical education schedule provided that every eligible student be required to participate in the equivalent of five regular class periods (200 minutes minimum) of physical education in no less than 3 sessions each week.

4. Because the elementary classroom is typically a self-contained unit and the classroom teacher is usually expected to supervise the physical education activities of his or her students, the requirements for the standard credential with a specialization in elementary teaching should include some preparation for the teaching of physical education.

5. Physical education is sufficiently important to warrant student attendance at every scheduled session. School districts which make unauthorized substitution of courses for physical education should be denied average daily attendance credit for the time students attend the substituted classes.

Recommendations 2 and 3 above are contained, in part, in Senate Bill 832 by Senator Miller.

Recommendations 4 and 5 above will require State Board of Education action.

THE TEACHING OF PUBLIC HEALTH IN THE SCHOOLS AND COLLEGES

Senator Rodda's School Administration Subcommittee conducted a hearing in San Diego on December 23, 1964, concerning the substance of Senate Resolution 158, Miller (1963) : *The Teaching of Public Health in the Schools and Colleges*. The following working definition of health education and the findings, conclusions and recommendations are based primarily upon information received and recorded at this hearing.

A working definition of health education is as follows: The process which prepares an individual to make intelligent decisions to protect and improve individual, family and community health. Health education includes the promotion of physical, mental and social well-being. The behavioral changes resulting from good health education help the individual to develop and maintain a state of health needed for a happy and productive life. The healthy student is able to receive the optimum benefit from his educational opportunities.

The body of knowledge with which health education is concerned in the schools is organized into such instructional areas as: nutrition, dental health, mental health, alcohol, tobacco and dangerous drugs, activity and rest, family health, health services and products, chronic and communicable diseases, safety, and community health.

Findings

1. The medical community is in almost unanimous agreement that health education, taught by properly trained professional teachers, is one of the most effective tools of preventative medicine.

2. The major health problems of our state today are different from those which existed several decades ago. We have successfully controlled many of the striking problems of communicable diseases and environmental hazards which plagued earlier generations, but we still have many health problems, both existing and potential.

Today's school-age children and youth are directly affected by and involved in a number of major health problems and hazards including the use of alcohol, narcotics, smoking, emotional instability, sexual experimentation, venereal disease, illegitimacy, forced marriage, quackery and health fads, self-medication, dental caries, obesity, suicide and accidents—all statistically prevalent among today's youth.

The study and solution of these problems together, rather than in isolation, provides the basis for a comprehensive program of health education.

3. Prior to 1961 health education was required in all grades in the elementary school. In 1961, with enactment of the Casey Bill, requirements for health education were revised and now health education is required beginning at 6th grade rather than at grade 1.

4. At the high school level, health education is frequently incorporated into various other subjects such as home economics, physical education, social science, or in the so-called state requirement courses.

The result is inadequate health instruction by other than a properly trained teacher.

5. Under the Licensing of Certified Personnel Law of 1961 (Fisher Bill) and the State Board of Education implementation of that act, elementary teachers can now obtain a standard credential without having had any preparation for the teaching of health science, although they are still required to teach this subject.

Conclusions

1. Sound health education provides, among other things, the foundation on which each individual builds a pattern of behavior consistent with high standards of individual and community health. This area of education belongs in the school curriculum because health knowledge is necessary, is more efficiently learned in school, and no other public agency provides such instruction. It is not practical to leave this important aspect of education to the home, as parents are not usually adequately prepared for the task and have themselves tacitly delegated this responsibility to the schools.

2. The future health of the nation depends to a great extent, on what is done to promote, improve, and preserve the health of today's children and youth. The increasing incidence of major health problems and hazards directly affecting today's school-age children and youth adds urgency to the need for adequate health instruction in the public schools.

3. Teachers who are not prepared in college to teach health science cannot be expected to do an adequate job of health education in the classroom.

Recommendations

1. Health education should be included in the required course of study beginning at grade one and continuing through the elementary grades.

2. One semester of individual and community health should be required at the junior high and high school levels.

3. Health education at the high school level should be taught only by instructors with a major or minor in health science or health education.

4. All teachers qualifying for a standard teaching credential in elementary teaching should be required to have preparation to teach health including safety.

Recommendations 1 and 2 above are contained in Senate Bill 832 by Senator Miller.

Recommendations 3 and 4 are contained in Senate Bill 908 by Senator Rodda.

NONPUBLIC SCHOOLS BELOW THE COLLEGE LEVEL

Senator Sedgwick's Subcommittee on School Personnel conducted a hearing in Los Angeles on December 29, 1964, in an effort to determine whether *nonpublic schools, below the college level*, are maintaining minimum acceptable standards and whether their personnel policies and practices are a factor in the maintenance of such standards. The following findings, conclusions and recommendations are based primarily upon information received and recorded at that hearing.

Findings

1. State law requires that pupils in nonpublic schools be taught by persons capable of teaching; that the schools teach the same subjects that are taught in the public schools; that they be taught in the English language, and that attendance records of pupils be kept.

2. There are no statutory requirements to be met by any person, qualified or not, for starting a nonpublic school, yet students in such schools are exempt from public school attendance.

3. Nonpublic schools are not required to register with any state agency for the enforcement of such requirements as the law presently imposes upon them, and no state or local agency has a complete list of the nonpublic elementary and secondary schools in California. The University of California accredited private and parochial schools of California are easily located and have information regarding their standards available to the Legislature. The spurious schools (often referred to as "kitchen cupboard" schools) cannot be easily located.

4. Title II of the recently enacted Federal Aid to Education bill (Elementary and Secondary Education Act of 1965) provides a program of grants to furnish library books, textbooks and other published and printed materials for use in nonpublic elementary and secondary schools. The nonpublic schools must obtain these materials through the state public school system. The title to all such materials must remain with the public agency.

Conclusions

1. Until a comprehensive list of nonpublic schools is developed, the Legislature will be handicapped in its efforts to study the standards or accrediting procedures of these schools.

2. Unless the Department of Education, which is the state agency concerned with administering Title II of the Federal Aid to Education Act, has a listing of the nonpublic schools and some knowledge of the needs of those schools, it will be unable to plan for the acquisition of needed instructional and library materials.

Recommendations

1. All nonpublic elementary and secondary schools should be required to file with the State Department of Education, on an annual basis,

such information as the name of the school, its location, the names of its principal officers, the grades taught, the number of students enrolled and the location of its attendance records. The administrator of any given system of schools should be permitted to file a single report on behalf of all the schools under his control.

2. The Legislature should continue its study of the nonpublic schools and explore, in cooperation with the private and parochial schools of known excellence, the means of assuring that all nonpublic schools below the college level maintain acceptable standards.

The above recommendations have been implemented by the introduction of Senate Bill 776 by Senator Sedgwick and other members of the Fact Finding Committee on Education.

PART II

Analysis of Senate Bill 728 (1965), Collier *

* The following analysis is included as an information item only and does not necessarily represent the findings of the committee.

ANALYSIS OF SENATE BILL 728 (Collier)

As Amended April 29, 1965

PREPARED BY: Senate Fact Finding Committee on Education
SUBJECT: Bonus teacher retirement for school service outside California
SOURCE: Association for Retirement Credit for Out-of-State Service (ARCOSS)
OPPOSITION: California Taxpayers Association, California School Boards Association
COST: \$273,267,000 if fully funded and invested at 4 percent interest in 1965 or \$800,000,000¹ if the state's share is not funded but appropriated as the retirement allowances become due and payable.²

ANALYSIS

Senate Bill 728, known as the "ARCOSS BILL," is sponsored by the Association for Retirement Credit for Out-of-State Service. Under its provisions, bonus California teacher retirement credit may be received for services³ in the public schools or colleges of other states; United States possessions and territories, Canada, or in schools supported and administered by the United States government outside California.

Qualifying for Bonus California Retirement Credits

Under the provisions of Senate Bill 728, teachers coming to California from other areas may qualify for California bonus retirement credits as follows:

1. Unlimited bonus California teacher retirement credit will be granted for out-of-California service when matched by one year of service in California public schools for each year of bonus credit received.

2. The out-of-California teacher must first serve five years⁴ in California public schools before receiving any bonus retirement credit for out-of-California service.

3. After five years' service, bonus California retirement credit will be credited on a one-year-for-one-year matching basis. (One year of bonus retirement credit for one additional year of out-of-California service when matched by one additional year of service in California.)

¹ These figures are conservative minimums based only on the known eligible members of the State Teachers' Retirement System as of June 16, 1965. The true cost will inevitably increase as more eligible teachers become known; and as the final compensation of the members increases and their retirement allowances, based on these increases, raise the cost of SB 728.

² The California State Teachers' Retirement System is a partially funded system. The state's share is appropriated as retirement allowances become due not as it accrues. The state's accumulated actuarial debt to that system at last audit was in excess of \$2.8 billion.

³ The term "services" is used here because teaching service would not be required for either the out-of-California service or the in-California service. School administrators in positions requiring certification, if they were members of their home state's teacher retirement system could count their service. Teacher members of the California Teachers' Retirement System, who become administrators, remain in the system and will receive credit.

⁴ None of the five years of service need be as a classroom teacher.

Table I illustrates how bonus California retirement credit would be granted for out-of-California service. Each teacher in the table is assumed to have taught the same length of time in California, and to retire at the age of 65 with retirement allowances based on the same final compensation.⁵

Teacher A will receive 25 years' retirement credit for 25 years' service and draw a monthly retirement allowance of \$274.29; Teacher B will receive 28 years' retirement credit for 25 years' service and will draw \$307.20 monthly retirement allowance; Teacher C, 30 years' retirement credit and \$329.30 monthly allowance; Teacher D, 35 years' credit and \$384.00 monthly; Teacher E, 40 years' credit and \$438.87 monthly; and Teacher F, 45 years' credit and \$493.73 monthly retirement allowance. Although Teacher A and Teacher F taught in the California public schools the same number of years, and received the same salary for their services, *Teacher F will drawn \$219.44 per month more than Teacher A.*

Procedure for Claiming Bonus California Teacher Retirement Credit for Out-of-California Service

Senate Bill 728 outlines the following procedure for claiming bonus retirement credit:

1. Notice of election to claim bonus California retirement credit for out-of-California school service must be filed with the Sacramento Office of the State Teachers' Retirement System on forms approved by the Teachers' Retirement Board.
2. Members of the system on October 1, 1965, will have until April 1, 1966, to file their notice of election.
3. Members entering the system after October 1, 1965, must file their notice of election within two years after becoming members.

The Cost to the Member and Payment of the Member's Share

Members of the California State Teachers' Retirement System claiming bonus retirement credit must pay into the system their "fair share" as follows:

1. The member must pay into the California system \$60 for each year of out-of-California service claimed (this goes into the permanent fund and is an equivalent to what California teachers pay for the same purpose); plus the amount he or she would have paid into the system if the service claimed had been rendered in California. This amount to be computed actuarially according to sex and age and based on the individual member's first year California salary, using the rate in effect July 1, 1951.⁶ (The lower the first year California salary the lower the member's "fair share.")
2. An active member's⁷ share may be made in one payment within 90 days after the last day the notice of election may be filed; or in

⁵ Final compensation is the base salary upon which retirement allowances are calculated. It is defined as the average of the salaries for the three highest consecutive years.

⁶ The State Teachers' Retirement System rates were not actuarially sound in 1951—they were increased in 1958.

⁷ Active members as used here means members who are teaching in the public schools and making regular contributions.

TABLE I
COMPARISON OF THE EFFECT OF SB 728 ON CALIFORNIA RETIREMENT CREDIT
AND RETIREMENT ALLOWANCE OF SEVEN TEACHERS

Teacher	Total out-of-California service (O.C.S.) in years	California retirement credit for O.C.S. after 5 years teaching in California	Total California retirement credit after 5 years teaching in California	Total California retirement credit for combination of out-of-California service and California service after teaching in California for number of years is shown at top of each column			Retirement value based on \$7,900 "final compensation" *	
				10 yrs.	15 yrs.	20 yrs.	Yearly	Monthly
A-----	0	0	5	10	15	20	\$3,591.50	\$274.29

The number of years teaching service in California schools is the same for each teacher on the above table.

* Retirement earnings assuming each teacher retires at age 65 after 25 years' service in California and that the average of highest three consecutive years' earnings ("final compensation") for each teacher was \$7,900. (The \$7,900 is the 1964-65 average salary for teachers in California.)

PREPARED FOR SENATE FACT FINDING COMMITTEE ON EDUCATION.

ALN

not more than 120 equal monthly payments; in such minimum amounts as the Retirement Board may provide. "Regular"⁸ interest must be paid on any unpaid amount after the 90-day single payment period.

A retired member's share may be made in a single payment on or before April 1, 1965; or it may be credited to the retired member's account from deductions out of his monthly bonus retirement allowance. For example, Member O in Table II is already retired. The "fair share" he must pay into the system to receive a bonus retirement credit for 13.1 years of out-of-California service is \$17,187. Payment of this amount would increase his monthly retirement income (now \$624.08) by an additional \$624.08. Instead of taking from savings or borrowing to pay the \$17,187 in cash, he may elect to let his bonus allowance pay off his "fair share" and interest thereon. This means he would receive only part of his bonus allowance during the first 36 months after October 1, 1965; ($\$17,187 \div 36 \text{ months} = \$477.41 \text{ per month} = \$624.08 - \$477.41 = \$146.67 \text{ per month balance for income and interest payments.}$)

By electing the "time payment" plan, Member O will receive approximately \$146.67 per month bonus allowance plus his regular allowance of \$624.08. After the 36 payments are completed, his monthly retirement income will be \$1,248.16 for having served 13.1 years in the California public schools as a teacher and an administrator. This \$1,248.16 monthly allowance will be paid regularly for as long as he lives, no matter where he lives, and will continue after his death for the life of any dependent heir he may leave behind. And, of course, he is also receiving a retirement allowance from Minnesota for the 30 plus years he was employed in the schools of that state.

Cost to the State for Granting Bonus California Teacher Retirement Credit for Out-of-California School Service

During the summer of 1964, the consulting actuarial firm of Milliman & Robertson, under contract to the Joint Legislative Retirement Committee, conducted a survey and study to determine the probable costs of granting bonus retirement credit to members of the California State Teachers' Retirement System who had out-of-California school service. Senate Bill 728 is based upon the results of that study and the assumptions that went into it.

Enactment of Senate Bill 728 would mean an instant *debt* for California taxpayers of not less than \$273,267,000 *if* the obligation is funded immediately and this sum is successfully invested at not less than 4 percent interest over the actuarial period for the known qualified members in the Teacher Retirement System as of June 16, 1964.

If the liability is not funded, the enactment of SB 728 would mean the instant assumption of a long-term debt of not less than \$800,000,000 for just the qualified members as of June 16, 1964. This would be in addition to the existing continually increasing actuarial debt of \$2.8 billion already built into the teacher retirement system!

The actuarial survey upon which SB 728 is based contains a major flaw! The cost figures shown for the state assume that the 1965 Legislature will appropriate \$273,267,000 and invest that sum at 4 percent

⁸ "Regular" interest is not defined in SB 728.

* Retired 6-20-64 at age 55. Values stated at 4-1-66.

^a These calculations presume that the persons will continue service to the end of that school year in which age 65 is attained and that the benefits will be based on the salary for 1963-64. This is a fallacy, as the salaries will be greater, particularly for those who are less than age 62.

^b The calculations in column 8 is based on the 1963-64 salaries and is probably far less than will eventually be payable to those who have not attained age 62.

^c The state costs (not including the annuity provided by member contributions under SB 728, in columns 9 and 10 are based on 1963-64 salaries and are less than will eventually be payable. These figures do illustrate the need to consider the "pay-out" and not the reserve value.

Column (10)—anticipated "pay-out" to be funded by state appropriations.

PREPARED FOR SENATE FACT FINDING COMMITTEE ON EDUCATION.

ALY

interest. The state's current method of financing its share of teacher retirement costs, however, is on the basis of funding the liability as it matures—not as it accrues. Thus the actuarial survey is grossly misleading when it states a "present value" of \$273,267,000. If this bonus retirement allowance program is to be funded in the same manner as the teachers' retirement allowances are currently being funded, no amount of state money will be invested, and 0 percent interest will be earned. If 0 percent interest is earned (which will be the actual case) the "total" cost over the next 40 years will be in excess of \$800,000,000!

The proponents of the SB 728 bonus retirement proposal point out that the first full year costs will be only \$3,800,000. This too is misleading. The actuarial survey determined that the average age of the members entitled to out-of-California bonus retirement credit is 43.31 years. The full cost of the bonus retirement allowances in 15 or 20 years, when these teachers retire, will be \$30,000,000 in new money each year! According to the survey the cost to the state for the first 10 years, before even a fourth of the eligible teachers have retired, will be an average of \$8,400,000 per year. (See Table III.)

Should SB 728 be enacted, there is no way of knowing what amount of future liability the California taxpayer will have to assume. In just the short period of 4½ years between the 1961 and 1964 surveys, the number of Teachers' Retirement System members eligible for out-of-California bonus credit increased 25.5 percent, from 45,789 members to 57,484 members. With just normal growth then, the state's liability could increase approximately 25 percent every four years. With such a generous bonus retirement allowance as a glittering attraction for the older, closer-to-retirement teacher, California probably will be flooded with "mature" teachers with a *superabundance* of experience.

It would be naïve to think of the cost of SB 728 as a mere \$800,000,000 when California is having such a difficult time recruiting state college and University of California teachers as well as a host of occupational specialists needed in our civil service. *If SB 728 is enacted, it is only logical to conclude that the next pressure will be for the same type of benefit for state college members of the State Employees' Retirement System and the academic members of the University of California Retirement System.*

Where will it end? Once SB 728 establishes the precedent, why not retirement bonuses for all California public employees. Then perhaps even Sheriff Jim Clark of Dallas County, Alabama, may become a California peace officer and qualify for a retirement bonus by reason of the "service" he performed in Selma, Alabama, during the 1965 voter registration drives and freedom marches.

RATIONALE

Some Basic Questions Concerning SB 728

In light of the costs connected with SB 728, three basic questions arise: Why do we need to give bonus retirement credit for school service rendered in other states? What problems will such a costly program solve for us? What alternatives do we have to the bonus retirement scheme? Each of these questions is discussed in depth on the following pages.

TABLE III

Why Do We Need a Program of Bonus Retirement Credit for Out-of-California School Service?

The facts indicate we do not. California teachers are the highest paid in the nation (see Table IV) and California teacher retirement allowances are the most generous in the United States! California taxpayers owe no teacher a bonus retirement allowance because of inequities in our teacher retirement allowances based on current salaries. *Appendix A indicates that California teacher retirement allowances, based on year-for-year credit are higher than any other state's.* California teacher retirement allowances for 20 years of service in California are almost equal to the allowances paid for the other most generous states for 30 years of service at the same final compensation.

If California already pays the highest allowances in the nation why should we give a recruitment bonus in the form of extra retirement credit to teachers who are already recruited?

TABLE IV

"In 1964-65, the average salary of classroom teachers is an estimated \$6,235 (Table 29). Disregarding Alaska, where high living costs reduce the apparent high salary rank to 16th place, 12 states, California, New York, Connecticut, Massachusetts, Illinois, Maryland, Delaware, Michigan, New Jersey, Arizona, Indiana, and Nevada, are paying classroom teachers an average salary of over \$6,500; in California the average is \$7,900. Table 30 shows that nationwide 33.8 percent of the classroom teachers are being paid \$6,500 or more in 1964-65. Four states, South Dakota, South Carolina, Arkansas, and Mississippi, are paying teachers average salaries under \$4,500. Table 27 gives average salaries of elementary-school teachers; and Table 28, those of secondary-school teachers. In these two tables the states are roughly in the order listed in Table 29.

For the country as a whole the average salary being paid the total instructional staff in 1964-65 is estimated at \$6,449. The instructional staff includes classroom teachers, who make up about 92 percent of the total, and principals, supervisors, and others as the remaining 8 percent. Disregarding Alaska, five states, California, New York, Connecticut, Massachusetts, and Maryland, are paying averages over \$7,000. In three states, South Carolina, Arkansas, and Mississippi, instructional staff personnel are being paid less than \$4,700. (See Table 31.) Table 32 shows the relationship of the average salaries in the states to the national average.

In the 10-year period, 1954-55 to 1964-65, average salaries of the instructional staff increased 90.3 percent in Kentucky, but only 33.8 percent in Louisiana (Table 33.)"

SOURCE: Pages 20-23, Research Report 1965-R1; Rankings of the States, 1965; Research Division—National Education Association, Washington, D.C. 65 pp.

Need it or not, the pressure built up in Sacramento for this bonus retirement scheme exceeds anything seen here in recent years. Governor Brown gave his unqualified endorsement to the idea even before SB 728 was introduced. In a letter dated October 23, 1962, to Miss Myrtle Flowers, President of ARCOSS, Governor Brown stated:

"I want you and the members of your organization to know that I agree steps must be taken to remove this inequity. California depends on attracting teachers from out of state to meet its ever-increasing classroom needs, and it is only fair that these teachers be allowed to acquire an adequate retirement fund. . . . I pledge to you and your organization that, if returned to office, I will support legislation to correct this inequitable situation."

A copy of the Governor's letter to Miss Flowers is included as Appendix C.

Nearly every major professional organization connected with school personnel has endorsed SB 728; these organizations include the California Teachers Association, the California Federation of Teachers; the California Association of School Administrators; the California Elementary School Administrators Association; and the California Secondary School Administrators Association, to list a few.

Whether these are willing endorsements is another question—*these organizations would be foolish to oppose SB 728.*⁹ The 57,000-plus dues paying members of ARCOSS make up large membership blocks in the endorsing organizations. This puts them in a position of control that cannot be easily overcome.

There are 23 Senators and 32 Assemblymen listed as coauthors on SB 728, and it has already been given a "do pass" recommendation by the Senate Governmental Efficiency Committee—often called the graveyard of legislation.

The people behind ARCOSS have done an outstanding selling job and have developed an appealing rationale for their cause. The best way to understand this rationale and to evaluate its validity is to study the statements of the spokesman for the ARCOSS organization and analyze them in the light of known facts.

Mr. Shirl Olympius, public relations counsel for ARCOSS, testified before the Joint Legislative Committee on Retirement upon several occasions in 1964. His testimony was directed toward explaining the need for California to give bonus retirement credit for out-of-Califor-

⁹ Although the ARCOSS organization is headquartered at the CTA building in Burlingame, and the CTA has approved the ARCOSS bills, CTA has never sponsored one.

nia school service. He, of course, outlined many benefits that would accrue to California as a result of initiating such a program.

SB 728—The Bonus Retirement Plan, and Recruitment of Out-of-California Teachers

SALES POINT NO. 1

The basic argument Mr. Olympius repeated over and over, is that the bonus retirement bill will help recruit out-of-California teachers.

... "The shortage of teachers that has existed, that now exists, and will continue to exist . . . in California can only be met through recruitment of out-of-state teachers to give us the trained, experienced teachers we need."¹⁰

His implication is that a bonus retirement program is the only answer. But is it?

There is no indication that the supply of teachers from other states is diminishing. Table V indicates the flow of teachers into California is increasing in actual numbers and as a percentage of the total new teachers.

We have no data based on an authoritative study documenting the fact that teachers, with the qualifications California Schools need most, are declining to come here because we lack a bonus retirement plan. The questionnaire used by the consulting actuaries in making the study, paid for by the Joint Legislative Retirement Committee, did contain a four-part question designed to find out what brought the teachers contacted in the survey to California. The tabulated answers to this question were not reported to the committee. (These data have been tabulated, however, and will be discussed in another section of this analysis.)

TABLE V
ESTIMATED RELATIONSHIP OF OUT-OF-CALIFORNIA TEACHERS TO TOTAL NUMBER OF TEACHERS FIRST EMPLOYED IN CALIFORNIA IN VARIOUS YEARS

School Year	Total Teachers* New to California Teaching	Out-of-California Teachers	% (2-1)
57-58	14,990	4,970	33%
58-59	14,830	4,420	30%
59-60	15,080	4,280	28%
60-61	15,300	5,010	33%
61-62	17,900	6,400	36%
62-63	18,250	5,430	30%
63-64	18,700	7,460	38%

* Does not include teachers who move from one California district to another California district.

Perhaps California Is Already Too Dependent Upon Teachers Imported From Other States

Table V raises the question whether California should continue to increase its dependency upon teachers trained in other states. One means of maintaining the quality and character of our public schools is through the teacher training programs in California collegiate institu-

¹⁰ P. 8 and 9. Olympius, Shirl; *Testimony and Summation Before the Joint Legislative Committee on Retirement*; San Diego. October 22, 1964; 22 pp.

tions. *When we increase our dependence upon teachers trained by programs and in institutions and systems over which we have no control or guidance, we surrender a proportionate amount of our control over the quality and character of our schools.*

There is no doubt that any program of bonus California teacher retirement credit for out-of-California school service would be an effective recruiting device, particularly for recruiting older, closer-to-retirement teachers. California school administrators could figuratively "stand on the border and whistle"—and be trampled by the rush of older teachers.

The older, closer-to-retirement teachers with many years invested in their own systems may hesitate to move to California without a bonus retirement to beckon them. The question is, however, *do we want to recruit these older teachers?*

It is interesting to speculate whether an experienced teacher in the 27-to-32 age bracket would be more easily induced to move to California by a reasonable "resettlement" allowance, payable in cash when he reports to work, or by the promise of five extra years' retirement credit, payable 30 to 35 years in the future.

We have not asked and therefore cannot answer the question concerning the qualifications and experience we should look for when recruiting from out of California.

A Look at ARCOSS Leadership and the Appeal of Bonus Retirement Credit

The typical out-of-California teacher is, according to the findings of the actuarial study, 43 years old with about 5.5 years of out-of-California school service. The bonus retirement idea, however, seems to have its greatest appeal to an even older, closer to retirement age group with considerably more than 5.5 years of out-of-California service. This is clearly indicated by the data in Table VI which gives the basic retirement data on the ARCOSS regional and statewide officers—individuals interested enough in a retirement bonus scheme to assume leadership responsibilities.

There are 46 individuals on the list and 27 of them are 56 years old or older; 37 of them are over 50 years old and none of them are under 40 years of age.

ARCOSS officers also run higher than average in years of service in other states; 34 of the 46 will be able to claim 12 years or more of out-of-California service. Their salaries run above the average too. Thirty-two of the 46 earned \$9,000 or more per year for the 1963-64 school year with 20 of the 46 earning \$10,000 or more annually.

Retirement allowances based solely on California service will be substantial among the ARCOSS officers. Twenty-eight of the 46 will receive retirement allowances of \$350 or more; and only one will receive less than \$200 monthly.

This individual (No. 15—Table VI) will receive \$183.96 per month retirement allowance from California where he will teach only nine years before he reaches retirement age. He completed a full 30-year career in Kansas before immigrating to California! Under Kansas law he will receive (or is receiving) a minimum of \$90 monthly for a minimum of \$273.96 per month for service in Kansas and California.

^a These calculations presume that the persons will continue service to the end of that school year in which age 65 is attained and that the benefits will be based on the salary for 1963-64. This is a fallacy, as the salaries will be greater, particularly for those who are less than age 62.

^b The calculations in columns (8) and (9) are based on the 1963-64 salaries and are probably far less than will eventually be payable to those who have not attained age 62.

^c The State costs (not including the annuity provided by member contributions under SB 728) in columns (9) and (10) are based on 1963-64 salaries and are less than will eventually be payable. These figures do illustrate the need to consider the "pay-out" and not the reserve value. Column (10)—anticipated "pay-out" to be funded by state appropriations.

PREPARED FOR SENATE FACT FINDING COMMITTEE ON EDUCATION.

SALES POINT NO. 2

**SB 728 and the Annual Teacher-Recruitment Trips
Administrators Make to Other States**

The promoters of the bonus teacher retirement plan want to end the recruitment trips administrators make to other states. SB 728 . . .

"will greatly reduce, and for all practical purposes, eliminate the need and the cost of out-of-state teacher recruitment programs . . . Teacher recruitment costs the California taxpayer a minimum of \$3 million a year . . . Remember that 4,500 out-of-state teachers a year have been flowing into this system. How do they get here? 35,814 of them have come through forms of recruitment. School districts have sent administrators into the highways and byways of the United States begging . . . teachers to come to California. Travel, the hotel bills, the food bills and the salaries alone, . . . are an amazing cost. The enactment of this legislation would assist in eliminating this cost."¹¹

The most obvious thing about the above statement is that the cost of recruitment trips, even if they are twice the \$3½ million quoted above, pales beside the cost of SB 728.

The fact is, however, *only 9 percent of the teachers surveyed by the actuaries were recruited to come to California* (See Table VII). The overwhelming majority came to California on their own; either after first obtaining a teaching job or to look for a teaching position; or for other reasons. *The important point is—they came on their own.*

These teachers and administrators could not have come to California expecting bonus retirement credit for out-of-California service—no such program is, or was, in effect. They must have come for other reasons, such as the highest teachers' salaries in the nation (See Table IV); the most generous retirement system in the nation (See Appen-

TABLE VII

TABULATION OF REASONS WHY TEACHERS CAME TO CALIFORNIA
SHOWN BY NUMBER OF YEARS OF OUT-OF-CALIFORNIA SERVICE
(From Questionnaires Furnished Legislative Interim Committee)

Reason for coming to California	Number of years of out-of-state teaching service					Total	
	1-3	4-6	7-9	10 and over	Others *		
Recruited by a school official	1,954	1,029	695	1,462	506	5,646	9%
Used his own initiative to seek a California position	7,042	4,332	2,537	4,643	1,751	20,305	34
Came to California for purpose of seeking California teaching position	2,186	1,348	809	1,341	392	6,076	10
Moved to California for other purpose but took teaching position after arrival	3,931	7,993	4,505	2,580	2,664	21,673	36
Other reasons	1,780	529	263	560	3,561	6,693	11
Total	16,893	15,231	8,809	10,586	8,874	60,393	100%

dix A); the mandatory teacher tenure law; the fabled California climate, and a host of other attractions California has for the residents of less fortunate states.

The recruitment trip has some possible advantages over taking "pot-luck" by hiring teachers who come here on their own. First, the recruitment trip should enable the junketing administrator to be more selective in terms of personal and professional qualifications possessed by the teachers he seeks out for recruitment. Secondly, the administrator should be able to make a better appraisal of the success the prospective teacher is enjoying in his district of origin.

SALES POINT NO. 3

SB 728 and the California "Double Standard" Regarding Teacher Retirement

SB 728 will, according to Mr. Olympius:

. . . "eliminate the double standard that now exists in the California State Teachers' Retirement Act . . . and . . . eradicate the inequities that now exist in the present system. The California Legislature historically has allowed teachers from other states to credit their out-of-state teaching experience toward their retirement. This practice stopped as of July 1, 1944 . . . and I believe you will agree with me that this legislation will eradicate the inequities that now exist in the present State Teachers' Retirement Act."¹²

This "eliminate the double standard" rationale is a major point with the ARCOSS people. The implication is that teachers who came to California after July 1, 1944, are not treated as fairly as teachers who came before that date. The opposite is true.

Prior to 1944, teacher retirement benefits were very meager; a teacher received a maximum of \$50 monthly after 30 years or more of service. Out-of-California teaching was credited toward the required 30 years service but it meant little insofar as benefits were concerned.

In 1944, the California Teacher Retirement Act was rewritten and teacher retirement benefits became, and still are, the most generous in the nation.

Actually, enactment of SB 728 would create gross inequities and a very real "double standard" to the detriment of teachers who have given a professional lifetime to California schools. Look again at Table I. The difference in retirement allowances between Teacher A who taught 25 years in our schools and Teacher F who also taught 25 years is an undeniable inequity that would be created by SB 728.

But that isn't all. Judging from the data in Table VI, all of the ARCOSS officers will fare better in retirement than many teachers who devoted a lifetime to service in the California public schools but who retired prior to 1944. The basic allowance for these retired California teachers is \$80 per year, per year of service; or about \$276 monthly, after teaching in California for 40 years. (40 years \times \$80 = \$3,200 yearly, or \$276 monthly.) Compare this with the \$183.96 Teacher "O" in Table II will receive as a retirement allowance for

¹² Op. cit. Olympius p. 9.

only nine years' service in California! His allowance is still well above the \$159 monthly national average retirement for public employees.¹³

SALES POINT NO. 4

SB 728 and the "Salary Bonus" Allegedly Paid Teacher Recruits

Mr. Olympius told the Joint Legislative Committee on Retirement:

"... Because the salary spread between what California pays its teachers and what is paid in other states is no longer as great as it was a number of years ago, we no longer have the lure of money—higher wages . . . Therefore, our school officials are having to use "bait." The "bait" is starting salaries beyond that which the teacher is entitled to receive for the number of years he has taught . . . Whether we like the fact or not, this is a common practice. It is being done every day by the majority of the recruitment administrators from California School ¹⁴ districts" . . .

The above statement can only be hearsay. Neither the California Teachers Association nor the State Department of Education could offer any evidence that such bonuses are being given. A glance at Table IV will indicate there is little or no reason for such a practice.

A teacher's salary is usually established by his years of training and years of experience, as determined on a standard salary schedule used for all teachers of a given district.

As a matter of general practice, the school districts in California grant full salary scale credit for most academic credits and limit the amount of experience credited for salary scale purposes. Usually, districts will give year-for-year up to five years' credit for teaching in California and one year for two years, up to five years' credit for out-of-California teaching experience.

Actually, SB 728, which bases the member's "fair share" contribution on the first year's salary in California would strongly encourage an immigrant teacher to accept a low first-year salary.

SALES POINT NO. 5

It Is Only Proper That California Should Bear Some of the Expense for Educating and Training Teachers Who Come Here From Other States

This is another point made by the ARCOSS people.

"Since 1944, 57,484 teachers . . . have pulled up roots in their home areas and answered the siren call of California educators to move to California. California received a bargain—these teachers were educated and trained at no cost to the California taxpayer. . . . We owe these teachers an outstanding debt of gratitude."¹⁵

No mention is made of the fact that if California paid these teachers for their education and training they would be paid double. After all, it is they who received the benefits of a college education and preparation for a career in an honorable and well-paid profession.

Should the legislatures of the other states and territories resolve that California should reimburse them for the teachers we have proselyted,

¹³ Page 3, Census of Governments: 1962 *Retirement Systems of State and Local Governments*; U.S. Department of Commerce; Vol. VI (Topical Studies), No. 1.

¹⁴ Loc. cit. Olympius, p. 11.

¹⁵ Loc. cit. Olympius p. 5.

this would be understandable. *But the teachers themselves have no cause to complain.*

What Can California Expect to Get From a Bonus Retirement Grant to Out-of-California Teachers?

1. With the appeal that bonus retirement credit has for the older, closer-to-retirement teacher, we could find that California taxpayers are supporting *mass numbers of 40-year retirement allowances, based on high California salaries, for teachers who have given only 20 years' service in California schools.*

2. Bringing in older, closer-to-retirement teachers will only *accelerate teacher turnover due to retirement and aggravate the teacher shortage.*

3. *We could make vagabonds of our California teachers.* The young and unfettered teacher with tenure could, as many do now, take periodic leaves without pay and teach in other states or in government-maintained schools for American dependents in almost any country you wish to name. As of now, this wandering urge is held in check by a prudent look to the retirement years; the vagabond teacher collects no generous California retirement credit on his or her wanderings. This deterrent will no longer exist if SB 728 becomes law.

4. *We may find that we are paying generous California retirement allowances for teaching experience that would not be permitted in this state today.* As Appendix B will show, California was among the first states to require a baccalaureate degree for teaching at either the secondary or elementary levels. When we recruit an out-of-California teacher, with 20 years' prior experience in another state, for the 1965-66 school year we could end up paying a bonus retirement allowance for the teaching experience of an 18-year-old with one year of college, floundering through the school year in a one-room school in rural Arkansas or Texas or Mississippi or Michigan or any one of a dozen other states.

As late as 1964, five states and Puerto Rico (Puerto Rico experience would qualify under SB 728) required only two years beyond high school graduation for a regular elementary teaching certificate.

California takes such great care to prepare its teachers properly, it is incongruous to pay a premium for mediocre teaching experience.

What Are the Alternatives to the Bonus Teacher Retirement Plan?

1. *A logical answer to the current teacher shortage is to do more to encourage college students to choose teaching as a career.* Data gathered by the Department of Education show that the proportion of teacher credential candidates in our colleges and universities is declining, with a critical shortage of elementary teacher credential candidates occurring in the 1967-68 school year. For the 1963-64 school year, all colleges and universities in California, accredited for teacher training, "graduated" only 12,153 teacher credential candidates. Only about 80 percent of these newly credentialed teachers actually accepted teaching jobs for the 1964-65 school year.

We should be concerned that 20 percent of those who prepare for a teaching career, through four or more years of college work, elect not to become teachers once they receive their teaching credential.

2. Another possible solution is to *make teaching more attractive to the thousands of Californians who hold valid teaching credentials but*

who are not now teaching. Flexible scheduling may make it possible to attract and use the inactive teacher who might be willing to teach two or three days but would not be willing to teach a full five-day week.

3. A reasonable "resettlement allowance" will probably be an excellent device to attract experienced teachers in the 27-to-32 age bracket. But before giving any such allowance we should first decide what kind of teachers we need, with how much, and what type of experience; then structure the recruitment device to attract precisely those kinds of teachers.

The State Board of Education could be empowered to annually survey the schools to determine the teaching specialties that will be needed for the following school year. Once the requirement list is established, and the California supply of such teachers is known; the board could establish a priority scale that would determine the amount of resettlement allowance, over and above normal moving costs, a district superintendent could offer. *The state should bear the cost of such allowances and the districts should apply for them to the state through the county superintendents of schools; just as they do now for provisional teaching credentials.*

The resettlement allowance should be made available to any person residing in California who holds a valid credential found on the State Board of Education's priority list, but who has not taught in the public schools for the previous two years, or who has not previously taught in this state.

Such a device could be operated in close concert with our teacher training institutions to give us just those teaching specialties that we need but are not supplying from California colleges.

In California teacher-training programs we try to encourage teacher-candidates to prepare for those fields where they will be needed most by the time their training is completed and they are ready to "enter the market." Why offer a nonselective bonus to the horde of older teachers who will inevitably pour across California borders to compete with our own college graduates?

It is doubtful that California needs to offer any kind of a bonus to induce teachers to come here from other states. *But if we decide that a bonus is needed, let us not pay it to those who are already recruited and teaching in California.*

5. Undoubtedly one of the best solutions to the problems of the migrant teacher is that of developing among the states the pattern of providing vested rights to benefits already earned if the teacher terminates service prior to attaining the normal retirement age. In most systems this is 60 or 65 years. If the teacher has completed the minimum years of service required under a particular state's statutes, and leaves his contribution on deposit at termination of service he is protected. The migrant teacher may thus qualify for benefits under several systems. Even though there may be variations between states in the formulas under which his service was credited he will at least receive the benefit he was promised when the service was rendered. Furthermore, his benefits from the several systems in which the member may have served will be financed from his own contributions and from those of the particular taxpayer he served.¹⁶

¹⁶ The National Council on Teacher Retirement (affiliated with the National Education Association) has recommended this solution to the problem.

APPENDIX A

BENEFITS PAYABLE

The states providing credit for out-of-state service are generally those with the less liberal retirement formulas. For comparison purposes there is shown the benefits provided by some of the selected systems on the basis of the case of a male teacher who will retire at age 65, with a total of 38 years of service, of which 18 years were served prior to his moving to the state from which the benefit will be paid. His salaries for the highest five (final) years of service were \$12,000, \$11,500, \$11,000, \$10,500 and \$10,100. This schedule of benefits is unrealistic to the extent that it is inflated for many of the states. Salaries of this size are rare in many localities, while in some of the more prosperous states the salaries are not unlike those paid secondary teachers in the top brackets.

I. STATES WHICH DO NOT CREDIT OUT-OF-STATE SERVICE EXCEPT AS TO BENEFITS WHICH MAY BE PROVIDED FROM MEMBERS' CONTRIBUTIONS

	<i>Total years of credited service</i>	<i>Monthly benefit</i>

⁵ Plus member's social security.

⁶ Does not include Chicago.

⁷ Does not include Detroit.

⁸ Does not include New York City.

It is difficult to draw any hard and fast conclusions from these comparisons. They point up, with minor exceptions, that those states in group I, which do not in effect provide for credit on out-of-state service, pay better benefits on their own service than the states which do allow credit for out-of-state service pay for combined in- and out-of-state teaching. The exceptions, which are Georgia and Pennsylvania in group II, have other restrictive provisions in their laws. Georgia credits out-of-state service only if it is credited by the other state and both states require quite large contributions from their members on out-of-state service. These systems report that their provisions for out-of-state service credits present no problems and the requests for such credit are infrequent. Probably the lack of reasonable vesting provisions provide savings far in excess of any prospective cost of credits for teaching in other states.

In group III the exceptions are Alaska, Connecticut, Illinois, Kentucky, Massachusetts, Michigan, Missouri and New York. Here again we find a lack of adequate vesting provisions. It can be said that the granting of credit for out-of-state service is to a great extent at the cost of those who terminate service before having served out the considerable minimums required to vest their retirement rights. Of the entire group probably Alaska is the only one with any extensive immigration, and the recruitment problem is likely acute. Restrictions on membership and vesting have, however, tended to offset much of the cost involved in the granting of the maximum of 10 years of out-of-state service.

APPENDIX B**MINIMUM AGE AND ACADEMIC STANDARDS FOR TEACHER
CERTIFICATION, 1930-1965**

A study of minimum scholastic standards in 1931 resulted in the following conclusions: (1) more than half the states required high school graduation prior to issuance of certificates; (2) several states required one year of professional work beyond high school; (3) Connecticut, Pennsylvania, Utah, and Washington required 2 years of normal school or college; and (4) California required $2\frac{1}{2}$ years of preparation beyond high school.

In 1938, "the presence of a large supply of teachers prepared in teacher-training high schools or in one-year normal school or college curricula" appeared, according to the federal Office of Education, "seriously to retard the elevation of levels of teacher education, even in wealthy states." At this time, the "minimum amounts of preparation required by the several states for elementary teachers' certificates range from unspecified amounts of elementary or secondary school education sufficient to enable the applicant to pass an examination, to four years of college work. An indefinite examination requirement prevails in at least six states, . . ." Minimum age requirements at this time, specified in 37 states, ranged from 17 to 20 years. Typically, the requirement was 18 years of age.

During World War II, a severe nationwide shortage of teachers resulted in the practice of issuing emergency or substandard certificates. In 1943, every state from which returns were received, with the possible exception of Massachusetts, issued teachers' war emergency permits. Eleven states had no minimum standard at all; four required high school graduation; 30 required some college work; 10 required teaching experience; nine required a prior teaching certificate; and 10 required a review course or other preparation. At the height of the teacher shortage, 140,000 teachers were estimated to hold emergency certificates.

Due to rapid increases in school enrollments after World War II, the practice of issuing emergency or substandard certificates has continued to the present time. Only Hawaii, Kansas, and North Dakota report that in 1964 no emergency certificates were issued. Only the following states require a degree: Alaska (with some exceptions), Connecticut, the District of Columbia, Illinois, Indiana, Oklahoma, and Iowa and Minnesota for high school teachers. Most of the other 44 states require from 60 to 90 semester hours of college.

According to Conant, in 1960-61, 8,079 teachers in New York State, exclusive of Buffalo and New York City, were *uncertified*.

APPENDIX C

EDMUND G. BROWN
GOVERNOR

State of California
GOVERNOR'S OFFICE
SACRAMENTO

October 23, 1962

Miss Myrtle Flowers
President, "ARCOSS"
9522 Cedar Avenue
Bellflower, California

Dear Miss Flowers:

It has been brought to my attention recently that your organization, "ARCOSS," has decided to seek certain amendments to the State Teachers' Retirement Act during the 1963 legislative session. The purpose of these amendments will be to remove certain inequities in the present law pertaining to teachers receiving retirement credit for their service in states other than California.

I want you and the members of your organization to know that I agree steps must be taken to remove this inequity. California depends on attracting teachers from out of state to meet its ever-increasing classroom needs, and it is only fair that these teachers be allowed to acquire an adequate retirement fund.

I pledge to you and your organization that, if returned to office, I will support legislation to correct this inequitable situation.

My best wishes to your membership.

Sincerely

A handwritten signature in dark ink, appearing to read 'Edmund G. Brown'.

EDMUND G. BROWN, Governor

LETTER OF TRANSMITTAL

May 13, 1965

Honorable Glenn M. Anderson
President of the Senate

Dear Mr. President:

We submit herewith a preliminary report detailing the work of the Subcommittee on Reapportionment in attempting to comply with the order of the Federal District Court to enact no later than July 1, 1965, a plan of reapportionment for the California State Senate in conformity with the decisions of the United States Supreme Court in the Apportionment Cases of June 15, 1964.

Respectfully submitted,

STEPHEN P. TEALE, Chairman
EUGENE G. NISBET, Vice Chairman
STANLEY ARNOLD

*Vacancy, vice Senator Edwin J. Regan resigned January 3, 1965, to accept appointment as Justice District Court of Appeal, Third District.

SENATE COMMITTEE ON RULES RESOLUTION NO. 21

Relative to the creation of the Subcommittee on the Subject of Reapportionment

Resolved by the Senate Committee on Rules, That pursuant to Senate Rule No. 12.5, there is hereby created a subcommittee of the Senate General Research Committee to be known as the Subcommittee on Reapportionment; and be it further

Resolved, That the subcommittee will consist of eleven members: Senator Stephen P. Teale, who shall be Chairman, and the following ten Senators:

Arnold, Collier, McCarthy, Nisbet, O'Sullivan, Quick, Rees, Regan, Sturgeon, Williams; and be it further

Resolved, That the subcommittee shall study the political impact of Senate reapportionment in compliance with the U.S. Supreme Court decision and other problems that could be created by reapportionment; and be it further

Resolved, That the sum of Seven Thousand Five Hundred Dollars (\$7,500), or so much thereof as may be necessary, is hereby made available from the Contingent Fund of the Senate for the expenses of the subcommittee created by this resolution and its members, and for any charges, expenses, or claims it may incur under said resolution, to be paid from said contingent fund and disbursed, after certification by the chairman of the subcommittee, upon warrants drawn by the State Controller upon the State Treasurer.

ADOPTED: September 11, 1964.

I. SCOPE OF THE REPORT

This preliminary report will summarize the work of the Subcommittee to date in its efforts to develop a plan of Senate apportionment that will comply with the December 3, 1964, order of the Federal District Court in *Silver v. Jordan* (unpublished) and with the decisions of the United States Supreme Court in its Apportionment Cases of June 1964.¹

II. LEGISLATIVE APPORTIONMENT AND THE FEDERAL COURTS

At the outset, a brief tracing of treatment of challenged state legislative apportionment schemes by the federal judiciary is in order. For more than 100 years, the federal judiciary in general and the United States Supreme Court in particular had declined to entertain such challenges, basing their abstention primarily on the principle that the issue the courts were asked to resolve was one lying within that sacrosanct domain of non-justiciable "political questions." That era of abstention ended on March 26, 1962, and the breaking of that barrier produced a shockwave that was to be felt in most of the state capitols of the Union. The case was *Baker v. Carr*,² and the Supreme Court ruled in essence that a challenged state legislative apportionment scheme which is alleged to violate the Equal Protection Clause of the 14th Amendment to the Federal Constitution is a matter over which the federal courts have jurisdiction and raises a justiciable constitutional issue upon which the federal courts may afford relief. The state defendant was Tennessee, whose legislature had not been reapportioned since 1901. Other than deciding the three questions of jurisdiction, justiciability, and standing to sue, in plaintiff's favor, the court issued no additional dogma in *Baker v. Carr*.

But the Court had plunged into the thicket which Justice Frankfurter had staunchly warned against entry.³ Although the majority justices in *Baker* held a good-faith expectation that their ruling would be sufficient in itself to compel voluntary reapportionment action by the states, that result was not to be. Instead, the razing of the dam of abstention loosed a veritable flood of litigation, and by November 1, 1962, the apportionment status of no less than 30 state legislatures had been challenged in federal and state courts. It became obvious that the Court would soon be afforded the opportunity to expound further on the contours of federal constitutional requisites in state legislative apportionment.

A forewarning of what was to come was evidenced by the Court's decision in *Gray v. Sanders*,⁴ on March 18, 1963, when the Court announced its now-famous one-person, one-vote ruling. The issue was not one of legislative apportionment, but rather whether Georgia's county-unit system of weighted voting in electing statewide officers (Governor,

¹ *Reynolds v. Sims*, 377 U.S. 533 (Alabama); *WMCA v. Lomenzo*, 377 U.S. 633 (New York); *Maryland Committee For Fair Representation v. Tawes*, 377 U.S. 656 (Maryland); *Davis v. Mann*, 377 U.S. 678 (Virginia); *Roman v. Sincock*, 377 U.S. 695 (Delaware); *Lucas v. 44th General Assembly*, 377 U.S. 713 (Colorado).

² 369 U.S. 186.

³ *Colegrove v. Green*, 328 U.S. 549, 553-554.

⁴ 372 U.S. 368.

United States Senator, Attorney General, etc.) debased voting rights in violation of the Equal Protection Clause of the 14th Amendment. The Court held that the challenged Georgia county-unit system was discriminatory in that it resulted in some residents having greater or lesser voting power merely because of their homesite. The Court said that the concept of political equality from the signing of the Declaration of Independence to this time can mean only one thing—one person, one vote.

The decisions in *Baker v. Carr* and *Gray v. Sanders* blazed the path for the Court to rule in *Wesberry v. Sanders*,⁵ on February 17, 1964, that the one-person, one-vote principle applies in United States House of Representatives districting within states, as well as to elections of statewide officers. Again the culpable state was Georgia.

As the conclusion of the Supreme Court's 1963-64 term drew near, there remained for decision 15 cases of challenges against states' legislative apportionments. The holdings of the lower courts were consistent only in their lack of uniformity. Some lower courts had ruled that the one-person, one-vote tenet need only apply to one house of a bicameral legislature, by analogy to the scheme of representation in the United States Congress; other judges had held that both houses of a bicameral legislature must be apportioned substantially on a population basis; and almost each individual lower court had its own particular concept as to what constituted malapportionment.

The stage was set for what has been termed the seismic disturbance of June 15, 1964, for it was on that date that the Court announced its decisions in the Apportionment Cases. Basically, the Court ruled that the Equal Protection Clause of the 14th Amendment requires that *both* houses of a bicameral state legislature must be apportioned substantially on a population basis.⁶ The Court acknowledged that "Mathematical exactness or precision is hardly a workable constitutional requirement."⁷ However, the Court's interpretation of the 14th Amendment requires the state to "make an honest and good faith effort to construct districts, in both houses of its legislature, as nearly of equal population as is practicable."⁸

After announcing its rule of law, the Court asserted that deviations from that basic rule are justified only if "relevant to the permissible purposes of legislative apportionment."⁹ The Court then listed a number of "thou shalt nots" which it declared to be impermissible bases for deviation: reliance on the so-called federal-plan analogy;¹⁰ to insure effective representation for sparsely-settled areas;¹¹ to give weight to such factors as history or economic or other types of group interests;¹² to prevent legislative districts from becoming so large that the availability of access of residents to their representatives is impaired;¹³ to have different bases of representation in the two houses of a bicameral legislature;¹⁴ to balance urban and rural power.¹⁵

⁵ 376 U.S. 1.

⁶ *Reynolds v. Sims*, 377 U.S. at 568.

⁷ *Id.* at 577.

⁸ *Id.* at 577.

⁹ *Id.* at 565.

¹⁰ *Id.* at 571. The federal-plan analogy was the most harshly treated of the arguments in justification made by the state defendants. The Court declared that such analogy is "irrelevant" to legislative apportionment, which taken literally means the analogy is not admissible as evidence, and if improperly admitted cannot be the basis for a decision.

¹¹ *Id.* at 571.

¹² *Id.* at 579-580.

¹³ *Id.* at 580.

¹⁴ *Id.* at 576.

¹⁵ *Davis v. Mann*, 377 U.S. at 692.

Virtually the only factor the Court prospectively recognized as justification for deviation from the strict rule is the use of political subdivisions as bases for district formation. The foundations indicated by the Court for such recognition are that indiscriminate districting "without any regard for political subdivision or natural or historical boundary lines, may be little more than an invitation to partisan gerrymandering,"¹⁶ and local governmental entities "are frequently charged with various responsibilities incident to the operation of state government."¹⁷ But, the Court warned that recognition by the state of local political subdivisions in districting must not submerge the basic equal-population principle or dilute that principle in any significant way.¹⁸

In only the Colorado case of *Lucas v. 44th General Assembly*¹⁹ was the challenged apportionment one that had been created and adopted by popular initiative. Although the Court acknowledged that a majority of Colorado voters in every county of that state had voted in favor of a non-population-based Senate apportionment plan,²⁰ the Court declared that the fact a state's apportionment scheme is adopted through use of the initiative or referendum will not save such plan if it fails to provide for population-based representation in both houses.²¹ The Court took the position that availability in a state of the initiative or referendum merely has the narrow effect of justifying a court "to stay its hand temporarily while recourse to such a remedial device is attempted or while proposed initiated measures relating to legislative apportionment are pending and will be submitted to the state's voters at the next election."²²

The Court was careful to point out that its establishing as a rule of law the credo that both houses of a state legislature must be apportioned substantially on a population basis, is not intended to abolish bicameralism in the states. "Different constituencies can be represented in the two houses. One body could be composed of single-member districts while the other could have at least some multi-member districts. The length of terms of the legislators in the separate bodies could differ. The numerical size of the two bodies could be made to differ, even significantly, and the geographical size of districts from which legislators are elected could also be made to differ. And apportionment in one house could be arranged so as to balance off minor inequities in the representation of certain areas in the other house."²³

In outlining procedure to be followed by the lower courts in legislative apportionment cases, the Court characterized as "the unusual case" in which a court would be justified in allowing any further election to be held under a state apportionment scheme that has been ruled constitutionally invalid.²⁴ The Court recognized, however, that the duty of legislative apportionment is a responsibility of the states' legislatures, and that they should be given adequate opportunity to take requisite action, and the courts should act in the legislatures' stead only if such action is not taken in timely fashion.²⁵ Insofar as possible, the lower courts were

²⁴ *Id.* at 585.

²⁵ *Id.* at 586.

directed to tailor any relief they may order to the apportionment provisions of the states' constitutions.²⁶

As to fashioning any standard or test to guide the lower courts in determining the extent of permissible deviation from the one-person, one-vote principle, the Court elected not to formulate any fixed guidelines. The Court asserted that "it is neither practical nor desirable to establish rigid mathematical standards for evaluating the constitutional validity of a state legislative apportionment scheme under the Equal Protection Clause. Rather the proper judicial approach is to ascertain whether, *under the particular circumstances existing in the individual state* whose legislative apportionment is at issue, there has been a faithful adherence to a plan of population-based representation, with such minor deviations only as may occur in recognizing certain factors that are free from any taint of arbitrariness or discrimination."²⁷

In testing the schemes challenged in the Apportionment Cases, the Court relied on two factors. One is the maximum population variance ratio, which simply stated is the comparison between the state's most heavily populated district and its least populated district. The other is the minimum percentage of the total population of the state which, under its apportionment plan, can elect a majority of the challenged legislative body. This is determined by tallying the population in districts, beginning with that of the lowest rank on the district-population scale, until districts with a majority of seats are included in the count. The total population in such districts is then computed against the entire state population to reach the minimum percentage figure. In Table I (infra) we have listed the figures under both tests for 17 of the estimated more than 40 states whose apportionment plans have been challenged in the federal and state courts. We would note, however, that the figures shown in the table are informative, but not necessarily controlling, in the light of the Court's statement regarding rigid standards, as quoted above.

The foregoing in essence summarizes the major principles of the Apportionment Cases. On June 22, 1964, one week after those landmark decisions, by per curiam orders the Court disposed of the remaining nine cases in which state legislative apportionment schemes had been challenged.²⁸

Davis*, 378 U.S. 565 (Iowa).

III. FEDERAL COURT LITIGATION AND THE CALIFORNIA STATE SENATE

As early as August 30, 1962, a three-judge Federal District Court convened in Los Angeles ruled that it had jurisdiction and that a justiciable issue was presented, in a challenge of California State Senate apportionment founded on the Equal Protection Clause of the 14th Amendment. The court's authority rested on *Baker v. Carr*.²⁹ However, because there was then pending an initiative measure, Proposition 23, which was to be voted on at the 1962 general election, and which if adopted would have reapportioned the Senate, the court granted no relief, but retained jurisdiction. The voters on November 6, 1962, defeated Proposition 23, and the litigation resumed. After several procedural technicalities were resolved, the suit was pressed in earnest in the latter part of 1964. The motion of the Senate to become a party intervenor in the action was granted by the court.

On December 3, 1964, the Federal District Court in a 2-1 per curiam order held that the "present plan of Senate apportionment by districts in California is unconstitutional, being an invidious discrimination of citizens' rights and violative of the Equal Protection Clause of the 14th Amendment to the U.S. Constitution, as interpreted by the Supreme Court of the United States."³⁰

The court took note of and agreed with the Supreme Court's assertion that "legislative reapportionment is primarily a matter for legislative consideration and determination, and that judicial relief becomes appropriate only when a legislature fails to reapportion according to federal constitutional requisites in a timely fashion after having had an adequate opportunity to do so."³¹ The court then issued this stern warning: "If the California Legislature once ordered fails to act, and to act with promptness, we, ever conscious of our oath to uphold the Constitution of the United States, will unhesitatingly take appropriate action to correct the inequity."³²

Although the Federal District Court had before it several questions for resolution and for which relief was requested (including the matter of interpretation of the apportionment provisions of the California Constitution), the court confined its ruling and relief to the singular point of alleged malapportionment of the Senate: "This court, having determined that the primary objective of any order or decree at this time should be to effectively induce the 1965 session of the California Legislature to properly reapportion itself as its first order of business, makes no order at this time other than the following: (1) It is the order of this court that the California State Legislature reapportion the California State Senate consistent with this opinion, and the several existing United States Supreme Court decisions on the subject, so that the *Reynolds* doctrine of 'districts of substantial equality in population' exists. (2) Should the California State Legislature fail to discharge its duty to

²⁹ Footnote 2, *supra*.

³² *Silver v. Jordan*, Appendix "A", *infra*.

fairly, adequately and validly redistrict State Senatorial Districts within the State of California, by not later than July 1, 1965, this court will, before or after that date, hold further hearings or motions; devise redistricting plans; and make such further orders or take such further steps as may be necessary or appropriate (either upon its own motion, or on the motion of any party or intervenor), and to that end we retain full jurisdiction of this case for such purposes, and all others."³³

An appeal from that lower court judgment has been filed with the Supreme Court by the defendant state officials and by the Senate as intervenor.³⁴ One does not have the "right" to have an appeal heard by the Supreme Court, rather this is a matter of selective choice by the Court. If the Court, upon review of appellants' jurisdictional statement, finds there has been presented a substantial federal constitutional question which warrants resolution by the Court, "probable jurisdiction" is noted by the justices and the matter is then briefed and argued and decided by the Court either in a full-blown decision or by per curiam order.

The Supreme Court on June 1, 1965, in a terse per curiam order, affirmed the decision of the district court, thus dismissing the appeal (*Jordan v. Silver*, _____ U.S. _____).

IV. THE WORK OF THE SUBCOMMITTEE

Planning for Senate reapportionment, first as a possibility and later as an imminent prospect, in fact antedates the December 3, 1964, order of the Federal District Court in *Silver v. Jordan*.³⁵ The Senate itself initiated in 1961, a thorough study of Senate apportionment by a so-called "blue ribbon" commission of nine members, five of whom were appointed by the Governor, and the remaining four were two members from each the Senate and Assembly. The vehicle for that study was Senate Bill No. 146 of the 1961 General Session, which was authored by nine senators, seven from northern California and two from the southern population centers. This bill was enacted as Chapter 607 of the Statutes of 1961. That Study Commission on Senate Apportionment held seven hearings throughout the State and its staff dipped deeply into the historical background of Senate apportionment, as foundational material for its *Report*, submitted in January, 1962.

The Commission concluded that there had been demonstrated neither a compelling need nor a strong desire for overall Senate reapportionment, but that additional Senate representation be accorded Los Angeles County and other heavily-populated counties whose numbers of residents exceed 1,500,000. This recommended dispensation was grounded primarily on the workload factor, i.e., the extreme difficulty of representation by one senator of more than 1,500,000 constituents.³⁶

The recommendation of the Commission was introduced as Assembly Constitutional Amendment No. 5 at the 1962 First Extraordinary Session of the Legislature, but a week later that recommendation was amended out of the measure and a radically different Senate reapportionment scheme was written in, instead, by the Assembly. As so rewritten, the proposed constitutional amendment was adopted by the Assembly, but the Senate refused to approve the new plan and it died in committee in the upper house. The Senate, on April 12, 1962, taking note of the U.S. Supreme Court's landmark decision in *Baker v. Carr*, announced on March 26, 1962,³⁷ and pointing out that the "blue-ribbon" commission's recommendation had met an inglorious fate, adopted Senate Concurrent Resolution No. 14, co-authored by 10 northern California senators, calling for creation of a joint legislative committee to study apportionment of both houses of the legislature. The Assembly refused adoption of this proposal.

More recently, but prior to the *Silver v. Jordan* decision, the Senate began marshalling data and reference material to be used in formulating a reapportionment plan. On September 11, 1964, the Senate Rules Committee created the Subcommittee on Reapportionment of the Senate General Research Committee, for that purpose. Following the *Silver v. Jordan* ruling, the Senate General Research Committee (composed of all members of the Senate) met on December 19 and 20, 1964, to receive a preliminary report from the Reapportionment Subcommittee and to discuss methods and means of complying with the court order.

³⁵ See Appendix "A" for text.

³⁶ *Report of Study Commission on Senate Apportionment*, pp. 40-47.

³⁷ Footnote 2, *supra*.

With the convening of the 1965 General Session of the Legislature, the Senate Committee on Rules, mindful of the emphasis placed by the federal court on the requirement that reapportionment be made the first order of business by the legislature, determined that a Special Standing Committee on Reapportionment be created, to have all powers "vested in Senate Standing Committees by law, the Rules of the Senate, and the Joint Rules of the Senate and Assembly."³⁸

We undertook the chore of fashioning a reapportionment plan with all the relish of a condemned man who is required to build his own gallows and weave the noose for his own neck. Regardless of the distastefulness of the task, we nevertheless were determined to endeavor to make that honest and good faith effort mandated by the court. That the project would be permeated with problems, we had some forewarning in the light of Justice Frankfurter's dissent in *Baker v. Carr*.³⁹

"... [T]his Court today catapults the lower courts of this country [into a mathematical quagmire] without so much as adumbrating the basis for a legal calculus as a means of extrication. Even assuming the indispensable intellectual disinterestedness on the part of judges in such matters, they do not have accepted legal standards or criteria or even reliable analogies to draw upon for making judicial judgments. To charge courts with the task of accommodating the incommensurable factors of policy that underlie these mathematical puzzles is to attribute, however flatteringly, omniscience to judges. The Framers of the Constitution persistently rejected a proposal that embodied this assumption and Thomas Jefferson never entertained it."⁴⁰ Justice Frankfurter's expression of concern for the capability of the judiciary to cope with apportionment problems applies, we submit, with at least equal vitality to legislators, who admittedly are non-omniscient.

Noting that the majority justices in *Baker* had indicated a proper legislative apportionment plan should rule out factors such as geography, economic diversity, urban-rural considerations, historical districting precedents, and accessibility, to some extent, the dissent pointedly foretold with keen accuracy the dilemma presently confounding California and numerous sister states: "To some extent—aye, there's the rub."⁴¹

And Justice Frankfurter sharply warned that there are more factors inextricably interwoven into the fabric of legislative apportionment than mere nice mathematical equations, calling attention to necessarily-related issues that, he said, cannot summarily be dismissed: "Apportionment by its character is a subject of extraordinary complexity involving . . . considerations of geography, demography, electoral convenience, economic and social cohesion or divergencies among particular local groups, communications, the practical effect of political institutions like the lobby and the city machine, ancient traditions and ties of settled usage, respect for proven incumbents of long experience and proven status, mathematical mechanics, census compiling relevant data, and a host of others. . . . And . . . in every strand of this complicated, intricate web of values meet the contending forces of partisan politics."⁴²

³⁸ Senate Resolution No. 22, introduced January 11, 1965 (p. 101, Senate Daily Journal for said date), and adopted January 19, 1965 (p. 162, Senate Daily Journal for said date); Committee appointed, see p. 168, Senate Daily Journal, January 19, 1965.

⁴¹ *Id.* at 739.

⁴² *Id.* at 767-768.

Although the broadsword of the Apportionment Cases⁴³ struck down most of the considerations alluded to by Justice Frankfurter, we as legislators must report that they are present in the very real sense. The result is that our task is made more difficult in that we are required to submerge these practical considerations into a plan the basis for which is required to be a matter of arithmetic, with some secondary recognition of local political subdivision boundaries. Suffice to say we encountered at the outset some real and practical problems without the need of setting up strawmen to confuse the issue.

A. The Difficulties and Efforts Toward Solutions

The following is a recapitulation of the difficulties which have been faced in fashioning a Senate reapportionment plan, not, to be sure, in chronological order and not necessarily in order as to degree of profundity; and the avenues of approach toward solution of these problems.

1. The Conflict Between the Court's Order and the California Constitution. Hardly had we begun our labors than it became apparent that we could not comply with the court order in *Silver v. Jordan*⁴⁴ without abridging at least some of the provisions of the California Constitution regarding Senate apportionment. Said provisions are contained in Article IV, Sections 4, 5, and 6 of the State Constitution.⁴⁵ Enumerated among the requirements therein are the following: (a) the Senate shall consist of 40 members to be elected by districts; (b) senators shall serve four-year terms; (c) one-half of the Senate shall be elected every two years; (d) a senator must be an inhabitant and citizen of the State for three years and of his district for one year preceding his election; (e) the State shall be divided into 40 Senate districts; (f) Senate districts shall be composed of contiguous territory; (g) one senator shall be chosen from each Senate district; (h) Senate districts shall be numbered 1 through 40, commencing at California's northern boundary and ending at the southern boundary; (i) no county or city and county shall be divided in formation of Senate districts; (j) no part of a county or of a city and county shall be united with any other county or city and county in formation of Senate districts; (k) the decennial federal census shall be the basis of fixing and adjusting Senate districts; (l) at the first regular session after each decennial federal census the legislature shall adjust Senate districts;⁴⁶ (m) no county or city and county shall contain more than one Senate district; (n) counties of small population shall be grouped not to exceed three in any Senate district; (o) should the legislature fail to carry out its mandate to reapportion Senate districts following any decennial federal census, a Reapportionment Commission of specified State officials shall perform such reapportionment function; (p) any legislative reapportionment is subject to referendum, whether enacted by the legislature or fashioned by the Reapportionment Commission; (q) persons not eligible to become U.S. citizens under federal naturalization laws shall not be counted as part of the population in reapportionment of legislative districts.

Each of these 17 provisos of the foundational law of California must be given due consideration, singularly and collectively in formulating a re-

⁴³ Footnote 1, *supra*.

⁴⁴ See Appendix "A", *infra*, for text.

⁴⁵ See Appendix "B", *infra*, for full text.

⁴⁶ Seemingly relying on the doctrine *expressio unius est exclusio alterius*, the California Supreme Court has twice ruled that this provision empowers the Legislature to adjust legislative districts only once after each decennial federal census: *Dowell v. McLees*, 199 C. 144 (1926); *Wheeler v. Herbert*, 152 C. 224 (1907).

apportionment plan. The oath we swore as legislators so demands. Yet, we cannot help but concede that by giving full weight and merit to all of said provisions, compliance with the federal court order would be rendered impossible. We realize that at least some of these mandates are prospectively invalid, if their continued efficacy would prevent adoption of a Senate apportionment scheme that will comport with the Equal Protection Clause of the 14th Amendment. The nice question is: which provisions are thus in jeopardy? The answer is one a layman should not be so presumptuous as to propose. Or is the matter of resolve rightly within the province of the legislature. Ultimately, although we may seek the opinion and guidance of counsel, the answer will have to be provided by the courts.

We foresee an intricate unraveling task for the judiciary in this respect. There appear factors to which the test of legal severability must be applied, not only to the various parts of the whole relating solely to Senate apportionment, but also in light of the construction of these Sections, wherein specifications relating to Senate apportionment are in several instances joined in the conjunctive with provisions regarding Assembly apportionment, rather than being separated in the disjunctive.⁴⁷ Another element for consideration, depending on the answers given to the questions of basic validity under the Equal Protection Clause of the 14th Amendment and of severability may be whether the doctrine of revivor will come into play so as to restore the provisions that existed prior to adoption of the present language by popular approval of the initiative of 1926, or whether the decreed invalidity will create a lacuna allowing the legislature an unfettered freedom of choice in devising a new scheme of Senate apportionment.

The issue of construction and interpretation of the pertinent provisions of the State Constitution was laid before the federal court in *Silver v. Jordan*, but that court chose to abstain from ruling thereon. We do not criticize the court for its posture in this respect, as that choice seems to be in harmony with the directives of the U.S. Supreme Court.⁴⁸ For this Committee, the question was how to proceed. We turned to litigation involving other states for precedent.

The legal skirmish over Colorado's Senate apportionment was a case in point. After the Supreme Court on June 15, 1964, invalidated the Colorado scheme of Senate apportionment that had been adopted by use of the initiative in that state,⁴⁹ the lower federal court on remand made three unpublished rulings at the state's request for guidance. The lower court ruled that the initiative proposition was non-severable as to its provisions regarding the Senate (which the Supreme Court had invalidated) and those regarding lower house districting (which had not been in issue in the litigation, and which the Supreme Court noted in a dictum was "at least arguably apportioned substantially on a population basis") must both fail. The lower court ruled further that, according to its interpretation of the Colorado Constitution, there was no proscription against creation of two or more districts within a county. Also, the court ruled that sufficient time remained for the legislature to enact a new apportionment plan prior to the 1964 general election.

⁴⁷ See Appendix "B", infra, for full text of these Sections.

⁴⁸ Per curiam order in the Pennsylvania case, *Scranton v. Drew*, 379 U.S. 40; and per curiam order in the Colorado case, *44th General Assembly v. Lucas*, 379 U.S. 693.

⁴⁹ *Lucas v. 44th General Assembly*, 377 U.S. 713.

Almost immediately, the Colorado Legislature was called into special session and within a matter of days enacted Senate Bill No. 1, which shifted seven Senate and 10 House seats from sparsely settled counties to the more populous counties. The measure created individual districts within those counties to which two or more seats were allocated. On July 8, 1964, the Federal District Court, in another unpublished ruling, held that, for purposes of the 1964 election, the apportionment plan enacted in Senate Bill No. 1 comported with the Equal Protection Clause, all parties to the suit having so agreed. The federal court had also been asked to enjoin the Colorado state courts from hearing and deciding a suit challenging Senate Bill No. 1 under the Colorado Constitution. The federal court denied the request for injunction, as it was unwilling to assume the state court would take action contrary to that taken by the federal court.

Within a few days after the federal court had given its approval to Senate Bill No. 1, the Colorado Supreme Court invalidated that enactment as contravening the state constitution.⁵⁰ The Colorado Constitution provides, *inter alia*, "No county shall be divided in the formation of a senatorial or representative district."⁵¹ Under Senate Bill No. 1, one senator was allotted to each district, and, as an example, the statute provided for "nine senatorial districts" within Denver city and county (not, as the Colorado Supreme Court pointed out, nine senators from Denver), and defined the boundaries for each such district. The state court held the provision creating two or more districts within counties to be contrary to the quoted language in Article V, Section 47 of the Constitution. The state court further ruled that the purposes of Senate Bill No. 1 could not be carried out without the invalidated provision and therefore the entire enactment must fail.⁵² Nonetheless, the Colorado Supreme Court postponed the effective date of its judgment until January, 1965, so that the 1964 election could be conducted under the provisions of Senate Bill No. 1, as had been ordered by the federal court.

The Colorado Supreme Court held that, although federal questions are for federal courts to decide, the testing of a state law against a state constitution is a state question over which state courts have jurisdiction.⁵³ This maxim received the approval of the U.S. Supreme Court. After the state court's decision was announced, the state officials utilized the July 8, 1964, ruling of the Federal District Court as a vehicle to seek clarification from the U.S. Supreme Court. By *per curiam* order of February 1, 1965, the Supreme Court *affirmed* the decision of the lower federal court insofar as that court decided federal questions; but, insofar as it "decides other questions it is *vacated* and the cause is remanded for further consideration in light of *White v. Anderson*."⁵⁴

In the closing stages of its 1965 Session, the Colorado Legislature during the first week of May, enacted a revision of Senate Bill No. 1. The enactment, according to Colorado Attorney General Duke Dunbar, maintained the identical apportionment as had been created by Senate

⁵⁰ *White v. Anderson*, 394 P. 2d 333.

⁵¹ Article V, Section 47, Colorado Constitution, third sentence.

⁵² *White v. Anderson*, 394 P. 2d, at 337-338.

⁵³ *Id.* at 334.

⁵⁴ *44th General Assembly v. Lucas*, 379 U.S. 693; emphasis ours. Four justices in a concurring opinion wrote: "It is our understanding that the Court's disposition of this case leaves it open to the district court to abstain on the issue of severability of the various provisions of [the apportionment scheme invalidated by the Supreme Court on June 15, 1964], pending resolution of that issue with reasonable promptitude in further state court proceedings. We deem it appropriate explicitly to state our view that this is the course which the district court should follow. On that basis we join the Court's opinion."

Bill No. 1, but provides for at-large representation and election of legislators in those counties entitled to two or more members. The new enactment thus eliminates the sub-districting feature of Senate Bill No. 1, which the state courts had held to contravene the Colorado Constitution.

Another version of the conflict between federal and state court construction of apportionment provisions of a state constitution is illustrated by litigation arising out of Pennsylvania's legislative districting. Suits were already pending in both the federal and state courts when the Pennsylvania Legislature in January, 1964, passed new Apportionment Acts.⁵⁵ Pleadings in both suits were quickly amended to challenge the new enactments, as well as the state constitutional apportionment provisions upon which they were based.⁵⁶ The Federal District Court proceeding moved more swiftly than did the state court litigation. On April 9, 1964, the federal court held the Acts and the challenged Sections of the Pennsylvania Constitution were invalid under the Equal Protection Clause of the 14th Amendment.⁵⁷ The only portion of the state constitutional apportionment provisions the federal court left standing was the requirement that counties cannot be divided in forming Senate districts, except if a county is entitled to two or more senators, a feature which the court viewed as prohibiting fractionalizing of counties and which the court held to be a desirable restriction.

That district court decision was appealed to the U.S. Supreme Court; however, before the latter ruled on the merits of the appeal, but after the Supreme Court decided the Apportionment Cases of June 15, 1964,⁵⁸ the proceeding in the Pennsylvania state courts culminated in a decision which differed from the ruling of the lower federal court. On September 29, 1964, the Pennsylvania Supreme Court held the Acts to be invalid, but interpreted the challenged state constitutional provisions as *not* being invalid under the Equal Protection Clause of the 14th Amendment.⁵⁹ The Pennsylvania court asserted that this case "presents one of the most important constitutional questions ever raised in the history of this Commonwealth."⁶⁰ The state court felt it was the proper tribunal to decide these state constitutional issues and fashion any necessary remedies, and that this was necessitated to assure proper and continuing respect for federal-state judicial relationships.⁶¹

Although the Pennsylvania court concurred with the lower federal court that the apportionment scheme created by the Acts failed to comport with the requirements of the 14th Amendment's Equal Protection Clause, the state court pointed out that the dual facts, that the primary election had already been conducted under said scheme and that precious little time remained for the legislature to develop a new plan prior to the general election, necessitated holding that general election also under said scheme.⁶²

Turning to the challenged provisions of the Pennsylvania Constitution, the state court confected a compromise. The Pennsylvania court ruled that the legislature in fashioning a new apportionment plan must in all respects give primary consideration to the formation of districts of sub-

⁵⁵ 25 P.S., Sections 2217 and 2221, referred to hereinafter as the "Acts".

⁶² *Id.* at 568-569.

stantially equal population in compliance with the Equal Protection Clause, and must also, insofar as possible, adhere to the provisions of the state constitution.⁶³

The state court felt that basically the pertinent state constitutional provisions would lend themselves to creation of a plan of apportionment founded on equally populated districts, and ruled that only such provisions as are in harmony with the 14th Amendment should be considered as mandatorily binding upon the legislature.⁶⁴ Implicitly, any provisions not in such harmony would only be considered permissive. In addition, the state court allowed the legislature until September 1, 1965, to adopt a constitutionally valid reapportionment plan.⁶⁵

On November 16, 1964, the appeal from the lower federal court ruling⁶⁶ was decided by the U.S. Supreme Court.⁶⁷ In a per curiam order, the Supreme Court summarized the history and results of the litigation in the federal and state courts, and then *vacated* the judgment of the lower federal court, remanding the matter to that forum "for further consideration in light of the decisions supervening since the entry of the judgment of the district court."⁶⁸

Although that per curiam order is somewhat cryptic, particularly in view of the Court's use of the words "decisions *supervening*," nonetheless the ruling is logically inferable as being harmonious with the holding in *44th General Assembly v. Lucas*,⁶⁹ wherein the Court vacated that portion of the lower federal court's judgment which decided non-federal questions. There were two "decisions supervening" the lower federal court ruling in *Drew v. Scranton*.⁷⁰ One was that rendered in the landmark Apportionment Cases;⁷¹ the other was that of the Pennsylvania court in *Butcher v. Bloom*.⁷² As the lower federal court's ruling was not inconsistent with that of the Supreme Court in the Apportionment Cases, the predominant decision supervening is that of the Pennsylvania court. Hence, *Scranton v. Drew*⁷³ seems to be additional authority for the principle that questions of state constitutional interpretation and construction are primarily for state courts to resolve.

More distinctly is that principle evidenced by the legislative apportionment litigation involving the State of New York, wherein reapportionment legislation was approved by the lower federal court which had ordered redistricting, and then was invalidated by the state courts as contravening the New York Constitution.

In *WMCA v. Lomenzo*⁷⁴ the U.S. Supreme Court ruled that New York's bicameral legislature was malapportioned. Upon remand, the Federal District Court allowed the 1964 election for legislators to proceed under that malapportioned scheme, but those elected could serve only until December 31, 1965.⁷⁵ The district court also fixed an April 1, 1965, deadline by which the New York Legislature would have to enact a valid

⁷³ 379 U.S. 40.

⁷⁴ 377 U.S. 633, one of the six Apportionment Cases of June 15, 1964; see Footnote 1, *supra*.

⁷⁵ In *Hughes v. WMCA*, 379 U.S. 694, the Supreme Court affirmed by per curiam order, the one-year term of legislators prescribed by the lower court. The district court's edict had been challenged by the state as an excess of that court's authority in disregarding the requirement of the New York Constitution that legislators be elected for two-year terms.

apportionment plan. Two commissions were appointed by the Governor to study proposals for reapportionment, one a citizens' committee, and the other a joint legislative committee. The 1964 election in New York produced a shift in the partisan composition of the legislature, and on December 15, 1964, the substantially lame-duck legislature was called into special session to consider reapportionment legislation.

By December 23, 1964, the New York Legislature had passed not one, but four reapportionment measures, all of which were to become operative January 1, 1965.⁷⁶ These are referred to, in order of that legislature's preference, as Plans D, C, B, and A. All four plans were submitted to the Federal District Court early in January, for review. Each of the four provided for a 65-member Senate, but they varied widely as to numerical size of the Assembly. According to the report of the Joint Legislative Committee on Reapportionment, Plan D was intended to be the law of New York; but if that plan were held invalid, Plan C would become operative; and if that plan were held invalid, Plan B would become operative; and if that plan were held invalid, Plan A would become operative.⁷⁷

Plan D provided for a 174-member Assembly which would cast a total of 150 votes; 127 members would have a full vote each and 47 members would cast fractional votes ranging from $\frac{3}{4}$ to $\frac{1}{6}$. Under Plan C, there would be a 186-member Assembly which would cast 165 votes; 147 members would each have a full vote and 39 members would cast fractional votes ranging from $\frac{3}{4}$ to $\frac{1}{6}$. Under Plan B, there would be a 180-member Assembly and each member would cast one vote. Under Plan A, there would be a 165-member Assembly and each member would cast one vote. Apportionment of seats under Plans D and B was based on the 1962 New York vote for governor, including blank and void ballots. Apportionment under Plans C and A was based on New York's 1960 citizen population.

The Federal District Court disallowed Plans D, C, and B, and approved Plan A.⁷⁸ Plans D and B were stricken down because the apportionment based on the 1962 vote would work to the disfavor of metropolitan areas and to the advantage of the already over-represented less populous areas. Plan C was invalidated because the fractional-voting provision would have the effect of giving less populous areas proportionately greater representation than they should be accorded under the one-person, one-vote concept. The two study commissions had recommended fractional voting so as to assure every county (with two exceptions) at least one member of the Assembly without the seats in that house being increased to over 1000.⁷⁹

The district court found Plan A presented an apportionment scheme which evidenced only minor deviations from precise equality among districts. Under that plan, the maximum population variance ratio in Senate districts was 1.15 to 1, and in Assembly districts was 1.21 to 1. The minimum that could elect a Senate majority would be 49.4% of the New York population, and 49.3% could elect a majority of the Assembly.⁸⁰ It was this substantial equality of population in districting that led the district court to conclude that Plan A should stand against a challenge

⁸⁰ Cf. Table I, for the mathematical factors in the New York apportionment scheme invalidated by the United States Supreme Court.

that it constituted a partisan-inspired and partisan-benefitting gerrymander. The district court also expressed doubt that partisan gerrymander is a type of discrimination protected against by the 14th Amendment.

Also before the federal court were a number of challenges alleging all four plans were invalid when tested against the New York Constitution, however none of these attacks were directed at the numerical size of the Assembly. It was argued on behalf of the State of New York that the decision of the United States Supreme Court⁸¹ and a July, 1964, ruling of the district court had invalidated all legislative apportionment provisions of the New York Constitution. The district court refused to accept that contention, and declined to rule on state constitutional questions, noting that a suit was then pending in the state courts on such issues. The federal court asserted that "these claims raise difficult questions of state law interpretation," and that "this is clearly an appropriate case for abstention by the federal courts." The district court also denied a request for injunction to halt the state court proceedings.

In a supplementary order of February 16, 1965, the Federal District Court clarified its position with respect to the apportionment provisions of the New York Constitution, ruling, inter alia, that invalidity attaches "only to the extent that [such] provisions are in unavoidable conflict" with the Supreme Court's June 15, 1964, decision⁸² and earlier district court judgments.⁸³

As had been noted by the federal court, all four plans were also under attack in the New York state courts on grounds that all four violated the state constitution and that they produced districting which amounted to numerous partisan gerrymanders. The state constitutional basis relied on most heavily was Article III, Section 2, which prescribes in part that the Assembly "shall consist of 150 members," and which makes no provision for increasing the number of seats in that house.

On March 25, 1965, the New York Supreme Court at Special Term⁸⁴ held all four plans invalid under Article III, Section 2 of the New York Constitution.⁸⁵ The court ruled that said section of the state constitution was still in full force, not having been effected by any of the federal court decisions. Accordingly, as all four schemes provided for Assembly membership of more than 150, all must fail under the state constitution's 150-member limit. Although none of the four fixed the numerical size of the Senate in contravention of the constitution's provisions, the court decreed that the schemes of Senate apportionment in those plans must also fail because of a still-valid state constitutional requirement that reapportionment and redistricting of the Senate and Assembly shall be "by the same law."⁸⁶

Although it must be classified as dictum, in light of the court's plenary disposition of the broader issue of state constitutional validity, the court also found that plaintiff had made out a prima facie case of partisan gerrymander with respect to a number of districts that would be created under the four plans. The court acknowledged that such finding was tentative and that if it became necessary to rule on the gerrymander question, full trial would have to be held on this issue; however, the court

⁸⁴ Under the New York state judicial hierarchy, the Supreme Court is the trial court, on a level approximating that of California's Superior Court.

⁸⁵ *In re Orans' Petition*, 257 N.Y.S. 2d. 839.

⁸⁶ Article III, Section 5, New York State Constitution.

asserted that partisan gerrymander is prohibited in New York by the language of Article III, Sections 4 and 5, of the state constitution.

On April 14, 1965, the New York Court of Appeals affirmed the decision of the lower court.⁸⁷ The Court of Appeals declared: "We hold to be in full effect the flat, positive and unmistakable command of the state constitution that there be 150 members of the State Assembly."⁸⁸ Since each of the four plans violates that command, each plan and all five statutes⁸⁹ are invalid. It follows that it is up to the legislature now to enact a new districting-apportionment statute. As soon as reasonably possible thereafter, a constitutional convention should be called into being."

Taking note of the Federal District Court's emphasis in its order of February 16, 1965,⁹⁰ that New York constitutional apportionment provisions are invalid only if in "unavoidable conflict" with decisions of the Supreme Court and the lower federal courts, the New York Court of Appeals found inescapable the conclusion that "nothing in the federal decisions abolishes the 150-member provision of our state constitution." That the legislature is bound to follow that mandate of the New York Constitution was clearly stated by the Court of Appeals: "No one doubts that, absent 'unavoidable conflict' with federal constitution[al] law . . . our Article III as enacted by the people of New York State not only subsists but is controlling on the legislature in passing any reapportionment redistricting laws." This theme was restated in a sharper key in a concurring opinion which berated as "revolutionary" the notion that New York could "derive a power over the reconstruction of its own government from the intimations of the judicial branch of the Federal Government," as had been suggested by the defendant state officials.

In the light of the state court litigation, the federal court had extended to May 5, 1965, the deadline by which the New York Legislature would have to adopt a valid reapportionment plan. On May 5, the legislature had not complied with that federal court order, and it was not until that date that the reorganized Joint Legislative Reapportionment Committee unveiled its new proposal. The initial reaction to that proposal was a negative one, and it has drawn sharp criticism from both political parties and from several ethnic groups.

On May 10, 1965, the Federal District Court reconvened to review the New York situation. In view of the imminence of state legislative elections this year, the court had to choose from among four possible courses of action: that the court devise its own plan of reapportionment; that it reassert its approval of Plan A, notwithstanding the invalidation of that plan by the state courts; that this year's elections be allowed to be conducted under the apportionment plan invalidated by the Supreme Court last summer; or that additional time be granted to the legislature to enact a valid plan.

The federal court, ruling from the bench, reasserted its acceptance of Plan A, even though that plan had been voided by the state courts, and ordered that the 1965 legislative election be based thereon. Whether this latest court action will go unchallenged is an open question. A request to the state courts to enjoin the holding of the election under that state-

⁸⁸ Article III, Section 2, New York State Constitution.

⁸⁹ Footnote 76, *supra*.

⁹⁰ Footnote 83, *supra*.

court-invalidated plan could be forthcoming. The legislature, in the short time remaining before adjournment, could enact one or more new plans. Appeal from the federal court's new ruling could be pursued to the Supreme Court.

Quite obviously, some 11 months after the Supreme Court's landmark decisions, the reapportionment picture in New York is one of turmoil. There appears no immediate resolution of the existing conflicts, and when that point of resolve is reached, ugly scars may be left on the body of federal-state relations.

Nor is the foregoing trilogy the extent of federal-state court problems involving state constitutional apportionment provisions. A storm of federal-state court conflict is apparently brewing in Arkansas, where the federal district court, which had before it a challenge of the state constitutional provisions regarding legislative apportionment, refused to defer judgment to the state courts, where similar litigation was pending, commenting (cavalierly, it would seem) that no "useful purpose would be served" thereby.⁹¹ The federal court proceeded to hold invalid the challenged provisions of the Arkansas Constitution, then noted that in so ruling it had raised "serious questions of state constitutional law which, if answered ultimately, must be answered by the supreme court of Arkansas." Therefore the federal court determined "to go no further at this time than to declare the existing apportionment scheme unconstitutional, leaving it to the state, including the judicial branch of its government, to bring about a valid reapportionment as best it can."

Patently, the Arkansas scheme of legislative apportionment fails to measure up to the "substantially equal population" principle of districting decreed by the Supreme Court in the Apportionment Cases.⁹² A 1956 amendment to the state constitution had the effect of "freezing" the then-existing Senate districts, which were based on the state's population as recorded by the 1950 decennial federal census. Arkansas has experienced a total population decline since 1950, and this, combined with a significant shift of people from rural areas to urban centers, results in a substantial imbalance among present Senate district populations. The 1956 amendment to the Arkansas constitution also set the size of the lower house at 100 members, permanently allocating one seat to each of the state's 75 counties and leaving only 25 "free" seats to be distributed among the most populous counties after each federal census.⁹³

Nonetheless, by pre-empting the decisional field, the federal court, as it finally acknowledged, created "serious questions of state constitutional law" which the state courts presumably will now have to resolve. Scant apparent purpose was served by the federal court's determination to be first at the finish line, and in view of the discordant federal-state relationship existent in Arkansas in recent years, it seems that the federal court's anti-abstention attitude will do little to improve that situation. As of the writing of this report, no Arkansas state court decision had been reported in this matter.

Contrast the Arkansas decision with the caution and restraint exercised by the Federal District Court sitting in Missouri, which was asked to invalidate a 1961 state law (not a state constitutional provision) creating United States House of Representatives districts in Missouri.⁹⁴ The same

⁹¹ *Yancey v. Faubus*, 238 F. Supp. 290.

⁹² Footnote 1, *supra*.

⁹³ *Yancey v. Faubus*, footnote 91, *supra*.

⁹⁴ *Preisler v. Secretary of State of Missouri*, 238 F. Supp. 187.

plaintiffs had earlier brought a similar action in the state courts, and the Missouri Supreme Court held the statute was constitutional.⁹⁵ Instead of seeking United States Supreme Court review of that judgment, plaintiffs brought a parallel suit in the lower federal court.

"Thus this three-judge Federal District Court is placed in the judicially-unavoidable role of reviewing a decision of the highest court of the State of Missouri without previous review thereof by the Supreme Court of the United States." After noting that the disparity in population among Congressional districts in Missouri "is presumptive malapportionment," the district court deferred its final decision on the issue and retained jurisdiction in order to afford the Missouri Legislature an opportunity to reexamine the state's Congressional districting, and the federal court assumed the legislature will do so without being so ordered.

The district court asserted: "The federal courts are disinclined to rule on matters peculiarly and primarily of state concern. A healthy respect for the division of powers between the central government and the states is conducive to harmonious and effective government on all levels. We must have a scrupulous regard for the rightful independence of state governments, and should refrain from acting where proper recourse may be had to a branch or tribunal of the state government."⁹⁶

We have recounted somewhat expansively the litigation concerning the foregoing five states in an effort to demonstrate the pervasiveness of the problem of literally being bound to serve two masters: the federal court carrying out the edict of the U.S. Supreme Court in ordering reapportionment on the basis of substantially equally populated districts, on the one hand; and the legislative apportionment mandates of the state constitution, adopted by and evidencing the will of the people of the state, and diverse in qualitative and quantitative requirements, on the other hand.

Mindful of this whipsawing dilemma, we elected to approach the mechanics of redistricting with a cautious regard for the pertinent provisions of the California Constitution.⁹⁷ We deemed it wise to attempt to abridge those state constitutional directives as slightly as possible. Yet, we are fully aware that abridgment to some degree is a necessity, and this becomes a precursor of possible (or more likely, probable) litigation in the California courts, challenging the plan of reapportionment on the basis of infringement of the provisions of the state constitution.

To obviate any such challenge after a plan of reapportionment is dutifully fashioned and approved by the federal court, we determined that the most efficacious course would be to initiate action now to obtain an interpretive ruling by the California Courts on the question of validity of the relevant provisions of the state constitution in the light of the federal court's reapportionment order of December 3, 1964. To that end, suit for declaratory relief was filed in the Superior Court in Sacramento on April 21, 1965, by the Senate and six of its members.⁹⁸

In praying for an interpretive decision, the Senate's pleading in that suit points out: "Until it is authoritatively and finally determined by the appropriate courts of the State of California which, if any, of said provisions of the Constitution of the State of California relating to the composition of and election of members of the said Senate are independent

⁹⁵ *Preisler v. Hearn*, 362 S.W. 2d 552.

⁹⁶ *Preisler v. Secretary of State of Missouri*, footnote 94, *supra*, citing *Magraw v. Donovan*, 163 F. Supp. 187.

⁹⁷ Appendix "B", *infra*.

⁹⁸ *McAtter, et. al. v. Silver*, Sacramento County Superior Court No. 158464.

of and severable from the others, and which of them, if any, may be ignored, disregarded or violated by the Legislature in devising and adopting any plan of redistricting or reapportionment of the said Senate, it is impracticable and virtually impossible to devise, agree upon or enact any plan redistricting or reapportioning the said Senate."

Hearing on defendant's motion to dismiss, which was treated as a general demurrer, resulted in a judgment sustaining the demurrer without leave to amend, thus being tantamount to a dismissal. The Senate is considering whether to file an appeal.

Moreover, we believe that the Federal District Court, as a sound utilization of its equity powers, should be willing to grant a stay of its July 1, 1965, deadline, if necessary, to permit the state court litigation to be completed. Otherwise, the federal court's order could have the effect of requiring the California Legislature to perform an idle act, which is a result at variance with one of the fundamental equitable maxims.

It is our view that, ultimately the need will be for amendment of the relevant sections of the California Constitution.⁹⁹ The fundamental provisions governing legislative apportionment in this state historically and traditionally have been part of our constitution. Once the California courts have construed the existing state constitutional features in the light of the federal court order (and assuming *arguendo* that said order is undisturbed by the U.S. Supreme Court) early consideration should be given to amendment to comport with those court rulings. Conclusion of the present reapportionment project will endure at most only until the 1971 Session of the Legislature, when apportionment will be required to be adjusted on the basis of the 1970 decennial federal census. By that time, at least, the California Constitution should be redrawn so as to facilitate a reapportionment that will be beyond the reach of the present dilemma of conflict.

We also voice our support for an amendment to the U.S. Constitution that would permit one house of a bicameral state legislature to be apportioned on a basis other than strict population, provided such proposition be approved by the state electorate. Members of the California Senate have appeared before Senator Bayh's Subcommittee of the U.S. Senate Judiciary Committee to urge approval of such an amendment, and appearances will also be made before the Judiciary Committee of the House of Representatives once hearings are begun by that body. A number of proposed amendments have been introduced at the present session of Congress, encompassing various approaches to temper the doctrine established by the Supreme Court in the Apportionment Cases.¹⁰⁰ We acknowledge that the specifics of some of those proposals may be in need of amelioration, yet we believe the problem of finding suitable contours, within which the right of choice by the people can be preserved, is not an insurmountable one.

Our support of such a proposed amendment should not be misconstrued as a self-serving effort to perpetuate our careers as legislators. We have no vested right to our offices, or should we have. We are principled in our support by our adherence to the proposition that the people of a state are entitled to some voice in determining the form the legislative branch of their government is to take, and we submit that this is a basic right co-equal with the right to cast an equally-weighted vote in state legislative

⁹⁹ Appendix "B", *infra*.

¹⁰⁰ Footnote 1, *supra*.

elections. It is our belief that such a right inescapably exists in a republican form of government, as was guaranteed to the states by our Founding Fathers in our original federal constitution.¹⁰¹ Regrettably, the Supreme Court seems to have neglected to consider that Guaranty Clause in attempting to reduce state government to a matter of simple arithmetic in its decisions in the Apportionment Cases.¹⁰² We believe there is great and enduring truth in the words written by Madison many years ago, that it is of the essence of a republican form of government that it "derives all its powers . . . from the great body of the people."¹⁰³

In reviewing the decisions by the Court in the paramount cases of *Baker v. Carr*¹⁰⁴ and *Reynolds v. Sims*¹⁰⁵ we wonder if the emphasis accorded by the Court upon the evil of malapportionment was not misplaced. In neither of those cases was wilful malfeasance the root from which the suits grew. Instead, it was an unrelenting course of non-feasance from which these suits stemmed. At the bottom of both cases was non-reapportionment, and if malapportionment existed, it followed from apathy of the legislature, rather than from concerted legislative action to cause such a result. Both the Tennessee (*Baker v. Carr*) and the Alabama (*Reynolds v. Sims*) state constitutions required reapportionment after each decennial federal census. But neither state had reapportioned its legislature since 1901.¹⁰⁶ It would seem that the imperative ingredient to be added to any proposed federal constitutional amendment is the requirement for periodic re-examination of a state's apportionment scheme, particularly as to the one house of the legislature which the amendment would implicitly demand be apportioned on a population basis.

Our support of a federal constitutional amendment that would be tantamount to a reversal of the Court's decisions in the Apportionment Cases is an indication of respectful dissent, and not of raging disloyalty. And we submit that there is ample historical precedent for such a method of reversal by the legislative branches of the central and state governments.¹⁰⁷ As has been noted by Burnham Enersen, past president of The State Bar of California, no less than three times during this nation's history has the Constitution been amended to nullify the effect of a Supreme Court ruling.¹⁰⁸ The 11th Amendment reversed a decision by the Court that a state could be sued by a citizen of another state.¹⁰⁹ The 14th Amendment itself produced a reversal of the Court's holding that slaves and their descendants could not be U.S. citizens.¹¹⁰ And the 16th Amendment reversed the Court's decision that the 1894 federal income tax law was unconstitutional.¹¹¹

We view a federal constitutional amendment as outlined above as the means of restoring the sound democratic principle of affording the people

¹⁰¹ Article IV, Section 4: "The United States shall guarantee to every State in this Union a republican form of government. . . ."

¹⁰⁶ It is true the Alabama Legislature voted both a proposed constitutional amendment and a standby statute to reapportion both houses, but such legislative action occurred only after suit had been filed in federal court, *Reynolds v. Sims*, footnote 105, supra.

¹⁰⁷ Article V of the U.S. Constitution provides that that body of fundamental law may be amended by Congress, by two-thirds vote of both houses, proposing an amendment to the states, and upon ratification thereof by the legislatures of three-fourths of the states or by conventions in three-fourths of the states. Amendments may also be initiated by the legislatures of two-thirds of the states calling for a convention for such purpose, and any amendment proposed thereby would have to be ratified the same as an amendment proposed by Congress.

a choice in forming the type of representative state government under which they are to live and be governed. It is our incessant hope that our sister states and the members of Congress will share that view.

2. Consideration of Other Constitutionally-Protected Rights. It appears axiomatic that the umbrella of federal constitutional protection of numerous individual rights was not removed by the Supreme Court's establishment in the Apportionment Cases¹¹² of the right to cast an equally-weighted vote in state legislative elections. Too numerous to catalog in this report are the myriad rights decreed by the Court to be under that protective cloak. The Constitution is replete with broad bases of protection against the wide sweep of so-called "state action": the Privileges and Immunities Clause of the 14th Amendment; the Due Process Clause of the 14th Amendment; the Equal Protection Clause of the 14th Amendment; the racial voting rights under the 15th Amendment; and the equal suffrage voting rights under the 19th Amendment, to cite the major areas.

A cyclopedic work would be required to categorize the specifics under each of those broad headings. For the purposes of our project, attention was focused on the mandates prohibiting discrimination on account of race, color, national origin, religion, creed, economic status, or sex. We deemed it essential in fashioning any reapportionment plan that the scheme developed not transgress any of these listed rights. A plan of reapportionment which creates districts of substantially equal population, but which appears to be discriminatory on one or more of the foregoing bases would almost certainly be challenged in the courts. To be sure, we cannot foreclose the possibility of suit being filed, but we can draft our plan so as to be safe from override as the result of any such challenge. It is this latter course that we determined to follow.

To this end, this Subcommittee and the Special Standing Committee held hearings in Sacramento on March 5 and March 22, 1965, to hear testimony from residents of Los Angeles County and the counties of the greater San Francisco Bay Area as to suggested considerations that should be given those factors in creating districts in their locales. Interestingly, the most often suggested consideration was that districting should recognize "communities of interest." There was general agreement that partisan politics should not be considered in district formation. Negro leaders made a strong appeal for consideration that would permit the possible election of one or more members of their race under the reapportionment plan.

The Subcommittee's statisticians and the staff of Senator Thomas M. Rees studied in detail the patterns of various ethnic residencies in counties that would be entitled to two or more senators under any reapportionment scheme. A unique situation concerning concentration of Negro residency was found to exist in Los Angeles County. A survey of U.S. Census Bureau census tract data compiled in the 1960 decennial enumeration, revealed that 82% of the total number of Negro residents in Los Angeles County were concentrated in 160 of the 1304 census tracts in the county. The existence of that core area presents a number of possible approaches in districting. One course would be the drawing of boundaries so as to make that core area a district of its own. Although this would make for a somewhat underpopulated district when the one-person, one-vote principle and the maximum population variance ratio are tested state-

¹¹² Footnote 1, *supra*.

wide, it would assure in large measure the election of a member of that racial group. The approach to be avoided is one of fragmenting that core area and placing its residents into such a number of integrated districts that this ethnic group would be a sharply minor fractional part of the total population of each of those integrated districts. An approach of this nature would seem constitutionally suspect, at least, as an impermissible dilution and debasement of the vote of that ethnic group.¹¹³

Although we are mindful of the careful consideration that must be accorded ethnic interests in fashioning districts, the practical application of such consideration poses a real difficulty in attempting to create districts of substantially equal population. The Subcommittee's statisticians found it apparent that any attempt to begin districting in the middle of any county to maximize (or even to minimize) the voting strength of any minority, results in serious population variances in the overall plan of districting throughout the state. We were compelled to conclude that each and every applicable constitutional right cannot be completely protected if reapportionment is to produce districts of substantially equal population. The approach with the most merit seems to be one that will minimize any infringement of the rights we have cited, even though such a course will culminate in an apportionment something in disparity from districts of substantially equal population.

We submit that the Supreme Court has indicated the propriety of such an approach, in its instructions to the lower courts that, "the proper judicial approach is to ascertain whether, under the particular circumstances existing in the individual state whose legislative apportionment is at issue, there has been a faithful adherence to a plan of population-based representation, with such minor deviations only as may occur in recognizing certain factors that are free from any taint of arbitrariness or discrimination."¹¹⁴

Throughout our reapportionment project, we have exercised care to make certain that any plan will be "free from any taint of . . . discrimination." We are aware that Michigan's reapportionment scheme is being challenged in federal court as allegedly discriminatory to Negro residents in parts of that state. Although it is certainly possible that suit may be filed attacking California's ultimate plan, we are determined that such plan will be one which the courts will rule to be non-discriminatory.¹¹⁵

3. Consideration of Partisan Political Factors. As Justice Frankfurter asserted, in warning in his dissent in *Baker v. Carr* that the fabric of legislative apportionment is made up of many threads that cannot be ripped out to reduce the cloth to a matter of mathematics, "And . . . in

¹¹³ Cf. *Gomillion v. Lightfoot*, 364 U.S. 339, holding prospectively invalid under the 15th Amendment an Alabama statute redefining the boundaries of the City of Tuskegee which had the alleged effect of removing from the city all but five of its 400 Negro voters while not removing a single white resident. The Court, through Justice Frankfurter, said that such allegation, if true, would establish that the Negroes had been fenced out of town so as to deprive them of their municipal vote.

¹¹⁴ *Roman v. Sincock*, 377 U.S. 695, at 710.

¹¹⁵ In addition to the informational deposits from publications and census tract data compiled by the Bureau of the Census, U.S. Department of Commerce, in the 1960 census, the following is a partial bibliography of reference material used by the Subcommittee's staff: *South Central Economic Planning Area: Demographic and Socio-Economic Analysis*, by the Research Department, Welfare Planning Council, Los Angeles Region, 1964; *Comparative Statistical Analysis of Population by Race for Metropolitan Counties, Los Angeles County*, by Los Angeles County Commission on Human Relations (based on U.S. Census Bureau reports), undated; *Population Estimate and Housing Inventory*, by City of Los Angeles Planning Commission Research Section, 1964; *Population by Tract and Race, City of Los Angeles*, by Los Angeles County Commission on Human Relations (based on 1960 U.S. Census Bureau final report), 1963; *Background for Planning* (in Los Angeles County), by Research Department, Welfare Planning Council, Los Angeles Region, 1963; *Negro Population Characteristics, Los Angeles County*, a map by Willbur McCann, economic consultant, published by Brewster Mapping Service, Los Angeles (based on 1960 U.S. Census Bureau reports), 1961. An even more detailed analysis of the ethnic, religious, and economic patterns of Los Angeles County's population was made by the staff of Senator Thomas M. Rees, who represents that county (see *infra*.)

every strand of this complicated, intricate web of values meet the contending forces of partisan politics.”¹¹⁶ As legislators, we can attest to the veracity of that assessment by the late justice. The problem encountered by this Subcommittee concerns the extent of consideration of partisan political factors that may be given in formulating a reapportionment plan. Again, we looked to the results of litigation involving reapportionment in other states.

We have cited the New York situation.¹¹⁷ The Michigan reapportionment enactment is being challenged in federal court as having produced an alleged partisan political gerrymander. In Delaware, after the U.S. Supreme Court invalidated the then-existing scheme of legislative apportionment,¹¹⁸ the Legislature in early July, 1964, enacted a plan of reapportionment. Plaintiffs in the original action challenged in federal court the new enactment, alleging the new scheme does not conform to the Supreme Court’s principle of substantially equally populated districts, and that the plan gerrymandered the City of Wilmington in favor of one political party so as to deny representation to another party.¹¹⁹

The three-judge federal court, after denying the motion of the state officials to dismiss, took evidence in two parts: first on the issue whether districts were substantially equal in population, and second on the issue of gerrymander. The court “assumed” this second issue is relevant under the Equal Protection Clause of the 14th Amendment and under the 15th Amendment.¹²⁰ Evidence on that issue was admitted by the court over objections of state officials; however, the court reserved its ruling on relevancy and admissibility until a later time. Eleven days were consumed in the taking of testimony and the introduction of numerous exhibits bearing on the two issues. Final arguments and briefs were made and filed with the court on September 14, 1964, at which time the judges noted the imminence of the November 3, 1964, election, pointing out that Delaware’s pre-election machinery was already in full gear. In view of the shortage of time and the voluminous exhibits which the court would have to examine and consider, the judges ruled only that the election could be held under the plan of apportionment produced by the new enactment, and that judgment would be rendered later on the two issues. As of this writing, no judgment had yet been reported.

The question whether the U.S. Constitution affords protection against a sheer partisan-political gerrymander is still an open one. There is, however, an implication in the Supreme Court’s decision in *Reynolds v. Sims*¹²¹ that such gerrymandering in an apportionment scheme may draw reproval by the Court. In setting out reasons why a state would be permitted to use political subdivisions as bases for legislative districts, the Court noted that, “indiscriminate districting without any regard for political subdivision or natural or historical boundary lines, may be little more than an open invitation to partisan gerrymandering.”¹²² Although that statement is dictum rather than part of the law of the case, it may be the precursor of the vista to which the Court will expand the ever-flexible wing of constitutional protection. Unless the comment was purely

¹¹⁶ 82 S. Ct., at 767-768; see footnote 42, *supra*.

¹¹⁷ See footnote 85, *supra*.

¹¹⁸ *Roman v. Sincoc*, 377 U.S. 695, and see footnote 1, *supra*.

¹²⁰ *Id.* at 618.

¹²¹ 377 U.S. 533, and see footnote 1, *supra*.

¹²² *Id.* at 578-579.

a gratuitous one, the Court may drive deeper into the thicket¹²³ if presented with a reapportionment case that is demonstrably an example of partisan gerrymandering.

By drawing upon history, tradition, and our state constitution, and utilizing county lines as the basic means of district demarcation, we believe the problem of gerrymander can be obviated in California's Senate reapportionment plan. It is only when we reach the point of districting within any county entitled to two or more senators that the possibility for gerrymander arises. In composing districts within counties, a system of adherence to city boundaries, insofar as possible, should avoid any gerrymander.

4. Consideration of Assembly Apportionment and Districting. In three of the six Apportionment Cases¹²⁴ the Supreme Court made reference to a possible balancing of minor deviations from a strict population basis between the districts from which representatives are elected to the two houses of a state legislature. In pointing out that its basic ruling that both houses of a state legislature must be apportioned substantially on a population basis was not intended to abolish bicameralism, the Court said that "apportionment in one house could be arranged so as to balance off minor inequities in the representation of certain areas in the other house."¹²⁵ In noting that a challenge had been made against Colorado's plan of Senate apportionment, but not against the Colorado House of Representatives, the Court asserted that, "in determining whether a good faith effort to establish districts substantially equal in population has been made, a court must necessarily consider a state's legislative apportionment scheme as a whole."¹²⁶

The Court further declared: "Only after an evaluation of an apportionment plan in its totality can a court determine whether there has been sufficient compliance with the requisites of the Equal Protection Clause. Deviations from a strict population basis, so long [as] rationally justifiable, may be utilized to balance a slight overrepresentation of a particular area in one house with a minor underrepresentation of that area in the other house. But, on the other hand, disparities from population-based representation, though minor, may be cumulative instead of offsetting where the same areas are disadvantaged in both houses of a state legislature, and may therefore render the apportionment scheme at least constitutionally suspect."¹²⁷

Although those statements must be considered as dicta, the Court made a similar assertion as part of its ruling in another case. In the Maryland apportionment litigation, all parties had apparently conceded before the lower courts that a recent apportionment of the House of Representatives was not being challenged. However, the Supreme Court would not accept that concession.

"Regardless of possible concessions made by the parties and the scope of the consideration of the courts below, in reviewing a state legislative apportionment case, this Court must of necessity consider the challenged scheme as a whole in determining whether the particular state's apportionment plan, in its entirety, meets federal constitutional requisites. It is simply impossible to decide upon the validity of the apportionment of

¹²³ See footnote 3, *supra*.

¹²⁴ *Feibush v. I.*, *supra*.

¹²⁵ *Reynolds v. Sims*, 377 U.S. at 577.

¹²⁶ *Lucas v. 44th General Assembly*, 377 U.S. at 735, fn. 27

¹²⁷ *Ibid*.

one house of a bicameral legislature in the abstract, without also evaluating the actual scheme of representation employed with respect to the other house. Rather the proper, and indeed indispensable, subject for judicial focus in a legislative apportionment controversy is the overall representation accorded to the state's voters, in both houses of a bicameral state legislature."¹²⁸

In essence, the Court thereby held that there must be consideration of the constitutional validity of a bicameral legislative apportionment scheme as a whole, and by the court's own motion if necessary. Therefore, we cannot be oblivious to the existing system of Assembly apportionment in our efforts to devise a plan of Senate reapportionment. We are mindful, of course, of the general requirement of the California Constitution that the Assembly be apportioned on the basis of population.¹²⁹ We are also aware that the Assembly was reapportioned by the legislature in 1961, on the basis of the 1960 decennial federal census, as our Constitution requires. As we played a part in the legislative process by which that reapportionment became law, we assume it complies with both the state and federal constitutions.

The relationship to existing Assembly districts of any plan of Senate reapportionment has been given careful consideration with regard to the aggregate legislative representation that would be accorded the residents of California. Although we may have been tempted to propose some adjustment in Assembly districting, we have not done so, for several reasons. Historically, Assembly reapportionment has been a subject to be dealt with by the Assembly in the first instance. Moreover, litigation is presently pending, seeking to invalidate the present Assembly apportionment scheme and to force reapportionment of that house.¹³⁰

If any of the pending suits result in judgments favoring the plaintiffs, Assembly reapportionment would be required, and balancing of representation between the two houses would be called for. Pending the outcome of the litigation challenging Assembly make-up, we have looked to existing apportionment of the lower house in our awareness of the Supreme Court's mandate that Senate districts as realigned must be compared with Assembly districts to avoid the compounding of overrepresentation or underrepresentation in the two houses as to any given area.

5. Consideration of U.S. House of Representatives Districting in California. We have studiously avoided any substantial consideration of Congressional districting in California in attempting to fashion a plan of Senate reapportionment. Our avoidance is based on several reasons. Under the provisions of Article IV, Section 27 of the California Constitution, Congressional districting is tied closely to Assembly districting, but not to Senate districting. Legislation is now pending before Congress to permit a variance of 15% upward or downward from the "ideal" population for House of Representatives districts in each state (i.e., the figure obtained by dividing the total population of the state by the number of House of Representatives seats allotted to that state).¹³¹ And although the Supreme Court has held that the principle of substantially equally populated districting applies to Congressional as well as legislative

¹²⁸ *Maryland Committee for Fair Representation v. Taves*, 377 U.S. at 673.

¹²⁹ Article IV, Section 6, California Constitution, see Appendix "B", *infra*.

¹³⁰ One such action was dismissed by a federal court in March, 1965, on the ground that the plaintiff could not show he resided in an Assembly district, the residents of which were underrepresented or discriminated against by the existing apportionment plan: *Silver v. Jordan*, D. C., S. D. California, unpublished.

¹³¹ H. R. 5505, 89th Congress, 1st Session, passed the House of Representatives on March 16, 1965, and now awaiting action by the U.S. Senate.

districts,¹³² the Court has also said that while consideration to political subdivisions will be recognized as justifying minor deviation in population in legislative districting, such exception to the basic standard does not hold true as to Congressional districting.¹³³ We submit that in view of the distinguishable factors concerning Congressional districting, we were warranted in eliminating consideration of such districting in our efforts to draft a plan of Senate reapportionment.

6. Considerations as to Districting in Counties Entitled to Two or More Senators. We have earlier cited some of the problems bearing on the riddle: to district or not to district in counties that will be accorded two or more members.¹³⁴ When our reapportionment project was in its infancy stage we determined that county lines should be recognized in forming districts. This conclusion appears in concert with the view expressed by the Supreme Court in *Reynolds v. Sims*,¹³⁵ as indicated above, and also comports with the mandate of Article IV, Section 6 of the California Constitution.¹³⁶ In reaching that conclusion we examined and then discarded the possibility of fractionalizing or fragmenting counties in designing districts (i.e., districts composed of an entire county or counties and part of an adjoining county or parts of adjoining counties; and districts composed of part of one county joined with part of an abutting county). In fact the first statewide districting map prepared by our staff featured such arrangements and produced only a *de minimus* population variance from the ideal among the districts. That proposal also produced almost a unanimous negative response from the members of the Senate. The primary objection voiced by an overwhelming majority of members was the plan's lack of recognition of county lines, which has been the historical, traditional, and state constitutional basis for demarcation in California.

We next turned our thoughts to construction of at least some flotalial districts. As defined by the Supreme Court, "the term 'flotalial district' is used to refer to a legislative district which includes within its boundaries several separate districts or political subdivisions which independently would not be entitled to additional representation but whose conglomerate population entitles the entire area to another seat in the particular legislative body being apportioned."¹³⁷ A hypothetical example would be four adjacent counties, each of which has a population that would entitle it to 1.25 members. By making each county a separate district, each would be allocated one member. But by combining the four into one flotalial district, five members would be awarded to such district on an at-large basis insofar as election and representation would be concerned.

The proposal of forming flotalial districts also encountered opposition from a majority of the Senators and was criticized as a radical departure from California's historical and constitutional scheme of Senate districting.

Once we had determined to build our plan on the basis of county lines as district boundaries, we found that some 14 counties each comprised a sufficient number of residents so as to justify being single-county, single-member districts. Of the remaining 44 counties, six were found to be heavily enough populated to justify being single-county districts entitled

¹³⁶ See Appendix "B" *infra*.

¹³⁷ *Davis v. Mann*, 377 U.S. at 686, fn. 2.

to two or more senators each. The remainder of the 38 counties, then, would have to be grouped into multi-county, single-member districts. In arranging groupings our foremost aim was to create districts that would each contain a population as near the "ideal" as possible. Notwithstanding our primary consideration of the principle of substantially equally populated districts, it became apparent that some significant variances would result.

Two factors militated against nice equality. One was our decision to abide by our state constitutional requirement that districts contain contiguous counties. To depart from the concept of contiguity would produce a veritable "crazy quilt," which in itself could render the plan at least constitutionally suspect if not unconstitutionally discriminatory.¹³⁸ The other factor was the according of some recognition to the concept of communities of interest. In correspondence received by members and in suggestions and recommendations advanced by witnesses before this Committee, there has been a decided preponderance in support of favorable consideration of communities of interest in creating districts. We have not been deaf to such suggestions. Thus, we have avoided combining counties whose interests, economies, and local problems needing state legislative assistance are heterogeneous.

Some 18 versions of complete Senate reapportionment were prepared by our staff before one was accorded approval by a majority of the members of the Senate. Even then, approval was not unanimous by the Senate as a whole or by the members of this Committee. The feature of that plan drawing the most criticism was its provision for at-large representation and election in counties entitled to two or more senators. Although such criticism was mild with respect to five of those six counties, as to the sixth—Los Angeles County—the reprobation was vigorous. However, it was not through arbitrariness or caprice that this at-large feature came about. The Committee and its staff gave studied consideration to various methods of allocating Senate representation within those counties. But the information gathered by and submitted to the Subcommittee did not enable us to reconcile the expressed desires of residents of those counties—and this was particularly true as to Los Angeles County—with the mechanical difficulties of fitting individual plans into an overall statewide scheme that would be acceptable to the courts. Frankly, and again this was particularly notable with respect to Los Angeles County, no general agreement was evidenced to the Subcommittee as to delineation of district boundaries within such counties.

That multi-member districts are permissible in an apportionment scheme which in its totality adheres to the dogma of substantial equality of population, is twice indicated by the Supreme Court in the leading case of *Reynolds v. Sims*.¹³⁹ "One body could be composed of single-member districts while the other could have at least some multi-member districts."¹⁴⁰ "Single-member districts may be the rule in one state, while another state might desire to achieve some flexibility by creating multi-member or floterial districts."¹⁴¹ And the Court in January, 1965, let stand a Georgia statute which provided for creation in counties entitled to two or more senators of districts merely for the purpose of residence

¹³⁸ See concurring opinions of Justice Clark in *Reynolds v. Sims*, 377 U.S. at 588, and in *Baker v. Carr*, 369 U.S. at 253-258.

¹³⁹ 377 U.S. 533.

¹⁴⁰ *Id.* at 576-577.

¹⁴¹ *Id.* at 579.

qualification of candidates, but which required at-large voting for all senators within such counties.¹⁴²

In a dictum in the Colorado case, the Supreme Court commented on the possible practical undesirability of at-large voting and representation in multi-member counties insofar as residents of such counties are concerned; however, the Court did not rule that such arrangement is constitutionally impermissible. "We do not intimate that apportionment schemes which provide for the at-large election of a number of legislators from a county or any political subdivision, are constitutionally defective. Rather, we merely point out that there are certain aspects of electing legislators at large from a county as a whole that might well make the adoption of such a scheme undesirable to many voters residing in multi-member counties."¹⁴³

That a good faith effort was made to construct districts within Los Angeles County is evidenced by the energy expended by Senator Rees and his staff. In the first days of the 1965 Session of the Legislature, letters requesting assistance were sent by Senator Rees to the mayors and city councilmen of the 76 cities in Los Angeles County, to the 31 assemblymen representing that county, to the county board of supervisors, to county political party chairmen, to chambers of commerce in the county, and to leaders of minority groups in the county. Through Los Angeles news media, requests were made for suggestions from the general public.

Some 48 constructive replies were received from individual cities in the county, responses were also forthcoming from many public officials, and a number of resolutions were dispatched by governmental and non-governmental bodies presenting detailed suggestions. At least 15 conferences were held with local governmental bodies and local officials. Meetings were had with the staffs of the planning departments of the City of Los Angeles, the County of Los Angeles, and the State Planning Office, to acquire information regarding population distribution, land use and population density, growth trends, and ethnic distribution within the county. Assistance was rendered by Dr. Dwain Marvick of U.C.L.A. and Dr. Leroy Hardy of Long Beach State College, in setting up a program of computer analysis to minimize the possibility of ethnic and partisan political gerrymandering, and to identify communities of interest.¹⁴⁴

In addition to the information above mentioned, data was compiled on such subjects as: highway and freeway construction (existing and projected); distribution of park and recreation facilities; agricultural land use and interests; natural boundaries and topographical features; political boundaries now existing (Congressional, Assembly, supervisorial, and councilmanic districts); and boundaries of political subdivisions (cities, school districts, and a multitude of types of service districts). From this mountain of data, the various factors were keyed onto maps, and then began the project of delineating possible Senate district lines within the county. Consultations were held on at least 25 occasions with Assembly members representing Los Angeles County. No less than 30 maps were prepared, each containing proposals for districting within the county.

As Senator Rees pointed out to the Special Standing Committee at its April 26, 1965, hearing, each of the numerous relevant factors had to be

¹⁴² *Tackett v. Dorsey*, 379 U.S. 433.

¹⁴³ *Lucas v. 44th General Assembly*, 377 U.S. at 731, fn. 21.

¹⁴⁴ Dr. Hardy was a consultant to the Assembly during its reapportionment project following the 1960 federal census.

weighed separately and then be interrelated and woven into the whole picture of county sub-districting. District configurations were difficult to form because, in part, of competing desires of various groups within the county. Of the 76 cities in the county, 75 indicated opposition to fragmentation of cities in drawing Senate district boundary lines.

On the other hand, the Senator reported an overwhelming opposition by his constituency to at-large voting and representation. Such a plan would disfavor minorities. Campaigning for election on a county-wide basis involves huge expenses amounting to \$1 million or more, which would eliminate all but the wealthiest of candidates or those with moneyed backers.

Finally, on May 6, 1965, after the bill carrying the proposed Senate reapportionment plan had cleared the Special Standing Committee, the Senate by vote of 32 to 3 adopted amendments to that measure, proposed by Senator Rees, to create separate districts within Los Angeles County.¹⁴⁵ As finally developed, those districts are based primarily on substantial equality of population, but with recognition of communities of interest within the county, and with the ever-present care to minimize infringement upon constitutionally-protected right.

¹⁴⁵ Senate Daily Journal, May 6, 1965, p. 2063; and see Senate Bill No. 6, as amended in Senate on said date.

V. REAPPORTIONMENT TODAY IN CALIFORNIA AND OUR SISTER STATES

The California State Senate has passed and sent to the Assembly the measure containing the plan of Senate reapportionment.¹⁴⁶ The reception given the plan by that house will soon be known. We trust the Assembly will take note of the honest and good faith effort expended by the Senate in producing this proposal, and that the members of that body will put aside personal desires and ambitions, as we have had to do, and will honor that plan with a strong vote of approval.

Although the plan is not without its imperfections, we hold the sincere conviction that it will merit the approval of the court. Our points of justification will be reported at a later date. It is not gamesmanship in which we are involved, but government, and the stakes are high. For it has come to pass that the most powerful force in many state governments today is the federal judiciary. That is true in California, as it is the federal court which will ultimately determine the mode of representative state government which California is to have. It is no idle threat that the federal court will devise a plan of its own making if this legislature fails to act.

Earlier this year, the Montana Legislature adjourned after failing to enact a reapportionment plan. The Nevada Legislature failed to act on reapportionment in advance of court-ordered redistricting, which appears imminent. The Maryland Legislature failed to enact a new system of apportionment to replace the scheme invalidated by the Supreme Court.¹⁴⁷ The voters in Ohio have turned down a reapportionment proposal in the form of a state constitutional amendment. The New York Legislature failed to meet the May 5, 1965, federal court deadline to enact a reapportionment plan, the scheme adopted at a special legislative session having been invalidated by the state's highest court.¹⁴⁸ In some, if not all, of these states, court action will fill the void left by the legislature. We must not allow a like situation to occur in California. We owe those, who we as legislators represent, no less.

By way of final comment, we believe one cannot help but note the turmoil in state governments which today exists as the outgrowth of the Apportionment Cases.¹⁴⁹ We have recounted herein only a few examples. We again assert that if there is to remain any true vitality in the Guaranty Clause of the United States Constitution,¹⁵⁰ the people of the states must have a right of choice in the form of representative state government under which they are to live. We insist that it is essential in a dynamic democracy that the people of the several states have that right of decision, to be exercised by them according to the very principle enunciated by the Court: one-person, one-vote. It behooves the Congress to restore that right by submitting to the states an amendment to the Constitution.

¹⁴⁹ Footnote 1, supra.

¹⁵⁰ Article IV, Section 4, see footnote 101, supra.

Taken in their proper perspective, the Apportionment Cases are not instances of discrimination practiced upon a minority, but rather they indicate that it is a *majority* of residents and voters in the subject states (i.e., those whose homesites are in the more populous areas) whose right to cast an equally-weighted vote is diluted and debased under a scheme stigmatized as malapportionment. Those cases cannot with legal accuracy be equated with decisions and principles of constitutional law regarding the deprivation of rights of minorities.

We submit that in California and a number of other states the circumstances categorized by the courts as malapportionment exists because the majority have chosen to confer their rights upon a minority of the residents and voters. We believe that this is a fundamental example of the concept of "majority rule" and is fully in concert with the spirit of our Constitution. We feel it is the duty of the Congress to initiate the requisite action to insure that this vital democratic principle becomes an explicit part of our Constitution.

TABLE I *

State	Legislative body	Maximum population variance ratio	Minimum percentage to elect majority
ALABAMA ¹	House	16 to 1	25.7
	Senate	41 to 1	25.1
NEW YORK ²	House	12.7 to 1	37.5

* Figures cited herein are taken from decisions of the courts unless otherwise noted.

¹ This apportionment scheme, as well as two other proposals, was invalidated by the U.S. Supreme Court, *Reynolds v. Sims*, 377 U.S. 533.

² These would have been the mathematical factors under New York's apportionment formula on the basis of the 1960 census. At the time suit was brought, New York had not yet reapportioned its legislature on the basis of the 1960 census. The New York formula which would have produced these factors was invalidated by the Supreme Court, *WMCA v. Lomenzo*, 377 U.S. 635.

³ This apportionment scheme was invalidated by the Supreme Court, *Maryland Committee for Fair Representation v. Tawes*, 377 U.S. 656.

⁴ This apportionment scheme was invalidated by the Supreme Court, *Davis v. Mann*, 377 U.S. 678.

⁵ This apportionment scheme was invalidated by the Supreme Court, *Roman v. Sincok*, 377 U.S. 695.

⁶ Colorado's scheme of State Senate apportionment was invalidated by the Supreme Court, *Lucas v. 44th General Assembly*, 377 U.S. 713. Apportionment of the Colorado House of Representatives was not in issue in that litigation. The Supreme Court noted that the Colorado House was "arguably apportioned" so as to comport with the requirements of the 14th Amendment.

⁷ These figures are based on data presented in 22 Congressional Quarterly Weekly Report 1219. This apportionment scheme was invalidated by the Federal District Court, and was affirmed by per curiam order of the Supreme Court, *Pinney v. Butterworth*, 378 U.S. 564.

⁸ These figures are based on data presented in 22 Congressional Quarterly Weekly Report 1219. This apportionment scheme was invalidated by the Supreme Court, *Swann v. Adams*, 378 U.S. 553.

⁹ These figures are based on data presented in 22 Congressional Quarterly Weekly Report 1219. This apportionment scheme was invalidated by the Supreme Court, *Hearne v. Smylie*, 378 U.S. 563.

¹⁰ These figures are based on data presented in 22 Congressional Quarterly Weekly Report 1219. This apportionment scheme was invalidated by the Supreme Court, *Germano v. Kerner*, 378 U.S. 560.

¹¹ This apportionment scheme was invalidated by the Supreme Court, *Hill v. Davis*, 378 U.S. 565. The appeal to the Supreme Court did not include a challenge of a temporary plan enacted by the Iowa Legislature and approved by the Federal District Court as an interim arrangement to be used for the 1964 election. Under that interim plan the maximum variance figures are 2.28 to 1 for House districts and 3.2 to 1 for Senate districts; the minimum percentage of the total population that can elect a House majority is 48.3%, and that can elect a Senate majority is 38.9%. However, that interim plan was challenged after the 1964 election, and the Federal District Court ruled that the plan is prospectively invalid and is inoperative for all future Iowa legislative elections, *Davis v. Cameron*, 238 F. Supp. 462. The District Court held the disparities in Iowa's Senate apportionment are too great to be allowed to stand; but the court declined to pass on the question whether the House plan is constitutionally valid, noting that "It is arguably close." Nonetheless, the court ruled that the Senate and House plans, which were enacted in one statute, are not severable, and the entire measure must fail because of invalidity of that part containing the Senate plan.

¹² These figures are based on data presented in 22 Congressional Quarterly Weekly Report 1219, and as estimated in *The Politics of Reapportionment* by Lamb, p. 290. This apportionment scheme was invalidated by the Supreme Court, *Marshall v. Hare*, 378 U.S. 561, and *Beadle v. Scholle*, 377 U.S. 990.

¹³ These figures are based on data presented in 22 Congressional Quarterly Weekly Report 1219. This apportionment scheme was invalidated by the Supreme Court, *Nolan v. Rhodes*, 378 U.S. 556.

¹⁴ These figures are based on data presented in 22 Congressional Quarterly Weekly Report 1219. This apportionment scheme was invalidated by the Federal District Court, and was affirmed by per curiam order of the Supreme Court, *Williams v. Moss*, 378 U.S. 558. The District Court noted that under the plan, the minimum percentage figure would vary every two years during this decade, the figures for House majorities ranging from 28.5% to 33.5%. The House figure shown in the Table is that for the first election.

¹⁵ This apportionment scheme was invalidated by the Supreme Court, *Meyers v. Thigpen*, 378 U.S. 554. In February, 1965, the Washington Legislature enacted a new plan, which was approved by the Federal District Court on March 10, 1965, and the court dismissed the litigation, *Thigpen v. Kramer* (unpublished). Under the plan approved by the District Court, the maximum variance figures are 1.61 to 1 for House districts and 1.45 to 1 for Senate districts; the minimum percentage of the Washington population that can elect a House majority is 47.7% and that can elect a Senate majority is 47.2%.

¹⁶ This apportionment scheme was developed and adopted by the Wisconsin State Supreme Court, *State ex rel. Reynolds v. Zimmerman*, 128 N. W. 2d 16, and has not been challenged in the federal courts. The Wisconsin Constitution requires apportionment of Senate and Assembly districts on the basis of population, but that recognition be given to county lines in districting. The Wisconsin Legislature was unable to develop a state-constitutionally valid reapportionment following the 1960 census, and the State Supreme Court on May 14, 1964, handed down its decision in which

it created this plan. Under the plan and the state constitution, Senate districts are composed of whole Assembly districts.

¹⁷ This apportionment scheme was ruled invalid by the Federal District Court, *Toombs v. Fortson*, _____ F. Supp. _____, April 1, 1965. The court asserted that a uniform formula should be developed for the testing of state apportionment plans, notwithstanding the Supreme Court's admonition to the contrary in *Roman v. Sincock*, 377 U.S. 695. The District Court elected to disregard any consideration of the maximum population variance ratio and the minimum percentage of the state's population that can elect a majority of the legislative body, and adopted instead a "15% rule." Such rule is the proposed measuring stick for allowable variances in population of U.S. House of Representatives districts in the Celler Bill presently pending in Congress. Under this rule, a plan is presumably valid if every district has a population which does not vary by more than 15% above or below the "ideal" population for each district. The "ideal" is determined by dividing the number of seats in the legislative body into the total state population. The District Court found that of 141 House districts, 73 were within the 15% tolerance and 68 districts deviated from the "ideal" by more than 15%. Of 54 Senate districts, the court found 48 were within the 15% tolerance and 6 deviated from the "ideal" by more than 15%. Although the District Court invalidated the scheme as a permanent apportionment plan, it allowed the scheme to stand as an interim arrangement and the court allowed the Georgia Legislature until May 1, 1968, to formulate a constitutionally-valid plan.

APPENDIX A

IN THE UNITED STATES DISTRICT COURT
SOUTHERN DISTRICT OF CALIFORNIA
CENTRAL DIVISION

PHILL SILVER, as a citizen of the
United States and of the State of
California, etc.,

Plaintiff,

vs.

FRANK M. JORDAN, in his official
capacity as Secretary of State of
California, et al.,

Defendants.

No. 62-953 MC

PER CURIAM ORDER

Since the historic pronouncement by the Supreme Court of the United States in *Baker v. Carr*, 369 U.S. 186 (decided March 26, 1962), the federal courts of the United States have been literally flooded with suits by voters, alleging either "the debasement" of their vote by state legislative action, or by the failure or alleged inability of the state legislature to act pursuant to constitutional requirements, which in either event have resulted in "invidious discrimination" against the litigant, and others in his class, which amounts to or results in a violation of the equal protection clause of the Fourteenth Amendment to the United States Constitution. This is one of those cases.

Plaintiff, Phill Silver, filed this class action on July 16, 1962, as a citizen of the United States and of California, and as an elector and registered voter of Los Angeles County, on his own behalf and on behalf of all other citizens, electors, and registered voters of the State of California, similarly situated. The defendants are sued in their representative capacities as State officials, performing duties in respect to State elections.

The complaint alleged a deprivation of rights under the California Constitution and under the Equal Protection Clause of the Fourteenth Amendment. It is asserted, and we hold, that this court has jurisdiction under the Civil Rights Act, 42 U.S.C. §§ 1983, 1988, and 28 U.S.C. § 1343(3). Relief is prayed for under 28 U.S.C. §§ 2201-2202.

Since relief was sought under the Federal Declaratory Judgment Act (28 U.S.C. §§ 2201-2202), a three-judge District Court was convened. The plaintiff prayed for injunctive relief to enjoin the 1962 General Election as it applied to the election of State Senators. Plaintiff alleged that the present apportionment of the California State Senate (Cal. Const., Art. IV, Sec. 6, as amended in 1926) deprived him and all others similarly situated of due process of law and the equal protection of the law. Furthermore, he alleged that his right to equal suffrage in a free and equal

election had been deprived in violation of both the California Constitution and the Fourteenth Amendment of the U.S. Constitution.

On August 30, 1962, this court handed down its opinion and order (Civil Action No. 62-953 MC) holding that it had jurisdiction, *Baker v. Carr*, *supra* at 204-208, and that the subject matter of this suit was justiciable, not a non-justiciable political question regarding the relationship between the judiciary and its co-ordinate branches of the Federal Government. *Baker v. Carr*, *supra* at 208-236, especially at 217. All of defendants' motions to dismiss were denied. However, this court, while retaining jurisdiction, denied any injunctive relief at that time, as there was then available to the plaintiff a State remedy, namely, the Initiative Measure on the 1962 General Election Ballot, Proposition 23, which, if passed, would have reapportioned the State Senate.

II

The California Constitution of 1849 and the revised Constitution of 1879 provided for representation on the basis of population in both houses of the Legislature (*Cal. Const.* 1849, Art. IV, §§ 28-29; *Cal. Const.* 1879, Art. IV, § 6) and vested the entire lawmaking power of the State in that body. (*Cal. Const.* 1849, Art. IV, § 29; *Cal. Const.* 1879, Art. IV, § 6).

In response to Governor Hiram Johnson's call to allow the people the right to check any abuse of power by the Legislature, the Legislature in 1911 submitted to the voters of the state a constitutional amendment, which was passed by the electorate, reserving to them the right to initiate and enact laws, which is the initiative, and to prevent laws enacted from becoming effective, which is the referendum. (*Cal. Const.* Art. IV, § 1; Hichborn, *Story of the California Legislature of 1911*, p. 93).

After the 1920 decennial census, the 1921, 1923 and 1925 sessions of the State Legislature failed to enact any reapportionment scheme, as demanded by the U.S. Constitution, Art. I, § 2. The people of the State responded to the inaction of the legislators and on the 1926 election ballot they qualified two proposals by initiative for the consideration of the electorate. Proposition 20 would have retained the apportionment of the two houses as they then existed, namely, on a population basis; whereas, Proposition 28 presented the so-called "Federal Plan" to the electorate, which would retain the Assembly's apportionment on a population basis, but the State Senate was to be apportioned largely on a geographic basis. Proposition 28 was based on existing representation in the Congress of the United States. Proposition 28 was adopted, and Proposition 20 was rejected. Thus, since 1926, California has retained this "Federal Plan" in its apportionment of seats in the California Legislature. It is this amendment to Art. IV, § 6 of the California Constitution, which the plaintiff challenges here. Since the adoption of Proposition 28 in 1926, the State Legislature has never failed to comply with the Federal requirement of apportioning its seats every ten years in accordance with the Federal Census.

Presently, the State of California is divided into forty senatorial districts. Furthermore, no county is to have more than one representative in the Senate, and no Senator is to represent more than three counties. (*Cal. Const.* Art. IV, § 6, *Cal. Elections Code* § 30100). There is no controversy here over the constitutionality of the apportionment of seats in the State Assembly, containing 80 members, since the apportionment

in the lower house is based solely on population. (*Cal. Const.* Art. IV, § 6; *Cal. Elections Code* § 30201).

Since the Amendment to Article IV, Section 6 was adopted in 1926, there have been four attempts by the initiative process to revert back to the pre-1926 apportionment. But the electorate in 1928, 1948, 1960 and most recently in 1962, has rejected these initiatives. Since 1951 there have been numerous bills introduced in the State Legislature for the apportionment of the State Senate on a population basis, but all of these attempts have been killed by the Senate or died without any action by both houses.

III

It is pertinent to note the various population disparities which exist in the present apportionment of seats in the California State Senate under Art. IV, § 6, as amended in 1926. For example, according to the last Federal Census (1960), the population of the 38th Senatorial District, comprising Los Angeles County, is 6,380,771. The population of the 28th Senatorial District, comprising Mono, Inyo, and Alpine Counties, is 14,294. This is a ratio of almost 450:1. Other great disparities exist with respect to other Senatorial Districts, i.e., 40th Senatorial District, San Diego County, 100:1 as compared to District 28; 16th Senatorial District, Alameda County, 90:1 as compared to District 28, 14th Senatorial District, San Francisco County, 60:1 as compared with District 28; 35th Senatorial District, Orange County, 50:1 as compared to District 28, to name a few. Thus about one-third of the total population of the State of California today controls more than two-thirds of the representation in the State Senate. (See U.S. Census of Population, 1960, California, U.S. Department of Commerce, Bureau of the Census, p. 23).*

IV

Intervention of the State Senate

The California State Senate's motion to intervene as a substantially interested party was granted because it would be directly affected by the decree of this court. *Fed. R. Civ. P.* 24(a)(2); *Calif. Const.* Art. IV, §§ 1, 4, 5 and 6; *People v. U.S.*, 180 F.2d 596 (9 Cir.); *Kozak v. Wells*, 278 F.2d 104; *Ex Parte D. O. McCarthy*, 29 Cal. 395.

V

Legal Effect Upon This Suit of the Various Litigation Initiated in the California Supreme Court by Applications for Writs of Mandamus, Which Were All Denied

In *Yorty and Bonelli v. Anderson*, 60 C.2d 312, 33 Cal. Rptr. 97, 384 P.2d 417 (1963); *Yorty and Bonelli v. Jordan*, Sac. No. 7543 (appealed to the U.S. Supreme Court, October 1964 Term, Case No. 250, and dismissed for want of jurisdiction on October 12, 1964, _____ U.S. _____); and *Yorty and Bonelli v. Jordan*, Sac. No. 7582, the plaintiffs sought a writ of mandate from the Supreme Court of the State of California to compel a reapportionment of the Senate of the Legislature of the State of California on a population basis.

* Committee note: According to the source utilized by the court, the 1960 Los Angeles County population is 6,038,771, making for a maximum ratio of about 422.5 to 1.

In denying a writ in the last named case, the Supreme Court of California said:

"The petition to intervene and the petition for the writ of mandate are denied for the reason that any determination by this court on the question of legislative reapportionment would be premature until such time as the Legislature has had an opportunity to consider the matter and to take such action as it may deem to be required pursuant to the expression of the United States Supreme Court in *Reynolds v. Sims*, _____ U.S. _____, and companion cases."

None of these cases have any effect on the present suit, for in *Yorty v. Anderson*, *supra*, the case was determined on a non-federal question, i.e., the plaintiff had misjoined the wrong party as defendant. The proper party defendant should have been the Secretary of State, not the members of the Reapportionment Commission, which had no jurisdiction to reapportion the Legislature, unless the Legislature failed to act, which it had not. The other two cases, resulting in denials of petitioners' request, were denied without any opinion. It is apparent that none of these cases have directly reached the federal constitutional question of an alleged denial of petitioner's rights under the Equal Protection Clause of the Fourteenth Amendment, and, as such, they have no relation to our decision here.

VI

Delay

Although the plaintiff herein originally sought injunctive relief, which this court temporarily denied, his position subsequently changed. Despite the fact no initiative petitions proposing reapportionment of the California Senate had been filed with the State by June 25th, 1964 (the last day for filing such initiative proceedings) and that none of the twelve proposed amendments to the California Constitution, appearing on the November 3rd, 1964 election ballot, related to reapportionment of the California Senate, it was stipulated (Supplementary Stipulation of Facts No. 3, par. XXI): "The plaintiff does not seek any injunctive or mandatory relief in connection with the November 3, 1964 general election."

This court deemed it proper, in view of the lack of demand for injunctive relief, to obtain the benefit of the argument of plaintiff, and original defendants, and more particularly that of the intervening Senate, as to the meaning and effect of the group of cases on this novel and revolutionary legal theory, decided by the Supreme Court of the United States on June 15, 1964. *Reynolds v. Sims*, 377 U.S. 533; *WMCA, Inc. v. Lomenzo*, 377 U.S. 633; *Maryland Committee v. Tawes*, 377 U.S. 656; *Davis v. Mann*, 377 U.S. 695; *Lucas v. Colorado General Assembly*, 377 U.S. 713.

These cases dispose of each position taken by the intervening plaintiffs. They establish the existence of "malapportionment" in California Senate election districts, on the facts present before us. But they did not require immediate action by this court, for all reiterate the principle that in awarding relief for malapportionment of election districts, a District Court should consider many factors, including the proximity of the forthcoming election, the complexities of the election laws, etc., and above all should rely on general equitable principles.

VII

Diffusion of Political Power Between Thinly and Heavily
Populated Counties Is Not Permissible

Defendants contend that population is not the only basis for an apportioning of seats in a bicameral legislature; as such, California's so-called "Federal Plan" is constitutionally valid. (*Cal. Const.*, Art. IV, Sec. 6, as amended in 1926). The defendants contend that such was the rule as laid down in *Baker v. Carr*, *supra*. *Baker* held only that the petitioners had stated a cause of action, and thus the Supreme Court remanded the cause to the District Court in Tennessee for a hearing on the merits. In *Grey v. Sanders*, 372 U.S. 368 (1963), the court held that the Georgia County Unit System was unconstitutional as it "watered-down" the weight of the votes of certain Georgia voters simply because of their residence. Such discrimination cannot be justified, for the Equal Protection Clause as well as the Fifteenth and Nineteenth Amendments demand "One-Man, One-Vote." Thus it was apparent that the "handwriting was on the wall" with the *Grey* decision, and the pinnacle was reached in the landmark Reapportionment Cases of June 1964.

In considering whether or not the State's legislative apportionment method amounts to an invidious discrimination violative of rights asserted under the Equal Protection Clause, the crucial point is that these rights purportedly violated are individual and personal in nature. *Reynolds v. Sims*, 377 U.S. 533, 561, affirming and remanding 208 F.Supp. 431 (M.D. Ala., 1962). Even though the court's holding may result in a reapportionment of the California State Senate, this court must predominantly concern itself in ascertaining if the plaintiff and others similarly situated have been so invidiously discriminated against as to constitute a prohibited dilution of their constitutionally protected right to vote. The court stated in *Reynolds v. Sims*, *supra*:

"Legislators are elected by voters, not trees or acres. Legislators are elected by voters, not farms or cities or economic interests. As long as ours is a representative form of government, and our legislators are those instruments of government elected directly by and directly representative of the people, the right to elect legislators in a free and unimpaired fashion is a bedrock of our political system." 377 U.S. at 562; *WMCA, Inc. v. Lomenzo*, 377 U.S. 633, reversing and remanding 208 F.Supp. 368 (S.D.N.Y. 1962); *Maryland Committee v. Tawes*, 377 U.S. 656, reversing and remanding 229 Md. 406, 184 A. 2d 715; *Davis v. Mann*, 377 U.S. 678, affirming and remanding 213 F.Supp. 577 (E.D. Va. 1962); *Roman v. Sincock*, 377 U.S. 695, affirming and remanding 215 F.Supp. 169 (Del. 1963); *Lucas v. Colorado General Assembly*, 377 U.S. 713, reversing and remanding 219 F.Supp. 922 (Colo. 1963).

In California the Twenty-Eighth Senatorial District, Inyo, Mono and Alpine Counties, had a population of 14,294 according to the 1960 Federal Census, contrasted with the 38th Senatorial District, Los Angeles County, with a population of 6,380,771. The disparity here in favor of the residents of the 28th District is almost 450 to 1.* It is invidious discrimination against the residents of Los Angeles County and is debasement of their right to vote and deprives them of the Equal Protection of the Laws as

* See Committee note, *supra*.

guaranteed by the Fourteenth Amendment. *Reynolds v. Sims*, *supra*. The votes of the voters of Los Angeles County simply do not count as much as the votes of the voters of Alpine, Mono and Inyo Counties. It takes 450 Los Angeles County voters to equal one vote cast by a voter in the 28th District. In *Maryland Committee v. Tawes*, *supra*, the ratio was 32 to 1 in the State Senate in the variance of allocation of seats between the most populous and least populous counties, and 12 to 1 in the House. In *Davis v. Mann*, *supra*, the population variance in the State Senate was 2.65 to 1, and in the House, 4.36 to 1. In *Roman v. Sincock*, *supra*, the population variance was 15 to 1 for the Senate, and in the House, 35 to 1. Lastly, in *Lucas v. Colorado General Assembly*, *supra*, the population variance, after the enactment of the Constitutional referendum by the voters in 1962, adopting an apportionment which divided the seats on population and other factors in the State Senate and population in the House, in the Senate was 3.6 to 1 and in the House, 1.7 to 1. In all these cases the court held, in line with the *Reynolds* doctrine of apportionment on a "Substantially-Equal" Population Basis, that they all failed to meet the requisites of this rule and were, therefore, unconstitutional under the Equal Protection Clause of the Fourteenth Amendment.

The court held in *Wesberry v. Sanders*, 376 U.S. 1: "We do not believe that the framers of the Constitution intended to permit the same vote-diluting discrimination to be accomplished through the device of districts containing widely varied numbers of inhabitants. To say that a vote is worth more in one district than in another would . . . run counter to our fundamental ideas of democratic government . . ." 376 U.S. 1, at 8. Thus the court held in *Reynolds v. Sims*, *supra*, that population is the central point for determination and the main basis for judgment in legislative apportionment controversies.

"A citizen, a qualified voter, is no more nor no less so because he lives in the city or on the farm. This is the clear and strong command of our Constitution's Equal Protection Clause. This is an essential part of the concept of a government of laws and not men. This is at the heart of Lincoln's vision of 'government of the people, by the people, [and] for the people.' The Equal Protection Clause demands no less than substantially equal state legislative representation for all citizens, of all *places* as well as of all races." 377 U.S. at 568 (Emphasis added.).

Then Chief Justice Warren, writing for the majority, held:

" . . . as a basic constitutional standard, the Equal Protection Clause requires that seats in a bicameral state legislature must be apportioned on a population basis. Simply stated, an individual's right to vote for state legislators is unconstitutionally impaired where its weight is in a substantial fashion diluted when compared with votes of citizens living in other parts of the State." 377 U.S. at 568.

Defendants' contention that population is not the only basis for apportioning of seats in the State Senate and that a diffusion of political power between urban and rural areas is permissible cannot be sustained, as such a position is the antithesis of the doctrine which *Reynolds v. Sims*, *supra*, and all its companion cases have established.

The reliance on *MacDougall v. Green*, 335 U.S. 281, by the defendants is futile in light of *Reynolds v. Sims*, *supra*, and its companion cases. They have completely misinterpreted *Baker v. Carr*, *supra*, where the majority in citing *MacDougall* did not give their approval, but rather clearly disapproved it, for the court stated:

"In *MacDougall v. Green*, 335 U.S. 281, the District Court dismissed for want of jurisdiction, which had been invoked under 28 U.S.C. § 1343(3), a suit to enjoin enforcement of the requirement that nominees for state-wide elections be supported by a petition signed by a minimum number of persons from at least 50 of the State's 102 counties. *This Court's* disagreement with that action is clear since the Court affirmed the judgment after a review of the merits and concluded that the particular claim there was without merit." 369 U.S. at 203. (Emphasis added.)

Clearly, by the Court's own language it has disapproved the earlier *MacDougall v. Green*, *supra*, holding, for it held that "this Court" disagrees with the earlier holding. Therefore, although not expressly overruled, *MacDougall v. Green*, *supra*, is now obsolete in light of *Baker v. Carr*, *supra*, and *Reynolds v. Sims*, *supra*.

California's Senatorial apportionment under Art. IV, § 6, amended in 1926, is invidiously discriminatory, being based on no constitutionally valid policy; therefore it is invalid under the Equal Protection Clause of the Fourteenth Amendment, since it substantially dilutes one's right to vote solely because of where one happens to reside. *Reynolds v. Sims*, *supra*; *Maryland Committee v. Tawes*, *supra*; *Davis v. Mann*, *supra*; *Roman v. Sincok*, *supra*; *WMCA v. Lomenzo*, *supra*; and *Lucas v. Colorado General Assembly*, *supra*; *Paulson v. Meier*, 232 F.Supp. 183 (No. Dak., S.W., July 1964); and *League of Nebraska Municipalities v. Marsh*, 232 F.Supp. 411 (Nebr., July 1964).

Any reliance by the defendants on *Scholle v. Hare*, 367 Mich. 176 (116 N.W. 2d 350), and its subsequent companion cases, under the 1963 Michigan Constitution, Art. IV, §§ 2-6, in 372 Mich. 418 (126 N.W. 2d 731), (see latter case's two supplemental opinions in 372 Mich. 461 (126 N.W. 2d 731) and 128 N.W. 2d 350) is now futile. This is necessarily so, for the Supreme Court in a per curiam decision, 32 U.S.L. Week 3442; 82 S.Ct. 1912; based on *Reynolds v. Sims*, 377 U.S. 533, and *Lucas v. Colorado General Assembly*, 377 U.S. 713, reversed and remanded for further hearings consistent with the *Reynolds'* rule, *Marshall v. Hare*, 227 F.Supp. 989 (E.D. Mich., 1964), the exact same case, which had been instituted in the District Court. The discrepancy in representation in Michigan was about 4 to 1; like all the other reapportionment decisions handed down last June, it, too, was invalid under the *Reynolds'* doctrine.

VIII

Available Political Remedies, as the Initiative and Referendum, Have No Constitutional Significance

Any reliance on the political remedies of initiative and referendum (*Cal. Const.* Art. IV, § 1) has no constitutional relevance. Even though a majority of the electorate may have voted to retain the present apportionment scheme in California under Art. IV, § 6, as amended in 1926,

such a vote cannot be sustained, if it deprives others of the Equal Protection of the Laws under the Fourteenth Amendment. *Reynolds v. Sims*, *supra*, and *Lucas v. Colorado General Assembly*, *supra*. The Court in *Lucas v. Colorado General Assembly*, *supra*, was explicit on this point:

"... While a court sitting as a court of equity might be justified in temporarily refraining from the issuance of injunctive relief in an apportionment case in order to allow for resort to an available political remedy, such as initiative and referendum, individual constitutional rights cannot be deprived, or denied judicial effectuation, because of the existence of a nonjudicial remedy through which relief against the alleged malapportionment, which the individual voters seek, might be achieved. An individual's constitutionally protected right to cast an equally weighted vote cannot be denied even by a vote of a majority of a State's electorate, if the apportionment scheme adopted by the voters fails to measure up to the requirements of the Equal Protection Clause. Manifestly, the fact that an apportionment plan is adopted in a popular referendum is insufficient to sustain its constitutionality or to induce a court of equity to refuse to act.... A citizen's constitutional rights can hardly be infringed simply because a majority of the people choose to do so. We hold that the fact that a challenged legislative apportionment plan was approved by the electorate is without federal constitutional significance, if the scheme adopted fails to satisfy the basic requirements of the Equal Protection Clause, as delineated in our opinion in *Reynolds v. Sims*. And we conclude that the fact that a practicably available political remedy, such as initiative and referendum exists under state law provides justification only for a court of equity to stay its hand temporarily while recourse to such a remedial device is attempted or while proposed initiated measures relating to legislative apportionment are pending and will be submitted to the State's voters at the next election." 377 U.S. at 736-737.

Therefore, it is clear that the mere fact that California voters have consistently rejected any reapportionment of the State Senate on a population basis by the initiative process in the elections of 1928, 1948, 1960 and 1962 is immaterial. The rejection cannot be immune from constitutional attack on the ground that it violates the plaintiff's and all others similarly situated right to vote without having such right being substantially diluted by the mere fact of their residence, which is in direct violation of the rights guaranteed under the Fourteenth Amendment. *Reynolds v. Sims*, *supra*, and *Lucas v. Colorado General Assembly*, *supra*.

IX

Can California's Great Diversity of Peoples, Resources, Interest and Activities Override the Equal Protection Principle?

It is the position of the defendants that California's apportionment of its State Senate (Art. IV, § 6, as amended in 1926) is constitutionally rational in light of the State's size, diversity, interests and activities. This argument had it been made prior to *Baker v. Carr*, *supra*, and its progeny, would have been highly persuasive. But these other factors

cannot be sustained where the deviation is so clearly invidious, as is the case here in California (almost 450 to 1 in two districts). *Reynolds v. Sims*, *supra*; *Lucas v. Colorado General Assembly*, *supra*; *Davis v. Mann*, *supra*; *Roman v. Sincok*, *supra*; *Maryland Committee v. Tawes*, *supra*; and *WMCA v. Lomenzo*, *supra*. The rule laid down in *Reynolds* and its companion cases will allow for a slight deviation from the "Substantially Equal Population" Doctrine, where such is incident to the effectuation of a rational state policy. The Court in *Reynolds v. Sims*, *supra*, held:

"... neither history alone, nor economic or other sorts of group interests, are permissible factors in attempting to justify disparities from population-based representation. Citizens, not history or economic interests, cast votes. Considerations of area alone provide an insufficient justification for deviations from the equal-population principle. Again, people, not land or trees or pastures, vote. Modern developments and improvements in transportation and communications make rather hollow, in the mid-1960's, most claims that deviations from population-based representation can validly be based solely on geographical considerations. Arguments for allowing such deviations in order to insure effective representation for sparsely settled areas and to prevent legislative districts from becoming so large that the availability of access of citizens to their representatives is impaired are today, for the most part, unconvincing." 377 U.S. at 579-580.

Thus any reliance on California's large area, diverse interests, history, sectional differences, that districts would be too large in area, and the like, are immaterial, since California's State Senate is strictly apportioned on an area basis (Art. IV, § 6, as amended in 1926) without any consideration to the substantially-equal population doctrine by *Reynolds v. Sims*, *supra*, and its companion cases.

X

Federal Scheme Analogy

Furthermore, defendants contend that the present apportionment of the California State Senate (Art. IV, § 6, as amended 1926) can, nevertheless, be sustained because it is patterned after the Federal Congress. Factually, the similarity is clear, for in California the Assembly is apportioned strictly on a population basis (*Cal. Const.* Art. IV, § 6), analogous to the House of Representatives (U.S.C., *Const.* Art. I, § 2, cl. 3), whereas, the State Senate, being apportioned on an area basis with no more than one Senator for each county, is analogous to the United States Senate, where each State is entitled to two Senators regardless of population (Seventeenth Amendment of the U.S. Constitution). But, legally, this analogy is inapposite and irrelevant to State Legislative Districting schemes. The Court in *Reynolds v. Sims*, *supra*, adopted the opinion of the lower court on this matter, which had held that the Alabama counties were merely involuntary political units of the State created by statute to aid in the administration of the State Government. *Sims v. Reynolds*, 208 F. Supp. 431 (M.D. Ala. 1961). The Court held that the federal analogy argument is generally the last hope when it is clear that a state's

apportionment is, as is California's, invidiously maladjusted. The Supreme Court holds our Founding Fathers did not intend to establish any pattern for state legislative apportionment when the representation in the Federal Congress was adopted. *Reynolds v. Sims*, *supra*; *Maryland Committee v. Tawes*, *supra*; *Roman v. Sincock*, *supra*; *Davis v. Mann*, *supra*; and *Lucas v. Colorado General Assembly*, *supra*. The Court in *Reynolds* proceeded:

"... The fact that almost three-fourths of our present States were never in fact independently sovereign does not detract from our view that the so-called federal analogy is inapplicable as a sustaining precedent for state legislative apportionments. The developing history and growth of our republic cannot cloud the fact that, at the time of the inception of the system of representation in the Federal Congress, a compromise between the larger and smaller states on this matter averted a deadlock in the Constitutional Convention which had threatened to abort the birth of our Nation. . . .

Political subdivisions of States—Counties, cities, or whatever—never were and never have been considered as sovereign entities. Rather, they have been traditionally regarded as subordinate governmental instrumentalities created by the State to assist in the carrying out of state governmental functions. . . . The relationship of the States to the Federal Government could hardly be less analogous." 377 U.S. at 574-575.

Defendant makes further mention that the different basis of apportionment in the California Legislature is necessary to maintain the proper checks and balances between the two houses of the legislature, as is the case in the Federal Congress. This again might be a forceful argument were this a case of first impression, but this argument is of no avail in light of the Court's holding that the Federal Analogy is inapposite and irrelevant to state legislative schemes. This is seen from the Court's holding in *Reynolds*:

"We do not believe that the concept of bicameralism is rendered anachronistic and meaningless when the predominant basis of representation in the two state legislative bodies is required to be the same—population. A prime reason for bicameralism, modernly considered, is to insure mature and deliberate consideration of, and to prevent precipitate action on, proposed legislative measures. Simply because the controlling criterion for apportioning representation is required to be the same in both houses does not mean that there will be no differences in the composition and complexion of the two bodies. Different constituencies can be represented in the two houses. One body could be composed of single-member districts while the other could have at least some multimember districts. The length of terms of the legislators in the separate bodies could differ. The numerical size of the two bodies could be made to differ, even significantly, and the geographical size of districts from which legislators are elected could also be made to differ. And apportionment in one house could be arranged so as to balance off minor inequalities in the representation of certain areas in the other house. In summary, these and other factors could be, and are presently in many States, utilized to

engender differing complexions and collective attitudes in the two bodies of a state legislature, although both are apportioned substantially on a population basis." 377 U.S. at 576-577.

XI

Conclusion

The present plan of Senate apportionment by districts in California is unconstitutional, being an invidious discrimination of citizens' rights and violative of the Equal Protection Clause of the XIV Amendment to the United States Constitution, as interpreted and determined by the Supreme Court of the United States.

XII

Relief

Equitable principles must guide this court in whatever relief it determines is just and appropriate under the circumstances of this case. (*Baker v. Carr, supra; Reynolds v. Sims, supra.*)

This court asserts and agrees that "legislative reapportionment is primarily a matter for legislative consideration and determination, and that judicial relief becomes appropriate only when a legislature fails to reapportion according to federal constitutional requisites in a timely fashion after having had an adequate opportunity to do so." *Reynolds v. Sims, supra* at 586.

At the same time, this court feels required to state (as a three-judge court in this circuit has heretofore said with respect to reapportionment of both houses of the State Legislature of the State of Washington):

"In the legal climate of today, no citizen may acquire a right to a legal status created by an unremitting legislative disregard of sacred constitutional rights." *Thigpen v. Meyers*, 211 F. Supp. 826 (1962).

If the California State Legislature once ordered fails to act, and to act with promptness, we, ever conscious of our oath to uphold the Constitution of the United States, will unhesitatingly take appropriate action to correct the inequity.

This court, having determined that the primary objective of any order or decree at this time should be to effectively induce the 1965 session of the California State Legislature to properly reapportion itself as its first order of business, makes no order at this time other than the following:

(1) It is the order of this court that the California State Legislature reapportion the California State Senate consistent with this opinion, and the several existing United States Supreme Court decisions on the subject, so that the *Reynolds'* doctrine of "districts of substantial equality in population" exists.

(2) Should the California State Legislature fail to discharge its duty to fairly, adequately and validly redistrict State Senatorial Districts within the State of California, by not later than July 1, 1965, this court will, before or after that date, hold further hearings, or motions; devise redistricting plans; and make such further orders or take such further

steps as may be necessary or appropriate (either upon its own motion, or on the motion of any party or intervenor), and to that end we retain full jurisdiction of this case for such purpose, and all others.

Judge, U.S. District Court

APPENDIX B

Election and Terms of Senators—Qualifications of Members of Legislature

SEC. 4. Senators shall be chosen for the term of four years, at the same time and places as Members of the Assembly, and no person shall be a Member of the Senate or Assembly who has not been a citizen and inhabitant of the State three years, and of the district for which he shall be chosen one year, next before his election.

(Constitution of 1849, Art. IV, Secs. 4, 5, revised 1879.)

Number of Senators and Assemblymen—Election by Districts

SEC. 5. The Senate shall consist of 40 members, and the Assembly of 80 members, to be elected by districts, numbered as hereinafter provided. One-half of the Senators shall be elected every two years, those from the odd-numbered districts being elected when the number of the year is divisible by four.

(Amendment adopted November 8, 1960.)

Senatorial and Assembly Districts

SEC. 6. For the purpose of choosing Members of the Legislature, the State shall be divided into 40 senatorial and 80 assembly districts to be called senatorial and assembly districts. Such districts shall be composed of contiguous territory, and assembly districts shall be as nearly equal in population as may be. Each senatorial district shall choose one Senator and each assembly district shall choose one Member of Assembly. The senatorial districts shall be numbered from 1 to 40, inclusive, in numerical order, and the Assembly districts shall be numbered from 1 to 80 in the same order, commencing at the northern boundary of the State and ending at the southern boundary thereof. In the formation of assembly districts no county, or city and county, shall be divided, unless it contains sufficient population within itself to form two or more districts, and in the formation of senatorial districts no county, or city and county, shall be divided, nor shall a part of any county, or of any city and county, be united with any other county, or city and county, in forming any assembly or senatorial district. The census taken under the direction of the Congress of the United States in the year 1920, and every 10 years thereafter, shall be the basis of fixing and adjusting the legislative districts; and the Legislature shall, at its first regular session following the adoption of this section and thereafter at the first regular session following each decennial federal census, adjust such districts, and reapportion the representation so as to preserve the assembly districts as nearly equal in population as may be; but in the formation of senatorial districts no county or city and county shall contain more than one senatorial district, and the counties of small population shall be grouped in districts of not to exceed three counties in any one senatorial district; provided, however, that should the Legislature at the first regular session following the adoption of this section or at the first regular session following any decennial federal census fail to reapportion the assembly and senatorial districts, a Reap-

portionment Commission, which is hereby created, consisting of the Lieutenant Governor, who shall be chairman, and the Attorney General, State Controller, Secretary of State and State Superintendent of Public Instruction, shall forthwith apportion such districts in accordance with the provisions of this section and such apportionment of said districts shall be immediately effective the same as if the act of said Reapportionment Commission were an act of the Legislature, subject, however, to the same provisions of referendum as apply to the acts of the Legislature.

Population

Each subsequent reapportionment shall carry out these provisions and shall be based upon the last preceding federal census. But in making such adjustments no persons who are not eligible to become citizens of the United States, under the naturalization laws, shall be counted as forming a part of the population of any district. Until such districting as herein provided for shall be made, Senators and Assemblymen shall be elected by the districts according to the apportionment now provided for by law.

(Amendment adopted November 3, 1942.)

O

STATEMENT OF INTENT AND JUSTIFICATION IN FORMULATING AND ADOPTING THE PLAN OF SENATE REAPPORTIONMENT CONTAINED IN SENATE BILL NO. 6

(As Amended on May 6, 1965, and as Passed by the Senate
on May 10, 1965)

LETTER OF TRANSMITTAL

June 10, 1965

Honorable Glenn M. Anderson

PRESIDENT OF THE SENATE

DEAR MR. PRESIDENT:

We submit herewith, as a report of the Subcommittee on Reapportionment, the Statement Of Intent And Justification In Formulating And Adopting The Plan Of Senate Reapportionment Contained In Senate Bill No. 6 (as Amended on May 6, 1965, and as Passed by the Senate on May 10, 1965).

Respectfully submitted,

STEPHEN P. TEALE, Chairman
EUGENE G. NISBET, Vice Chairman
STANLEY ARNOLD
RANDOLPH COLLIER
VIRGIL O'SULLIVAN

AARON W. QUICK
THOMAS M. REES
VERNON L. STURGEON
ROBERT D. WILLIAMS

*

* Vacancy, Vice Senator Edwin J. Regan, resigned January 3, 1965, to accept appointment as Justice, District Court of Appeal, Third District.
(NB. Senator John F. McCarthy, a member of the Subcommittee, did not sign this report.)

I. PRELIMINARY STATEMENT

The July 1 deadline for compliance with the federal district court order in *Silver v. Jordan* now being near at hand, we the members of the Senate feel compelled to assert as a matter of record our intentions, justifications, and purposes in conceiving and adopting what we forthrightly and earnestly believe is a reapportionment plan which comports with the court's mandate. The plan to which we refer is that contained in Senate Bill No. 6, as amended in the Senate on May 6, 1965, and as passed by the Senate on May 10, 1965 (Senate Daily Journal, May 10, 1965, p. 2121), the provisions of which in their entirety are incorporated herein. We submit that said reapportionment proposal is constitutionally acceptable in light of the bases of justification we will recite below.

The federal district court in *Silver v. Jordan*, after announcing its objective to effectively induce the Legislature to undertake Senate reapportionment "as its first order of business," ordered: (1) that the Legislature reapportion the Senate on the basis of "districts of substantial equality in population," and (2) should the Legislature "fail to discharge its duty to fairly, adequately and validly" reapportion the Senate "by not later than July 1, 1965, this court will, before or after that date, hold further hearings, or motions; devise redistricting plans; and make such further orders or take such further steps as may be necessary or appropriate (either upon its own motion or on the motion of any party or intervenor)."

Notwithstanding the fact that the Senate, as intervenor in that suit, prosecuted an appeal (together with the defendant state officials) we *did* make reapportionment our first order of business. Even prior to the court's quoted order of December 3, 1964, a Subcommittee on Reapportionment of the General Research Committee had been created (resolution of the Senate Rules Committee, dated September 11, 1964), and a staff was retained to begin compiling and analyzing the multitude of statistical and background data that necessarily had to be considered before the cornerstone of any plan could be laid. And once the 1965 General Session began, the subject of reapportionment was accorded its proper status by the creation of a special standing committee to carry forward the project of formulating a plan to hear all measures on that subject. (See Senate Daily Journal, January 19, 1965, p. 162, Senate Resolution No. 22.)

The Supreme Court has issued a stern commandment to the states that they must "make an honest and good faith effort" to construct districts "as nearly of equal population as is practicable." (*Reynolds v. Sims*, 377 U. S. at 577.) We sincerely believe that mandate has been fulfilled by this Senate. Detailed evidence of the considerable thought, labor, and effort expended in the production of Senate Bill No. 6 has already been chronicled in the *Preliminary Report* of the Subcommittee on Reapportionment, which was submitted on May 13, 1965 (see Senate Daily Journal, May 13, 1965, pp. 2242-2243, for Letter of Trans-

mittal and Motion to Print Report). We will not recount those details, but rather we incorporate herein by reference that *Preliminary Report* as being probative that the requisite "honest and good faith effort" has been made.

It has been our intention and purpose to redistribute Senate representation in California on a population basis, giving secondary consideration only to such factors as have been deemed permissible by the Supreme Court. In Senate Bill No. 6 we frankly feel that this intention and purpose has been consummated.

II. THE DECISIONAL LAW

Necessarily the starting point in fashioning a plan of reapportionment is the decisional law rendered by the Supreme Court in the Apportionment Cases (*Reynolds v. Sims*, 377 U. S. 533, Alabama; *WMCA v. Lomenzo*, 377 U. S. 633, New York; *Maryland Committee for Fair Representation v. Tawes*, 377 U. S. 656, Maryland; *Davis v. Mann*, 377 U. S. 678, Virginia; *Roman v. Sincock*, 377 U. S. 695, Delaware; *Lucas v. 44th General Assembly*, 377 U. S. 713, Colorado). Shorn of their legalistic trappings, the Court's basic pronouncements were these:

1. The Equal Protection Clause demands that both houses of a bicameral legislature be apportioned on the basis of districts of substantially equal population (*Reynolds v. Sims*, 377 U. S. at 568).
2. Exact or precise equality of population among districts is not a constitutional requisite (*Id.* at 577).
3. The state must make an honest and good faith effort to construct districts of substantial equality (*Ibid.*).
4. Consideration of local political subdivision boundaries, and composing districts of contiguous and compact territory, will be recognized as factors justifying "minor" deviations, so long as the equal-population principle is not submerged or significantly diluted (*Id.* at 578-580).
5. There is no uniform standard or rigid formula for judicially determining whether an apportionment plan is constitutionally valid (*Roman v. Sincock*, 377 U. S. at 710).
6. Each state's case must be weighed on its own particular set of facts to ascertain whether there has been faithful adherence to the equal-population principle with such minor deviations as may occur in recognizing factors that are free from any taint of arbitrariness or discrimination (*Ibid.*).
7. The equal-population principle is not intended to abolish bicameralism and certain distinctions in the composition of the two houses and their constituencies are permissible (*Reynolds v. Sims*, 377 U. S. at 576-577).
8. The fact a state's legislative apportionment plan is adopted by means of the initiative or referendum will not save that scheme if it fails to meet the test of population-based representation in both houses (*Lucas v. 44th General Assembly*, 377 U. S. at 736-737).

Apart from the foregoing, and several additional considerations which will be alluded to, *infra*, the Court deemed it "expedient not to attempt to spell out any precise constitutional tests. What is marginally permissible in one state may be unsatisfactory in another, depending on the particular circumstances of the case. Developing a body of doctrine on a case-by-case basis appears to us to provide the

most satisfactory means of arriving at constitutional requirements in the area of state legislative apportionment." (*Reynolds v. Sims*, 377 U. S. at 578.) As of this point in time the Supreme Court has not had before it any permanent plan of reapportionment which has been accorded final approval by a lower court, and, as we will show, the case-by-case approach of the lower federal courts has thus far failed to produce any pattern of doctrinal uniformity. Consequently, we are apparently still in the embryonic stage of apportionment constitutional dogma.

In its decisions in the Apportionment Cases, the Court declared that "divergences from a strict population standard" would be permissible with respect to apportionment plans for "either or both" houses of a legislature if "based on legitimate considerations incident to the effectuation of a rational state policy." (Id. at 579.) The Court quickly admonished, however, that "neither history alone, nor economic or other sorts of group interests" will justify disparities (Id. at 579-580). "Considerations of area alone" likewise lack justifiability (Id. at 580). Geographical considerations were characterized as "hollow" arguments in light of this day's developments in transportation and communications (Ibid.). And the Court found "unconvincing," contentions that divergences should be permitted "to insure effective representation for sparsely settled areas and to prevent legislative districts from becoming so large that the availability of access of citizens to their representatives is impaired" (Ibid.).

The most thoroughly demolished argument of the states as a plea for justification for deviations was that of reliance on the so-called federal plan analogy. The Court ruled that such analogy is "inapposite and irrelevant to state legislative districting schemes" (Id. at 573), which taken literally means that the analogy is not admissible as evidence, and if improperly admitted cannot be the basis for a decision.

Being mindful of these rulings, adumbrations, and admonitions by the Court and of the lacuna of any means to vouchsafe the states and the courts in formulating and reviewing reapportionment plans, it was necessary to devote considerable contemplation and deliberation to the myriad factors interwoven into the fabric of legislative districting. We could not overlook the Court's arithmetic approach in its review of apportionment cases, yet we profess doubt as to the ultimate evaluation of the factor of pure mathematics in view of the Court's disposition against rigid standards and fixed formulas (*Roman v. Sincock*, 377 U. S. at 710).

III. THE FACTOR OF ARITHMETIC

The two mathematical factors examined by the Court are: (1) the maximum population variance ratio, which simply stated is the comparison between the most heavily populated district and the least populous district; and (2) the minimum percentage of the state's total population which, under the apportionment scheme, theoretically can elect a majority of the challenged legislative body.

Applying these tests to California's existing Senate apportionment, and using 1960 federal census figures, the maximum population variance ratio among Senate districts is 422.5 to 1 (comparing Los Angeles County's 6,038,771 population to the 28th District's Inyo, Mono, and Alpine total population of 14,294); and the minimum percentage of the total State population that can elect a Senate majority is 10.7%. That maximum population variance ratio is the widest deviation found in any of the 50 states' Senate apportionment schemes, and that minimum percentage figure is the second lowest of any of the 49 bicameral state senates (Nevada's 8% being the lowest).

Although we feel that these two tests are less than accurate barometers of malapportionment in that they over-simplify some and ignore many of the complex factors inextricably interwoven into any pattern of apportionment, our research indicates a lack of agreement or even any concerted study by political scientists to produce a more meaningful mathematical test. As was stated by Senator Joseph A. Rattigan in his concurring remarks in the *Report* of the California Study Commission on Senate Apportionment (1962), arithmetic "is not argumentation." He cogently noted: "The point here is that Los Angeles County is either under-represented in the State Senate or it isn't. If it isn't, the proof lies in Los Angeles and in Sacramento, not by contrast with mountain areas. The melodramatic display of '422.5 to 1' is demonstrative but not probative: it illustrates an argument without amounting to one." (pp. 54-55)

That the tremendous variance exists in California is the result of two factors: one is the fact that the counties of Alpine, Mono, and Inyo, for manifold reasons, have not become heavily populated; the other, and sometimes overlooked, is that Los Angeles is the most heavily populated county in the entire nation, and has a populace within its boundaries exceeding that of 42 individual states in the Union.

The Court's reliance on the minimum-percentage-necessary-to-elect-a-majority test also may produce a misleading result. Inherent as a factor in that test is the numerical size of the challenged legislative house. Thus, California has a 40-member Senate with 21 being a majority. Accordingly, the "ideal" in California would be 21/40, or 52.5%. Given a house the size of Georgia's lower house, 205, the ideal percentage would be 103/205 or 50.2%. In other words, there is no constant figure that can be applied uniformly to every legislative body in every state.

In any event, the Supreme Court has properly recognized that exact equality and mathematical precision are hardly constitutional requirements. On the other hand, although the Court has recognized the inherent necessity of some variation from exact equality in the practical fashioning of a State's population-based apportionment plan, the very nebulousness of the adjective "some" poses a quandary. As was noted by the dissent of Justice Frankfurter in *Baker v. Carr*: "To some extent—aye, there's the rub." (82 S. Ct. 691, at 739.)

Attention has been focused throughout the formulative stages of the California Senate plan on the reactions of the lower federal courts to reapportionments that have been accomplished in other states. For example, in *Thigpen v. Kramer*, an unpublished decision, the federal district court on March 10, 1965, gave approval to the redistricting of both houses of the Washington legislature, and *dismissed* the long-standing suit. Under that Washington scheme, the maximum population variances are 1.45 to 1 (Senate), and 1.6 to 1 (House), and the minimum population percentages necessary to elect a majority are 47.2% (Senate) and 47.7% (House). In submitting its plan to the court the state noted that the Supreme Court had left undisturbed in *Lucas v. 44th General Assembly* (377 U.S. 713) the apportionment of Colorado's lower house even though there had been a maximum variance of 1.7 to 1 and some 45.1% of the Colorado population could elect a House majority. The federal district court in *Thigpen*, although approving the Washington plan and dismissing the suit, expressed its hope and trust that when reapportionment is again undertaken following the 1970 census, further improvement will be achieved toward equality of district populations.

On April 1, 1965, the federal district court reviewing Georgia reapportionment refused to approve as constitutionally valid the plan submitted to it, but allowed that plan to stand as a temporary apportionment. The court in *Toombs v. Fortson* (----- F. Supp. -----) allowed the legislature until the end of its 1968 session to adopt a constitutionally valid plan. Although the litigation involved only the Georgia House, the court found Senate districting invalid as well. Among Senate districts the maximum variance is 1.81 to 1, and the minimum percentage that can elect a Senate majority is 48.2%. The reason the plan was found wanting by the court was that six of the 54 districts varied upward or downward by more than 15% from the mathematical average district population. The maximum variance in House districts in Georgia is 2.003 to 1, and the minimum population that can elect a House majority is 42.341%. Only 73 of the 205 House districts were found to be within 15% of the "ideal" district population. The court noted that the Supreme Court has not established a formula to guide the lower courts and the states, and the three judges ruled that until such a formula is handed down, they will follow the 15% rule, which, they noted, has been written into the Congressional districting bill under consideration by our national legislature. Use of the 15% test in Georgia's legislative districts would result in a maximum population variance of 1.353 to 1.

The state's reliance in *Thigpen* on the ratio and percentage applicable to the Colorado House is reliance on dictum, as apportionment of the House was not an issue before the Supreme Court in *Lucas*. In

Toombs, the district court admits that it relied on a dictum of the Supreme Court that a 2 to 1 variance is impermissible.

In Iowa, a federal district court had approved an unchallenged temporary reapportionment plan for use in the 1964 election, under which the maximum variance figures were 2.23 to 1 in House districting, and 3.2 to 1 in Senate districting. The minimum percentage that could elect a House majority was 48.3%, and that could elect a Senate majority was 38.9%. Following the 1964 election, that interim plan was challenged and the federal district court ruled that the scheme is prospectively invalid and is inoperative for any future Iowa legislative election (*Davis v. Cameron*, 238 F. Supp. 462). The court expressly held the disparities in the provisional Iowa Senate apportionment are too great to be allowed to stand. But the court declined to pass on the question whether the House apportionment is constitutionally valid, noting that "*It is arguably close.*" (Emphasis ours.) Nonetheless, the court was disposed to rule that the Senate and House plans, which were enacted in the same statute, are not severable and the entire statute must fail because of invalidity of that part containing the Senate plan.

The federal court in that Iowa case indicated it was adhering to the Supreme Court's admonition in *Roman v. Sincok* (377 U.S. at 710) that legislative apportionment does not lend itself to rigid formulas and instead each case must be judged on its own particular circumstances. Moreover, the federal court refused to overturn the Iowa statute on the challenged ground that it created several multi-member districts, pointing out that creation of such districts "is not in itself invalid." And the court declined to fix a deadline by which a valid reapportionment would have to be adopted, asserting its faith that the Iowa Legislature would accomplish this task sufficiently in advance of the 1966 elections.

We submit that *Thigpen*, *Toombs*, and *Davis* are something more than mere variations on a theme; their very dissimilarity of arithmetic approach compels this Senate and the *Silver* court to embrace the Supreme Court's command in *Roman* that each legislative apportionment case is to be examined "*under the particular circumstances existing in the individual state,*" and "it is neither practical nor desirable to establish rigid mathematical standards for evaluating the constitutional validity of a state legislative apportionment scheme." (377 U.S. at 710, emphasis ours.) That tenet in *Roman* achieved the status of a ruling on an issue and is not obiter dictum. The Court made its pronouncement as an explicit disapproval of the ruling of the court below, which had attempted to create a presumption that any plan having a variance ratio of less than 1.5 to 1 would be prima facie constitutionally valid.

It is that language in *Roman* which is the only "rule" on mathematics announced by the Supreme Court, and it must be followed instead of relying on some dictum (*Thigpen*), or proposed legislation regarding Congressional districting (*Toombs*). And it was with the purpose of being guided by such ruling that Senate Bill No. 6 was developed and adopted by us. Therefore, Senate Bill No. 6 should not be judged simply and solely on the mathematic computations that may be drawn therefrom. It is patently too superficial to reach a final conclusion from the arithmetic aspects of a maximum variance of 2.6

to 1 and a 39.9% minimum percentage that can elect a majority under the plan. (On the basis of 1965 California population estimates by the State Department of Finance, the minimum percentage increases to 41.35%.) As we have indicated, these factors of mathematics are demonstrative but not probative; they illustrate an argument without amounting to one.

We sincerely believe that "under the particular circumstances existing" in California, the reapportionment plan of Senate Bill No. 6 as amended on May 6, 1965, and as passed by this Senate on May 10, 1965, complies with the order of the court in *Silver v. Jordan* and merits the approval of that tribunal. We now turn to "the particular circumstances" which compel this result.

IV. CONSIDERATION AS TO POLITICAL SUBDIVISIONS AND THEIR BOUNDARIES AS JUSTIFICATION FOR POPULATION DISPARITIES

A fundamental factor incorporated into Senate Bill No. 6 is the recognition of political subdivision boundaries in districting. That this is permissible has been affirmed by the Supreme Court: "A state may legitimately desire to maintain the integrity of various political subdivisions, insofar as possible, and provide for compact districts of contiguous territory in designing a legislative apportionment scheme. Valid considerations may underlie such aims. Indiscriminate districting, without any regard for political subdivision or natural or historical boundary lines, may be little more than an open invitation to partisan gerrymandering." (*Reynolds v. Sims*, 377 U.S. at 578-579.)

And the Court proceeded to indicate that recognition of political subdivisions in an apportionment scheme would be a permissible basis for disparity among district populations: "A consideration that appears to be of more substance in justifying some deviations from population-based representation in state legislatures is that of insuring some voice to political subdivisions, as political subdivisions. Several factors make more than insubstantial claims that a state can rationally consider according political subdivisions some independent representation in at least one body of the state legislature, as long as the basic standard of equality of population among districts is maintained. Local governmental entities are frequently charged with various responsibilities incident to the operation of state government. In many states much of the legislature's activity involves the enactment of so-called local legislation, directed only to the concerns of particular political subdivisions. And a state may legitimately desire to construct districts along political subdivision lines to deter the possibilities of gerrymandering." (Id. at 580-581.)

To be sure, the Court cautioned that, if a state's districting system which gives recognition to political subdivisions and their boundaries is to be constitutionally valid, there must not be a submergence of the principle of equal-population. We believe that balance has been achieved in this Senate's plan.

In California, the recognizing of political subdivision (county) boundaries is both a constitutional requisite and a matter of historical tradition. Article IV, Section 6 of the state constitution provides, *inter alia*: "nor shall a part of any county, or of any city and county, be united with any other county, or city and county, in forming any assembly or senatorial district." We believe that requirement of our constitution is still in full force and effect, and we have constructed our plan accordingly.

Ultimately, there must be a judicial interpretation of the provisions of Article IV, Section 6 of the California Constitution in the light of *Silver v. Jordan* and the Supreme Court's Apportionment Cases. The

Reapportionment Subcommittee's *Preliminary Report* considers this factor in detail. As noted therein, the Senate filed an action in the California courts in an expeditious effort to obtain such interpretation. On May 19, 1965, the Superior Court in Sacramento sustained defendant's demurrer without leave to amend (*McAteer et. al. v. Silver*, Sacramento Superior Court No. 158464); however, the Senate is taking an appeal from that ruling. It appears imperative that the California courts render judgment at the earliest possible moment construing the pertinent provisions of the state constitution. (See *Scranton v. Drew*, 379 U. S. 40; *44th General Assembly v. Lucas*, 379 U. S. 693; and *People ex rel. Engle v. Kerner*, -----Ill. 2d. -----, 205 N. E. 2d. 33.)

Until such an interpretative ruling is forthcoming, we have elected to abridge the apportionment provisions of the California Constitution as slightly as need be in producing a districting system of substantial population equality. To this end we were influenced considerably by the reapportionment experiences in Colorado and New York (see the above-cited *Preliminary Report*). Consequently, we have fashioned a plan in Senate Bill No. 6 that breaches only four of the provisions of Article IV, Section 6: (1) the 40-district requirement (Senate Bill No. 6 creates 35 districts); (2) the limitation of one senator per district (Senate Bill No. 6 provides for five two-senator districts); (3) the limitation of one district per county (Senate Bill No. 6 creates 12 districts in Los Angeles County); (4) the maximum of three counties per district (Senate Bill No. 6 creates a five-county district, a seven-county district, and a 14-county district).

Quite clearly our plan avoids the interdiction of the Court that "permitting deviations from population-based representation does not mean that each local governmental unit or political subdivision can be given separate representation, regardless of population," or does it in any way approach that impermissible result (*Reynolds v. Sims*, 377 U. S. at 581). And, although unquestionably it would be possible to more nearly arrive at the 1 to 1 ideal if counties were fragmented or fractionalized (i.e., joining part of a county with part of another county or with an entire adjacent county), we think there are compelling reasons militating against such scheme of configuration.

One factor, of course, is the state constitutional prohibition barring that mode of districting. And, although counties do not bear the same sovereign relation to the state as the states bear to the Union, counties in California are governmental entities of substantial status. As has been summarized by one constitutional law professor: "Counties are the building blocks of American political life, thought, and action. In addition to the obvious virtues of stability and continuity, and indeed as a result of them, counties are the basic units for political party organization, for state administration, for planning, zoning, and regional arrangements, for civic federation organization, for social organization, and for business and industrial organization in most instances. In their own right counties provide an increasingly broad range of services and controls." (Dixon, 51 *American Bar Association Journal* 323, April, 1965.)

In California, the legislative branch of state government is primarily concerned with local entities, evidence of which is the fact that ap-

proximately 60% of the measures considered by the legislature relate to local matters. Moreover, the State Budget adopted each year by the legislature to a large degree provides for subventions to local governments.

It is the counties in California, as units of government, that carry out many of the programs of the state, particularly in the realm of the elective process itself, and in the fields of welfare, public health, and mental health. In these respects, counties are the functional units of government, executing and performing at the local level the state-wide policies adopted by the legislature. Yet, the California counties are far from mere adjutants of state government, and county governments possess the attributes of home rule on a par with that of city governments (discussed *infra*). This twofold county function necessitates a close working relationship between the state and its counties to insure on the one hand that state programs will be adequately administered at the local level, and on the other hand to prevent the erosion of the home rule concept.

That close relationship in California has predominantly been one between the counties and the State Senate. As a result of, or perhaps because of such relationship, the counties have been regarded by the Senate as the mirrors of and spokesmen for numerous interests and groups within their boundaries. Thus, insofar as the Senate is concerned, the counties provide the articulation for those interests and groups. Consequently, unless sufficient weight is accorded these local governments as local governments in an apportionment scheme, such interests and groups would face the alternative of either having no audible voice in the legislature, or of having to form local pressure organizations to regain articulation. Neither of these results seems compatible with good government.

We feel that this relationship between the Senate and the counties evinces an attitude of the Senate of being representative of the people, both directly as legislators elected by the people, and indirectly by being guided, advised, and informed by elected representatives of local governments. We believe this latter concept of representation should be retained insofar as possible and we feel this underlies the Court's recognition of "insuring some voice to political subdivisions as political subdivisions" as justification for "some deviations from population-based representation."

In arranging groupings of counties, although substantial equality of population was the basic criterion, three additional elements were considered: contiguity of territory, community of interest, and balancing Senate representation with respect to existing Assembly districts.

That contiguity of territory is a permissible basis for minor population deviations in districting has been acknowledged by the Supreme Court in *Reynolds* (377 U. S. at 578-579). Moreover, a scheme of non-contiguous territorial districting could produce a crazy-quilt result, perhaps causing the plan to "be found invalid on that basis alone." (Id. at 568.)

To be sure, the Court has not made the express assertion that the concept of community of interest will serve as justification for minor disparities among district populations. However, we believe that it is logical and reasonable to infer from the particular language chosen

by the Court that the community of interest factor is a recognizable element. The Court has said that, "neither history *alone*, nor economic or other sorts of group interests" nor considerations "of area *alone*" will justify "deviations from the equal-population principle." (Id. at 579-580, emphasis ours.) And the Court has stated further: "So long as the divergences from a strict population standard are based on legitimate considerations incident to the effectuation of a *rational state policy*, some deviations from the equal-population principle are constitutionally permissible with respect to the apportionment of seats in either or both of the two houses of a bicameral state legislature." (Id. at 579, emphasis ours.)

We draw from the Court's language the conclusion that, if an apportionment plan is fundamentally one of substantially equally populated districts and the disparities reflect rational grounds (which must not be *solely* such factors as economic or other group interests or history or area), the proposal will be constitutionally acceptable. We have followed that guidepost in drafting Senate Bill No. 6.

It seemed imperative that the groupings of counties be based on rationality, rather than arbitrarily confected clusters which would more closely approximate the population ideal. Consequently, in determining district demarcations we were attentive insofar as practicable to combining counties wherein there existed a similarity of interests and problems needing legislative assistance or solution.

An example of a district within whose contours are found communities of interest is the new First District created by Senate Bill No. 6, which stretches some 600 miles along the great spine of the Sierra to form a predominantly mountain-counties district with a total population in the 14 counties of 199,112. This district could have been made more populous by either one of two devices: by adding more far nothern counties, which would have produced a giant district of such proportions as to defy any semblance of adequate and effective representation by its lone member, and to render the representative virtually inaccessible to the residents during much of the winter season (as now drawn, its area exceeds that of several individual states); or by invading the valley counties, which have interests and problems needing legislative assistance and solution that are divergent from those of the mountain counties. Accordingly, as drawn this district is rationally conceived, and to arbitrarily add population under either of the foregoing alternatives would be a departure from that rational approach.

Another secondary element employed in Senate Bill No. 6 is that of balancing the reapportionment of the Senate against existing Assembly districting. Throughout the Apportionment Cases, the Court indicated that recognition of this balancing factor is not only proper, but more likely is a necessity. In *Reynolds*, the Court said that "apportionment in one house could be arranged so as to balance off minor inequities in the representation of certain areas in the other house." (377 U. S. at 577.) And in the Colorado case, after noting that a challenge has been made against that state's plan of Senate apportionment, but not against Colorado's lower house, the Court asserted that "in determining whether a good faith effort to establish districts substantially equal in population has been made, a court must necessarily consider a state's legislative apportionment scheme as a whole.

Only after an evaluation of an apportionment plan in its totality can a court determine whether there has been sufficient compliance with the requisites of the Equal Protection Clause." (*Lucas v. 44th General Assembly*, 377 U. S. at 735, fn. 27.)

In the Maryland apportionment litigation all parties had apparently conceded before the lower courts that a recent apportionment of the lower house was not in issue. However, the Court would not accept that concession. "Regardless of possible concessions made by the parties and the scope of the consideration of the courts below, in reviewing a state legislative apportionment case, this Court must of necessity consider the challenged scheme as a whole in determining whether the particular state's apportionment plan, in its entirety, meets federal constitutional requisites. It is simply impossible to decide upon the validity of the apportionment of one house of a bicameral legislature in the abstract, without also evaluating the actual scheme of representation employed with respect to the other house. Rather the proper, and indeed indispensable, subject for judicial focus in a legislative apportionment controversy is the overall representation accorded to the state's voters, in both houses of a bicameral state legislature." (*Maryland Committee for Fair Representation v. Taves*, 377 U. S. at 673.)

Although not universally true under Senate Bill No. 6, there are no less than six instances of levelling off minor inequalities in the reapportionment plan for the Senate as against imbalances in existing Assembly districting. The Fifth District (Napa, Solano, and Marin counties) is statistically 15% under-represented in the Assembly and would be over-represented by 13% in the Senate under Senate Bill No. 6. The Eighth District (Sacramento County) is statistically 17% over-represented in the Assembly and would be under-represented by 21% in the Senate. The Tenth District (Alameda County) is statistically 8% over-represented in the Assembly and would be 13% under-represented in the Senate. The Twelfth District (Santa Clara County) is statistically 8% under-represented in the Assembly and would be 22% over-represented in the Senate. The Thirteenth District (Santa Cruz, Monterey, and San Benito counties) is statistically 27% under-represented in the Assembly and would be 31% over-represented in the Senate. The Thirty-Fourth District (Orange County) is statistically 16% under-represented in the Assembly and would be 11% over-represented in the Senate. And, although we have not undertaken to do so, a somewhat minor shifting of Assembly districting would produce balancing factors as to several other Senate districts created by Senate Bill No. 6.

A problem which gave us considerable pause was that of the advisability, desirability, and necessity of creating separate districts within those counties entitled to two or more senators under the plan. As provided by Senate Bill No. 6 there are six multi-member counties, five of which are each allocated two senators (Alameda, San Francisco, Santa Clara, Orange, and San Diego), with 12 senators allotted to Los Angeles County. Only from the latter was there any substantial demand or enthusiasm for sub-districting within the county. Therefore, the bill calls for at-large election and representation in each of the two-senator counties, but creates 12 districts in Los Angeles County.

The Supreme Court twice indicated in *Reynolds* that provision for multi-member districts is permissible in an apportionment scheme that otherwise complies with the precept of substantial equality of population. "One body could be composed of single-member districts while the other could have at least some multi-member districts." (377 U.S. at 577.) "Single-member districts may be the rule in one state, while another state might desire to achieve some flexibility by creating multi-member or floterial districts." (Id. at 579.) The Court reaffirmed this position early in 1965 when it let stand a Georgia statute which created, in counties entitled to two or more senators, districts merely as means of residence qualification for candidates, but which required at-large voting and representation for all senators within such counties. (*Fortson v. Dorsey* 379 U.S. 433.) Under the particular facts of the Colorado case, the Court felt disposed to comment on the possible practical undesirability of at-large voting and representation in multi-member counties insofar as residents of such counties are concerned; but, the Court did not rule that such arrangement is constitutionally impermissible. (*Lucas v. 44th General Assembly* 377 U.S. at 731, fn. 21.)

Our purpose in according at-large status to those senatorial seats in the five two-senator counties was not to dilute or debase the voting strength or representative rights of any group or interest, but rather to avoid any such dilution or debasement. Profound difficulties were experienced in attempts to carve districts in those counties so as not to infringe on other rights protected under the 14th Amendment, and in avoiding gerrymandering.

That there is precedent for a combination of at-large and sub-districting arrangements in multi-member counties is seen in the provisional Georgia lower house reapportionment statute, which allocates 24 seats to Fulton County and provides for election of 21 of those representatives from districts and of the other three by at-large voting by the entire county. This feature of that enactment has not been found invalid.

As to districting in Los Angeles County, the problems encountered are detailed in the above-cited *Preliminary Report* and need not be echoed here. Again, the basic criterion was equality of population, with additional consideration accorded to the factors of recognizing political subdivision boundaries within the county, and to communities of interest. Only one of the 76 cities in the county indicated it did not object to being fragmented or fractionalized in formation of Senate districts (Long Beach). Many of the remaining municipalities reported that the existing system of Assembly districting in the county, which fragments some cities into as many as three districts, is both confusing and unsatisfactory.

Moreover, in view of the reasons stated by the Court why recognition may be given to political subdivision boundaries, it was found that by following city lines insofar as was practicable, there was eliminated the possibility of partisan gerrymandering. In addition, such procedure minimized possible infringement of other constitutionally protected rights. Another factor in support of this approach was that it was favored by the cities themselves and by their inhabitants.

It is with some pride that we note the 12 districts in Los Angeles County fragment only six of the 76 cities: City of Commerce, City

of Industry, Compton, the city of Los Angeles, Irwindale, and Long Beach. The City of Industry has a population of only 749; Irwindale has 1,670 residents; and City of Commerce's population is 9,555.

Just as was true in grouping counties into districts, communities of interest were considered, to the extent permissible, in grouping cities into districts in Los Angeles County, as had been urged by the cities. Obviously, this was not universally possible, in light of the requisite adherence to the principle of substantial equality of population and to the concept of recognizing municipal boundaries. We should point out that some technical corrections are required in the descriptions of boundaries of the 12 Los Angeles county districts in Senate Bill No. 6, so as to avoid splitting of census tracts, and that the numbering system of those districts should be rearranged to obviate identical numbering in certain areas of Senate districts and Congressional districts, which could cause voter confusion.

V. RETENTION OF THE BASIC CONCEPT OF BICAMERALISM

What we have set forth to this point should be sufficient in and of itself to warrant acceptance of the Senate reapportionment plan in Senate Bill No. 6, yet there are additional circumstances which compel approval of the proposal. One such factor is the basic concept of bicameralism itself—a concept which the Court declared is not rendered “anachronistic and meaningless” by the doctrine of population equality in districting. “A prime reason for bicameralism, modernly considered, is to insure mature and deliberate consideration of, and to prevent precipitate action on, proposed legislative measures. Simply because the controlling criterion for apportioning representation is required to be the same in both houses does not mean that there will be no differences in the composition and complexion of the two bodies. Different constituencies can be represented in the two houses. One body could be composed of single-member districts while the other could have at least some multi-member districts. The length of terms of the legislators in the separate bodies could differ. The numerical size of the two bodies could be made to differ, even significantly, and the geographical size of districts from which legislators are elected could also be made to differ. And apportionment in one house could be arranged so as to balance off minor inequities in the representation of certain areas in the other house.” (*Reynolds v. Sims* 377 U.S. at 576-577.)

Several of these elements are patent in the Senate Bill No. 6 plan, as we have noted, and we now turn to other aspects of bicameralism. In building the framework of Senate Bill No. 6 we decided not to construct a duplicate or exact carbon copy of the Assembly districting scheme. Our rationale for choosing this approach was that the extant qualitative degree of representativeness of bicameralism in California be retained to the fullest measure that is constitutionally permissible.

Most assuredly, Senate apportionment in this state could be devised simply as a scheme of fabricating each senatorial district to include two whole Assembly districts. The result would likely be two Assemblies; one called the Assembly and the other the Senate; one composed of 80 members who would serve two-year terms, and the other composed of 40 members who would serve four-year terms. And there the differences in the two bodies would end. This, we submit, is not that “modernly considered” bicameralism of which the Court speaks, that will “insure mature and deliberate consideration of, and . . . prevent precipitate action on, proposed legislative measures.” (*Ibid.*)

At best, to adopt such a scheme would be to flirt with the unknown, whereas to retain any significant semblance of current California bicameralism is to preserve at least in some degree a system that has proved itself to be beneficial to virtually every group and interest, and which has served the state well through her continued and phenomenal growth by evidencing the ability to abundantly absorb that growth, by a dem-

onstrated attitude of progressive legislation, and by producing a continuing prosperity for California and for her people. The qualitative aspect of bicameral representation in California cannot, we submit, be entirely dissected from the quantitative factor of equally populated districts.

Although the Court in the Apportionment Cases viewed the basic issue as one of voting rights (the right of each individual to cast in legislative elections a substantially equally-weighted vote), the Court did not entirely overlook the qualitative aspect of representation. The Court made the sweeping assertion that if one house of a bicameral state legislature is apportioned on a population basis, and the other house on a basis other than of population, the result would be obstruction of majority desires instead of compromise.

"If such a scheme were permissible, an individual citizen's ability to exercise an effective voice in the only instrument of state government directly representative of the people might be almost as effectively thwarted as if neither house were apportioned on a population basis. Deadlock between the two houses might result in compromise and concession on some issues. But in all too many cases the more probable result would be frustration of the majority will through minority veto in the house not apportioned on a population basis, stemming directly from the failure to accord adequate overall legislative representation to all of the state's citizens on a nondiscriminatory basis." (*Reynolds v. Sims* 377 U.S. at 576.)

Whereas that interdiction by the Court appears well-founded in the case in which it was uttered (The Alabama Legislature having violated its own state's constitution by failing to take any reapportionment action for more than 60 years, and there being no provision in Alabama by which the majority could articulate its desires through use of the initiative process), we submit that such declaration lacks validity when tested against the facts as they exist in California. In the context in which that statement in *Reynolds* was made, the "majority" referred to by the Court appears to be the residents of the populous centers who are under-represented as the result of an apportionment based other than on equality of population. In other words, that "majority" is the citizenry of the urban or metropolitan areas, and the "minority" is the citizenry of the rural, sparsely settled areas.

The Final Calendar of Legislative Business (the official state record of legislative action) for each Session since the existing plan of California legislative apportionment has been in force, contains a multitude of evidence vividly illustrating that the Court's declaration is inapposite and unfounded when viewed in the light of California's facts. That evidence will show it is plainly not true that the existing plan of bicameral apportionment in this state has resulted in "frustration of the majority will through minority veto in the house not apportioned on a population basis."

This is the conclusion of no less an authority on urban needs, problems, and desires than the League of California Cities, which has stated in its *Legislative Review* of July 18, 1961: "Both offensively and defensively the so-called rural Senate and its committees showed more understanding of and sympathy toward bills of interest to cities than did the urban Assembly. Contrary to popular belief this is not

unusual. This year, more than ever before, the Assembly showed an alarming disregard for the principles of home rule and the needs of cities. This is not true of all Assemblymen nor is the outstanding Senate record true as to all Senators but it is a completely accurate statement as to a majority of the members of each house. The proof is in the final history."

Certainly we do not intimate that the Senate has been the sole source or origin of legislation beneficial to the urban areas and their residents. Numerous are the statutes of this nature that have been initiated by the Assembly—yet in every instance Senate approval was a condition precedent to enactment.

Turning from the positive to the negative, the record will show that the large majority of proposals that would have infringed upon the right of cities to control their internal affairs and that would have weakened the concept of home rule, have originated in the Assembly, and when approved by that house have been defeated in the Senate. Such proposals have included bills designed to pre-empt certain fields of taxation, to preclude local exercise of the police power, to restrict the right of municipalities to enact their own land-use regulations, and to extend the scope of exemptions from taxation, which would have narrowed the property and sales and use tax bases that are the main sources of local government revenue.

As has been stated by spokesmen for the League of California Cities: "There can be no greater threat to urban and metropolitan municipal home rule than to make our cities dependent upon the state for adequate revenues with which to provide a minimum standard of municipal services. In short, the record is clear that the concentration of power in the state and the regulation of the right of cities to control their own affairs stems from legislators who represent metropolitan areas."

The force of these circumstances becomes more substantial when it is seen that the California situation is the antithesis of the apparent malady-ridden pattern of most state governments, which serious study has indicated could be cured only by legislative reapportionment. Advisors both to President Eisenhower and to President Kennedy have blamed malapportionment as a substantial reason for the "near eclipse" of state government. (See, 1955 Report to the President, and 1962 Report on Apportionment of State Legislatures, by the Advisory Commission on Intergovernmental Relations.) Scholars in the fields of government and law have asserted that there is a failing of state governments generally to attend to municipal needs, with the result that the federal government has had to assume the responsibility in the absence of state action. Malapportionment is again made the villain. "The strong tendency toward direct federal-municipal cooperation in handling the problems of urban life, which threatens to subvert the federal structure, will not be arrested until revitalized state governments demonstrate that they are interested in these problems and are able to take appropriate action." (Auerbach, 1964 Supreme Court Review, 72.)

Those sweeping indictments are simply not true as to California in light of the undeniable facts extant in this state. If more proof of the inaccuracy of such assertions is needed, it was supplied as recently as

June 1, 1965, when the mayors of 18 California cities voted their *opposition* to a resolution adopted by the United States Conference of Mayors, supporting the decisions in the Apportionment Cases on the ground that "state legislatures have been so constituted to assure underrepresentation of cities and urban areas where most of the population lives."

If, as the Supreme Court has declared, bicameralism was not rendered "anachronistic or meaningless" by the rulings in the Apportionment Cases, then we submit that "under the particular circumstances existing" in California judicial notice must be taken of the qualitative aspect of this state's existing bicameralism, and of the fact that there has not been "frustration of the majority will through minority veto in the house not apportioned on a population basis."

We do not ask that the present system of Senate apportionment be preserved intact. We wish that we could make such a plea, but that door has been closed to us by the Supreme Court. We request only that the probative value of these particular circumstances regarding bicameralism be weighed along with all the other factors in judging the merits of the plan encompassed in Senate Bill No. 6. We maintain that upon such a review, this plan should be accorded approval.

VI. THE LEGAL SIGNIFICANCE OF CALIFORNIA'S HISTORICAL FACTS

There is yet another circumstance which we could not overlook in devising a plan of Senate reapportionment, and that is the historical background of legislative representation in California. The Court has declared that "neither history alone," nor several other factors standing by themselves will justify disparities from the principle of equal population. (*Reynolds v. Sims* 377 U.S. at 579.) It appears to follow from the Court's use of the qualifier "alone" that historical factors are not to be summarily dismissed either in fashioning or evaluating an apportionment plan.

In the interest of brevity we will refrain from the voluminous exposition that could be made as to significant historical facts, and rather we will confine ourselves to only a few pertinent points from the multitude of relevant occurrences that date back to at least 1823. From that year to this very point in time there have been north-south differences in California, and many of these were far more than trivial, petty jealousies. For example, in 1837, the controversy over whether the provincial custom house (which was the main source of revenue) should be located in the north or the south boiled over to the point of armed conflict. Historians tell us an armed skirmish was fought at San Buena Ventura, in which one life was lost. Another encounter on this issue luckily ended without any fatalities.

It is a matter of record that when the first California Constitution was being drafted in 1848, the southern California delegation sought to sever that part of the incipient state from the north and to become a separate territory rather than entering the Union at that time as a state. Only two years earlier, as an outgrowth of the Bear Flag Revolt, there had been formed in the central part of what is now this state the "California Republic", which was founded on the lofty ideals that this "new government would guarantee civil and religious liberty, would detect and punish crime, would encourage industry, virtue, and literature, and would leave unshackled commerce, agriculture, and mechanism." (*California*, John Walton Caughey, 1953 ed., pp 231-232.) William B. Ide, who proclaimed that Republic, summed up his political credo, saying that "a government to be prosperous and happying in its tendency must originate with its people . . . that its citizens are its guardians, its officers are its servants, and its glory their reward." (*Ibid.*)

Perhaps most momentous in perspective was the sage decision of that small band who gathered at Monterey in 1848 as the architects of California's first constitution, when they determined that this new state would be a "free state." The single terse but vital clause in that constitution: "Neither slavery nor involuntary servitude, unless for the punishment of crimes, shall ever be tolerated in this state," was almost to result in Congressional denial of our statehood, and was to

have a telling impact on the course of our Nation's subsequent history. For at the time California was seeking to become the thirty-first state, there existed in the Union an equilibrium between "free" and "slave" states. Admission of California as a "free state" would destroy that balance and provide the catalyst for more rapidly terminating slavery in the south, a fact of which southern congressmen were vividly aware. Consequently, the 1850 session of Congress was to be what historians characterize as one of the stormiest ever, with the southern slavery supporters engaged in a death-throe attempt to block California's admission, and it required months of bombastic wrangle before there was worked out a complex compromise under which California finally achieved statehood.

And with our admission came the destruction of the equilibrium between "free" and "slave" states, foreshadowing the end of slavery and marking the first long step toward establishing equal rights of the Negro. We are not so bold as to even speculate what our country's future course might have been had not those 48 men at Monterey possessed the infinite wisdom and courage to stand on the side of freedom and against slavery. Whether there would even be a 14th Amendment for the courts to enforce today had their choice been a different one, is a matter for conjecture.

Statehood did not, however, produce serenity either within California or the Nation. In California throughout the 1850s there was a strong undercurrent of feeling in favor of a division of the state. "In 1851 a 'Convention to Divide the State of California' was called to meet in Los Angeles. The men who summoned this convention asserted that state government had proved a 'splendid failure,' that Los Angeles in particular was tasting its bitter fruits in political neglect, paralyzed commerce, insupportable taxation, and the complete lack of protection against Indian depredations. Separation, 'friendly and peaceful but still complete,' they asserted to be an imperative necessity. Other efforts followed, and in 1859 Andres Pico secured legislative approval for the incorporation of the counties from San Luis Obispo south as the Territory of Colorado. A two-thirds vote of approval in the counties affected was assured, but before congressional approval could be gained, the Civil War broke out to block the step completely." (Id. at 283-284.)

And although the outbreak of the Civil War aborted the splitting of the state, the advent of that mortal conflict spurred the concept of transforming California into an independent "Pacific Republic." The principal progenitor of that proposal was Congressman John C. Burch, who rallied Californians, in the event of fratricidal war, to "call upon the enlightened nations of the earth to acknowledge our independence, and to protect us." Governor John B. Weller also advocated that California not cast its fortunes either with North or South, but found on the shores of the Pacific "a mighty republic, which may in the end prove the greatest of all." (*California, A History*, Andrew F. Rolle, 1963 ed., pp. 317-318.)

California's gold, it was argued, would make her self-sufficient and would gain her a favorable reception into the family of nations. Her bargaining position could make passionate suitors of both the North and the South as rivals for her trade. Her population was an admixture

of emigrants from the South as well as from the North and in large part the recency of their arrival had not dispelled loyal ties with their former ways of life. The argument was made that no Californian should be compelled, because of choice of residence here, to join in a battle against the home of his origin, his family and friends. Furthermore, the argument ran, the Civil War was not California's war; she was territorially isolated from both the Union and the Confederacy. Secession was urged as the reasonable remedy to this dilemma.

Had it not been for the strong leadership of Governor Leland Stanford, augmented by the vigorous oratory of two members of the clergy, Thomas Starr King and Myron C. Briggs, it is well possible that California's tenure as a state could have been short-lived.

Moving forward, we find that the 1870s in California are characterized as years of economic discomfort and general discontent, and the period was one of political upheaval and insistence upon reform, all of which combined to produce the new constitution of 1879. That constitution, like its predecessor, provided for apportionment of both houses of the legislature on the basis of population. Yet, historians are in general agreement that state government during that period was something which Californians viewed with less than pride.

"The speeches [at the constitutional convention of 1878-1879] indicated that most delegates regarded the legislature as a necessary evil, and an expensive one at that. Perhaps it should be remarked that no consideration was given to the problem of ways and means of choosing a better legislature. The only action taken was to attempt to hedge about more carefully the kind of legislature usually elected, to prevent it from doing too much damage." (*Motivation and Political Technique in the Constitutional Convention of 1878-1879*, Carl Brent Swisher, p. 96.)

For the remainder of the 19th Century and well into the first decade of the 20th, state government was severely attacked for its venality in unscrupulousness and wastefulness—and for its subservience to the "machine." "The legislature progressively and inexcusably padded its payroll. Legislative elections of United States Senators were handled on a frankly partisan basis with every indication of venality. Machine control of nominating conventions was particularly galling, notably at Santa Cruz in 1906, when the Republicans summarily shelved Pardee in favor of a more compliant tool." (Caughey, p. 461.)

The clamor for reform was answered by the "new-broom" legislature of 1911, which enacted a wide range of progressive statutes and in fact became so engrossed with its reform machinery that it failed to carry out its constitutional duty of reapportionment on the basis of the 1910 census. Governor Hiram W. Johnson called a special session in late 1911 for that purpose. By that time, Los Angeles had become the most populous county in the state with 504,000 people; San Francisco was second with some 417,000; and Alameda was third with 256,000; no other county had even nearly 100,000.

Rural legislators at that special 1911 session painfully remembered a "big city agreement" over a tidelands measure at the earlier regular session. That tidelands bill had granted to Los Angeles title to submerged lands, and harbor fees and wharfage charges, which could be used for harbor development. As a matter of principle, San Fran-

cisco was opposed to development of a rival California harbor, but San Francisco legislators joined with Los Angeles for passage of the bill—at a price. San Francisco's votes for the tidelands bill were traded for Los Angeles' promise to hold to a minimum San Francisco's loss of legislative seats in the reapportionment, and the two groups of metropolitan area legislators would vote to take representation from the rural counties instead. On the basis of the 1910 census, southern California stood to gain substantially by reapportionment; hence the bill became the vehicle for a bargain by which Los Angeles would help San Francisco retain the latter's legislative representation, at the expense of the rural counties. The big-city combine was unconscionable to the remainder of the state, as the alliance would result in depriving central and northern California of seats which otherwise should have been taken from San Francisco. This, the non-metropolitan legislators adamantly refused to accept, and they took their stand at the special session, forcing a reapportionment compromise.

In the years following 1911, California's population continued to increase, with southern California's growth out-pacing that of the north. The 1920 census recorded 39.3% of the state's population residing in southern California, as against only 16.6% in 1890. It is a matter of record that the 1921 legislature failed to carry out its constitutional mandate of reapportionment, but it is an often overlooked fact that Congress was also remiss in failing to redistribute seats in the House of Representatives on the basis of the 1920 census.

“When the census of 1920 established the increase in California population at 44.1%, the natural expectation was that the state would be allotted three or four additional congressmen and that in local reapportionment Los Angeles and southern California would be the chief gainers. Successive Congresses, however, neglected to act, and their remissness gave the legislature excuse not to reapportion its own districts.” (Caughey, pp. 506-507.)

After the 1925 legislature adjourned without enacting a reapportionment measure (and Congress still had not redistributed House seats), the people made use of the initiative, submitting two divergent proposals. One would have retained apportionment of both houses of the legislature on the basis of population, and would have created a commission to take reapportionment action should the legislature fail. This, the electorate turned down. The other proposal was adopted by the voters, establishing the present pattern of Senate apportionment. The 1927 legislature enacted reapportionment statutes, reallocating Assembly seats and creating new Senate districts to carry out the provisions of the 1926 constitutional amendment. But a referendum petition qualified for the 1928 ballot challenging the Senate districting measure. The voters defeated this movement to prevent the enactment from going into effect. And in 1948, 1960, and 1962, the electorate defeated initiatives that would have altered the existing scheme of Senate apportionment.

That there are north-south differences in California is a matter of historical fact, and that these differences will always exist is inherent in our geography and demography. The bulk of natural resources and agriculture are in the north, whereas the volume of population is in

the south. These differences are basic, and from those roots, other divergences grow.

We submit that California's history must be accorded some weight in reviewing the proposal that has been designed, even though history, standing alone, is not justification for deviation from the equal-population principle. Nowhere in the Apportionment Cases did the Court give consideration to the possibility that a bicameral legislature, both houses of which are population-based, could be racked by unscrupulousness and wastefulness, could be venally subservient to machine domination, could be inexorably compliant tool of boss rule, and would collusively and conspiratorily bargain to debase and dilute the representative and voting rights of the minority of the state's residents. Yet these are not mere possibilities. They in fact were occurrences in California during the period that both houses were population-based.

To insure that such occurrences are not repeated, we believe it is compelling that such historical facts be recognized as a sound basis for some small departure from the population-equality principle. This recognition will also serve to produce a continued form of bicameralism which guarantees "mature and deliberate consideration of, and [prevention of] precipitate action on, proposed legislative measures." (*Reynolds v. Sims* 377 U.S. at 576.)

VII. SUMMARY AND CONCLUSION

Those then are the "particular circumstances existing" in California which mandate attention in evaluating the plan contained in Senate Bill No. 6 as amended May 6, 1965, and as passed by the Senate on May 10. To summarize, we feel there has been demonstrated the requisite honest and good faith effort to construct districts of substantially equal population. The disparities that occur are founded on permissible and justifiable bases, as deemed so by the Court. District configurations have been adapted to local political subdivision boundaries, and include contiguous territory and have been constructed of as compact territory as is practicable in giving precedence to the population standard.

The distinctions in composition of the two houses and their constituencies recognized by the Court as permissible considerations to retain the concept of bicameralism have been incorporated into the plan for that purpose. On the other hand, there are no disparities based on history alone, or solely on economic or other sorts of group interests, on considerations of area alone.

Each step along the way has been taken with reasoned deliberation, and we feel that it has been clearly demonstrated that the "divergences from a strict population standard are based on legitimate considerations incident to the effectuation of a rational state policy." (*Reynolds v. Sims* 377 U.S. at 579.) There is nowhere to be found in the plan, we submit, a scintilla of arbitrariness or discrimination.

And not the least among our reasons for adoption of this plan is the plain fact that it is the *only* reapportionment plan for which there is support by a majority vote of the Senate.

This brings us finally to the arithmetic factor, and the determination whether that nebulous noun, "minor," has been satisfied. We suggest that it has, particularly when the context of that word is used in the light of the individual factors eligible for consideration and the rationality of those elements. Moreover, we would point to the tremendous difference in arithmetic between the present scheme—with a maximum variance ratio of 422.5 to 1, and this plan—2.6 to 1.

We again point to the fact that the Court has firmly resisted the imposition of fixed standards or rigid formulas as means of evaluating apportionment plans. This, we believe, points in the direction of the traditional legal yardstick for testing cases under the Equal Protection Clause: whether the classification is a rationally justifiable one. "The constitutional safeguard is offended only if the classification rests on grounds wholly irrelevant to the achievement of the state's objective. . . . A statutory discrimination will not be set aside if any state of facts reasonably may be conceived to justify it." (*McGowan v. Maryland* 366 U.S. 420, 425-426.) "All that is prohibited is 'invidious discrimination' bearing no rational relation to any permissible policy of the state." (*Williamson v. Lee Optical Co.* 348 U.S. 483. Cf. *Morey v. Doud* 354 U.S. 457.)

We feel that as the "case by case" approach progresses, more and more will the traditional test of a rational relation to a legitimate legislative objective, emerge as the dominant factor in apportionment matters as it has in all other Equal Protection Clause issues other than the racial discrimination cases. And under that sound legal test, there can be no question but that the plan in Senate Bill No. 6 merits acceptance and approval.

At the very least, in the light of the honest and good faith effort and the considerable improvement over the existing scheme, this plan is sustainable as a provisional or interim arrangement. (Cf. *Reynolds v. Sims* 377 U.S. at 586-587.) If permitted to be used for the 1966 elections, this would follow the precedent established by the lower court in *Reynolds*, as "moderate action . . . designed to break the stranglehold by the smaller counties" on the Senate. (Id. at 552.)

In its conception and its adoption, the Senate Bill No. 6 plan represents far more than "moderate action" by this Senate, and we sincerely believe that it complies with the court's order sufficiently to stand until further reapportionment is mandatory under the state constitution following the 1970 census.

LETTER OF TRANSMITTAL

June 10, 1965

Honorable Glenn M. Anderson
PRESIDENT OF THE SENATE

DEAR MR. PRESIDENT:

We submit herewith, as a report of the Subcommittee on Reapportionment, the Statement Of Intent And Justification In Formulating And Adopting The Plan Of Senate Reapportionment Contained In Senate Bill No. 6 (as Amended on May 6, 1965, and as Passed by the Senate on May 10, 1965).

Respectfully submitted,

STEPHEN P. TEALE, Chairman
EUGENE G. NISBET, Vice Chairman
STANLEY ARNOLD
RANDOLPH COLLIER
VIRGIL O'SULLIVAN

AARON W. QUICK
THOMAS M. REES
VERNON L. STURGEON
ROBERT D. WILLIAMS

*

* Vacancy, Vice Senator Edwin J. Regan, resigned January 3, 1965, to accept appointment as Justice, District Court of Appeal, Third District.
(NB. Senator John F. McCarthy, a member of the Subcommittee, did not sign this report.)

I. PRELIMINARY STATEMENT

The July 1 deadline for compliance with the federal district court order in *Silver v. Jordan* now being near at hand, we the members of the Senate feel compelled to assert as a matter of record our intentions, justifications, and purposes in conceiving and adopting what we forthrightly and earnestly believe is a reapportionment plan which comports with the court's mandate. The plan to which we refer is that contained in Senate Bill No. 6, as amended in the Senate on May 6, 1965, and as passed by the Senate on May 10, 1965 (Senate Daily Journal, May 10, 1965, p. 2121), the provisions of which in their entirety are incorporated herein. We submit that said reapportionment proposal is constitutionally acceptable in light of the bases of justification we will recite below.

The federal district court in *Silver v. Jordan*, after announcing its objective to effectively induce the Legislature to undertake Senate reapportionment "*as its first order of business*," ordered: (1) that the Legislature reapportion the Senate on the basis of "districts of substantial equality in population," and (2) should the Legislature "fail to discharge its duty to fairly, adequately and validly" reapportion the Senate "by not later than July 1, 1965, this court will, before or after that date, hold further hearings, or motions; devise redistricting plans; and make such further orders or take such further steps as may be necessary or appropriate (either upon its own motion or on the motion of any party or intervenor)."

Notwithstanding the fact that the Senate, as intervenor in that suit, prosecuted an appeal (together with the defendant state officials) we *did* make reapportionment our first order of business. Even prior to the court's quoted order of December 3, 1964, a Subcommittee on Reapportionment of the General Research Committee had been created (resolution of the Senate Rules Committee, dated September 11, 1964), and a staff was retained to begin compiling and analyzing the multitude of statistical and background data that necessarily had to be considered before the cornerstone of any plan could be laid. And once the 1965 General Session began, the subject of reapportionment was accorded its proper status by the creation of a special standing committee to carry forward the project of formulating a plan to hear all measures on that subject. (See Senate Daily Journal, January 19, 1965, p. 162, Senate Resolution No. 22.)

The Supreme Court has issued a stern commandment to the states that they must "make an honest and good faith effort" to construct districts "as nearly of equal population as is practicable." (*Reynolds v. Sims*, 377 U. S. at 577.) We sincerely believe that mandate has been fulfilled by this Senate. Detailed evidence of the considerable thought, labor, and effort expended in the production of Senate Bill No. 6 has already been chronicled in the *Preliminary Report* of the Subcommittee on Reapportionment, which was submitted on May 13, 1965 (see Senate Daily Journal, May 13, 1965, pp. 2242-2243, for Letter of Trans-

mittal and Motion to Print Report). We will not recount those details, but rather we incorporate herein by reference that *Preliminary Report* as being probative that the requisite "honest and good faith effort" has been made.

It has been our intention and purpose to redistribute Senate representation in California on a population basis, giving secondary consideration only to such factors as have been deemed permissible by the Supreme Court. In Senate Bill No. 6 we frankly feel that this intention and purpose has been consummated.

II. THE DECISIONAL LAW

Necessarily the starting point in fashioning a plan of reapportionment is the decisional law rendered by the Supreme Court in the Apportionment Cases (*Reynolds v. Sims*, 377 U. S. 533, Alabama; *WMCA v. Lomenzo*, 377 U. S. 633, New York; *Maryland Committee for Fair Representation v. Tawes*, 377 U. S. 656, Maryland; *Davis v. Mann*, 377 U. S. 678, Virginia; *Roman V. Sincock*, 377 U. S. 695, Delaware; *Lucas v. 44th General Assembly*, 377 U. S. 713, Colorado). Shorn of their legalistic trappings, the Court's basic pronouncements were these:

1. The Equal Protection Clause demands that both houses of a bicameral legislature be apportioned on the basis of districts of substantially equal population (*Reynolds v. Sims*, 377 U. S. at 568).
2. Exact or precise equality of population among districts is not a constitutional requisite (*Id.* at 577).
3. The state must make an honest and good faith effort to construct districts of substantial equality (*Ibid.*).
4. Consideration of local political subdivision boundaries, and composing districts of contiguous and compact territory, will be recognized as factors justifying "minor" deviations, so long as the equal-population principle is not submerged or significantly diluted (*Id.* at 578-580).
5. There is no uniform standard or rigid formula for judicially determining whether an apportionment plan is constitutionally valid (*Roman v. Sincock*, 377 U. S. at 710).
6. Each state's case must be weighed on its own particular set of facts to ascertain whether there has been faithful adherence to the equal-population principle with such minor deviations as may occur in recognizing factors that are free from any taint of arbitrariness or discrimination (*Ibid.*).
7. The equal-population principle is not intended to abolish bicameralism and certain distinctions in the composition of the two houses and their constituencies are permissible (*Reynolds v. Sims*, 377 U. S. at 576-577).
8. The fact a state's legislative apportionment plan is adopted by means of the initiative or referendum will not save that scheme if it fails to meet the test of population-based representation in both houses (*Lucas v. 44th General Assembly*, 377 U. S. at 736-737).

Apart from the foregoing, and several additional considerations which will be alluded to, *infra*, the Court deemed it "expedient not to attempt to spell out any precise constitutional tests. What is marginally permissible in one state may be unsatisfactory in another, depending on the particular circumstances of the case. Developing a body of doctrine on a case-by-case basis appears to us to provide the

most satisfactory means of arriving at constitutional requirements in the area of state legislative apportionment." (*Reynolds v. Sims*, 377 U. S. at 578.) As of this point in time the Supreme Court has not had before it any permanent plan of reapportionment which has been accorded final approval by a lower court, and, as we will show, the case-by-case approach of the lower federal courts has thus far failed to produce any pattern of doctrinal uniformity. Consequently, we are apparently still in the embryonic stage of apportionment constitutional dogma.

In its decisions in the Apportionment Cases, the Court declared that "divergences from a strict population standard" would be permissible with respect to apportionment plans for "either or both" houses of a legislature if "based on legitimate considerations incident to the effectuation of a rational state policy." (Id. at 579.) The Court quickly admonished, however, that "neither history alone, nor economic or other sorts of group interests" will justify disparities (Id. at 579-580). "Considerations of area alone" likewise lack justifiability (Id. at 580). Geographical considerations were characterized as "hollow" arguments in light of this day's developments in transportation and communications (Ibid.). And the Court found "unconvincing," contentions that divergences should be permitted "to insure effective representation for sparsely settled areas and to prevent legislative districts from becoming so large that the availability of access of citizens to their representatives is impaired" (Ibid.).

The most thoroughly demolished argument of the states as a plea for justification for deviations was that of reliance on the so-called federal plan analogy. The Court ruled that such analogy is "inapposite and irrelevant to state legislative districting schemes" (Id. at 573), which taken literally means that the analogy is not admissible as evidence, and if improperly admitted cannot be the basis for a decision.

Being mindful of these rulings, adumbrations, and admonitions by the Court and of the lacuna of any means to vouchsafe the states and the courts in formulating and reviewing reapportionment plans, it was necessary to devote considerable contemplation and deliberation to the myriad factors interwoven into the fabric of legislative districting. We could not overlook the Court's arithmetic approach in its review of apportionment cases, yet we profess doubt as to the ultimate evaluation of the factor of pure mathematics in view of the Court's disposition against rigid standards and fixed formulas (*Roman v. Sincock*, 377 U. S. at 710).

III. THE FACTOR OF ARITHMETIC

The two mathematical factors examined by the Court are: (1) the maximum population variance ratio, which simply stated is the comparison between the most heavily populated district and the least populous district; and (2) the minimum percentage of the state's total population which, under the apportionment scheme, theoretically can elect a majority of the challenged legislative body.

Applying these tests to California's existing Senate apportionment, and using 1960 federal census figures, the maximum population variance ratio among Senate districts is 422.5 to 1 (comparing Los Angeles County's 6,038,771 population to the 28th District's Inyo, Mono, and Alpine total population of 14,294); and the minimum percentage of the total State population that can elect a Senate majority is 10.7%. That maximum population variance ratio is the widest deviation found in any of the 50 states' Senate apportionment schemes, and that minimum percentage figure is the second lowest of any of the 49 bicameral state senates (Nevada's 8% being the lowest).

Although we feel that these two tests are less than accurate barometers of malapportionment in that they over-simplify some and ignore many of the complex factors inextricably interwoven into any pattern of apportionment, our research indicates a lack of agreement or even any concerted study by political scientists to produce a more meaningful mathematical test. As was stated by Senator Joseph A. Rattigan in his concurring remarks in the *Report* of the California Study Commission on Senate Apportionment (1962), arithmetic "is not argumentation." He cogently noted: "The point here is that Los Angeles County is either under-represented in the State Senate or it isn't. If it isn't, the proof lies in Los Angeles and in Sacramento, not by contrast with mountain areas. The melodramatic display of '422.5 to 1' is demonstrative but not probative: it illustrates an argument without amounting to one." (pp. 54-55)

That the tremendous variance exists in California is the result of two factors: one is the fact that the counties of Alpine, Mono, and Inyo, for manifold reasons, have not become heavily populated; the other, and sometimes overlooked, is that Los Angeles is the most heavily populated county in the entire nation, and has a populace within its boundaries exceeding that of 42 individual states in the Union.

The Court's reliance on the minimum-percentage-necessary-to-elect-a-majority test also may produce a misleading result. Inherent as a factor in that test is the numerical size of the challenged legislative house. Thus, California has a 40-member Senate with 21 being a majority. Accordingly, the "ideal" in California would be $21/40$, or 52.5%. Given a house the size of Georgia's lower house, 205, the ideal percentage would be $103/205$ or 50.2%. In other words, there is no constant figure that can be applied uniformly to every legislative body in every state.

In any event, the Supreme Court has properly recognized that exact equality and mathematical precision are hardly constitutional requirements. On the other hand, although the Court has recognized the inherent necessity of some variation from exact equality in the practical fashioning of a State's population-based apportionment plan, the very nebulousness of the adjective "some" poses a quandary. As was noted by the dissent of Justice Frankfurter in *Baker v. Carr*: "To some extent—aye, there's the rub." (82 S. Ct. 691, at 739.)

Attention has been focused throughout the formulative stages of the California Senate plan on the reactions of the lower federal courts to reapportionments that have been accomplished in other states. For example, in *Thigpen v. Kramer*, an unpublished decision, the federal district court on March 10, 1965, gave approval to the redistricting of both houses of the Washington legislature, and dismissed the long-standing suit. Under that Washington scheme, the maximum population variances are 1.45 to 1 (Senate), and 1.6 to 1 (House), and the minimum population percentages necessary to elect a majority are 47.2% (Senate) and 47.7% (House). In submitting its plan to the court the state noted that the Supreme Court had left undisturbed in *Lucas v. 44th General Assembly* (377 U.S. 713) the apportionment of Colorado's lower house even though there had been a maximum variance of 1.7 to 1 and some 45.1% of the Colorado population could elect a House majority. The federal district court in *Thigpen*, although approving the Washington plan and dismissing the suit, expressed its hope and trust that when reapportionment is again undertaken following the 1970 census, further improvement will be achieved toward equality of district populations.

On April 1, 1965, the federal district court reviewing Georgia reapportionment refused to approve as constitutionally valid the plan submitted to it, but allowed that plan to stand as a temporary apportionment. The court in *Toombs v. Fortson* (----- F. Supp. -----) allowed the legislature until the end of its 1968 session to adopt a constitutionally valid plan. Although the litigation involved only the Georgia House, the court found Senate districting invalid as well. Among Senate districts the maximum variance is 1.81 to 1, and the minimum percentage that can elect a Senate majority is 48.2%. The reason the plan was found wanting by the court was that six of the 54 districts varied upward or downward by more than 15% from the mathematical average district population. The maximum variance in House districts in Georgia is 2.003 to 1, and the minimum population that can elect a House majority is 42.341%. Only 73 of the 205 House districts were found to be within 15% of the "ideal" district population. The court noted that the Supreme Court has not established a formula to guide the lower courts and the states, and the three judges ruled that until such a formula is handed down, they will follow the 15% rule, which, they noted, has been written into the Congressional districting bill under consideration by our national legislature. Use of the 15% test in Georgia's legislative districts would result in a maximum population variance of 1.353 to 1.

The state's reliance in *Thigpen* on the ratio and percentage applicable to the Colorado House is reliance on dictum, as apportionment of the House was not an issue before the Supreme Court in *Lucas*. In

Toombs, the district court admits that it relied on a dictum of the Supreme Court that a 2 to 1 variance is impermissible.

In Iowa, a federal district court had approved an unchallenged temporary reapportionment plan for use in the 1964 election, under which the maximum variance figures were 2.23 to 1 in House districting, and 3.2 to 1 in Senate districting. The minimum percentage that could elect a House majority was 48.3%, and that could elect a Senate majority was 38.9%. Following the 1964 election, that interim plan was challenged and the federal district court ruled that the scheme is prospectively invalid and is inoperative for any future Iowa legislative election (*Davis v. Cameron*, 238 F. Supp. 462). The court expressly held the disparities in the provisional Iowa Senate apportionment are too great to be allowed to stand. But the court declined to pass on the question whether the House apportionment is constitutionally valid, noting that "*It is arguably close.*" (Emphasis ours.) Nonetheless, the court was disposed to rule that the Senate and House plans, which were enacted in the same statute, are not severable and the entire statute must fail because of invalidity of that part containing the Senate plan.

The federal court in that Iowa case indicated it was adhering to the Supreme Court's admonition in *Roman v. Sincock* (377 U.S. at 710) that legislative apportionment does not lend itself to rigid formulas and instead each case must be judged on its own particular circumstances. Moreover, the federal court refused to overturn the Iowa statute on the challenged ground that it created several multi-member districts, pointing out that creation of such districts "is not in itself invalid." And the court declined to fix a deadline by which a valid reapportionment would have to be adopted, asserting its faith that the Iowa Legislature would accomplish this task sufficiently in advance of the 1966 elections.

We submit that *Thigpen*, *Toombs*, and *Davis* are something more than mere variations on a theme; their very dissimilarity of arithmetic approach compels this Senate and the *Silver* court to embrace the Supreme Court's command in *Roman* that each legislative apportionment case is to be examined "*under the particular circumstances existing in the individual state,*" and "it is neither practical nor desirable to establish rigid mathematical standards for evaluating the constitutional validity of a state legislative apportionment scheme." (377 U.S. at 710, emphasis ours.) That tenet in *Roman* achieved the status of a ruling on an issue and is not obiter dictum. The Court made its pronouncement as an explicit disapproval of the ruling of the court below, which had attempted to create a presumption that any plan having a variance ratio of less than 1.5 to 1 would be prima facie constitutionally valid.

It is that language in *Roman* which is the only "rule" on mathematics announced by the Supreme Court, and it must be followed instead of relying on some dictum (*Thigpen*), or proposed legislation regarding Congressional districting (*Toombs*). And it was with the purpose of being guided by such ruling that Senate Bill No. 6 was developed and adopted by us. Therefore, Senate Bill No. 6 should not be judged simply and solely on the mathematic computations that may be drawn therefrom. It is patently too superficial to reach a final conclusion from the arithmetic aspects of a maximum variance of 2.6

to 1 and a 39.9% minimum percentage that can elect a majority under the plan. (On the basis of 1965 California population estimates by the State Department of Finance, the minimum percentage increases to 41.35%.) As we have indicated, these factors of mathematics are demonstrative but not probative; they illustrate an argument without amounting to one.

We sincerely believe that "under the particular circumstances existing" in California, the reapportionment plan of Senate Bill No. 6 as amended on May 6, 1965, and as passed by this Senate on May 10, 1965, complies with the order of the court in *Silver v. Jordan* and merits the approval of that tribunal. We now turn to "the particular circumstances" which compel this result.

IV. CONSIDERATION AS TO POLITICAL SUBDIVISIONS AND THEIR BOUNDARIES AS JUSTIFICATION FOR POPULATION DISPARITIES

A fundamental factor incorporated into Senate Bill No. 6 is the recognition of political subdivision boundaries in districting. That this is permissible has been affirmed by the Supreme Court: "A state may legitimately desire to maintain the integrity of various political subdivisions, insofar as possible, and provide for compact districts of contiguous territory in designing a legislative apportionment scheme. Valid considerations may underlie such aims. Indiscriminate districting, without any regard for political subdivision or natural or historical boundary lines, may be little more than an open invitation to partisan gerrymandering." (*Reynolds v. Sims*, 377 U.S. at 578-579.)

And the Court proceeded to indicate that recognition of political subdivisions in an apportionment scheme would be a permissible basis for disparity among district populations: "A consideration that appears to be of more substance in justifying some deviations from population-based representation in state legislatures is that of insuring some voice to political subdivisions, as political subdivisions. Several factors make more than insubstantial claims that a state can rationally consider according political subdivisions some independent representation in at least one body of the state legislature, as long as the basic standard of equality of population among districts is maintained. Local governmental entities are frequently charged with various responsibilities incident to the operation of state government. In many states much of the legislature's activity involves the enactment of so-called local legislation, directed only to the concerns of particular political subdivisions. And a state may legitimately desire to construct districts along political subdivision lines to deter the possibilities of gerrymandering." (Id. at 580-581.)

To be sure, the Court cautioned that, if a state's districting system which gives recognition to political subdivisions and their boundaries is to be constitutionally valid, there must not be a submergence of the principle of equal-population. We believe that balance has been achieved in this Senate's plan.

In California, the recognizing of political subdivision (county) boundaries is both a constitutional requisite and a matter of historical tradition. Article IV, Section 6 of the state constitution provides, *inter alia*: "nor shall a part of any county, or of any city and county, be united with any other county, or city and county, in forming any assembly or senatorial district." We believe that requirement of our constitution is still in full force and effect, and we have constructed our plan accordingly.

Ultimately, there must be a judicial interpretation of the provisions of Article IV, Section 6 of the California Constitution in the light of *Silver v. Jordan* and the Supreme Court's Apportionment Cases. The

Reapportionment Subcommittee's *Preliminary Report* considers this factor in detail. As noted therein, the Senate filed an action in the California courts in an expeditious effort to obtain such interpretation. On May 19, 1965, the Superior Court in Sacramento sustained defendant's demurrer without leave to amend (*McAtteer et. al. v. Silver*, Sacramento Superior Court No. 158464); however, the Senate is taking an appeal from that ruling. It appears imperative that the California courts render judgment at the earliest possible moment construing the pertinent provisions of the state constitution. (See *Scranton v. Drew*, 379 U. S. 40; *44th General Assembly v. Lucas*, 379 U. S. 693; and *People ex rel. Engle v. Kerner*, _____ Ill. 2d. _____, 205 N. E. 2d. 33.)

Until such an interpretative ruling is forthcoming, we have elected to abridge the apportionment provisions of the California Constitution as slightly as need be in producing a districting system of substantial population equality. To this end we were influenced considerably by the reapportionment experiences in Colorado and New York (see the above-cited *Preliminary Report*). Consequently, we have fashioned a plan in Senate Bill No. 6 that breaches only four of the provisions of Article IV, Section 6: (1) the 40-district requirement (Senate Bill No. 6 creates 35 districts); (2) the limitation of one senator per district (Senate Bill No. 6 provides for five two-senator districts); (3) the limitation of one district per county (Senate Bill No. 6 creates 12 districts in Los Angeles County); (4) the maximum of three counties per district (Senate Bill No. 6 creates a five-county district, a seven-county district, and a 14-county district).

Quite clearly our plan avoids the interdiction of the Court that "permitting deviations from population-based representation does not mean that each local governmental unit or political subdivision can be given separate representation, regardless of population," or does it in any way approach that impermissible result (*Reynolds v. Sims*, 377 U. S. at 581). And, although unquestionably it would be possible to more nearly arrive at the 1 to 1 ideal if counties were fragmented or fractionalized (i.e., joining part of a county with part of another county or with an entire adjacent county), we think there are compelling reasons militating against such scheme of configuration.

One factor, of course, is the state constitutional prohibition barring that mode of districting. And, although counties do not bear the same sovereign relation to the state as the states bear to the Union, counties in California are governmental entities of substantial status. As has been summarized by one constitutional law professor: "Counties are the building blocks of American political life, thought, and action. In addition to the obvious virtues of stability and continuity, and indeed as a result of them, counties are the basic units for political party organization, for state administration, for planning, zoning, and regional arrangements, for civic federation organization, for social organization, and for business and industrial organization in most instances. In their own right counties provide an increasingly broad range of services and controls." (Dixon, 51 *American Bar Association Journal* 323, April, 1965.)

In California, the legislative branch of state government is primarily concerned with local entities, evidence of which is the fact that ap-

proximately 60% of the measures considered by the legislature relate to local matters. Moreover, the State Budget adopted each year by the legislature to a large degree provides for subventions to local governments.

It is the counties in California, as units of government, that carry out many of the programs of the state, particularly in the realm of the elective process itself, and in the fields of welfare, public health, and mental health. In these respects, counties are the functional units of government, executing and performing at the local level the state-wide policies adopted by the legislature. Yet, the California counties are far from mere adjutants of state government, and county governments possess the attributes of home rule on a par with that of city governments (discussed *infra*). This twofold county function necessitates a close working relationship between the state and its counties to insure on the one hand that state programs will be adequately administered at the local level, and on the other hand to prevent the erosion of the home rule concept.

That close relationship in California has predominantly been one between the counties and the State Senate. As a result of, or perhaps because of such relationship, the counties have been regarded by the Senate as the mirrors of and spokesmen for numerous interests and groups within their boundaries. Thus, insofar as the Senate is concerned, the counties provide the articulation for those interests and groups. Consequently, unless sufficient weight is accorded these local governments as local governments in an apportionment scheme, such interests and groups would face the alternative of either having no audible voice in the legislature, or of having to form local pressure organizations to regain articulation. Neither of these results seems compatible with good government.

We feel that this relationship between the Senate and the counties evinces an attitude of the Senate of being representative of the people, both directly as legislators elected by the people, and indirectly by being guided, advised, and informed by elected representatives of local governments. We believe this latter concept of representation should be retained insofar as possible and we feel this underlies the Court's recognition of "insuring some voice to political subdivisions as political subdivisions" as justification for "some deviations from population-based representation."

In arranging groupings of counties, although substantial equality of population was the basic criterion, three additional elements were considered: contiguity of territory, community of interest, and balancing Senate representation with respect to existing Assembly districts.

That contiguity of territory is a permissible basis for minor population deviations in districting has been acknowledged by the Supreme Court in *Reynolds* (377 U. S. at 578-579). Moreover, a scheme of non-contiguous territorial districting could produce a crazy-quilt result, perhaps causing the plan to "be found invalid on that basis alone." (Id. at 568.)

To be sure, the Court has not made the express assertion that the concept of community of interest will serve as justification for minor disparities among district populations. However, we believe that it is logical and reasonable to infer from the particular language chosen

by the Court that the community of interest factor is a recognizable element. The Court has said that, "neither history *alone*, nor economic or other sorts of group interests" nor considerations "of area *alone*" will justify "deviations from the equal-population principle." (Id. at 579-580, emphasis ours.) And the Court has stated further: "So long as the divergences from a strict population standard are based on legitimate considerations incident to the effectuation of a *rational state policy*, some deviations from the equal-population principle are constitutionally permissible with respect to the apportionment of seats in either or both of the two houses of a bicameral state legislature." (Id. at 579, emphasis ours.)

We draw from the Court's language the conclusion that, if an apportionment plan is fundamentally one of substantially equally populated districts and the disparities reflect rational grounds (which must not be *solely* such factors as economic or other group interests or history or area), the proposal will be constitutionally acceptable. We have followed that guidepost in drafting Senate Bill No. 6.

It seemed imperative that the groupings of counties be based on rationality, rather than arbitrarily confected clusters which would more closely approximate the population ideal. Consequently, in determining district demarcations we were attentive insofar as practicable to combining counties wherein there existed a similarity of interests and problems needing legislative assistance or solution.

An example of a district within whose contours are found communities of interest is the new First District created by Senate Bill No. 6, which stretches some 600 miles along the great spine of the Sierra to form a predominantly mountain-counties district with a total population in the 14 counties of 199,112. This district could have been made more populous by either one of two devices: by adding more far northern counties, which would have produced a giant district of such proportions as to defy any semblance of adequate and effective representation by its lone member, and to render the representative virtually inaccessible to the residents during much of the winter season (as now drawn, its area exceeds that of several individual states); or by invading the valley counties, which have interests and problems needing legislative assistance and solution that are divergent from those of the mountain counties. Accordingly, as drawn this district is rationally conceived, and to arbitrarily add population under either of the foregoing alternatives would be a departure from that rational approach.

Another secondary element employed in Senate Bill No. 6 is that of balancing the reapportionment of the Senate against existing Assembly districting. Throughout the Apportionment Cases, the Court indicated that recognition of this balancing factor is not only proper, but more likely is a necessity. In *Reynolds*, the Court said that "apportionment in one house could be arranged so as to balance off minor inequities in the representation of certain areas in the other house." (377 U. S. at 577.) And in the Colorado case, after noting that a challenge has been made against that state's plan of Senate apportionment, but not against Colorado's lower house, the Court asserted that "in determining whether a good faith effort to establish districts substantially equal in population has been made, a court must necessarily consider a state's legislative apportionment scheme as a whole.

Only after an evaluation of an apportionment plan in its totality can a court determine whether there has been sufficient compliance with the requisites of the Equal Protection Clause." (*Lucas v. 44th General Assembly*, 377 U. S. at 735, fn. 27.)

In the Maryland apportionment litigation all parties had apparently conceded before the lower courts that a recent apportionment of the lower house was not in issue. However, the Court would not accept that concession. "Regardless of possible concessions made by the parties and the scope of the consideration of the courts below, in reviewing a state legislative apportionment case, this Court must of necessity consider the challenged scheme as a whole in determining whether the particular state's apportionment plan, in its entirety, meets federal constitutional requisites. It is simply impossible to decide upon the validity of the apportionment of one house of a bicameral legislature in the abstract, without also evaluating the actual scheme of representation employed with respect to the other house. Rather the proper, and indeed indispensable, subject for judicial focus in a legislative apportionment controversy is the overall representation accorded to the state's voters, in both houses of a bicameral state legislature." (*Maryland Committee for Fair Representation v. Tawes*, 377 U. S. at 673.)

Although not universally true under Senate Bill No. 6, there are no less than six instances of levelling off minor inequalities in the reapportionment plan for the Senate as against imbalances in existing Assembly districting. The Fifth District (Napa, Solano, and Marin counties) is statistically 15% under-represented in the Assembly and would be over-represented by 13% in the Senate under Senate Bill No. 6. The Eighth District (Sacramento County) is statistically 17% over-represented in the Assembly and would be under-represented by 21% in the Senate. The Tenth District (Alameda County) is statistically 8% over-represented in the Assembly and would be 13% under-represented in the Senate. The Twelfth District (Santa Clara County) is statistically 8% under-represented in the Assembly and would be 22% over-represented in the Senate. The Thirteenth District (Santa Cruz, Monterey, and San Benito counties) is statistically 27% under-represented in the Assembly and would be 31% over-represented in the Senate. The Thirty-Fourth District (Orange County) is statistically 16% under-represented in the Assembly and would be 11% over-represented in the Senate. And, although we have not undertaken to do so, a somewhat minor shifting of Assembly districting would produce balancing factors as to several other Senate districts created by Senate Bill No. 6.

A problem which gave us considerable pause was that of the advisability, desirability, and necessity of creating separate districts within those counties entitled to two or more senators under the plan. As provided by Senate Bill No. 6 there are six multi-member counties, five of which are each allocated two senators (Alameda, San Francisco, Santa Clara, Orange, and San Diego), with 12 senators allotted to Los Angeles County. Only from the latter was there any substantial demand or enthusiasm for sub-districting within the county. Therefore, the bill calls for at-large election and representation in each of the two-senator counties, but creates 12 districts in Los Angeles County.

The Supreme Court twice indicated in *Reynolds* that provision for multi-member districts is permissible in an apportionment scheme that otherwise complies with the precept of substantial equality of population. "One body could be composed of single-member districts while the other could have at least some multi-member districts." (377 U.S. at 577.) "Single-member districts may be the rule in one state, while another state might desire to achieve some flexibility by creating multi-member or floterial districts." (Id. at 579.) The Court reaffirmed this position early in 1965 when it let stand a Georgia statute which created, in counties entitled to two or more senators, districts merely as means of residence qualification for candidates, but which required at-large voting and representation for all senators within such counties. (*Fortson v. Dorsey* 379 U.S. 433.) Under the particular facts of the Colorado case, the Court felt disposed to comment on the possible practical undesirability of at-large voting and representation in multi-member counties insofar as residents of such counties are concerned; but, the Court did not rule that such arrangement is constitutionally impermissible. (*Lucas v. 14th General Assembly* 377 U.S. at 731, fn. 21.)

Our purpose in according at-large status to those senatorial seats in the five two-senator counties was not to dilute or debase the voting strength or representative rights of any group or interest, but rather to avoid any such dilution or debasement. Profound difficulties were experienced in attempts to carve districts in those counties so as not to infringe on other rights protected under the 14th Amendment, and in avoiding gerrymandering.

That there is precedent for a combination of at-large and sub-districting arrangements in multi-member counties is seen in the provisional Georgia lower house reapportionment statute, which allocates 24 seats to Fulton County and provides for election of 21 of those representatives from districts and of the other three by at-large voting by the entire county. This feature of that enactment has not been found invalid.

As to districting in Los Angeles County, the problems encountered are detailed in the above-cited *Preliminary Report* and need not be echoed here. Again, the basic criterion was equality of population, with additional consideration accorded to the factors of recognizing political subdivision boundaries within the county, and to communities of interest. Only one of the 76 cities in the county indicated it did not object to being fragmented or fractionalized in formation of Senate districts (Long Beach). Many of the remaining municipalities reported that the existing system of Assembly districting in the county, which fragments some cities into as many as three districts, is both confusing and unsatisfactory.

Moreover, in view of the reasons stated by the Court why recognition may be given to political subdivision boundaries, it was found that by following city lines insofar as was practicable, there was eliminated the possibility of partisan gerrymandering. In addition, such procedure minimized possible infringement of other constitutionally protected rights. Another factor in support of this approach was that it was favored by the cities themselves and by their inhabitants.

It is with some pride that we note the 12 districts in Los Angeles County fragment only six of the 76 cities: City of Commerce, City

of Industry, Compton, the city of Los Angeles, Irwindale, and Long Beach. The City of Industry has a population of only 749; Irwindale has 1,670 residents; and City of Commerce's population is 9,555.

Just as was true in grouping counties into districts, communities of interest were considered, to the extent permissible, in grouping cities into districts in Los Angeles County, as had been urged by the cities. Obviously, this was not universally possible, in light of the requisite adherence to the principle of substantial equality of population and to the concept of recognizing municipal boundaries. We should point out that some technical corrections are required in the descriptions of boundaries of the 12 Los Angeles county districts in Senate Bill No. 6, so as to avoid splitting of census tracts, and that the numbering system of those districts should be rearranged to obviate identical numbering in certain areas of Senate districts and Congressional districts, which could cause voter confusion.

V. RETENTION OF THE BASIC CONCEPT OF BICAMERALISM

What we have set forth to this point should be sufficient in and of itself to warrant acceptance of the Senate reapportionment plan in Senate Bill No. 6, yet there are additional circumstances which compel approval of the proposal. One such factor is the basic concept of bicameralism itself—a concept which the Court declared is not rendered “anachronistic and meaningless” by the doctrine of population equality in districting. “A prime reason for bicameralism, modernly considered, is to insure mature and deliberate consideration of, and to prevent precipitate action on, proposed legislative measures. Simply because the controlling criterion for apportioning representation is required to be the same in both houses does not mean that there will be no differences in the composition and complexion of the two bodies. Different constituencies can be represented in the two houses. One body could be composed of single-member districts while the other could have at least some multi-member districts. The length of terms of the legislators in the separate bodies could differ. The numerical size of the two bodies could be made to differ, even significantly, and the geographical size of districts from which legislators are elected could also be made to differ. And apportionment in one house could be arranged so as to balance off minor inequities in the representation of certain areas in the other house.” (*Reynolds v. Sims* 377 U.S. at 576-577.)

Several of these elements are patent in the Senate Bill No. 6 plan, as we have noted, and we now turn to other aspects of bicameralism. In building the framework of Senate Bill No. 6 we decided not to construct a duplicate or exact carbon copy of the Assembly districting scheme. Our rationale for choosing this approach was that the extant qualitative degree of representativeness of bicameralism in California be retained to the fullest measure that is constitutionally permissible.

Most assuredly, Senate apportionment in this state could be devised simply as a scheme of fabricating each senatorial district to include two whole Assembly districts. The result would likely be two Assemblies; one called the Assembly and the other the Senate; one composed of 80 members who would serve two-year terms, and the other composed of 40 members who would serve four-year terms. And there the differences in the two bodies would end. This, we submit, is not that “modernly considered” bicameralism of which the Court speaks, that will “insure mature and deliberate consideration of, and . . . prevent precipitate action on, proposed legislative measures.” (*Ibid.*)

At best, to adopt such a scheme would be to flirt with the unknown, whereas to retain any significant semblance of current California bicameralism is to preserve at least in some degree a system that has proved itself to be beneficial to virtually every group and interest, and which has served the state well through her continued and phenomenal growth by evidencing the ability to abundantly absorb that growth, by a dem-

onstrated attitude of progressive legislation, and by producing a continuing prosperity for California and for her people. The qualitative aspect of bicameral representation in California cannot, we submit, be entirely dissected from the quantitative factor of equally populated districts.

Although the Court in the Apportionment Cases viewed the basic issue as one of voting rights (the right of each individual to cast in legislative elections a substantially equally-weighted vote), the Court did not entirely overlook the qualitative aspect of representation. The Court made the sweeping assertion that if one house of a bicameral state legislature is apportioned on a population basis, and the other house on a basis other than of population, the result would be obstruction of majority desires instead of compromise.

"If such a scheme were permissible, an individual citizen's ability to exercise an effective voice in the only instrument of state government directly representative of the people might be almost as effectively thwarted as if neither house were apportioned on a population basis. Deadlock between the two houses might result in compromise and concession on some issues. But in all too many cases the more probable result would be frustration of the majority will through minority veto in the house not apportioned on a population basis, stemming directly from the failure to accord adequate overall legislative representation to all of the state's citizens on a nondiscriminatory basis." (*Reynolds v. Sims* 377 U.S. at 576.)

Whereas that interdiction by the Court appears well-founded in the case in which it was uttered (The Alabama Legislature having violated its own state's constitution by failing to take any reapportionment action for more than 60 years, and there being no provision in Alabama by which the majority could articulate its desires through use of the initiative process), we submit that such declaration lacks validity when tested against the facts as they exist in California. In the context in which that statement in *Reynolds* was made, the "majority" referred to by the Court appears to be the residents of the populous centers who are under-represented as the result of an apportionment based other than on equality of population. In other words, that "majority" is the citizenry of the urban or metropolitan areas, and the "minority" is the citizenry of the rural, sparsely settled areas.

The Final Calendar of Legislative Business (the official state record of legislative action) for each Session since the existing plan of California legislative apportionment has been in force, contains a multitude of evidence vividly illustrating that the Court's declaration is inapposite and unfounded when viewed in the light of California's facts. That evidence will show it is plainly not true that the existing plan of bicameral apportionment in this state has resulted in "frustration of the majority will through minority veto in the house not apportioned on a population basis."

This is the conclusion of no less an authority on urban needs, problems, and desires than the League of California Cities, which has stated in its *Legislative Review* of July 18, 1961: "Both offensively and defensively the so-called rural Senate and its committees showed more understanding of and sympathy toward bills of interest to cities than did the urban Assembly. Contrary to popular belief this is not

unusual. This year, more than ever before, the Assembly showed an alarming disregard for the principles of home rule and the needs of cities. This is not true of all Assemblymen nor is the outstanding Senate record true as to all Senators but it is a completely accurate statement as to a majority of the members of each house. The proof is in the final history."

Certainly we do not intimate that the Senate has been the sole source or origin of legislation beneficial to the urban areas and their residents. Numerous are the statutes of this nature that have been initiated by the Assembly—yet in every instance Senate approval was a condition precedent to enactment.

Turning from the positive to the negative, the record will show that the large majority of proposals that would have infringed upon the right of cities to control their internal affairs and that would have weakened the concept of home rule, have originated in the Assembly, and when approved by that house have been defeated in the Senate. Such proposals have included bills designed to pre-empt certain fields of taxation, to preclude local exercise of the police power, to restrict the right of municipalities to enact their own land-use regulations, and to extend the scope of exemptions from taxation, which would have narrowed the property and sales and use tax bases that are the main sources of local government revenue.

As has been stated by spokesmen for the League of California Cities: "There can be no greater threat to urban and metropolitan municipal home rule than to make our cities dependent upon the state for adequate revenues with which to provide a minimum standard of municipal services. In short, the record is clear that the concentration of power in the state and the regulation of the right of cities to control their own affairs stems from legislators who represent metropolitan areas."

The force of these circumstances becomes more substantial when it is seen that the California situation is the antithesis of the apparent malady-ridden pattern of most state governments, which serious study has indicated could be cured only by legislative reapportionment. Advisors both to President Eisenhower and to President Kennedy have blamed malapportionment as a substantial reason for the "near eclipse" of state government. (See, 1955 Report to the President, and 1962 Report on Apportionment of State Legislatures, by the Advisory Commission on Intergovernmental Relations.) Scholars in the fields of government and law have asserted that there is a failing of state governments generally to attend to municipal needs, with the result that the federal government has had to assume the responsibility in the absence of state action. Malapportionment is again made the villain. "The strong tendency toward direct federal-municipal cooperation in handling the problems of urban life, which threatens to subvert the federal structure, will not be arrested until revitalized state governments demonstrate that they are interested in these problems and are able to take appropriate action." (Auerbach, 1964 Supreme Court Review, 72.)

Those sweeping indictments are simply not true as to California in light of the undeniable facts extant in this state. If more proof of the inaccuracy of such assertions is needed, it was supplied as recently as

June 1, 1965, when the mayors of 18 California cities voted their *opposition* to a resolution adopted by the United States Conference of Mayors, supporting the decisions in the Apportionment Cases on the ground that "state legislatures have been so constituted to assure underrepresentation of cities and urban areas where most of the population lives."

If, as the Supreme Court has declared, bicameralism was not rendered "anachronistic or meaningless" by the rulings in the Apportionment Cases, then we submit that "under the particular circumstances existing" in California judicial notice must be taken of the qualitative aspect of this state's existing bicameralism, and of the fact that there has not been "frustration of the majority will through minority veto in the house not apportioned on a population basis."

We do not ask that the present system of Senate apportionment be preserved intact. We wish that we could make such a plea, but that door has been closed to us by the Supreme Court. We request only that the probative value of these particular circumstances regarding bicameralism be weighed along with all the other factors in judging the merits of the plan encompassed in Senate Bill No. 6. We maintain that upon such a review, this plan should be accorded approval.

VI. THE LEGAL SIGNIFICANCE OF CALIFORNIA'S HISTORICAL FACTS

There is yet another circumstance which we could not overlook in devising a plan of Senate reapportionment, and that is the historical background of legislative representation in California. The Court has declared that "neither history alone," nor several other factors standing by themselves will justify disparities from the principle of equal population. (*Reynolds v. Sims* 377 U.S. at 579.) It appears to follow from the Court's use of the qualifier "alone" that historical factors are not to be summarily dismissed either in fashioning or evaluating an apportionment plan.

In the interest of brevity we will refrain from the voluminous exposition that could be made as to significant historical facts, and rather we will confine ourselves to only a few pertinent points from the multitude of relevant occurrences that date back to at least 1823. From that year to this very point in time there have been north-south differences in California, and many of these were far more than trivial, petty jealousies. For example, in 1837, the controversy over whether the provincial custom house (which was the main source of revenue) should be located in the north or the south boiled over to the point of armed conflict. Historians tell us an armed skirmish was fought at San Buena Ventura, in which one life was lost. Another encounter on this issue luckily ended without any fatalities.

It is a matter of record that when the first California Constitution was being drafted in 1848, the southern California delegation sought to sever that part of the incipient state from the north and to become a separate territory rather than entering the Union at that time as a state. Only two years earlier, as an outgrowth of the Bear Flag Revolt, there had been formed in the central part of what is now this state the "California Republic", which was founded on the lofty ideals that this "new government would guarantee civil and religious liberty, would detect and punish crime, would encourage industry, virtue, and literature, and would leave unshackled commerce, agriculture, and mechanism." (*California*, John Walton Caughey, 1953 ed., pp 231-232.) William B. Ide, who proclaimed that Republic, summed up his political credo, saying that "a government to be prosperous and happy in its tendency must originate with its people . . . that its citizens are its guardians, its officers are its servants, and its glory their reward." (*Ibid.*)

Perhaps most momentous in perspective was the sage decision of that small band who gathered at Monterey in 1848 as the architects of California's first constitution, when they determined that this new state would be a "free state." The single terse but vital clause in that constitution: "Neither slavery nor involuntary servitude, unless for the punishment of crimes, shall ever be tolerated in this state," was almost to result in Congressional denial of our statehood, and was to

have a telling impact on the course of our Nation's subsequent history. For at the time California was seeking to become the thirty-first state, there existed in the Union an equilibrium between "free" and "slave" states. Admission of California as a "free state" would destroy that balance and provide the catalyst for more rapidly terminating slavery in the south, a fact of which southern congressmen were vividly aware. Consequently, the 1850 session of Congress was to be what historians characterize as one of the stormiest ever, with the southern slavery supporters engaged in a death-throe attempt to block California's admission, and it required months of bombastic wrangle before there was worked out a complex compromise under which California finally achieved statehood.

And with our admission came the destruction of the equilibrium between "free" and "slave" states, foreshadowing the end of slavery and marking the first long step toward establishing equal rights of the Negro. We are not so bold as to even speculate what our country's future course might have been had not those 48 men at Monterey possessed the infinite wisdom and courage to stand on the side of freedom and against slavery. Whether there would even be a 14th Amendment for the courts to enforce today had their choice been a different one, is a matter for conjecture.

Statehood did not, however, produce serenity either within California or the Nation. In California throughout the 1850s there was a strong undercurrent of feeling in favor of a division of the state. "In 1851 a 'Convention to Divide the State of California' was called to meet in Los Angeles. The men who summoned this convention asserted that state government had proved a 'splendid failure,' that Los Angeles in particular was tasting its bitter fruits in political neglect, paralyzed commerce, insupportable taxation, and the complete lack of protection against Indian depredations. Separation, 'friendly and peaceful but still complete,' they asserted to be an imperative necessity. Other efforts followed, and in 1859 Andres Pico secured legislative approval for the incorporation of the counties from San Luis Obispo south as the Territory of Colorado. A two-thirds vote of approval in the counties affected was assured, but before congressional approval could be gained, the Civil War broke out to block the step completely." (Id. at 283-284.)

And although the outbreak of the Civil War aborted the splitting of the state, the advent of that mortal conflict spurred the concept of transforming California into an independent "Pacific Republic." The principal progenitor of that proposal was Congressman John C. Burch, who rallied Californians, in the event of fratricidal war, to "call upon the enlightened nations of the earth to acknowledge our independence, and to protect us." Governor John B. Weller also advocated that California not cast its fortunes either with North or South, but found on the shores of the Pacific "a mighty republic, which may in the end prove the greatest of all." (*California, A History*, Andrew F. Rolle, 1963 ed., pp. 317-318.)

California's gold, it was argued, would make her self-sufficient and would gain her a favorable reception into the family of nations. Her bargaining position could make passionate suitors of both the North and the South as rivals for her trade. Her population was an admixture

of emigrants from the South as well as from the North and in large part the recency of their arrival had not dispelled loyal ties with their former ways of life. The argument was made that no Californian should be compelled, because of choice of residence here, to join in a battle against the home of his origin, his family and friends. Furthermore, the argument ran, the Civil War was not California's war; she was territorially isolated from both the Union and the Confederacy. Secession was urged as the reasonable remedy to this dilemma.

Had it not been for the strong leadership of Governor Leland Stanford, augmented by the vigorous oratory of two members of the clergy, Thomas Starr King and Myron C. Briggs, it is well possible that California's tenure as a state could have been short-lived.

Moving forward, we find that the 1870s in California are characterized as years of economic discomfort and general discontent, and the period was one of political upheaval and insistence upon reform, all of which combined to produce the new constitution of 1879. That constitution, like its predecessor, provided for apportionment of both houses of the legislature on the basis of population. Yet, historians are in general agreement that state government during that period was something which Californians viewed with less than pride.

"The speeches [at the constitutional convention of 1878-1879] indicated that most delegates regarded the legislature as a necessary evil, and an expensive one at that. Perhaps it should be remarked that no consideration was given to the problem of ways and means of choosing a better legislature. The only action taken was to attempt to hedge about more carefully the kind of legislature usually elected, to prevent it from doing too much damage." (*Motivation and Political Technique in the Constitutional Convention of 1878-1879*, Carl Brent Swisher, p. 96.)

For the remainder of the 19th Century and well into the first decade of the 20th, state government was severely attacked for its venality in unscrupulousness and wastefulness—and for its subservience to the "machine." "The legislature progressively and inexcusably padded its payroll. Legislative elections of United States Senators were handled on a frankly partisan basis with every indication of venality. Machine control of nominating conventions was particularly galling, notably at Santa Cruz in 1906, when the Republicans summarily shelved Pardee in favor of a more compliant tool." (Caughey, p. 461.)

The clamor for reform was answered by the "new-broom" legislature of 1911, which enacted a wide range of progressive statutes and in fact became so engrossed with its reform machinery that it failed to carry out its constitutional duty of reapportionment on the basis of the 1910 census. Governor Hiram W. Johnson called a special session in late 1911 for that purpose. By that time, Los Angeles had become the most populous county in the state with 504,000 people; San Francisco was second with some 417,000; and Alameda was third with 256,000; no other county had even nearly 100,000.

Rural legislators at that special 1911 session painfully remembered a "big city agreement" over a tidelands measure at the earlier regular session. That tidelands bill had granted to Los Angeles title to submerged lands, and harbor fees and wharfage charges, which could be used for harbor development. As a matter of principle, San Fran-

cisco was opposed to development of a rival California harbor, but San Francisco legislators joined with Los Angeles for passage of the bill—at a price. San Francisco's votes for the tidelands bill were traded for Los Angeles' promise to hold to a minimum San Francisco's loss of legislative seats in the reapportionment, and the two groups of metropolitan area legislators would vote to take representation from the rural counties instead. On the basis of the 1910 census, southern California stood to gain substantially by reapportionment; hence the bill became the vehicle for a bargain by which Los Angeles would help San Francisco retain the latter's legislative representation, at the expense of the rural counties. The big-city combine was unconscionable to the remainder of the state, as the alliance would result in depriving central and northern California of seats which otherwise should have been taken from San Francisco. This, the non-metropolitan legislators adamantly refused to accept, and they took their stand at the special session, forcing a reapportionment compromise.

In the years following 1911, California's population continued to increase, with southern California's growth out-pacing that of the north. The 1920 census recorded 39.3% of the state's population residing in southern California, as against only 16.6% in 1890. It is a matter of record that the 1921 legislature failed to carry out its constitutional mandate of reapportionment, but it is an often overlooked fact that Congress was also remiss in failing to redistribute seats in the House of Representatives on the basis of the 1920 census.

"When the census of 1920 established the increase in California population at 44.1%, the natural expectation was that the state would be allotted three or four additional congressmen and that in local reapportionment Los Angeles and southern California would be the chief gainers. Successive Congresses, however, neglected to act, and their remissness gave the legislature excuse not to reapportion its own districts." (Caughey, pp. 506-507.)

After the 1925 legislature adjourned without enacting a reapportionment measure (and Congress still had not redistributed House seats), the people made use of the initiative, submitting two divergent proposals. One would have retained apportionment of both houses of the legislature on the basis of population, and would have created a commission to take reapportionment action should the legislature fail. This, the electorate turned down. The other proposal was adopted by the voters, establishing the present pattern of Senate apportionment. The 1927 legislature enacted reapportionment statutes, reallocating Assembly seats and creating new Senate districts to carry out the provisions of the 1926 constitutional amendment. But a referendum petition qualified for the 1928 ballot challenging the Senate districting measure. The voters defeated this movement to prevent the enactment from going into effect. And in 1948, 1960, and 1962, the electorate defeated initiatives that would have altered the existing scheme of Senate apportionment.

That there are north-south differences in California is a matter of historical fact, and that these differences will always exist is inherent in our geography and demography. The bulk of natural resources and agriculture are in the north, whereas the volume of population is in

the south. These differences are basic, and from those roots, other divergences grow.

We submit that California's history must be accorded some weight in reviewing the proposal that has been designed, even though history, standing alone, is not justification for deviation from the equal-population principle. Nowhere in the Apportionment Cases did the Court give consideration to the possibility that a bicameral legislature, both houses of which are population-based, could be racked by unscrupulousness and wastefulness, could be venally subservient to machine domination, could be inexorably compliant tool of boss rule, and would collusively and conspiratorily bargain to debase and dilute the representative and voting rights of the minority of the state's residents. Yet these are not mere possibilities. They in fact were occurrences in California during the period that both houses were population-based.

To insure that such occurrences are not repeated, we believe it is compelling that such historical facts be recognized as a sound basis for some small departure from the population-equality principle. This recognition will also serve to produce a continued form of bicameralism which guarantees "mature and deliberate consideration of, and [prevention of] precipitate action on, proposed legislative measures." (*Reynolds v. Sims* 377 U.S. at 576.)

VII. SUMMARY AND CONCLUSION

Those then are the "particular circumstances existing" in California which mandate attention in evaluating the plan contained in Senate Bill No. 6 as amended May 6, 1965, and as passed by the Senate on May 10. To summarize, we feel there has been demonstrated the requisite honest and good faith effort to construct districts of substantially equal population. The disparities that occur are founded on permissible and justifiable bases, as deemed so by the Court. District configurations have been adapted to local political subdivision boundaries, and include contiguous territory and have been constructed of as compact territory as is practicable in giving precedence to the population standard.

The distinctions in composition of the two houses and their constituencies recognized by the Court as permissible considerations to retain the concept of bicameralism have been incorporated into the plan for that purpose. On the other hand, there are no disparities based on history alone, or solely on economic or other sorts of group interests, on considerations of area alone.

Each step along the way has been taken with reasoned deliberation, and we feel that it has been clearly demonstrated that the "divergences from a strict population standard are based on legitimate considerations incident to the effectuation of a rational state policy." (*Reynolds v. Sims* 377 U.S. at 579.) There is nowhere to be found in the plan, we submit, a scintilla of arbitrariness or discrimination.

And not the least among our reasons for adoption of this plan is the plain fact that it is the *only* reapportionment plan for which there is support by a majority vote of the Senate.

This brings us finally to the arithmetic factor, and the determination whether that nebulous noun, "minor," has been satisfied. We suggest that it has, particularly when the context of that word is used in the light of the individual factors eligible for consideration and the rationalness of those elements. Moreover, we would point to the tremendous difference in arithmetic between the present scheme—with a maximum variance ratio of 422.5 to 1, and this plan—2.6 to 1.

We again point to the fact that the Court has firmly resisted the imposition of fixed standards or rigid formulas as means of evaluating apportionment plans. This, we believe, points in the direction of the traditional legal yardstick for testing cases under the Equal Protection Clause: whether the classification is a rationally justifiable one. "The constitutional safeguard is offended only if the classification rests on grounds wholly irrelevant to the achievement of the state's objective. . . . A statutory discrimination will not be set aside if any state of facts reasonably may be conceived to justify it." (*McGowan v. Maryland* 366 U.S. 420, 425-426.) "All that is prohibited is 'invidious discrimination' bearing no rational relation to any permissible policy of the state." (*Williamson v. Lee Optical Co.* 348 U.S. 483. Cf. *Morey v. Doud* 354 U.S. 457.)

We feel that as the "case by case" approach progresses, more and more will the traditional test of a rational relation to a legitimate legislative objective, emerge as the dominant factor in apportionment matters as it has in all other Equal Protection Clause issues other than the racial discrimination cases. And under that sound legal test, there can be no question but that the plan in Senate Bill No. 6 merits acceptance and approval.

At the very least, in the light of the honest and good faith effort and the considerable improvement over the existing scheme, this plan is sustainable as a provisional or interim arrangement. (Cf. *Reynolds v. Sims* 377 U.S. at 586-587.) If permitted to be used for the 1966 elections, this would follow the precedent established by the lower court in *Reynolds*, as "moderate action . . . designed to break the stranglehold by the smaller counties" on the Senate. (Id. at 552.)

In its conception and its adoption, the Senate Bill No. 6 plan represents far more than "moderate action" by this Senate, and we sincerely believe that it complies with the court's order sufficiently to stand until further reapportionment is mandatory under the state constitution following the 1970 census.

LETTER OF TRANSMITTAL

Sacramento, January 28, 1965

HON. GLENN M. ANDERSON
President of the Senate

Dear Mr. President :

The Senate Factfinding Committee on Governmental Administration hereby submits the fourth in a series of reports started in 1959 dealing with public schools.

The first, "The Costs of Classroom Instruction" (1959), showed that the ratio of teaching to nonteaching certificated personnel in California had decreased from

24 to 1 in 1922-23, to

7.2 to 1 in 1957-58.

Put another way, this showed that nonteaching certificated personnel had increased to 14 times their number in the same (25-year) period that teaching staff was increasing $3\frac{1}{4}$ times its number.

The second report in the series, "An Analysis of School District Expenditures for Certificated Personnel Salaries," resulted in legislation setting a minimum percent of school districts' current expenses of education which was to be spent for teachers' salaries.

The third, a "Preliminary Report on an Analysis of the Helpfulness of Certain Aspects of the School Program to Classroom Teaching," showed that a small, but representative, sample of classroom teachers felt that most nonteaching certificated personnel would offer better service to education if they were teaching.

This, the final report, is based on questionnaires sent to 20,000 classroom teachers and voluntarily returned by mail by 15,020 of them. It substantiates in every important respect the findings of the preliminary report, and embellishes and goes beyond, in many other respects. We trust this study will be of appreciable help to Legislators whose concern for education leads them to wonder "What would the classroom teachers think?" The study provides many, though not all, of the answers.

Respectfully submitted,

STANLEY ARNOLD, *Chairman*

JOHN C. BEGOVICH, *Vice Chairman*
GEORGE MILLER, JR.

LET US TEACH

I. INTRODUCTION

15,020 of the random sample of 20,000 California classroom teachers to whom this committee sent mail questionnaires voluntarily completed and returned them by mail.¹ They form the basis of this report entitled, "Let Us Teach."

With virtual unanimity the classroom teachers responded that, if given reasonable class sizes, uninterrupted classrooms, and fewer non-teaching duties, they could do immeasurably better at that which most of them seem to want desperately to do—teach.

A preliminary report by this committee² was based on a similar, but not identical, questionnaire to 1,020 teachers. Even with a 78-percent return, that report was criticized because of the size of the sample. The preliminary report reflected a highly critical attitude by teachers toward unwieldy class sizes and excessive administration and supervision.

One of the many letters received by the committee following publication of the preliminary report states:

"You might be interested in knowing, although this is of course quite subjective validation of the committee's findings, that in a series of interviews with teachers and administrators which I and several other members of a local citizens' committee have been conducting on curriculum and educational policies and procedures, we were told in person substantially what your written anonymous responses contained. These were teachers in all subject matter areas on the secondary level with a wide range of experience and the resemblance between their statements to us (in a very informal setting) and the replies to your questions is astounding. *Cut down on class size, reduce the range of differences in a given class, and LEAVE US ALONE—forget the gimmicks, even leave us out of democratically oriented educational planning sessions so we'll have time to do our own studying and to keep up with our subjects, was the gist of their reaction.* They also spoke with deep wistful feelings about the devious arithmetic used in calculating pupil-teacher ratios where teachers who were trapped in attendance office routines half a day were still counted as if they had been bending over the hot kiddies full time."

This report, based on 15,020 responses, upholds the preliminary report in every important respect and embellishes its findings in many.

One vital difference, in addition to sheer numbers, is that in this report the committee was able to tabulate and make separate findings based on 9,526 voluntary written responses to the final, open-ended question (No. 32) which asked, "Is there any specific thing which

¹ Richard Hurlburt, of the California Poll, "Phenomenal!"

² "An Analysis of the Helpfulness of Certain Aspects of the School Program to Classroom Teaching," 1963.

you think calls for state action to help teachers do a better job of teaching?"

The responses to this question were tabulated separately from the machine-scored questions. The concerns mentioned by teachers in response to that unstructured question bolster and enrich the pattern established in the first 31 questions, and by the preliminary report. The numerical breakdown by categories in order of frequency of mention is given in Part III. Each category is followed by selected statements written by the teachers themselves. The statements were selected by the tabulators as being most representative of the area of concern being categorized.

Agreement with Legislative Action

Both questionnaires place the classroom teachers of the state in unqualified support of the class-size philosophy of the State Legislature as expressed in the 1964 Education Bill (A.B. 145—Unruh):

"It is the intent and purpose of the Legislature to encourage by every means possible the reduction of class sizes and the ratio of pupils to teachers in all grade levels of the public schools and to urge every effort to this end to be undertaken by the local school administrative authorities."

While in agreement with the philosophy of reducing class size, the opinions expressed by teachers in both polls can be helpful in selecting or directing some of the "every means possible" by which the Legislature hopes to encourage reduction of class size. A comment on the findings of the preliminary report in appropriately repeated here:

"Complete consistency was demonstrated throughout regarding the value to the teachers of assistance by educational specialists, whose duties are to offer advice, guidance, and assistance to teachers. The inference can clearly be drawn, regardless of the type of district considered, that teachers feel strongly that the place for educational specialists is in teaching in the classroom. The contribution by educational specialists outside the classroom seems to be nil, as far as the teachers are concerned. If they were sharing, and thus reducing, the load of those now teaching in the classroom, they would be making an incomparable contribution as far as the teachers are concerned."

Attitudes of classroom teachers toward administration and supervision are of far more than academic interest. American education is unique in the roles and relative influence on education assigned the two groups. In America the quaint tradition has developed whereby the nonteaching education personnel have become spokesmen for education in general.

It is surprising that classroom teachers have with such docility surrendered their role as spokesmen even for what goes on in the classroom. Clearly, from the results of the two polls conducted by this committee, classroom teachers have entirely different priorities and values regarding education as contrasted with the values of the nonteaching educational spokesmen.

It is shocking that these views seem to be obtainable only under the shelter of anonymity as was provided by these questionnaires.

II. FINDINGS AND CONCLUSIONS: QUESTIONS 1-31

A. General Information

Male-female Ratio by Grade Level

Grade level	Men (%)	Women (%)	Total number responding
Elementary	16	84	4,485
High school	66	34	1,765
Unified	60.5	39.5	8,405
Junior college	76	24	342
Total	37	63	14,997

Male-female Ratio by Grade Level (1956-57, Department of Education Survey)

Grade level	Men (%)	Women (%)
Elementary	29	89
High school	63	37
Junior college	76	24
Total	36.8	63.2

How many years have you taught?

	3 years or less	10 years or less	15 years and more
Elementary			
Male	27.2%	78.8%	5.8%
Female	22.8%	55.3%	28.6%
High School			
Male	14.8%	54.9%	18.9%
Female	21.2%	51.3%	33.8%
Junior college			
Male	12.4%	52.3%	22.1%
Female	8.4%	44.0%	40.4%
Unified			
Male	15.99%	63.5%	16.15%
Female	18.54%	54.73%	31.02%
Statewide total	19.1%	57.7%	25.1%
Total number responding			14,993

Conclusions: If length of time remaining in teaching is any measure of satisfaction, or lack of stress, or a combination of both, then clearly, the satisfaction derived from teaching, and lack of stress, would be highest among junior college teachers, and lowest among elementary teachers.

Whether the male-female comparisons offer valid basis for conclusions on satisfaction, or merely reflect opportunity differences in our society, we are not prepared to say. Nevertheless, it is clear that women in all levels have a much higher tendency toward longevity in the classroom than do men.

Were you teaching in the classroom in 1961-62?

	Yes	No	No response	Total
Elementary	4,432	35	27	4,494
High school	1,729	29	9	1,767
Junior college	338	4	2	344
Unified	8,144	223	48	8,415
Statewide total	14,643	291	86	15,020

Explanation. This question was included as a check to determine if the sample actually did consist of teachers in the classroom in the year 1961-62. The number who were not teaching according to this question is insignificant, indicating that the selection of teachers was valid.

B. Turnover

Number not teaching in 1962-63:

Elementary	High school	Junior college	Unified	Total
418	114	10	651	1,193

Number still teaching in 1962-63, but in a different district from 1961-62:

Elementary	High school	Junior college	Unified	Total
253	82	7	179	521

Total of above tables: total of those teaching in 1961-62 who had left that assignment in 1962-63:

Elementary	High school	Junior college	Unified	Total
671	196	17	830	1,714

Percent of those teaching in 1961-62 who had left that assignment in 1962-63:

Elementary	671/4432	= .151 = 15.1%
High school	196/1729	= .113 = 11.3%
Junior college	17/338	= .050 = 5.0%
Unified	830/8144	= .102 = 10.2%
Total	1714/14643	= .117 = 11.7%

If you are not teaching, or are not teaching in the same district as last year (1961-62), why did you leave that district?

	Resigned voluntarily	Asked to resign	Dis- missed	Contract not renewed	Retired	Promoted	Total number
Elementary							
Male	65%	9%	0	4%	1%	20%	77
Female	87%	1%	0	1%	10%	1%	507
High school							
Male	71%	3%	0	3%	5%	18%	76
Female	77%	2%	0	2%	16%	2%	81
Junior college							
Male	50%	13%	0	0	25%	13%	8
Female	67%	0	0	0	17%	17%	6
Unified							
Male	63%	2%	0	1%	14%	20%	136
Female	76%	1%	0	1%	20%	3%	408
State total	77%	2%	0	1%	13%	6%	1,299
	(1,012)	(2)	(1)	(13)	(171)	(79)	1,299

Comments on Turnover. In absolute figures, multiplying the above totals by 10 would indicate that nearly 10,000 teachers per year resign voluntarily from teaching in California. Ignoring for the moment that "resign voluntarily" might mean any number of different things, the total of 10,000 teachers to be replaced each year plus new teachers to be hired by virtue of population expansion represents a problem of staggering proportions. There seems little that can be done about California's population increase. Some understanding, however, must be obtained as to the reason for the "voluntary resignation."

It might also be noted that the small number of promotions (79) should give food for thought to those teachers who may be just biding their time in the classroom until they can escape through promotion. Apparently stability in the ranks of administrators is such as to offer far fewer promotional opportunities than hoped for by would-be administrators who are now teaching.

Male-female comparison of reasons given for leaving teaching:

Retirement

Total	% of sample	(171/1299) = 13.1%
Male	% of males	(26/297) = 8.6%
Female	% of females	(145/1002) = 14.5%

Promotion

Total	% of sample	(79/1299) = 6.0%
Male	% of males	(58/297) = 19.3%
Female	% of females	(21/1002) = 2.1%

Voluntary Resignation

Total	% of sample	(1012/1299) = 77.8%
Male	% of males	(194/297) = 64.6%
Female	% of females	(818/1002) = 81.8%

C. Teaching Conditions

What portion of your teaching assignment in 1961-62 was in the field of your major?

	<i>Elementary</i>	<i>High</i>	<i>Junior college</i>	<i>Unified</i>	<i>Total</i>
0 to $\frac{1}{4}$	21%	16%	9%	20%	19%
$\frac{1}{4}$ to $\frac{1}{2}$	4%	5%	3%	4%	4%
$\frac{1}{2}$ to $\frac{3}{4}$	3%	8%	5%	6%	6%
$\frac{3}{4}$, more	53%	64%	78%	57%	57%
No response	10%	7%	5%	13%	14%
Total	100%	100%	100%	100%	100%

Conclusion. A justification for a portion of the credential revision legislation of the 1961 session (SB 7, Senator Hugo Fisher) is clearly demonstrated by the responses to Question 8.

The statewide total showing only 57 percent of the state's teachers teaching three-fourths or more of their time in the field of their subject matter major is shocking. Followup studies in this area should indicate the success of the 1961 credential revision legislation in making teachers' assignments coincide more with their specialties.

	<i>Elementary</i>	<i>High</i>	<i>Junior college</i>	<i>Unified</i>	<i>Total</i>
0 to $\frac{1}{4}$	31.6%	31.4%	40.6%	32.5%	32.2%
$\frac{1}{4}$ to $\frac{1}{2}$	6.2%	6.1%	5.4%	6.0%	6.1%
$\frac{1}{2}$ to $\frac{3}{4}$	2.7%	4.4%	1.0%	3.6%	3.4%
$\frac{3}{4}$, more	9.5%	14.6%	6.4%	12.5%	11.7%
No response	50.0%	43.5%	46.6%	45.4%	46.6%
Total	100.0%	100.0%	100.0%	100.0%	100.0%

Average pupils taught per period:

Question 9 on the questionnaire:

9. List on the lines below the number of students in each of your classes ~~each period of the day you taught--~~in 1962. If you were an elementary teacher with only one class throughout the day, only one number is necessary.

 Divide the total number of students
 by the total periods taught. -----

The total of the students taught per period was divided by the number of responses for each kind of school district, with the results below:

<i>District</i>	<i>Total of students taught per period</i>	<i>Total responses</i>	<i>Average pupils per period</i>
Elementary			
Male -----	23,810	708	33.6
Female -----	119,582	3,777	31.7
High school			
Male -----	35,919	1,162	30.9
Female -----	19,148	603	31.8
Junior college			
Male -----	7,296	258	28.2
Female -----	2,174	84	25.9
Unified			
Male -----	105,245	3,321	31.7
Female -----	162,669	5,084	32.0
Total -----	475,943	15,020	31.7

Conclusion: The average pupils per period in this table is lower than the true average.

In reaching the average, the divisor was the total number of questionnaires returned, not the total number of responses to this particular question.

Had the latter figure been used, the averages would undoubtedly have been higher.

Pupil-teacher ratios, and average class sizes, tell little about actual class sizes, specific subjects, or for specific districts. An average class size of 30 could mean that some classes run as high as 90, and some as low as 10. Making exceptions for certain kinds of classes where it can be agreed upon that numbers are not a hindrance to the quality of education, it would seem that the only class size policy that really has teeth in it would be a statement to the effect that, "We don't permit any classes over 25."

Did you have a period during the school day in 1961-62 which could be used to prepare for classes?

	<i>Percent answering yes</i>
Elementary	
Male	15
Female	15
High school	
Male	90
Female	92
Junior college	
Male	96
Female	80
Unified	
Male	75
Female	47
Statewide total	53

Did you need such a period (to prepare for classes)?

	<i>Percent answering yes</i>
Elementary	
Male	87
Female	84
High school	
Male	99
Female	99
Junior college	
Male	97
Female	97
Unified	
Male	96
Female	92
Statewide total	92

Conclusion. The results from this and the preceding question substantiate the results from the same questions contained in the preliminary report by this committee. As in the first questionnaire, there was unanimity in the expression of the need for a preparation period, but conspicuous lack of preparation periods for large numbers of teachers on the elementary level.

If you had a preparation period, how many times during the 1961-62 school year did you substitute for another teacher during this period?

	<i>Average number of periods substituted</i>
Elementary	
Male	2.1
Female	0.53
High school	
Male	5.4
Female	4.4
Junior college	
Male	2.3
Female	1.9
Unified	
Male	5.8
Female	4.3
Statewide total	4.52

Conclusion. On a statewide level, 4.52 hours times the number of teachers having a preparation period represents a sizable number of man-days during which teachers offered their time (presumably without compensation) in lieu of substitute teachers.

Was the 1961 law establishing the rights of probationary teachers to request a hearing if not rehired explained to probationary teachers in your district?

	Percent "yes" of total
Elementary (4,494) -----	25
High school (1,767) -----	27
Junior college (344) -----	28
Unified (8,415) -----	17
Total (15,020) -----	21

Conclusion. Prior to 1961, probationary teachers in districts of over 85,000 ada (San Francisco, Los Angeles, and San Diego) had the right, if not rehired, to request a public hearing to determine the reason for the failure to rehire. Probationary teachers in all other districts, prior to 1961, had no legal right to such a hearing or even to be told the reason for their not being rehired.

The responses to this question aren't an accurate, statewide reflection because the total will include answers from Los Angeles, San Diego, and San Francisco, where there was no need to explain legislation which did not affect teachers in those districts. Nevertheless, there is occasion for concern that this, and by implication, other legislation of vital concern to teachers, has not been explained to teachers. The total of "no," plus "don't know" answers is almost four times the "yes" answers statewide. Had there been a conscientious effort at explanation, it is unlikely that the ratio would be so high.

	<i>Estimate the number of daily interruptions from sources outside your classroom in 1961-62</i>	<i>Of these (interruptions), how many do you think were necessary?</i>
Elementary		
Male -----	7	3
Female -----	6	3
High school		
Male -----	22	6
Female -----	18	5
Unified		
Male -----	15	5
Female -----	12	5
Junior college		
Male -----	2	2
Female -----	6	5
Los Angeles		
Male -----	25	13
Female -----	13	6
Statewide total -----	13	5

Conclusion. The figures obtained in this poll on classroom interruptions are admittedly rough, based on the memory of the teacher. It can safely be assumed that they are low. Yet these figures need no refinement, no further exploration as to duration or nature of the interruption to lead to the conclusion that they seriously hamper, and often hamstring, education. Even the teachers, who are notoriously charitable and longsuffering in such matters, felt that less than half of them were necessary

Counselors: Prevalence by types of districts

Q. "Was there a counselor in your district last year?"

*Counselor prevalence;
ratio of "yes" to "no" answers*

Elementary	
Male -----	1.9
Female -----	2.1
High school	
Male -----	45.0
Female -----	48.0
Unified	
Male -----	22.0
Female -----	6.0
Junior college	
Male -----	22.0
Female -----	13.6
Los Angeles	
Male -----	75.0
Female -----	33.0
Statewide total -----	6.2

Conclusion. The counselor prevalence figure has relevance to the graph on the following page.

Comments on Graphs. Confusion regarding the implications of the two graphs shown in juxtaposition will most certainly prevail unless it is stated explicitly what they do—and what they do not—purport to show.

First, the average number of daily classroom interruptions are merely the figures from Question 25 (page 14), graphed in order according to the type of district, and with a male-female comparison.

The ratio of teachers who have counselors in their district to those who do not was obtained by dividing the "no" answers to No. 27 (Was there a counselor in your district last year?) into the "yes" answers. The figure thus obtained was then graphed in the same manner that the figures for classroom interruptions were.

Seeing the two graphs in juxtaposition, one cannot help being impressed by the similarity, or correlation. From these figures it *cannot* be deduced that there is a clear cause and effect relationship between interruptions and counselors.

Conclusion. That there *is* a definite correlation, however, and that this correlation is more than mere coincidence, certainly cannot be gainsaid. Without delving further into the intricacies of this relationship, it is probably sufficient to note that this seems to be part of the pattern which has emerged so forcefully in this and the prior report by this committee. That is, that the very positions whose sole function is to assist teachers to do a better job of teaching are considered by teachers to be of doubtful assistance in most cases, and actually harmful to the teaching situation in some. As stated before, the contribution of the educational specialists would be more welcome by teachers if they, too, were teaching, and thus serving to reduce class size. If this also resulted in fewer classroom interruptions, the entire education system would profit.

RATIO OF TEACHERS WHO HAVE COUNSELORS IN THEIR DISTRICTS TO THOSE WHO DO NOT

AVERAGE NUMBER OF CLASS INTERRUPTIONS PER DAY

D. Teaching Attitudes

Do you feel administrators lose touch with teaching if they are no longer teaching in the classroom?

	Yes	No	No response	Total responding
Elementary	53%	39%	8%	4,494
High school	64%	30%	6%	1,767
Junior college	68%	24%	8%	344
Unified	57%	35%	8%	8,415
Total	57%	35%	8%	15,020

Do you think it would help education if administrators taught a portion of the schoolday?

	Yes	No	No response	Total
Elementary -----	43%	49%	8%	4,494
High school -----	53%	41%	6%	1,767
Junior college -----	57%	37%	6%	344
Unified -----	48%	45%	7%	8,415
Total -----	47%	45%	8%	15,020

TEACHING EXPERIENCE COMPARED WITH EXPRESSED NEED FOR SUPERVISION

Fifty-seven percent of the teachers think administrators lose touch with teaching (see previous question). Yet, only 47 percent think education would be helped if administrators were to teach a portion of each day. Why the difference? (Note, there was a consistent 10 percent difference between the answers to these two questions on all levels.)

Whatever the reasons, college level teachers were highest and elementary teachers were lowest in their expression of the importance of administrators' teaching a part of each schoolday.

Do you need supervision to aid your teaching?

	Ratio of "no" to "yes"
Elementary -----	2.3 to 1
High school -----	4.4 to 1
Junior college -----	7 to 1
Unified -----	3.2 to 1
Total -----	3.04 to 1

During your teaching career, have you received any help towards becoming a better teacher from your teaching colleagues?

	Yes	No	No response	Total
Elementary -----	94%	4%	2%	4,494
High school -----	91%	7%	2%	1,767
Junior college -----	92%	7%	1%	344
Unified -----	92%	6%	2%	8,415
Total -----	94%	5%	1%	15,020

Who has helped you more during your teaching career to become a better teacher?

(a) STATEWIDE TOTAL

	Superiors	Fellow teachers	Neither	Both	No response	Total
Elementary -----	11%	52%	4%	20%	13%	4,494
High school -----	4%	70%	7%	11%	8%	1,767
Junior college -----	5%	73%	5%	9%	8%	344
Unified -----	11%	56%	5%	19%	9%	8,415
Total -----	10%	57%	5%	18%	10%	15,020

(a) Conclusion. There was a marked difference between the responses to this question of those who had answered "yes" on No. 23—(b)—(indicating they needed supervision) and those who answered "no"—(c). Nevertheless, without exception, even among teachers who indicated they needed supervision, teachers in every category clearly showed that they had received more help from their fellow teachers than from the educational specialists whose primary function is to help teachers. It should be repeated that teachers were not asked whom they liked best, or who their favorite persons were for social purposes. They were asked to indicate who had helped them the most to become a better teacher. It is inconceivable that they would have chosen in such clear measure their teaching colleagues, had they felt the educational specialists to be of appreciable help to them.

(b) THE TOTALS OF THOSE WHO EXPRESSED A "NEED FOR SUPERVISION"

	Superiors	Fellow teachers	Neither	Both	No response	Total
Elementary -----	17%	39%	2%	28%	14%	1,348
High school -----	10%	58%	6%	15%	11%	341
Junior college -----	12%	48%	4%	17%	19%	48
Unified -----	22%	39%	2%	28%	9%	2,000
Total -----	19%	41%	2%	27%	11%	3,737

(b) Conclusion. Fellow teachers still the most helpful, but by the smallest margin (2 to 1) over supervisors in this group—the group which still feels a need for supervision.

Who has helped you more during your teaching career to become a better teacher?

(c) THE TOTALS OF THOSE WHO DID NOT FEEL THEY NEEDED SUPERVISION

	Superiors	Fellow teachers	Neither	Both	No response	Total
Elementary -----	8%	58%	5%	16%	13%	3,146
High school -----	3%	73%	7%	10%	7%	1,426
Junior college -----	3%	77%	6%	7%	7%	296
Unified -----	7%	61%	6%	16%	10%	6,415
Total -----	7%	62%	6%	15%	10%	11,283

(c) Conclusion. The margin favoring fellow teachers over superiors jumps to 9 to 1 in this group—the group which did *not* express a need for supervision.

Students' preference for counseling (on personal problems):

Q. "To which person do you think a student with a personal problem would be more likely to go for advice?"

	Counselor	Favorite teacher	Don't know	No response
Elementary (4,494) -----	6%	70.2%	17.6%	6%
High school (1,767) -----	27.1%	51%	10.5%	11.2%
Junior college (344) -----	18%	61%	15.2%	6.6%
Unified (8,415) -----	12.3%	65.6%	14.9%	7.0%
Total (15,020) -----	12.3%	65.1%	15.2%	7.2%

Conclusion. Even making allowance for a probable built-in bias which would predispose a teacher to assume that students would more likely seek advice from teachers than counselors, there is, nevertheless, remarkable evidence here that the main function of counselors—giving advice to students with personal problems—is more likely to be performed by teachers, rather than counselors.

Personal conversations have been held with teachers, and counselors, to obtain their opinion as to why they think this is so. Very few disagreed that it was so. Their opinion as to why the situation exists seemed to center consistently around three factors.

The first and most widespread comment was that the nature of duties customarily assigned counselors does not permit them the time or the opportunity for counseling. Both teachers and counselors are burdened with "paper shuffling," clerical work, record keeping, test administering, programming, student council, and general "errand boy" duties which preclude any effective counseling they might do.

Second, teachers were more inclined to conclude that, since students spend a great deal more of their time with teachers, day in and day out, that, especially in the times when they are experiencing difficulties, they will be likely to seek out a familiar rather than a strange person for advice.

Finally, some of the counselors and a few of the teachers felt that the responses indicated a biased point of view by teachers. The likelihood of some bias has been mentioned previously.

Do you think it appropriate for the state to take action to reduce class size?

	<i>Yes</i>	<i>No</i>	<i>No response</i>	<i>Total</i>
Elementary -----	80%	15%	5%	4,494
High school -----	78%	16%	6%	1,767
Junior college -----	66%	24%	10%	344
Unified -----	82%	13%	5%	8,415
Total -----	81%	14%	5%	15,020

Conclusion. While there is no pretense made that teachers should be considered experts on the political-legal questions of state versus local control, the above question has significance in demonstrating that teachers have few fears of the bugaboo of state domination regarding action to reduce class size. If they do entertain such reservations it is apparent that their strong inclinations toward smaller class size outweigh such reservations.

III. FINDINGS AND CONCLUSIONS: QUESTION 32

A. Introduction

"Is there any specific thing which you think calls for state action to help teachers do a better job of teaching?" This concluding question (No. 32), open-ended in form, brought forth a wide variety of comments. However, there were some themes which appeared again and again: *class size, pupil supervision, lunch duty, clerical work, salaries, supplies and equipment, state aid, education colleges, preparation time, and special classes and vocational schools* were the 10 most frequently expressed concern of teachers. The solutions offered for these problems were fairly specific, but there were other concerns, such as discipline, personnel practices, and administration, which brought forth a wider range of suggestions, with the result that the statistics on any one item were lower. These areas will be discussed later.

Table 1 presents the 10 suggestions which occurred most frequently and consistently.

B. Table: Ten Most Frequently Mentioned Suggestions for State Action

	(% of Teachers Mentioning Specific Items)				
	<i>All teachers</i>	<i>Elementary</i>	<i>Junior high</i>	<i>High school</i>	<i>Junior college</i>
Smaller classes -----	25%	27%	22%	25%	12%
Less pupil supervision -----	11%	15%	5%	5%	1%
Duty-free lunch -----	10%	15%	5%	2%	1%
More clerical help -----	9%	9%	9%	10%	9%
Higher salaries -----	8%	6%	11%	11%	10%
More supplies and equipment-----	8%	10%	4%	6%	2%
More state aid -----	6%	5%	6%	6%	10%
Improve education colleges-----	5%	4%	6%	7%	8%
More preparation time -----	5%	5%	4%	6%	8%
Special classes and vocational schools -----	5%	4%	7%	6%	2%

C. Explanation of Table

In considering these figures, an important point should be kept in mind. These percentages are deceptively low because they were spread out over a wide range of teachers' problems. If they had been structured into simple "yes" or "no" responses, higher frequencies would have occurred. As it was, however, most teachers mentioned only a few of the possible problems encountered by their profession as a whole. Thus the actual percentage of teachers concerned with a particular area is probably considerably higher than these figures indicate. This is illustrated by the differing results obtained for class size on the same questionnaire: although 25 percent of the teachers asked for smaller classes in their written comments, 81 percent had previously replied "yes" when asked specifically if the state should take action to reduce class size.

Most of the comments appeared quite consistently, being mentioned with similar frequency regardless of sex, grade level, or type of school district. The most pronounced differences between men and women involved money and class size: men were much more likely than women to request raises and were also more likely, at least in elementary and junior high, to ask for increased state aid. On the other hand, women were usually more concerned than men about reducing class size.

In sum, this question was exploratory. It elicited a broad range of teachers' concerns rather than measuring precisely the actual extent of their feelings about any one item. Therefore, detailed statistics have been placed in the appendix, and the bulk of this report will consist of teachers' comments, which convey their concerns more effectively than statistics alone.

D. Comments on Top Ten

1. *Smaller Classes—Typical Comments*

Reduce class load, *reduce class load*, REDUCE CLASS LOAD! Even if teachers could once educate 35 and 40 children in a room (and I doubt that they could) they can't any more, what with the breakdown of family control and self-discipline in the American society. More teachers leave the teaching profession for this one reason than any other—even skinflint salaries.

There are other problems that could be mentioned, but this problem is so preeminent that I won't even mention them for fear of detracting from American education's No. 1 problem. —Junior high man.

It is surprising that in the depression years of the 1930's we could afford fewer pupils per teacher than we can afford today.

—Elementary man.

Close the border.

—Elementary man.

The class load is too large. Our newer schools are not designed for 35 children. The desks must be close together because of the limited space and work areas. I feel my best teaching was done the year I had 23 students. There was time to answer everyone's questions and more individual help was given.

It is very disheartening to send the class home at the end of the day, knowing someone has a question unanswered, or someone doesn't quite understand the assignment. It is impossible to sit down with every child for more than a minute or two, because our time schedule is too full.

—Elementary woman.

Class size and teacher load: appropriate class sizes should be determined for each subject area or grade level, *and* maximum *teacher loads* should likewise be determined for each area. For example, it may be that students can learn English composition just as well in a class of 30 as in a class of 25, but the teacher *cannot teach English* to 5 classes of 30 each! This is just one example, but a glaring one.

—High school woman.

Regarding class sizes—when the ratio is determined, do not allow them to include administrators in the ratio. Including them does not give a true picture of the seriousness of the problem.

—High school man.

Assistance to districts which prove they are unable financially to reduce class sizes to a standard set up by the State, and penalties to others which can but do not meet standards of class sizes. This penalty could be reduction of the ADA.

—High school woman.

If the average teacher has 5 classes a day with an average of 35 pupils per class, that is 175 pupils. If the teacher spends 5 minutes per pupil correcting papers, that is a total of $14\frac{1}{2}$ hours. How often does a teacher have $14\frac{1}{2}$ hours outside of school to go over a pupil's work. . . ?

—Junior high woman.

Our P.E. classes are overcrowded in order to sustain small academic classes and specialized programs—balanced out very skillfully with total students and total teachers in school to give a favorable impression of class sizes!

I have already stated my honest opinion under No. 30 and can only add that we face a serious problem, not only to the students we have in our classes *but* a teacher morale problem when we are faced with class size ranging from 55 to 80 students in a class of physical education. *It can't be done* and it's an injustice to the students and the teacher. We want to do a job *and they won't let us!*

I am 100 percent in favor of our academic program but sincerely feel we deserve a chance to do a teaching job equally as well.

—High school man.

Because at least one theme per week is necessary and required, I spend 30 or more hours per week evaluating student papers. My weekly average on teaching, evaluating, and preparation is about 80–85 hours. If my load is not reduced significantly this year, I plan to leave the field.

A man must have some time for his family, self-improvement, and recreation. I nearly lost my mind and my wife last year. And now I see the AFL-CIO discussing a 35-hour week for laboring types. It makes interesting reading.

—High school man.

I teach English. My students write frequent compositions. My class load makes correcting a monumental chore. All teachers need reduction of class size.

I love teaching; I believe I am an effective teacher. I wonder how long I can continue "to perform" and to do adequate correcting of papers. I am relatively young—34.

—High school man.

2. and 3. *Pupil Supervision and Duty-free Lunch Period—Typical Comments*

(These categories are presented together here because they are closely related, and tend to overlap in teachers' comments.*)

A duty-free lunch period. Few teachers have an opportunity to relax during "lunch period." I have often eaten my lunch while standing yard duty. Sincerely, we need help desperately in these areas. If I can assist please call on me.

—Elementary man.

Lunchtime Supervision. At our school we get a five-week stretch of lunch hour supervision which is unbearable. After many hours of

* Since these categories often overlapped, the procedure in coding was to list the one which predominated. However, in cases where both were expressly mentioned, both categories were counted.

teaching, we then have about 10 minutes to eat and then race out to a yard and supervise. I supervised an area of youngsters which needed three other teachers to be properly supervised; had no time or place to get off my feet. The rest of the teaching day and the rest of my home day I was physically and nervously a wreck.

This was illegal, against board rules, yet had gone on for years, and is cruel and inhuman. —Junior high woman.

Teachers, like all other workers, need an hour duty-free lunch period. I have experienced times when I would go from classroom to noon duty, to 25 minutes for lunch, and then back to the classroom. I have been unable to rest at all. Many times I have been unable to even finish my lunch, or if I did, I would have to rush through it. A teacher *cannot* do a good teaching job without rest or time to eat a sufficient meal. I have even been unable to find time to go to the toilet due to a 25-minute lunch period. How can I or anyone concentrate on their work in these conditions? I know I am not alone. Teachers need a noon *hour* to eat, rest, and prepare lessons without rushing. —Elementary man.

Teachers should not be required to perform police duties during lunch, between classes, etc. It is not possible to be a policeman one minute and a teacher the next; the student-teacher relationship is seriously disturbed. I personally object to the humiliation of having to check restrooms, etc. It is also poor economy to use an \$8,000 teacher for such a minor job. —High school man.

One hour duty-free lunch—with unqualified freedom to leave the premises, if desired, for that hour. If we don't have from 15 to 25 minutes duty during lunch, we have 15 minutes morning recess duty, which eliminates our coffee break. Since we have no cafeteria we must pack our lunch. It is not "desirable" to leave the premises, and on a rainy day we are confined to our room with our students *all day*, unless we request a relief. —Elementary woman.

I am beginning to feel more like a policeman than a teacher. I should have gone to the local force rather than work for a credential. Why isn't something done to relieve us of this? —High school man.

4. *More Clerical Help—Typical Comments*

Teachers are the highest paid file clerks in the state.

—Junior high man.

Registers should be done in the office. Cut down on bookkeeping.

—Elementary man.

Find a way to relieve teachers of money collections and multiple record and form filling.

—Elementary woman.

Another secretary in every elementary and maybe every other school. It seems a great waste to train a teacher for five years to do class lists, fill in blanks, and write in the names of children on state tests. I feel I spend at least one hour a day if not more on this type of activity. *This is wrong.* This time could be used to prepare for special class activities or lesson planning. —Elementary man.

Clerical help—particularly for all the forms, etc., that children take home for signatures. —Junior high woman.

Get rid of clerical duties for teachers. —High school man.

Help reduce paper work. —Junior college man.

There is far too much clerical work in teaching today. If something could be done about this one point I feel most teachers could do a far better job . . . —Junior high man.

5. Higher Salaries—Typical Comments

Raise salary minimum to the point where we can earn as much as skilled or even unskilled laborers, considering time on the job. Unskilled laborers make \$3.75 an hour in the building trades, with no education. —Elementary man.

A better teaching salary to induce people to enter the teaching field and prevent good teachers from leaving teaching.—Elementary man.

Increase statewide salary minimum. —Elementary man.

Make the salary scale such that men teachers would not need to hold down a second job. I have done so for the last 10 years in order to provide the standard of living I wish for my family. This takes away time, energy, and creativity from the basic classroom teaching position. —Elementary man.

The main reason that most male teachers do not do the teaching job that they are capable of doing is their moonlighting. I am in a school of about 70 male teachers. Of these, *only two have no job in addition to their regular day-school teaching.*

I, as a social studies teacher, teach that education is the province of the state. If this be true, and this is a serious questionnaire and not just more snow, the state should work for adequate teacher salaries that are uniform throughout the state. —High school man.

Get salaries and benefits high enough to allow a man to keep his family without moonlighting, weekending, and vacation laboring. I'm tired! —Elementary man.

Increase the amount that *must* be spent by districts on salaries of *classroom* teachers. We are short of funds, texts, materials, and teachers, yet more and more money is devoted to community services and special programs, more and more supervisors, coordinators, and less and less to classroom help. The primary goals of education are reached in the classroom. Teacher-pupil relationships are considered last in our district. —High school man.

6. More Supplies and Equipment—Typical Comments

The supplying of reading workbooks for *each* basic state text reader used at *all* grade levels. —Elementary man.

Personally the most important specific thing the state could do to help teachers do a better job is to supply high quality followup materials for the texts we use in teaching. At present, most teachers work up their own materials. This takes an *enormous* amount of *after-school* time due to our "group" system of teaching. For most subjects we need three or two *levels* of difficulty, therefore three or two levels of different followup material. Most of the day we are not teaching one grade level; we are teaching three levels at once. —Elementary man.

Greater supply of materials—books, construction materials, study aids, etc. As of now, any extra materials the teacher feels are necessary to his teaching program must be purchased by the teacher with personal funds, and should the teacher ask for reimbursement, it cannot be made mandatory.

—Elementary man.

Liberal funds for *equipment*. The state guarantees *supply* money but often these funds are useless without *equipment*. We can buy tapes, but not tape recorders; reeds, but not clarinets.

—Junior college man.

It is impossible to spend every night making materials, etc. Materials that we make up often do not mimeograph clearly because the ditto machine is usually not in good working order.

—Elementary woman.

More workbooks and other types of programed learning materials would be a better investment than the endless expense of ditto paper and man-hours expended in the preparation of lesson enrichment material. Teaching machines would serve a useful purpose in most classroom situations.

—Junior high man.

Modern equipment, like teaching machines and language labs; more tape recorders, record players, records, and manuals for the whole class, and workbooks; visual and audiovisual aids to promote the audio-lingual method of language instruction. Establish language labs in every school . . .

—High school woman.

7. *More State Aid—Typical Comments*

The state's main contribution to education should be that of finance.

—High school man.

It is very evident that California needs state subsidy in education if it is to compete with the educational programs offered in leading states and nations, with adequate educational programs for *all* students.

—Junior high man.

A statewide distribution of school tax money, so we can get buildings, equipment, and reduce class loads.

—High school man.

Make funds available for classrooms and salaries when local bond issues fail, rather than letting schools be closed due to lack of funds—or students put on waiting lists for kindergarten, etc.

—High school woman.

Provide sufficient funds to districts in financial trouble to support salaries and pay for supplies. My budget for supplies was cut three times, this year. First cut was 50 percent. We are unable to give the education that is necessary for lack of supplies. At the moment I do not have one reference book in a highly technical course. *State aid!*

—High school man.

Increased financial aid from the state might release funds at the district level for capital outlay to be used for much needed equipment.

—High school woman.

Make possible more money to districts for materials so that teacher time does not have to be spent on devices and aids. An inequity exists in that school funds come from the General Fund and are not invested, as are the funds for fair grounds. Couldn't the situation be

reversed so that money from parimutuel gambling, liquor, etc., be used for education? I don't mean to be discriminatory, but aren't kids more important than fairs and horseracing? —Elementary woman.

8. *Improve Education Colleges and Courses—Typical Comments*

Theoretical education courses should be drastically curtailed. Practical teaching methods should be substituted. —High school man.

One course (a strong one) in the history and philosophy of education in Europe and the United States is all that is necessary for a prospective teacher. There should, of course, be strong courses in child and adolescent psychology. Method courses, except where they apply to a definite subject and its presentation, are absolutely worthless. A good, practical course in what to expect in youngsters and what to expect in a school situation would be more logical. —High school man.

Repeal about two-thirds of the credential requirements in education methods and replace them with intensive study in major and minor fields. . . . These "basket weaving" courses drive many of the best students away from teaching, and those who stay are taught unrealistic and permissive methods that are more detrimental than helpful in the classroom. —High school woman.

More rigid requirements in such subjects as arithmetic, geography, history, English, and fewer courses in education. —Elementary woman.

The education departments of every college and university I've attended (five of them) are inferior. They are staffed by people who haven't taught in years, if ever, in a public school. I firmly believe that every education professor should teach in a public school at least one semester every five years—full time. —High school man.

California universities offer little true postgraduate extension work. As an example: I teach electronics; there are no such courses I can be given credit for at the postgraduate level, and for teachers this is true of all industrial art courses.

As a result, I take so-called "education" courses. There's a limit to the number of such courses that can be taken without duplication of content.

Postgraduate extension instructors of UC, etc., don't know any more about the subject than most of the students. It takes an exceptional instructor to be able to *teach* a teacher with 10 or 20 years' experience and 75 to 100 hours above his B.A. or B.S. degree, etc.

—High school man.

9. *More Preparation Time—Typical Comments*

With a preparation period, more actual demonstrations could be given and all demonstrations would be better. Good teaching is based on good organization and preparation. —High school man.

The most urgent need, from my point of view, is time to prepare good lessons and time to correct papers. If I do a good job, which I try my best to do, I'm up every night and also have to use a great deal of time during weekends to keep up. Many a Sunday I've been home all day correcting papers. A free period in elementary school—with a specialist in P.E., music, or art taking over—would help a lot.

—Elementary man.

Reduce the number of classes per day a teacher teaches. Five classes are too many. If you want thoughtful people in teaching, give them time to think! —High school man.

Improvement is needed in the use of the preparation period. While almost all of the teachers at my school have such a period, a number, each semester, must give up six weeks of it to cover a study hall, or nine weeks to cover the halls at lunch time. It is impossible, of course, to correct any papers during this time. —High school man.

It is so necessary for a teacher to have a free period for better teaching. I feel it should be a statewide requirement. —High school woman.

10. *Special Classes and Vocational Schools—Typical Comments*

Nonacademic schools for students who actively reject academic schooling. Our main difficulties occur with the student who actively rebels against school, isn't wanted by the parents, isn't wanted by the juvenile authority or principals, and thus is forced to stay in the class where he is surrounded by more than 30 highly impressionable teenagers, and finally finds he can get some sort of recognition from the class by doing disruptive things.

The nonacademic school would give him a chance to do the things he can do and get recognition for doing them well. —High school man.

Special classes for emotionally disturbed children so that the 95 percent who want to learn can, without 5 percent wasting their time and the teachers' energies. —Elementary man.

Establish remedial classes for culturally handicapped students.

—Junior high man.

Provide additional schools for the chronic discipline problems from the first grade through high school. I believe that many excellent teachers leave the field because they are unable to cope with the two or three percent of the students who have been class disrupters through twelve or more years in the public schools. —Junior high man.

Special classes or schools for nonreaders and low IQ students.

—Junior high woman.

The provision of continuation schools for students who refuse to conform to school regulations. I definitely feel it is unfair for those students who desire to learn to be forced to attend classes with students of this type. —Junior high woman.

There are many students enrolled in our "comprehensive" high schools who are not mentally capable nor scholastically prepared to enter the existing schools. They represent tremendous discipline problems; they usurp class time that could well be spent with more capable students.

We need special schools (trade, etc.) that can be of material help to these "potential citizens." In most of our existing institutions, they achieve nothing but frustration and unhappiness—making no positive contribution, now or later, to society. Surely we can provide them with a positive situation that would develop their "talents."

—High school woman.

E. Additional Areas of Concern—Typical Comments

In addition to these 10 specific items, a number of other more general areas were also mentioned: nonteaching duties, teacher assistants, use of pupils' time, pupil standards, curriculum, discipline, special classes and schools, supplies and equipment, textbooks, facilities, teacher training and credentials, teachers' professional status, personnel practices, administration, community relations, salary, tenure, retirement, finance, junior college problems, miscellaneous, and responses to state action.

1. Nonteaching Duties

(In addition to pupil supervision and lunch duty, teachers also complained of other nonteaching duties. Outstanding among these were various types of meetings: PTA, committees, faculty meetings, in-service training, institutes, etc.)

Many extracurricular demands dissipate a teacher's time and energy. Some of them make it necessary to just "muddle along in the classroom" while demands of the nonteaching activity are met.

—Junior high woman.

Eliminate yard duties, hall supervision, club sponsorship, PTA meetings, and extracurricular responsibilities. Teachers devote too many hours to nonteaching duties and paperwork. The teachers do not have time to prepare work, correct papers, and do a good job of teaching.

State legislation is needed to set the responsibilities for teachers. The law should state, "Teachers should teach only," and it would not be legal to make them do other things.

—High school man.

Pay teachers for *all* extracurricular activities, such as supervisory duties (at games, at plays, at noon lunch hours). This will have a twofold benefit: (1) correct an injustice to the teachers (administrators assign extra duties in a *very* promiscuous way); (2) there would be less outside duties assigned, since teachers would *have* to be paid, and no doubt funds would be limited.

—High school man.

Administrators could prepare bulletins for distribution to teachers to read; then curtail the many long, unnecessary meetings where they *read* these same items to their teachers.

—Junior high man.

If we are expected to do a good job, we can't be expected to be all things to all people. Tonight at the PTA money-raising carnival, five teachers are being "dunked" in water. Very professional! Very much detested by those teachers!

—Elementary woman.

2. Teacher Assistants

This includes readers and specialist teachers. (Clerical help has already been covered.) These readers would assist in menial tasks directly connected with teaching: correcting and grading papers, typing ditto sheets, etc. The other category of teacher assistants are specialists who would teach regular classes in such areas as physical education, mathematics, science, music, art, etc. These specialists were mentioned mainly by elementary school teachers.

Teachers in elementary teach all subjects, but most teachers can't teach all subjects well. In elementary, we should teach basic subjects, with special teachers for art, music, science, and P.E.

—Elementary man.

Separate teaching of P.E. and music should be encouraged. You cannot expect the regular teacher to know how to teach *everything* equally well. Neither can you expect a suited or high-heeled teacher to lead in exercises for the President's Physical Fitness Program, however needed it is, and it is.

—Elementary man.

Clerical assistance for teachers (checking exams and homework papers—entering grades). These routine matters use up valuable time that could be spent “preparing” lessons for classes.

—High school woman.

Provide readers for those instructors whose courses necessitate a great deal of paper reading.

—Junior college man.

By far the largest amount of time and effort becomes lost in paper-work details, such as attendance reports, grading examinations, laboratory reports, and homework. This time and effort could and should be conserved for revision and improvements in lecture topics, notes, demonstrations, and calculation examples explained in class.

—Junior college man.

3. Use of Pupils' Time

A number of teachers felt that there were too many interruptions of classes, for reasons ranging from messages to maintenance. Other comments suggested a reduction in extra-curricular activities, restricting them to after-school hours, and perhaps limiting the number of activities an individual student could participate in. High school teachers were especially likely to be concerned with this problem.

If the state could curtail the number of interruptions, assemblies, rallies, social activities, etc., I would be all for it. These interruptions disrupt the atmosphere of quiet, calm, and order which is so necessary for scholarship, and encourage disorder and general chaos. All activities should be after-school activities and not part of the classroom schedule.

—High school woman.

I should welcome action that would do away with *drives* and *reward* assemblies. Regarding drives, they (1) take valuable time (money raised is not commensurate with time spent); (2) convert the classroom into a moneyraising agency; (3) sometimes use pressure tactics.

—High school man.

I don't believe it is in the interest of good education for anyone ever to miss a class because of practicing or participating in some sport. Sports should be limited to after-school hours or weekends, even if it means cutting down the length of game times due to absence of lights.

Physical education is a must! But too many schools use too much school time for sports.

—High school man.

Eliminate painters, window shade adjusters, alterations of any kind, treetrimmers, etc., during school hours—just let us *teach*.

—Elementary woman.

Reduce the number of high school student activities allowed per student, as many do not have time to learn as they are too involved in sports, social clubs, booster activities, etc. —High school woman.

4. *Pupil Standards*

Suggestions in this area fell into two main groups: pupil standards and regulations pertaining to age. Among the former were uniform statewide standards for grading and promotion, facilitated perhaps by standardized examinations given throughout the state. Some teachers wanted promotion to be based on achievement rather than age, and some suggested that certificates of attendance be given instead of high school diplomas to pupils who had not met minimum academic standards.

Lowering the high school compulsory attendance age was recommended by some, while others suggested a higher age for entry into kindergarten and first grade, or readiness tests to determine whether the child was mature enough to attend school.

Set minimum state educational standards, such as New York State Regents. —High school woman.

Promotion in elementary schools on the basis of *age* rather than on ability is extremely frustrating to teachers because students lack incentive and lose all respect for standards. This is disastrous to proper discipline. The influence of this is definitely felt in high school, too! —High school woman.

Reexamine the compulsory school age law. There are too many students 15 and 16 years old who are such discipline problems that they detract from the education of those who wish to learn.

—Junior high man.

Institute state examinations. Stop indiscriminate passing of students regardless of achievement scholastically. Issue certificates of attendance rather than diplomas to those who do not meet scholastic requirements. Make high school graduation a criterion of accomplishment.

—High school man.

5. *Curriculum*

Among the suggestions in this area were more emphasis on subject matter and fundamentals, and less on "frills"; uniform Statewide curricula with courses of study made by experts in the various subjects; modernization and simplification of courses of study, with teachers' having a voice in this revision; upgrading various areas such as arts, social sciences, humanities, and vocations; criticism of further additions to the curriculum without dropping other requirements to make room for them; more flexibility in scheduling to permit variable class sizes for different subjects, departmentalization in grades 4 to 6, longer teaching day and year, etc.

Get back to basic essentials and eliminate the frills. The students shun the hard work and get by with their good grades in the so-called "enrichment" subjects, but without foundation. Senior high students just don't read, spell, or write as fifth graders used to do—and arithmetic is foreign to most of them. —High school woman.

Do something about our already overloaded curriculum. Spanish is now compulsory five times a week and these children don't even know English. No reduction in curriculum was authorized by the state.

—Elementary man.

Figure out how many teaching hours there are in a week, look at the state requirements, and then send this information and its solution to all elementary teachers.

—Elementary man.

Scrutinize carefully the new mathematics concept which is being forced on us. This is "in lieu of" and *not* "in addition to" our already established math program. We have a whole era of "nonreaders" and "nonspellers" as a result of *progressive education*. *Now math??*

P.S. Even the teachers don't understand it! —Elementary man.

I think that there should be more uniform content in the several districts and/or the state. Social studies units vary widely throughout California, with the result that children of traveling or moving parents sometimes encounter repetition.

—Elementary man.

Upper elementary grades, fourth to sixth, should be departmentalized. It is a ridiculous assumption that all elementary teachers are versatile in so many of the subjects taught. Each teacher has strengths and weaknesses. Why not take advantage of them, and not penalize the students?

—Elementary man.

Children should be separated into groups according to ability. A lesson suitable for a child with an IQ of 80 does nothing for a child with an IQ of 100 and above, and certainly a child with a great capacity for learning should not have to wait for the slower learners.

—Elementary woman.

6. Discipline

Teachers wanted more power to discipline unruly pupils, and more support by their administrators when doing so. A number of teachers suggested that chronic troublemakers should not be allowed to disrupt classes and should be removed from regular classes or schools. It was also felt that parents and students should take more responsibility for their behavior, and that, in general, the legal framework for discipline should be strengthened and clarified so that discipline, suspension, and expulsion would be simpler and more effective. Some comments asked that teachers and schools be protected against the threat of lawsuits arising from disciplinary measures.

Give us the right to use the necessary disciplinary methods. We need more respect in the classroom.

—Junior high woman.

Better administrative support with serious discipline problems. The teacher is constantly placed in a ridiculous position by the administrators' lack of action.

—Elementary man.

Allow the teacher to teach and not spend the biggest part of time disciplining. If only we could take the laws we now have and be able as teachers to enforce them, with principals who have the guts to back up a teacher in his actions that are within reason and the law. Either students come into the classroom to learn or out they go.

Yes, I know these children are in great need of help and I'm aware of the fact that they come from some very poor home conditions. Until these children are helped to overcome their problems through counseling, of which we have very little, they will always be a problem in our classrooms. In a good many cases the administrators put the blame on the teachers and make it seem that it's the teacher's lessons and plans or room environment, etc., that is the reason for an unruly classroom.

—Elementary man.

Do not withdraw ADA when a student must be removed for disciplinary reasons. When ADA is withdrawn, many school districts keep their troublemakers in order to keep the ADA. —High school man.

The energy and time spent on discipline problems in and out of the classroom needs immediate, drastic attention. Three-time losers for car theft have no business in a public school classroom. Neither should we have to try to teach those who consistently refuse to learn after an age much lower than we now have.

Something should be done to force parents to assume responsibility for the conduct of their children 24 hours per day. Too many times a parental conference leaves the teacher as the goat—he hasn't provided the proper incentive or motivation, or he is an old crank if he expects students to act like ladies and gentlemen.

—High school man.

More authority to remove recalcitrant students from ordinary classrooms and force parents to participate in psychiatric clinics for the severely disturbed. Perhaps the crimes of violence occurring later on would be avoided. Teachers spot these problems long before others, yet are almost powerless to accomplish any changes as most parents can't or won't take the time to assist these children.

—Elementary man.

Please allow the teacher to exercise discipline in the classroom as it was in the past. The teacher no longer controls the room except by a *strong will* and nothing else. Industrial arts teachers have a very difficult task in controlling their classes when the natural tendency is for the office to program the incorrigibles into our classes, and then tell us that if we *touch* one of them we will be fired.

I have known many good teachers who have left the field because they could not discipline their classes and received *no* help from the front office. Do not leave it to the option of the district whether a teacher can administer corporal punishment.

—Junior high man.

Make it possible for schools to refuse to enroll students who can't benefit from schooling—we have had three teachers beaten by students who were mentally ill.

—Junior high man.

The principle of compulsory education is not psychologically sound for teenagers: education is not a privilege; it's a prison sentence to many of them.

I believe it would be better to frankly face the fact that if we must keep them "off the streets" we'll frankly babysit those who don't work.

—High school woman.

7. *Special Classes and Schools*

Special classes and schools for pupils who do not fit into regular classes have already been discussed. In addition to these, teachers were

also concerned with remedial programs and with improved guidance, counseling, and testing. Other comments protested "dumping" of problem pupils into classes for the mentally retarded, vocations, art, etc. Some teachers wanted more attention paid to underprivileged minority groups. Still others felt that programs for gifted pupils were being neglected.

Crash program for nonreaders. (Start program at primary level.) If local districts are unable to do so, the State should develop an intensive reading program which would improve the reading skill of the slow reader before he is allowed to enter the junior high school. There are too many students who enter senior high school with a grade level of reading that makes the learning of high school subjects a difficult if not impossible task. Too often this leads to failure, rebellion, and eventually dropping out.

—High school woman.

A committee should be set up to study the needs in a realistic vocational program which would enable the student to become a journeyman in 12-14 years of school and on-the-job training. This committee should include members of organized labor, management, civil service, legislators, and teachers.

—Junior high man.

More consideration for gifted students.

—Junior high man.

State support and backing for guidance (counseling) is the Number 1 educational importance to this writer. Funds should be expended to develop this vital area of education. This function of the public schools is not a "frill." Rather, it is a critical division of a school in aiding boys and girls to obtain information, understanding of themselves, and professional guidance in order to become better solvers of problems to which they relate.

—Junior high man.

8. *Supplies and Equipment*

The main category in this area, more and better teaching supplies and equipment, has already been discussed. The scattered themes which remain include such things as protests against giving free pencils and paper to pupils.

9. *Textbooks*

More and better textbooks, and a wider variety to choose from, were some of the aspects mentioned in this category. A number of teachers criticized the state's selection procedures, didn't want to be forced into using state texts, and believed that the choice of books should be left to classroom teachers in the districts. Some complained that they had to give up good older texts for newer, less adequate ones. The state was also criticized for taking too long to fill orders for books. Another suggestion was that pupils should have more responsibility, paying for damaged or lost books, and perhaps even buying or renting them.

Textbooks were mentioned more frequently at the lower levels. Elementary teachers were most disturbed over the quantity of books and, along with junior high teachers, were also more worried than high school or junior college instructors over textbook quality.

Better and more up-to-date textbooks that apply the findings of modern research. . .

—High school woman.

The one state action that can be taken is the abolishment of state-approved textbooks and state printing of same. In the field with which I am familiar, mathematics, the state-approved textbooks on the seventh and eighth grade level are far inferior to the privately printed texts, in both content and quality. A conscientious teacher finds it necessary to supplement the text with many hours of preparation in order to present adequate instruction which the students deserve. Let's get private enterprise back in the textbook business.

—Junior high man.

Top notch texts should be provided with "built-in" study and comprehension exercises at the end of chapters, along with enrichment suggestions. These exercises should be keyed to the content material.

—Elementary man.

More texts in many fields that slow learners can *read*.

—Elementary woman.

Every year there seems to be a shortage of textbooks and a drastic reduction of books (on the authorized list) which teachers would like to use as readers or enrichment, but for which the budget seems too narrow. State action should do something to make the book situation more flexible; it should not take 2-3 months until an emergency order of additional books arrives.

Special monetary *book aid* to schools!

—High school woman.

Classroom teachers should have more to say about the adoption of textbooks—or a more liberal policy should be adopted regarding textbooks. (The state texts are *not* meeting the needs of individual students—no *one* book can; a variety of levels and interests must be considered.)

—Junior high man.

10. *Facilities*

More and better classrooms were the primary requests, but other facilities, such as libraries, gymnasiums, teachers' rooms, laboratories, and storage space, were also mentioned. Complaints about the physical conditions of existing facilities included inadequate lighting, ventilation, soundproofing, and painting. Some teachers asked for curtailment of "fancy" buildings, which they considered to be wasteful and impractical, and suggested standardized plans, with teachers' having some voice in their design.

I believe the state should have more to do with supervising building plans and construction. The building I teach in was very poorly planned. Our principal complaint is lack of air and ventilation. We can only open one of the windows. During the day the hot air is trapped and the rooms are very hot and stuffy. We have steam heat which I have never turned on since the building was erected 5½ years ago. I believe paying architects 8 percent for revised plans that were worthless to begin with is criminal.

—High school man.

In order to have a better educated child, I feel that each school should be required to have some oncampus library facility, a place where a child can go to select things of his own level and interest. The library may be in a vacant room or a portable one (bookmobile).

In our school there are over 1,200 children and we have no oncampus library. We get our books from a district library and in this way the

child has no choice in what he reads. He reads what is presented. In most cases these books are the only ones available. The public library is over two miles away and traffic is heavy. —Elementary woman.

Not a specific state function. However, helping the communities to furnish adequate school classrooms—the districts to supply the teaching staff—would be a great aid.

We've had staggered sessions—face them again next year—and the prospect of double sessions looms the next year. —High school woman.

Adequate facilities should be provided. Schools should not be dependent on the whims of their communities for financial aid.

—High school woman.

More classrooms!

—High school woman.

11. *Teacher Training and Credentials*

Education courses and colleges have already been discussed. In addition to these, other comments suggested higher standards for teachers through stricter credential requirements, elimination of provisional credentials, and better screening of prospective teachers. In-service training was also mentioned frequently, including more advanced courses for teachers who are already highly proficient in their fields, help on actual problems encountered in teaching, opportunities to observe expert teachers, and grade-level meetings and monthly bulletins on techniques. Some teachers opposed credential changes and condemned the Fisher Bill because they believed nonacademic areas were being discriminated against, or because there was less emphasis on good teaching methods.

Scholarships, grants, and loans were suggested for prospective teachers and also for experienced instructors desiring in-service training or advanced study, such as study abroad for language teachers, etc. Some teachers asked for more practice teaching.

Secondary and junior college teachers were more likely than elementary teachers to mention problems of credentialing and teacher training.

Higher standards and requirements for credentials.

—Elementary man.

College students should be given more time to participate in student teaching under a master teacher. The requirements for graduation should be extended to include more practical application in a school-room situation. This could be accomplished within a four-year program by doing away with a lot of those useless educational theory courses.

—Elementary man.

I am concerned with some of the legislation now being considered with regard to credential requirements (Fisher Bill). I cannot see how a major in an academic subject could make one a better teacher of typing and shorthand. An academic background, yes. But, let's keep the major emphasis in the field to be taught. —High school woman.

On rare occasions, due to emergency closing of schools, etc., I have had opportunities to visit other teachers and classrooms and observe ongoing programs. I would appreciate opportunities for this type of thing at least twice during a year. In-service training in *real* situations

could be most helpful if teachers were released from teaching for this observation and discussion.

—Elementary man.

12. *Teachers' Professional Status*

The major concerns here were more voice for teachers in decisions and policies, and more respect and prestige for classroom teachers. Other comments dealt with more autonomy for teachers, more academic freedom, and better working conditions (rest breaks, teachers' rooms, etc.). Another area involved support or condemnation of various teachers' organizations.

Teachers should be allowed to teach under the democratic principles they are supposed to instruct their pupils about. Also, they should be treated as first-class citizens rather than second-class citizens. In my own case, I plan to resign from my present district at the end of this school year because I cannot tolerate not being allowed to freely express my opinions.

—Elementary woman.

Recognition of teachers' opinions regarding learning situations. It appears that great reliance is placed upon the opinions and recommendations of administrators who are out of *personal* touch with the problems of education. It would seem that it is the teacher who would be able to supply the information necessary to help solve current problems in education.

—High school man.

Promote everything you can to raise teacher morale. Teaching is a *rewarding career*, but not just a job with a pension. There is no disgrace to being a teacher. Administrators are not "super" teachers.

—High school man.

Teachers must have status in the community, and not the tongue-in-cheek type of today. Many teachers lack self-respect—they can't even get it from the students!

—Elementary man.

Work carefully with the California Teachers Association and help them wherever possible with legislation. The majority of California teachers belong to the California Teachers Association and want to be represented by it, but too many Legislators would seem to ignore this. Advice from CTA helps students, parents, and teachers.

—High school man.

No union.

—Junior high man.

Discourage administrators from forcing CTA on teachers or creating atmosphere against AFT. A district as a political organ should not support or aid a teachers' association.

—Elementary man.

13. *Personnel Practices*

Personnel practices were mentioned most frequently in the upper grades and in junior colleges. Comments concerned two broad areas; assignment and evaluation procedures. The major complaint in the first was the failure to assign teachers to their areas of competence, giving them other courses which they did not feel qualified to teach. Some teachers felt they had to prepare too many different classes, and they requested limits to the number of different courses to be given by any one teacher. They also wanted equal distribution of classes and duties, without favoritism. The use of preparation periods for parent confer-

ences or pupil supervision was also protested. It was suggested that teachers' duties, assignments, and salaries should be specified in their contract. Some teachers asked for an effective channel for handling grievances.

However, the main concern in the area of personnel practices involved better procedures for evaluation, transfer, recommendation, promotion, or dismissal.

Require school districts to place teachers in their major area of preparation.

—High school man.

Teachers should be encouraged to better themselves. There is nothing more discouraging for a teacher who is sincere and interested in her field to take a sabbatical and do a year of graduate work in her field, only to return to find out that she is no longer teaching the same subject.

In my case, I did a year of graduate work at the Sorbonne and returned to find that I was no longer a full-time French teacher, but instead I was teaching remedial reading and remedial English. The principal's explanation was that I had been away for a year.

—High school woman.

A more even load for certificated personnel. Too much free time is given heads of departments, coordinators, and aspiring administrators.

—High school woman.

Supervisors need to be instructed that they are to *work with* the teachers in solving problems. In so many cases they feel and display a contempt for those teachers who genuinely seek help. This has resulted in the loss of excellent teachers to the profession while many less qualified have been retained because they have a better personality and are better able to *mix* with their superiors.

—Elementary man.

There should be a maximum as well as a minimum number of times a principal should observe his or her teachers. I can think of no possible good to be derived by any principal's "dropping in" four or five times a week for "20 minutes or so." If there is so little else to do he ought to be teaching a class himself. It becomes a "checking up" to the point where teachers wonder if after four or more years of college they are competent.

—Elementary woman.

Unfair ratings, totally unsubstantiated by any facts—only hearsay—would suggest if they are going to rate teachers, they should at least sit in the classroom to see what they are rating.

Because of difficulties with the administration, it was recommended that I not be continued at my school. I was so nauseated with the whole thing I didn't wait to see if I would be sent elsewhere in the district. Charges were made with nothing to back them up and I got the impression no one really cared anyway. I am now teaching for (a well-known computer company).

I enjoyed teaching tremendously and, if I had been a man and this was to be my life work, I might have inquired about a hearing. However—any type of profession that allows this type of treatment by colleagues and administrators to young, qualified, idealistic, and I'll go so far as to say *good* teachers, is one I'll have nothing to do with ever again. Somebody who cares less can save the youth of today.

—Former high school teacher.

One thing that might help greatly is to make the teacher's *whole* personnel file available upon request. Who needs secrets?

—Elementary man.

Teachers should have the right to sue if false information or assumptions are used in their evaluations.

—Junior high woman.

14 Administration

Administration was a recurring theme of teachers. It did not appear among the "top ten" for two reasons. First, it was a complex area, lacking single, relatively simple solutions like smaller classes or clerical help. Second, administration was mentioned in connection with a variety of other areas, such as pupil standards, discipline, class size, preparation time, nonteaching duties, and personnel practices. However, these were coded under the other headings, not under administration.

While this category deals mainly with administrators, some comments also involved other nonteaching personnel, such as supervisors, coordinators, counselors, etc. Fewer and better qualified administrators were the most specific suggestions; "better qualified" frequently being defined as having more actual teaching experience.

A number of teachers expressed concern over their relations with administrators, feeling that administrators should have more respect for teachers, and should give them more help with problems arising in the classroom. Some teachers believed this situation could be improved by limiting or reducing administrators' authority, and some suggested that teacher evaluations of administrators would be helpful.

A careful examination of the administration of each school district. A district whose administrators do not seek the cooperation and best effort of its teachers is wasting valuable tax money.—High school man.

Limit the number of administrators—so many "chiefs" you can't find the "Indians" in some districts. This could reduce the class size a great deal in our district.

—High school woman.

We have three administrators in our school: principal, vice principal, and dean of boys—totaling about \$35,000 per year. Each has a secretary and office space. We also have many salaried personnel at the main city office—total cost to district: fantastic. Yet I don't think they affect the degree of education the student actually gets to any degree. Why so many administrators?

—High school man.

Full-time administrators, full-time counselors, full-time supervisors, and plenty of them.

—Elementary man.

I think principals should spend at least a semester back in the classroom at least once every five years so as not to lose contact with teacher problems. I also think principals should have taught primary and middle grades, whether they be men or women.

—Elementary woman.

Yes! Train administrators to help teachers instead of making them nervous. If they (the administrators) want some aspect of teaching changed let them be honest about actually doing and showing what they want changed. The practice of putting down black marks on a sheet and asking demoralizing questions such as "Didn't you have

any methods courses in that college you went to?" are no help at all to a teacher trying to teach and at the same time read the administrator's mind.

—Elementary man.

Select administrators who are *competent, intelligent*, and whose main function is to try to eliminate conditions that prevent teachers from doing a good, sincere job of teaching. Many good teachers become thoroughly disgusted and frustrated by the myriad of endless "clerical" reports that are required by the administrators. In many instances, we have turned in the same information three or four times with no explanation about the use or dispensation of the material requested.

—High school woman.

There is one procedure which, if backed by state policy, could quickly remove or improve many of the problems now existing in our schools. It would also make unnecessary certain measures which have been suggested, such as the complicated question of administrators' teaching a portion of the school year.

This is the procedure I have in mind: the regular rating of administrators *by the teaching staff*. Certainly no one is in a better position to judge the effectiveness of administrators than the professional staff which they are supposed to serve. And the system could certainly not lend itself to any more abuses than that which now exists. The Principal and Co. of a school are not entrepreneurs, and the professional teaching staff are not their employees. I do not believe that education is best served by allowing administrators the arbitrary power to ignore the majority opinion of professional teaching staffs; nor does it foster the growth of democratic principles.

—High school man.

I feel one very serious threat to keeping and maintaining good attitudes among teachers is fair and professional treatment by administrators. Too often we are talked down to, read bulletins to, as if we were not able to read. Our judgment is ignored and things done with children that the administration thinks is fine when they don't know the child. Supervisors call meetings only to have the teachers OK something they have already adopted. They then say it was done by the teachers. This wastes our time and makes us feel as if we were not capable of independent thought.

—Elementary woman.

15. *Community Relations*

The main interest in this area was for more public awareness and support of education, and more recognition of the good job being done by the schools. Other comments asked for less public or parental interference, standards for school board members, less emphasis by the school upon public relations, and less emphasis on general community welfare projects which diverted attention from education itself.

Education of parents leading to better understanding and support of the public school's functions and responsibilities.

—Junior high man.

School takes on more and more, and the home does less and less. Example: See if they (children) have clothing, food, health checkup, social hygiene. These are important but the home should take some responsibility.

—Elementary man.

Greater state control to free teachers from the fears of local pressures.

—High school man.

At the present time the competent teacher is torn between a desire to teach according to his standards and the desire of administrations to keep the community happy by giving passing grades to the inept and high grades to the mediocre. The result is a lowering of standards on the part of teachers and a general lowering of the academic standards in American schools.

—High school man.

16. *Salary*

This category includes all aspects of salaries except raises, which appeared previously. Among the more common themes were uniform statewide pay scales, experience credit transferable from one district to another, less disparity between salaries of administrators and teachers, extra pay for extra duty, fringe benefits such as health insurance, merit pay, and a longer work year.

Make it possible for a teacher to transfer to another district without taking a big cut in salary.

—High school man.

Pay teachers the same as administrators.

—High school man.

A district will pay an administrator, who does nothing but supervise social activities, more than the best teacher in math, English, etc.

—Junior high man.

Yes. Be more realistic in relation to the academic teacher and the physical education department. When P.E. people work after school they are paid. Academic people will "work" the same football game or track meet, often doing the same job and putting in the same number of hours, and will not be paid. When the English teacher works after school on debates, contests, speeches, etc., he (at any rate, many of us) is not paid.

—High school woman.

More liberal tax deductions for advanced education.

—Elementary woman.

16a. *Tenure*

The most common suggestion was that tenure should be statewide and transferable, so that a teacher could move from one district to another without losing tenure. Other comments asked for stronger tenure protection, while still other said it should be weakened because it is now too difficult to get rid of poor teachers.

Extend provisions of the tenure law to all public school teachers in California.

—Elementary man.

Eliminate tenure.

—High school man.

Interdistrict tenure should be very seriously considered, as well as salary schedule placement. Quite often, a teacher remains in a district only because he can't afford to move, perhaps doing less than his best. A change might be to the advantage of the district as well as the teacher.

—High school man.

17. *Retirement*

Credit for out-of-state teaching experience in the California Retirement System was the main concern of teachers in this category. Other comments said that teachers should be protected by social security.

Recognize ARCROSS—out-of-state teachers to be put on a California retirement plan.

I made the mistake of coming to California, lost my retirement in Illinois, and probably won't teach long enough in California to get an ample retirement pension.

—Junior high woman.

Would it be possible to tie the Teachers' Retirement System to social security to help the young, struggling teacher with a family stretch his monthly paycheck, and also to provide his family with the protection (both survival and retirement) that social security gives?

—Elementary woman.

18. *Finance*

More state aid, the major topic of this category, has already been discussed. Many of the remaining comments involved new sources of revenue, such as state aid, federal aid, countywide taxes, increased local tax limits, and revisions of state apportionment procedures. Other comments covered equalization of aid for poorer districts, more accurate computation of pupil-teacher ratios so as not to include nonteaching personnel, aid to districts for special purposes, opposition to countywide taxes, withholding state money from districts which do not conform to state codes, and revision of rules about bond elections so that a mere majority would be sufficient to pass them.

Place the financial basis of the school system on a statewide level instead of on local control. This would make salaries as well as courses of study more similar throughout the state.

—High school woman.

I do not believe the county equalization proposal for school financing to be a constructive solution when there is such a disproportion between the wealth of the richest and poorest counties in California and in their respective enrollments.

—Junior high man.

Recognize the need for federal aid.

—Elementary man.

State apportionments should not be made on the basis of average daily attendance, as is now the practice. To get more state money administrators simply load more students in the classes and hire fewer teachers, which is a detriment to good teaching. State apportionments should be made on the basis of "classroom units." A classroom unit is one teacher and 25 students. The district should get approximately \$6,000 for each classroom unit. If a district has more than 25 pupils per teacher average, they get no extra state apportionment for the overloaded classroom. The present apportionment laws based on ADA actually reward districts financially for having overloaded classrooms.

—Elementary man.

Eliminate that stupid, damned register. (If insurance companies can operate on probabilities, why can't the state?) —Elementary man.

A complete change in our tax structure would give money for needed classroom construction. Today the school tax is about the only tax that a voter can directly vote upon. I can certainly understand why an already overburdened taxpayer will vote No when he has this one little chance to express himself.

However, our children, our most precious possessions, are suffering. This is false economy and may prove disastrous to our very future. Therefore, a sound tax base needs to be provided *now*. Ten years from now may be too late for the exploding population of California.

—Elementary woman.

19. *Junior Colleges*

The three main concerns peculiar to junior colleges were (1) separate districts, (2) treatment of junior colleges as part of higher education, with academic senates, a master plan for higher education, etc., and (3) changing financial support from ADA to some other basis, such as enrollment.

An approach to attendance more like that of the university and less like that of high schools is necessary for junior colleges.

—Junior college man.

Convert junior colleges from "average daily attendance" to "full time equivalent" accountability.

—Junior college man.

Outside of the fact that the state should aid more in this area (JC), we are constantly being hampered in our teaching because the state code lumps the JC into the secondary area. We need a separate code for the college—and now!

—Junior college man.

At the junior college level, teachers should be permitted to play a larger role in setting academic standards—similar to the "academic senate" of the California state college system.

—Junior college man.

Separate all junior colleges from high schools. Combined districts give most attention to the high schools; the colleges are shorted.

—Junior college man.

Require independent junior college districts for all junior colleges so that administrators and boards will spend the time and effort required to devise a program which will make junior colleges genuine institutions of higher learning rather than "high schools with ashtrays."

—Junior college man.

20. *Miscellaneous*

The state should have more to say about unification as to which districts unify. Too much local politicking is being done by administrators in order to keep their jobs, therefore the needs and best interests of the communities involved are not being served.

—Elementary man.

Standardization of school lunch program to give the students a better lunch, so they feel better and can work better due to alertness. Too many schools have a "hot starch" lunch program with no supervision of the items the students purchase. Too many students end up with potatoes, gravy, macaroni products, bread, and popcorn—and wash it down with "Cool Ade" or punch.

—Junior high man.

There should never be any federal controls—too much federal government in everything now. —Junior high woman.

Limit the term of *any* state superintendent to eight years. This would allow for "new blood" and solutions to problems. —Junior high man.

Our young people are constantly being offered a distorted view of life, through certain prevalent types of false advertising and questionable entertainment, which makes it extremely difficult to install true values in their lives in the classroom.

I believe the irresponsibility of persons engaged in misdirecting our boys and girls in such ways should be dealt with, at the state (and national) level, in a more vigorous manner. —Junior high man.

Better communications on the teacher level. While aware of the fact that the State Department of Education publishes valuable materials, these same materials apparently circulate through restricted channels, inasmuch as I have but rarely come across them. I think a bibliography of state publications in a given field could be made available to all teachers. —High school man.

21. Responses to State Action

The majority of teachers responding to this question made suggestions for state action, but there were also some notes of caution and opposition.

I believe that many educators feel, and I would concur, that many statutes were legislated rather hastily without a full analysis of all possible "side effects." —Elementary woman.

Professional educators in all fields should be consulted when legislation regarding education is to be enacted. —High school woman.

The state should not legislate programs without providing specific funds to cover the cost of the program. Examples of which I speak are the polio immunization requirement and the new testing program. —High school woman.

The local level of control is best. Each school, even, must meet its own district requirements, which often are quite different from other districts' needs in the same city. Standardization is really impossible to attain and really unnecessary. —High school woman.

The state should set the "tone" for education; standards, attitudes, and accomplishments. I know that this means more state control, but local controls are too uneven, petty, varied, etc.—High school woman.

Initiate legislation which gives teachers some real responsibility and authority, instead of allowing them to be so subject to the whims of administrators and school boards.

Don't leave loopholes for boards. Recent laws have done little good. Boards don't follow "make every attempt to" laws. —Elementary woman.

22. Suggestions for Further Studies

I think the state needs to investigate more realistically the problems in schools located in blighted areas of our cities. More research should

be done to solve some of the problems faced by educators in their task of raising educational standards in the poorer sections.

—Elementary man.

Perhaps the state might do a thorough study on the feelings of teachers on the question of departmentalization at the elementary level, and a practical rather than a theoretical study of whether children beyond third grade are really better off being with one teacher for the entire day.

—Elementary man.

Objective studies of all the new teaching devices by noninterested groups, before they are adopted in our schools. We are not afraid of them, but money should not be spent on fads and gimmicks when it is needed for other things of proven value.

—Elementary woman.

Study the problem of unwilling students—help us to meet their needs, but also protect us from wasting our time and effort on them.

—High school man.

I believe that there is a great need for a study of the relationship between classroom teaching and administration. The longer I teach, the more I am distressed by the demands and restrictions placed upon teachers—demands that eat away at teacher time so that instruction is relegated to the end of a long list of duties; restrictions that drive away creativity and enthusiasm.

I cannot believe that the administrators I have observed are doing more important work than I; they are doing *different* work, but it is not more important. If I *did* think that my work was less important, I would not be able to continue as a classroom teacher.

In my opinion, educational standards will not improve to any great degree unless there is a widespread and sincere conviction that the most important things happen in the classroom. —Junior high woman.

Publish a bulletin wherein teachers could determine how each school district in the state ranks in regard to salary, class size, staff morale, attitude, and philosophy of supervisors and school boards, etc.

Send a copy of this study to every person who indicates an interest in teaching in California, and where possible, to teachers who contemplate location changes.

Pressure would be on those districts not up to par according to the state study.

—Junior high man.

Whenever surveys are made to determine the kinds of curriculum to adopt, effectiveness of courses, etc., administrators and/or university professors make these surveys. Why not have this done by the people who meet the problems on the firing line every day?—High school man.

23. *Reactions to Questionnaire*

In evaluating this study it is important to consider teachers' attitudes toward it. Responses ranged from enthusiasm through skepticism to outright criticism. However, the rate of response and the actual comments suggest that many teachers welcomed this chance to voice their concerns. Sixty-six percent of the teachers returning questionnaires did take the trouble to offer suggestions, and almost 500 attached up to a dozen additional pages of comments. Many teachers gave their

names and expressed their willingness to provide additional information, and some even offered to testify before the committee.

Thank you for your interest and help. You will be swamped by suggestions, I know. I have known so many teachers who work such long and hard hours, some every evening. Even if nothing is accomplished, it gives us a boost to know someone is interested in helping our unvoiced cause. —Elementary woman.

I cannot believe this questionnaire will do too much good. I have filled out five or more in the past two years along this same vein. —Elementary man.

Continue to give the classroom teacher a voice in matters of classroom teaching. This questionnaire represents the first opportunity I've had to officially express my opinion on education. —High school man.

I appreciate the opportunity of filling in this questionnaire, but some of the questions are so ambiguous as to be useless. —Elementary man.

The enclosed letter was indicative of one of the serious problems for the teacher: the prevention of his uttering protest. Why *should* you even have to repeatedly assure the teacher that his answers will be kept secret? The implication is that he might be subject to reprisals were his district to know he had been critical.

If we are interested in improving our schools, who is in a better position to know the situation and make helpful criticism than the teacher?

I would like the state to insure the teacher's right of frank and open criticism and stop administration's hypocritical pretense of interest in this kind of criticism. Since most administrators are too petty to allow criticism, it is the state's responsibility if we're to get better education. —High school woman.

Please keep your word—and keep this *confidential*!

—Elementary man.

I might say that one of the main reasons for my delay (and a possible reason for poor overall response on a percentage basis) is that we were told by our principal that we did not have to fill out the questionnaire and that it would be a good idea just to throw it out.

As one who sees a great need for many changes and improvements in the school system in our state, I could not see the logic of this suggestion. —Junior high man.

The State Senate and other governmental agencies should listen to the voice of the classroom teachers through their organizations such as the CTA, NEA, CASA, and others, rather than direct questioning such as this questionnaire. —High school man.

This questionnaire is an excellent idea! Congratulations! It increases my faith in the legislative process. —High school man.

To a great extent, I feel that many of the questions asked above are "loaded"—that is, they are not answered and solved by checking the appropriate square. They are not that simple. —High school man.

What a shock! Somebody thought to ask a *teacher* what was going on in the classroom. —High school woman.

If you want more, let me know.

—Elementary man.

IV. RECOMMENDATIONS

1. Reduction of class size should be the No. 1 state legislative priority in education. Priority in achieving reduction shall be in the following areas, but not limited to them:

- a. Districts with low reading score averages in the first three grades;
- b. Elementary grades.

2. A statewide effort should be launched to eliminate, insofar as possible, requirements and local district practices which are in conflict with the priority of class size reduction, and efficient use of classroom time.

3. High on the list of priorities for elimination or reduction should be:

- a. Classroom interruptions for nonteaching reasons.

4. Teaching should be as financially rewarding as administration.

- a. Certificated personnel assigned to classroom teaching from another certificated position within the same school district may be kept at the same salary schedule until such time as the district salary schedule brings classroom teachers with the same experience and training up to the same salary level.

- b. The concept of "*parallel salary schedules*" should be encouraged in all school districts.

This means that certificated employees engaged in the field of administration, supervision, or classroom teaching, would be eligible to transfers from one field to the other with no change in pay. This should allow for greater stabilization of personnel, greater specialization, and greater satisfaction. All should be reflected in a better job of educating children.

5. Classroom sessions should not be interrupted except for emergencies.

6. Supervision of teachers:

- a. Teacher-supervisors should be selected from the ranks of practicing classroom teachers whose excellence is recognized by their fellow teachers within the same field of instruction.

- b. Requests for supervision and assistance should carry no implication of weakness for rating purposes.

APPENDIX B

Relationship of Class Size to Quality Education

The following section is taken verbatim from a portion of a paper on class size prepared for this committee by Mr. Ben Rust, classroom teacher in the Richmond School District. Mr. Rust has previously served as consultant to this committee, preparing the original report on the current subject, *Cost of Classroom Instruction*, and serving as special consultant to the committee for the purposes of this report and its predecessor, *The Preliminary Report, An Analysis of the Helpfulness of Certain Aspects of the School Program to Classroom Teaching*.

In an evaluation of the relationship between small classes, large classes, and educational quality it is folly to depend upon a single criterion, a single success of a gifted teacher, or even an examination objectively administered to large blocks of students under controlled environments. We must ask ourselves first what we want out of education before we can conclude that the statistical information does not relate small class sizes to quality education. Students are not statistics, much as we would like them to be for our records, and the numbers on their charts do not always tell us what we want to do with them.

It is most interesting to review the literature on this subject. Generally, superintendents, administrators, and educationists seem to deprecate the importance of class sizes. They often rely upon statistical information and personal impression. We are not particularly concerned with these conclusions, certainly not as much as the method they use to arrive at them, or the philosophy they espouse. For, if we assume that students are statistics, and if we probe no farther than that into what we want for them educationally speaking, we are guilty of ineptitude, and we are able then to reach the most absurd conclusions. On the other hand, if we carefully clarify what we want for our students we have a yardstick with which to measure our successes.

The importance of this point cannot be emphasized too strongly. In a remarkable book on the subject, Professor Raymond E. Callahan has carefully documented the "cult of efficiency" and the use of statistics in the schools.¹

"... school administrators perceived themselves as business managers or, as they would say, 'school executives,' rather than scholars and educational philosophers," wrote Professor Callahan. "The question which now became significant was why had school administrators adopted business values and practices and assumed the posture of the business executive. Education is not a business. The school is not a factory."² Professor Callahan reached the conclusion that class sizes were increased in order to emulate labor-saving devices which business idolized in order to save money. "Such savings could be achieved by lowering or freezing pay scales, or, more palatable professionally, by increasing the teacher's load."³

¹ Callahan, Raymond E., *Education and the Cult of Efficiency*, University of Chicago Press, 1962.

² *Ibid.*, preface.

³ *Ibid.*, pp. 222-3.

The movement to increase size of classes, Professor Callahan said, was in some instances led by the school men themselves: "The American people not only allowed this to happen but their insistence on economy forced it upon the schools. And just as some of the leading school administrators did not rebel but actually invited lay interference, they not only did not resist this increase in class size but actually initiated the steps, advocated and defended them, and put them into effect."⁴

This movement of "reducing expenditures through increasing the size of classes and the teaching load and through eliminating small classes" began around 1911.⁵ It was pushed, so Professor Callahan concluded, in order to keep costs down, and quality education was not a considering factor in this development. "The largest item in the budget was, of course, teachers' salaries, and it was in this direction that they sought relief. Clearly the way to economize was to get more work out of teachers, either by increasing the size of their classes or by increasing the number of classes they taught, or both."⁶

Although "professors of education in normal schools" recommended 20 students per class, and although the National Council of Teacher of English and Modern Language Association recommended 80 students per day, this movement towards larger classes was not arrested. Studies which showed little statistical difference between achievement in classes of 25 and 40 were "hailed by administrators."⁷ In fact, quite a few administrators and professors of educational administration offered testimony to prove that large classes were as good as small classes. Of course, other educators opposed the increase in class size. But eventually a formula was reached which became standard. Teachers on the secondary level averaged from 150 to 180 pupils for five periods a day, an average of about 30 students per class. And although this figure was a bit higher in the elementary schools, it was not always perceptibly so.

One therefore suspects "scientific" studies which indicate little difference in quality because of the size of the classes. No one can claim that every study is motivated by financial economy. But it certainly is clear that many are, and whether they are or not, unless the researcher clearly discloses his philosophy we are unable to form an intelligent judgment about his study. The evidence, therefore, must be weighed internally. The most impressive argument against class size increase is the rational one by the person in the field. What the classroom teacher says after he has explained what he wanted to do with his students is far more impressive than the statistics which purport to minimize differences in quality because of imperceptibility in objective test scores. For example, Bruce R. Morris asked a significant question in his initial attack on this problem.⁸ What exactly do we do when our classes get larger, he asked. First, we give up the term paper. Next, we dis-

⁴ *Ibid.*, p. 232.

⁵ *Ibid.*, p. 232.

⁶ *Ibid.*, p. 233.

⁷ *Ibid.*, p. 234.

⁸ Morris, Bruce R., University of Massachusetts, "Faculty Salaries, Class Size, and Sound Education," *American Association of University Professors Bulletin*, June, 1959, pp. 195-202.

pense with individual conferences. "Most people do not realize that often more education goes on in the faculty offices than in the classroom . . . nor does the instructor have an opportunity to probe the student's mind by a series of questions in order to force him to think more deeply than is his custom. Moreover, the student loses his right to dissent or express disapproval of the teacher's statements . . . The right of self-expression is the most vital part of a sound education and is lost in a large class." Next, the essay examination must go.⁹

Mr. Morris makes certain assumptions. He assumes that a term paper has real value as an educational device. He assumes that it is important to have conferences with students. He assumes that illiteracy can be reduced by effective individualized instruction, that teaching is an art, that student probing and discussion under the tutelage of a master teacher is most important, that essay-type examination should not be abandoned, etc. There is a host of assumption. One may contrast these assumptions with those accepted by the United States Government when it dispensed moneys under the National Defense Education Act to improve "educational excellence."¹⁰

In a letter of transmittal by Francis Keppel, United States Commissioner of Education, to the Congress of the United States, Keppel wrote that the National Defense Education Act "has now been in operation for more than four years. During that time the funds expended under its various titles have been an investment not only in national security and welfare, but also in individual human beings. Directly or indirectly, the programs supported by these funds have strengthened the substance and improved the quality of education in almost every American community."¹¹

Altogether, more than 160 millions of dollars were spent in student loans, more than 73 millions in equipment for the teaching of science, mathematics, and foreign languages, more than 29 millions for counseling services, more than 18 millions for technical services.¹² Not a penny was spent on reducing class size. It was assumed that this was not a national priority. The United States Government has been dispensing more than one billion dollars per year for education since the passage of the National Defense Education Act. But none of this money has been available for teachers' salaries or reduced class sizes. Nor do the progress reports on education issued regularly by the United States Department of Health, Education and Welfare, Office of Education, give attention to class size.¹³

The failure of our data to relate statistical incidence to aims in our study of the size of classes is critical. Very few scholars, statisticians, or administrators have made a serious attempt to do so. One such analysis that did, in a general way, was the series of

⁹ *Ibid.*, p. 198.

lectures given by Professor David Riesman at the University of Nebraska.¹⁴ Professor Riesman correlated constraint and variety with academic excellence. With a critical eye on the American college, Professor Reisman said: “. . . Knapp and Greenbaum rank colleges in terms of their proportionate production of recognized scholars. Most of those at the top are small, liberal arts colleges such as Reed, Swarthmore, Oberlin, Carleton, Chicago, and Antioch. Yet I wonder how many administrators have pondered this list with an eye to improving their home institutions, or how many faculties could accurately guess the leaders in this league. And, of course, students are even less likely to know these batting averages, though eventually the news does get around.”¹⁵

Now, if we assume that colleges should produce “recognized scholars,” and if that were the goal pursued, it is quite obvious that a few schools are moving in the wrong direction. And once committed to the goal of running students through the factory treadmill rather than educating them, we are trapped into an insouciant attitude toward all students. For we make no impact on them. Why, as Philip Jacoby has shown, do the small, liberal colleges such as Harvard make an impact on the student, whereas most colleges hardly alter students “in any fundamental way”?¹⁶

“Impacts,” the impressions schools make on the thinking of students, how scholarship actually does alter thinking—these are viable criteria of excellence. We cannot in a brief paper explore the possibilities of impact, but certainly, if we believe that education does serve a purpose, and if we believe that that purpose is not a transitory dip into knowledge, then we cannot intelligently discuss quality of education without carefully evaluating impact. We can assume that observable vital impact must in some way be related to scholarship; and if we can accept the findings of Knapp and Greenbaum, we must pay attention to the methods which seem to produce “recognized scholars” in the small, quality institutions of higher learning in America. The lessons derived from such a study must in some strong way relate to quality in the great grammar school tradition of England (e.g. Eton), the tutorial system, the quality private schools of America, and the small colleges (among others) mentioned by Riesman. And we cannot escape the conclusion that the answer to these questions is strongly connected with the individual teacher-pupil relationship. Admittedly, social implications strongly influence the spread of this type of learning, and it usually is associated with class, for expense has always made such quality very dear, and few families, perhaps few societies, can afford so high-priced a product. But let us not dissimulate because of expense. A person may use stone tools to carve the best of figures, but he should not then boldly proclaim their superiority to steel.

APPENDIX C

Procedures

The sample was selected to reflect the proportions of the school population contained within the following types of districts:

Elementary	Junior college
High school	Unified

A color code was employed to allow separation of returns into their appropriate category. A separate color code was employed for the Los Angeles district to allow separate computations of certain select features of the questionnaire.

<i>District</i>	<i>Number sent</i>	<i>Number received</i>	<i>Percent</i>
Elementary -----	6,000	4,560	
Elementary (Los Angeles) -----	3,000	1,848	
Elementary (total) -----	9,000	6,408	71.3
High school -----	2,200	1,768	
High school (Los Angeles) -----	2,000	1,501	
High school (total) -----	4,200	3,269	77.8
Junior college -----	400	344	
Junior college (Los Angeles) -----	200	198	
Junior college (total) -----	600	542	90.3
Unified -----	6,200	4,595	74.0
Indeterminate grade level -----		206	
Overall total -----	20,000	15,020	75.0

After determining the number of questionnaires to send (20,000), the districts and teachers selected to receive questionnaires were chosen so as to afford a representative sample within each category.

Districts were chosen from the Department of Education's "Average Daily Attendance and Selected Financial Statistics of California School Districts, 1960-61." This lists every school district in the state in descending order by average daily attendance. The statistical compilations are separated by types of districts in the same breakdown as that used in this study: elementary, high school, junior college, and unified. The selection of districts was made by choosing districts from this list at computed, equal increments, starting with the largest in the category and working in progression by the mathematically determined increments until sufficient districts had been chosen to provide coverage of the category by a complete range of a.d.a.'s. The number of districts thus chosen was divided into the number of teachers to receive the questionnaires. In selecting the teachers within the districts, a true cross section was the aim. To accomplish this two methods of selection were used because of the variation of information available through school district directories.

1. The number equalized between the individual schools within the district and then equalized within the individual school as to grade level (elementary) or subject taught (secondary).

2. Names were selected only if their assignment clearly indicated that their full-time function was classroom teaching.

LETTER OF TRANSMITTAL

February 18, 1965

HON. GLENN M. ANDERSON
President of the Senate

Dear Mr. President:

State law makes it clear that the intent of the Legislature is that membership in employee organizations composed of public (as well as private industry) employees shall be voluntary and not subject to coercion, intimidation, nor be a condition of employment, promotion, or transfer.

Complaints that the intent of the Legislature was being ignored and circumvented led to this study. To the extent that the brief study exposes undesirable practices and makes practical recommendations for their alleviation, this report will be of assistance to Members of the Legislature who must assume, unless shown otherwise, that spokesmen for educational organizations have the full and voluntary support of their membership.

Respectfully submitted,

STANLEY ARNOLD, *Chairman*
JOHN C. BEGOVICH, *Vice Chairman*
GEORGE MILLER, JR.

COMPULSORY MEMBERSHIP IN PROFESSIONAL ORGANIZATIONS AMONG CREDENTIALLED CALIFORNIA SCHOOL EMPLOYEES

I. STATEMENT OF THE PROBLEM

A. *Rights Protected by Government Code:*

Government Code Sections 3500-3509, enacted in 1961, outline the state policy regarding membership in "employee organizations" for public employees (including certificated school employees).

Section 3502 states that employees of all public agencies "shall have the right to form, join, and participate in the activities of employee organizations of their own choosing," and "the right to refuse to join or participate in the activities of employee organizations."

Section 3506 prohibits public agencies and employee organizations from interfering with, restraining, coercing, or discriminating against public employees because of the exercise of these rights.

B. *Alleged Violation of Rights:*

Members of the committee have received, since passage of the 1961 legislation cited above, sufficient complaints from certificated personnel in the public schools (almost entirely classroom teachers) of tactics allegedly denying them their "rights" to join or not to join organizations of their own choosing," that the committee staff was authorized to conduct an investigation to determine the answers of the following.

C. *Questions:*

1. Are the rights of certificated school employees to join or not to join organizations of their own choosing being abridged, denied, or violated in isolated instances, on a statewide pattern, or not at all?

2. If it is determined that there is widespread abuse of such rights, are existing legal avenues satisfactory to achieve equitable redress?

3. If there is widespread denial of such rights, and existing legal avenues do not provide equitable means for achieving redress of alleged violations of rights to join or not to join, what recommended changes in code sections and/or administrative procedures would be likely to provide more adequate protection?

II. METHODOLOGY

A. *Questionnaire to Secretaries of Boards of Education:*

The following letter was sent to the secretary of the board of education of 121 school districts:

Dear Sir:

The Senate Factfinding Committee on Governmental Administration has been assigned as a topic for study the subject matter

of membership of certificated personnel in professional organizations.

To assist in some of our preliminary investigations on this subject I would very much appreciate receiving in the enclosed envelope, on behalf of the committee, any written memoranda, policy statements, bulletins, or similar material which set forth school district policy regarding membership in professional organizations.

In addition to any of the above material, the committee would like to have for reference a copy of school district forms used for:

Applications for teaching positions, and/or examinations;

Applications for promotional positions and/or examinations;

Rating, performance evaluation, or its equivalent.

Thank you for your cooperation in this matter.

Care was taken to select districts in almost every one of the 58 counties in such a manner as to combine both adequate geographic representation along with careful selection to assure representative numbers of districts representing rural vs. urban districts, large vs. small districts, north vs. south districts, mountain, valley, and coastal districts, in a close approximation of their composition in the state as a whole. No precise breakdown by population was attempted, nor was this considered necessary. School boards representing approximately 80 percent of the school population and all of the kinds of school districts were contacted.

B. Letters to Teachers:

Contacting a representative sample of teachers would have been beyond the scope and budget for this project. Certain teachers known to the staff, however, were consulted for corroboration, criticism, or comment on material received from board secretaries. As valuable as this information was to the staff in helping to provide background, none of it forms an official part of this report except where official board policies and/or documents were provided by the teacher. The anonymity of the individuals cooperating will, of course, be protected zealously by the committee.

C. Teacher Training Institutions:

The following letter was sent to the list of teacher training institutions provided the committee by the State Department of Education:

Gentlemen:

The Senate Factfinding Committee on Governmental Administration is conducting a research project dealing with professional qualifications and membership in professional organizations of credentialed employees of California school districts.

We would appreciate receiving from you any material or information furnished by your office to prospective teachers, and/or applicants for teaching positions, which would indicate the value, and/or desirability, of membership in professional organizations in obtaining placement and in furthering the career of prospective teachers and applicants for teaching positions.

We would also appreciate an indication of the extent to which this information is stressed by a check mark in the appropriate space below.

In interviews conducted by the placement office is the advantage of membership in professional organizations stressed (1) _____ greatly; (2) _____ moderately; (3) _____ not at all.

Thank you for your cooperation in this matter.

D. Accreditation:

Accreditation procedures and manuals of the Western Association of Schools and Colleges, 1499 Bayshore Highway, Burlingame, were scanned for any reference to membership in professional organizations as part of the accreditation process.

III. FINDINGS

While material furnished by other sources provided valuable corroboration, and occasional refutation, the main body of information presented here comes from authorized representatives of the school districts in response to the committee's request for personnel policies.

1. The letter quoted in Section II—Methodology—was sent to 121 school districts.

Ninety-six districts responded with pertinent information.

From the 96 districts, the following information germane to the study was compiled:

A. School Board Response:

Material made available to teachers unequivocally recommending membership in the CTA and affiliates as a condition of employment.....	10 districts
Material forcefully recommending membership in "professional organizations" as a condition of employment by board policy.....	5 districts
Material recommending membership in "professional organizations" as a condition of employment by board policy.....	9 districts
Membership in "professional organizations" cited as basis for performance rating	26 districts
Membership in "professional organizations" a part of application form	32 districts
Support of CTA's "Code of Ethics" cited as basis for performance rating	5 districts
Names and numbers of members required as basis for employee organization's eligibility to represent its members	15 districts
No policy or explicit impartial policy regarding membership in "professional organizations"	12 districts
	114 *
Ask for photo, or leave space to include photo with application.....	Several . . . undetermined No.

* Note: Several districts were included in more than one of the above categories.

2. While there can be little doubt as to what "professional organization" is meant, most districts responding did not specify—in writing.

3. Ten districts went beyond the implicit recommendation for membership in "professional organizations" as a condition for employment, reemployment, or rating, to spell out precisely what "professional organizations" they mean. A few examples follow:

Example 1

(Information officially distributed to all teachers from the office of the superintendent of the district.)

Teacher Affiliations

Teaching is a profession, and being such, teachers are expected to assume the responsibilities that go with being associated with such an honorable occupation. It is recommended that the teachers of this district join the basic professional groups and such other organizations that advance educational ideas and progress in keeping with the accepted doctrines of building and maintaining our republic.

Basic organizations open to all teachers in ----- County are:

1. The ----- County Teachers Association.
2. The California Teachers Association.
3. The National Educational Association.

The above groups will welcome your membership.

Subsidiary organizations include many special groups, too numerous to mention here, but it is worthy to note that they merit your attention and consideration.

Deduction of Professional Dues

The method of deduction for professional teacher association (CTA, NEA, and —CTA) dues from payrolls shall be worked out to the mutual satisfaction of the teacher and the district business office.

Example 2

(Information officially distributed to all teachers through the office of the superintendent.)

Professional Organizations

Professional unity manifested through numbers of teachers identified with educational associations, to a high degree, determines the vigor and status of the teaching profession. Membership in reputable organizations has long been encouraged and sanctioned by the board and administration. Membership dues may now be paid by requesting the district office to withhold a small amount each month. Teachers may also pay their dues in a "lump sum" if they wish.

----- Teachers' Association professional membership costs as follows:

National Education Association -----	\$10.00
California Teachers' Association -----	22.00
----- County Teachers' Association -----	1.00
----- Teachers' Association -----	2.00

Teachers are encouraged to invest in their profession by becoming a member of the four groups shown above.

4. While many districts claimed not to have any policy on the subject of membership in employee organizations, their actual practices leave little room for doubt that there is something greater than "volun-

tary participation" at work in many districts. Few human institutions, outside the Iron Curtain, claim 100 percent "voluntary" membership in anything.

The committee received the following from a southern California superintendent:

Example 3

"I have received your letter of June 8 requesting information about board policies regarding employee membership in professional organizations. Our district does not have any policy on membership in organizations, and the board has not taken any position to encourage or discourage membership in any professional organization or teachers' union. (Our note: Note the distinction made by the superintendent himself.)

"As a matter of information, all of our teachers belong to the CTA and the local District Teachers' Association. (Emphasis ours) . . ."

5. A statement by a school district spokesman that "we have no policies for certificated personnel in professional organizations" does not always mean just that. That statement was received in a letter from the superintendent of "X" District, among many others. Yet, the teachers' handbook for 1964-65, adopted by formal action of the board of education of "X" District, contains the following statement:

Example 4

"Professional Organizations: This school district has had for eleven year (sic), 100% membership in the NEA, CTA, "X" County Teachers' Association, "X" Teachers' Club, and CTA Welfare. We believe that it is our PROFESSIONAL DUTY to belong to the above named organizations. Let's keep our record 100%."

The above policy bulletin was sent out to all certificated personnel by the same person who responded to the committee's questionnaire.

Example 5

Gentlemen:

In accordance with your request of June 8, 1964, we have no policies for certificated personnel in professional organizations. Certificated personnel belong to the following organizations:

CTA	California Teachers Association
NEA	National Education Association
--CTA	----- County Teachers Association
--TA	----- Teachers Association

The Superintendent belongs to:

NEA	National Education Association
CTA	California Teachers Association
--CTA	----- County Teachers Association
--TA	----- Teachers Association
--CAA	----- County Administrators Association
CESAA	California Elementary School Administrators Association
CASA	California Association of School Administrators
CAPSBO	California Association of Public School Business Officials
ASBO	Association School Business Officials
AASA	American Association School Administrators

DESPA
DCDAA
etc.

We are enclosing an application form, salary schedule, and certificated employee evaluation form.

Yours very truly,

District Superintendent

6. While most districts did not specify in writing which "professional organizations" were considered desirable for membership, the actual membership in one of the "professional organizations" of the person doing the rating leaves little doubt in the mind of all but the dullest of applicants as to which "professional" organization will receive the blessing of the "professional" person doing the rating.

7. By virtue of long usage and continuous association, there can be little doubt that reference to "professional organizations" on the various applications and rating is intended to be understood as being the California Teachers Association and its affiliated associations.

The following represent but a few of the many statements of policy, application forms, rating forms, and related material in the possession of the committee which substantiate the preceding statement:

Example 6

School Policy—District F

802 PROFESSIONAL ORGANIZATIONS

(Refer to Section II, 214, of this handbook for professional organizations and educational activities.)

1. ----- Teachers Association

The local association is in close contact with the individual teachers, and its functions and programs are keyed to their needs and interests. Our local association has helped in developing teachers' salaries, professional policies, in community relations, and in other ways.

The Association has adopted the policy of unified dues which includes membership in

The ----- Teachers Association

The ----- County Teachers Association

The California Teachers Association

Southern Section Welfare of CTA

The National Education Association

From District G, we received the following statement in a letter from the director of instructional services:

"We do not issue any statements, nor do we have any policy statement concerning the necessity to belong to a professional teachers' organization."

Yet, in an attachment to that same letter, entitled "Administrative Policies, G School District," we note, among a host of directives to teachers regarding such things as mandatory attendance at PTA meetings, all meetings called by "the administrator," etc., the following directive:

Example 7

"6. Membership in professional organization, *such as CTA*, (our emphasis) is expected."

In District H, in the Principal's and Teachers' Handbook provided to the committee by the district superintendent, we find under the heading "Professional Organizations," the following:

"One evidence of the professional growth and the professional interest of the teachers in a school system is the extent to which they support the organizations for the advancement of education. The gains that have been made in California and throughout the country have been due in a large measure to organized effort. It is considered almost a must, then, that principals and teachers support the "H" Teachers Association, the CTA, and the NEA. . . ."

The director of personnel of District "I" sent the following statement:

Example 8

"The following statement appears in our New Teachers' Handbook, and is not written policy; and not in the Certificated Policy Book:

"Teachers are urged to join the local, state, and national professional organizations:

- "1. "I" Teachers Association
2. California Teachers Association
3. National Education Association."

And finally, as further indication that, in the minds of people who do the rating, and certainly, therefore, in the minds of those being rated, CTA is synonymous with "professional organization," we offer the following response from the deputy superintendent of District "J":

Example 9

"With reference to membership in professional organizations, we quote from our Handbook for Certificated Personnel:

"J'TA is the local chapter of the California Teachers Association and an affiliate of the National Education Association. Dues may be paid by payroll deduction."

8. While the precise concern of this study is membership in "professional organizations," meaning organizations composed of credentialed school employees, it is not entirely impertinent to note that expectation of joining, participating in, paying dues to the PTA, is considered a desirable, and often necessary, condition of employment for credentialed employees as often as is membership in the CTA.

B. Accreditation:

Accreditation is a quasi-legal process of evaluation of a school district's program. In California it is done by the Western Association of Schools and Colleges, a private organization whose address is 1499 Bayshore Highway, Burlingame.

Education Code Section 5557 allows governing boards of districts maintaining a secondary school to "pay the costs of accreditation of the secondary school by any accrediting association." Outlines, procedures, handbooks, etc., for the Accrediting Commission of the Western Association of Schools and Colleges are copyrighted by the California Association of Secondary School Administrators, with offices located in the CTA Building at 1705 Murchison Drive, Burlingame. They formerly were responsible for accreditation in California.

The value of accreditation is not of concern in this report. Neither the legality nor the propriety of private organizations presuming to judge the standards of public schools is being questioned at this time.

What is of concern is the clear fact that a quasi-legal body, with evident sanction from the school district administration, can certainly be expected to exercise appreciable influence on loyal, dedicated employees who wish to assist their district in obtaining a "good rating" in their accreditation evaluation. Whatever "stigma" attaches to a poor rating will certainly be considered if an individual contributes to that poor rating.

Therefore, it is germane to note that the Western Association of Schools and Colleges, in its bulletins outlining "Procedures for Appraising the Modern High School," devotes a section to various activities which will "substantiate the level of professional competence maintained by the instructional staff. . . ."

Of the five items under this heading, the one of interest to this study is No. 2, which leaves blank space for describing "Active Participation in Professional Organizations."

Since this is to describe a school staff, perhaps the only index would be level or percent membership in the "appropriate" professional organizations, plus listing of any who had achieved special eminence such as holding office.

When we get to the self-rating blanks to be filled in by individual staff members, little doubt is left, once again, as to which "professional organizations" are the appropriate ones.

In a questionnaire distributed to all members of a southern California school district to be used "in a report being prepared for the accreditation committee which will visit our school in February, 1965," instructions were given on Question 12 to all teachers with an Adult credential only to "check any of the following professional organizations to which you belong:

- a. Post High School Education Association
- b. California Council for Adult Education
- c. National Association of Public School Educators
- d. _____ Teachers Association
- e. California Teachers Association
- f. National Education Association
- g. Other (name)"

Question 13 repeated the same request for membership for all teachers holding credentials other than Adult Education credentials.

C. Teacher Training Institutions:

The letter quoted in the Methodology Section to teacher credentialing and placement services of the California teacher education institutions was sent to the 49 institutions on the list furnished this committee by the State Department of Education. Returns were received from 34.

Of the 34, in answering the key question, "In interviews conducted by the placement office is the advantage of membership in professional organizations stressed (1) greatly, (2) moderately, (3) not at all," 5 institutions checked "greatly," 11 institutions checked "moderately," and 18 institutions checked "not at all."

There can be little doubt that this is misleading, and that there is a great tendency for teacher training institutions to tend to exert a great, or a moderate, rather than no influence at all towards impressing on a teacher candidate the importance of belonging to "appropriate" professional organizations.

For example, there is a record of at least one of the public institutions which checked the "not at all" column exerting considerable pressure to get teacher applicants to express favorable attitudes towards the CTA in order to get a favorable recommendation for employment being sought. The same person also has an apparent record of making derogatory remarks regarding membership in competing organizations (in this particular case, the American Federation of Teachers). From material in possession of the committee, selected remarks are quoted (names have been deleted, but are in the committee's possession) from an interview between a teacher utilizing the placement services of this public agency and the supervisor of secondary and junior college placement. It is important to recall, in reading the conversation, that it is not claimed that this is typical of the process in this institution; nevertheless, it must also be recalled that this institution checked "not at all," when asked what stress was placed on membership in "professional organizations."

(Interviewer—"I"; Applicant—"A")

I. You don't belong to one of those teacher things, do you?

A. Do you mean a teachers' union? Yes.

I. Well, I don't see why you would want to work at any California school, or why any administrator would want to hire you.

A. Do you mean that I can't get a job because of my union membership?

I. I don't see how. I can't ask an administrator to hire an agitator.

I. I've never taught, and I have nothing against labor unions, but it seems to me that teachers have their own *professional organization*, (emphasis ours) the CTA . . .

Additional evidence that teacher training institutions tend to exert some, rather than no, influence on membership in professional organizations among teacher applicants is furnished by another public institution which checked the "not at all" column, and also provided the committee with a bulletin put out by the college entitled "Teacher

Placement." In the section "Job Opportunities" the question of commercial placement agencies is raised, and the college states:

"Here in California we sometimes urge a candidate with specific geographic restrictions (sic) to use the placement services of the California Teachers Association Placement Office, since they have a larger coverage than we. CTA charges a fee for their services; but when a person finds himself in a crowded field and/or with geographic restrictions, it is advantageous to register with them. A personal interview with CTA in Burlingame is the first step."

Note: To obtain CTA placement services, an applicant must first join the CTA.

Several other institutions included material which belied their claim that they made no effort to impress on teacher candidates the importance of membership in "professional organizations." However, the most outspoken position on this subject came from a private college, licensed by the State of California to grant teaching credentials. The significant portions of their response is reproduced below:

"Gentlemen:

"In reply to your communication of June 16, 1964, relative to your project dealing with membership in professional organizations of credentialed employees of California school districts, at ----- University of ----- *each student teacher*, before entering his directed teaching assignment in a laboratory school, is given a thorough orientation covering the professional organizations in the areas of his teaching major and minor fields. Besides brochures describing the advantages of such membership, he is given applications for processing.

"Each student teacher is required to be a member of the Student California Teachers Association Chapter on the ----- University campus. This SCTA membership includes affiliation with the National Education Association.

"Our followup studies indicate that these prospective teachers continue membership in their professional organizations after they obtain contracts for teaching positions."

IV. CONCLUSIONS

1. The right of certificated public school employees to "join" . . . or "refuse to join" . . . "employee organizations of their own choosing" is being interfered with, abridged, and violated on a widespread basis throughout the State of California.

2. Legal remedies available to provide redress from the practices mentioned do not provide practical relief. To initiate judicial processes the teacher must be unconcerned about future employment as a teacher in California.

3. While most written material collected referred to "professional organizations," there is little doubt that ratings, employment, promotions, and recommendations for tenure are, on a widespread basis, dependent on membership, not just in "any" "professional" organiza-

tion, but explicitly on membership in the California Teachers Association and its affiliates.

4. While the findings of this study are based on a limited number of written responses, there can be no doubt that the subtle oral pressures to "join," "to have a 100 percent membership this year," etc., are every bit as influential and prevalent as the written policies and directives. For these "pressures" to emanate from persons having the power to recommend for rating, hiring, firing, promotion, transfer, and other conditions of employment is improper at best, and illegal at worst.

5. Stronger, more explicit penalties must be assessed for specific acts in violation of the code sections in question.

6. Continued pressure is inevitable, regardless of safeguards, as long as the raters and those being rated are members of the same organization.

7. Requesting names and numbers of members of employee organizations in order that they may qualify to represent their members places undue restraint on any organization other than that "professional" organization which numbers among its members authorized administrative representatives of the Board of Education.

8. Even if no written material available to a certificated employee refers to membership or nonmembership in "professional" organizations as a condition of employment, he will still be powerless to determine whether this membership or nonmembership is a relevant condition of employment unless all material in his personnel folder upon which a rating may be based are made available for his inspection.

V. RECOMMENDATIONS

1. Membership in employee organizations should under no circumstances be considered relevant to a certificated person's standing regarding:

- Employment,
- Reemployment,
- Dismissal,
- Performance rating,
- Transfer or promotion,
- Placement service by public or private placement agencies,
- Evaluation for accreditation.

2. The definition of "employee organizations" in Government Code Sections 3500 et al. should be redefined to stipulate that, insofar as employee organizations consisting of certificated personnel in the public school system are concerned, those organizations eligible to represent their members as stated in code Sections 3500 et al. should be composed only of members who have no power by virtue of their position to affect the employment standings of other certificated employees in the same organization.

3. Materials in personnel files of certificated employees which may serve as a basis for affecting the conditions of employment of the certificated person should be made available for the inspection of the person involved.

4. The propriety, legality, and desirability of the accreditation process should be given intense study.

5. The names and/or numbers of members should not be required by governing boards of employee organizations composed of certificated school personnel as a condition for eligibility to represent their members unless the employees have had the opportunity to designate the organization of their choice by secret ballot election.

LETTER OF TRANSMITTAL

February 18, 1965

HON. GLENN M. ANDERSON
President of the Senate

Dear Mr. President:

The Senate Factfinding Committee on Governmental Administration was authorized by letter from Senate Rules Committee of January 4, 1964, to study the subject matter of veterans' loan funds.

We submit hereby the report and recommendations based on that study.

Respectfully submitted,

STANLEY ARNOLD, *Chairman*

Final Report on
**DEPARTMENT OF VETERANS AFFAIRS FARM
AND HOME PURCHASE PROGRAM**

I. STATEMENT OF PROBLEM

As stated by Senator Arnold, chairman of the committee, at the October 9, 1964, hearing on the Cal-Vet program, one of the reasons for the study is, "... that the program has been so successful, that it has been so well managed by the Department of Veterans Affairs, that the California veteran has made such a remarkably faithful repayment of loans, that we find ourselves with that most unusual of all governmental problems—a surplus of money.

"For California veterans of World War I, World War II, and the Korean War, the California veterans program has made 216,602 loans since 1921. Of these, 85,497 have been paid in full. The amount in dollars which has been loaned out to veterans under this unique program is in excess of two billion dollars.

"As of this date, from a summary of the status and use of farm and home reserve fund of the Cal-Vet program, we see that \$1,333,074,000 is invested in loans; \$1,332,020,000 is in outstanding bonds; and there is a surplus of \$45,037,780.

"With no change in the program, it is likely that the surplus will continue to grow; and that is the reason for the hearing today, which forms a part of the study by our committee of the California veterans farm and home loan program.

"It is not that we have anything against reserves or surpluses. We have nothing but admiration and respect for public programs which do create reserves and surpluses. We feel that all California citizens, whether veterans or not, have reason to be grateful for the manner in which the public trust has been handled in the case of the California veterans farm and home purchase program.

"However, state agencies are established to perform certain services. The question arises and must be faced—if surpluses are accumulating and are likely to continue to accumulate, can the surpluses be put to use in a manner which will help the agency better serve the purpose for which it was designed? In the case at hand, the purpose was originally, and still is, to serve the veterans of the State of California. How these surpluses should be employed to better serve the California veteran will receive as many different answers as there are agencies, or persons interested in the program."

The problem, then, is how to make best use of accumulating surpluses to serve the purposes for which the program was established.

II. POSSIBLE PROGRAMS AND THEIR EFFECT UPON THE CAL-VET SURPLUS

This portion is reproduced from material prepared for the October 9 hearing by the Department of Veterans Affairs.

PROGRAM: "Lower Interest Rate to 3.57 Percent"

Immediate Effect. Would decrease surplus buildup by approximately \$2,030,000 per year. The 3.57 percent interest rate is the present cost of operation. The lower interest rate would mean an average savings of approximately \$15 per year per contract holder. This would not lessen the monthly payment but would shorten the repayment period.

Long-range Effect. The decrease would have an effect on the improvement loan program for it would diminish the amount available. It would also shorten the period which could be funded by the present bonds.

Another factor to be considered here is that the present bond authorizations will have been paid off by 1989, yet there will be loans outstanding and some of these, especially in the low-income group, could be bad risks. It is necessary, therefore, to have some reserve to cover such possible risks.

Remarks. This would not benefit the 85,000 veterans who helped participate in the program but are no longer in the program.

PROGRAM: "Lower Interest Rate $\frac{1}{4}$ to $3\frac{1}{2}$ Percent"

Immediate Effect. Would decrease surplus buildup by approximately \$3,375,000 per year. Same effects as lowering interest rate to 3.57 percent in that it would hasten the depletion of the available bond money.

Long-range Effect. The decrease would have an effect on the improvement loan program for it would diminish the amount available. It would also shorten the period which could be funded by the present bonds.

Another factor to be considered here is that the present bond authorizations will have been paid off by 1989, yet there will be loans outstanding and some of these, especially in the low income group, could be bad risks. It is necessary, therefore, to have some reserve to cover such possible risks.

Remarks. This would not benefit the 85,000 veterans who helped participate in the program but are no longer in the program. This would give the Cal-Vet applicants a loan with interest *below costs*. This would be hard to justify.

As all bond sales and uses of bond moneys have a direct bearing on the future bids and sales of bonds in the state, it is a serious matter to

consider making loans below the actual cost, even though the presence of the surplus makes it possible for a time.

PROGRAM: "Increase Refinancing of Homes Now Under Conventional Loans to \$10 Million Annually"

Immediate Effect. Would use all of annual buildup of reserve plus an additional amount from present reserve. Each 10 million dollars would provide for about 750 loans per year under the present maximums.

Long-range Effect. Would hasten bond depletion date.

Remarks. Over the past 43 years the 2 billion plus dollars in bonds has covered 211,695 loans. As of August 31, 1964, Cal-Vet eligibility had been established for 609,000 vets with about 1,000 per month being added.

The 750 loans under refinancing would permit an average of one loan per month per county.

PROGRAM: "Open Program to Unlimited Refinancing for as Long as Money Is Available"

Immediate Effect. Would answer request of many vets. Would deplete the available money within months.

Long-range Effect. Would hasten bond depletion date. Would bring the program to a point where it would be only a collection and servicing agency unless additional bonds were authorized by voters.

Remarks. Legislative intent should be determined—whether bonds and money are for initial assistance or to provide budgetary relief for those who are paying interest rate above that of Cal-Vet.

PROGRAM: "Create Revolving Fund by Maintaining Present Surplus—and Increasing Interest Rate"

Immediate Effect. Would increase the surplus by about \$3,375,000 per each $\frac{1}{4}$ percent. A 5 percent rate would add about 18 million per year. By 1970, when it is expected the present bonds will be gone, there would be about \$150 million in surplus which could be loaned on the premise that there would be no more bond authorizations.

Long-range Effect. Would limit Cal-Vet program to the moneys available and would eliminate future bond requests.

Remarks. Any increase of the interest rate will draw criticism from some of the Cal-Vet contract holders. Some will feel that they should not bear the cost of establishing such a revolving fund. The present contract holder would probably ignore the past 43 years of operation, varying interest rates, and other factors that makes the present low interest program and fringe benefits possible.

PROGRAM: "Increase Maximum Loan From \$15,000 to \$17,500"

Immediate Effect. Would cost approximately \$65,000,000 per year, thus reducing not only the full surplus but a portion of the present bond authorizations too. Would add about 2,500 loans per year, at an

average loan of \$15,750. Present average loan under the \$15,000 maximum is \$13,500.

Long-range Effect. Would move up the bond depletion date by approximately 15 months for each year of operation.

PROGRAM: "Increase Maximum Loan From \$15,000 to \$20,000"

Immediate Effect. With a maximum loan of \$20,000, the average loan is expected to be approximately \$18,000, which will require an investment of approximately \$225 million a year, or an increase of \$90 million in bond funds over the present level of operation. At a maximum of \$17,500, with an average loan of \$15,750, approximately \$200 million will be invested annually, or an increase of \$65 million in bond funds over the current amount.

Long-range Effect. Would move up the bond depletion date.

PROGRAM: "Pay Fire Insurance Premiums"

Immediate Effect. Would cost approximately \$3½ million per year.

Long-range Effect. The decrease would have an effect on the improvement loan program for it would diminish the amount available. It would also shorten the period which could be funded by the present bonds.

Another factor to be considered here is that the present bond authorizations will have been paid off by 1989, yet there will be loans outstanding and some of these, especially in the low income group, could be bad risks. It is necessary, therefore, to have some reserve to cover such possible risks.

Remarks. Department is now paying part of the life and disability insurance premiums (\$1,740,000 per year).

PROGRAM: "Enact Legislation to Retain Sufficient Reserve to Provide for Contingencies. Reserve to Be in Cash. Such Legislation Could Stipulate That the Surplus May Be Used at the Direction of the Director to Relieve Contract Holders Affected by Acts of Nature or to Offset Any Risks Involved After the Retirement of All Bonds, but Prior to the Ending of All Outstanding Loans."

Immediate Effect. Would curtail the program slightly unless additional bonds were sold . . . for it would withdraw the reserve money now in loans and deposit the amount in a cash reserve.

Long-range Effect. Would bring the bond sale date and bond depletion date closer.

Remarks. Sound economic principles call for the retention of such a reserve. Based on the present status, a reserve of \$55 million is appropriate.

PROGRAM: "Absorb Into the Operating Costs the Title Insurance Premium and Escrow Fees to the Amount Now Paid by the Buyer"

Immediate Effect. Would diminish the annual accrual within the operating portion of the surplus by approximately \$300,000 per year.

Long-range Effect. Would hasten bond depletion date.

Remarks. This would benefit *new* contract holders coming into the program.

PROGRAM: "Make Legislative Changes to Permit the Department to Loan Only the Difference Between Amount Available Through Conventional Loans and the Maximum Under Cal-Vet. The Vet Would Pay the Commercial Rate on One Portion and the Cal-Vet Interest on the Remainder."

Immediate Effect. If the maximum was not changed, it would allow the available bond money to last longer.

Long-range Effect. If the maximum was raised, it would hasten the depletion of bond money as the greatest demand now is for loan in the above-\$15,000 category.

III. COMMITTEE RECOMMENDATIONS

A. Modifications to Permit More Lenient Loan Provisions on Homes in Isolated or Remote Areas

Under present administrative rules, loans on homes in isolated areas have been monitored closely to insure that the veterans and the department did not suffer in a subsequent resale. Several factors, however, indicate that a lessening of the controls in such cases would not add too much risk to the program, and would undoubtedly benefit the Cal-Vet applicant. With the repossession rate low in such loans; the developments in the more remote areas; the influx of more residents and the accompanying fire and security units; some administrative changes can be made.

Recommended Department Action. Review administrative rules and ease those that will benefit Cal-Vets purchasing a home in remote areas.

Forward copy of revised rules to Senate Factfinding Committee on Governmental Administration.

Recommended Veterans Board Action. Review policies to insure they meet the needs and the fiscal limitations of the moment.

Announce publicly the intended change.

B. Modification to Permit Potential Retirees to Obtain Cal-Vet Home Prior to Occupancy

The suggestion has been made that the law should be changed to permit those persons about to retire to obtain a Cal-Vet home, even though it would not be occupied by "him or a member of his immediate family within 60 days of purchase," as is now required under Section 986.3(b) of the Military and Veterans Code.

Although the size of this potential group of applicants is unknown, it seems feasible to extend the nonoccupancy period to one year, and specify that the period beyond 60 days is available only to those who satisfy the department that they will or must retire within the year under law or company policy.

Recommended Legislative Action. Amend Section 986.3(b) of the Military and Veterans Code to extend nonoccupancy period for potential retirees to one year.

Recommended Department Action. Revise the administrative rules after the passage of legislation.

C. Extension of Low-income Loan Program

The low-income loan program was initiated in the Department of Veterans Affairs in November 1963. To date, 449 approvals have been given from a total of 637 applications received. Disapprovals have been based on: Unacceptable credit history or employment (27 percent); veteran applicant did not have sufficient cash available to make

the required down payment (43 percent); property submitted deficient either structurally or functionally (30 percent).

As noted in the statement of extended amortization loans, such higher risk loan income loans will extend past the period of final bond redemption.

Recommended Department Action. Reduce down payment requirement for low-income long-term loans. (Current requirement is 5 percent of appraised value.)

Recommended Legislature Action. Request periodical reports of progress, problems, and possible changes within the low-income program.

IV. RELEVANT INFORMATION

This portion is reproduced from material prepared for the October 9 hearing by the Department of Veterans Affairs.

History of the Cal-Vet Program

The California Legislature enacted the Farm and Home Purchase Act in 1921. A principal objective was to enable veterans to purchase homes for their own use through regular equal payments over an extended period. At the time, no lender made loans for a 20-year period and, in the 1921 economy, a relatively small number of families owned their homes. The program served to make it possible for more families to do so. Experience with the Farm and Home Act proved the feasibility of long-term lending and presaged today's FHA, G.I., and conventional lending patterns.

Initially, the maximum loan was fixed at \$5,000. This amount was maintained until the end of World War II. With the close of the war, increased prices, coupled with a pent-up demand for housing, warranted an increase in the loan amount.

At the close of World War II, as veterans were returning to civilian life in September 1945, a maximum loan of \$6,500 was provided. This amount was increased to \$7,500 in May 1946.

In the 1951 legislative session following eruption of hostilities in Korea, the loan program was extended to those veterans and the maximum loan increased to \$8,500. Increasing housing costs and property values brought about a further increase in loan to \$15,000 in July 1956. Since the change to a \$15,000 loan, 145,000 loans have been made.

By September 1, 1964, the program had been operating for 43 years. During this period, loans have been made as follows:

	LOAN PORTFOLIO	
	<i>This month</i>	<i>Number approved Total since 1921</i>
Veteran status		
World War I	13	21,976
World War II	464	152,199
Korean Emergency	271	42,427
Loans paid in full	820	85,497
	<i>Loans currently in force and in escrow</i>	
	<i>Number</i>	<i>Amount in thousands</i>
Total loans this month	748	\$10,491
Total currently in force and in escrow	131,105	1,333,074
Total since 1921	216,602	2,198,593

Legislative and Administrative Changes in the Program (1959-64)

Early in 1959, there was some question that the Division of Farm and Home Purchases was being operated at maximum efficiency. Therefore, the Director of Veterans Affairs ordered a survey and study of the division's operations. For a clear understanding of the purposes of the survey, it is necessary to provide some background.

The California Legislature, during its 1956 session, increased the maximum loan on homes from \$8,500 to \$15,000 and on farms from \$15,000 to \$40,000 and provided a Veterans Bond Act in the amount of 500 million dollars. Plans were made to open new offices and increase personnel to handle an estimated 2,500 loans per month, totaling approximately 30 million dollars. Applications for loans were received in even greater numbers than anticipated and soon began to accumulate because neither the personnel nor the facilities were adequate to give them immediate attention. To alleviate some of the pressure, improvement loans and second loans were suspended.

Early in 1957, it became a policy of the State Treasurer that no more than 50 million dollars in veterans' bonds could be sold each 90 days. This meant that only 1,400 loans, totaling about 17½ million dollars could be handled each month so the applications accumulated at an even greater rate. In 1957, the Legislature placed a moratorium on using Cal-Vet loans to refinance existing loans on homes that veterans had already purchased. As applications to refinance existing loans represented about half of those filed, this relieved the pressure considerably and improvement loans and second loans were reinstated on a limited basis.

In December 1957, the interest rate on all Cal-Vet loans was increased to 3½ percent from the 3 percent rate that had been in effect since 1946. The California Veterans Board took this action because of increasing interest costs on veterans bonds.

During the 1958 legislative sessions, the moratorium on refinancing was made permanent with the provision that some 15,000 unprocessed applications filed with the division prior to July 3, 1957, could be processed when funds were available in amounts greater than was necessary to meet the current demand for loans. Also in 1957, the \$25,000 value ceiling was placed on homes that could be purchased with Cal-Vet loans and a 300-million-dollar bond act was passed.

In 1956, the division had organized a staff for much greater volume than could be handled in 1959 with the amount of bond funds available. During the intervening years, some adjustments were made and the staff had been reduced slightly through attrition. The survey and study resulted in drastic changes in organization and functions within the division and the immediate elimination of some 57 positions. The first year's savings were half a million dollars and an increase in the level of service to those seeking Cal-Vet loans, but there was still a large accumulation of unprocessed applications for Cal-Vet loans—approximately 18,000.

The Cal-Vet interest rate was raised to 4 percent in early 1960 to offset increasing interest costs on veterans' bonds.

In May 1960, a commitment program was initiated whereby each application as it was received could be processed and, although funds were not immediately available for a loan to be made, the division could commit to make a loan when funds were available. By the end of 1960, all accumulated applications had been processed as well as those that had been received since the initiation of the commitment program, and the division was handling applications on a current basis.

During 1960, a 400-million-dollar bond act was passed.

In mid-1960, the California Veterans Board acted to discontinue the practice of the division absorbing a portion of the cost of fire and hazard insurance premiums on Cal-Vet properties.

There was also a study of other means of financing the Cal-Vet program underway with revenue bonds being preferred alternative to general obligation bonds. In a series of meetings with the Governor, State Treasurer, State Controller, and Director of Veterans Affairs, representatives of the several veterans' organizations declined to endorse the use of revenue bonds to finance the Cal-Vet loan program because it probably would result in higher interest rate to Cal-Vet purchasers.

Early in 1960, negotiations were commenced with representatives of the California Association of Insurance Agents to renew the five-year agreement to provide fire and hazard insurance coverage on all Cal-Vet properties which would expire on December 1, 1960. When it became known that the California Association of Insurance Agents was unable to obtain a proposal from the insurance companies signatory to the 1955-60 agreement for all physical loss coverage, including insurance against damage from landslides, subsidence and earth movement, proposals were solicited from any company, group of companies, or brokerage firm that would provide all physical loss coverage. When only two written proposals were received by November 30, 1960, the Director of Veterans Affairs accepted the proposal from the National American Insurance Company because it provided the required coverage at the lowest premium rates. The other written proposal submitted through the California Association of Insurance Agents provided for broad form coverage, not including landslides, subsidence and earth movement coverage, and had premium rates higher than the proposal of National American Insurance Company.

The agreement with the National American Insurance Company provides, among other things, that the division will adjust insured losses. The division's ability to provide this adjustment service was questioned by critics of the agreement.

After almost four years of operations, the division's personnel performing this function have proved the critics wrong. Claims have been processed rapidly and equitably. The division has met several severe tests during the administration of this insurance program. In 1962, during one week, over 600 claims for wind-storm damage were filed with our northern California offices. These claims were all handled expeditiously to the benefit of all concerned.

Negotiations to increase benefits under the home protection plan of life insurance were completed early in 1960 with the two companies that underwrite this insurance—the California Western States Life Insurance Company and Occidental Life Insurance Company. It was found that too often when a widow received a deed to the property after the loan was paid by the home protection plan of life insurance, there were not enough assets available to meet immediate expenses. The coverage was therefore broadened to provide a cash payment to the widow in the amount of 20 percent of the loan balance. This, of course, is in addition to the loan balance which is paid to the department. As a further aid, double indemnity for accidental death was also included.

In 1961 the demand for Cal-Vet loans declined, allowing the division to liquidate all outstanding commitments and grant loans on a cur-

rent basis. In addition, the Legislature, at the 1961 session, authorized 20 percent of available bond funds to be used to refinance loans for those who had filed applications before July 3, 1957. Processing of these loans was completed by the end of 1961.

The Legislature made some other important changes in the Cal-Vet loan program during the 1961 session.

The \$25,000 maximum value limitation on homes was changed to apply to improvements only and not the land.

A provision was made for the home protection plan of life insurance to cover all who obtain loans, including those with disabilities. The Director of Veterans Affairs extended this coverage to those who already had loans but who had been denied life insurance in the past for health reasons.

Those Japanese who were relocated during World War II, entered service from another state, and accepted a bonus were made eligible for Cal-Vet loans.

In 1962 a constitutional amendment and enabling legislation were passed by the Legislature providing for all widows of California veterans who had not remarried to be eligible for Cal-Vet loan benefits. In order to become effective, this had to be voted upon in the November 1962 general election. It failed in this election and therefore did not become law.

During the years 1959 to 1962, we experienced an increase in the number of repossessed properties. This was normal because we had previously experienced a tremendous increase in the total number of loans. On an experimental basis in 1962, the division assigned four employees to act as a sales and property management team for the disposal of these properties. The majority of repossessed properties were in the San Joaquin Valley and San Bernardino areas. The team was successful in reducing the inventory and has now been disbanded. The management of repossessed properties has been returned to the district offices.

With veterans' bonds selling at favorable rates, interest charged on Cal-Vet loans was reduced to $3\frac{3}{4}$ percent in November 1962.

In 1963 a survey was conducted to determine if efficiency could be increased and economies effected by combining several of our district offices. As a result of this survey, our former Long Beach district office and former Santa Barbara district office were closed and their territories and personnel taken over by the other adjacent districts. This resulted in the transfer of some personnel, but did not result in layoff of technically trained people.

The continuing decline in demand for Cal-Vet loans through 1962 and 1963 made possible the elimination of the restrictions on improvement loans and second loans in early 1963.

During the 1963 legislative session, the requirement that the veteran purchaser reside in the property on which he obtained a Cal-Vet loan was changed to allow his family to occupy where it was impossible for him to do so.

So those California veterans in the lower income groups could have better opportunity to participate in the Cal-Vet loan program, the plan was initiated in July 1963 to set the term of loan according to a veteran's income up to a maximum of 40 years. By extending the

loan term, a veteran with a modest income can repay a higher loan amount at a monthly payment within his means. Two hundred eighty-four low-income loans were made during the first seven months this program was in effect.

A further broadening of the home protection plan of insurance was made in early 1964 by covering all Cal-Vet purchasers with disability insurance without a physical examination as long as they were working full time for full pay.

A review of the experience under the time protection plan of life and disability insurance showed a need for an increase in premium rates resulting from the elimination of underwriting on both life and disability coverages. Rather than charge the increased premium rates to the Cal-Vet loanholders, it was decided that the premium increase would be paid from the surplus funds in the program. The premium cost to be paid from surplus funds amounts to about \$1,740,000 a year.

Legislation enacted at the 1964 session authorized the use of \$5,000,000 each year to finance homes for veterans which had been purchased with loans having an interest rate in excess of 5 $\frac{3}{4}$ percent. In addition, loans guaranteed or insured by the federal government were excluded from consideration. \$5,000,000 each year will allow approximately 350 of these loans to be made. To date only those veterans having been wounded or disabled as a result of war service have received loans, as they are given first preference for all benefits under the Veterans' Farm and Home Purchase Act.

The maximum farm loan was increased from \$40,000 to \$80,000 during the 1964 legislative session.

Present Cal-Vet Programs

The Division of Farm and Home Purchases administers its programs through 15 district offices at the following locations:

Bakersfield, 345 Chester Avenue
Fresno, 2550 Mariposa Street
Modesto, 1700 McHenry Street
Oakland, 1111 Jackson Street
Redding, 2135 Akard Avenue
Sacramento, 1227 O Street
San Bernardino, 588 Sixth Street
San Diego, 1350 Front Street
San Francisco, 350 McAllister Street
Santa Clara, 68 North Winchester Boulevard
Santa Rosa, 1739 Fourth Street
Inglewood, 830 North LaBrea Avenue
Santa Ana, 1634 West 19th Street
Van Nuys, 16917 Enadia Way
West Covina, 1707 West Garvey Boulevard

Cal-Vet Eligibility is restricted to those who served 90 days or more in the U.S. armed forces during wartime, and was a resident of the state on entry into active duty. A portion of service must have occurred between April 6, 1917, and November 11, 1918, between December 7, 1941, and December 31, 1946, or between June 27, 1950, and January 31, 1955. Discharge under honorable conditions is required.

Primary Benefits

Home Loans may be made in an amount not to exceed \$15,000. Properties are appraised at no expense to the veteran. An interest rate of $3\frac{3}{4}$ percent is currently charged. The interest rate is subject to minor adjustment, according to the financial status of the program. Basic monthly installment payments remain constant—a change in interest rate is reflected by a change in the loan amortization term, which is presently 23 years.

Loans are limited to single-family dwellings, suitable as residences for veterans and their families. Loans may be made for purchase of either new or existing homes. Two alternative methods are also provided to those who wish to have homes constructed on land they own:

A. *Progress Payment Plan.* The veteran's proposed building site is inspected, his house plans and specifications are analyzed, and his contractor's agreement is reviewed. The amount to be loaned is determined, and released to the contractor at certain stages of construction.

B. *Conditional Commitment.* The building site is inspected, plans and specifications are analyzed, and a loan amount is committed to the veteran. The commitment is conditioned on final inspection proving the construction to be in accordance with plans and specifications. Loan funds are then provided to retire interim financing.

Second or Subsequent Loans. The veteran may transfer his loan balance to other properties that meet established criteria. He must re-invest his equity in each home purchased.

Refinancing Existing Mortgages. Limited funds were made available for this purpose during the 1964 legislative session, under SB 81. The department may provide loans to retire existing mortgages that bear interest of over $5\frac{3}{4}$ percent, and are not guaranteed or insured by the federal government.

"Low-income" Loans may be made to veterans who have demonstrated fiscal responsibility, yet do not enjoy an income sufficient to meet existing financial criteria. The amortization period may be extended from the usual 23 years up to as much as 40 years. The length of extension depends on income and loan amount.

Farm Loans may be made in amounts not to exceed \$80,000. Careful appraisal is made of the property. The applicant's past experience, resources, and proposed plan of operation are analyzed, and his possibilities for success evaluated.

Secondary Benefits

Improvement Loans may be made for needed repairs, maintenance, assessments, structural improvements, etc. The amount loaned for improvements to dwellings is generally limited to the difference between loan balance and the permissible maximum of \$15,000. Loans may be made for capital improvements to farm properties, to the loan maximum of \$80,000.

Payment of Property Taxes is made on behalf of the veteran, at his request. The amount so advanced is repaid by increase of 12 monthly installment payments.

Protection Against Fire and Other Hazards is provided under a low-cost, "all physical loss" policy negotiated on a group basis with a single insurer. Personnel of the department adjust all losses, subject to review of the carrier.

Home Protection Plan assures continuing home ownership under conditions of personal family adversity.

Disability Insurance is provided to all applicants, regardless of physical condition, if they are employed at time of application. If they later become unable to work for over 90 days because of illness or accident, the insurer deposits \$80 per month to their account with the department. This benefit, while possibly less than the regular payment, serves to keep the loan account current and prevent repossession. Disability insurance coverage terminates at age 65.

Life Insurance is provided to all loan applicants under age 65. The veteran's wife or beneficiary, in the event of his death, receives an amount in cash equal to 20 percent of the loan balance. The loan is paid in full. There is a double-indemnity feature for death from accidental causes.

Coverage under the home protection plan is primarily paid for by veteran purchasers. A recent premium increase is being paid from surplus funds in the amount of approximately \$1,740,000 per year.

Summary of Status and Use of Farm and Home Reserve

As of June 30, 1964:

\$1,335,458,000 invested in loans
1,370,240,000 outstanding bonds
41,080,000 in surplus

Interest rate lowered in November 1962 to -- \$0.0375

Present cost of program, including all costs -- 0.0375

Margin ----- 0.0018 (less than 1¼%)

Decrease of ¼ percent interest would equal \$3,375,000 per year.

Contracts now in force equals 129,122. Totaling: \$1,495,114,000.

If interest lowered ¼ percent, it would mean approximately \$26 per year per contract holder.

Lowering interest would not change payments, as changes in the rate of interest are reflected in the term of repayment—either a shortening or lengthening of loan period.

If interest rate cut, or reserve depleted, it would seriously affect the amount of money available for the liberalized improvement loans and the low income loan program.

The reserve will undoubtedly slow in its buildup as the average cost of bonds authorized over the past 43 years have called for higher interest repayments. This means the average cost of bond payments will show a steady increase.

A second factor that will decrease the reserve buildup is that there is less bond money to invest prior to making loans with it. Thus, there will be less interest revenue from the bond sale deposits.

An additional cost to the program is the new benefit where part of the life and disability insurance premium payments are made by the department. This adds \$1,740,000 to the cost of the program each year.

Disregarding the advice of Price Waterhouse and lowering the interest rate would probably curtail the improvement loan program and the low-income plan, perhaps call for discontinuance of the department, paid home protection plan insurance premiums, and would lower the reserve to a dangerous level.

Bonding Patterns

The Cal-Vet program is financed by the sale of general obligation bonds. These bond issues are passed by the Legislature and approved by the electorate from time to time as new bond funds become necessary to continue the program.

During the 43-year history of the program, 13 such bond issues have been passed in amounts varying from the 1921 issue of \$10,000,000 to the 1956 issue of \$500,000,000. During the history of the program, a total of \$2,085,000,000 has been authorized by the voters. All of these bond issues have been sold except the 1962 authorization of \$250,000,000.

It is anticipated that at the present rate of expenditure, and assuming no drastic changes in the program or economic conditions, that funds on hand, together with the proceeds of the \$250,000,000 1962 authorization, will carry the program until approximately 1970. Any changes in the program that require additional funds will, of course, accelerate the time when new bond funds will be necessary to continue the program. Relatively few bond sales have been necessary in the past several years because of the reduced demand for loans and the high rate of prepayments of existing contracts. These prepayments are reinvested in properties for California veterans. This reinvestment of prepaid funds substantially reduces the amount of new bond funds required.

The interest rate on Cal-Vet bonds has fluctuated from a high of approximately 4½ percent in 1924 to a low of less than 1 percent in 1945. The last sale of Cal-Vet bonds in January 1964 had an interest rate of 3.20 percent. At the present time, the average net interest cost on all of the outstanding bonds is 3.41 percent.

HISTORY OF VOTES FOR AND AGAINST CALIFORNIA VETERANS BOND ACTS

Election date	Amount of bond issue	"Yes" votes	"No" votes	Percentage of "Yes" to total votes	Ratio in favor
11/7/22.....	\$10,000,000	479,556	220,694	68	2.17 to 1

DRUCKER, JUDGE LEWIS	Judge, Superior Court, Los Angeles County

LETTER OF TRANSMITTAL

SENATE CHAMBER
Sacramento, January 1965

HONORABLE HUGH M. BURNS
*President pro Tempore of the Senate
and Members of the Senate*

GENTLEMEN :

The procedures for the civil commitment of the mentally ill are contained in numerous sections and with their various cross-references are difficult to understand.

On the basis of hearings in 1962 and in 1964 it was determined that while no substantial substantive changes were necessary, the relocation and grouping of provisions related to admission or commitment to institutions would be desirable. A bill has been drafted which will accomplish this purpose and also eliminate obsolete provisions or terminology.

The committee in the interest of improving existing procedures related to the care and treatment of public and private patients is recommending the several measures included in this report with supporting statements by witnesses.

The Senate Fact Finding Committee on Judiciary was formed pursuant to Rule 12.5 of the Standing Rules of the Senate and is herewith submitting its report.

Respectfully submitted,

EDWIN J. REGAN, *Chairman*
JOHN W. HOLMDAHL, *Vice Chairman*

CLARK L. BRADLEY
CARL L. CHRISTENSEN, JR.

READER'S GUIDE

The format of this report was designed to provide a concise explanation of recommended legislation related to commitment procedures for the mentally ill. In addition, problems and their possible solutions as presented by witnesses during public hearings have been grouped under selected topics. Comments by a number of persons concerning the same topic can easily be referred to by all interested persons.

The report is arranged in three sections to permit discretionary consideration of its contents. Chapter I, Recommended Legislation, contains four bills, each with a brief explanation of the basis for their proposal by the committee. The justifications are followed by related excerpts of testimony by hearing witnesses. The Legislative Counsel's digest of each of the proposed bills has been printed in boldface type preceding the recommended measure. Chapter II, Hearing Highlights on Selected Topics, endeavors to bring together comments by various witnesses concerning the same or related subjects. The page numbers refer to the transcript for the hearings filed in the office of the chairman. They are available for public reference, therefore, no testimony has been paraphrased and verbatim quotations have been held to a minimum.

Following the hearings inquiries were made to clarify statements of witnesses and where better understanding of the problem could be achieved by quoting the text of a statute referred to by a witness this was done in footnotes or by other editorial comment as indicated.

In the appendices is the text of the bill which proposes a reorganization, without substantive change, of existing statutory provisions related to commitments to mental hospitals. Several communications felt to be of reference value are also included in this section.

The time and effort expended by witnesses and by the staff of all agencies in preparation for the hearings or in responding to subsequent inquiries is gratefully acknowledged.

CHAPTER I

Committee Recommended Legislation S.B. 36 †

Purpose

Place in a single location in the Welfare and Institutions Code all provisions related to commitments and admissions to mental institutions. In addition, the removal of obsolete provisions and terminology.

Justification

In the course of several years of hearings conducted on this subject the consensus of witnesses was that ambiguous terminology should be clarified; unrelated provisions removed and that commitment procedures be made uniform.

Selected Statements by Hearing Witnesses

MISS AITKEN: . . . we should change the words "dipso-maniac" and "inebriate," which are unfortunate. I think the word "alcoholic," or whatever word one of the advanced schools of the study of this problem would substitute as the most modern terminology for the person who drinks beyond control, would be. (P. 62.*)

JUDGE CHRISTIAN: I understand from examining these materials, and from discussing this hearing with the staff of the committee, that the committee's primary concern is with a codification, a rearrangement and a consolidation, if possible, of several of the separate provisions that now exist affecting civil commitment of persons alleged to be mentally ill.

From my own personal experience, having sat in proceedings in mental illness in perhaps ten or twelve counties, I can certainly offer all encouragement to the committee in this work. This is a work that is much needed.

The statutes, as you have seen indicated in the materials before you, are unnecessarily repetitive and obscure in many instances. (P. 66.*)

MR. MELVIN THALE: I feel that the commitment procedures as stated are adequate to take care of the civil rights of the people. In fact, I think they ought to be liberalized rather than made more strict. (P. 83.*)

MR. RUDOLPH PACTH: We feel that the code provisions at the present time are deficient in at least two respects. First, they are scattered and they are hard to find. Unfortunately, a lot of people besides lawyers have to find them at times—social workers, and even psychiatrists, and so on.

† See Appendix A for complete text of this measure.

* Hearing transcript, office of chairman.

Secondly, some of them are ambiguous and even inconsistent. We feel that the statutory provisions, at the very least, should be reorganized or recodified, and that probably piecemeal amendments wouldn't solve the problem or alleviate the present situation to any substantial degree.

For this reason, we feel that probably a commission should be appointed to make a study and to formulate substantive revisions as well as recodification and that appropriate funds should be available for the needs of such a commission.

Finally, we feel that probably the funds should be adequate so that there can be participation in such a commission of all of the various disciplines involved: people from the Department of Mental Hygiene, from the Department of Corrections, from the judiciary and the lawyers who practice in the field, from social workers, from the medical people, including the psychiatrists but not limited to the psychiatrists, and so on.

We feel that if there is such participation, it will probably come up with something that is acceptable to all. (P. 114.*)

MR. WELLBORN: Now, I have no suggestions or recommendations to make in regard to any changes in our statutes. I have discussed this with our judges and county hospital officials and others in our county and no one seems to have any strong feelings one way or the other. (P. 159.*)

DR. BELLAMY: All right. As you will see from the abstract, I am not too dissatisfied with the existing code. I feel that it's quite excellent, and I am not offering this as a platitude; it's a firm opinion of mine. I think that one could scarcely come to any other conclusion.

The code, I feel, is deficient in that the sections are scattered and that there is some inconsistency from one section to another. (P. 188.*)

JUDGE MUNNELL: I want to say that, frankly, after having served in this court for approximately two years, I am of the opinion that very little needs to be done with the law to either insure sound medical practices for the patient or to protect the constitutional or legal rights of the patient. (P. 216.*)

I think all in all we have a very fine system of treating the mentally ill in California. The hospitals are most anxious to treat and release as soon as possible in cooperation with the court. The judicial system, at least as far as my experience is concerned, is excellent.

In conclusion, gentlemen, I see no great need of changing in a substantive way the law. Perhaps there is a need for reclarification in bringing the statutes together and rewriting ambiguous language, but by and large I think our system is satisfactory for the age and period in which we are now living. (P. 229.*)

MR. LEIGH DEMING: If this committee is to accomplish a great deal I think it will be necessary to carry on what was proposed two years ago and not too much done about it for various reasons, and that is try a recodification and a standardization of these procedures. (P. 229.*)

* Hearing transcript, office of chairman.

JUDGE REPPY: The general observation I have is that I feel that it would be helpful to let you know that at least Ventura County believes that we can very satisfactorily handle our cases under the present framework, both from the standpoint of the court and of the patients. It would seem to me that how much redrafting you might do would depend on how particular you wish to be in developing complete clarity and uniformity and cohesiveness and things of that nature. It would be a commendable work if you do that, but it isn't absolutely necessary, as I see it, for the courts to function. (P. 232.*)

* Hearing transcript, office of chairman.

CHAPTER I

Recommended Legislation S.B. 38

Purpose

Authorize the Director of Mental Hygiene to appoint a staff team to annually examine into the care and treatment of mentally ill or incompetent persons by any public or private establishment and to report to the judge of the committing court whenever any person is not receiving proper or suitable care.

The director must also submit a report concerning any person he deems *not* to be in need of further care or confinement. The judge of the superior court of the county from which such person was voluntarily admitted, or committed, is empowered to take any necessary action.

Justification

The present authority of a State Hospital Superintendent permits great autonomy with respect to the power to determine the readiness of a patient for return to the community. The committee heard testimony which advocated establishment of a review board, a review by the committing court, or an internal review by staff of the Department of Mental Hygiene. The proposed measure will mandate the Department, through an internal staff team, to annually review the care and treatment of persons within both public and private hospitals, homes or other establishments, and to bring to the attention of the court any improper care, condition or unnecessary confinement.

Selected Statements by Hearing Witnesses

MR. TSO: During 1963 635 persons were committed to the custody of our department for supervision and care. Of these 635, 456 were committed pursuant to Section 5076 and placed in various sanitariums licensed by the State Department of Mental Hygiene.

However, during the year my deputies and I had the opportunity to inspect these various sanitariums used by the court and, in several instances, found that the services and the facilities offered were wholly inadequate. They were inadequate in terms of the physical surroundings, the medical and dental care provided for, the food, and the lack of activities whatsoever for our patients. Based upon these findings, our wards were removed from these inadequate facilities.

At the present time we have approximately 1,100 patients under this Section 5076 supervision and the average age is approximately 75.

CHAIRMAN PETERSEN: The average age?

MR. TSO: Yes, sir. These patients are placed in approximately 30 sanitariums throughout the Los Angeles area and within the county, or they are allowed to remain at home subject to periodic supervision calls by the mental health counselor.

I am quite happy to report now that the 30-odd sanitariums we use are providing adequate care and facilities. And the county here in Los Angeles, by court order, pays each sanitarium \$200 per patient. And the court or the mental health counselor seeks to reimburse the county of Los Angeles for an annual expenditure of \$2 million by having the estate of the person, or his responsible relatives, reimburse the county for that \$200.

Now, the responsible party is the spouse, or the father and mother, or the adult child of the committed person. And the estate of the committed person over 65 usually consists of \$172 monthly, and this \$172 comes from the state OAS program, proportionately, probably, and the social security benefits.

It seems that our net payment for upkeep of our geriatric patients runs to about \$250,000 of the \$2 million expenditure. (P. 150.*)

DR. STUART C. KNOX: The establishment of impartial review boards at several centers throughout the state could provide for frequent reevaluation in cases where a doubt was held by the patient, his family, or their representatives, legal or medical.

Such boards should include psychiatric physicians, nonpsychiatric physicians, and a legal counselor, provided with proper staff. Access to appeal to such a board should be available at any time throughout the patient's period of treatment.

In addition, the patient or his family, of course, have the usual legal remedies for releases or redress. (P. 11.)*

I would feel that after they had had one appeal, that certainly no further appeal should be entered until a specified time. I would imagine that the appeal board itself could set down a time in which it would again review the case. (P. 13.)*

JUDGE CHRISTIAN: I would like to point to a third undesirable consequence of the use of the commitment procedure as the basic means of access to the public facilities. That is that where so many patients come into the system upon findings that courts, I fear, are not always careful to distinguish between the finding of need for care and treatment and the existence of a condition that is dangerous to the patient or to the public, where so many hundreds and thousands of patients come in under findings that they are dangerous to themselves or others. It is easy to lose sight of the few patients who come into the system who are really in that condition; who really are dangerous to themselves or to others.

I have a feeling that this lack of accurate classification in the intake contributes to some of the cases that, perhaps, members of the committee are aware of that have occurred in recent years where discharges have occurred, where absences without leave have been followed by a discharge rather than an attempt to locate the patient, and then these incidents have been followed by harm to the patient or to others.

I have a feeling that these events are made more likely by our failure to distinguish at intake between a person who really is dangerous to himself or to others and, therefore, perhaps, should have an authoritative placement under a court procedure with all the trappings of due process, than a person who is merely sick and in need of treatment.

* Hearing transcript, office of chairman.

Now, there are a number of possibilities that are available to us in attempting to deal with this situation. I should like to reinforce at this point the disclaimer that I made upon opening, and that is that these are not program recommendations coming to the committee from the Department of Mental Hygiene or from the administration. They are certain ideas that are of some interest to us that may be of some interest to the members of the committee, that would require further study and elaboration before they could be offered as a legislative program. Some of them are reciprocally inconsistent, so that this should not be taken as an indication of becoming a series of legislative requests.

But, here are some of the possibilities that exist. All of these are in effect in one manner or another in this or in other systems.

First, there could be required in a court commitment some terminal period following which there would be a report and a review similar to the annual review that is now required of juvenile court, after a finding of hardship under the juvenile court law.

Now, I hasten to say that a procedure of this kind would cause much inconvenience, cause the use of much staff time in the hospitals. It would, perhaps, be resisted by the department on that ground. I do not know. It would have to be evaluated.

But, the point is that there may be some utility in actually requiring us to make up our minds again, from time to time, rather than to keep some of the less active patients month after month after month for lack of a particular occasion that forces an evaluation.

CHAIRMAN PETERSEN: Judge, this morning Dr. Stainbrook, I believe, or maybe it was Dr. Knox, suggested that we have a review board from the State of California to review from time to time patients in a mental hospital.

Is that the kind of thought you have in mind? A separate board, a review board which would, from time to time, review these matters?

JUDGE CHRISTIAN: I don't know what Dr. Stainbrook had in mind in detail. I suggest that a board would have difficulty in handling the immense numbers that are involved in a procedure like this. There are many thousands of patients in the state system.

I suggest that a particular board would have some difficulty in handling this. The possibility that I had in mind was that the court's original order of commitment would be limited to a set time following which there would have to be a new report to the court and a full further order of commitment, such as now exists in the juvenile court law where a finding of wardship is good for one year and then a review and further hearing.

Now, I have separated the possibilities here. The first would be a terminal period of commitment. The second would be a periodic review requiring a written report of the court. A third possibility would be to reform in some way, and I believe a suggestion was made to the committee today, to reform in some way the medical examiner system. (P. 74.*)

* Hearing transcript, office of chairman.

JUDGE REPPY: Dr. Knox, when he was testifying, suggested this board of review and, as I understood him, indicated that perhaps there should be some time limit in the judge's commitments because at the present time there is none.

When we make a commitment it is entirely up to the hospital staff to determine when the release should be. I feel that that is the proper way to have it handled, since we are guided almost 100 percent by what the medical examiners testify to. I find in my role with respect to that it is mostly relegated to a discussion with the medical examiners as to various possibilities that might be available for the patient that they consider to be mentally ill.

I hardly conceive of myself, as putting myself up as a better medical expert than the examiners and saying "You think this man is mentally ill but I don't."

However, I do feel perfectly at liberty to ask them if they don't feel that this particular patient, maybe, could be handled at home, or through private psychiatry, and things of that nature, even though the attorney designated for the party, let us say, doesn't bring that particular matter up.

So, when it comes to the problem of release, it seems to me that that is essentially an internal problem of the hospital, and as to whether they would want a board of review to which a patient in a hospital might have the right to appeal from time to time, and that such a review would be conducted within the hospital and would either be an advisory type thing or even, perhaps, the right to override the staff's opinion, would be a problem to be worked out.

As I understand it, at Camarillo State Hospital they have regular staff meetings for each patient, and they review his or her condition at the so-called staff meetings. And the patients, those with whom I have spoken, rather live for that time when they say, "Well, we are coming up before staff and maybe we are going to be released." Or words to that effect.

Dr. Knox was in hopes that the medical examiners could be board psychiatrists or eligibles. Obviously, that is not possible in the smaller counties, or even in the moderately sized counties, which I feel Ventura County now falls into. (P. 125.*)

CHAIRMAN PETERSEN: Do you think after commitment there should be, from time to time, a judicial review of the patient? Do you think that should be set forth in the law?

JUDGE REPPY: I don't see any need for judicial review. You have it through the writ of habeas corpus where the patient thinks he is well and the hospital staff says he isn't. Most of them all get to know that they have the right to file a petition for writ of habeas corpus, and we get communications directly from the patients and we interpret many of them to be requests for a hearing for a writ of habeas corpus and are very liberal in our interpretations, because we feel that that is a right that they have and one that's our duty

* Hearing transcript, office of chairman.

to protect. I see no objection to the review board as an internal policy of the hospital. As I mentioned yesterday my understanding is that Camarillo State Hospital, they do have these staff hearings from time to time, but these are at the desire of the hospital. It's possible that a review at the request of the patient would be in order if it isn't something that can be abused.

CHAIRMAN PETERSEN: Do you think the law is sufficient, then, as it is now in that regard?

JUDGE REPPY: As far as judicial review, yes. As far as internal hospital review at the request of the patient, that might be explored. (P. 236.)*

SENATOR GRUNSKY: Might I ask as to the practical matter, when you find and make a commitment do you in effect close your file; I mean, is that the end of that proceeding?

JUDGE REPPY: Yes, unless there is a request for a jury trial, because when the judge makes the commitment the patient then goes to Camarillo State Hospital and the release procedure is in the hands of the hospital.

SENATOR GRUNSKY: Of course, what I am now going to follow through on would be, then, a rather marked change. Where the court appoints the guardian of the estate, you require usually annual accountings, though it's discretionary with the court at what intervals. If you have a guardian of a person, of an incompetent or such, the court retains jurisdiction, and yet on this much more serious situation where the liberty, in effect, of the patient is involved by institutional care, you just in effect close your file and turn them over to an institution, and I am not suggesting anything, but my mind is in question as to whether or not the file should not be kept open and perhaps a periodic accounting in the form of a review or an annual medical report should be kept in the court records and have a continuing file just as you do in a guardianship, because, frankly, my estate is far less important than my liberty.

JUDGE REPPY: Well, I think the question is what philosophy you want to go with. Do you want the court to be the determining body as to when the person is well and should be released, or do you—

SENATOR GRUNSKY: Well, except where you say do I want it, I don't say I do or I don't, I am just inquiring.

JUDGE REPPY: Well, I mean, the statement—

SENATOR GRUNSKY: It is just a matter of policy and there is no indication in the testimony here that there has been any abuse, that when a person is institutionalized they are suddenly in Siberia where nobody ever follows up on them. Of course, the patient

* Hearing transcript, office of chairman.

is in no position, really, to institute . . . my feeling is that if they are in a mental institution they are not really in a position to protect their own rights.

JUDGE REPPY: Well, they have the right to communicate with attorneys, and a surprising number of letters go out.

SENATOR GRUNSKY: Well, they have not the capacity, let me put it that way, and who is their guardian, who is looking out for them, and, as I say, the courts look out for citizens in every other respect so it just seems that in this instance the court doesn't; I mean, it washes its hands of it.

JUDGE REPPY: Well, I think you are worried about the occasional person that might sort of get lost in the regimen of the hospital. I think we have to take full faith in the administration of the hospital that those things won't occur, or if they do that somehow or another they will come to light and be followed by the court.

SENATOR GRUNSKY: By the same theory, then, why do you not have full faith in a guardian or a bank or anyone else whom you appoint a guardian of an estate?

JUDGE REPPY: Well, because a guardian is dealing with the property of the person.

SENATOR GRUNSKY: I say that's a lot less important than my freedom.

JUDGE REPPY: I know, but the court is a specialist in the property line and the court is not a specialist in the mental illness field.

SENATOR GRUNSKY: But you are a specialist in protecting my rights and due process. I am just throwing this out, I am not advocating it.

JUDGE REPPY: Well, I think the answer to that is how well does the arrangement for petition of writ of habeas corpus work and how responsive is the staff of the hospital to meeting that.

SENATOR GRUNSKY: That is true, and you spoke of writing out. I mean that I can write letters and they may never find their way into the post office, because I am sure I don't have the privilege to walk out and see that it is posted, and all of these other things, your civil rights and . . .

JUDGE REPPY: Well, I don't know how these letters come out, but a surprising number do come out.

SENATOR GRUNSKY: Obviously all the ones that come out you receive, but those that don't you never receive, so you don't know.

JUDGE REPPY: I don't know if they provide a letter that—that might very well be an area to explore, to be sure that nobody is getting deprived of his rights.*

SENATOR GRUNSKY: I don't want to enlarge on it, but it is just something that I have expressed myself on because I think there is not enough attention paid to it.

CHAIRMAN PETERSEN: For instance, I know one administrator of the hospital located in my county, and this was some years ago, had a rule for some time when the patients could not contact an attorney and could not write out to an attorney, which was actually denying that person due process of law. If you had in the law where the court would have to review, from time to time, that person's mental health, then that would take care of a situation such as that.

JUDGE REPPY: Well, being legally trained I would be very much in favor of some internal procedure in a hospital which would make it possible for the patient to communicate with an attorney, or with the court if they wish. I don't see that it would be practical, however, for the court to follow this up. The only way it could be done would be to set a particular time, perhaps, as you suggested a guardian does, when a person's liberty situation is reviewed by the court, and you might be missing the proper time because it would probably come within a fairly prompt span of time when the patient feels he should get out.

SENATOR GRUNSKY: Well, I was just thinking of the problem of a person getting lost in the institution, friendless, and, . . . well, we see it in prison cases. I think we just read recently about a person who was lost, didn't have a friend in the world, until finally 50 years later some long lost relative came in and with the utmost simplicity the guy is out, which probably could have been accomplished 30 years ago, but he had no friend and the court is a friend of my money, but he forgets my liberty.

JUDGE REPPY: The isolated case can appear that. Our experience as far as the hospital is concerned is that they are releasing the patient quite early.

SENATOR GRUNSKY: I know, that's by necessity, we don't have room to take care of them.

JUDGE REPPY: Well, it's not only necessity, it's medical philosophy now that the patients get out as soon as possible.

SENATOR GRUNSKY: As far as I am concerned my deep interest in these hearings is motivated by the question of due process

* See Welfare and Institutions Code Sec. 7502 which provides there will be no restriction on the correspondence of inmates with the superior court judge or district attorney of the county from which he was committed or admitted. In addition, Department of Mental Hygiene ruling No. 52 gives mail privileges beyond those provided in Section 7502 of the Welfare and Institutions Code. In addition to correspondence with superior court judges and district attorneys, the rule provides that patients have a right to send uncensored mail "to their own attorneys, the superintendent, and the director." The rule gives further correspondence rights with other persons. Department Rule No. 53 provides that mail directed to patients from the superior court judge or district attorney shall be delivered to the patient unopened.

of law and protection of the civil rights of the patient, because frankly I think the psychiatrists, as far as the medical treatment is concerned, are the experts and they are certainly not going to get any help from me in that field. Being a layman, I am vitally interested in the matter of civil rights.

JUDGE REPPY: Well, you see, the point you are concerned with as to when the person should leave is a medical one. I think perhaps what you are concerned with is should there be a review of how the patient got in, and again be sure that everything went all right.

SENATOR GRUNSKY: That's right, or that you don't have some incompetent doctor who himself may be a mental case or alcoholic and doesn't keep records and doesn't even know who is there. I mean, there are some institutions that are just that sloppy. I don't think we have any in California, but—

JUDGE REPPY: But the answer might be for the state to have a legal expert who would check out the cases in the mental institutions.

SENATOR GRUNSKY: Well, all I am saying is that you are real worried about my money and my estate, but nobody worries about what happens to you when they close the door on you.

JUDGE REPPY: Well, you can rest assured we are certainly worried about it at the time the hearings take place, and the rather awesome task of making the commitment. (P. 237.)*

JUDGE MUNNELL: The problem of a judicial review, however, I feel as Judge Reppy does, would be difficult, and for this reason: Perhaps it is best illustrated in what frequently happens in this court, the patient demonstrates graphically the situation that the doctors describe by diagnosis, the doctors say this is a case of schizophrenia, paranoiac reaction and recommend hospitalization, and the patient will talk about the gamma rays controlling their thoughts or minds, this is something you can see, as a layman you can see this person is ill and needs help.

Now, that patient asks for a jury trial, doesn't recognize the need for psychiatric help at all, very resistive, requests the jury trial and three weeks later that same patient is before a jury with these symptoms or mental illness clearly masked. The condition is still there, the mental illness continues, but the symptoms are absent. What has happened? Three or four weeks in the hospital awaiting his jury trial with the very excellent drugs available and this patient does not demonstrate the illness.

Now, picture the judge reviewing a patient who has been in the hospital 60 days or 90 days, reviewing the case. He is not in a position as a layman to say that this patient continues to be mentally ill and in need of hospitalization. The doctors at the jury trial in the first illustration will frequently come in before the jury, after this court has made

* Hearing transcript, office of chairman.

a commitment, and say the patient is in a state of remission and recommend a dismissal, I frequently think not because the doctor doesn't believe that the patient is mentally ill, but they are not going to be able to demonstrate it to the jury, which is about what you have to do to get the jury to go along in a finding.

I would prefer to see, in order to protect against this type of thing, an internal review, a periodic review by a staff of doctors.

SENATOR GRUNSKY: You mean internal within the hospital?

JUDGE MUNNELL: Internal within the hospital, to require the doctors, which I am sure they must be doing this already as a matter of practice, I am confident they are doing it, and I am confident of it because of the number of the patients which are released, I think the average period of hospitalization now is somewhere around 90 days.

SENATOR GRUNSKY: You feel habeas corpus is adequate protection now?

JUDGE MUNNELL: Yes.

SENATOR GRUNSKY: But the one I'm interested in is the lone individual with no family and no friends, and frankly myself, if I were in an institution, maybe Caryl Chessman and some of those can write their briefs and do all the rest of it, but if I were mentally ill I would be pretty alone in this world without someone looking out for me.

JUDGE MUNNELL: This is a very interesting thing, but I believe the doctors will all tell you that if you become mentally ill you are not going to lose your knowledge of law. (P. 244.)*

JUDGE JOSEPH KARESH: Thank you for permitting me to come back. I am of the opinion that the judge who commits a man should within 90 days have a review of what has happened to the man in the hospital, and if it appears to the court that perhaps there should be a re-hearing, then the court should have the right to give it to him. It may be a burden, but it's worth it.

Now, we know that habeas corpus is very limited, and for a man to get out on habeas corpus is almost impossible, but I would like to know what happens to the man that I send up. I don't know. Sometimes you walk down the street and you see a man you have committed. We ought to be advised and that ought to go into his file. Here you have a file, the man has been let out of the hospital and there is nothing in the file to show that this man is out. To be sure, he may have a certificate in his pocket, but that doesn't do any good. There should be something on this order and I am glad you called it to my attention.

SENATOR GRUNSKY: They do it on parole, particularly when the individual is going to be back in your community, and the next time he is in trouble he is going to be back before you.

* Hearing transcript, office of chairman.

JUDGE KARESH: There is no question that there should be a review in, I think 90 days, because I think that's the 90-day period when they know something good is going to happen or some good is not going to happen. It ought to be automatic to review it in 90 days and the result of that conclusion should come to the court.

SENATOR GRUNSKY: The reassurance I am seeking is . . . I mean, it's obvious that the psychiatrists in the hospital are going to give you reports and you may read them and accept the recommendation, but the point is that at least you will know they have been required and they know that someone else is going to read that report, some responsible judge . . . and, it has to my mind, a very salutary effect upon the doctors. It's just like sending a patient out for a medical examination and the doctor knows he is going to have to submit to the attorney a lengthy written report; it's surprising how much more careful they are in their examinations and the thoroughness with which they do it.

JUDGE KARESH: As Janet Aitken mentioned, we might use the analogy of the sex psychopath. I think they have to report back to the court in 90 days, and if it should be done in that case it should be done in this case.

CHAIRMAN PETERSEN: All you have to have is a report from the doctor, you wouldn't have to have another report.

SENATOR GRUNSKY: If the doctors are making the reports anyway. . . .

JUDGE KARESH: They might as well make it to the court. If the court feels that's something he should explore, he should have that right.

SENATOR GRUNSKY: And if you felt there was something not quite according to the book, then you as a friend of . . . in a paternalistic way, you as a friend of this lonely soul could initiate an appropriate proceeding, call in the public defender or notify somebody to see that he will be protected. (P. 247.*)

JUDGE MUNNELL: The hospital frequently will issue a certificate of competency. I wonder if in issuing that a copy could be filed with the court for filing in the patient's record. Frequently we run into problems with title companies, the patients will need a judicial decree and perhaps this would help in one respect, and then if you are thinking of a judicial review, rather than thinking of the 30-day clause, of the 90-day clause, because probably the majority of the patients committed are going to have been released by that time, perhaps the annual judicial review would be highly desirable.

* Hearing transcript, office of chairman.

SENATOR GRUNSKY: And it would be done by an attaché; it wouldn't be expected that you would do it yourself, but a referee or court attaché like a counsellor who would review it, and if something looked out of order he could see you in chambers and say, "Judge, let's take a look at this."

JUDGE MUNNELL: Perhaps even the judicial review right in the hospital by the judge. If you are going to have a review, it should be a review.

SENATOR GRUNSKY: Or like they do when the time comes up for parole.

JUDGE MUNNELL: If it is to be a judicial review, then it should be judicial, then the court should be there with doctors and taking testimony and making a finding of one kind or another.

CHAIRMAN PETERSEN: You know we have a medical review now, at least we assume we do.†

JUDGE MUNNELL: Yes, I am worried about the sexual psychopathy proceedings, because you are going to find yourself back in the same position you were in the first instance; that is, you make a preliminary finding that the person is sexually abnormal, a sex offender, and commit him for 90 days, and just prior to the expiration of the 90 days you receive back a letter that this man is in fact—which you already suspected him to be—a mentally abnormal sex offender. The superintendent recommends indeterminate commitment and the court, as a matter of form, then commits for an indeterminate period of time and a certified copy of the order is served upon the patient in the hospital and he has within 10 days to request a jury trial or waive it. I think we might find ourselves in that same position if we ask for this report back from the hospital. If it is going to be a review, I am not sure that it is needed. I don't think that it is, but if the committee thinks that it is—

SENATOR GRUNSKY: I am not advocating it, please don't misunderstand me, my mind is just inquiring into it.

JUDGE MUNNELL: Well, in your deliberations, when you get to that point, I think it should be a judicial review with perhaps a year's lapse from the date of the original commitment. (P. 250.†)

* Hearing transcript, office of chairman.

† See Welfare and Institutions Code Sec. 6621, which requires the superintendent of the hospital, within three days of the reception of any patient, to make a thorough physical and mental examination of the patient. Further, that during the time the patient remains an inmate it is required that the superintendent make or cause to be made such examinations as are approved by the department. Department Rule No. 46 is to implement Sec. 6621, W. & I. Code. The rule provides that there shall be a continuous review of the status of each patient and at least quarterly a general evaluation by his doctor with a clear notation to be made in the patient's medical record.

LEGISLATIVE COUNSEL'S DIGEST

Mentally ill persons.

Amends Sec. 7501, W. & I.C.

Requires that examination by Department of Mental Hygiene of public and private facilities for mentally ill be made annually, and provides that Director of Mental Hygiene shall appoint three-man team to conduct such examination.

Provides that if it is found that any person confined in such a facility is not properly or suitably cared for, director shall report such fact to judge of superior court from which such person was committed or otherwise entered facility, for such action as judge finds necessary to take.

SENATE BILL

No. 38

Introduced by Senators Petersen, Grunsky, Rattigan, and Farr

January 6, 1965

REFERRED TO COMMITTEE ON JUDICIARY

An act to amend Section 7501 of the Welfare and Institutions Code, relating to the mentally ill.

The people of the State of California do enact as follows:

- 1 SECTION 1. Section 7501 of the Welfare and Institutions
- 2 Code is amended to read:
- 3 7501. *The At least once annually the department shall ex-*
- 4 *amine all each public and private hospitals hospital, boarding*
- 5 *homes home or other establishments establishment whether or*
- 6 *not licensed by the department, receiving or caring for the*
- 7 *insane, alleged insane, mentally ill or other incompetent per-*
- 8 *sons, and shall inquire into their its methods method of gov-*
- 9 *ernment, and the treatment of all inmates thereof. The exam-*
- 10 *ination shall be conducted by a three-man team appointed*
- 11 *by the director, and such team shall report its findings to*
- 12 *the director.*
- 13 *If, as a result of any such examination, it is found that*
- 14 *any person is not properly and suitable cared for, or is not in*
- 15 *need of further confinement, the director shall report that fact*
- 16 *to the judge of the superior court of the county from which the*
- 17 *person was committed or otherwise entered the hospital, board-*

1 *ing home, or other establishment, for such action as the judge*
2 *finds necessary to take.*

3 ¶ *The department shall also examine the condition of all*
4 *buildings, grounds, or other property connected with such*
5 *institutions, and shall inquire into all matters relating to*
6 *their management. For the purposes specified in this para-*
7 *graph the department shall have free access to the grounds,*
8 *buildings, and books and papers of any such institution, and*
9 *every person connected therewith shall give such information*
10 *and afford such facilities for examination or inquiry, as the*
11 *department requires.*

CHAPTER I

Recommended Legislation S.B. 37

Purpose

Authorize discretion to be exercised by the district attorney concerning acceptance of a petition from any person other than officials and physicians now authorized to file a petition for commitment of an allegedly mentally ill person.

In counties having established the position of mental health counselor such officials will be designated as an official also authorized to file such petitions.

Justification

In criminal cases the law now permits the district attorney's office to exercise discretion concerning the filing of a criminal complaint. A suggestion was made to the committee that it be a misdemeanor to wilfully and falsely file a petition alleging mental illness as is now the law in regard to initiating proceedings for determination of drug addiction. The committee felt that there was not sufficient data presented to warrant recommending the imposition of a criminal penalty at this time but that a discretionary evaluation by the district attorney prior to the filing of a petition to determine that probable cause for such action was justified appeared desirable.

In addition to those officials and physicians now authorized to initiate petitions for court proceedings it was the consensus of the committee that, based on the testimony concerning the equitable functioning of county mental health counselors that they should be similarly authorized to perform this function.

Selected Statements by Hearing Witnesses

MISS AITKEN: Moving on to the commitment petition section, there is one thing in there that troubles me as an assistant district attorney, and that is the requirement that the district attorney shall prepare the papers. I think that is a poorly worded section. I think that the district attorney should be required to prepare the papers if an investigation reveals reasonable and probable cause.

Now, I think every district attorney's office would exercise that as they do in criminal cases. But I think that it is dangerous to have something in the law—someone could come in and demand, somebody who was unjustified, and the district attorney would be hard put to say "I am not going to do it" when the law says "shall." (P. 44.)*

I would also like, along the lines of possibly bad petitions, to require it to be a misdemeanor for anyone to willfully falsely file a petition. Now, oddly enough, that appears in the drug addiction commitment, which I know you are not going to discuss, but there are not too many of those. If it is in there, in that Section 5361,* † I certainly think it should be in all of the other forms of commitment.

* Hearing transcript, office of chairman.

† Sec. 5361, Welfare and Institutions Code. "Any person who knowingly and maliciously attempts to have any person adjudged a drug addict under this article, unlawfully, is guilty of a misdemeanor."

Now, these cases would be hard to prove, but the very fact that it is there, I think, would keep the occasional designing or malicious person in a domestic dispute, or a family-with-money situation, from seizing on this procedure to get someone out of the way and maybe become a guardian, or something like that.

Also, I think another section should be made uniform, and that is 5262,[†] which provides in the case of mentally retarded that a malicious petition, and this would, of course, require proof, will justify the court ordering the petitioner to pay all costs. Again, it would be hard to prove, but if those things are in the law, and if they are made clear to people petitioning by the people who take the petitions, clerks, district attorneys, hospital staff, I think you will have a little less of what scares us all the most, which is the malicious, false petition. (P. 52.*)

JUDGE ALLEN MILLER: If it is possible for any county, no matter how small a start they make, to have a mental counselor and take advantage of that, that gives you a staff within which the court can operate and this is absolutely essential, I think, to obtain some kind of aid to the court in not only protecting the civil rights, but also in organizing the medical testimony to bring to bear on the situation.

And so I urge every representative of every county who is here which doesn't have a mental health counselor, or even a part-time one, to assist in this thing, because I think this is the starting point to give you the tools to understand how to operate this.

Then, with a mental health counselor, or maybe even the use of a probation officer in lieu thereof, using the technique of the 5076,[‡] which permits the court, without the stigma of finding a person mentally ill, to find him disoriented, or bordering on mental illness, and he has the power then to make a commitment and postpone for 30 or 60 days this final thing of needing hospitalization.

Then that mental health counselor, or maybe the probation department serving in this capacity, can take this person by the hand and get him into outpatient therapy, which frequently is needed. This is a device that I think can be used greater without the stigma of commitment and overcrowding our hospitals, maybe, with the borderline case.

Where you feel that there might be a good calculated risk that outpatient therapy would immediately apply, it might be efficacious rather than a commitment.

A further use of this technique, I think, would be very advantageous, particularly when we are through Short-Doyle, in the next few years, going to have, in my opinion, a great deal more facilities for out-

* Hearing transcript, office of chairman.

† Sec. 5262, Welfare and Institutions Code. "In case of the dismissal of the petition, the court may, if it considers the petition to have been filed with malicious intent, order the petitioner to pay the expenses in connection therewith, and may enforce such payment by such further orders as it deems necessary."

See also Sec. 5152, Welfare and Institutions Code. "If the alleged mentally ill person is adjudged not to be mentally ill, the judge may, in his discretion, charge the costs of the proceedings to the person who signed the petition in respect to him, and judgment may be entered against him for the amount thereof and enforced by execution."

‡ Sec. 5076, Welfare and Institutions Code.

patient clinics where we can take care of the situation in this way without the necessity of the finding that goes along with mental illness and commitment. And this kind of answers a little bit, I think, this thing on a temporary basis, this idea that was proposed by Mr. Thale of an observation period of maybe 30 to 60 days before the final decision is made. I think we can use 5076 (Welfare and Institutions Code), disoriented and bordering on mental illness, and then some device to hold his hand and obtain outpatient treatment might be a good device. (P. 136.*)

DR. RUSSELL: I like also Judge Miller's suggestion of the mental health counselor.

Sometimes in government you have to improvise, and I have a feeling that we have probably done that simply because mental health counselors sounds like it is another job, and which frightens our appropriating bodies, and so we have done it in other ways.

One way or another, I think there must be and should be mental health counselors. This is serious business, so I think that a lot of excellent talent has to be thrown into it. (P. 149.)*

MR. TSO: What I want to do, and what I shall attempt to do, is to briefly set forth the functions that the mental health counselors perform in Los Angeles County.

Here in Los Angeles County the psychiatric department of this court is assigned by court rules all matters relating to the commitment of the mentally ill person, along with the alcoholic, the narcotic-drug addict, and the various other persons that require hospitalization.

Within the psychiatric department of this court is the office of the counselor in mental health. Here in Los Angeles we have a staff of 30, 14 of which are mental health counselors. The functions of the mental health counselors' office pertain to the involuntary commitment of the alleged mentally ill for this county of seven million people. These functions are centered in three main areas:

The first area is the screening and preparation of the petition alleging a mental problem.

The second area is the investigation and report to the court as to the cases brought before it.

The third area is the supervision and care of the persons committed to its custody pursuant to Section 5076 of the Welfare and Institutions Code. These persons are essentially the senile persons that, because of advanced age, have been deemed bordering on mental illness.

With respect to the area of screening and preparing the petition alleging this mental illness, I would point out the fact that during the calendar year of 1963 there were 10,646 intake cases that appeared before our department.

Of the 10,646 intake cases, 6,046 actual filings took place.

The 4,600 cases that were not filed on we attribute to our policies respecting the preparation of the petition alleging mental illness, and

* Hearing transcript, office of chairman.

to the efforts of each deputy mental health counselor who seeks in every way, whenever feasible, to channel the person seeking help into a voluntary program.

Of the 6,046 filings in 1963, 4,146 were petitions alleging mental illness in which 3,650 were actually committed by the court under Sections 5100 or 5076.

Now, this figure represents a commitment percentage of approximately 88 percent, and I again feel that this figure may be attributed to the screening process and utilization of non-court-connected psychiatric programs.

Our screening process here essentially provides that before a petition alleging mental illness is prepared, probable cause must be submitted to the mental health counselor assigned to the particular case, and probable cause here may be in the form of a certificate or a letter from a doctor stating that the doctor has examined the patient and, based upon this examination, feels the patient or the person to require hospitalization or detention pending the court hearing and subsequent commitment, if any.

Of course, there is another factor in here, in that the probable cause may be affirmative allegations by the petitioning party that the person is likely to injure himself or others because of the mental condition, unless detained and hospitalized.

Now, based upon this requirement and the referral system, we hope that only cases that absolutely require commitment by the court are processed and that the frivolous and capricious types of commitment requests are eliminated.

We treat our psychiatric court as an agency of last resort, and whenever possible we seek to channel the person into a voluntary program. I feel that our procedure under the present code has worked quite effectively, and because of it the 4,600 cases were not filed on.

However, there is the position taken that a person who is not satisfied with our requirements can still file a petition alleging mental illness inasmuch as the Section 5047 of the Welfare and Institutions Code provides that "Any person may file a petition."

I believe here that this is a necessary feature in our present code and should be retained inasmuch as it leaves the petitioning parties a right to a court adjudication respecting their allegation and doesn't make the findings of the mental health counselor, who is part of an administrative agency, a final one.

It seems that the majority of our petitions here in Los Angeles are a result of certification from the hospital here. Usually the patient has been brought into the hospital for detention and observation by peace officers or interested parties pursuant to Section 5050.3 of the Welfare and Institutions Code, and this observation period is usually for a period of 72 hours. Subsequent to the 72 hours, the hospital then submits their certification to us for the preparation and filing of the petition alleging mental illness. Upon the filing of the petition the judge of the psychiatric court here may issue an order of detention, thereby detaining the person further here in the hospital pending the examination and hearing.

Now, once the detention is issued in Los Angeles, the mental health counselor, who is not a uniformed deputy, serves the person with a certified copy of the petition and order of detention and commences his investigation and report of the case then and there. This report, the mental health report, is provided for under Section 5029 of the Welfare and Institutions Code, and contains just about complete information pertaining to the inducing cause of the mental illness.

From the date of service upon the alleged mentally ill, a court hearing here in Los Angeles is usually provided for within two court days. During these two court days the person is examined by our court medical examiners and the investigation and report of the mental health counselor is concluded and submitted to the court.

Of course, at the hearing the judge will determine the issue of the person's mental condition. . . .

Briefly, to conclude, I have two recommendations that would aid us in our program. The first recommendation would be that Section 5047 of the Welfare and Institutions Code be amended so that in counties having a mental health counselor that office shall be the agency that prepares the petition alleging mental illness rather than the office of the district attorney.

The second recommendation is that persons committed under the provisions of Section 5076, these are the elderly, senile persons, be permitted to jury trial rights, such as those that are committed pursuant to 5100 as mentally ill. (P. 150 *)

CHAIRMAN PETERSEN: What requirements do you have to have to be a mental health counselor for Los Angeles?

MR. TSO: The 14 mental health counselors assigned to the department here have at least a master's degree in the behavior sciences and one year in the field of treatment and dealing with mentally ill persons.

I, myself, am a member of the California State Bar and my position is that chiefly of an administrator.

CHAIRMAN PETERSEN: What is the salary range of the mental health counselor in Los Angeles County?

MR. TSO: I believe that our senior item pays approximately \$11,000, sir.

CHAIRMAN PETERSEN: And the junior, the lowest grade?

MR. TSO: The junior is up to about \$9,000, sir. (P. 157.*)

JUDGE MUNNELL: I would like to say one other word about the mental health counselors' unit, Los Angeles County. This is a staff which saves the Los Angeles County taxpayer an untold sum of money, it's difficult for me to compute the value in dollars, if not its value in saving grief and suffering to the relatives and the parents of the patients. (P. 220.*)

* Hearing transcript, office of chairman.

CHAIRMAN PETERSEN: With regard to your petitions, do you feel you have the discretion of whether you file a petition or not?

MR. TSO: Yes, sir. That is quite true. However, in the event that the person is unsatisfied with our requirement, he still has the statutory right and privilege of filing a petition on his own.

CHAIRMAN PETERSEN: Did you hear the suggestions that if a person did file upon his own and did so wrongly, that that would be a misdemeanor? Do you think that would be a worthwhile change in the law?

MR. TSO: Yes, Mr. Chairman. We had that provision in the 6500 (6500 et seq. Penal Code) series of our Narcotic Act. . . .

And because of that, we have very few, let's say, wrongful reportings. And I think if we have that in the provisions of 5047 (Welfare and Institutions Code), we might prevent it.

However, I have been here one year now, or a year and a half, with the department, and of the 700 or 800 filings that I have taken part in, I think, to my knowledge, only four were filed by another agency. (P. 157.*)

LEGISLATIVE COUNSEL'S DIGEST

Mental commitments.

Amends Sec. 5551, W. & I.C.

Conditions right of person to file petition for commitment of alleged mentally ill person on finding by district attorney that there is probable cause for allegations made by such person.

Authorizes counsellor in mental health to file such petition.

SENATE BILL

No. 37

Introduced by Senators Petersen, Grunsky, Rattigan, and Farr

January 6, 1965

REFERRED TO COMMITTEE ON JUDICIARY

An act to amend Section 5551 of the Welfare and Institutions Code, relating to mental commitments.

The people of the State of California do enact as follows:

- 1 SECTION 1. Section 5551 of the Welfare and Institutions
- 2 Code is amended to read:

* Hearing transcript, office of chairman.

1 5551. Any person may *submit to the district attorney of*
2 *the county a request for permission to file in the superior*
3 *court a verified petition, alleging that there is in the county*
4 *a person who is mentally ill and in need of supervision, care,*
5 *or treatment, and asking that examination be made for the*
6 *welfare of the person as provided in this article. If the dis-*
7 *trict attorney finds that there is probable cause for the alle-*
8 *gations made by the requester, he shall grant permission to*
9 *the requester to file the petition, and the requester may then*
10 *file the petition. If the district attorney refuses to grant per-*
11 *mission, he shall make a written record of that fact, giving the*
12 *reasons for his refusal, and shall file the record with the clerk*
13 *of the superior court.*

14 When no relative, friend, or other person can be found
15 in the county who is able and willing to make and file the
16 petition herein provided, any peace officer, probation officer,
17 physician attending the patient, *counsellor in mental health,*
18 physician attached to a public hospital or institution, if the
19 person is a patient therein, or public guardian may make and
20 file the petition herein provided. The district attorney or his
21 deputy shall prepare the petition and all other forms re-
22 quired in the proceeding when requested by the party who is
23 to file the petition or other form. When a petition is filed by
24 any such person, neither the person making or filing the peti-
25 tion, nor his superiors, nor the department, hospital, or insti-
26 tution to which he is attached nor any of its employees, shall
27 be rendered liable thereby either civilly or criminally if there
28 was probable cause for the making and filing of said petition.
29 *The district attorney shall not be rendered either civilly or*
30 *criminally liable for granting or refusing to grant permission*
31 *to file a petition if there was probable cause for his action.*

Recommended Legislation S.B. 88

Purpose

Eliminate the present provision for granting of a jury trial to any person aggrieved by refusal of the court to grant an application for order of supervision, commitment, detention or hospitalization of person alleged to be mentally ill.

Justification

In the course of the 1962 hearing of the committee testimony was received which indicated that under present law an individual could be retried, despite a medical discharge from hospitalization, on the basis of any aggrieved dissatisfied person. There does not appear to have been any extensive use of this old section and there appears no pervasive reason for its continuance.

Selected Statements by Hearing Witnesses

SENATOR FARR: There is another matter that you brought up, Judge Munnell It is the matter of a friend of the family demanding a jury trial after the court has found a person to be not mentally ill.

JUDGE MUNNELL: Yes. In this court in Department 95, if the judge sitting here finds the person not to be mentally ill based upon the testimony of the doctors, and the person is released and ordered discharged, then a relative, under the existing law, may demand a jury trial on the question of his mental illness.

CHAIRMAN CAMERON: Does anyone know what the reason for that is? Did the people understand it? I am accused of being mentally ill. I am brought up here; the doctors say they disagree; one thinks I am ill but I am all right, and the other one says let him go.

JUDGE MUNNELL: Or take both. They both say he is all right. (P. 214.)*

CHAIRMAN CAMERON: Or they both say he is all right. And a relative, for instance, thinks I belong in an institution, so the judge says no; the doctors say he is all right. Let Senator Cameron go. The relative says no; "I demand a jury trial." So I have to sit in front of a jury all over again. This doesn't seem right to me.

MR. MELVIN B. THALE: I might say, I have had four of those jury trials and I haven't lost one yet, where the doctor has testified that the person is not mentally ill and the person himself got up and testified and after the jury heard the person who the doctors recommended be discharged, they committed him every time.

* 1962 hearing transcript, office of chairman.

CHAIRMAN CAMERON: They did? Will you stand up, sir, and identify yourself?

MR. THALE: My name is Melvin B. Thale, deputy district attorney.

SENATOR GRUNSKY: Can we get that point straight? You mean the jury actually finds the person should be committed even though the judge had found they should not be committed?

MR. THALE: That is correct. The judge here in the hearing in Department 95, on the advice of his two doctors, found the person to be not mentally ill. And then the people, under the section, it used to be 5129, demanded a jury trial. It says where the people are dissatisfied with the ruling of the court they may in turn demand . . . (P. 216.*)

SENATOR FARR: When you say "the people," are you talking about the family?

JUDGE MUNNELL: Family. The interested parties.

MR. THALE: Family. It says the aggrieved party may demand a jury trial. The case was set down for a jury trial, had a regular full-fledged trial, the doctors testified, other witnesses testified on behalf of the person who was to be discharged, and the person himself testified in his own behalf and the jury came back with verdicts of mentally ill. And the person went to the state hospital. (P. 216.*)

SENATOR GRUNSKY: Might I ask, what testimony was it to support it? You mean the relatives get up and say he is a nuisance at home?

MR. THALE: Yes, the relatives got up and said he was a nuisance at home.

SENATOR GRUNSKY: And the jury probably has a nuisance or two at home of their own, so they go along with it?

MR. THALE: I found out usually in these cases the trial turns on the appearance of the patient before the jury regardless of medical testimony either way.

SENATOR GRUNSKY: And discussing it with the jurors, which I know is not infrequently done, to find out how in the world they arrive at their decision, that seems to be what they thought?

MR. THALE: They were guided by the appearance of the witness. (P. 216.*)

SENATOR GRUNSKY: I have this question: It is rather new to me that having waived a jury and proceeded to trial and being dissatisfied, whether you are the plaintiff, defendant, district attorney,

* 1962 hearing transcript, office of chairman.

as the case may be, how you can get a retrial and a reshuffle. Well, I know it is in the law, but it puzzles me. I know if I go in and waive a jury trial and don't like the decision, I placed my bet and I take my chances. But in this you actually get two shots?

MR. STOUT: You have two interests. (P. 217*)

MR. DISTLER: Excuse me, Senator Cameron. I might have an answer to the last question, and that is that on the previous commitment hearing there has not yet been an opportunity for a trial by jury. (P. 218.*)

On the original commitment hearing, of course, there is no trial by jury, just a determination. . . . These trial-by-jury commitment proceedings occur after the original commitment, never prior. And that would perhaps answer your question.

CHAIRMAN CAMERON: Yes. Now again, Mr. Purcell, do you know any reason, or can you think of any legislative history why a friend or relative should have the right to demand a jury trial once the doctors and judge have declared the man really is competent?

MR. PURCELL: No, I don't know why the section was put in, although it has been in the law for some 23 years. It was enacted way back in 1939.

SENATOR RATTIGAN: Do you suppose it was in the law because it was then conceived that the person filing the petition is before the court and tenders an actionable issue of fact and that he is constitutionally entitled to a jury trial of that issue of fact?

MR. PURCELL: That may well be. (P. 219.*)

JUDGE DRUCKER: There may be occasions when, at the time of the examination by the doctors, a person may appear to be rational at the time, and at the time of the appearance before the court herein the psychiatric department he appears to have insight into his problem and there appears to be no need for commitment to a mental hospital or sanitarium. Yet, the family who may have lived with the problem, and this man who may have been under the care of a psychiatrist over some period of time, are satisfied that this man does require help even though he appeared at a time when he seemed to be rational. And so the family pursues this further and wants a further hearing. (P. 220.*)

When the matter is brought up before the jury, some time elapses before the case finally gets to trial and at that time the patient may have a remission and demonstrate the fact that he is mentally ill by the manner in which he answers the questions which appear to be irrational at the time.

Consequently, the jury may come to a different conclusion than that first reached by the doctor.

So it appears that at the time of the examination it wasn't apparent to the doctors, and I think if the doctors would reexamine after they

* 1962 hearing transcript, office of chairman.

listen to the patient's testimony, they may themselves change their testimony. It has happened on a few occasions.

CHAIRMAN CAMERON: Mr. Stout, did you wish to add anything?

MR. STOUT: No. Senator Rattigan has, I think, by his question to the Legislative Counsel representative, posed the issue. I think this is the origin of the rule, because the person who signs the petition is essentially under the law an aggrieved party, and has an interest or stake in the outcome. It is not only the person himself, but the petitioner who has an interest in the proceeding. (Pp. 220, 221.)*

SENATOR GRUNSKY: My feeling is this: Anything that deprives a person of their life, liberty or pursuit of happiness, whether it is a criminal proceeding, which mental proceedings are not, or whether it is a proceeding in alleged mental illness, so far as that patient is concerned they are incarcerated and deprived of their liberty just as real as if they are being charged with a criminal offense. And though there may be a constitutional question involved, such as that phrase by Senator Rattigan, I think that I would be willing to enact the law and have it tested for the reason that I think I may already have made clear, but by further analogy, a prosecuting witness in a criminal matter certainly does not have the decision as to whether or not it should be a jury trial and certainly has no right to demand an appeal.

So far as I am concerned, whether it would be my wife—heaven forbid—a neighbor, or so-called friend—and with such friends, who needs enemies?—who file the complaint, so far as I am concerned, even though it is a mental proceeding, they are my prosecuting witness and so far as I am concerned my liberty and my constitutional rights are my decision and my discretion to exercise.

CHAIRMAN CAMERON: Mr. Distler, you have practiced on this. How do you feel about this?

MR. DISTLER: I don't feel these other parties should have this right to file this trial by jury. (Pp. 221, 222.)*

MISS AITKEN: I would like to comment now on the jury trials. I believe that this privilege should remain, although people who try them find them difficult cases. Sometimes, if a patient—this is from the standpoint of the person who has tried the cases—is under control, he may convince a jury he is not mentally ill, but after much soul searching I feel this is a privilege we should retain in the law.

Reading your proceedings from your last hearings on this, I notice that there were questions raised about the jury, raised by the petitioner or the complainant. I have never had that situation myself so I can't comment on it, except philosophically.

I think, though I have mixed feelings, that that privilege should remain. I don't think it is utilized nearly as much as the request for a jury by the patient. (P. 59.)*

* Hearing transcript, office of chairman.

LEGISLATIVE COUNSEL'S DIGEST

Mental commitments.

Repeals Sec. 5576, W. & I.C.

Eliminates provision granting right to jury trial to any person aggrieved by refusal of judge to grant application for order of supervision, commitment, detention, or hospitalization of person alleged to be mentally ill.

SENATE BILL

No. 88

Introduced by Senators Petersen, Grunsky, Rattigan, and Farr

January 12, 1965

REFERRED TO COMMITTEE ON JUDICIARY

An act to repeal Section 5576 of the Welfare and Institutions Code, relating to mental commitments.

The people of the State of California do enact as follows:

- 1 SECTION 1. Section 5576 of the Welfare and Institutions
2 Code is repealed.
3 5576. If a judge refuses to grant an application for an
4 order of supervision, commitment, detention or hospitalization
5 of a mentally ill person alleged to be dangerous to himself
6 and others if without supervision and treatment by physicians;
7 detention and hospital or sanitarium care he shall state his
8 reasons for such refusal, and any person aggrieved thereby
9 may demand a trial of the question of the mental illness of
10 the person alleged to be mentally ill, in the manner provided
11 for a jury trial when demanded by or on behalf of the alleged
12 mentally ill person.

CHAPTER II

Hearing Highlights on Selected Topics

Topic: *Voluntary Commitments*

DR. STAINBROOK: . . . there is the trend which I think is very basic and which has been really quite dramatic in the last six or seven years—I can give you the statistics from this particular hospital—toward the voluntary admissions of patients.

For example, seven years ago, at the time when I came to this hospital, we were admitting into this unit, that is, into the psychiatric unit, about 97 percent of all the patients who came to the psychiatric unit who were here either by an original petition issued by the court outside for examination within the hospital, or under the 72-hour emergency commitment, so that only 3 percent at that time, over seven years ago, who came under the scope of the hospital were here voluntarily.

At the present time we admit about 50 percent of the patients to the hospital on a voluntary basis. And the same kind of change has occurred with reference to the people who go on to the state hospital; from about 97 percent committed patients leaving this institution to the state hospital seven years ago to somewhere just over 50 percent who now go to the state hospital under commitment at the present time.

So you see, this is really a very striking change with respect to getting into the sickroom in psychiatry.

I would assume that this tendency has by no means spent itself, and I will attempt to discuss with you some of the directions which I think this voluntary admissions should still go, and which requires facilitation by various other agencies in the community. (P. 17.*)

. . . I think there are basically two fundamental reasons. One has to do, let's say, with the readiness of people to seek psychiatric help and, therefore, to come to a psychiatric hospital for this and come voluntarily.

I think the other change has been in psychiatrists themselves; that is, their willingness to maybe modify their perception of the patient as not being so dangerous and so threatening to them, and they have been much more willing, therefore, to spend the time with the patient working through his own anxiety about coming into a psychiatric hospital and getting him in on a voluntary basis.

SENATOR GRUNSKY: Do you think possibly under the Short-Doyle Act, where they have confidence they will be taken care of nearer home and maybe as an outpatient, rather than feeling if they come in voluntarily they are on a bus, and so forth. . . .

DR. STAINBROOK: Yes, I think all of this has gone into the patient's insight of what is going to happen.

* Hearing transcript, office of chairman.

SENATOR GRUNSKY: I presume with their first contact and in consultation the psychiatrist can logically persuade them that they may need institutional care and then they, with their logic, will go along?

DR. STAINBROOK: Yes, I think so. I have one other way that I am fond of putting this: I hear so many people, psychiatrists included, say that this patient has no insight; he doesn't recognize he is ill. He refuses to be a patient. And the ordinary assumption here is that this lack of insight is the patient's unwillingness to accept his own distress, whereas, actually, in my own experience, that is very seldom the case. Most of these psychiatric patients I know are quite willing to accept themselves as being disturbed, but they have great reservations about being a patient our way, and this acceptance of what being a patient is going to mean for them, being put away in a hospital and not coming back.

I think the patient's acceptance of what the patient's experience means has allowed a great deal for the patient to come a great deal closer in coming to the hospital voluntarily, because you see here again, and I might anticipate and say that one of the problems about commitment procedures, of course, is that their very existence perpetuates them, in the sense that if commitment procedures are possible, psychiatrists are likely, because of the tremendous pressure of time, and so on, to commit the patient rather than provide the reassuring helping relationship with the patient in which the patient's anxiety can be handled, and in getting the patient to agree to enter voluntarily.

So I think there have been those two changes, changes with the patient and changes encountered by the patient, which has allowed him to work through a reassuring relationship, and the fact that maybe it is all right to be a patient.

So, there has been, however, this very dramatic tendency, and I think this is one thing to keep in mind. To anticipate my argument, my own feeling is that if we push all we can from the psychiatric point of view toward getting voluntary admissions, we will ultimately reduce the number of patients who have to go into a state hospital, or any other kind of psychiatric hospital, under commitment to, I would estimate, about 20 percent.

You see, in Britain at the present time they have somewhat this same kind of ratio. I think we can do the same thing here.

As a matter of fact, in some of my more assertive moments I have stated that if I had enough staff to run this hospital, I would be willing to run it for one month without any recourse to commitment procedures whatsoever.

CHAIRMAN PETERSEN: Doctor, excuse me. But, how is this brought about in Great Britain?

DR. STAINBROOK: Well, simply by a willingness of the hospital, first of all, to be open; to work through with the patient what it means to enter the hospital; the provision of the same kind of outpatient resources close to the community; reducing the threat and danger in the circumstances; and the hospitals' general willing-

ness to accept voluntary admissions because, on the other side, you see, our own state hospitals are now around 50 percent of the voluntary admissions. But I think that anybody who speaks honestly has to state because of the limited resources of personnel in the state hospitals, and because of the fact that they have to accept committed patients, they frequently, in spite of themselves, make it a little more difficult for the voluntary applicant to come into the hospital than for the committed one, and again this shifts the balance in terms of commitment.

Then there is the other tendency toward the open hospital, which I think has been in line with reduction of the threat and the fear of the psychiatric hospital experience, and then, as you are suggesting, the shift from state to local treatment, so that increasingly local hospitals are able to accept right from the beginning patients whom they then perceive as not patients they are going to examine, quote and unquote, and send off to some other place, but right from the beginning they are going to attempt to treat themselves.

Now, if I can just rely upon your indulgence for just a few minutes, I want to put in a little bit of psychiatric, shall we say, education here, because I think this has a great deal to do with admitting procedures, and how, for example, in this particular hospital, where we fragment the hospital induction process, that is, stage many people here for seven days, then ultimately send them to the definitive treatment in some state hospital, how in many circumstances I feel this is highly antitherapeutic.

For example, consider the problem of the acutely disturbed psychopathic patient. I think there are two things going on when you become acutely mad. The first thing is because schizophrenia, or the schizophrenic reaction we are most familiar with, I think is a reaction formed to many different kinds of insults both to the person and his body, to his brain.

The first reaction, of course, that one experiences in becoming psychotic is the sense of the disorganization of one's self functioning.

Now, the second response is tremendously acute anxiety about becoming crazy. And the basic process of disorganization plus the acute anxiety about it constitutes, for me, the panic state of the acute psychosis.

Now, the implication of this, I think, is just basically in this area: If at the beginning when the patient is acutely psychotic and in great panic about himself I can provide for him another consistent, predictable human being whom he can predict and therefore come to some kind of stability about predicting himself, because I sense that one of the most difficult things of being a psychotic patient is our own inability to predict how other people from moment to moment are going to behave towards you, and how you from moment to moment are going to behave, it must be really a terrifying experience to have this little sense of control of one's self.

If, however, one can establish quickly in the first hours of this happening a human relationship that is consistently there, and intelligent in resisting anxiety, I have a feeling that patients so treated may quickly restitute from the acute panic and disorganization induced by the panic. They may still be psychotic, quote and unquote, but from

that time on they experience what it means to be helped so they may quickly get better.

On the other hand, patients for whom this type of experience can attain, for whom, for example, we lock in a room, or for whom because of our inadequate resources here we can't really give this kind of consistent response, these patients have nothing to do to handle their own anxiety except doing more of what they are already doing badly; withdrawing, avoiding other people, making delusional interpretations in order to make sense of what is happening to them, and getting worse.

The point is, I think, the sooner we can reach the extent to which a patient can enter a psychiatric hospital where he is going to stay, the better it is in terms of his prognosis.

Therefore, since many of the state hospitals are in urban centers, direct admissions, even of an acute nature, under the so-called 72 hour commitment, with the subsequent adjudication about commitment being done in that hospital, would seem to me at least to be a procedural communication which would not only perhaps make for more efficient committing procedures on the part of the courts involved, but also make it more likely that less of acute schizophrenics would go on into the long term chronic schizophrenia.

I think that is an important consideration here. (P. 19.)*

MISS AITKEN: . . . I believe in the philosophy of voluntary hospitalization, but I don't believe that it is possible in every case. I was very interested in Dr. Stainbrook's remarks about a psychiatrist convincing his patient that he needs voluntary treatment. I think that the commitment patients generally won't go to see a psychiatrist, in my experience, and when the subject is mentioned to them, they have a tendency to flee in panic.

It is for cases like that that I believe we need a court procedure. But there are other voluntary methods of admission, either public or private, state or county, which are possible and I think it is better to do that, because I think it is better for the patient. (P. 42.)*

JUDGE CHRISTIAN: . . . Now, a third front on which this effort ought, I believe, to be approached is that access to public facilities by persons who require public care in the psychiatric field ought to be made more readily available to the patients who appear voluntarily. That is, that the principal and usual method of access to public psychiatric facilities ought no longer to be judicial proceedings leading to a court commitment, but ought to be a referral by a family physician or a self referral, such as you would normally have in the case of any sick person who is reporting himself for treatment and happens to have to use public facilities for treatment.

The committee knows, of course, that the statutes do not allow for voluntary placement of patients in the state hospitals. Statistics indicate, though, that there is a very wide variation in different parts of the state in the use of the voluntary commitment procedure; voluntary

* Hearing transcript, office of chairman.

placement. Los Angeles County is quite high in this regard. There is much use made of the voluntary placement here, and the good record of Los Angeles County in this regard tends to make the statewide average look better than it would be were it not for the heavy weighting that the large population of this county gives to the statistical picture.

Among the individual hospitals of the state system there are now differences in theory in the reception of alcoholics, for example. Some of the hospitals, from my own experience, prefer not to take a patient for treatment of alcoholism except by court commitment, on the basis that the patient will not stay long enough to receive useful treatment.

Other hospitals, including notably Mendocino State Hospital, that the chairman is familiar with, has an active policy of encouraging voluntary placements on the basis that this creates in the patient a state of mind that is more conducive to effective therapy than if the commitment is involuntary.

Now, aside from these wide differences that exist in our system, there are comparisons with other public psychiatric systems in other states and abroad that are very striking.

In the United Kingdom, for example, after the adoption of the Mental Health Act of 1959, the proportion of voluntary placements in psychiatric facilities has gone to more than 95 percent; less than 5 percent of the total intake into public psychiatric facilities is on any kind of involuntary placement.

Here are some of the consequences of our continuing heavy reliance on court commitment as the usual or basic method of access to public psychiatric facilities.

Number one: The stigma that is felt in the public mind, upon psychiatric illness, upon acceptance of treatment in public facilities, is greatly reinforced where there is a judicial finding of mental illness followed by an order of commitment that implies incompetency that bears so obvious an analogy to criminal proceedings, and the like. (P. 70.*)

. . . I should like to refer the committee especially to the British Mental Health Act of 1959, I believe it is, under which, as I have indicated earlier, the basic method of access to the public facilities is referral by the general practitioner or self-referral. Less than 5 percent of the intake comes from court commitment. Similar but less drastic results have been achieved in several American jurisdictions.

There is now pending in the District of Columbia a study which will lead, I am told, to a measure—there is a measure now pending in Congress, but a new measure is being prepared for the next session. There is a draft of a mental health act that was prepared by some personnel of the Department of Health, Education and Welfare, that has been adopted in varying forms in Alaska, Missouri, North Carolina, and certain other American jurisdictions, with the result that more and more of the intake comes by means of voluntary self-referral and a participation of the family physician, and less and less by the intervention of the court.

I suggest that in all of this, that any changes or reforms that can be brought about in the manner that I have suggested, there is no civil liberty question whatsoever. What I am referring to here is the possibility of making available at the option of persons, at the option of

their medical examiners, their medical advisers, a procedure that is as much like as possible the usual way in which people take medical services with no compulsion, and with compulsion reserved wherever possible to cases that cannot properly be handled in this way.

I suggest to the committee that it ought to be possible in this state to engineer a result that will limit the use of court proceedings to those cases that are really dangerous to themselves or to others, and in practice we might find that our proportion is comparable to that of British experience: 5 percent or less. (P. 79.)*

JUDGE REPPY: . . . The desire to have the main stress on voluntary entrance is very interesting. I really don't know what the statistics are for our county, but I doubt that we have as many voluntaries as was suggested, even though our county has Camarillo State Hospital right in it. It might be that very reason, perhaps, that we don't.

But the problem with the voluntaries, which has developed with us, is that they do have the right to be released and they have to be released within seven days, and we get quite a few petitions before us filed by a doctor at Camarillo State Hospital who feels that the patient should not be released as he is now asking for and we conduct a hearing on it. I don't know whether there is anything in particular that can be done about that.

The problem of the stigma of commitment, I think, deserves a few comments. I find that to be a very real fear among the patients and members of their families. Despite the rather enlightened outlook that we say we have, I think at least the people who face commitment feel that it is going to be a stigma. So, if it is possible to handle a case in a way that does not result in commitment, we like to do that. And frequently we make continuances over a considerable period of time, as much as even three months, and release the party during the period of the continuation with usually a recommendation that the party continue conferences with his family physician, or with a psychiatrist, if they have the money. That is a terrific problem, affording the cost of psychiatrists. (P. 126.)*

JUDGE ALLEN MILLER: I have heard so many suggestions today, and Judge Christian's broad sketches with respect to where we are going generally in the state mental health appeal to me very much, and I see these trends going toward voluntary commitments, and getting away from the legal, involuntary commitments, I think, is the trend, and I think it is a good trend, and I don't think there is a judge sitting on the bench in California who isn't sympathetic to handling these things on a voluntary basis rather than an involuntary basis and going to take every step that he possibly can to see this philosophy effectuated. (P. 133.)*

* Hearing transcript, office of chairman.

DR. EDWARD LEE RUSSELL: I believe, and I think that probably the purpose of the committee, the interim committee, is to eliminate all acts or all measures that are not serving any useful purpose. For us, in our area, the voluntary admission is being used, but is being used mainly for the admission of patients to private hospitals. I am not proposing that it be eliminated, then. That is a decision that belongs to someone else. (P. 145.*)

MR. JESS D. CANNAN: We don't use the voluntary procedure at all in our county. Now, when I say we don't use it, what I mean is that we always use the involuntary procedure; however, many of our patients are voluntary in nature but we still go through the involuntary procedures. (P. 161.)*

SENATOR GRUNSKY: What is the reason for that?

MR. CANNAN: What is the reason? Well, one of the reasons is that it was my understanding, it was the understanding of our superior court judge that the hospitals preferred that. I have on occasion discussed it over the phone with them and they have said, "Well, go ahead with the involuntary procedure." They seem to prefer it.

SENATOR GRUNSKY: Well, then, why? I still would pursue the why, as to why they would prefer it, unless they have some sort of idea that the patient could walk out any time he wants to?

MR. CANNAN: That's precisely the answer.

CHAIRMAN PETERSEN: If I may interject myself into this, of course, Mendocino is my home, Ukiah, and I think their theory and philosophy has changed and they do want voluntary commitments now, I don't know if that has reached Trinity County, but in Mendocino County I know we have more and more voluntary commitments, and the hospital seems to want, or at least has stated they want voluntary commitments.

SENATOR GRUNSKY: But the implication of his testimony is that they feel a problem under voluntary commitments where somebody is in and they don't like the food or something and they can walk out.

MR. CANNAN: Right. Well, I feel there is a problem there myself.

MR. KENNEDY: There is an additional thing, Senator, that we have in our area—I am from Trinity also—and that is that the sheriff is reluctant to transport voluntary patients, he would much rather transport them while they are under court order, he feels more secure this way, and there is often no other way for them to get to the hospital than to be taken by the sheriff.

SENATOR GRUNSKY: Then again, I ask why.

* Hearing transcript, office of chairman.

MR. KENNEDY: I don't know. I am just expressing his feeling in the matter. He prefers to not be assisting these people in a private capacity, but rather to be acting under direction of the court.

SENATOR GRUNSKY: Well, is he worried about civil suits and claims?

MR. KENNEDY: Yes, definitely.

CHAIRMAN PETERSEN: And also it would be an expenditure of public funds.

MR. KENNEDY: It could be construed to be an expenditure of public funds for private purposes.

SENATOR GRUNSKY: Well, incidentally, for the record, then, that raises questions that if we are trying to encourage voluntary commitments, which the previous testimony has carried that consensus, maybe under governmental tort liability and other things, we had better understand whether they are exposed and existing law is working against the wider use of voluntary commitments. That's an incidental consideration we better have in mind, if I am correctly interpreting past testimony that we would like to have more and more voluntary commitments.

MR. CANNAN: Yes. There is one other thing in our county: Of course, we don't have the organization and we don't have the trained personnel to actually arrange or to promote voluntary commitments—I will get into this later on—and this is another reason we use the involuntary procedure. (P. 161.*)

JUDGE JOSEPH KARESH: . . . I believe in voluntary commitments wherever possible, but I would urge that there be placed in the law, some legislation that would provide that out of the county funds the people voluntarily committing themselves **should be transported** to the state hospital. There should be the same protection from a lawsuit, in the event there is an accident, that the sheriff gets when he transports the person. The way it is now, a **person transporting** someone, if you are an official and there is an accident, I don't think that he would be protected, and I don't think you could use government funds. (P. 202.*)

* Hearing transcript, office of chairman.

Topic: *Commitment Procedures for Private vs. Public Institutions*

DR. STUART C. KNOX: Commitment procedures should be uniform for both public and private facilities and should grant these facilities the following prerogatives:

A. They should be permitted to admit for treatment all persons who make application for such treatment, and they should be empowered to detain such persons for a period not to exceed seven days after application for release.

B. They should be permitted to admit, for supervision and care, any person who has been certified by a single physician as being mentally ill and in need of supervision, care and treatment; and they should be empowered to detain such persons not to exceed 72 hours, excluding weekends and holidays, after such emergency admission by certification of a single physician.

C. They should be permitted to admit for treatment any person who has been certified by each of two physicians as being mentally ill and in need of supervision, care or treatment; and they should be empowered to detain such persons not to exceed 60 days from the date of such admission.

D. They should be empowered to admit any person who has been committed in a judicial proceeding and to render care or treatment in accordance with the terms of the order of commitment for the period of time provided for in the commitment order.

The criterion for involuntary detention of a patient in protective quarantine should be the factor of danger to self or others. This factor is difficult to establish on the rules of evidence in some cases and must often be based on opinions derived from medical knowledge and experience. (P. 8.*)

One change that I think should be in the existing statutes today is to have a uniform code that applies to public and private hospitalization. (P. 15.*)

MISS AITKEN: On the private hospitals, I am not an expert. I would approve of either conforming them to the commitment or, in lieu of that, just one final thought, on the certification, I have actually great faith in the private hospitals, which are licensed, and in the great majority of the private psychiatrists practicing in the field; 99 percent, probably.

But there is always the possibility of either mistake or malice, or something like that.

You will notice that in the voluntary entry to a private hospital the private hospital must send a record of this to the Department of Mental Hygiene. I would say that if the certification remains in, the same thing should follow, and I checked the code and didn't find it. I could be wrong.

* Hearing transcript, office of chairman.

In other words, when a physician certified a person to a private hospital, I think that the private hospital should be required to make a log of that and send it to the Department of Mental Hygiene. I think the Department of Mental Hygiene could well even by letter contact the patient, or contact the hospital, and ask them to inquire if they are satisfied with the situation. One can always say, "Will the letter be delivered?"

I think we could add a misdemeanor section for failure to deliver communications and receive and mail communications.

I also would like to see the certifying doctors be required to be psychiatrists or board eligible, as much as that is possible. (P. 62.*)

* Hearing transcript, office of chairman.

Topic: *Detention Observation for 72 hours vs. 12 days.*

DR. STAINBROOK: Now, this leads me, then, to a suggestion about the 72-hour emergency commitment. I think that this is much too short a time for any kind of significant response to be made to the patient in terms of handling, particularly this acute situation I am talking about. It also forces the psychiatric facilities to quickly go to commitment simply out of their desperation about being able to do anything else that is alternatively desirable, and it seems to me, therefore, that Section 5050 in the Welfare Code, which talks about this emergency commitment, should be amended to 12 days so that the emergency hospital, such as we have here, has an opportunity to deal with this acute situation for at least 12 days, if necessary, out of which would come much more significant therapeutic handling of the acute psychotic experience, reducing the possibilities of chronic illness, and maybe—perhaps—also reducing significantly the amount of committed aspects. If one had a 12-day emergency commitment, orders of detention by the court after the petition would no longer be necessary in most cases because the medical examiners, by the court, could use the 12 days working in conjunction with the hospital staff to arrive at the decision for commitment.

And I think that this expansion here would achieve a great deal of real value both for the patient and the patient's prognosis and for us.

SENATOR GRUNSKY: You are contemplating treatment within that 12-day period?

DR. STAINBROOK: Oh, certainly. Right from the beginning.

SENATOR GRUNSKY: You will run into a very strong and perhaps not medically justified due process of law and civil rights question; that is the one thing a great number of citizens are fearful of . . . a period of even 72 hours they are fearful, and 12 days would alarm them to a great degree. I am talking now not about mental cases, but about people who are fearful that one day they may, through family, unfriendly family, or some other people, be put in for rather dramatic and traumatic treatment which could have an ulterior motivation.

That may sound like fictional or overdramatized situations, but people are fearful of that occurring.

DR. STAINBROOK: Yes, I know.

SENATOR GRUNSKY: Of course, we say it can't happen here in America, but it could happen. Not only unwanted family people, but it might even occur by getting rid of a few Senators or Assemblymen some day.

DR. STAINBROOK: Or even a few psychiatrists.

SENATOR GRUNSKY: Yes.

DR. STAINBROOK: Yes, I am quite aware of this kind of propaganda. However, you know the treatment I am talking about is nothing more traumatic than human kindness, human sensitivity, and the understanding of the psychotic distressed patient. That is all I am talking about.

If that kind of response from the hospital is dangerous, then, obviously, we have come to a very poor state.

You know, in this hospital we use no electroshock treatment, et cetera, on any of our patients.

SENATOR GRUNSKY: I am not talking about your hospital. The point is, whatever we do, we give the power. . . .

DR. STAINBROOK: Yes. But, on the other hand, you have many precedents for this, that many states have 10 to 15 days on the emergency evaluation commitment. So that is not asking for any kind of revolutionary change, as a matter of fact.

So, I am sure that this will be a counterfeeling. But I am only suggesting that if this amendment could be made, that there would be tremendous advantages in terms of the treatment of illness and I think also it would reduce the number of people who go on to the state hospital under commitment because, again and again, I come back to this: In spite of our best intent, the existence of commitment procedures perpetuates them.

CHAIRMAN PETERSEN: Doctor, in that regard, perhaps the detention hearings, as they have in juvenile court, might provide this person with due process of law. Do you think that that would upset the patient, to as soon as possible have a detention hearing before the court?

DR. STAINBROOK: No. I think that anything that is done in a nonthreatening way with the patient by people whom he knows is not a threatening kind of thing. This means, however, that in such a circumstance whoever is responsible for the detention hearing and the people in treatment relationship to the patient have to be very intimately associated. Otherwise, I can see that you could, first of all, split the patient's conception of who has responsibility for him, and maybe also really further confuse him about whether he is a patient or whether he is a prisoner, which is the next small aspect of this that I would like to discuss.

SENATOR GRUNSKY: Before you come to that, I still didn't get the practical solution to the problem that you state.

As I understood, disapproving of the way patients are handled now where they sort of go in for a processing in an atmosphere which is not really appropriate psychiatric hospitalization, but, as I have watched the proceedings here, you don't know what type of institution the patient should be referred to, so which of the many and varied institutions do you select?

And if you simply select the one by reason of its proximity to the court of commitment, it may not be the one best suited for the type of treatment.

So, I am just wondering if it is a practical solution. . . .

DR. STAINBROOK: Well, I can understand the difficulty about at some point making a differential diagnosis or disposition about the patient, for example, going directly to Norwalk as against coming here.

I think the important thing is that we could, for example, I am quite sure, make many such decisions in our admitting area about who would probably go directly to Norwalk, in which case, rather than spending seven days here to be transported directly there and to be under definitive treatment immediately.

SENATOR GRUNSKY: Then you would be making the decision rather than, in this instance, Judge Munnell, for example.

DR. STAINBROOK: Only a decision about what hospital to use, which is what psychiatrists and physicians make all the time.

Shall they be admitted to the surgical ward or the medical ward, or to the psychiatric hospital for commitment procedures ultimately, or to this hospital for acute treatment, and so on. It is difficult to make that in some cases. I can understand that we could not do it as black and white as one might expect, but all I am suggesting is and I used that as an illustration to indicate how I would like to see the first two weeks of the acute psychosis dealt with as a treatment response, without just putting the patient on ice, so to speak, and waiting until he gets somewhere else, you see, because this makes psychiatry behave as though we have no acute pneumonia, and obviously we do have an acute illness.

Some of our illnesses are not only acute, but they are fatal. Yet, the fragmented aspect of this 72-hour commitment which, then, makes it mandatory for the next hospital to pick up after seven days interferes with the receiving hospital's ability to really mount a consistent therapeutic attack on the first two weeks of the illness, when I think it counts.

SENATOR GRUNSKY: Am I understanding it correctly that, for example, the cases which were handled in Judge Munnell's court here this morning, that the time which they are being held, based upon his decisions, based upon the recommendations of the testifying psychiatrist, is not for treatment but simply, in effect, holding them in protective custody?

DR. STAINBROOK: It depends on what you mean by "treatment," you see. Certainly they have a certain kind of treatment, a certain kind of drug. But, basically, the basic treatment situation, whatever else you are doing, is the relationship between the physician and the patient.

This gets fragmented in a situation like this. The psychiatrist changes. Other people take over. . . .

SENATOR GRUNSKY: Maybe a holding facility isn't adequate to enable them to do that.

DR. STAINBROOK: I think the time is too short to do it also. I think that it can't be done in 72 hours because this means that this hospital has to make a decision in much less than 72 hours in order to process the petition, and so forth. (P. 25.)*

. . . I am not talking about all patients. I am talking now about acute psychotic situations where they are, by the way in which the 72-hour commitment procedures and the subsequent commitment and procedures to the state hospital are now engineered, we effectively behave as if we have no acute problem. And we are saying we are going to effectively treat this patient until he gets to the state hospital seven or eight days later, then in the state hospital, I may tell you, another two weeks may pass before they decide where he is going to go, and I think the first three or four weeks of the psychosis are tremendously important.

All I am saying is if we had more time to do an adequate handling of some of these acute cases, I think we would salvage more. (P. 33.)*

MISS AITKIN: . . . I believe, that a petition should be signed sooner than 72 hours. That only gets him before the doctors. And I think when you snatch a person—and I think we have to look at the worst when we write a law to protect the people—when you take him from where he is, I think that papers justifying it have to be signed, otherwise I think that it can be too easy, sometimes, for people to give the evidence to the police.

And bear in mind, these cases do not go to a law enforcement officer or to the hospital. They usually go right to the police.

I hope you will consider the due process factors there, and I would recommend consideration of a 24-hour requirement of filing rather than 72. The man is still before the hospital, and there can be a dismissal. (P. 46.)*

MELVIN MAPLE: Going back to the statements made by Dr. Stainbrook, and I think this is the crux of the matter, quite frankly, I would like to see a period of time, and I think Dr. Stainbrook began to talk about the problem but he missed the point, really, where you can involve the patient who is acutely ill, and these are the people that can be done harm by deferring treatment.

SENATOR GRUNSKY: That is where he was talking about the 12 days?

MR. MAPLE: That's right. Now, you enter into the problem area of civil rights, of course. If you are going to delay these people, detain them in a hospital—

SENATOR GRUNSKY: And with drastic treatment.

MR. MAPLE: —with drastic treatment, then you have got to have some sort of hearing right at the very beginning to protect their civil rights. And maybe you can do it on the order of a predetention hearing, like they have in the juvenile court system, where you have

* Hearing transcript, office of chairman.

an adjudication right away. But you don't keep them for 72 hours and then postpone the hearing for another four days, and by that time the person is already so frightened and so scared and so involved in the psychotic process that it is really too late to do very much for him in this hospital, and you have to, then, send him out to a state hospital.

But, if you could shorten that interval and get him involved in a doctor-patient relationship soon enough, before he has reached the process of disorganization where you can't bring him back, then you could keep him from becoming chronically ill. And you could really safeguard his civil rights in the proper sense, because he has a right to be treated, too, you see, if he is really psychotic.

So, to distinguish between these two kinds of people, that is the crux of the problem: between the person who is really ill and the person who is being railroaded.

In the case of the person who is really ill, he deserves to get treatment right now, just as though he had a contagious disease that could be cured if we would only treat him right now, but who will die if we deferred even 48 hours. If he has gaseous gangrene on his leg, we have no hesitation. We go in there. And if it is a boy whose parents have religious scruples, we go down and we get a court order and we do it. And we worry about these other things later, because we know that in the case of a leg that is infected, that he is going to lose it.

But, how about the child, or the adult, who is going to lose his mind, and who is going to suffer untold tortures, mental tortures, for years unless he is treated right now? He is just as emergent. It is just as important to him that he receive treatment. But we stop short because we say, "Well, we have got to really decide that he is ill."

SENATOR GRUNSKY: Well, Dr. Stainbrook made that point very clear, and you are agreeing with him, and I agree with both of you. But, how about protecting the civil rights where 12 days of drastic treatment can make a marginal or sane person appear insane if not drive him insane?

MR. MAPLE: All right. Now, I would suggest, and this is the whole point, if we have some sort of court procedure, if you must have a court procedure, you have no problem where you have a voluntary commitment, and I don't like the word "commitment" there. Let's say a voluntary admission to a hospital or treatment facility of some sort, preferably in the local level because that is where the best thing is done for the patient treatmentwise, therapywise, where the least disorganization of his life occurs, and taking him away from his family can be accomplished best at the local level.

If the entry to the hospital of a person who is unwilling to go, whose relationship with his own family doctor has not developed to the point where he is accepting his need, so that he is contesting it in some way and he says "No, you can't take me away to that hospital" or "You can't take me to that clinic, I won't go," and you have to involve some people to force him to go in some way, these people can be handled immediately.

Now we go down to the judge and get a detention order. But the detention orders are issued almost perfunctorily. Somebody goes down,

he makes some statements under oath, and little or no investigation is made and they detain him, then for 72 hours and four days after the 72 hours he is entitled to a hearing. It is already too late.

Why not, if he is contesting it, why not provide some mechanism where he can get a hearing right now, and he could have his family doctor involved, his people involved who are, after all, bringing him to the attention of the court, or the detention process? Why can't we have some sort of hearing like they have in the juvenile court for that purpose?

SENATOR GRUNSKY: Well, is that what you are suggesting?

MR. MAPLE: That is what I am suggesting.

SENATOR GRUNSKY: Follow pretty much the general procedure of juvenile court?

MR. MAPLE: Well, I don't like analogies. You should spell out specifically what the person has a right to in the Welfare and Institutions Code, if he is alleged to be mentally ill, and he is resistant of treatment if it is going to be an involuntary sort of procedure.

But you should be able to bring the hearing about relatively quickly instead of deferring it, you see. (P. 94.*)

JUDGE REPPY: This leaves me to comment on one point that was brought up by Mr. Maple, and that is the desirability of having a period of time where observation might occur before an actual commitment should be made by the court. We have worked out the system with the availability of Camarillo State Hospital in cooperation with Dr. Nash, the superintendent there, whereby if our medical examiners are in doubt concerning someone's mental illness, and they frequently are, they will suggest that we have a period of observation at Camarillo State Hospital, which will run anywhere from one week to sometimes two or even three weeks, so that a member of that staff can evaluate the person and then come to our hearings. And in recent time, say the last six or eight months, there always seems to have been one in that category and Dr. Borrell, who is currently the doctor who handles this type of thing for the state hospital, is presently at our hearings, and he testifies concerning these referred patients.

Of course, this all occurs before commitment, so there is the opportunity to have this period of time where the patient can be temporarily exposed to the atmosphere at Camarillo State Hospital, although he doesn't get active treatment of the drastic type that Senator Grunsky was concerned about, I am sure that there is some effort to provide the physician-patient relationship that the other doctor, Dr. Knox, or one of the other doctors, was suggesting.

So, I think we have a pretty fair background of any patient before any order for commitment is made, and it generally results in the patient receiving very prompt attention in order to get the patient to the hospital as soon as possible. (P. 122.)*

* Hearing transcript, office of chairman.

DR. RUSSELL: I think I know what Dr. Stainbrook is talking about, but it bothers me that he thought that we should extend the observation period under Section 5050.3 to 12 days. It seems to me rather long.

He is, of course, thinking of providing more intensive care immediately, and I think we all have the same objective in mind. I just have some doubt and some wonder about it. (P. 148.*)

MR. JESS D. CANNAN: Now, we use the 72-hour emergency detention a great deal. We like it. I wouldn't recommend it be made longer or enlarged, but I would ask you to retain it. I think it's a very useful tool.

Now, there is one matter I do have a feeling about, though, and that is that in all 72-hour emergency detentions I use our county physician—I don't use the peace officers—and I would recommend that you seriously consider permitting the 72-hour emergency detention upon the signature of any physician. I think this would be helpful in our county because our county physician isn't always available, and I would rather rely upon a physician than upon a peace officer. (P. 160.*)

JUDGE KARESH: Now, I don't agree with the doctor who said that we should have a period of commitment for 12 days. I think that is contrary to everything, as lawyers, that we have been taught to believe, it goes contrary to due process, and, while you may say it doesn't involve civil rights, it does involve civil rights, because a man's liberty is taken away.

Now, there is a school of thought, as I said, that would like to do away with the court, they would like a board of psychiatrists to make the determination, and I oppose that in every way that I can, not because I am a judge presiding over a psychiatric department, because my department will be changed, but I just believe in the court system, and any statement that the air of this court is an air that is attached to a criminal proceeding, I don't understand it, I can't fathom it. Is it being suggested that because a judge presides he gives an intimation of a criminal procedure? Well, under those circumstances you shouldn't have a judge in a conciliation court, because being a judge he is going to give an intimation of that type of authority, which is not helpful.

I say that the authoritarian figure of a judge, and I am not a psychiatrist but I believe it anyway, the authoritarian figure of a judge is helpful to the patient and helpful to the relatives. (P. 198.*)

JUDGE MUNNELL: I don't feel that we need to tamper much with the 72-hour commitment procedure, at least as it operates in Los Angeles County, and I was very interested in Judge Karesh's remarks that probably in San Francisco a different problem would exist, but here if the doctors are of the opinion at any time during the 72-hour period that the patient is not mentally ill, or not sufficiently mentally ill as to require commitment, that patient is released from the

* Hearing transcript, office of chairman.

hospital. Now, this is a very fine technique and a very fine system, but if the patient is thought to be in need of continued hospitalization or commitment, the patient has a choice of going voluntarily or to have a petition filed. Frequently the patients are confused, they are mixed up and they don't know exactly what they do want. One minute they are willing to go voluntarily and the next minute they want to go home. (P. 218.*)

We are not at the point yet where I think—as some of the speakers indicated, Dr. Stainbrook, for whom I have the highest regard—I don't think that we have come to the point yet where we can either extend the period of observation or diminish the importance or the role of the court in the commitment process. I would suspect that we are approaching that time, maybe that's 5 or 10 years hence. (P. 220.)*

* Hearing transcript, office of chairman.

Topic: Board Psychiatrists for Medical Examiners

CHAIRMAN PETERSEN: Dr. Knox, with regard to committing a person after he has been certified by two physicians, do you think the law should be changed to require that at least one of these committing physicians be a board psychiatrist?

DR. KNOX: I think that in certain areas in the state where board psychiatrists to date are not immediately available, this might bring about an undesirable situation. I think that we would have to presume that in certain areas where psychiatrists are not available, at least we have some general physicians who are especially qualified in this field, and they probably would have to be used until such time as we can get complete coverage of the state.

So, I felt that it would be better not to put a specific limitation on it. This would be an ideal situation, naturally.

CHAIRMAN PETERSEN: If they were available, that would be the ideal situation? (P. 15.)*

MISS AITKEN: On Section 5000, which appoints the medical examiners, I believe that they should be psychiatrists. I believe they should be members of the American Board of Neurologists and Psychiatrists, and at least eligible for members of the board as diplomates, either board members or board eligible, which I believe requires three years of training.

CHAIRMAN PETERSEN: What would you do, if I may ask a question, in a county such as Trinity County where you are fortunate if you even have a doctor living there?

MISS AITKEN: This is a problem. I checked with a psychiatrist I know and he thought that there should be a board eligible psychiatrist in every county. Now, if there isn't, possibly you could have something about that this is the desirable goal wherever possible.

I admit I don't know if there is such a person in every county.

I have another thought on Section 5000, and I am sure this is right, but I think there should be discretion in there for the medical examiners to have a social worker, one or more, assigned to them. And I know that some counties have taken advantage of the counselor in mental health and of the public guardian, but some haven't and I think, short of that, every county could use, within its discretion, at least one social worker who could check on statements of patients; who could, in a sense, be a probation officer afterwards where the court makes the arrangements which are not direct commitment, but other orders for the mental health of the person, such as a rest home, or something like that.

* Hearing transcript, office of chairman.

I would like that to be discretionary, however, because, thinking of Trinity, you might not need it. (P. 43.*)

JUDGE CHRISTIAN: . . . I believe a suggestion was made to the committee today, to reform in some way the medical examiner system.

That, from my own observation, is not an effective procedure in some counties. To my own observation, in some counties there has been the practice followed of appointing as the two medical examiners the two oldest members of the medical profession in that county. I am not sure how widespread this practice is, but I suggest that it may be a matter that is subject to legislative control.

One of the possibilities would be to require as an alternate to some basic psychiatric qualification the appointment actually of a member of the state hospital staff as one of the two examiners. In my own practice, when I was responsible for these cases in the county, I routinely did that. Of the two examiners, one I always appointed from the staff of the hospital where the commitments from my county were going, and the other would be a local practitioner, duly qualified under the statute, allowing for the appointment of a panel. (P. 77.*)

JUDGE REPPY: Our medical examiners are not psychiatrists. They never have been. They are M.D.'s. We have attempted to always utilize ones who can consistently give their time. Dr. Maguire and Dr. Hunter are now the two that chiefly do it, and it is very seldom that we use another doctor who has been certified.

I think they have become quite knowledgeable in the matter of psychiatric problems. (P. 122.*)

Also, that reminds me as to the smaller counties, even where there are psychiatrists in the area who might be on the board who would be medical examiners, I don't think they would want to be because I think they would feel that it would develop a conflict with their private practice where they actually have ethical problems, and so forth, involved.

So I think for the time being, at least, we are faced with having just regular M.D.'s acting as medical examiners.

CHAIRMAN PETERSEN: Judge, may I ask a question?

JUDGE REPPY: Yes, indeed.

CHAIRMAN PETERSEN: You do have qualified board psychiatrists at the state hospital, do you not?

JUDGE REPPY: Oh, yes. A great many of the doctors, I am sure, are board psychiatrists there. They do not, as a regular practice, come and examine our patients. It is only when we make these referrals when our medical examiners are undecided about a particular case. We don't want to impose on their graciousness too much. (P. 128.*)

* Hearing transcript, office of chairman.

MR. CANNAN: Now, our main problem, I think, in this area—and, as I say, I want to make one statement on this—basically I think we have a good procedure now for our county, and I think that the existing law provides us most of the tools we need to take care of the commitment procedures. The problem we have really isn't a statutory problem, it's a practical problem of not having psychiatrists.

We have four doctors in our county, all of which are medical examiners certified by the court. Now, they are very candid about this subject, they prefer not to act as medical examiners, and they do it only as a community service because there is no available psychiatrist and there is no one else to do this, and they brought up some problems, we were talking about a liability, for example, and they have asked me on occasion, "Now, I am not a psychiatrist and yet I am called upon to testify regarding this person. I personally don't feel that I am qualified as a psychiatrist and would I be subject to malpractice or would I be subject to criticism for becoming involved in something that, if I was placed under oath, I would have to state is a fact, I am not qualified in that area."

Well, I told them that I think they have the sanction of the law behind them and that in addition we have a practical problem that there is nobody else, so we do it. They are very helpful and they do an excellent job, they are all good friends of mine and we all work very closely together on this matter, and if we do have cases which are difficult and the doctors say quite frankly to me that they are not sure, then what we do is we have the court order the person be taken to Mendocino State Hospital where he is examined by two staff psychiatrists. He is then returned to our county, we get a written report, I take the written report to the two original doctors and they review the report and possibly even call somebody on the staff who made the examination and then make an independent determination.

Now, what I would like to suggest, and what I think would be very practical in my county, would be for me to be able to have the court certify a patient to Mendocino for examination and to have the hearing there. I can't see why we should transport him back to Trinity County for a hearing and then retransport him back to Mendocino for treatment, and then if he demands a jury trial bring him back to Trinity County and have the trial and then take him back to Mendocino again.

I think if we have the safeguard of requiring a certification of two medical examiners that the person is probably ill and have him certified to the hospital only for examination, not for treatment, and after examination then to hold the hearing there, because the two staff psychiatrists are there, I don't think that there would be too much inconvenience to the court in Mendocino County, and certainly it would be more convenient to the patient and in his best interests, it seems to me. (P. 167.*)

Now, another thing that I think this would assist in is this: We have cases that, because we don't have psychiatrists, we have commitments which are returned occasionally to our county, released by the hospital. Well, I think we would avoid that by this procedure, because they would be examined by the staff psychiatrists and they would be released then, there would be no hearing.

* Hearing transcript, office of chairman.

I would like to talk about the matter of board psychiatrists, the suggested requirement that there be at least one board psychiatrist at a hearing. If the Legislature should enact such a provision they would have to make provision also for counties of our character and size, and you would either have to permit us to use the state's facilities or else you would have to provide for a board psychiatrist to attend our hearings, because it's impossible for me to obtain one. I have tried to obtain psychiatrists from other counties and been unsuccessful, they simply don't want to come up, and also the cost involved would be prohibitive. (P. 170.*)

MR. STOUT: Mr. Cannan was talking about, a problem that the small counties have, and you will recall in my testimony a year ago I made a suggestion: We recognize that counties like Trinity, Humboldt and other counties of this type in the north, many counties like this in the south, are poor counties from a tax structure point of view, their governmental resources are not significantly large to be able to handle this sort of thing. Furthermore, their caseloads are not significantly high and as long as we hold to and require that we continue to utilize the county function as a sort of sacrosanct situation we are going to get into a high-cost problem. I think we can significantly lower costs, particularly in mental case treatment and diagnosis and court procedure if we set up joint county organizations. There is absolutely, it seems to me, no reason why Trinity would have to have a structure of medical examiners and all the panoply of a psychiatric court when it is possible to combine Trinity with other counties in the same geographical area and put them into a structure that would handle this as a unified proposition, each contributing its pro rata share of the costs.

Now, assumedly many of these counties, in the north and in the south, don't have access to psychiatrists or board eligible psychiatrists. There is no reason why a district, mental health district of the type I envision, cannot enter into a contract with the State Department of Mental Hygiene to have the services of recognized and board certified or board eligible psychiatrists provided for by the state on a contract basis to the district, the mental health district or what have you.

Now, if you will recall in the early history of jurisprudence we had circuit courts, because the counties were not developed in this very full-blown manner that we have here, and a judge from a population center would go out on a riding. This is true in Oregon today, where the judge goes out from Medford, as an example, and goes down to Klamath Falls and over on to the east side to hear cases as cases develop in those counties where there is a necessity to have a judge service a particular situation, and I see no real objection to this kind of a procedure undertaken in this area. (P. 182.*)

* Hearing transcript, office of chairman.

DR. BELLAMY: I too feel that in counties in which there are psychiatrists that the medical examiner should have the qualification of the psychiatrist or board eligible psychiatrist whenever possible. (P. 192.*)

I think that these appointments might very well be backed up by advisory committees or review committees who, if I understand the judiciary, will not have very much power, because the judge, of course, has the power to appoint in these instances, but I think that judges should learn how to live with citizens advisory and review committees just as superintendents of state hospitals have had to learn to live with them. They are troublesome, but in one sense they serve quite a useful function. (P. 143.)*

* Hearing transcript, office of chairman.

Topic: Record of Dispositions

MISS AITKEN: . . . when you go to the state hospital and you are well, they give a certificate. Something none of the rest of us have, a certificate saying we are mentally sound. Where the judge does release under the Sutherland vs. Palm theory, or on the advice of his medical examiners, or special knowledge he has that is reputable, I think he should issue a minute order and I think this should be in the code. After all, our police department does not make a police report of this, but it is known that the person has been taken in. I think if he had a minute order saying that good cause appearing, and following examination, or whatever, it is found this person is not mentally ill, or any wording which makes it clear that that person will have something which will justify him.

Now, I think we must also protect the petitioner there from false arrest. I haven't worked out perfect language. I would be presumptuous if I did. But I think this is an idea, some sort of a minute order which indicates that he was not—that he was released before even a hearing. (P. 52.)*

I think both in the situation where the judge decides a mistake may have been made under Sutherland against Palm, or, in this situation, after the doctors indicate that there should not be a commitment, or the judge does not order it, there should be a minute order, I think both those orders should recite circumstances which indicate good faith, if such existed. That is a protection to the petitioner and a protection to the hospital and a protection, in many cases, to law enforcement.

If good faith isn't there, obviously, the judge should not recite it.

But, I do feel that the person who is released either upon the petition getting him to the hospital, or upon the hearing, is entitled to something from the superior court which, in a sense, got him there in the first place. (P. 58.)*

I think again another situation here where I would like a minute order is the situation where the person recovers sufficiently to be released between asking for the jury and receiving the trial. We all try to honor the 10-day period in which the trial is supposed to be held, but sometimes the courts can't do it. Sometimes the person himself wants a little more time. Sometimes it is two or three weeks.

My county, generally, sends the demanding patient to the state hospital, simply because the local hospital is too crowded.

Down there, very often, there is a sufficient recovery so that our doctors can no longer say the person is mentally ill. When that happens, we take the word of the medical examiners and the superior court will generally set aside the commitment.

On occasion I have done it on motion and affidavits of the doctors. Sometimes we have done it on oral testimony of the doctors out at our psychiatric court.

*Hearing transcript, office of chairman.

But, there again you have a situation where somebody has a commitment, then he just is released.

I think there should be, again, an order signed by the superior court judge reciting all of the facts and giving reasonable cause in it, but indicating changed circumstances. (P. 61.*)

MR. MAPLE: Now, the present code, as amended, I think, in 1959, provides that the superintendent of a state hospital can so indicate on the release that the person never had been mentally ill, even though committed, you see. I have forgotten the number of the section. But I believe that is one of the kinds of discharges that is possible under 6729, Welfare and Institutions Code.

So that the Legislature has already recognized that there is that kind of problem. The trouble is, in the case of a person who has been adjudicated mentally ill by a court and then appeals to a jury, there is no similar provision to remove the possible stigma by some discharge or piece of paper.

And Miss Aitken, quite rightfully, pointed out, I think, that some sort of minute order showing the circumstances, that there was a hearing and that the court found the person not to be mentally ill, or that there was a jury trial and the jury found the person not to be mentally ill, might overcome some of the stigma of an earlier commitment. (P. 93.*)

JUDGE REPPY: As far as dismissals are concerned, or releases by the court, since we don't operate with this system of a commitment with no formal hearing, the only time when the court determines to release a person as not mentally ill would be at the hearing. And very often that appears to be the case where the medical examiners feel that the person is not mentally ill and they recommend that that be so found. We actually make a formal finding that the person is not mentally ill and is discharged, and a minute order is made, and if the family or the person wanted a copy of that, they could get it. We don't have an automatic process of giving it to them.

CHAIRMAN PETERSEN: But you actually make the order, though?

JUDGE REPPY: Oh, yes, I think the prior practice was that if the doctors reached the conclusion that the person was not mentally ill, the judge would simply say well, the petition is dismissed, and I don't feel that that was quite the accurate way to do it and the better thing for the court to say would be that the court finds the patient not mentally ill and the patient is discharged. There is a minute order to that effect. (P. 130.*)

LIEUTENANT PAUL PHELPS: There was one suggestion made here about the certificate of sanity, if you want to call it that just for brief purposes, and I won't quarrel too much with the idea provided it doesn't go to the extent that when, as in our cases, they are sent over here for observation and are released by the psychiatrist here within 24 hours, that they would be required to give them a cer-

* Hearing transcript, office of chairman.

tificate that said they were sane, because this would backfire on half of these 37 that were sent over and released and then came back within 24 hours, and it would certainly put us in a bad position when we picked this fellow up the second time and he had a certificate here saying, "I am sane." I don't think there is any intentions of carrying it to that ridiculous end, but it's worth thinking about. (P. 210.*)

Topic: Apprehension Warrants

MISS AITKEN: Now, about the emergency, I was very impressed with the papers prepared by the Legislative Counsel's office, but there is one thing I presume to disagree with a little. I don't think we should call this emergency commitment. It is only emergency apprehension, because once the person has been brought in he is released, unless the petition—a voluntary arrangement is made, or a petition is filed.

So I think it is important, at least I consider it so, to consider this as emergency apprehension. There is no separate proceeding of commitment in emergency cases and this is, I think, the place where due process deserves the highest consideration, though I do understand the medical problems. These are the cases of acute danger.

Here I would allow the officers to be in uniform if necessary. Here I would allow it to be a posse of police, if necessary. (P. 46.)*

* Hearing transcript, office of chairman.

Topic: Hearings by Court in Formal or Informal Setting

DR. STAINBROOK: Then the question about the formality of hearing. Of course, this is a matter of judicial decision. But I am firmly convinced that the more informal such transactions with the patient can be, the better it is for the patient. And in this hospital, these hearings, I think, are quite benign most of the time and non-stressing for the patient. But, in general, I wonder whether the law ought to specify no open court hearings for commitment procedures. (P. 35.)*

MISS AITKEN: Now, I think Section 5050.8 is one of the most poorly worded sections I have ever read in my life. This is the one on the hearing. It says if no formal hearing is required, the judge makes a determination. The judge still makes a hearing, and I have never met one yet who did not make a better hearing than the minimum required in the section.

But I think it should be spelled out that he will make a hearing which at least fulfills the minimum of due process; that the person will be there; that the petitioner shall be there. I know this is done, but I do think that section, one, isn't clear to me; it wasn't clear to me when I read it, so it may not be clear to others.

Two, I think it provides beautifully for a full hearing, which I understand is hardly ever requested, and it does not set out minimum standards, in my opinion, where the person himself doesn't request a hearing. Interestingly enough, the burden is put on him, and I don't think that is fair either. By "him" I mean the patient.

Personally, a fair bench is handling this, in my opinion, in every county. I don't think there should be what we in criminal law call an arraignment.

Now, I don't want to bring criminal law into this. I don't want to call a person a defendant. I want to call him a patient.

By arraignment I mean a judge telling him what his rights are the first time the judge is at the hospital after the man is brought in, and I am not talking about detentions; not the order to come in for examination.

It is easy to say you have given the patient a piece of paper, but I think that where a judge talks to him as they do in the criminal court, and sometimes the stakes are far higher here to the patient and his family than a criminal court, I think we owe it to the patient to have somebody explain in simple, clear English, "Sir, you have been brought in because someone thinks you are ill and need an examination. Now, you have a right to a lawyer, you have a right to a hearing, you can contact your relatives," and that sort of thing.

* Hearing transcript, office of chairman.

We used to do that informally in San Francisco. I think it is still done in some cases, but our judges here, and I can't speak because I am not there every day, and I think that should be very seriously considered. (P. 47.*)

SENATOR GRUNSKY: Mr. Maple, you used the phrase "terrors of the court proceeding." Are you referring there to the contested hearings?

MR. MAPLE: Not at all. Sometimes the patients who come through that door into this courtroom and sit in that chair, and their counsel sits here, are so frightened that they behave in a most unseemly manner in court, a most undignified manner. They will be so frightened that they will grovel on the floor and beg not to be given shock treatments. They will beg not to be taken through that door. They will have to be forced through that door sometimes. They will have to be sitting here in leather restraints because they are so frightened. Maybe because they have a misconception about what goes on here.

But, to them, it looks like a board of inquisition. They have never been here before, and they are scared.

If we make it less formal, they relax.

Now, I, as their counsellor, used to see them before they came to the court. And I would spend all afternoon here the previous day and explain the court procedure to them, draw little pictures of the courtroom, and explain where the judge would be sitting, and where the doctors would be sitting, and be friendly toward them, you see. And they would begin to relax and understand, and it would take some of that terror aspect out of it. And they could accept the fact that, well, the doctors apparently are saying that they are ill and they have certain rights that they understand.

That took a lot of this so-called terror, in which I am perhaps being overdramatic in saying that, but a lot of the patients genuinely do feel that, and I think this inhibits their ability to receive treatment. This is a very important thing, gentlemen.

CHAIRMAN PETERSEN: How would you change the court procedure? Or would you?

MR. MAPLE: The court procedure itself, I think, would be nice, and we used to do this in the case of the more severely disturbed patient, we used to go upstairs, and the court would see them in their bed, which is a little more familiar, at least, than down here. People do have, you know, even in criminal lawsuits, or civil lawsuits, in regular courtrooms, witnesses get up on a witness stand and they are scared to death. And we sometimes mistake their nervousness for a lack of candor on the witness stand.

Think of a person who is mentally disturbed, who has the same kinds of fears but who is unable to control them quite so well as the witness in the witness box. And it is very important to have this person here who understands it, and helps them, and makes them feel comfortable.

* Hearing transcript, office of chairman.

But, how much more important it would be for a doctor to involve himself with that person and stay with them throughout these procedures, interpret them to them, and maybe the procedures would be unnecessary if we had it that way, you see.

So, I think that is a point that I am sure Dr. Stainbrook would agree with philosophically. I don't know whether it would be administratively possible for him to implement that kind of thing, and maybe it would cost a lot of money. I don't know. But I think it would help a great deal in handling these cases that have to be committed ultimately. (P. 103.)*

JUDGE MUNNELL: Now, this brings me to a point with respect to one of the witnesses who testified about his activity as a public defender in this courtroom—quite dramatic but I think more theatrical than factual—that the patient grovels on the floor begging not to be sent to the hospital. I would like to state that in the two years I have been there, and Judge Miller happened to be sitting with me at the time of that testimony and he served here for two years, we have never seen one case of that type.

Now, the patients, of course, in most instances do want to go home, but coming into the courtroom, observing the flag, the court reporter, the judge in his robe, this has a very beneficial effect on the patient. The patient now is aware of what is proceeding, generally the patient has drawn himself together for this particular circumstance. He now knows that he is having his day in court, and this happens with a great frequency in this court: I will ask the patient, "Well, Mr. Jones, the doctors feel that you do require hospitalization, what do you think about it?"

"I am not the judge, you are the judge, this is your job, you tell me."

Now, I find this with a great deal of frequency and it is important, I think, to bring out that the patient wants to know that he is really not being railroaded, because he frequently doesn't know whether he is mentally ill and unable to express a choice. This is when the doctors say they lack insight. Now, those with sufficient insight go voluntarily. (P. 218.)*

JUDGE ALLEN MILLER: . . . at one time in this court the practice was to hold most of the hearings on wards upstairs out of the public view, and with a minimum of public observation. And the idea was that, well, a lot of the patients were too disturbed and it was traumatic for them to be in court.

I want to oppose that viewpoint very strongly. I think the change of the system to have everything in court down here except in a very, very rare case of a bed patient, has been good because I think the court and the judge can play a role, a therapeutic role, actually, in the process of the commitment just as Mr. Maple, as a public defender, can play a therapeutic role in the process. And my observation is that maybe you who observed the court operating here, a judge with empathy can, with that robe on, with the authority of his position, be

* Hearing transcript, office of chairman.

very helpful therapeutically in the process of commitment and preparing him, if he has to go to the hospital, for that eventuality.

So I feel that that should not be changed by law or otherwise to be permitted, to the extent that it has to be done in open court. (P. 135.*)

CHAIRMAN PETERSEN: Judge, am I correct in assuming that one of the reasons we used to have so many hearings upstairs, or in the hospital, was because we didn't have the tranquilizers and the patients were sometimes in straightjackets and it was impossible to bring them to court, or practically impossible?

JUDGE MILLER: Yes, I think that played a large part in it. Now, it happened that the practice started of having all hearings here in court, and not on the wards, before I started to preside in here. Judge Nix put it into effect. And there is no question about it, Senator, that this has helped considerably in this area.

But now I find with tranquilizers the acute stage is fairly well over. And, incidentally, I was perturbed at first about what these tranquilizers were doing: Was it depriving the court of the raw thing that he should see, and what effect does this tranquilizer have in eliciting truth or not eliciting truth, and the real facts? I had some degree of misgivings about this at first, and I now feel that it is perfectly in order.

I have had enough medical testimony to assure me that this doesn't impair any memory faculties of the patient, and I usually, when I am sitting here, ask, well, what has the dosage been, how much dosage, and I can learn a little bit now of what the condition of this patient is. Then I compare it with the condition when he came in; get it into the record. He was maniacal, and so forth, when he came in, the dosage has been so many of thorazine, and I know what it is and how long a period of time, and it helps to have that in the record, I think, for protection all the way around, too. (P. 139.*)

MR. CANNAN: Now, in our county, and this is by practice, the district attorney presents all commitments. We actually have a formal hearing in every case. I have discussed this matter with the superior court judge, the matter of not having a formal hearing, and he and I both feel that it's a questionable procedure and we don't, as lawyers, as people trained in law, feel they ought to have a formal procedure, so we hold one in every case, and we hold it in the security room. Now, although it is formal in structure, it is informal in nature, it is more or less just a discussion. The witnesses are placed under oath and it's an informal discussion between the court and—

CHAIRMAN PETERSEN: May I interrupt and ask what room did you say you held it in?

MR. CANNAN: The security room of the hospital.

* Hearing transcript, office of chairman.

CHAIRMAN PETERSEN: I see. You have it at the hospital, then, the hearing?

MR. CANNAN: Right. This is our mental ward, if you will. It's one room.

SENATOR GRUNSKY: When you use the security room, is that because it's the most convenient room or because you have problems requiring the safeguarding or other things?

MR. CANNAN: Well, we call it the security room because generally we have a special attendant watching the mentally ill person.

SENATOR GRUNSKY: That's what I'm getting at, it isn't just coincidental that that's the only available room, you use it to safeguard against any violence?

MR. CANNAN: That's right.

CHAIRMAN PETERSEN: Does your judge have a robe on?

MR. CANNAN: No. No, he wears a business suit and the clerk is present, the doctors are present and any other witnesses and myself. The patient is generally sitting or in bed.

CHAIRMAN PETERSEN: It doesn't, say, have the dignity of a courtroom?

MR. CANNAN: No. No, it doesn't.

SENATOR GRUNSKY: How about family?

MR. CANNAN: Family is there if they like, and, of course, they have to be notified, so they are notified. We have no spectators, other than the family, of course, or friends.

Now, our primary problem, and let me say this before I begin—

CHAIRMAN PETERSEN: May I go back to your formal hearing for a minute. At the hearing you have the two doctors?

MR. CANNAN: Yes.

CHAIRMAN PETERSEN: And your medical examiners, and I assume they are not psychiatrists?

MR. CANNAN: No, they are not.

CHAIRMAN PETERSEN: Do you call other witnesses?

MR. CANNAN: Yes, I do, because the doctors actually generally only see the patient one, two or three times, and they will see them for perhaps 15 minutes on one day, 15 minutes the next day, and, of course, they check the charts, and also to assist them I always prepare a statement or report of the information that we have on this patient.

CHAIRMAN PETERSEN: Other than the petition?

MR. CANNAN: Yes. And I bring the witnesses to assist the court, but also to assist the doctors, because many times they will make statements such as, "Well, I wish I had a little bit more information," or, "I wish I had more background," and it would necessitate a continuance if the information wasn't there.

CHAIRMAN PETERSEN: You generally call the person who signed the petition?

MR. CANNAN: Not necessarily. (P. 164.*)

JUDGE JOSEPH KARESH: Now, you will ask me what kind of system do we have in San Francisco. Well, it's the informal procedure, and now I have come to the conclusion after sitting here and listening, and the debating back and forth, I am convinced that we should have the formal procedure, and I think Mr. Kennedy said that he had been in and seen our system of hearing and it may mean, Honorable Senators, that we might have to ask you for an additional judge, or at least a judge to devote a half a day to it, but I think it will be worth it. The idea that after the hearings are over I have to rush away when the relatives want to talk to me and I don't have the time is very, very disturbing to me. (P. 201.*)

* Hearing Transcript, Office of Chairman.

APPENDIX A

LEGISLATIVE COUNSEL'S DIGEST

Mental commitments.

Adds, amends, and repeals various secs., W. & I.C.

Revises and rearranges statutory provisions relating to the commitment and admission of persons to state hospitals and other facilities for mentally incompetent persons; makes no substantive change in law.

SENATE BILL

No. 36

Introduced by Senators Petersen, Grunsky, Farr, and Rattigan

January 6, 1965

REFERRED TO COMMITTEE ON JUDICIARY

An act to amend Sections 160 and 703 of, to amend and renumber Sections 5699, 5700, 5700.5, 5701, 5701.3, 5701.4, 5702, 5703, 5704, 5705, 5706, 5707, 5708, 5709, 5751, 5752, 5753, 5754, 6000, 6001, 6002, 6002.5, 6003.1, 6003.2, 6004, and 6005 of, to repeal Sections 5750, 5750.1, 5750.2, 5750.3, 5750.5, and 6003 of, to repeal Part 1 (commencing with Section 5000) of Division 6 of, to repeal Article 3.4 (commencing with Section 6605) of Chapter 1 of Part 4 of Division 6 of, to repeal Article 3.5 (commencing with Section 6610) of Chapter 1 of Part 4 of Division 6 of, to add Part 1 (commencing with Section 5000) to Division 6 of, and to add Part 1.5 (commencing with Section 5500) to Division 6 of, the Welfare and Institutions Code, relating to mentally irresponsible persons, and declaring the urgency thereof, to take effect immediately.

The people of the State of California do enact as follows:

1 SECTION 1. Section 160 of the Welfare and Institutions
2 Code is amended to read:

3 160. The Department of Mental Hygiene shall investigate
4 and examine all nonresident persons who are confined in, ad-
5 mitted, or committed to any state hospital or state home for the
6 mentally deficient, and shall cause such persons, when found to
7 be nonresidents as defined in this chapter, to be promptly and
8 humanely returned under proper supervision to the states in
9 which they have legal residence. The department may defer
10 such action by reason of a patient's medical condition.

11 For the purpose of facilitating the prompt and humane
12 return of such persons the Department of Mental Hygiene may

1 enter into reciprocal agreements with the proper boards, com-
2 missions, or officers of other states or political subdivision
3 thereof for the mutual exchange or return of such persons con-
4 fined in, admitted, or committed to any state hospital in one
5 state whose legal residence is in the other, and it may in such
6 reciprocal agreements vary the period of residence as defined
7 in this chapter to meet the requirements or laws of the other
8 states.

9 The department may give written permission for the return
10 of any resident of this state confined in a public institution in
11 another state, corresponding to any state hospital for the
12 mentally ill or to any state home for the mentally deficient of
13 this state *in the manner and under the conditions set forth in*
14 *Section 6075 of this code.* ~~When a resident is returned to this~~
15 ~~State pursuant to this chapter, he may be delivered to any in-~~
16 ~~stitution of the department as designated by the Director of~~
17 ~~Mental Hygiene. Such person shall be admitted by the super-~~
18 ~~intendent of the institution for care and treatment for a period~~
19 ~~not exceeding seven days during which time the person shall~~
20 ~~be released at the earliest possible time or committed in accord-~~
21 ~~ance with law.~~

22 SEC. 2. Section 703 of said code is amended to read :

23 703. If the court, after finding that the minor is a person
24 described by Sections 600, 601, or 602, is in doubt concerning
25 the state of mental health or the mental condition of the
26 person, the court may continue the hearing and commit the
27 person to the Department of Mental Hygiene *in the manner*
28 *and under the conditions set forth in Section 5725 of this*
29 *code.* for placement in a state hospital or state home for the
30 mentally deficient for an indeterminate period of not more
31 than 90 days; for observation of the mental health or the men-
32 tal condition of the person and recommendations concerning
33 his future care, supervision, and treatment. If the Department
34 of Mental Hygiene has designated a particular state institu-
35 tion to receive minors so committed for observation, all com-
36 mitments shall be made to the department for placement in
37 the institution so designated. The superintendent of the institu-
38 tion to which the minor is so committed shall receive him,
39 unless the institution is already full or the funds available
40 for its support are exhausted, or if, in the opinion of the
41 superintendent, the person is not a suitable subject for admis-
42 sion. Before such person is conveyed to the institution, it shall
43 be ascertained from the superintendent thereof if the person
44 may be accepted as herein set forth.

45 For each minor person so committed for observation, the
46 county from which he is committed shall pay the state at the
47 rate of forty dollars (\$40) per month for the time the person
48 so committed remains in the state institution for observation.
49 Such expense shall be considered expense of support and main-
50 tenance within the meaning of Article 16; (commencing with
51 Section 900) and the county shall be entitled to reimburse-
52 ment therefor from the earnings, property, or estate of the

minor, or from his parents, guardian, or other person liable for his support and maintenance, in accordance with the provisions of that article. Each county auditor shall include in his state settlement report rendered to the Controller in the months of January and June and the amount due under the provisions of this section, and the county treasurer, at the time of settlement with the state in such months, shall pay to the State Treasurer, upon the order of the Controller, the amounts found to be due by reason of such commitments.

The medical superintendent or other person in charge of the state hospital or state home for the mentally deficient in which a minor person is placed for observation pursuant to this section shall, as soon as possible and within 90 days, examine the person to determine the state of his mental health or his mental condition, and submit to the juvenile court a report on the state of his mental health or mental condition which shall include a diagnosis of the nature of his mental illness or disability, if any; and recommendations concerning his future care, supervision, and treatment.

If the medical superintendent or other person in charge of the state institution in which the minor has been placed for observation reports to the court that the minor is not affected with any mental illness, disorder, or other mental disability for which he might be committed to the Department of Mental Hygiene for placement in any state institution under Division 6 (commencing with Section 5000) of this code, such superintendent or other person in charge of the state institution shall return the minor to the juvenile court within seven days after the date of the report and the court shall proceed with the case in accordance with the provisions of this chapter.

When the juvenile court directs the filing in any other court of a petition for the commitment of a minor to the Department of Mental Hygiene for placement in any state institution, the juvenile court shall transmit to the court in which the petition is filed a copy of the report of the medical superintendent or other person in charge of the state institution in which the minor was placed for observation. The court in which the petition for commitment is filed may accept the report of the medical superintendent or other person in charge of the state institution in lieu of the appointment, certificate, and testimony of medical examiners or other expert witnesses appointed by the court, if the laws applicable to such commitment proceedings provide for the appointment by court of medical examiners or other expert witnesses or may consider the report as evidence in addition to the certificates and testimony of medical examiners or other expert witnesses.

The jurisdiction of the juvenile court over the minor shall be suspended during such time as the minor is subject to the jurisdiction of the court in which the petition for commitment is filed or under commitment ordered by that court.

SEC. 3. Part 1 (commencing with Section 5000) of Division 6 of said code is repealed.

1 SEC. 4. Part 1 (commencing with Section 5000) is added to
2 Division 6 of said code, to read:

3
4 PART 1. GENERAL PROVISIONS

5
6 CHAPTER 1. MEDICAL EXAMINERS

7
8 5000. The superior judge of each county may grant cer-
9 tificates in accordance with the form prescribed by the State
10 Department of Mental Hygiene, showing that the persons
11 named therein are reputable physicians and graduates of in-
12 corporated medical colleges, and have been in active practice
13 of their profession at least five years. When certified copies
14 of such certificates have been filed with the department, it shall
15 issue to such persons certificates or commissions, and the per-
16 sons therein named shall be known as "medical examiners."
17 There shall at all times be at least two such medical examiners
18 in each county. The certificate may be revoked by the depart-
19 ment for incompetency or neglect, and shall not be again
20 granted without the consent of the department.

21 5001. The department shall keep in its office a record show-
22 ing the name, residence, and certificate of each duly qualified
23 medical examiner. Immediately upon the receipt of each duly
24 certified copy of a medical examiner's certificate, it shall file
25 the same, and advise him of its receipt and filing.

26
27 CHAPTER 2. COUNSELORS IN MENTAL HEALTH

28
29 5025. The office of counselor in mental health may be cre-
30 ated in any county in this state by the board of supervisors
31 thereof. The counselors in mental health to serve under the
32 provisions of this chapter shall be nominated and appointed
33 by the judge of the superior court by written order entered
34 in the minutes of the court.

35 5026. In each county where the office of counselor in mental
36 health has been created under the provisions of this chapter,
37 the judge of the superior court may appoint two such coun-
38 selors. In counties of the first class having a charter the num-
39 bers, compensation and benefits of officers and employees shall
40 be as provided in Section 69894.1 of the Government Code.

41 5027. The term of office of the counselors in mental health
42 shall be during the pleasure of the court, and they may at any
43 time be removed by the court in its discretion. Such counselors
44 shall devote their entire time and attention to the duties of
45 their office.

46 5028. In any county in which counselors in mental health
47 have been appointed, the clerk of the court shall, before any
48 mentally disordered or mentally ill person is brought before
49 the court under the provisions of Article 2 (commencing with
50 Section 5550) of Chapter 1 of Part 1.5 of Division 6, notify one
51 of the counselors in mental health of the court.

5029. The counselor in mental health shall inquire into the antecedents, character, family history, environment, and superinducing cause of the mental disorder or mental illness of every alleged mentally disordered or mentally ill person brought before the court and shall make his report to the judge thereof, in writing or verbally, in open court or in chambers, as directed by the judge of the court. Every counselor, assistant counselor, and deputy counselor in mental health shall have the powers of a peace officer. At any time, at his discretion, such counselor may bring any mentally disordered or mentally ill person committed to his care before the court for such further or other action as the court deems proper.

5030. Wherever in this code or in any other statute reference is made to psychopathic probation officers, such reference shall be deemed to mean and refer to the counselors in mental health provided for in this chapter; and wherever in this code or in any other statute reference is made to probation of the mentally ill or the mentally disordered or other incompetent persons, such reference shall mean and refer to supervision of such persons.

CHAPTER 3. CONSTRUCTION OF THIS CODE AND OTHER LAWS

5050. Nothing in this part or Chapter 1 (commencing with Section 5500) of Part 1.5 of Division 6 shall be held to change or interfere with the provisions of the Penal Code and other laws relating to mentally ill persons charged with crime or to the criminally insane.

This part and Chapter 1 (commencing with Section 5500) of Part 1.5 of Division 6 shall be liberally construed so that, as far as possible and consistent with the rights of mentally ill persons and others, such mentally ill persons shall be treated, not as criminals, but as sick persons.

Any person complained against in any petition or proceeding started by virtue of the provisions of Chapter 1 (commencing with Section 5500) of Part 1.5 of Division 6 shall not forfeit or suffer any legal disability by reason of the provisions of this part or that chapter or of any proceedings pursuant to this part or that chapter during the time of the pendency of the petition or while said person is under the jurisdiction of the court.

5051. No person who is being treated by prayer in the practice of the religion of any well recognized church, sect, denomination or organization, shall be ordered detained or committed under the provisions of Chapter 1 (commencing with Section 5500) of Part 1.5 of Division 6 unless the court shall determine that he is or would likely become dangerous to himself or to the person or property of others, or unless, being an adult, he shall consent to such detention or commitment, or, being a minor, his parent or guardian having custody of his person shall consent thereto.

CHAPTER 4. PUBLIC GUARDIAN

5075. In any county the board of supervisors may by ordinance create the office of public guardian and such subordinate positions as may be necessary and fix compensation therefor. Such board of supervisors may appoint a public guardian to fill such office and provide for the appointment to the subordinate positions.

5076. Such board of supervisors may provide by ordinance that the public administrator shall be ex officio public guardian.

5077. The board of supervisors may by ordinance terminate the office of public guardian.

5078. Whenever the public administrator has been designated ex officio public guardian the board of supervisors may by ordinance terminate such designation and appoint another public guardian and all authority shall vest in the successor.

5079. Whenever the board of supervisors has not designated the public administrator as ex officio public guardian but has appointed another to the office of public guardian it may terminate such appointment and by ordinance may designate that the public administrator shall be ex officio public guardian and all authority shall vest in the successor.

5080. The authority of the public guardian or ex officio public guardian shall cease upon the termination of his office as such public guardian or ex officio public guardian and his authority shall vest in his successor.

5081. In proper cases any such public guardian may apply to a court of competent jurisdiction for appointment as guardian of the person and estate or person or estate of any person in the county who is a patient under the provisions hereof or who is a recipient of aid under any of the provisions of this code where it appears that such person requires a guardian.

5082. When the public guardian makes application under Section 5081 of this code for guardianship of the person and estate or person or estate of any person who is under the jurisdiction of the State Department of Mental Hygiene such application may be granted, if sufficient under said Section 5081, with the written consent of said department.

5083. The public guardian shall file an official bond in such amount as may be fixed, from time to time, by the board of supervisors, which bond shall inure to the joint benefit of the several guardianship estates and the county, and such public guardian shall not be required to file bonds in individual guardianship estates.

5084. All funds coming into the custody of the public guardian shall be deposited in the county treasury and disbursed by proper warrant, or shall be deposited in one or more banks or invested in one or more insured savings and loan associations authorized to do business within the county and withdrawn only upon an order of the public guardian, countersigned by a judge of the superior court. In counties having a

1 population of over 270,000, such withdrawals need not be
2 countersigned by a judge of the superior court.

3 5085. If necessary the public guardian in his discretion may
4 employ private attorneys where the cost thereof can be de-
5 frayed out of guardianship estate funds.

6 5086. Where the market value of the real and personal
7 property of the guardianship estate appears to be less than
8 fifty dollars (\$50) it shall not be necessary to have such prop-
9 erty appraised and no appraisal shall be required in any
10 guardianship estate handled by the public guardian where the
11 estate consists of money only or money and other property of
12 a market value of fifty dollars (\$50) or less.

13 5087. The public guardian upon the death of his ward may
14 pay in full or in part from any assets of such ward which are
15 under his control the unpaid expenses of his ward's burial and
16 last illness. After the payment of such expenses the public
17 guardian may transfer any remaining assets in accordance with
18 and subject to the provisions of Section 630 of the Probate
19 Code. The value of the deceased ward's property for the pur-
20 pose of ascertaining the right to transfer under said section
21 shall be determined after deduction of said expenses paid.

22 5088. Upon the death of the ward or other termination of
23 the guardianship, the public guardian shall have a claim against
24 the ward's estate for his reasonable expenses incurred in the
25 execution of the guardianship, and such compensation for his
26 services and those of his attorney as the court in which his
27 accounts are settled deems just and reasonable.

28 5089. No fees shall be charged or received by the county
29 clerk for the filing of any such guardianship petition nor for
30 any official service performed by him in the course of the
31 guardianship proceedings.

32 5090. Necessary expenses of the public guardian in the
33 conduct of any guardianship estate may be advanced by the
34 county and if so ordered by the board of supervisors such ex-
35 penses shall be a county charge, but the county shall be re-
36 imbursed therefor out of any funds or property of the estate
37 by the public guardian.

38 5091. Insofar as the provisions of this chapter may be in
39 conflict with the provisions of Section 5225 of this code, the
40 latter section is hereby repealed.

41 42 CHAPTER 5. RESEARCH CONCERNING SEXUAL DEVIATION 43 AND SEX CRIMES 44

45 5125. The Department of Mental Hygiene, acting through
46 the Superintendent of the Langley Porter Clinic, shall plan,
47 conduct, and cause to be conducted scientific research into the
48 causes and cures of sexual deviation, including deviations con-
49 ductive to sex crimes against children, and the causes and cures
50 of homosexuality, and into methods of identifying potential
51 sex offenders.

1 5126. Upon the recommendation of the Superintendent of
2 the Langley Porter Clinic, the Department of Mental Hygiene
3 may enter into contracts with the Regents of the University
4 of California for the conduct, by either for the other, of all or
5 any portion of the research provided for in this chapter.

6 5127. Each state agency shall cooperate with the Superin-
7 tendent of the Langley Porter Clinic, or with the University
8 of California, as the case may be, to the fullest extent that its
9 facilities will permit without interfering with the carrying out
10 of its primary purposes and functions.

11 5128. The Department of Mental Hygiene with the ap-
12 proval of the Director of Finance may accept gifts or grants
13 from any source for the accomplishment of the objects and
14 purposes of this chapter. The provisions of Section 16302 of
15 the Government Code do not apply to such gifts or grants and
16 the money so received shall be expanded to carry out the pur-
17 poses of this chapter, subject to any limitation contained in
18 such gift or grant.

19

20

CHAPTER 6. FIREARMS

21

22 5150. No person who is a mental patient in any hospital
23 or institution or on leave of absence from any hospital or in-
24 stitution shall own or have in his possession or under his cus-
25 tody or control any firearms whatsoever.

26 5151. Any person who shall knowingly supply, sell, give,
27 or allow possession or control of a firearm to any person who
28 is a mental patient in any hospital or institution or on leave
29 of absence from any hospital or institution, shall be punishable
30 by imprisonment in a county jail not exceeding one year or by
31 fine not exceeding five hundred dollars (\$500), or by both fine
32 and imprisonment.

33

34 5152. Whenever a person who has been detained or appre-
35 hended for examination of his mental condition, or who is a
36 mental patient in any hospital or institution or who is on
37 leave of absence from such hospital or institution, is found to
38 own, have in his possession or under his control, any firearm
39 whatsoever, said firearm shall be confiscated by any law en-
40 forcement agency or peace officer, who shall retain custody of
41 said firearm until the release without commitment of the per-
42 son or the restoration to capacity of the person, or until the
43 appointment of a guardian for the person, or shall make such
44 other disposition of the firearm as ordered by the court.

45

46

CHAPTER 7. COMMITMENTS OF MENTALLY ILL PERSONS CHARGED WITH CRIME

47

48 5175. Commitments of mentally ill persons charged with
49 the commission of public offenses are provided for in Section
50 1026 of the Penal Code and in Chapter 6 (commencing with
51 Section 1367), Title 10, Part 2 of the Penal Code.

CHAPTER 8. EXPENSE OF DENTENTION OR PROCEEDINGS
CONCERNING COMMITMENTS

Article 1. Mentally Ill Persons

5200. The cost necessarily incurred in determining the mental illness calling for care or commitment under this code of an indigent person and securing his admission into a state hospital, and the expense of providing proper clothing for him in accordance with the rules and regulations adopted by the Department of Mental Hygiene, is a charge upon the county from which he is committed. Such costs include the fees of the medical examiners allowed by the judge before whom the testimony of the medical examiners is given.

5201. If the person alleged to be mentally ill or sought to be committed is not an indigent person, the costs of the proceedings are a charge upon his estate, or shall be paid by persons legally liable for his maintenance, unless the judge orders otherwise. The fees allowed the medical examiners, court appointed or otherwise, shall be included as charges against the estate of the person alleged to be mentally ill or against persons responsible for his maintenance only if such person is adjudged to be mentally ill.

5202. If the alleged mentally ill person is adjudged not to be mentally ill, the judge may, in his discretion, charge the costs of the proceedings to the person who signed the petition in respect to him, and judgment may be entered against him for the amount thereof and enforced by execution.

Article 2. Mentally Disordered Persons

5225. The reasonable cost of maintenance of a person committed under the provisions of Section 5568, in a sum to be fixed by the court at the time of the commitment, shall be defrayed out of the estate of the patient so committed or shall be a charge upon his relatives liable for his maintenance.

If, however, the patient is found to be an indigent resident of the county, in accordance with the definition of such residence prescribed in Article 2 (commencing with Section 2550) of Chapter 2 of Division 4 of the Welfare and Institutions Code, and without funds or relatives responsible for his maintenance able to pay such charge, then the expense of his maintenance shall be a charge upon the county in which the court has jurisdiction and shall be paid out of the county treasury upon a written order of the judge of the superior court of the county, directing the county auditor to draw his warrant upon the county treasurer specifying the amount of such expense.

All funds expended by the county for the maintenance of such patient, or such maintenance in a sum or rate per day or per month fixed by the board of supervisors where such patient is cared for in a county institution, shall be a charge against such patient or against his husband, wife, father,

1 mother, or children, in the order named and the county shall
2 be entitled to reimbursement therefor. If such patient has
3 property or acquires any the county shall have a claim against
4 him or his estate, if deceased, to the amount of expense in-
5 curred and said claim shall be enforced, if necessary, by action
6 against him or his estate, if deceased, upon order of the board
7 of supervisors of the county incurring such expense. If the
8 patient has such husband, wife, father, mother, or children
9 liable to him for his maintenance, the county shall have a
10 claim against such relatives, or any of them, in the order
11 named, to the amount of expense incurred, and said claim
12 shall be enforced, if necessary, by action against such rela-
13 tives, or any of them, upon order of the board of supervisors
14 of the county incurring such expense.

15 If the indigent patient is a nonresident of the county or
16 if a relative or a friend of the patient is found outside the
17 county, of whose ability and willingness to assume the respon-
18 sibility and the expense of the proper care of the patient the
19 court is satisfied, the court may release the patient to the
20 custody of such relative or friend and the cost and expense of
21 transporting the patient to the home of the relative or friend
22 or to the county or state where the patient has a legal residence
23 shall be a charge upon the county in which the court has
24 jurisdiction and shall be paid in the manner prescribed in
25 this section for the payment of other expenses for the care of
26 such patients.

27 If an indigent patient is confined in a medical institution
28 as the result of a diagnosis of tuberculosis, and it is suspected
29 that the patient is or has become mentally ill, he shall be re-
30 turned for commitment proceedings to that county from which
31 he entered the medical institution.

32 Where the county has incurred expense upon order of court
33 or is likely to incur such expense for the maintenance of such
34 patient and he has estate for which no guardian has been ap-
35 pointed out of which the county is or may be entitled to re-
36 imbursement, the district attorney or county counsel, as the
37 case may be, shall apply to the proper court for the appoint-
38 ment of a guardian of the estate of such patient. It shall be
39 competent for a county employee to act as such guardian.
40 Where such county employee is appointed and acts as such
41 guardian he shall act without guardianship fees being charged
42 or received from said estate, and the board of supervisors may
43 order that expenses necessary in the conduct of the guardian-
44 ship and the necessary premiums on the bonds of the guardian
45 be advanced by the county, and if so ordered by said board
46 of supervisors such expenses shall be a charge against the
47 county, but the county shall be reimbursed therefor out of any
48 funds or property of the estate of such patient by said
49 guardian.

50 Any such guardian may sell or encumber the property of
51 the estate of such patient under the provisions of Section 1530
52 of the Probate Code and from the proceeds of any such sale

1 or encumbrance or from any other funds of the estate which
2 may come into his possession, he shall pay to the county the
3 expense incurred by it for the maintenance of such patient
4 and shall pay, when available, the expense subsequently in-
5 curred by the county for any such maintenance.

6 No fee shall be charged or received by the county clerk for
7 the filing of any such guardianship petition nor for any offi-
8 cial service performed by him in the course of the guardian-
9 ship proceedings.

10 Article 3. Mentally Deficient Persons

11 5250. The court shall inquire into the financial condition
12 of the parent, guardian, or other person charged with the sup-
13 port of any person committed as a mentally deficient person,
14 and if it finds him able to do so, in whole or in part, it shall
15 make a further order, requiring him to pay, to the extent the
16 court considers him able to pay, the expenses of the proceed-
17 ings in connection with the investigation, detention, and com-
18 mitment of the person committed, and the expenses of his de-
19 livery to the institution, and to pay to the county, at stated
20 periods, such sums as the court deems proper, during such
21 time as the person remains in the institution or on leave of
22 absence to a licensed hospital, facility or home for the care of
23 such persons. This order may be enforced by such further
24 orders as the court deems necessary, and may be varied, al-
25 tered, or revoked in its discretion.

26 The court shall designate some county officer to keep a rec-
27 ord of such payments ordered to be made, to receive, receipt
28 for, and record such payments made, to pay over such pay-
29 ments to the county treasurer, to see that the persons ordered
30 to make such payments comply with such orders, and to report
31 to the court any failure on the part of such persons to make
32 such payments.

33 5251. In any case in which the probation officer is charged
34 with the duty of collecting amounts payable to the county
35 under this article, upon the verified application of the proba-
36 tion officer the board of supervisors may make an order dis-
37 charging the probation officer from further accountability for
38 the collection of any such amount in any case as to which the
39 board determines that the amount is too small to justify the
40 cost of collection; that the statute of limitations has run; or
41 that the collection of such amount is improbable for any rea-
42 son. Such order is authorization for the probation officer to
43 close his books in regard to such item, but such discharge of
44 accountability of the probation officer does not constitute a
45 release of any person from liability for payment of any such
46 amount which is due and owing to the county. The board may
47 request a written opinion from the district attorney or county
48 counsel as to whether any particular amount is too small to
49 justify the cost of collection, whether the statute of limita-
50
51

1 tions has run, or whether collection of any particular item is
2 improbable.

3 5252. The cost necessarily incurred in determining whether
4 a person is a fit subject for admission to a home for the men-
5 tally deficient and securing his admission thereto, is a charge
6 upon the county whence he is committed. Such costs include
7 the fees of witnesses, medical examiners, psychiatrists and
8 psychologists allowed by the judge ordering the examination.
9 If the person sought to be committed is not an indigent per-
10 son, the costs of the proceedings are a charge upon his estate,
11 or shall be paid by persons legally liable for his maintenance,
12 unless otherwise ordered by the judge.

13 5253. Each county auditor shall include in his state settle-
14 ment report rendered to the Controller in the months of
15 January and June the amount due the state by reason of
16 commitments to the home for the mentally deficient; and the
17 county treasurer, at the time of the settlement with the state
18 in such months, shall pay to the State Treasurer, upon the
19 order of the Controller, the amounts found to be due to the
20 state by reason of such commitments. In the event of the
21 failure of the county auditor or county treasurer to do or
22 perform any of the things required in this section, the State
23 Department of Mental Hygiene may require the county treas-
24 urer by writ of mandate to pay to the State Treasurer upon
25 an order of the Controller all amounts found to be due to
26 the state at the time of the next settlement of the county
27 treasurer with the state, and it shall be no defense to such
28 a proceeding that the county auditor has failed to include
29 such sums in his report rendered to the Controller, and it
30 shall not be necessary for the department to allege or prove
31 any fact with relation to the condition of the funds of the
32 county. The department may recover sums due from counties
33 as in this article provided, by the presentation of claims
34 against the board of supervisors, and recovery may be had
35 on all sums due the state for a period of three years next
36 prior to the presentation of any such claims.

37 38 Article 4. Narcotic Drug Addicts 39

40 5275. At the hearing involving a person alleged to be a
41 narcotic drug addict the court shall inquire into the financial
42 condition of the person committed or, if the person is a minor,
43 of the parent, guardian, or other person charged with his
44 support. If the court finds such person or persons able to do
45 so in whole or in part, a further order shall be made requir-
46 ing him or them to pay, to the extent the judge considers
47 just, the expenses of the proceedings in connection with his
48 commitment, and to pay to the county of which he is a bona
49 fide resident, such sums as the court deems proper, during
50 such time as the person committed remains in the hospital or
51 on parole to a licensed home for the care of such person. The
52 court shall make a further order requiring such person or

persons to pay to the Department of Mental Hygiene the expense of delivery of the patient to the state hospital for placement in which he was committed, which shall be paid to and collected by the department and credited to the appropriation for transportation of patients.

The county auditor shall keep a record of such payments ordered to be made to the county, and shall receive, receipt for, and record such payments made, pay over such payments to the county treasurer, see that the persons ordered to make such payments comply with such orders, and report to the court any failure on the part of such persons to make such payments.

5276. The county from which each person is committed under Section 5630 shall pay the state the cost of care of such person, for the time the person committed remains an inmate of the institution or on leave of absence to a licensed home for the care of such person, at the monthly rate therefor as fixed and determined by the Director of Mental Hygiene from time to time, but in no case shall it exceed the rate of forty dollars (\$40) per month.

5277. Each county auditor shall include in his state settlement report rendered to the Controller in the months of January and June, the amount due under the provisions of Section 5276, and the county treasurer, at the time of the settlement with the state in such months, shall pay to the State Treasurer, upon the order of the Controller, the amounts so due.

Article 5. Inebriates, and Habit-forming Drug Addicts

5300. The reasonable cost of maintenance of a person committed or confined under the provisions of Section 5656 or 5677 to a branch of the county jail, in a sum to be fixed by the court at the time of the commitment or confinement, shall be a charge against the person committed or confined, or if such person be indigent against his relatives liable for his maintenance.

Prior to the making of the order of confinement provided for in Section 5656 or 5677, the court shall inquire into the financial condition of the person confined and of the relatives liable for his maintenance. If the court finds such person or persons able to do so in whole or in part, a further order shall be made requiring him or them to pay to the county making the confinement to the extent the judge considers just, the expense of the proceedings in connection with his confinement, and to pay to the county maintaining the branch of the county jail, such sums as the court deems proper during such time as the person confined remains in said branch of the county jail.

The county auditor shall keep a record of such payments ordered to be made to the county, and shall receive, receipt for, and record such payments made, pay over such payments to the county treasurer, see that the persons ordered to make

1 such payments comply with such orders, and report to the court
2 any failure on the part of such persons to make such payments.
3 5301. At the hearing involving a person alleged to be an
4 inebriate, or addicted to the use of habit-forming drugs the
5 court shall inquire into the financial condition of the person
6 committed and of the relatives liable for his maintenance. If
7 the court finds such person or persons able to do so in whole
8 or in part, a further order shall be made requiring him or them
9 to pay to the county making the commitment, to the extent the
10 judge considers just, the expense of the proceedings in connec-
11 tion with his commitment, and to pay to the county maintain-
12 ing the institution if the commitment be to an industrial farm
13 or road camp or branch of the county jail, such sums as the
14 court deems proper during such time as the person committed
15 remains in the industrial farm or road camp or branch of the
16 county jail.

17 The county auditor shall keep a record of such payments
18 ordered to be made to the county, and shall receive, receipt
19 for and record such payments made, pay over such payments
20 to the county treasurer, see that the persons ordered to make
21 such payments comply with such orders, and report to the
22 court any failure on the part of such persons to make such
23 payments.

24 Responsibility for cost of maintenance of persons confined
25 in Department of Corrections regional jail camps shall be
26 governed by the laws relating to such institutions and regula-
27 tions of the Department of Corrections issued thereunder.

28 29 Article 6. Mentally Abnormal Sex Offenders

30
31 5325. The charges for the care, treatment or services ren-
32 dered to persons committed as mentally abnormal sex offenders
33 shall be in accordance with the provisions of Article 1 (com-
34 mencing with Section 5200) of this chapter.

35 36 CHAPTER 9. EXECUTION OF COMMITMENT ORDERS

37 38 Article 1. Mentally Ill Persons

39
40 5400. The mentally ill person, together with certified copies
41 of the petition, order for detention, report of the apprehending
42 officer concerning the safeguarding and disposition of the men-
43 tally ill person's property, the order for hearing and examina-
44 tion, order of commitment of the judge, and the certificate of
45 the physicians, shall be delivered to the sheriff of the county
46 and by him shall be delivered to the officer in charge of the
47 designated state hospital or licensed hospital or sanitarium,
48 to which the mentally ill person is committed. No female men-
49 tally ill person shall be taken to any state or other hospital
50 without the attendance of some other female or of some relative
51 of the mentally ill person.

1 The sheriff in transporting mentally ill persons delivered to
2 him may use a vehicle that is not visibly marked as an official
3 county vehicle and may wear apparel other than his uniform.

4 5401. All moneys found on the person of a mentally ill
5 person at the time of apprehension shall be certified to by the
6 judge, and sent with the mentally ill person to the hospital,
7 there to be delivered to the medical superintendent and by him
8 deposited in a fund to be known as the patients' personal
9 deposit fund, and to be disposed of in the same manner as
10 other funds deposited in the patients' personal deposit fund.

11 5402. The superintendent or person in charge of any state
12 hospital may refuse to receive any person upon any order, if
13 the papers presented do not comply with the provisions of
14 Section 5400.

15 Article 2. Mentally Deficient Persons

16
17
18 5425. The court shall attach to the order of commitment
19 of a mentally deficient person its findings and conclusions,
20 together with all the social and other data it has bearing upon
21 the case, and the same shall be delivered to the home with
22 the order.

23 5426. The sheriff or probation officer, whichever may be
24 designated by the court, may execute the order of commitment
25 with respect to any mentally deficient person.

26 In any case in which the probation officer executes the order
27 of commitment, he shall be compensated for transporting such
28 person to a state hospital in the amount and manner in which
29 a sheriff is compensated for similar services under Section 7059.

30 Article 3. Narcotic Drug Addicts

31
32
33 5450. The sheriff of any county wherein an order is made
34 by any court committing any person as a narcotic drug addict
35 or returning such person to the court, or any other person
36 designated by the court, shall execute the writ of commitment
37 or order of return, and receive as compensation therefor such
38 fees as are now or may hereafter be provided by law for the
39 transportation of prisoners to the state prison, which shall be
40 payable in the same manner. Subject to the approval of the
41 judge in all cases the parent, guardian, or other person charged
42 with the support of a minor person committed may, and if he
43 is able or the estate of such person is sufficient, shall execute
44 the writ of commitment without expense to the county or
45 state, after being duly sworn therefor. Where the writ is so
46 executed, the person executing it shall for that purpose have
47 the powers of a sheriff, and the execution by him shall have
48 the same effect as if performed by the sheriff. No female person
49 committed shall be taken to the hospital by any male person
50 not her husband, father, brother, or son, without the attend-
51 ance of some woman of good character and mature age, chosen
52 for the purpose by the court, which woman shall, if the court

1 sees fit, be paid therefor such reasonable remuneration as the
2 court allows.

3
4 Article 4. Inebriates, and Habit-forming Drug Addicts

5
6 5475. Any person committed as an inebriate, or habit-
7 forming drug addict shall be delivered to the state hospital
8 for the mentally ill to which he has been committed in com-
9 pliance with the provisions of Article 1 (commencing with
10 Section 5400) of this chapter, providing for the commitment
11 and delivery of a mentally ill person.

12
13 Article 5. Mentally Abnormal Sex Offenders

14
15 5480. The sheriff of any county wherein an order is made
16 by the court committing a person as a mentally abnormal sex
17 offender for an indeterminate period to a state hospital or
18 returning such person to the court, or any other peace officer
19 designated by the court, shall execute the writ of commitment
20 or order of return, and receive as compensation therefor such
21 fees as are now or may hereafter be provided by law for the
22 transportation of prisoners to the state prison, which shall be
23 payable in the same manner. No female person committed shall
24 be taken to or from any state or other hospital without the
25 attendance of some woman of good character and mature age
26 or of a relative of the person.

27 5481. Certified copies of the affidavit, certification from the
28 trial court, warrant of apprehension, order for hearing and
29 examination, report of the probation officer and of the court-
30 appointed psychiatrists, and the order of placement for obser-
31 vation or order of commitment for an indeterminate period, as
32 the case may be, shall be delivered to the person transporting
33 the person to the state hospital, and shall be delivered by that
34 person to the officer in charge of the hospital.

35
36 CHAPTER 10. DUTIES OF PEACE OFFICERS

37
38 5490. All peace officers and other persons having similar
39 duties relating to the mentally ill poor shall see that all poor
40 and indigent mentally ill persons within their respective mu-
41 nicipalities are speedily granted the relief conferred by this
42 part and Chapter 1 (commencing with Section 5500) of Part
43 1.5 of this division. When so ordered by a superior judge, they
44 shall see that such mentally ill persons are, without unneces-
45 sary delay, transferred to the proper state hospitals provided
46 for their care and treatment. Before sending a person to any
47 such hospital, they shall see that he is in a state of bodily
48 cleanliness and comfortably clothed with new clothes. The de-
49 partment may by order direct that any person whom it deems
50 unsuitable therefor shall not be employed as an attendant for
51 any mentally ill person. After the patient has been delivered

to the proper officers of the hospital, the care and custody of the county or municipality from which he is sent cease.

SEC. 5. Part 1.5 (commencing with Section 5500) is added to Division 6 of said code, to read:

PART 1.5. COMMITMENTS AND ADMISSIONS

CHAPTER 1. JUDICIAL COMMITMENTS

Article 1. Mentally Disordered Sex Offenders

5500. As used in this article, "mentally disordered sex offender" means any person who by reason of mental defect, disease, or disorder, is predisposed to the commission of sexual offenses to such a degree that he is dangerous to the health and safety of others. Wherever the term "sexual psychopath" is used in any code, such term shall be construed to refer to and mean a "mentally disordered sex offender."

5500.5. This article shall not apply to any person sentenced to death nor to any person ineligible for probation under the Penal Code. This article shall not apply to any person convicted of an offense the punishment for which may be death until after a sentence other than death has been imposed, at which time this article shall apply to such person and he may be certified to the superior court as provided in Section 5501.

5501. (a) When a person is convicted of any criminal offense, whether or not a sex offense, the trial judge, on his own motion, or on motion of the prosecuting attorney, or on application by affidavit by or on behalf of the defendant, if it appears to the satisfaction of the court that there is probable cause for believing such person is a mentally disordered sex offender within the meaning of this article, may adjourn the proceeding or suspend the sentence, as the case may be, and may certify the person for hearing and examination by the superior court of the county to determine whether the person is a mentally disordered sex offender within the meaning of this article. Conviction upon a charge of violation of Section 290 of the Penal Code by failure to register as required thereby is conviction of a criminal offense within the meaning of this subdivision.

(b) When a person is convicted of a sex offense involving a child under 14 years of age and it is a misdemeanor, and the person has been previously convicted of a sex offense in this or any other state, the court shall adjourn the proceeding or suspend the sentence, as the case may be, and shall certify the person for hearing and examination by the superior court of the county to determine whether the person is a mentally disordered sex offender within the meaning of this article.

(c) When a person is convicted of a sex offense involving a child under 14 years of age and it is a felony, the court shall adjourn the proceeding or suspend the sentence, as the case

1 may be, and shall certify the person for hearing and examina-
2 tion by the superior court of the county to determine whether
3 the person is a mentally disordered sex offender within the
4 meaning of this article.

5 When an affidavit is filed under (a) it shall be substantially
6 in the form specified for the affidavit of mental illness in
7 Section 5553 of this code except that the title and body of the
8 affidavit shall refer to such person as "an alleged mentally
9 disordered sex offender" and shall state fully the facts upon
10 which the allegation that the person is a mentally disordered
11 sex offender is based. If the person is then before the court
12 or is in custody, the court may order that the person be de-
13 tained in a place of safety until the issue and service of a
14 warrant of apprehension as provided by this article.

15 When the court certifies the person for hearing and exami-
16 nation by the superior court of the county to determine
17 whether the person is a mentally disordered sex offender, the
18 court shall transmit to the superior court its certification to
19 that effect, accompanied by a statement of the court's reasons
20 for finding that there is probable cause for believing such
21 person is a mentally disordered sex offender within the mean-
22 ing of this article in cases certified under (a), or a statement
23 of the facts making such certification mandatory under (b)
24 or (c).

25 The judge or justice presiding in such court, whenever it is
26 deemed necessary or advisable, may issue and deliver to some
27 peace officer for service, a warrant directing that the person
28 be apprehended and taken before a judge of the superior court
29 for a hearing and examination to determine whether the per-
30 son is a mentally disordered sex offender. The officer shall
31 thereupon apprehend and detain the person until a hearing
32 and examination can be had. At the time of the apprehension
33 a copy of the affidavit if one was filed, the certification, ac-
34 companied by the court's statement, and the warrant shall be
35 personally delivered to the person and copies thereof shall
36 also be delivered to the superior court to which the person was
37 certified and to the district attorney of the county.

38 The warrant of apprehension shall be substantially in the
39 form provided by Section 5555 of this code for the apprehen-
40 sion of a person alleged to be mentally ill.

41 5501.5. Whenever a person is certified to the superior court
42 for hearing and examination under Section 5501 the certifica-
43 tion may be made in substantially the following form:

44
45 (Title of court and cause)

46
47 Order Adjourning Proceedings and Certifying Alleged Men-
48 tally Disordered Sex Offender to the Superior Court

49
50 Upon the court's own motion, the motion of the prosecuting
51 attorney, application by or on behalf of the defendant (strike
52 the conditions not applicable), it appearing to the satisfaction

of the court that the above-named defendant has been convicted of a criminal offense, to wit, violation of _____ of the State of California, and that there is probable cause for believing that said defendant is a mentally disordered sex offender within the meaning of Article 1 of Chapter 1 of Part 1.5 of Division 6 of the Welfare and Institutions Code of the State of California, as amended, in that—he is a person who by reason of mental defect, disease, or disorder, is predisposed to the commission of sexual offenses to such a degree that he is dangerous to the health and safety of others.

Now, therefore, the above proceeding is adjourned and it is hereby ordered that the above-named defendant is certified to the Superior Court of the State of California, in and for the County of _____ for hearing and examination by said court to determine whether said defendant is a mentally disordered sex offender within the meaning of said Article 1 of Chapter 1 of Part 1.5 of Division 6 of the Welfare and Institutions Code of the State of California, as amended. The above-named defendant shall be taken before said court, as provided in Section 5503 of said code, on the _____ day of _____, 19____, at the hour of _____.* A copy of this certification of said defendant to said superior court shall be delivered to said defendant.

Dated this _____ day of _____, 19____.

Judge

* This sentence may be included if such date and hour have been set by the superior court upon the request of the certifying judge.

5503. The person certified or alleged to be a mentally disordered sex offender shall be taken before a judge of the superior court of the county. The judge shall then inform him that he is certified or alleged to be a mentally disordered sex offender, and inform him of his rights to make a reply and to produce witnesses in relation thereto. The judge shall by order fix such time and place for the hearing and examination in open court as will give reasonable opportunity for the filing of the probation officer's report as provided in Section 5503.5, and for the production and examination of witnesses. If, however, the person is too ill to appear in court, or if appearance in court would be detrimental to the mental or physical health of the person, the judge may hold the hearing at the bedside of the person. The order shall be entered at length in the minute book of the court or shall be signed by the judge and filed, and a certified copy thereof served on the person. The judge shall order that notice of the apprehension of the person and of the hearing of mentally disordered sex offender be served on the district attorney of the county and on such relatives of the person known to be residing in the county as the judge deems necessary or proper.

1 If the alleged mentally disordered sex offender has no attorney the judge may appoint an attorney to represent him, or if
2 a request is made for an attorney by the alleged mentally disordered sex offender, the judge shall appoint an attorney to
3 represent him, and, in a county where there is no public defender, fix the compensation to be paid by the county for such
4 services if the court determines that the person is not financially able to employ counsel.

5 5503.5. The court shall refer the matter to the probation officer, along with a copy of the certification accompanied by
6 the certifying court's statement, and the name and address of each psychiatrist appointed pursuant to Section 5504, to investigate and report to the court within a specified time, upon
7 the circumstances surrounding the crime and the prior record and history of the person. The report shall include the criminal
8 record, if any, of the person, obtained from the State Bureau of Criminal Identification and Investigation. The probation officer shall furnish to the psychiatrists pertinent information concerning the circumstances surrounding the crime
9 and the prior record and history of the person.

10 5504. The judge shall appoint not less than two nor more than three psychiatrists, each of whom shall be a holder of a
11 valid and unrevoked physician's and surgeon's certificate who has directed his professional practice primarily to the diagnosis and treatment of mental and nervous disorders for a
12 period of not less than five years, and at least one of whom shall be from the medical staff of a state hospital or county
13 psychopathic hospital, to make a personal examination of the alleged mentally disordered sex offender, directed toward ascertaining whether the person is a mentally disordered sex
14 offender.

15 5505. Each psychiatrist so appointed shall file with the court a separate written report of the result of his examination, together with his conclusions and recommendations and
16 his opinion as to whether or not the person would benefit by care and treatment in a state hospital. At the hearing each psychiatrist shall hear the testimony of all witnesses, and shall
17 testify as to the result of his examination, and to any other pertinent facts within his knowledge.

18 5506. Any psychiatrist so appointed by the court may be called by either party to the proceeding or by the court itself and when so called shall be subject to all legal objections as to competency and bias and as to qualification as an expert.
19 When called by the court, or by either party to the proceeding, the court may examine the psychiatrist, as deemed necessary, but either party shall have the same right to object to the questions asked by the court and the evidence adduced as though the psychiatrist were a witness for the adverse party.
20 When the psychiatrist is called and examined by the court the parties may cross-examine him in the order directed by the court. When called by either party to the proceeding the

adverse party may examine him the same as in the case of any other witness called by such party.

5507. The psychiatrists so appointed by the court shall be allowed such fees as in the discretion of the court seem just and reasonable, with regard to the services rendered by the psychiatrists, but in no event shall such fees exceed the sum of forty dollars (\$40) per day in addition to actual traveling expenses. The fees allowed shall be paid by the county in which the hearing is held.

5508. The provisions of this article relating to psychiatrists appointed by the court shall not be deemed or construed to prevent any party to a proceeding under this article from producing any other expert evidence as to the mental condition of the alleged mentally disordered sex offender.

5509. The judge shall also cause to be examined as a witness any other person whom he believes to have knowledge of the mental condition of the alleged mentally disordered sex offender, or of the financial condition of the alleged mentally disordered sex offender and of any person liable for his support.

5510. The judge may, for any hearing, order the clerk of the court to issue subpoenas and compel the attendance of witnesses from any place within the boundaries of this state; but no person is obliged to attend as a witness in such a hearing out of the county where he resides or is served unless the judge, upon affidavit to the effect that affiant believes that the evidence of the witness is material and his attendance at the hearing necessary, indorses on the subpoena an order for the attendance of the witness.

All witnesses, other than psychiatrists appointed by the court, attending a hearing upon a subpoena issued under this section shall be entitled to the same fees and expenses as in criminal cases, to be paid upon the same conditions and in like manner.

5511. The alleged mentally disordered sex offender shall be present at the hearing, and if he has no attorney, the judge may appoint an attorney to represent him, or the judge may order the county public defender to represent him at the hearing, if he determines that the person is not financially able to employ counsel.

5511.7. If, upon the hearing, the person is found by the superior court not to be a mentally disordered sex offender, the superior court shall return the person to the court in which the case originated for such disposition as that court may deem necessary and proper.

If the court finds the person is a mentally disordered sex offender, but would not benefit by care and treatment in a state hospital, the court may return the person to the court in which the case originated for such disposition as that court may deem necessary and proper.

1 5512. If, after examination and hearing, it appears there is
2 sufficient cause to believe that the person is a mentally dis-
3 ordered sex offender within the meaning of this article,
4 the judge may make and sign an order that the person
5 be placed temporarily in a suitable psychiatric facility
6 maintained by a county or in a state hospital of the Depart-
7 ment of Mental Hygiene designated by the court for observa-
8 tion and diagnosis for a period not to exceed 90 days, with the
9 further provision in said order that the superintendent of the
10 hospital or person in charge of the county facility shall report
11 to the court the diagnosis and recommendations concerning
12 such person within the 90-day period. The court shall attach
13 to the order for observation its findings and copies of the cer-
14 tification and statement from the other court, any affidavits
15 filed, the written reports of the court-appointed psychiatrists,
16 and the report of the probation officer, together with such so-
17 cial and other data that it has available bearing upon the case,
18 and the same shall be delivered to the institution with such
19 order.

20 The superintendent of the hospital or person in charge of
21 the county facility shall within 90 days cause the person to be
22 examined and forward to the committing court his opinion as
23 to whether or not the person is a mentally disordered sex of-
24 fender, whether or not he is a danger to the health and safety
25 of others, and whether or not he will benefit by care and treat-
26 ment in a state hospital, including therein a report, diagnosis
27 and recommendation concerning the person's future care, su-
28 pervision and treatment.

29 If the superintendent of the hospital or person in charge of
30 the county facility reports to the court that the person is not
31 a mentally disordered sex offender, the person shall be re-
32 turned to the court for further disposition of his case. The
33 court shall then cause the person to be returned to the court
34 in which the criminal charge was tried to await further action
35 with reference to such criminal charge.

36 If the superintendent of the hospital or person in charge of
37 the county facility reports to the committing court that the
38 person is a mentally disordered sex offender but will not
39 benefit by care or treatment in a state hospital and is a
40 danger to the health and safety of others, the court shall
41 then cause the person to be returned to the court in which
42 the criminal charge was tried to await further action with
43 reference to such criminal charge. Such court shall resume the
44 proceedings and shall impose sentence or make such other suit-
45 able disposition of the case as the court deems necessary. If,
46 however, such court is satisfied that the person is a mentally
47 disordered sex offender but would not benefit by care or treat-
48 ment in a state hospital and is a danger to the health and
49 safety of others, it may recertify the person to the superior
50 court of the county. If the superior court, after hearing, finds
51 that the person is a mentally disordered sex offender but would
52 not benefit by care or treatment in a state hospital and is a

1 danger to the health and safety of others, it may make an order
2 committing the person for an indefinite period to the Depart-
3 ment of Mental Hygiene for placement in a state institution or
4 institutional unit for the care and treatment of mentally dis-
5 ordered sex offenders designated by the court and provided
6 pursuant to Section 5518. At such hearing or hearings, the
7 person shall be entitled to present witnesses in his own behalf,
8 to be represented by counsel and to cross-examine any witnesses
9 who testify against him. The person shall remain in such insti-
10 tution or institutional unit until he is no longer a danger to the
11 health and safety of others. Thereupon, the proceedings set
12 forth in Section 5517 shall be followed with respect to the
13 certifying of an opinion to the committing court and the re-
14 lease of the person thereby.

15 If the superintendent of the hospital or person in charge of
16 the county facility reports to the court that the person is a
17 mentally disordered sex offender and that the person could
18 benefit by treatment in a state hospital, the court in its discre-
19 tion has the alternative to return the person to the criminal
20 court for further disposition or may make an order committing
21 the person to the department for placement in a state hospital
22 for an indeterminate period and a copy of such commitment
23 shall be personally served upon said person within five days
24 after the making of such order and such person may within 10
25 days demand a hearing in court and upon such demand said
26 court shall order the return of said person to said court and
27 fix a time and place for a hearing. Upon such hearing the
28 court may accept the report of the superintendent of the hos-
29 pital or person in charge of the county facility, if verified, in
30 lieu of the examination by and testimony of court-appointed
31 psychiatrists, or may consider the report as additional evi-
32 dence. Upon such further hearing the court may make an
33 order committing the person to the department for placement
34 in a state hospital designated by the court for an indetermi-
35 nate period, or may make other suitable disposition of the
36 case.

37 No person shall be committed for an indeterminate period
38 as a mentally disordered sex offender unless an observation
39 placement has been made and reported, diagnosed and recom-
40 mended upon as provided by this section.

41 5512.3. If the court orders the commitment of the person
42 to the department for placement in a state hospital for an
43 indeterminate period, the court may, in the order of commit-
44 ment, require the superintendent of the state hospital to make
45 periodic reports to the court concerning the person's progress
46 towards recovery.

47 5512.5. Persons committed as mentally disordered sex of-
48 fenders to the department for placement in a state hospital
49 following an observation placement under this article shall
50 have the same rights to jury trial as provided in this code for
51 mentally ill persons.

1 5513. The sheriff of any county wherein an order is made
2 by the court committing a person for an indeterminate period
3 to a state hospital or returning such person to the court, or
4 any other peace officer designated by the court, shall execute
5 the writ of commitment or order of return, and receive as com-
6 pensation therefor such fees as are now or may hereafter be
7 provided by law for the transportation of prisoners to
8 the state prison, which shall be payable in the same manner. No
9 female person committed pursuant to this article shall be taken
10 to or from any state or other hospital without the attendance of
11 some woman of good character and mature age or of a relative
12 of the person.

13 The expense of transporting a person to a county facility or
14 state hospital temporarily for an observation placement under
15 this article and returning such person to the court is a charge
16 upon the county in which the court is situated.

17 5514. Certified copies of the affidavit, certification from the
18 trial court, warrant of apprehension, order for hearing and
19 examination, report of the probation officer and of the court-
20 appointed psychiatrists, and the order of placement for ob-
21 servation or order of commitment for an indeterminate period,
22 as the case may be, shall be delivered to the person transporting
23 the mentally disordered sex offender to the county facility or
24 state hospital, and shall be delivered by that person to the
25 officer in charge of the facility or hospital.

26 5516. The provisions of Article 5 of Chapter 1 of Part 4
27 of Division 6 relative to the property and support of mentally
28 ill persons and inebriates in state hospitals, the liability for
29 such support, and the powers and duties of the Department
30 of Mental Hygiene and all officers and employees thereof in
31 connection therewith shall apply to persons committed to
32 state hospitals pursuant to this article the same as if such
33 persons were expressly referred to in said Article 5.

34 5517. Whenever a person who is committed for an indeter-
35 minate period to the department for placement in a state
36 hospital as a mentally disordered sex offender (a) has been
37 treated to such an extent that in the opinion of the superin-
38 tendent the person will not benefit by further care and treat-
39 ment in the hospital and is not a danger to the health and
40 safety of others, or (b) has not recovered, and in the opinion
41 of the superintendent the person is still a danger to the health
42 and safety of others, the superintendent of the hospital shall
43 file with the committing court a certification of his opinion
44 under (a) or (b), as the case may be, including therein a
45 report, diagnosis and recommendation concerning the person's
46 future care, supervision or treatment. If the opinion so certi-
47 fied is under (a) the committing court shall forthwith order
48 the return of the person to said committing court and shall
49 thereafter cause the person to be returned to the court in
50 which the criminal charge was tried to await further action
51 with reference to such criminal charge.

1 Such court shall resume the proceedings, upon the return
2 of the person to the court, and after considering all the evi-
3 dence before it may place the person on probation for a period
4 of not less than five years if the criminal charge permits such
5 probation and the person is otherwise eligible for probation.
6 As a condition of such probation the person shall totally
7 abstain from the use of alcoholic liquor or beverages. In any
8 case, where the person is sentenced on a criminal charge, the
9 time the person spent under indeterminate commitment as a
10 mentally disordered sex offender shall be credited in fixing his
11 term of sentence.

12 5518. If the opinion so certified is under subdivision (b)
13 of Section 5517, the committing court shall forthwith order
14 the return of the person to said committing court and shall
15 thereafter cause the person to be returned to the court in which
16 the criminal charge was tried to await further action with
17 reference to such criminal charge.

18 Such court shall resume the proceedings and after consider-
19 ing all the evidence before it shall impose sentence or make
20 such other disposition of the case as the court may deem neces-
21 sary and proper; provided, that said court, if satisfied that the
22 person has not recovered from his mental disorder and is still
23 a danger to the health and safety of others, may recertify the
24 person to the superior court of the county. If said court after
25 hearing makes a finding that the person is still a mentally dis-
26 ordered sex offender and is still a danger to the health and
27 safety of others, it may make an order recommitting the person
28 for an indeterminate period to the Department of Mental Hy-
29 giene for placement in a state institution or institutional unit
30 for the care and treatment of such mentally disordered sex
31 offenders designated by the court. At such hearing or hearings,
32 the person shall be entitled to present witnesses in his own
33 behalf, to be represented by counsel and to cross-examine any
34 witnesses who testify against him.

35 The Director of Mental Hygiene, with the approval of the
36 Director of Corrections and the Director of Finance, may pro-
37 vide on the grounds of a state institution or institutions under
38 the jurisdiction of the Department of Corrections or the De-
39 partment of Mental Hygiene one or more institutional units to
40 be used for the custodial care and treatment of mentally dis-
41 ordered sex offenders. Each such unit shall be administered in
42 the manner provided by law for the government of the institu-
43 tion in which such unit is established.

44 The court shall cause the person so recommitted to be de-
45 livered to the state institution or the institutional unit so
46 designated. The person shall remain therein or in any other
47 such institution or institutional unit to which he may be trans-
48 ferred by the Director of Mental Hygiene until the person
49 is no longer a danger to the health and safety of others. There-
50 upon the proceedings set forth in Section 5517 shall be fol-
51 lowed with respect to the certifying of an opinion to the com-
52 mitting court and the release of the person thereby.

1 5519. After a person has been committed for an indetermi-
2 nate period to the department for placement in a state hospital
3 as a mentally disordered sex offender and has been confined
4 for a period of not less than six months from the date of the
5 order of commitment, the committing court may upon its own
6 motion or on motion by or on behalf of the person committed,
7 require the superintendent of the state hospital to which the
8 person was committed to forward to the committing court,
9 within 30 days, his opinion under (a) or (b) of Section 5517,
10 including therein a report, diagnosis and recommendation
11 concerning the person's future care, supervision, or treatment.
12 After receipt of the report, the committing court may order
13 the return of the person to the court for a hearing as to
14 whether the person is still a mentally disordered sex offender
15 within the meaning of this article.

16 The hearing shall be conducted substantially in accordance
17 with Sections 5504 to 5511, inclusive. If, after the hearing,
18 the judge finds that the person has not recovered from his
19 mental disorder and is still a danger to the health and safety
20 of others, he shall order the person returned to the Depart-
21 ment of Mental Hygiene under the prior order of commitment
22 for an indeterminate period, or, if the opinion of the superin-
23 tendent of the state hospital was under (b) of Section 5517,
24 he may make and sign an order recommitting the person for
25 an indeterminate period to the Department of Mental Hygiene
26 for placement in a state institution or institutional unit for
27 the care and treatment of such mentally disordered sex of-
28 fenders designated by the court and provided pursuant to
29 Section 5518. A subsequent hearing may not be held under
30 this section until the person has been confined for an addi-
31 tional period of six months from the date of his return to
32 the department. If the court finds that the person has recov-
33 ered from his mental disorder to such an extent that he is no
34 longer a danger to the health and safety of others, or that he
35 will not benefit by further care and treatment in the hospital
36 and is not a danger to the health and safety of others, the
37 committing court shall thereafter cause the person to be re-
38 turned to the court in which the criminal charge was tried to
39 await further action with reference to such criminal charge.

40 5520. The superintendent of a state hospital or person in
41 charge of a county psychiatric facility may extend to any
42 person confined therein pursuant to this article such of the
43 privileges granted to other patients of the hospital or facility
44 as are not incompatible with his detention or unreasonably
45 conducive to his escape from custody.

46 5521. The district attorney of the county may appear on
47 behalf of the people at any of the hearings held pursuant
48 to this article.

49 5522. Every person ordered placed in a county facility or
50 state hospital temporarily for observation pursuant to this
51 article or committed for an indeterminate period to a state

hospital or state institution as a mentally disordered sex offender, who escapes or attempts to escape therefrom, or who escapes or attempts to escape while being conveyed to or from such county facility, state hospital or state institution, is punishable by imprisonment in the state prison not to exceed five years or in the county jail not to exceed one year.

Article 2. Mentally Ill Persons

5550. "Mentally ill persons," as used in this code, means persons who come within either or both of the following descriptions:

(a) Who are of such mental condition that they are in need of supervision, treatment, care, or restraint.

(b) Who are of such mental condition that they are dangerous to themselves or to the person or property of others, and are in need of supervision, treatment, care, or restraint.

Wherever in this code the term "insane" or its variants are used, such terms shall be construed to refer to and mean "mentally ill" or its variants, as defined in this section.

5551. Any person may file in the superior court a verified petition, alleging that there is in the county a person who is mentally ill and in need of supervision, care, or treatment, and asking that examination be made of the mental health of the person, and that provision be made for the welfare of the person as provided in this article.

When no relative, friend, or other person can be found in the county who is able and willing to make and file the petition herein provided, any peace officer, probation officer, physician attending the patient, physician attached to a public hospital or institution, if the person is a patient therein, or public guardian may make and file the petition herein provided. The district attorney or his deputy shall prepare the petition and all other forms required in the proceeding when requested by the party who is to file the petition or other form. When a petition is filed by any such person, neither the person making or filing the petition, nor his superiors, nor the department, hospital, or institution to which he is attached nor any of its employees, shall be rendered liable thereby either civilly or criminally if there was probable cause for the making and filing of said petition.

5552. The petition shall contain the following:

(a) The name and address of the petitioner and his interest therein.

(b) The name of the person alleged to be mentally ill, and, if known to the petitioner, the address, age, sex, marital status, and occupation of the person alleged to be mentally ill.

(c) The facts upon which the allegation that the person is mentally ill and in need of supervision, care or treatment is based.

(d) A statement whether, in the opinion of the petitioner, the alleged mental illness of the person is such as to render

1 him in need or supervision, care or treatment, or to render him
2 dangerous to health, person or property.

3 (e) The name of as a respondent thereto, every person
4 known or believed by the petitioner to be legally responsible
5 for the care, support, and maintenance of the person alleged
6 to be mentally ill and the address of every such person, if
7 known to the petitioner.

8 (f) Such other information as the court may require.

9 5553. The petition shall be in substantially the following
10 form:

11
12 In the Superior Court of the State of California
13 in and for the County of _____

14	_____	} Petition
15	_____	
16	The People	
17	For the Best Interest and Protection of	
18	_____ ,	
19	as a Mentally Ill Person,	
20	_____	} Respondents
21	and Concerning	
22	_____ and	
23	_____	
24	_____	
25	Respondents	

26
27 _____, residing at _____ (tel. _____), being duly
28 sworn deposes and says: That there is now in the county, in
29 the City or Town of _____ a person named _____, who
30 resides at _____, and who is believed to be mentally ill and
31 in need of supervision, care, or treatment.

32 That the person is _____ years of age; that ---he is
33 _____ (sex); and that ---he is _____ (single, married,
34 widowed, or divorced); and that _____ occupation is
35 _____.

36 That the facts because of which petitioner believes that the
37 person is mentally ill and in need of supervision, care or treat-
38 ment are as follows: That ---he, at _____ in the county,
39 on the _____ day of _____, 19____, _____
40 _____

41
42 That petitioner's interest in and case is _____
43 _____

44 That petitioner believes that said person is so mentally ill
45 (a) as to be in need of supervision, care or treatment under
46 the provisions of this act,

47 or

48 (b) as to render him dangerous to himself or to the person
49 or property of others.

50 (Strike out (a) or (b), whichever is not applicable.)

1 That the persons responsible for the care, support, and
 2 maintenance of the mentally ill person, and their relationship
 3 to the person are, so far as known to the petitioner, as follows:
 4 (Give names, addresses, and relationship of persons named as
 5 respondents)

6 Wherefore, petitioner prays that examination be made to
 7 determine the state of the mental health of _____, alleged
 8 to be mentally ill, and that such measures be taken for the
 9 best interest and protection of said _____, in respect to
 10 his supervision, care and treatment, as may be necessary and
 11 provided by law.

12 _____
 13 _____ Petitioner
 14 Subscribed and sworn to before me this _____ day of
 15 _____ 19____.
 16 _____, County Clerk
 17 By _____, Deputy
 18 _____

19 5554. Whenever it appears, by petition pursuant to this
 20 article, to the satisfaction of a judge of the superior court in
 21 any county that any person therein is mentally ill, and in need
 22 of supervision, treatment, care or restraint the judge shall so
 23 far as consistent with Section 5051 of this code, make such
 24 orders as may be necessary to provide for examination into
 25 the state of mental health of the person, and for the safe-
 26 keeping, necessary medical treatment, care or restraint of
 27 the person, pending hearing, in the county psychopathic hos-
 28 pital, in his own home, in a state hospital, or in such other
 29 place as will afford access to medical examiners for the pur-
 30 pose of examination and suitable provisions for the safety and
 31 comfort of the person. The judge shall by order appoint two
 32 medical examiners to make a personal examination of the
 33 person and to report thereon to the court.

34 If the judge is satisfied that the person is sufficiently men-
 35 tally ill that examination should be made into the state of his
 36 mental health, the judge shall issue an order notifying the
 37 person to submit to examination at such time and place as
 38 designated by the judge. The order for examination shall be
 39 served as provided in Section 5556 by a peace officer or coun-
 40 selor in mental health of the county at least one day before
 41 the time fixed for the examination. The person shall be per-
 42 mitted to remain in his home or other place of domicile pend-
 43 ing the examination, and shall be permitted to be accompanied
 44 by one or more of his relatives or friends to the place of ex-
 45 amination.

46 If it appears to the judge from a certificate of a licensed
 47 physician and surgeon dated not more than three (3) days
 48 prior to the presentation of the petition and filed with the
 49 court, certifying that he has examined the person and is of the
 50 opinion the person is mentally ill, and because of his illness
 51 is likely to injure himself or others if not immediately hospital-
 52 ized or detained, or if it otherwise affirmatively appears that

1 said person is likely to injure himself or others, the judge may
 2 issue and deliver to a peace officer or counselor in mental health
 3 of the county an order directing that the person be forthwith
 4 detained in a place designated in the order for examination
 5 and hearing as provided in this article. The judge may issue a
 6 similar order if the person fails or refuses to appear for ex-
 7 amination when notified.

8 5555. The order for examination or detention shall be in
 9 substantially the following form:

10
 11 In the Superior Court of the State of California
 12 in and for the County of -----
 13

14
 15 The People
 16 For the Best Interest and Protection of
 17 -----
 18 as a Mentally Ill Person
 19
 20 and Concerning
 21 ----- and
 22 -----
 23 Respondents
 24

Order
 for
 Examination
 or
 Detention

25
 26 The people of the State of California to -----
 27 -----:
 28 (peace officer, counselor in mental health)
 29

30 The petition of ----- having been presented this day to
 31 me, a Judge of the Superior Court in and for the County of
 32 -----, State of California, from which it appears that there
 33 is now in this county, at -----, a person by the name of
 34 -----, who is mentally ill and in need of supervision, treat-
 35 ment, care or restraint.

36 And it satisfactorily appearing to me that said person is
 37 sufficiently mentally ill and in need of supervision, treatment,
 38 care or restraint, that examination should be made into the
 39 state of his mental health, and hearing held, if demanded, to
 40 determine the supervision, treatment, care or restraint, if any,
 41 necessary for his best interest and protection, and the protec-
 42 tion of the people.

43 I do hereby appoint ----- and ----- as medical ex-
 44 aminers to make a personal examination of -----, the per-
 45 son alleged to be mentally ill, and to report thereon to the
 46 court, pursuant to Section 5566 of the Welfare and Institutions
 47 Code.

48 *Now, therefore, you are commanded to notify said -----,
 49 to submit to an examination into the state of his mental
 50 health at ----- on or before the ----- day of -----,
 51 that thereafter he may be taken before a judge of the superior
 52 court in this county for examination and hearing to deter-

mine the measures to be taken for the best interest and protection of said _____, as a mentally ill person, as provided by law.

*And it affirmatively appearing to me that said person is sufficiently mentally ill that he is likely to injure himself or others if not immediately hospitalized or detained, you are therefore commanded to forthwith detain said _____, or cause him to be detained for examination and hearing, pending the further order of the judge, at _____, and there be cared for in a humane manner as a mentally ill person and provided with any medical treatment deemed necessary to his physical well-being.

*And it satisfactorily appearing to me that said person has failed or has refused to appear for examination when notified by order of this court, you are therefore commanded to forthwith detain said _____ or cause him to be detained for examination and hearing, pending the further order of the judge, at _____, and there be cared for in a humane manner as a mentally ill person.

I hereby direct that a copy of this order together with a copy of the said petition be delivered to said person and his representative, if any, at the time of his notification; and I further direct that this order may be served at any hour of the night.

Witness my hand, this _____ day of _____, 19____.

Judge of the Superior Court

*Strike out when not applicable.

Return of Order

I hereby certify that I received the above order for examination or detention, and on the _____ day of _____, 19____, served it by notifying and delivering to said _____ personally, and to his representative, if any, to wit, _____, a copy of the order and of the petition,* or by apprehending said person and causing him to be detained for examination and hearing and for humane care as an alleged mentally ill person at _____; until further ordered and directed by the judge.

*I hereby certify that prior to the service of the above order for detention and the apprehension of _____ I served notice on the person and his representative, if any, as required under Section 5557 of the Welfare and Institutions Code.

Dated: _____, 19____.

Signature of officer

*Strike out when not applicable.

5556. As promptly as possible, and at least one day before the time of the examination as fixed by the court order, a copy of the petition and order for examination shall be personally

1 delivered to the person and his representative, if any, and,
2 unless the petition is filed by such a relative to the wife, hus-
3 band, father, mother, or other nearest relative of the person
4 alleged to be mentally ill, if any such relative is known to be
5 within the county; if no such relative is known to be within
6 the county, a copy of the petition and order for examination
7 shall be personally delivered to the person with whom such
8 alleged mentally ill person resides or at whose home he is, or
9 in the absence of that person, to a friend of the alleged men-
10 tally ill person.

11 When an order for the forthwith detention of the person
12 as issued by the court is executed by the officer, a copy of the
13 petition and order for detention shall be personally delivered
14 to the persons designated in this section.

15 5557. At the time of service of the petition and order for
16 examination or detention, the officer making the service shall
17 also deliver to each person served a copy of a notice which
18 shall read substantially as follows:

19 The petition which accompanies this notice has been filed
20 in the Superior Court in and for the County of _____,
21 alleging that _____ is mentally ill and in need of super-
22 vision, treatment and care.

23 * _____ is notified to present himself at the time and place
24 designated in the attached order to submit to an examination
25 into the state of his mental health. He is permitted to be ac-
26 companied by one or more of his relatives or friends to the
27 place of examination. If he fails or refuses to appear for such
28 examination, the court may issue an order for his forthwith
29 detention for such examination.

30 * _____ has been affirmatively alleged to be sufficiently
31 mentally ill that he is likely to injure himself or others if not
32 immediately hospitalized or detained. The court has therefore
33 issued the attached order for detention and for examination
34 and hearing before the court.

35 _____ has the right to a hearing, to bring in witnesses
36 and to have compulsory process therefor, and to be represented
37 by an attorney.

38 If _____ or a relative, friend, counsel or representative
39 desires to be heard by the court, he must within four days
40 after service of this notice file a request for a hearing with the
41 clerk of the Superior Court in and for the County of _____.

42 * Strike out when not applicable.
43

44 5558. The officer shall, pursuant to the order for deten-
45 tion, apprehend the person, as provided in this article, and
46 cause him to be delivered at the place designated in the order
47 until examination can be had, as herein provided. At the time
48 of such apprehension, or within a reasonable time thereafter,
49 unless a responsible relative or the guardian or conservator of
50 the person is in or has taken possession of his personal prop-
51 erty, the officer shall take all necessary precautions with re-
52 spect to the personal property in the actual possession of or

1 in the premises occupied by such mentally ill person to pre-
2 serve and safeguard the same pending the determination of
3 the proceedings. The officer shall then furnish to the court a
4 full, complete, and itemized report of the patient's property
5 so preserved and safeguarded and of its disposition, in sub-
6 stantially the form set forth in this section; except that if a
7 responsible relative or the guardian or conservator of the pa-
8 tient is in or has taken possession of the patient's property,
9 the report shall include only the name of the relative or guard-
10 ian or conservator and the location of the property; thereupon
11 the responsibility imposed herein upon the officer shall termi-
12 nate. Pending the examination, such order may be made rela-
13 tive to the care, custody, confinement and the preservation and
14 safeguarding of the property of the alleged mentally ill person
15 as to the judge seems for the best interests, welfare and health
16 of the patient.

17 As used in this section, "responsible relative" includes the
18 spouse, parent, adult child or adult brother or sister of the
19 patient, except that such term does not include the person who
20 filed the petition to commence proceedings under this article.

21 Report of Officer

22
23
24 I hereby report to the above entitled court that the personal
25 property of the person apprehended herein consisting of
26 ----- was preserved and safeguarded by -----.

27 (Insert name of officer, responsible relative, guardian,
28 or conservator)

29
30 The said property is now located at -----.

31
32 Dated: -----19----.

33
34 -----
35 Signature of officer

36
37 5559. If no demand is made for a hearing by or in behalf
38 of the alleged mentally ill person after four days from the
39 service of the notice, petition and orders for examination or
40 detention as provided in this article, or if a hearing is waived
41 by the person, or by his attorney, during such four-day period,
42 the judge may proceed immediately to determine the mental
43 status of the alleged mentally ill person.

44 The judge shall consider the report of the two medical
45 examiners appointed by the court to make a personal examina-
46 tion of the person and to report to the court. The judge may
47 require other proof in addition to the petition and the report
48 of the medical examiners.

49 If the judge is satisfied that the person is so mentally ill
50 as to be in need of supervision, treatment, care or restraint,
51 the judge may adjudge the person to be mentally ill and

1 order the person committed or cared for as provided in Sec-
2 tion 5567 of this code. No order for commitment to an insti-
3 tution for the mentally ill shall issue unless two medical
4 examiners have personally made an examination of the person
5 alleged to be mentally ill and have filed with the judge a
6 report upon a form substantially as set forth in Section 5566
7 of this code containing the facts and circumstances upon which
8 the judgment of the examiners is based and stating that the
9 condition of the person examined is such as to require care
10 and treatment in an institution for the mentally ill.

11 If it appears to the judge that the person is harmless and
12 his relatives or guardian are willing or able properly to care
13 for him at some place other than such institution, the judge
14 may order the person to be placed in the care and custody
15 of his relatives or guardian.

16 5560. If a request is made for a hearing on behalf of the
17 alleged mentally ill person, the judge shall, or he may upon his
18 own motion, by order fix such time and place for the hearing
19 and examination as will give reasonable opportunity for the
20 production and examination of witnesses. Notice of the time
21 and place of the hearing shall be given each person upon whom
22 the petition was served and such other persons as the court
23 may order; such notice may be sent by registered mail with
24 return receipt requested to the last known address of each such
25 person. The order shall be entered at length in the minute
26 book of the court or shall be signed by the judge and filed.

27 5561. Upon sufficient showing that the interest of the pa-
28 tient as to his mental and physical condition would best be
29 subserved thereby, the court may continue the hearing. Upon
30 demand made at any time during the continuance by the pa-
31 tient or any of his relatives, friends, counsel or representative,
32 the court shall set the hearing at a date not more than five days
33 from the time the demand was made. Notice of the time and
34 place of the hearing shall be given as provided in Section 5560.

35 5562. If an order for continuance is made, unless a demand
36 for hearing is made during the continuance, the clerk shall
37 place the case on the court calendar for hearing on the 30th
38 day following the date of the order and notice shall be given
39 as provided in Section 5560. The court shall then hear and
40 dispose of the case, unless the case is again continued. In the
41 event of successive continuances the clerk shall set the case
42 for hearing on the 30th day following the date of each order
43 and notice shall be given.

44 5563. For the purpose of conducting hearings pursuant to
45 this article the court may be convened at any time and place
46 within the county, suitable to the mental and physical health
47 of the person, except that the time and place for hearing shall
48 not be different from the time and place for the trial of civil
49 actions if any party to the proceeding, prior to the hearing,
50 objects to any different time or place; and provided, that if
51 the hearing is held at any place other than a regular courtroom

1 of the superior court five days' notice be given thereof to the
2 patient and the petitioner, unless waived by the person or his
3 representative, and appropriate minute order made thereof
4 on the records of the court.

5 Any such hearing may be held in the psychiatric ward or
6 unit of a county hospital and it shall be deemed that such
7 hearing is held in a place for the trial of civil actions and in
8 a regular courtroom of the superior court.

9 Any other provision of this section notwithstanding, the
10 alleged mentally ill person may demand that the hearing be
11 public, and be held in a suitable place for attendance by the
12 public.

13 5564. The judge of the superior court may, for any hear-
14 ing, order the clerk of the court to issue subpoenas and compel
15 the attendance of witnesses from any place within the bound-
16 aries of this state and shall issue such subpoenas and compel
17 attendance of witnesses as requested by the alleged mentally
18 ill person; but no person is obliged to attend as a witness in
19 such a hearing out of the county where he resides or is served
20 unless the judge, upon affidavit to the effect that affiant be-
21 lieves that the evidence of the witness is material and his
22 attendance at the hearing necessary, indorses on the subpoena
23 an order for the attendance of the witness.

24 The judge shall compel the attendance of at least two medi-
25 cal examiners, who shall hear the testimony of all witnesses,
26 make a personal examination of the alleged mentally ill person,
27 and testify before the judge as to the result of the examination,
28 and to any other pertinent facts within their knowledge. The
29 judge shall also cause to be examined before him as a witness,
30 any other person who he has reason to believe has any knowl-
31 edge of the mental condition of the alleged mentally ill person,
32 or of his financial condition or that of the persons liable for
33 his maintenance.

34 All witnesses attending a hearing upon a subpoena issued
35 under this section shall be entitled to the same fees and ex-
36 penses as in criminal cases, to be paid upon the same conditions
37 and in like manner.

38 5565. The alleged mentally ill person shall be present at
39 the hearing, and if he has no attorney, the judge may appoint
40 an attorney to represent him, or if a request is made for an
41 attorney by the alleged mentally ill person, the judge shall
42 appoint an attorney to represent him and in a county where
43 there is no public defender fix the compensation to be paid by
44 the county for such services, or the judge may order the
45 county public defender to represent him at the hearing if he
46 determines the person is not financially able to employ counsel.

47 5566. The medical examiners, after making the examination
48 and hearing the testimony, shall make and sign a certificate
49 showing as nearly as possible the facts herein indicated, in
50 substantially the following form:

In the Superior Court of the State of California

Medical Examiner

Medical Examiner

5567. If, after examination and certificate have been made, the judge believes that the person is either (a) of such mental condition that he is in need of supervision, treatment, care, or restraint, or (b) of such mental condition that he is dangerous to himself or to the person or property of others, and is in need of supervision, treatment, care, or restraint, the judge may adjudge the person to be mentally ill, and may, so far as is consistent with Section 5051 of this code, make and sign an order.

(a) That the person be cared for and detained in a county psychopathic hospital, in a community mental health service established under the provisions of Division 8 of this code, or a licensed sanitarium or hospital for the care of the mentally ill entitled by law to receive and care for such persons, or that the person be otherwise cared for, until the further order of the court, or

(b) That the person be committed to the Department of Mental Hygiene for placement in a state hospital designated by the court, or

(c) That the person be committed to a facility of the Veterans Administration, or other agency of the United States Government, in accordance with the provisions of Section 1663 of the Probate Code.

The order shall be in substantially the following form, and shall be filed with the clerk.

In the Superior Court of the State of California
in and for the County of _____

The People

For the Best Interest and Protection of

as a Mentally Ill Person,

and Concerning

_____ and
_____, Respondents

Judgment of Men-
tal Illness and
Order for Care,
Hospitalization
or Commitment

The petition dated _____, alleging that _____ is mentally ill, having been presented to this court on the _____ day of _____, 19____, and an order of detention issued thereon by a judge of the superior court of this county, and a return of the said order;

1 And it further appearing that the provisions of Sections
2 5551 to 5566, inclusive, of the Welfare and Institutions Code
3 have been complied with;

4 And it further appearing that Dr. _____ and Dr. ____
5 _____, two regularly appointed and qualified medical examiners
6 of this county, have made a personal examination of the al-
7 leged mentally ill person, and have made and signed the cer-
8 tificate of the medical examiners, which certificate is attached
9 hereto and made a part hereof;

10 Now therefore, after examination and certificate made as
11 aforesaid the court is satisfied and believes that _____ is

12 *(a) Of such mental condition that ____he is in need of
13 supervision, treatment, care, or restraint, or

14 *(b) Of such mental condition that ____he is dangerous to
15 h____self or to the person or property of others, and is in need
16 of supervision, treatment, care, or restraint.

17 It is ordered, adjudged and decreed:

18 That _____ is a mentally ill person and that ____he

19 *(a) Be cared for and detained in _____, a county psy-
20 chopathic hospital, a community mental health service, or a
21 licensed sanitarium or hospital for the care of the mentally ill
22 until the further order of the court, or

23 *(b) Be cared for at _____, until the further order of
24 the court, or

25 *(c) Be committed to the Department of Mental Hygiene
26 for placement in a state hospital, to wit: _____ State Hos-
27 pital at _____, California, or

28 *(d) Be committed to a facility of the Veterans Adminis-
29 tration or other agency of the United States, to wit: _____
30 at _____ in accordance with the provisions of Section 1663
31 of the Probate Code of the State of California.

32 It is further ordered and directed that _____ of this
33 county, take, convey and deliver _____ to the proper au-
34 thorities of the hospital or establishment designated herein
35 to be cared for as provided by law.

36 Dated this _____ day of _____, 19____.

37 _____
38 Judge of the Superior Court

39 * Strike out where inapplicable.

40
41 5568. If, on the examination as provided by law, the court
42 finds a person to be mentally disordered and bordering on
43 mental illness but not dangerously mentally ill, the court may
44 commit him to the care and custody of the counselor in mental
45 health and may allow him to remain in his home subject to
46 the visitation of a counselor in mental health and subject to
47 return to the court for further proceedings whenever such
48 action appears necessary or desirable; or the court may com-
49 mit him to be placed in a suitable home, sanitarium, or rest
50 haven home, subject to the supervision of the counselor in
51 mental health and the further order of the court.

1 5569. Whenever a person has been adjudged to be men-
 2 tally ill and ordered by the court to be cared for and detained
 3 in a licensed sanitarium or hospital or otherwise cared for, the
 4 court may thereafter make such further order or orders for
 5 hearing or other disposition concerning the person as the court
 6 may deem necessary and proper. The court may accept a writ-
 7 ten report and recommendation concerning the person made
 8 by a licensed physician treating the person, if verified, in lieu
 9 of the examination by and testimony of court-appointed physi-
 10 cians and in lieu of the personal appearance in court of the
 11 person; provided, however, that upon request made to the
 12 court by or on behalf of the person he shall have the right
 13 to a personal appearance in court. The court may order the
 14 person to be discharged if he has improved to such an extent
 15 that he is no longer in need of supervision, treatment, care or
 16 restraint; the court may order the person to continue under
 17 care and treatment, in the same or another licensed sanitarium
 18 or hospital, or the court may order the person to be otherwise
 19 cared for, until the further order of the court; provided, how-
 20 ever, that before making an order when necessary for commit-
 21 ment of the person to a state hospital, the court shall require
 22 that a hearing be held and that a written report and recom-
 23 mendation be made by two medical examiners appointed by
 24 the court, and if the person is committed to a state hospital
 25 he shall have the right to a jury trial as provided in Section
 26 5572 of this code.

27 5570. The county clerk shall keep an index, alphabetically
 28 arranged, which shall show the name and age of each person
 29 examined as to mental illness, the date of the order of com-
 30 mitment or hospitalization and the name of the hospital,
 31 community mental health service, or sanitarium to which the
 32 person was ordered confined and cared for or the name of the
 33 designated state hospital to which the person was committed.

34 5571. No case of harmless chronic mental unsoundness or
 35 mental deficiency shall be committed to the Department of
 36 Mental Hygiene for placement in any state hospital for the
 37 care and treatment of the mentally ill. When any such person
 38 becomes mentally ill, however, he may be committed to the
 39 department for placement in a designated state hospital for
 40 the mentally ill or to a licensed hospital or sanitarium, as
 41 provided in this article.

42 5572. If a person ordered under Section 5567 to be cared
 43 for or detained in any licensed hospital or sanitarium as a
 44 mentally ill person or committed to a state hospital, or any
 45 friend in his behalf, is dissatisfied with the order of the judge
 46 so detaining or committing him, he may, within 10 days after
 47 the making of such order, demand that the question of his
 48 mental illness be tried by a judge or by a jury in the superior
 49 court of the county in which he was committed or the order
 50 of detention was issued. Thereupon the court shall set the
 51 case for hearing at a date, or shall cause a jury to be sum-
 52 moned and to be in attendance at a date stated, not less than

1 five nor more than 10 days from the date of the demand for
2 a court or jury trial. The court shall adjudge whether the
3 person is mentally ill, or if it is a trial by jury shall submit to
4 the jury the question: Is the person mentally ill?

5 5573. Proceedings under Section 5567 under the order of
6 detention in a hospital or sanitarium or commitment to a state
7 hospital shall not be stayed, pending the proceedings for de-
8 termining the question of mental illness by a judge or jury,
9 except upon the order of a superior judge, with provision
10 made therein for such temporary care and custody of the
11 person as the judge deems necessary. If the superior judge,
12 by the order granting the stay, commits the person to the
13 custody of any person other than a peace officer, he may, by
14 such order, require a bond for his appearance at the trial.

15 5574. At the trial the petition and its allegations that the
16 person is a mentally ill person shall be presented by the dis-
17 trict attorney of the county.

18 5575. The trial shall be had as provided by law for the trial
19 of civil causes, and if tried before a jury the person shall be
20 discharged unless a verdict that he is mentally ill is found by
21 at least three-fourths of the jury. If the judge adjudges or the
22 verdict of the jury is that he is mentally ill the judge shall
23 adjudge that fact and make an order similar to the original
24 order for detention in a licensed hospital or sanitarium or for
25 commitment to a state hospital. If such order is for the super-
26 vision, treatment, care or restraint of the mentally ill person in
27 a hospital or sanitarium, a peace officer shall deliver the person
28 and present a copy of the order to the superintendent or other
29 official of such institution; if the order is for the commitment
30 of a mentally ill person to a state hospital, such order shall be
31 presented, at the time of commitment of the mentally ill per-
32 son, to the superintendent or person in charge of the state hos-
33 pital to which the mentally ill person is committed.

34 5576. If a judge refuses to grant an application for an
35 order of supervision, commitment, detention or hospitalization
36 of a mentally ill person alleged to be dangerous to himself and
37 others if without supervision and treatment by physicians,
38 detention and hospital or sanitarium care he shall state his
39 reasons for such refusal, and any person aggrieved thereby
40 may demand a trial of the question of the mental illness
41 of the person alleged to be mentally ill, in the manner pro-
42 vided for a jury trial when demanded by or on behalf of the
43 alleged mentally ill person.

44 5577. Any person committed to the care and custody of
45 the counselor in mental health under the provisions of Section
46 5568, and for whom no guardian has been appointed under the
47 provisions of the Probate Code, or a relative or a friend in his
48 behalf, may make application, by petition duly verified, to a
49 judge of the superior court of the county where such commit-
50 ment was ordered, for an order adjudging that such person is
51 competent. Such petition shall be filed in the proceedings in
52 which such commitment was ordered, and no fees shall be

1 charged by the county clerk for the filing of the petition nor
2 for any official service rendered in said proceedings. The judge
3 shall set the application for hearing and notice of the hearing
4 of the application shall be given, in the manner directed by
5 the court, to the counselor in mental health, to the person com-
6 mitted if he is not the applicant, and to such relative or rela-
7 tives of such person residing in the county as the court directs,
8 and those to whom notice is given shall be given an opportu-
9 nity to appear and be heard on the hearing of the application.

10 The hearing shall be conducted in the same manner as civil
11 cases, and on demand by the petitioner shall be tried by a jury
12 in the same manner as civil cases. If on the hearing the decision
13 of the court or the verdict of the jury is that the person is com-
14 petent, an appeal may be taken as in civil cases. If the court
15 decides or the jury renders a verdict declaring the person is
16 competent, the court shall make an order declaring the person
17 to be competent and discharging his commitment. If three-
18 fourths of the jury fail to unite in a verdict, or the court or
19 the jury decides that the person is not then competent, the
20 proceeding shall be dismissed and no new application to have
21 the person declared competent shall be made for six months
22 thereafter.

23 24 Article 3. Mentally Deficient Persons

25
26 5590. As used in this code, "mentally deficient persons"
27 means those persons, not psychotic, who are so mentally re-
28 tardated from infancy or before reaching maturity that they are
29 incapable of managing themselves and their affairs independ-
30 ently, with ordinary prudence, or of being taught to do so, and
31 who require supervision, control, and care, for their own wel-
32 fare, or for the welfare of others, or for the welfare of the com-
33 munity.

34 Wherever in this code or in any provision of statute hereto-
35 fore or hereafter enacted the terms "feebleminded" and
36 "feeble-mindedness" are used, they shall be construed to refer
37 to and mean "mentally deficient" and "mental deficiency,"
38 respectively, as defined in this section. All persons heretofore
39 committed or admitted as feebleminded to any state home for
40 the feebleminded, or committed to the Department of Mental
41 Hygiene for placement therein, shall be deemed to have been
42 committed or admitted thereto as mentally deficient persons.

43 5591. Any mentally deficient person may be committed to
44 the Department of Mental Hygiene for placement in a desig-
45 nated state home for the mentally deficient if he has been a
46 resident of the state for the period of one year next preceding
47 the presentation of the petition, or, in the case of a person
48 under the age of one year who was born in the state, if the
49 parent in whose custody he is has been a resident of the state
50 for the period of one year next preceding the presentation of
51 the petition.

1 Residence acquired in this or in another state shall not be
2 lost by reason of military service in the armed forces of the
3 United States. The residence of minor children during the
4 period of such military service shall be determined in accord-
5 ance with the residence of the parent in such service or in
6 accordance with the residence of the child.

7 5592. A petition for the commitment of a mentally defi-
8 cient person to the Department of Mental Hygiene for place-
9 ment in a designated state home for the mentally deficient may
10 be filed in the superior court of the county in which such per-
11 son resides, by any of the following persons:

12 (a) The parent, guardian, or other person charged with
13 the support of the mentally deficient person.

14 (b) Any district attorney or probation officer.

15 (c) The Youth Authority.

16 (d) Any person designated for that purpose by the judge
17 of the court.

18 (e) The Director of Corrections.

19 The petition shall state the petitioner's reasons for suppos-
20 ing the person to be eligible for admission thereto, and shall be
21 verified by the affidavit of the petitioner.

22 5593. The court shall fix a time and place for the hearing
23 of the petition. The hearing may, in the discretion of the court,
24 be held at any time and place which the court deems proper,
25 and which will give opportunity for the production and exami-
26 nation of witnesses.

27 5594. In all cases the court shall require due notice of
28 the hearing of the petition to be given to the alleged incom-
29 petent. Whenever a petition is filed by a probation officer,
30 district attorney, the Youth Authority or the Director of Cor-
31 rections, the court shall require such notice of the hearing of
32 the petition as it deems proper to be given to any parent,
33 guardian, or other person charged with the support of the
34 person mentioned in the petition.

35 5595. Whenever the court considers it necessary or advis-
36 able, it may cause a warrant to issue for the apprehension and
37 delivery to the court of the alleged mentally deficient person,
38 and may have the warrant executed by any peace officer.

39 5596. Pending the hearing the alleged mentally deficient
40 person may be left in the charge of his parent, guardian, or
41 other suitable person, or may be placed in the county psy-
42 chopathic hospital.

43 5597. The court shall inquire into the condition or status
44 of the alleged mentally deficient person. For this purpose it
45 may by subpoena require the attendance before it of a physician
46 who has made a special study of mental deficiency and is
47 qualified as a medical examiner, and of a clinical psychologist,
48 or of two such physicians, or of two such psychologists, to
49 examine the person and testify concerning his mentality. The
50 court may also by subpoena require the attendance of such
51 other persons as it deems advisable, to give evidence.

1 5598. Each psychologist and physician shall receive for
2 each attendance mentioned in Section 5597 the sum of five
3 dollars (\$5) for each person examined, together with his nec-
4 essary actual expenses occasioned thereby, and other witnesses
5 shall receive for such attendance such fees and expenses as the
6 court in its discretion allows, if any, not exceeding the fees
7 and expenses allowed by law in other cases in the superior
8 court.

9 Any fees or traveling expenses payable to a psychologist,
10 physician, or witness as provided in this section and all ex-
11 penses connected with the execution of any process under the
12 provisions of this article, which are not paid by the parent,
13 guardian, or person charged with the support of the supposed
14 mentally deficient person, shall be paid by the county treasurer
15 of the county in which the person resides, upon the presenta-
16 tion to the treasurer of a certificate of the judge that the
17 claimant is entitled thereto.

18 5599. If the court finds that the person is mentally de-
19 ficient, and that he has been a resident of the state for one
20 year next preceding the presentation of the petition, or, if the
21 person is under the age of one year, that he was born in the
22 state and that the parent in whose custody he is has been a
23 resident of the state for the period of one year next preceding
24 the presentation of the petition, or, if the person is the child
25 of a person in military service as provided in Section 5591,
26 the court may make an order that the person be committed to
27 the Department of Mental Hygiene for placement in the So-
28 noma State Home or to the Pacific Colony and that he be
29 received, maintained, and educated therein. The court, how-
30 ever, may commit a mentally deficient person who has been
31 in the state less than one year for the purpose of transporta-
32 tion of such person to the state of his legal residence pursuant
33 to Section 160. On the presentation of the order the superin-
34 tendent of the institution to which the person is committed
35 shall receive him therein, unless the institution is already full,
36 or the fund available for its support is exhausted, or, in the
37 opinion of the Department of Mental Hygiene, the person
38 is not a suitable subject for admission thereto.

39 5600. In case of the dismissal of the petition, the court may,
40 if it considers the petition to have been filed with malicious in-
41 tent, order the petitioner to pay the expenses in connection
42 therewith, and may enforce such payment by such further
43 orders as it deems necessary.

44 5601. Any person who knowingly contrives to have any
45 person adjudged mentally deficient under the provisions of
46 this article, unlawfully or improperly, is guilty of a misde-
47 meanor.

48 5602. If, when a boy or girl is brought before a juvenile
49 court under the juvenile court law, it appears to the court,
50 either before or after adjudication, that the person is mentally
51 deficient, or if, on the conviction of any person of crime by
52 any court it appears to the court that the person is mentally

deficient, the court may adjourn the proceedings or suspend the sentence, as the case may be, and direct some suitable person to take proceedings under this article against the person before the court, and the court may order that, pending the preparation, filing, and hearing of the petition, the person before the court be detained in a place of safety, or be placed under the guardianship of some suitable person, on his entering into a recognizance for the appearance of the person upon trial or under conviction when required. If, upon the hearing of the petition, or upon a subsequent hearing, the person upon trial or under conviction is not found to be mentally deficient, the court may proceed with the trial or impose sentence, as the case may be.

Article 4. Epileptics

5610. Persons who are afflicted with epilepsy, as such condition is defined in medical practice, may be committed to state hospitals when such persons are in need of care and treatment for their epilepsy, or when such persons are also suffering from mental illness. Whenever an epileptic person is found to be mentally deficient he may be committed to a state home for the mentally deficient as provided in Article 3 of this chapter, and "mentally deficient person," as used in that article shall be construed to be an epileptic person.

5611. Epileptic persons committed to state hospitals shall be subject to the same rules and laws governing the rights, care, property and support, transfer, leave of absence and discharge of mentally ill persons committed to state hospitals the same as if such persons were expressly mentioned therein.

Article 5. Narcotic Drug Addicts

5625. A "narcotic drug addict" within the meaning of this article is any person who habitually takes or otherwise uses to the extent of having lost the power of self-control any opium, morphine, cocaine, or other narcotic drug as defined in Article 1 of Chapter 1 of Division 10 of the Health and Safety Code.

Wherever in this article the term "drug addict" is used, such term shall be construed to refer to and mean "narcotic drug addict" as defined in this section. All persons heretofore committed or admitted as drug addicts to any state hospital, or committed to the Department of Mental Hygiene for placement therein, shall be deemed to have been committed or admitted as narcotic drug addicts.

5626. Whenever it appears by affidavit to the satisfaction of a magistrate of a county that any person is a narcotic drug addict, he shall issue and deliver to some peace officer for service, a warrant directing that the person be apprehended and taken before a judge of the superior court for a hearing and examination on such charge. The officer shall thereupon apprehend and detain the person until a hearing and exami-

1 nation can be had. At the time of the apprehension a copy
2 of the affidavit and warrant of apprehension shall be person-
3 ally delivered to the person.

4 5627. Such affidavit and warrant of apprehension shall be
5 substantially in the form provided by Sections 5553 and 5555
6 of this code for the examination of a person alleged to be
7 mentally ill.

8 5628. The person charged shall be taken before a judge
9 of the superior court, to whom the affidavit and warrant of
10 apprehension shall be delivered to be filed with the clerk.
11 The judge shall then inform him of his rights to make a
12 defense to such charge and to produce witnesses in relation
13 thereto. The judge shall by order fix such time and place
14 for the hearing and examination in open court as will give
15 a reasonable opportunity for the production and examination
16 of witnesses. Such order shall be entered at length in the
17 minute book of the court or shall be signed by the judge and
18 filed and a certified copy thereof shall be served on the person.
19 The judge may order that such notice of the apprehension of
20 the person and the hearing of the charge be served on such
21 relatives of the person known to be residing in the county
22 as the court deems necessary or proper.

23 5629. The judge may cause witnesses to be summoned and
24 examined before him. The hearing and examination shall be
25 had in substantial compliance with the provisions of Sections
26 5564, 5565, and 5566 of this code.

27 5630. If, after a hearing and examination, the judge be-
28 lieves the person charged is a narcotic drug addict, he shall
29 make an order committing such person to the Department of
30 Mental Hygiene for placement in a designated hospital for an
31 indeterminate period of not less than three months nor more
32 than two years.

33 If satisfactory evidence is submitted to the trial judge
34 showing that the person to be committed is of bad repute or
35 bad character, apart from his habit for which the commitment
36 is made, and that there is reasonable ground for believing that
37 the person if committed will not be benefited by treatment,
38 the judge shall not commit the person to a state hospital.

39 5631. If a person ordered committed to a state hospital,
40 or any friend in his behalf, is dissatisfied with the order of
41 the judge committing him, he may, within 10 days after the
42 making of the order of commitment, demand that the issue be
43 tried by a judge or by a jury in the superior court of the
44 county in which he was committed. Thereupon a trial shall be
45 had in compliance with the provisions of Sections 5572 to 5576,
46 inclusive, of this code.

47 If the alleged narcotic drug addict has no attorney the judge
48 may appoint an attorney to represent him, or if a request is
49 made for an attorney by the alleged narcotic drug addict, the
50 judge shall appoint an attorney to represent him and, in a
51 county where there is no public defender, fix the compensation

1 to be paid by the county for such services if the judge deter-
2 mines that the person is not financially able to employ counsel.
3 5632. Witnesses at hearings for the commitment of narcotic
4 drug addicts shall receive the usual fees and expenses allowed
5 by law in other cases in the superior courts. Any fees or travel-
6 ing expenses payable to any witness in any proceeding for the
7 commitment of a narcotic drug addict, and all expenses con-
8 nected with the execution of any process under this article,
9 which are not paid by the narcotic drug addict or his parent,
10 guardian, or other person charged with his support, if he is a
11 minor, shall be paid by the county treasurer of the county in
12 which the person resides.

13 5633. Any person committed as a narcotic drug addict
14 except such persons as have been committed under the pro-
15 visions of Section 5634, may be placed on leave of absence
16 after the expiration of three months under the same rules and
17 conditions under which the mentally ill are placed on leave
18 of absence, and the superintendent, on filing his written cer-
19 tificate with the Director of Mental Hygiene, may discharge
20 any person committed under this article after the expiration
21 of three months and before the expiration of the maximum
22 term of confinement when such superintendent is satisfied that
23 the person will not receive substantial benefit from further
24 hospital treatment.

25 5634. If, when a girl or boy is brought before a juvenile
26 court under the Juvenile Court Law, or if, on the arrest of any
27 person charged with crime in any court, it appears to the
28 court, either before or after adjudication, that such person is
29 a narcotic drug addict within the meaning of this article, the
30 court may adjourn the proceedings or suspend the sentence,
31 as the case may be, and direct some suitable person to take
32 proceedings under this article against the person before the
33 court, and the court may order that, pending the preparation,
34 filing, and hearing of the petition, the person before the court
35 be detained in a place of safety, or if a minor, be placed under
36 the guardianship of some suitable person on his entering into
37 a recognizance for the appearance of the person upon trial or
38 under conviction when required. If, upon the hearing of the
39 petition, or upon a subsequent hearing, the person before the
40 court, upon trial, or under conviction, is found not to be a
41 narcotic drug addict, the court may proceed with the trial or
42 impose sentence, as the case may be. If the person is com-
43 mitted to the hospital as a narcotic drug addict and has been
44 detained therein for a period of not less than three months
45 whenever thereafter the superintendent of the institution
46 wherein the addict is confined certifies to the committing court
47 that the person has been sufficiently treated, or gives any other
48 reason which is deemed by the court to be adequate and suffi-
49 cient, the court may order the discharge of the person so com-
50 mitted, or may order his return to await the further action of
51 the court.

1 5635. Any person who knowingly and maliciously attempts
2 to have any person adjudged a narcotic drug addict under this
3 article, unlawfully, is guilty of a misdemeanor.

4
5 Article 6. Habit-forming Drug Addicts
6

7 5650. A "habit-forming drug addict," within the meaning
8 of this article, is any person who is so far addicted to the
9 intemperate use of habit-forming drugs, other than narcotic
10 drugs as provided in Section 5625 of this code, as to have lost
11 the power of self-control.

12 As used in this article the term "habit-forming drugs"
13 shall be construed to refer to and mean those dangerous drugs
14 designated in Article 8 (commencing with Section 4210) of
15 Chapter 9, Division 2 of the Business and Professions Code,
16 which are habit-forming drugs.

17 5651. Whenever it appears by affidavit to the satisfaction
18 of a magistrate of a county that any person is so far addicted
19 to the intemperate use of habit-forming drugs as to have lost
20 the power of self-control, he shall issue and deliver to some
21 peace officer for service a warrant directing that the person be
22 apprehended and taken before a judge of the superior court
23 for a hearing and examination. The officer shall thereupon
24 apprehend and detain the person until a hearing and examina-
25 tion can be had. At the time of the apprehension a copy of
26 the affidavit and warrant of apprehension shall be personally
27 delivered to the person.

28 Wherever in this article the term "stimulants" is used, such
29 term shall be construed to refer to and mean "habit-forming
30 drugs" as provided in Section 5650. All persons heretofore
31 committed under the provisions of this article as stimulant
32 addicts shall be deemed to have been committed as habit-
33 forming drug addicts.

34 5652. The affidavit and warrant of apprehension shall be
35 substantially in the form provided by Sections 5553 and 5555
36 of this code for the examination of a person alleged to be men-
37 tally ill.

38 5653. The person charged shall immediately be taken be-
